- Submit accurate Interim Expenditure Reports (IERs) (Standard 3=5 points) (Quality).
- Submit Interim Expenditure Reports (IERs) timely (Standard 4=5 points) (Timeliness).
- Submit the Final Administrative Cost Proposal (FACP) accurately (Standard 5=2 points) (Quality).
- Submit the Final Administrative Cost Proposal (FACP) timely (Standard 6=2 points) (Timeliness).
- Submit an accurate budget request (Standard 7=2 points) (Quality).
- Submit the budget request timely (Standard 8=2 points) (Timeliness).
- Submit the Contractor Audit and Settlement Report (CASR) timely (Standard 9=7 points) (Timeliness).
- Submit an accurate Provider Overpayment Report (POR) (Standard 10=5 points) (Quality).
- Submit the Provider Overpayment Report (POR) timely (Standard 11=5 points) (Timeliness).
- Submit Intermediary Workload Report (HCFA–1566) and Quarterly Supplement (HCFA–1566A) timely (Standard 12=8 points) (Timeliness).
- Submit accurate Reports of Benefit Savings (Standard 13=2 points) (Quality).
- Submit Reports of Benefit Savings timely (Standard 14=1 point) (Timeliness).
- Enter appeals data timely (Standard 15=2 points) (Timeliness).

9. Fraud and Abuse Criterion (Total Points=70)

An intermediary must administer the program in a manner that achieves maximum savings and cost avoidance for the Medicare trust funds. We will use the three standards below to evaluate an intermediary's efforts to identify and develop fraud and abuse situations. The intermediary is required to:

- Detect fraud and abuse situations (Standard 1=35 points) (Quality).
- Develop potential fraud and abuse cases (Standard 2=25 points) (Quality).
- Ensure that no payments are made to excluded providers and physicians (Standard 3=10 points) (Quality).

10. Reimbursement Criterion (Total Points=75)

An intermediary must administer the program in a manner that achieves maximum savings and cost avoidance for the Medicare trust funds. We will use the standards below to assess the intermediary's reimbursement activity. The intermediary is required to:

- Establish interim payments for hospitals to approximate reimbursable costs (Standard 1=20 points) (Quality).
- Establish interim payments for freestanding Skilled Nursing Facilities (SNFs) to approximate reimbursable costs (Standard 2=10 points) (Quality).
- Establish interim payments for freestanding HHAs to approximate reimbursable costs (Standard 3=15 points) (Quality).
- Collect Provider Overpayments timely (Standard 4=22 points) (Timeliness).
- Submit timely cost report data for the Hospital Cost Report Information System (HCRIS) (Standard 5=5 points) (Timeliness).
- Submit accurate cost report data for HCRIS (Standard 6=3 points) (Quality).

11. Management of Change Criterion (Total Points=95)

An intermediary must take measures to protect the Medicare program and the public interest. It must effectively manage Federal funds for both program payments and cost of administration in accordance with HCFA instructions. We will evaluate an intermediary's management of change with the following FY 1988 standards:

- Implement Priority I critical tasks accurately (Standard 1=25 points) (Quality).
- Implement Priority I critical tasks timely (Standard 2=35 points) (Timeliness).
- Implement "other tasks" from the Contractor Workload Management

Report accurately (Standard 3=10 points) (Quality).

• Implement "other tasks" from the Contractor Workload Management Report timely (Standard 4=10 points) (Timeliness).

• Comply with RO requests and instructions timely (Standard 5=15 points) (Timeliness).

E. Criteria and Standards for Carriers

We will use ten criteria to evaluate overall carrier performance during FY 1988. They are: (1) Unit Cost; (2) Process Claims; (3) Medical Review; (4) Medicare Secondary Payer; (5) Pricing and Coding; (6) Financial Management; (7) Beneficiary and Provider Services; (8) Reporting; (9) Fraud and Abuse; and (10) Management of Change. The ten criteria contain a total of 69 standards. There are three for unit cost, 12 for processing claims, four for medical review, one for Medicare secondary payer, eight for pricing and coding, five for financial management, 12 for beneficiary and provider services, 14 for reporting, five for fraud and abuse, and five for management of change.

1. Unit Cost Criterion (Total Points=95)

A carrier must process all claims at an acceptable unit cost.

• Process claims at an acceptable unit cost (Standard 1=75 points) (Cost).

• Process reviews, reopenings, and inquiries at an acceptable unit cost (Standard 2=10 points) (Cost).

• Process hearings at an acceptable unit cost (Standard 3=10) (Cost).

2. Process Claims Criterion (Total Points=160)

A carrier must process Part B Medicare claims to determine allowance or disallowance in accordance with general instructions. For FY 1988 we will use the following 12 standards to assess carriers' claim processing performance. The carrier is required to:

• Pay clean participating physician claims within mandated timeframes (Standard 1=25 points) (Timeliness).

• Pay other clean claims within mandated timeframes (Standard 2=25 points) (Timeliness).

• Pay all claims within 60 days (Standard 3=12 points) (Timeliness).

• Pay all claims within 90 days (Standard 4=8 points) Timeliness).

• Control payment of interest on clean claims (Standard 5=20 points) (Timeliness).

• Maintain satisfactory underpayment deductible error rate (Standard 6=25 points) (Quality).

• Maintain satisfactory overpayment deductible error rate (Standard 7=25 points) (Quality).

• Prepare payment record tapes accurately (Standard 8=5 points) (Quality).

• Submit payment records in accordance with HCFA requirements (Standard 9=3 points) (Timeliness).

• Correct payment record rejects timely (Standard 10=2 points) (Timeliness).

• Generate Explanation of Medicare Benefits (EOMBs) properly (Standard 11=5 points) (Quality).

• Ensure Regional Office (RO) approval of special messages (Standard 12=5 points) (Quality).

3. Medical Review Criterion (Total Points=125)

A carrier must perform necessary medical review activities in accordance with HCFA instructions accurately, timely, and in a cost-effective manner. The carrier is required to:

• Make accurate coverage decisions based on Carriers' Guidelines (Standard 1=60 points) (Quality).

• Administer a cost effective Medical Review (MR) program (Standard 2=30 points) (Cost).

• Conduct an effective postpayment program (Standard 3=20 points) (Quality).

• Apply appropriate HCFA MR policies (Standard 4=15 points) (Quality).

4. Medicare Secondary Payer Criterion (Total Points=80)

A carrier must administer the Medicare program in a manner which achieves maximum savings and cost avoidance to the Medicare trust funds. We will use the standards below to evaluate a carrier's administration of the Medicare Secondary Payer provisions. The carrier is required to:

• Achieve Medicare Secondary Payer (MSP) savings goal (Standard 1=80 points) (Cost).

5. Pricing and Coding Criterion (Total Points=100)

A carrier must accurately determine the amount of program payments allowed for covered services. For FY 1988 we will use the following eight standards to assess a carrier's pricing and coding performance. The carrier is required to:

• Install and implement appropriate pricing accurately for Medicare covered new and cross referenced HCFA's Common Procedure Coding System (HCPCS) codes (Standard 1=10 points) (Quality).

• Implement HCFA's Common Procedure Coding System (HCPCS) annual update timely (Standard 2=10 points) (Timeliness).

• Perform reasonable charge determinations accurately (Standard 3=15 points) (Quality).

• Update reasonable charges and install by due date (Standard 4=20 points) (Timeliness).

• Install correction of reasonable charge screens by RO due date (Standard 5=15 points) (Timeliness).

• Comply with manual requirements on inherent reasonableness accurately (Standard 6=10 points) (Quality).

• Compute Maximum Allowable Actual Charges (MAACs) accurately (Standard 7=10 points) (Quality).

• Make MAACs available to providers by due date (Standard 8=10 points) (Timeliness).

6. Financial Management Criterion (Total Points=65)

A carrier must take measures to protect the Medicare program and the public interest. It must manage Federal funds for both program payments and the cost of administration in accordance with its agreement with the Secretary, the Federal Acquisition Regulations (Title 48, Chapter 1), the HHS Acquisition Regulations (Title 48, Chapter 3), and HCFA instructions. We will use the standards below to evaluate the criterion in FY 1988. The carrier is required to:

• Ensure that costs are allowable, allocations are consistent (provide reasonable assurance that comparable transactions are treated alike) and chargeable to a particular cost objective in accordance with the relative benefits received or other equitable relationship (Standard 1=15 points) (Quality).

• Control administrative funds drawn to the quarterly limit on the Notice of Budget Approval (NOBA) and in line with actual expenditures (Standard 2=15 points) (Quality).

• Control actual expenditures to the latest approved budget (Standard 3=13 points) (Quality).

• Manage the benefit and time accounts properly and in accordance with the Medicare bank agreement (Standard 4=8 points) (Quality).

• Ensure proper expenditure of Payment Safeguard Funds (Standard 5=14 points) (Quality).

7. Beneficiary and Provider Services Criterion (Total Points=150)

A carrier must ensure that, in Medicare matters, beneficiaries and providers are treated according to law, regulations, and general instructions covering areas such as responding to correspondence, issuing notices of determinations, and providing impartial

reviews. The carrier is responsible to meet the following standards:

- Maintain proper level of telephone service (Standard 1=25 points) (Timeliness).
- Respond timely to telephone inquiries (Standard 2=5 points) (Timeliness).
- Complete reviews accurately (Standard 3=30 points) (Quality).
- Furnish readable notice to beneficiary of review determinations (Standard 4=10 points) (Quality).
- Complete reviews timely (Standard 5=20 points) (Timeliness).
- Respond accurately to correspondence (Standard 6=25 points) (Quality).
- Furnish readable response to beneficiary correspondence (Standard 7=10 points (Quality).
- Respond timely to all correspondence (Standard 8=10 points) (Timeliness).
- Sent out letters timely to physicians and suppliers offering them the opportunity to become a Medicare participant (Standard 9=5 points) (Timeliness).
- Prepare MEDPARD timely (Standard 10=5 points) (Timeliness).
- Determine liability and properly dispose of beneficiary overpayment cases (Standard 11=5 points) (Quality).
- Complete carrier hearings timely (Standard 12=0 points) (Timeliness).

8. Reporting Criterion (Total Points=60)

A carrier must manage Federal funds for both program payments and cost of administration in accordance with its agreement with HHS and HCFA. We will use the 14 standards below to assess a carrier's reporting function in FY 1988. The carrier is required to:

- Submit accurate Plan of Expenditure Reports (POEs) and Variance Analyses (Standard 1=6 points) (Quality).
- Submit timely Plan of Expenditure Reports (POEs) and Variance Analyses (Standard 2=6 points) (Timeliness).
- Submit accurate Interim Expenditure Reports (IERs) (Standard 3=5 points) (Quality).
- Submit Interim Expenditure Reports (IERs) timely (Standard 4=5 points) (Timeliness).
- Submit the Final Administrative Cost Proposal (FACP) accurately (Standard 5=2 points) (Quality).
- Submit the Final Administrative Cost Proposal (FACP) timely (Standard 6=2 points) (Timeliness).
- Submit an accurate budget request (Standard 7=2 points) (Quality).
- Submit the budget request timely (Standard 8=2 points) (Timeliness).
- Submit Carrier Performance Report (HCFA-1565) and Quarterly Supplement (HCFA-1565A) timely (Standard 9=9 points) (Timeliness).
- Submit accurate Quarterly Medical Review Reports (Standard 10=2 points) (Quality).
- Submit Quarterly Medical Review Reports timely (Standard 11=1 points). (Timeliness).
- Submit Quality Assurance Program (QAP) Reports timely (Standard 12=7 points) (Timeliness).
- Submit timely physician/supplier overpayment data (Standard 13=4 points) (Timeliness).
- Submit Part B Medicare (BMAD) files timely (Standard 14=7 points) (Timeliness).

9. Fraud and Abuse Criterion (Total Points=70)

A carrier must administer the program in a manner that achieves maximum savings and cost avoidance for Medicare trust funds. We will use the following standards to evaluate a carrier's efforts to identify and develop fraud and abuse situations. The carrier is required to:

- Detect fraud and abuse situations (Standard 1=20 points) (Quality).
- Develop potential fraud and abuse cases (Standard 2=20 points) (Quality).
- Ensure that no payments are made to excluded physicians/suppliers (Standard 3=10 points) (Quality).
- Monitor Participating Physician Agreement violations (Standard 4=10 points) (Quality).
- Monitor nonparticipating physician Minimum Allowable Actual Charge (MAAC) violations (Standard 5=10 points) (Quality).

10. Management of Change Criterion (Total Points=95)

A carrier must take measures to protect the Medicare program and the public interest. It must effectively manage Federal funds for both program payments and cost of administration in accordance with HCFA instructions. We will evaluate a carrier's management of change with the following FY 1988 standards:

- Implement Priority I critical tasks accurately (Standard 1=25 points) (Quality).
- Implement Priority I critical tasks timely (Standard 2=35 points) (Timeliness).
- Implement "other tasks" from the Contractor Workload Management Report accurately (Standard 3=10 points) (Quality).
- Implement "other tasks" from the Contractor Workload Management Report timely (Standard 4=10 points) (Timeliness).
- Comply with RO requests and instructions timely (Standard 5=15 points) (Timeliness).

F. DEFRA Methodology

For FY 1988, the methodology for separately identifying Part A and Part B contractors for replacement under section 2326 of DEFRA will be as follows:

- Performance, as measured by the Secretary's criteria and standards, will be considered for the 3 fiscal years 1986, 1987, and 1988.
- Each year's overall performance will be captured in the form of an unweighted, base efficiency rating—points earned as a percentage of points available, as determined by the performance criteria and standards.
- Each year's efficiency rating will be weighted to provide extra emphasis for the most recent performance. The weights, to be multiplied by each year's efficiency rating, are:

Year	Weight
1988	3
1987	2
1986	1

- Each year's weighted efficiency rating will be summed and the contractors ranked (Part A and Part B separately) from highest points to lowest points.
- Careful study of the bottom 20th percentile of contractors will be undertaken to fully assess considerations such as performance that is improving/deteriorating, factors beyond the contractor's control, and other factors pertinent to a particular territory.

G. Regulatory Impact Statement

1. Executive Order 12291

Executive Order 12291 (E. O. 12291) requires us to prepare and publish a regulatory impact analysis for any notice such as that that meets one of the E. O. criteria for a "major rule"; that is, that would be likely to result in: An annual effect on the economy of $100 million or more; a major increase in costs or prices for consumers, individual industries, Federal, State, or local government agencies, or geographic regions; or, significant adverse effects on competition, employment, investment, productivity, innovation, or on the ability of United States-based enterprises to compete with foreign-

VOL
52
ISS
194
OC
7
1987
UMI

based enterprises in domestic or export markets.

We do not expect this notice to meet any of these criteria. Preliminary analyses reveal that the FY 1988 CPEP may reduce, by almost 30 percent, the Federal resources required to administer these criteria and standards. These resource savings are primarily a result of increased focus on results and output-oriented measures. Further, more efficient evaluation methodologies are being used. We expect little, if any, impact on contractor costs since the criteria and standards measure functional responsibilities that the contractor must be performing anyway as a Medicare contractor.

We also expect the effects on both competition and productivity to be favorable, not adverse, and the effects, if any, on employment, investment, and innovation to be negligible. For these reasons, we have determined that a regulatory impact analysis is not required.

2. Regulatory Flexibility Act

We generally prepare a regulatory flexibility analysis that is consistent with the Regulatory Flexibility Act (RFA) (5 U.S.C. 601 through 612), unless the Secretary certifies that a notice such as this would not have a significant economic impact on a substantial number of small entities. For purposes of the RFA, intermediaries and carriers are not small entities, although we treat all providers and suppliers as small entities.

The direct effect of this notice is on our intermediaries and carriers. Since they are not small entities, even though we expect this notice to have an effect on contractor operations, an analysis of that impact is not required. However, it is clear that many standards, such as those governing bill processing, beneficiary services, and provider services, will have indirect effects on a substantial number of providers and suppliers. Therefore, in order to verify that a regulatory flexibility analysis is not required, we assessed whether the indirect impact on those small entities will be significant.

Generally, the operations to which the standards of the intermediary and carrier performance criteria refer are required by law, other regulations, contract, or other program instructions. These criteria provide an evaluation process and do not in themselves require the performance of the operations they evaluate. The most important indirect effect on providers and suppliers is to ensure that they are paid timely and accurately. We do not expect these criteria and standards to have any indirect adverse effects on them. Therefore, we have determined that the evaluation process in and of itself will not have a significant impact on providers and suppliers.

For these reasons, we have determined, and the Secretary certifies, that this notice would not have a significant economic impact on a substantial number of small entities, and we have therefore not prepared a regulatory flexibility analysis.

3. Paperwork Reduction Act

This notice contains no information collection requirements subject to EOMB approval under the Paperwork Reduction Act of 1980 (44 U.S.C. 3501 *et seq.*).

(Sec. 1102, 1816, 1842, and 1871 of the Social Security Act (42 U.S.C. 1302, 1395h, 1395u, and 1395hh))

BILLING CODE 4120-01-M

Medicaid Program; Hearing; Reconsideration of Disapproval of Two Illinois State Plan Amendments

AGENCY: Health Care Financing Administration (HCFA), HHS.

ACTION: Notice of hearing.

SUMMARY: This notice announces an administrative hearing on November 18, 1987 in Chicago, Illinois to reconsider our decision to disapprove Illinois State Plan Amendments 86-15, 87-12.

Closing Date: Requests to participate in the hearing as a party must be received by the Docket Clerk on or before October 22, 1987.

FOR FURTHER INFORMATION CONTACT: Docket Clerk, Hearing Staff, Bureau of Eligibility, Reimbursement and Coverage, 300 East High Rise, 6325 Security Boulevard, Baltimore, Maryland 21207, Telephone: (301) 594-8261.

SUPPLEMENTARY INFORMATION:

This notice announces an administrative hearing to reconsider our decision to disapprove two Illinois State Plan Amendments.

Section 1116 of the Social Security Act and 45 CFR Parts 201 and 213 establish Department procedures that provide an administrative hearing for reconsideration of a disapproval of a State plan or plan amendment. HCFA is required to publish a copy of the notice to a State Medicaid Agency that informs the agency of the time and place of the hearing and the issues to be considered. (If we subsequently notify the agency of additional issues which will be considered at the hearing, we will also publish that information in a notice.)

Any individual or group that wants to participate in the hearing as a party must petition the Hearing Officer within 15 days after publication of this notice, in accordance with the requirements contained in 45 CFR 213.15(b)(2). Any interested person or organization that wants to participate as amicus curiae must petition the Hearing Officer before the hearing begins in accordance with the requirements contained in 45 CFR 213.15(c)(1).

If the hearing is later rescheduled, the Hearing Officer will notify all participants.

The issue in this matter is whether the two Illinois State plan amendments (SPAs) violate the requirements of sections 1905(a)(16) and 1905(h), section 1905(a)(14), and paragraph (B) following 1905(a)(21) of the Social Security Act and Federal regulations at 42 CFR Parts 440 and 441 and 42 CFR 440.140.

The State of Illinois submitted SPA 86-15 which would allow coverage of substance and alcohol abuse treatment services under the optional rehabilitative services benefit. These services would be provided in licensed freestanding alcohol and drug abuse treatment centers and would include short-term inpatient residential services for detoxification and rehabilitation for individuals up to age 21 and over 64; short-term rehabilitation in an intensive outpatient setting; other outpatient services, and psychiatric diagnostic services. Illinois 87-12 is identical in substance to SPA 86-15 except that it would expand eligibility for short-term residential recipients between the ages of 21 and 65.

HCFA disapproved those portions of Illinois SPA 86-15 and 87-12 which relate to short-term residential rehabilitation services because they would involve the provision of inpatient care not covered under the Medicaid statute. Medicaid payment can only be made for services provided in facilities which meet the Medicaid definition of hospitals, skilled nursing facilities, and intermediate care facilities. Moreover, in order for services for individuals up to age 21 and over 64 to be covered they must meet the statutory and regulatory requirements relating to inpatient psychiatric services for individuals under age 22 (sections 1905(a)(16) and 1905(h) of the law and regulations at 42 CFR Parts 440 and 441) and IMD

services for individuals over age 65 (section 1905(a)(14) of the law and regulations at 42 CFR 440.140. These provisions of law require, inter alia, that services to individuals under age 22 must be provided in a facility which is a psychiatric hospital as defined in section 1861(f) (section 1905(h)(1)(A) of the Act); that services to individuals over age 65 must provided in facilities which meet the requirements for psychiatric hospitals at 42 CFR 482.60.

Also, HCFA has determined that the inpatient services the additional individuals (i.e., individuals between the ages of 22 and 65) would receive under proposed Illinois SPA 87–12, could not be covered under Medicaid for another reason. HCFA has determined Illinois SPA 87–12 violates the Medicaid statutory prohibition (in paragraph (B) following section 1905(a)(21) of the Social Security Act) against payment on behalf of individuals between the ages of 22 and 65 who are in institutions for mental diseases (IMDs). HCFA has determined that the inpatient facilities described in the SPA are institutions "primarily engaged in providing diagnosis, treatments, or care of individuals with mental diseases, including medical care, nursing care and related services" (42 CFR 440.140(a)(2)). Thus, they meet the Medicaid definition of institutions for mental diseases.

The notice to Illinois announcing an administrative hearing to reconsider the disapproval of its State plan amendments reads as follows:

Mr. Edward L. Duffy
Director, Illinois Department of Public Aid, Jesse B. Harris Building, 100 South Grand Avenue East, Springfield, Illinois 62762

Dear Mr. Duffy: This is to advise you that your request for reconsideration of the decision to disapprove Illinois State Plan Amendment (SPA) 86–15 and 87–12 was received on August 27, 1987.

Illinois SPAs 86–15 and 87–12 propose to offer, as rehabilitative services under the State plan, inpatient and outpatient treatment for alcohol and substance abuse patients. Illinois SPA 87–12 alters that proposal by including in it inpatient residential services for individuals from the ages of 21 to 65.

There are two issues in this matter. The first issue concerns the need to determine whether Illinois' proposed amendments are consistent with the law and regulations governing inpatient care (section 1905(a)(16) and 1905(h) and section 1905(a)(14) of the Social Security Act and Federal regulations at 42 CFR Parts 440 and 441). Specifically, a determination needs to be made as to whether Illinois' proposed amendments are consistent with those provisions of law which require, inter alia, that services to individuals under age 22 be provided in a facility which is a psychiatric hospital as defined in section 1861(f) of the Act (section 1905(h)(1)(A)); and that services to individuals over age 65 must be provided in facilities which meet requirements for psychiatric hospitals at 42 CFR 482.60. The second issue concerns the need to determine whether the inpatient facilities described in Illinois 87–12 meet the definition of institutions for mental diseases in 42 CFR 440.140(a)(2) therefore violating the statutory prohibition in paragraph B following section 1905(a)(21) of the Social Security Act against payment on behalf of individuals between the ages of 22 and 65 who are in institutions.

I am scheduling a hearing on your request to be held on November 18, 1987 at 10:00 a.m. in Suite 835–A Conference Room, 175 W. Jackson Boulevard, Chicago, Illinois. If this date is not acceptable, we would be glad to set another date that is mutually agreeable to the parties.

I am designating Mr. Albert Miller as the presiding official. If these arrangements present any problems, please contact the Docket Clerk. I order to facilitate any communication which may be necessary between the parties to the hearing, please notify the Docket Clerk of the names of the individuals who will represent the State at the hearing. The Docket Clerk can be reached at (301) 594–8261.

Sincerely,

William L. Roper,
Administrator.

BILLING CODE 4120–03–M

National Institutes of Health

National Institute on Aging; Board of Scientific Counselors; Amended Notice of Meeting

Notice is hereby given of a change in the meeting of the Board of Scientific Counselors, National Institute on Aging (NIA), October 26–28, 1987, which was published in the **Federal Register** on Thursday, September 3, (52 FR 33476).

The Board was to have convened for three days on October 26, 27 and 28, but has been rescheduled to meet on Monday, October 26, and Tuesday, October 27, at the Gerontology Research Center, Baltimore, Maryland.

The meeting will be open to the public on October 26 and 27 from 9:30 a.m. until approximately 4:00 p.m. The meeting will be closed to the public on October 26 and 27 from 4:00 p.m. until adjournment each day.

Ms. June C. McCann, Committee Management Officer, NIA, Building 31, Room 5C05, National Institutes of Health, Bethesda, Maryland 20892, (telephone: 301/496–9322) will provide a summary of the meeting and a roster of committee members. Dr. Richard C. Greulich, Scientific Director, NIA, Gerontology Research Center, Baltimore City Hospitals, Baltimore, Maryland 21224, will furnish substantive program information.

(Catalog of Federal Domestic Assistance Program No. 13.866, Aging Research, National Institutes of Health)

Dated: September 30, 1987.

Betty J. Beveridge,
Committee Management Officer, National Institutes of Health.

[FR Doc. 87–23197 Filed 10–6–87; 8:45 am]
BILLING CODE 4140–01–M

Advisory Committee to Director; Meeting

Notice is hereby given that the National Institutes of Health (NIH) will hold the third and fourth meetings of a series of seven regional public briefing meetings to be conducted under the auspices of the Advisory Committee to the Director, NIH, on "The Health of Biomedical Research Institutions." The purpose of the meetings is two-fold:

(1) To provide current information concerning the activities of the NIH by describing the broad political context in which the NIH operates, discussing the Federal budget process as it affects the formulation of the NIH budget, demonstrating recent trends in the funding of NIH programs, discussing the broad strategies adopted by NIH to meet emerging needs, and describing new NIH policies and programs designed to achieve program objectives; and

(2) To solicit through public testimony the views of biomedical researchers, university faculty and administrators, representatives of professional societies, and other interested parties concerning the impact of the Federal system of sponsored research on the health of biomedical research institutions.

The third meeting will be held on Thursday, December 3, 1987, from 8:30 a.m. to 5:00 p.m. at New York University. The fourth will be held on December 4, 1987, from 8:30 a.m. to 5:00 p.m. at the Forsyth Dental Center, Boston, Massachusetts. Notice of the time and location of additional meetings will be published later.

Following presentations by the Director, NIH, and his senior staff, a panel comprised of members of the Advisory Committee to the Director, NIH; representatives of NIH national advisory councils; and senior NIH staff will spend the remainder of the day

receiving testimony from public witnesses. Each witness will be limited to a maximum of ten minutes. Attendance and the number of presentations will be limited to the time and space available. Consequently, all individuals wishing to attend or to present a statement at this public meeting should notify, in writing, Jay Moskowitz, Ph.D., Executive Secretary, National Institutes of Health, Shannon Building, Room 137, Bethesda, Maryland 20892. Those planning to make a presentation should file a one-page summary of their remarks with Dr. Moskowitz by October 30, 1987; a copy of the full text of these remarks should be submitted for the record at the time of the meeting. Please indicate which of the two meetings you plan to attend. Additional information may be obtained by calling Mr. Edward Lynch, Division of Program Analysis, Office of Program Planning and Evaluation, National Institutes of Health, at (301) 496–1454.

Dated: September 29, 1987.

James B. Wyngaarden,

Director, National Institutes of Health.

BILLING CODE 4140–01–M

DEPARTMENT OF THE INTERIOR

Bureau of Land Management

[WYO60–07–4322–12]

Casper District Grazing Advisory Board; Meeting

AGENCY: Bureau of Land Management, Interior.

ACTION: District Grazing Advisory Board meeting.

SUMMARY: The Casper District Grazing Advisory Board will meet at 10:00 a.m. on November 9, 1987. The meeting will convene at the BLM Casper District Office, 1701 East "E" Street, Casper, Wyoming. The agenda will include: (1) Discussion of past resolutions; (2) range improvement projects and allotment management plans; (3) new business; and (4) a public comment period.

DATE: November 9, 1987; 10:00 a.m.

ADDRESS: To request summary minutes or time on the agenda, contact: Bureau of Land Management, Casper District Office, 1701 East "E" Street, Casper, WY 82601.

SUPPLEMENTARY INFORMATION: This meeting is held in accordance with Section 3, Executive Order 12548 of February 14, 1986. The meeting is open to the public. Time will be available for public statements to the Board. Interested persons may testify or submit written statements for Board consideration. Anyone wishing to make an oral statement should notify the district manager by November 9, 1987. Depending on the number of persons wishing to make statements, a per-person time limit may be imposed by the district manager.

Summary minutes of the Board meeting will be maintained in the district office and be available for public inspection within 30 days following the meeting.

FOR FURTHER INFORMATION CONTACT: Kate DuPont, (307) 261–5557.

James W. Monroe,

District Manager

BILLING CODE 4310–22–M

Eugene District Advisory Council; Meeting

Notice is hereby given in accordance with Section 309 of the Federal Land Policy and Management Act of 1976 that a meeting of the Eugene District Advisory Council will be held on November 13, 1987, at 9:00 a.m., Pacific Standard Time, in room 227, Federal Building, 211 E. 7th, Eugene, Oregon.

The main agenda item will be an update on the Eugene District's progress in completing its 10-year management plan.

The meeting is open to the public. Interested persons may make oral statements to the Council at the end of the meeting or file written satements for the Council's consideration. Anyone desiring to make an oral statement must notify the District Manager, Bureau of Land Management, 1255 Pearl St., Eugene, Oregon 97401, by November 12, 1987. A per-person time limit may be established by the District Manager, depending on the number of persons wanting to address the Council.

Summary minutes of the Council meeting will be maintained in the District Office and will be available for public inspection and reproduction during regular business hours within 30 days following the meeting.

Melvin D. Clausen,

District Manager.

BILLING CODE 4310–33–M

[CA–940–07–4220–10; CA 20624]

California; Filing of Withdrawal Application

AGENCY: Bureau of Land Management, Interior.

ACTION: Notice of filing of withdrawal application.

SUMMARY: On July 23, 1987, the Regional Forester, Pacific Southwest Region, Forest Service, U.S. Department of Agriculture, filed an application under the provisions of section 204 of the Federal Land Policy and Management Act of 1976 (43 U.S.C. 1714) to withdraw the following described national forest land from appropriation under the general mining laws (30 U.S.C., Ch. 2), subject to valid existing rights:

Mount Diablo Meridian, California

Plumas County

Plumas National Forest

T. 25, N., R. 9 E.,
Sec. 15, W½NE¼SW¼, NE¼SW¼SW¼, NW¼SE¼SW¼, W½NE¼SE¼SW¼, E½NW¼SW¼, W½E½NE¼SW¼, S½SE¼SW¼, and SE¼SW¼ SW¼NW¼.

Containing 82.50 acres.

FOR FURTHER INFORMATION CONTACT: Viola Andrade, California State Office, (916) 978–4815.

The purpose of the withdrawal application is for the development of a 39-unit campground, group camp, day use area, and amphitheater. During the segregation period the land will be managed for dispersed recreation uses.

The application and the case file pertaining to it are available for public inspection at the California State Office, Bureau of Land Management, E–2841 Federal Office Building, 2800 Cottage Way, Sacramento, California 95825.

For a period of 90 days from the date of publication of this notice, all persons who wish to submit comments, suggestions, or objections concerning the proposed withdrawal may present their views, in writing, to the undersigned officer, at the above address.

Notice is hereby given that all persons who desire that a public meeting be held must submit a written request to the undersigned officer at the above address within 90 days from the date of publication of this notice. If the State Director, Bureau of Land Management, determines that a public meeting will be held, a notice of the time and place will be published in the **Federal Register** at least 30 days prior to the scheduled date of the meeting.

The application will be processed in accordance with the regulations set forth in Part 2300 of Title 43, Code of Federal Regulations.

The publication of this notice in the **Federal Register** shall segregate the lands described in the application to the extent that they shall not be subject to

appropriation under the general mining laws (30 U.S.C., Ch. 2), for a period of 2 years from the date of publication in the **Federal Register**, unless the application is allowed or denied or cancelled, in whole or in part, prior to the expiration of the 2-year period. The 2-year segregative period does not alter the applicability of those public land laws governing the use of the land under lease, license, or permit, or governing the disposal of their mineral or vegetative resources other than under the mining laws.

Inquiries concerning the land should be addressed to the Forest Supervisor, Plumas National Forest, 159 Lawrence Street, Quincy, California 95971.

Dated: September 28, 1987.

Nancy J. Alex,

Acting Chief, Branch of Adjudication & Records.

BILLING CODE 4310-40-M

Fish and Wildlife Service

[FES 87-44]

Availability of Final Environmental Impact Statement; Tetlin National Wildlife Refuge, Alaska

AGENCY: Fish and Wildlife Service, Interior.

ACTION: Notice of Availability of a final environmental impact statement for the proposed Comprehensive Conservation Plan and Wilderness Review for Tetlin National Wildlife Refuge, Alaska.

SUMMARY: The U.S. Fish and Wildlife Service has prepared a Final Comprehensive Conservation Plan, Environmental Impact Statement, and Wilderness Review (plan) for the Tetlin National Wildlife Refuge, Alaska, pursuant to sections 304(g)(1), 1008, and 1317 of the Alaska National Interest Lands Conservation Act of 1980 (Alaska Lands Act); section 3(d) of the Wilderness Act of 1964; and section 102(2)(C) of the National Environmental Policy Act of 1969. The final plan describes five alternatives for managing the refuge and the environmental consequences of implementing each alternative. The document also reviews the suitability of all the federal lands in the refuge for possible wilderness designation and inclusion in the National Wilderness Preservation System.

DATE: A Record of Decision will be issued no sooner than November 15, 1987.

FOR FURTHER INFORMATION CONTACT: William Knauer, Refuges and Wildlife, U.S. Fish and Wildlife Service, 1011 E. Tudor Road, Anchorage, Alaska 99503; telephone (907) 786-3399.

SUPPLEMENTARY INFORMATION: A summary of the final plan has been prepared and will be sent to all persons and organizations who participated in any part of the planning process, such as scoping meetings, workshops, or in other types of communication with the planning team. Copies of the complete final plan will be sent to federal and state agencies, regional and village Native corporations, local governments, and other organizations and individuals who have already requested copies. A limited number of copies of both documents are available upon request from Mr. Knauer.

Copies of the complete final plan are available at the office of the Regional Director, at the above address; at the Tetlin National Wildlife Refuge Office, P.O. Box 155, Tok, Alaska 99780, and at the following locations:

U.S. Fish and Wildlife Service, Division of Refuge Management, U.S. Department of the Interior Bldg., 18th & C Streets NW., Washington, DC 20240

U.S. Fish and Wildlife Service, Refuges and Wildlife, 500 NE Multnomah Street Suite 1692, Portland, OR 97232

U.S. Fish and Wildlife Service, Refuges and Wildlife, 500 Gold Avenue SW., Room 1306, Albuquerque, NM 87103

Minerals Management Service

Outer Continental Shelf Development Operations Coordination Document; Kerr-McGee

AGENCY: Minerals Management Service, Interior.

ACTION: Notice of the receipt of a proposed development operations coordination document (DOCD).

SUMMARY: Notice is hereby given that Kerr-McGee has submitted a DOCD describing the activities it proposes to conduct on Lease OCS-G 4412, Block 2, East Cameron Area, offshore Louisiana. Proposed plans for the above area provide for the development and production of hydrocarbons with support activities to be conducted from an onshore base located at Grand Chenier, Louisiana.

DATE: The subject DOCD was deemed submitted on September 29, 1987.

ADDRESS: A copy of the subject DOCD is available for public review at the Public Information Office, Gulf of Mexico OCS Region, Minerals Management Service, 1201 Elmwood Park Boulevard, Room 114, New Orleans, Louisiana (Office Hours: 8 a.m. to 4:30 p.m., Monday through Friday).

FOR FURTHER INFORMATION CONTACT: Michael J. Tolbert; Minerals Management Service, Gulf of Mexico OCS Region, Field Operations, Plans, Platform and Pipeline Section, Exploration/Development Plans Unit; Telephone (504) 736-2867.

SUPPLEMENTARY INFORMATION: The purpose of this Notice is to inform the public, pursuant to section 25 of the OCS Lands Act Amendments of 1978, that the Minerals Management Service is considering approval of the DOCD and that it is available for public review.

Revised rules governing practices and procedures under which the Minerals Management Service makes information contained in DOCDs available to affected States, executives of affected local governments, and other interested parties became effective December 13, 1979 (44 FR 53685). Those practices and procedures are set out in revised § 250.34 of title 30 of the CFR.

Date: September 30, 1987.

J. Rogers Pearcy,

Regional Director, Gulf of Mexico OCS Region.

Office of Surface Mining Reclamation and Enforcement

Information Collection Submitted to the Office of Management and Budget for Review Under the Paperwork Reduction Act

The proposal for the collection of information listed below has been submitted to the Office of Management and Budget for approval under the provisions of the Paperwork Reduction Act (44 U.S.C. Chapter 35). Copies of the proposed collection of information and related forms and explanatory material may be obtained by contacting the Bureau's clearance officer at the phone number listed below. Comments and suggestions on the requirement should be made within 30 days directly to the Bureau clearance officer and to the Office of Management and Budget Interior Department Desk Officer, Washington, DC 20503, telephone 202-395-7340.

Title: 30 CFR Part 780—Surface Mining Permit Applications—Minimum Requirements for Reclamation and Operations Plan

Abstract: This information is needed to fulfill the requirements of sections 507, 508 and 515 of Pub. L. 95-87 and is used by the regulatory authority in determining whether the applicant can meet the performance standards of the regulations and the environment protection standards of the regulatory program.

INTERNATIONAL TRADE COMMISSION

[Investigation No. 337-TA-242]

Import Investigation; Errata To Commission Action and Order; Certain Dynamic Random Access Memories, Components Thereof and Products Containing Same

On September 21, 1987, the Commission issued an Action and Order in the above-captioned investigation, disposing of the issues on review and issuing a limited exclusion order prohibiting the entry of infringing DRAMs of 64 and 256 kilobits (and any combination thereof such as 128 kilobits) manufactured by Samsung Company, Ltd. and/or Samsung Semiconductor & Telecommunications Co., Ltd., whether assembled or unassembled. The Commission's order also prohibits the entry of infringing DRAMs of 64 or 256 kilobits (and any combination thereof such as 128 kilobits) manufactured by Samsung Company, Ltd., and/or Samsung Semiconductor & Telecommunications Co., Ltd., incorporated into a carrier of any form, including Single-Inline-Packages and Single-Inline-Modules, or assembled onto circuit boards of any configuration. The Commission has also determined to prohibit the entry of computers (such as mainframe, personal, and small business computers), facsimile equipment, telecommunications switching equipment, and printers containing infringing DRAMs of 64 or 256 kilobits (and any combination thereof such as 128 kilobits) manufactured by Samsung Company, Ltd. and/or Samsung Semiconductor & Telecommunications Co., Ltd.

It has come to the Commission's attention that there is a typographical error in paragraph 8 of the Commission's Order, which may lead to confusion in the application of the bonding provision of the Order, since it refers to the wrong paragraph of the Order (i.e., paragraph 6 rather than paragraph 7) in establishing the amount of the bond. Therefore, the Commission is issuing this errata. Paragraph 8 of the Commission's September 21, 1987, Order is corrected to read as follows:

8. Products identified in paragraphs (2), (3), (4), or (5) of this Order are entitled to entry into the United States from the day after this Order is received by the President, pursuant to subsection (g) of section 337 of the Tariff Act of 1930, until such time as the President notifies the Commission that he approves or disapproves this action, but no later than 60 days after the date of receipt of this Order by the President, under bond in the amounts identified in paragraph (7) of this Order. Persons importing such products shall certify to the best of their knowledge the number of DRAMs subject to this Order contained in such products, pursuant to procedures to be specified by the U.S. Customs Service;

By order of the Commission.

Kenneth R. Mason,

Secretary.

Issued: October 1, 1987.

[FR Doc. 87-23206 Filed 10-6-87; 8:45 am]

BILLING CODE 7020-02-M

[Investigation No. 337-TA-272]

Import Investigation; Commission Decision to Review and Affirm With Modification an Initial Determination Terminating Two Respondents and Adding One Respondent; Certain Electronic Crime Modules

AGENCY: International Trade Commission.

ACTION: Determination to review and affirm with modification an initial determination terminating two respondents and adding one respondents.

SUMMARY: Notice is hereby given that the Commission has determined to review and affirm with modification an initial determination (ID) (Order No. 1) issued by the presiding administrative law judge (ALJ) in the above-captioned investigation. The ID granted the motion (Motion No. 272-1) of respondents Invotec Instrument, Inc. (Invotec) and Invotec Instruments, Inc., Invotronics Division (Division) to dismiss them as respondents and add Aimco, Inc. (Aimco) as a proper respondent.

SUPPLEMENTARY INFORMATION: On July 30, 1987, the Commission voted to institute this investigation and named as respondents Modu-Tronics, Inc., Invotec, and Division. On August 20, 1987, respondents Invotec and Division moved to be dismissed from the investigation because they were improperly named as respondents.

VOL
52
ISS
194
OC
7
1987
UMI

Invotec and Division also moved to have Aimco substituted for them as the proper respondent. The motion was unopposed by complainant Lectron Products, Inc.

On August 31, 1987, the presiding ALJ issued an ID granting the respondent's motion. No petitions for review of the ID or Government agency comments were received. As Order No. 1 did not state that the complaint and notice of investigation were amended to reflect the termination of Invotec and Division as respondents and the addition of Aimco as a respondent, the Commission has ordered that the ID be amended to include such amendment.

The authority for the Commission's disposition of this matter is contained in section 337 of the Tariff Act of 1930 (19 U.S.C. 1337) and in §§ 210.53, 210.55, and 210.56 of the Commission's rules (19 CFR 210.53, 210.55, and 210.56).

Copies of the ID and all other nonconfidential documents on the record of the investigation are available for public inspection during official business hours (8:45 a.m. to 5:15 p.m.) in the Office of the Secretary, U.S. International Trade Commission, 701 E Street NW., Washington, DC 20436, telephone 202–523–0471. Hearing-impaired individuals are advised that information concerning this investigation can be obtained by contacting the Commission's TDD terminal on 202–724–0002.

By order of the Commission.

Kenneth R. Mason,

Secretary.

BILLING CODE 7020–02–M

[Investigation No. 337–TA–254]

Decision To Review Initial Determination and To Extend Deadline for Completion of Investigation; Certain Small Aluminum Flashlights and Components Thereof

AGENCY: International Trade Commission.

ACTION: Review of initial determination (ID) and extension of deadline for completion of the investigation.

SUMMARY: Notice is given that the Commission has determined to review the ID of the presiding administrative law judge (ALJ) that there is no violation of section 337 of the Tariff Act of 1930 (19 U.S.C. 1337) in the above-captioned investigation. Further, the Commission has determined to extend the deadline for completion of the investigation until December 10, 1987. These actions are taken pursuant to Commission rules 210.53–210.56, 210.59 (19 CFR §§ 210.53–210.56, 210.59).

FOR FURTHER INFORMATION CONTACT: Jack M. Simmons III, Esq., Office of the General Counsel, telephone 202–523–0493. Hearing-impaired persons may contact the Commission's TDD terminal at 202–724–0002.

SUPPLEMENTARY INFORMATION: On August 11, 1987, the ALJ issued an ID finding no violation of section 337 on the grounds, *inter alia,* that the patent in controversy was invalid and unenforceable and that the asserted common-law trademark had not been established.

Having examined the record in this investigation, including the ID, the petitions for review, and the responses thereto, the Commission has concluded that review of the ID is warranted. Specifically, the Commission will review the issues of patent validity, patent enforceability, patent infringement, trademark infringement, and injury. The Commission does not require further written submissions from the parties regarding the merits of the ID and the determination of whether there is a violation of section 337.

If the Commission finds that a violation of section 337 has occurred, it may issue (1) an order that could result in the exclusion of the subject articles from entry into the United States, and/or (2) cease and desist orders that could result in one or more respondents being required to cease and desist from engaging in unfair acts in the importation and sale of such articles. Accordingly, the Commission is interested in receiving written submissions that address the form of remedy, if any, that should be ordered.

If the Commission concludes that a violation of section 337 has occurred and contemplates some form of remedy, it must consider the effect of that remedy on the public interest. The factors that the Commission will consider include the effect that an exclusion order and/or cease and desist orders would have on (1) the public health and welfare, (2) competitive conditions in the U.S. economy, (3) the U.S. production of the articles that are like or directly competitive with those which are the subject of the investigation, and (4) U.S. consumers. The Commission is therefore interested in receiving written submissions that address the aforementioned public interest factors in the context of this investigation.

If the Commission finds that a violation of section 337 has occurred and orders some form of remedy, the President has 60 days to approve or disapprove the Commission's action. During this period, the subject articles would be entitled to enter the United States under a bond in an amount determined by the Commission and prescribed by the Secretary of the Treasury. The Commission is therefore interested in receiving written submissions concerning the amount of the bond that should be imposed.

Written Submissions

While the Commission has determined that no hearing will be held in this investigation and no written submissions are ncessary regarding the ID, the parties to the investigation and interested Government agencies are encouraged to file written submissions on the issues of remedy, the public interest, and bonding. Complainant and the Commission investigative attorney are also requested to submit a proposed exclusion order and/or proposed cease and desist orders for the Commission's consideration. Persons other than the parties and Government agencies may file written submissions addressing the issues of remedy, the public interest, and bonding. Written submissions on remedy, the public interest, and bonding, must be filed by October 16, 1987, and shall not exceed 20 pages. Reply submissions on remedy, the public interest, and bonding, must be filed by October 23, 1987, and shall not exceed 10 pages. All submissions shall be double-spaced and shall otherwise conform with all applicable rules.

Additional Information

Persons submitting written submissions must file the original document and 14 true copies thereof with the Office of the Secretary on or before the deadlines stated above. Any person desiring to submit a document (or portion thereof) to the Commission in confidence must request confidential treatment unless the information has already been granted such treatment during the proceedings. All such requests should be directed to the Secretary to the Commission and must include a full statement of the reasons why the Commission should grant such treatment. *See* 19 CFR 201.6. Documents containing confidential information approved by the Commission for confidential treatment will be treated accordingly. All nonconfidential written submissions will be available for public inspection at the Office of the Secretary.

Copies of the nonconfidential version of the ID and all other nonconfidential documents filed in connection with this investigation are available for

inspection during official business hours (8:45 a.m. to 5:15 p.m.) in the Office of the Secretary, U.S. International Trade Commission, 701 E Street NW., Washington, DC 20436, telephone 202–523–0161.

By order of the Commission.

AGENCY: Interstate Commerce Commission.

ACTION: Notice of exemption.

SUMMARY: The Interstate Commerce Commission exempts The Chesapeake and Ohio Railway Company from the requirements of 49 U.S.C. 10903, *et seq.*, to abandon an 8.42-mile line of railroad in Miami County, IN, subject to: (1) The standard employee protective conditions; and (2) the condition that prior to salvage operations applicant consult with (a) the United States Army Corps of Engineers for construction permits under 33 U.S.C. 403 and 33 U.S.C. 11344, and (b) the Indiana Departments of Environmental Management and Natural Resources to ensure compliance with Indiana statutes.

DATES: This exemption will be effective on November 5, 1987. Petitions to stay must be filed by October 21, 1987, and petitions for reconsideration must be filed by November 2, 1987.

ADDRESSES: Send pleadings referring to Docket No. AB–18 (Sub-No. 95X) to:

(1) Office of the Secretary, Case Control Branch, Interstate Commerce Commiasion, Washington, DC 20423

and

(2) Petitioner's representatives: Lawrence H. Richmond, Peter J. Studtz, 100 North Charles Street, Baltimore, MD 21201

Patrica Vail, Charles M. Rosenberger, 500 Water Street, Jacksonville, FL 32202.

FOR FURTHER INFORMATION CONTACT: Joseph H. Dettmar, (202) 275–7245, TDD for hearing impaired: (202) 275–1721.

SUPPLEMENTARY INFORMATION: Additional information is contained in the Commission's decision. To purchase a copy of the full decision, write to Dynamic Concepts, Inc., Room 2229, Interstate Commerce Commission Building, Washington, DC 20423, or call 202–289–4357 (assistance for the hearing impaired is available through TDD services (202) 275–1721) or by pickup from Dynamic Concepts, Inc., in Room 2229 at Commission headquarters.

Decided: September 22, 1987.

By the Commission, Chairman Gradison, Vice Chairman Lamboley, Commissioners Sterrett, Andre, and Simmons. Vice Chairman Lamboley dissented with a separate expression. Commissioner Simmons would have set this exemption request for notice and comments.

Noreta R. McGee,

Secretary.

BILLING CODE 7035–01–M

DEPARTMENT OF JUSTICE

Antitrust Division

The National Cooperative Research Act of 1984—Corporation for Open Systems International

Notice is hereby given that, pursuant to section 6(a) of the National Cooperative Research Act of 1984, 15 U.S.C. 4301 et seq. ("the Act"), the Corporation for Open Systems International ("COS") has filed an additional written notification simultaneously with the Attorney General and the Federal Trade Commission on July 23, 1987 disclosing a joint development agreement between COS and the National Computing Centre Limited of Manchester, England. The additional written notification was filed for the purpose of exending the protections of Section 4 of the Act limiting the recovery of antitrust plaintiffs to actual damages under specified circumstances.

On May 14, 1986, COS filed its original notification pursuant to section 6(a) of the Act. The Department of Justice (the "Department") published a notice in the **Federal Register** pursuant to section 6(b) of the Act on June 11, 1986, 51 FR 21260. On August 6, 1986, September 30, 1986, January 2, 1987, March 24, 1987, and June 12, 1987, COS filed additional written notifications. The Department published notices in the **Federal Register** in response to these additional notifications on September 4, 1986 (51 FR 31735), on October 28, 1986 (51 FR 39434), February 13, 1987 (52 FR 4671), April 24, 1987 (52 FR 13769), and on July 21, 1987 (52 FR 27473), respectively.

On May 19, 1987, The Corporation for Open Systems International entered into a written joint development agreement with the National Computing Centre Limited, a United Kingdom company, the purpose of which is to jointly develop a File Transfer Access Management test system.

Joseph H. Widmar,

Director of Operations, Antitrust Division.

BILLING CODE 4410–01–M

Drug Enforcement Administration

[Docket No. 86–77]

Denial of Application; Kasparian Pharmacy

On September 19, 1986, the Deputy Assistant Administrator, Office of Diversion Control, Drug Enforcement Administration (DEA), issued to Kasparian Pharmacy (Respondent) of 196 South Yonge Street, Ormond Beach, Florida 32074, an Order to Show Cause proposing to deny the Respondent's application, executed on March 1, 1986, for registration as a retail pharmacy under 21 U.S.C. 823(f). The basis for the proposed denial was that such registration would be inconsistent with the public interest as evidenced by, but not limited to, the following: (1) Kasparian Pharmacy was previously registered by the Drug Enforcement Administration under DEA Certificate of Registration AKO188703. Nazar Kasparian was then the owner and registered pharmacist at Kasparian Pharmacy; (2) in and about March 1983, Investigators of the Florida Department of Professional Regulation, having received information indicating excessive purchases of controlled substances by Kasparian Pharmacy, conducted an in-depth investigation of the pharmacy's dispensing of controlled substances.

An audit of Kasparian Pharmacy's prescription files revealed that the pharmacy had filled 224 prescriptions pursuant to which it had dispensed over 22,000 dosage units of Schedule III and IV controlled substances and almost 200 ounces of a Schedule V preparation containing codeine. Each of the aforementioned prescriptions was allegedly authorized by one of four physicians. The investigation revealed that none of the physicians had authorized any of the prescriptions attributed to him and that under the circumstances, Nazar Kasparian knew, or should have known, that he was not

VOL 52 ISS 194 OC 7 1987 UMI

filling the legitimate orders of registered practitioners; (3) on March 8, 1984, the Florida Board of Pharmacy revoked Kasparian Pharmacy's permit for one year and, on May 26, 1984, Nazar Kasparian surrenedered the pharmacy's DEA registration; and (4) Nazar Kasparian's conduct, as owner and managing pharmacist of Kasparian Pharmacy, evidences a disregard for the public health and safety, and for the responsibilities imposed by DEA registration.

On October 20, 1986, Respondent, proceeding through counsel, timely filed a request for a hearing on the issues raised by the Order to Show Cause and the matter was docketed before Administrative Law Judge Francis L. Young. On February 10, 1987, following prehearing procedures, a hearing was held before Judge Young in Miami, Florida. On May 22, 1987, Judge Young issued his opinion and recommended ruling, findings of fact, conclusions of law, and decision. On June 11, 1987, Respondent filed exceptions to the Administrative Law Judge's recommended decision and, on June 29, 1987, the Administrative Law Judge transmitted the record of these proceedings, including Respondent's exceptions, to the Administrator. The Administrator has considered the record in its entiretly and, pursuant to 21 CFR 1316.67, hereby issues his final order in this matter based upon findings of fact and conclusions of law as hereinafter set forth.

The Administrative Law Judge found that in March 1983, the Florida Department of Professional Regulation (DPR) received information that Kasparian Pharmacy was ordering what appeared to be excessive quantities of controlled substances, taking into consideration the size of the pharmacy and the community it served. Kasparian Pharmacy is located in the Daytona Beach suburb of Ormond Beach, Florida. On March 14, 1983, two DPR investigators conducted an audit of controlled substances purchased by Respondent for the period July 1, 1982, to March 14, 1983. Due to Respondent's lack of a current biennial inventory, a zero beginning balance was used for substances audited although Respondent may actually have had quantities on hand on that date. Of the eighteen substances audited, shortages were found in Respondent's accountability for eight drugs.

The shortages were as follows: Valium, 5 mg. tables-718 tablets (6.6%); Phenergan w/codeine-23.5 pints (24%); Tylenol #3 tablets-3,211 tablets (11.7%); Librium, 10 mg. tablets-2,800 tablets (50.9); Phentermine, 30 mg. tablets-478 tablets (6.4%); Restorial, 30 mg. tablets-265 tablets (13.25%); Tylenol #4 tablets-244 tablets (3.4%); Dexedrine, 10 mg. spansules-241 spansules (48%).

The remaining ten substances showed overages. Use of a zero figure for a starting inventory will result in an overage if there was stock on hand. Use of a zero inventory will make shortages that much more significant.

While conducting the audit, the investigators noticed that Respondent's prescription files contained what appeared to be an excessive number of telephone, or "callin" prescriptions for Schedule III and IV drugs, when viewed in comparison with other pharmacies of similar size. Mr. Kasparian told investigators that each of those prescriptions had been phoned in by a physician and reduced to writing by Mr. Kasparian. However, when investigators removed 350 of the telephoned prescriptions from the files and questioned four physicians who purportedly authorized them, Mr. Kasparian's story proved to be false. A total of 224 of the prescriptions were shown to the physicians and, in each case, the physician stated, and executed a sworn statement to the effect that he had not authorized the prescriptions attributed to him.

The information revealed by the DPR investigation resulted in the filing of separate administrative complaints against Nazar Kasparian and Kasparian Pharmacy by the Florida Department of Professional Regulation. The Pharmacy Board found that, in addition to several prescriptions found to have been lacking one or more elements of required information, approximately 224 "call-in" prescriptions for controlled substances in Schedules III and IV had, in fact, not been called in or authorized by the physician. The Board revoked the permit of Nazar Kasparian to operate a pharmacy in the State of Florida and suspended Mr. Kasparian's personal license to practice pharmacy for a period of two years. The suspension of Mr. Kasparian's license to practice was held in abeyance subject to certain conditions, one of which was that he not act as a managing pharmacist during the period of his suspension.

On May 26, 1984, Mr. Kasparian surrendered DEA Certificate of Registration AK0188703. On or about March 1, 1986, as the two-year state-ordered ban on his being a managing pharmacist drew to an end, Nazar Kasparian submitted the application for DEA registration that is the subject of this final order.

Judge Young found that Respondent failed to maintain a complete and accurate record of all controlled substances he received, sold, delivered or otherwise disposed of in violation of 21 CFR 1304.21(a), 21 U.S.C. 827(a)(3). 21 U.S.C. 842(a)(5) and section 893.07(1)(b), Florida statutes. Mr. Kasparian did not contest that his pharmacy's record showed in 1984 that he had unlawfully dispensed hundreds of dosage units of controlled substances over a period of many months. Furthermore, Respondent failed to make and keep a biennial inventory of controlled substances on hand as required by 21 U.S.C. 827(a)(1), 21 CFR 1304.12(b) and section 893(1)(a), Florida statutes. The maintenace of reasonably accurate records of these drugs is essential for the prevention of their diversion into illicit channels. The Administrative Law Judge concluded that Mr. Kasparian has shown that he was unable or unwilling to keep the required records. Furthermore, the Administrator concludes that all of the drugs dispensed other than pursuant to a physican's lawful prescription were illegally distributed.

The Administrative Law Judge found that the record did not permit a conclusion that Mr. Kasparian is fit to handle controlled dangerous drugs as the unsupervised proprietor of an independent pharmacy. To grant Kasparian Pharmacy a DEA registration would be inconsistent with the public interest. 21 U.S.C. 823 (f) (2), (4), and (5). Accordingly, Judge Young concluded that there is a lawful basis for the denial of Respondent's application and recommended that the application for registration executed by Respondent be denied.

The Administrator has considered the entire record in this matter, and hereby adopts the Administrative Law Judge's recommended findings of fact and conclusions of law in their entirety.

Accordingly, the Administrator of the Drug Enforcement Administration, pursuant to the authority vested in him by 21 U.S.C. 823 and 824 and 28 CFR 0.100(b), hereby orders that the application for a DEA Certificate of Registration executed by Nazar Kasparian on behalf of Kasparian Pharmacy be, and it hereby is, denied. The Administrator further orders that any other pending applications for registration be, and they hereby are, denied. This order is effective November 6, 1987.

Date: October 2, 1987.

John C. Lawn,

Administrator.

[FR Doc. 87-23194 Filed 10-6-87; 8:45 am]

BILLING CODE 4410-09-M

Revocation of Registration; Everette L. Taylor, M.D.

On July 6, 1987, the Administrator of the Drug Enforcement Administration (DEA) issued an Order to Show Cause and Immediate Suspension of Registration to Everette L. Taylor, M.D. of P.O. Box 129, Sparta, North Carolina, immediately suspending DEA Certificate of Registration AT3180635, and proposing to revoke the same registration on the ground that his continued registration was inconsistent with the public interest, as evidenced by, but not limited to, the following: (1) Between January 1986 and June 1987, Dr. Taylor ordered and received excessive quantities of controlled substances; these controlled substances were received by Dr. Taylor at an unregistered location; (2) in June 1987, an audit of Dr. Taylor's controlled substance stock revealed a shortage of more than 480,000 dosage units; (3) after the audit was conducted, Dr. Taylor attempted to acquire additional controlled substances; and (4) on numerous occasions, Dr. Taylor dispensed controlled substances to himself, friends and family members for other than accepted medical use outside the scope of his professional practice.

The Order to Show Cause was personally served on Dr. Taylor on July 8, 1987. At that time, DEA Diversion Investigators and North Carolina State Bureau of Investigation (SBI) Agents seized Dr. Taylor's DEA Certificate of Registration, unused order forms and all controlled substances remaining in Dr. Taylor's possession. Dr. Taylor has not responded to the Order to Show Cause. Therefore, the Administrator concludes that Dr. Taylor has waived his opportunity for a hearing on the issues raised in the Order to show Cause, and enters this final order based upon the record as it now appears. 21 CFR 1301.54(d) and 1301.54(e).

The Administrator finds that between January 1986 and June 1987, Dr. Taylor ordered excessive quantities of various controlled substances, including approximately 110,000 dosage units of diazepam products, 423,000 dosage units of phentermine products and 28,000 dosage units of codeine-based products. The ordering of such large quantities of controlled substances would be considered excessive even for a practitioner operating a busy practice. Dr. Taylor admitted that he did not maintain a medical practice during the period of time he ordered such large quantities of controlled substances. Based upon the fact that Dr. Taylor was not operating a medical practice, there is no justification for ordering excessive quantities of controlled substances. Dr. Taylor's controlled substance ordering patterns raise serious concerns about his intended use of the drugs.

The Administrator also finds that Dr. Taylor was receiving, storing and dispensing controlled substances at an unregistered location in violation of 21 CFR 1301.23(a).

The Administrator futher finds that during an interview on June 19, 1987, with DEA Diversion Investigators and North Carolina SBI Agents, Dr. Taylor admitted that he ordered large quantities of hydrocodone products and other controlled substances for his own personal use. He also claimed that he was stockpiling anorectic drugs, such as phentermine, for a future bariatric practice. In addition, he admitted to supplying friends and relatives with various controlled substances. During the interview, Dr. Taylor also stated he did not maintain an active medical practice. Further, he explained that he did not maintain dispensing records for the large quantities of controlled substances he ordered and received.

On June 22, 1987, North Carolina SBI Agents and DEA Diversion Investigators seized approximately 80,000 dosage units of controlled substances from Dr. Taylor's residence. At that time, Dr. Taylor claimed he did not possess any other controlled substances. During the Seizure, Dr. Taylor also alleged that he had stored the controlled substances in the basement of his residence and that sometime between March 29, 1987, and May 30, 1987, some of the drugs were stolen from that location. Dr. Taylor failed to provide any substantial information regarding the alleged theft, nor did he report any such theft to any police agency or to the Drug Enforcement Administration. Based upon Dr. Taylor's failure to report the alleged theft of controlled substances from his basement and his failure to provide sufficient information regarding the incident, the Administrator doubts seriously that any such theft occurred. Instead, it appears that Dr. Taylor attempted to justify the obvious shortages of controlled substances by fabricating a theft story.

A cursory audit of Dr. Taylor's purchase records and the controlled substances seized from him on June 22, 1987, revealed an unexplained shortage of more than 480,000 dosage units of controlled substances from Dr. Taylor's controlled substance stock. Almost immediately after controlled substances were seized from Dr. Taylor, he attempted to order additional controlled substances from a registered distributor.

Based upon Dr. Taylor's controlled substance ordering and dispensing practices, on July 2, 1987, the North Carolina Board of Medical Examiners recommended that the Drug Enforcement Administration immediately suspend Dr. Taylor's controlled substance handling privileges.

On July 8, 1987, when DEA Diversion Investigators and North Carolina SBI Agents seized Dr. Taylor's DEA Certificate of Registration, they also discovered and seized an additional 1,200 dosage units of controlled substances which Dr. Taylor presumably obtained following the earlier seizure of controlled substances from his residence.

After control consideration of the information described above, the Administrator can only conclude that Dr. Taylor willfully diverted almost one-half million dosage units of controlled substances for other than legitimate medical purposes; and that even after he became aware that his controlled substance handling practices were being scrutinized by the Drug Enforcement Administration and the North Carolina State Police, he continued to order additional quantities of controlled substances. The Administrator also concludes that there is no evidence that Dr. Taylor maintained a legitimate medical practice during the entire investigation period. Dr. Taylor deliberately violated Federal and State controlled substances laws and regulations by ordering and dispensing excessive quantities of controlled substances for other than legitimate medical purposes. This behavior constituted an imminent threat to the public health and safety.

Therefore, the Administrator finds that Dr. Taylor can no longer be entrusted with the controlled substance privileges and responsibilities bestowed upon DEA registrants. Thus, his DEA Certificate of Registration must be revoked. Accordingly, the Administrator of the Drug Enforcement Administration, pursuant to the authority vested in him by 21 U.S.C. 823 and 824 and 28 CFR 0.100(b), hereby orders that DEA Certificate of Registration AT3180635, previously issued to Everette L. Taylor, M.D., be, and it hereby is, revoked. It is further ordered that any pending applications for renewal of said

BEST COPY AVAILABLE

VOL 52 ISS 194 OC 7 1987 UMI

registration be, and they hereby are, denied.

This order is effective, November 6, 1987.

John C. Lawn,

Administrator.

Dated: October 2, 1987.

[FR Doc. 87-23193 Filed 10-6-87; 8:45 am]

BILLING CODE 4410-09-M

DEPARTMENT OF LABOR

Pension and Welfare Benefit Programs

Advisory Council on Employee Welfare and Pension Benefit Plans; Meeting

Pursuant to section 512 of the Employee Retirement Income Security Act of 1974 (ERISA) 29 U.S.C. 1142, a meeting of the Advisory Council on Employee Welfare and Pension Benefit Plans will be held on Thursday, November 12, 1987, in Room S-4215C U.S. Department of Labor Building, Third and Constitution Avenue NW., Washington, DC.

The purpose of the meeting, which will begin at 9:30 a.m., is to consider items listed below and to invite public comment on any aspect of the administration of ERISA.

1. General business of the Advisory Council.

2. Status report and recommendations for continuing work by the various Council work groups as follows:

(i) Retiree Health.
(ii) Fiduciary Liability
(iii) Employee Stock Option Plans (ESOP)

3. Presentation and consideration of recommendations by the Work Group on ESOP participation in leveraged buyouts involving multiple investors, including statements from the public.[1]

4. Other statements from the Public.

Members of the public are encouraged to file a written statement pertaining to any topic concerning ERISA by submitting 20 copies on or before November 6, 1987, to Charles W. Lee, Jr., Executive Secretary, ERISA Advisory Council, U.S. Department of Labor, Room N-5677, 200 Constitution Avenue NW., Washington, DC 20210. Individuals wishing to address the Advisory Council should forward their request to the Executive Secretary or telephone (202) 523-8753. Oral presentations will be limited to ten minutes, but an extended statement may be submitted for the record.

Signed at Washington, DC, this 1st day of October 1987.

David M. Walker,

CPA, Assistant Secretary-Designate for Pension and Welfare Benefit Programs.

[FR Doc. 87-23150 Filed 10-6-87; 8:45 am]

BILLING CODE 4510-29-M

[1] Interested parties should contact the Executive Secretary of the ERISA Advisory Council on or after November 6, 1987 for confirmation of this agenda item.

NUCLEAR REGULATORY COMMISSION

Bi-weekly Notice Applications and Amendments to Operating Licenses Involving No Significant Hazards Considerations

I. Background

Pursuant to Public Law (Pub. L.) 97-415, the Nuclear Regulatory Commission (the Commission) is publishing this regular biweekly notice. Pub. L. 97-415 revised section 189 of the Atomic Energy Act of 1954, as amended (the Act), to require the Commission to publish notice of any amendments issued, or proposed to be issued, under a new provision of section 189 of the Act. This provision grants the Commission the authority to issue and make immediately effective any amendment to an operating license upon a determination by the Commission that such amendment involves no significant hazards consideration, notwithstanding the pendency before the Commission of a request for a hearing from any person.

This biweekly notice includes all notices of amendments issued, or proposed to be issued from September 14, 1987, through September 25, 1987. The last biweekly notice was published on September 23, 1987 (52 FR 35784).

NOTICE OF CONSIDERATION OF ISSUANCE OF AMENDMENT TO FACILITY OPERATING LICENSE AND PROPOSED NO SIGNIFICANT HAZARDS CONSIDERATION DETERMINATION AND OPPORTUNITY FOR HEARING

The Commission has made a proposed determination that the following amendment requests involve no significant hazards consideration. Under the Commission's regulations in 10 CFR 50.92, this means that operation of the facility in accordance with the proposed amendments would not (1) involve a significant increase in the probability or consequences of an accident previously evaluated; or (2) create the possibility of a new or different kind of accident from any accident previously evaluated; or (3) involve a significant reduction in a margin of safety. The basis for this proposed determination for each amendment request is shown below.

The Commission is seeking public comments on this proposed determination. Any comments received within 30 days after the date of publication of this notice will be considered in making any final determination. The Commission will not normally make a final determination unless it receives a request for a hearing.

Written comments may be submitted by mail to the Rules and Procedures Branch, Division of Rules and Records, Office of Administration and Resource Management, U.S. Nuclear Regulatory Commission, Washington, DC 20555, and should cite the publication date and page number of this **Federal Register** notice. Written comments may also be delivered to Room 4000, Maryland National Bank Building, 7735 Old Georgetown Road, Bethesda, Maryland from 8:15 a.m. to 5:00 p.m. Copies of written comments received may be examined at the NRC Public Document Room, 1717 H Street, NW., Washington, DC. The filing of requests for hearing and petitions for leave to intervene is discussed below.

By November 6, 1987, the licensee may file a request for a hearing with respect to issuance of the amendment to the subject facility operating license and any person whose interest may be affected by this proceeding and who wishes to participate as a party in the proceeding must file a written petition for leave to intervene. Requests for a hearing and petitions for leave to intervene shall be filed in accordance with the Commission's "Rules of Practice for Domestic Licensing Proceedings" in 10 CFR Part 2. If a request for a hearing or petition for leave to intervene is filed by the above date, the Commission or an Atomic Safety and Licensing Board, designated by the Commission or by the Chairman of the Atomic Safety and Licensing Board Panel, will rule on the request and/or petition and the Secretary or the designated Atomic Safety and Licensing Board will issue a notice of hearing or an appropriate order.

As required by 10 CFR 2.714, a petition for leave to intervene shall set forth with particularity the interest of the petitioner in the proceeding, and how that interest may be affected by the results of the proceeding. The petition should specifically explain the reasons why intervention should be permitted with particular reference to the following factors: (1) the nature of the petitioner's right under the Act to be made a party to the proceeding; (2) the nature and extent of the petitioner's property, financial, or other interest in

the proceeding; and (3) the possible effect of any order which may be entered in the proceeding on the petitioner's interest. The petition should also identify the specific aspect(s) of the subject matter of the proceeding as to which petitioner wishes to intervene. Any person who has filed a petition for leave to intervene or who has been admitted as a party may amend the petition without requesting leave of the Board up to fifteen (15) days prior to the first prehearing conference scheduled in the proceeding, but such an amended petition must satisfy the specificity requirements described above.

Not later than fifteen (15) days prior to the first prehearing conference scheduled in the proceeding, a petitioner shall file a supplement to the petition to intervene which must include a list of the contentions which are sought to be litigated in the matter, and the bases for each contention set forth with reasonable specificity. Contentions shall be limited to matters within the scope of the amendment under consideration. A petitioner who fails to file such a supplement which satisfies these requirements with respect to at least one contention will not be permitted to participate as a party.

Those permitted to intervene become parties to the proceeding, subject to any limitations in the order granting leave to intervene, and have the opportunity to participate fully in the conduct of the hearing, including the opportunity to present evidence and cross-examine witnesses.

If a hearing is requested, the Commission will make a final determination on the issue of no significant hazards consideration. The final determination will serve to decide when the hearing is held.

If the final determination is that the amendment request involves no significant hazards consideration, the Commission may issue the amendment and make it immediately effective, notwithstanding the request for a hearing. Any hearing held would take place after issuance of the amendment.

If the final determination is that the amendment involves a significant hazards consideration, any hearing held would take place before the issuance of any amendment.

Normally, the Commission will not issue the amendment until the expiration of the 30-day notice period. However, should circumstances change during the notice period such that failure to act in a timely way would result, for example, in derating or shutdown of the facility, the Commission may issue the license amendment before the expiration of the 30-day notice period, provided that its final determination is that the amendment involves no significant hazards consideration. The final determination will consider all public and State comments received before action is taken. Should the Commission take this action, it will publish a notice of issuance and provide for opportunity for a hearing after issuance. The Commission expects that the need to take this action will occur very infrequently.

A request for a hearing or a petition for leave to intervene must be filed with the Secretary of the Commission, U.S. Nuclear Regulatory Commission, Washington, DC 20555, Attention: Docketing and Service Branch, or may be delivered to the Commission's Public Document Room, 1717 H Street, NW., Washington, DC, by the above date. Where petitions are filed during the last ten (10) days of the notice period, it is requested that the petitioner promptly so inform the Commission by a toll-free telephone call to Western Union at (800) 325-6000 (in Missouri (800) 342-6700). The Western Union operator should be given Datagram Identification Number 3737 and the following message addressed to (*Project Director*): petitioner's name and telephone number; date petition was mailed; plant name; and publication date and page number of this **Federal Register** notice. A copy of the petition should also be sent to the Office of the General Counsel-Bethesda, U.S. Nuclear Regulatory Commission, Washington, DC 20555, and to the attorney for the licensee.

Nontimely filings of petitions for leave to intervene, amended petitions, supplemental petitions and/or requests for hearing will not be entertained absent a determination by the Commission, the presiding officer or the presiding Atomic Safety and Licensing Board, that the petition and/or request should be granted based upon a balancing of factors specified in 10 CFR 2.714(a)(1)(i)-(v) and 2.714(d).

For further details with respect to this action, see the application for amendment which is available for public inspection at the Commission's Public Document Room, 1717 H Street, NW., Washington, DC, and at the local public document room for the particular facility involved.

Commonwealth Edison Company, Docket Nos. 50-373 and 50-374, La Salle County Station, Unit Nos. 1 and 2, La Salle County, Illinois

Date of application for amendments: July 28, 1987

Description of amendments request: The proposed amendments to Operating License No. NPF-11 and Operating License No. NPF-18 would revise the LaSalle Units 1 and 2 Technical Specifications to clarify the requirements for the frequency of fast starting and loading of the diesel generators from ambient conditions. Technical Specifications 4.8.1.1.2.a.4 and 4.8.1.1.2.a.5 require a fast start and loading of the diesel generators on a monthly basis. A footnote was added to the Unit 1 Technical Specifications (Amendment 16) and to the Unit 2 Technical Specifications (prior to licensing) to relax these requirements so that a fast start would only be required once every 6 months (184 days). The balance of the monthly tests would include a warmup period, as recommended by the manufacturer, to minimize the mechanical stress and wear caused by fast starting and loading of the diesel generators. The concern is with the ambiguity in the wording of the footnote which could be interpreted to apply the relaxation to the 13 second start requirement in Technical Specification 4.8.1.1.2.a.4 only, and not to the 60 second load requirement in Technical Specification 4.8.1.1.2.a.5. The station has always applied the footnote to both surveillance requirements.

On December 9, 1983, Commonwealth Edison requested that the Unit 1 Technical Specifications be amended to allow a relaxation of the diesel generator fast start requirements. This proposed amendment was based on the investigation and analysis performed by the NRC. The submittal stated that it was the intention of LaSalle Station to apply the footnote to both the 13 second start requirement and the 60 second load requirement. The proposed amendment was approved by the NRC in Amendment 16 to the Unit 1 Technical Specifications and the amendment was also mentioned in the LaSalle SSER 7. The amendment to the Unit 2 Technical Specifications was approved prior to licensing. Based on this discussion, it is proposed that the Unit 1 (NPF-11) and Unit 2 (NPF-18) Technical Specifications be revised to clarify the intent of the footnote as follows:

- Revise the footnote so that it is clear that it applies to the requirements of both Technical Specifications 4.8.1.1.2.a.4 and 4.8.1.1.2.a.5.
- Revise the Technical Specification Bases to more accurately describe the intent of the footnote.

Basis for proposed no significant hazards consideration determination: The Commission has provided standards for determining whether no significant hazards consideration exists as stated in 10 CFR 50.92(c). A proposed

amendment to an operating license for a facility involves no significant hazards consideration if operation of the facility in accordance with the proposed amendment would not: (1) involve a significant increase in the probability or consequences of an accident previously evaluated; or (2) create the possibility of a new or different kind of accident from an accident previously evaluated; or (3) involve a significant reduction in a margin of safety.

The licensee has determined, and the NRC staff agrees, that the proposed amendment will not:

1. Involve a significant increase in the probability or consequences of accident previously evaluated because this proposed amendment is an administrative change intended to clarify the requirements for fast start of the diesel generators. This proposal does not change the intent of the Technical Specifications, as defined in the Bases and in LaSalle SSER 7 (NUREG-0519) page 16-1.

2. Create the possibility of a new or different kind of accident from any accident previously evaluated because this proposed amendment is an administrative change intended to clarify the requirements for fast start of the diesel generators. This proposal does not change the intent of the Technical Specifications as defined in the Bases and in LaSalle SSER 7 (NUREG-0519) page 16-1.

3. Involve a significant reduction in the margin of safety because this proposed amendment is an administrative change intended to clarify the requirements for fast start of the diesel generators. This proposal does not change the intent of the Technical Specifications as defined in the Bases and in LaSalle SSER 7 (NUREG-0519) page 16-1.

Accordingly, the Commission proposes to determine that the proposed changes to the Technical Specifications involve no significant hazards considerations.

Local Public Document Room location: Public Library of Illinois Valley Community College, Rural Route No. 1, Ogelsby, Illinois 61348.

Attorney to licensee: Isham, Lincoln and Burke, Suite 840, 1120 Connecticut Avenue, NW., Washington, DC 20036.

NRC Project Director: Daniel R. Muller

Consolidated Edison Company of New York, Docket No. 50-247, Indian Point Nuclear Generating Unit No. 2, Westchester County, New York

Date of amendment request: July 17, 1987

Description of amendment request: The proposed amendment would revise the Technical Specifications to permit an Integrated Leakage Rate Test (ILRT) duration of less than 24 hours in accordance with an NRC approved methodology. An ILRT is performed periodically to provide a current assessment of potential leakage from the containment.

Basis for proposed no significant hazards consideration determination: The Commission has provided standards for determining whether a significant hazards consideration exists as stated in 10 CFR 50.92. A proposed amendment to an operating license for a facility involves no significant hazards considerations if operation of the facility in accordance with a proposed amendment would not: (1) involve a significant increase in the probability or consequences of an accident previously evaluated; or (2) create the possibility of a new or different kind of accident from any accident previously evaluated; or (3) involve a significant reduction in a margin of safety.

The licensee provided the following analysis:

... consistent with the Commission's criteria in 10 CFR 50.92, we have determined that the proposed change does not involve a significant hazards consideration because the operation of Indian Point Unit No. 2 (IP-2) in accordance with this change would not:

(1) involve a significant increase in the probability or consequences of an accident previously evaluated, since the acceptance values for containment leakage under the reduced duration methodology remain unchanged. The proposed amendment will allow use of the NRC approved Bechtel Topical Report, BN-TOP-1, or other NRC accepted methods which demonstrate that sufficient data can be collected during the ILRT to permit performance of a reliable test in less than 24 hours. Maintaining containment leakage within acceptable limits provides assurance that the consequences of a potential accident can be effectively mitigated.

(2) create the possibility of a new or different kind of accident from any previously evaluated, since ILRT methods and results relate to accident mitigation, event sequences and accident analyses are not affected. The proposed amendment involves more realistic methods for testing potential containment leakage. Maintaining containment leakage within acceptable limits provides assurance that the consequences of a potential accident can be effectively mitigated. Therefore, the possibility of a new or different kind of accident is not created.

(3) involve a significant reduction in the margin of safety, since the proposed change allows use of a methodology for conducting an ILRT with reduced duration that is equivalent to the 24 hour duration test. Under the new methodology, acceptance values for containment leakage remain unchanged and therefore do not significantly reduce the margin of safety.

Based upon the above considerations, the staff proposes to determine that the proposed changes do not constitute a significant hazards consideration.

Local Public Document Room location: White Plains Public Library, 100 Martine Avenue, White Plains, New York, 10610.

Attorney for licensee: Brent L. Brandenburg, Esq., 4 Irving Place, New York, New York 10003

NRC Project Director: Robert A. Capra, Acting Director

Consumers Power Company, Docket No. 50-255, Palisades Plant, Van Buren County, Michigan

Date of amendment request: September 1, 1987

Description of amendment request: This amendment would revise the Technical Specifications to permit movement of heavy loads into the cask laydown area of the spent fuel pool, consolidate Technical Specification requirements regarding heavy loads and require compliance with the guidelines of NUREG-0612.

Basis for proposed no significant hazards consideration determination: The licensee has performed an analysis regarding the issue of no significant hazards consideration using the standards of 10 CFR 50.92 as follows:

(1) Involve a significant increase in the probability or consequences of an accident previously evaluated.

The only accident involved is that of a load drop. Since the load drops postulated in accidents previously evaluated have not changed, the consequences of a previously evaluated accident have not increased. The probability of a load drop is decreased when the guidelines of NUREG-0612 are followed.

(2) Create the possibilty of a new or different kind of accident from any accident previously evaluated.

The changes proposed in this change request do not introduce the use of different load handling equipment than previously evaluated. The only types of accident involved are those of heavy load drops.

They have been evaluated against applicable existing criteria. Thus, the possibility of a new or different kind of accident is not created.

(3) Involve a significant reduction in a margin of safety.

The proposed changes decrease the probability of an accident by requiring compliance with the intent of the guidelines of NUREG-0612 and by prohibiting the movement of heavy loads over fuel stored in the main pool zone. Thus, the margin of safety would not be reduced.

The Commission's staff agrees with this analysis and therefore proposes to determine that the proposed amendment

involves no significant hazards consideration.

Local Public Document Room location: Van Zoeren Library, Hope College, Holland, Michigan 49423.

Attorney for licensee: Judd L. Bacon, Esq., Consumers Power Company, 212 West Michigan Avenue, Jackson, Michigan 49201.

NRC Project Director: Martin J. Virgilio.

Consumers Power Company, Docket No. 50-255, Palisades Plant, Van Buren County, Michigan

Date of amendment request: September 11, 1987

Description of amendment request: This amendment request involves the correction of a Technical Specification by deleting a footnote from Table 4.2.1 involving sampling frequency of a Safety Injection Tank that pertained to Cycle 5 operation which ended a few years ago.

Basis for proposed no significant hazards consideration determination: The licensee has provided an analysis on the issue of no significant hazards consideration using the standards of 10 CFR 50.92 as follows:

This change is administrative. It deletes an out-of-date footnote that provided an alternative action for one of four similar components during a previous operating cycle. The proposed administrative change does not impact on plant design or operation in a manner different than previously evaluated; hence the probability or consequences of previously evaluated accidents are unaltered. Because this change does not introduce any new equipment or modes of operation, it will not create the possibility of a new or different kind of accident from that which was previously evaluated. The margin of safety is not being compromised because the original Technical Specification surveillance interval is being maintained. The deletion of a more frequent surveillance interval for one specific component was established by previous Amendment as a result of reduced concentration limits which are no longer applicable to the operation of the plant. Therefore, this administrative change involves no significant hazards consideration. Furthermore, this change fits example (i) of the types of amendments that are considered not likely to involve significant hazards considerations published in the Federal Register on March 6, 1986 (51FR7751), in that it represents a purely administrative change, i.e., a correction of an error since the footnote no longer applies to current operating cycles.

The Commission's staff agrees with this analysis and therefore proposes to determine that this amendment request involves no significant hazards consideration.

Local Public Document Room location: Van Zoeren Library, Hope College, Holland, Michigan 49423.

Attorney for licensee: Judd L. Bacon, Esq., Consumers Power Company, 212 West Michigan Avenue, Jackson, Michigan 49201.

NRC Project Director: Martin J. Virgilio.

Florida Power and Light Company, Docket No. 50-335, St. Lucie Plant, Unit No. 1, St. Lucie County, Florida

Date of amendment request: August 25, 1987

Description of amendment request: The amendment would revise several valve tag numbers, penetration numbers, and valve types in the St. Lucie Unit 1 Technical Specification Table 3.6-1, "Containment Leakage Path" and Table 3.6-2, "Containment Isolation Valves." Certain valve tag numbers are currently listed with generic valve numbers, not the actual valve tag numbers. The proposed amendment would change the generic valve numbers to the actual valve numbers. Also, several valve tag numbers do not include the seismic qualification identifier or are shown as incorrect valve types. The seismic qualification identifier will be added where necessary, and the correct type of valve will be listed. Lastly, the penetration numbers for several penetrations are missing the alphabetic identification; this will also be corrected.

Basis for proposed no significant hazards consideration determination: The Commission has provided standards for determining whether a significant hazards consideration exists as stated in 10 CFR 50.92(c). A proposed amendment to an operating license for a facility involves no significant hazards consideration if operation of the facility in accordance with the proposed amendment would not: (1) involve a significant increase in the probability or consequences of an accident previously evaluated; or (2) create the possibility of a new or different kind of accident from any accident previously evaluated; or (3) involve a significant reduction in a margin of safety.

The licensee addressed the above three standards in the amendment application. In regard to the first standard, the licensee provided the following analysis.

Operation of the facility in accordance with the proposed amendment would not involve a significant increase in the probability or consequences of an accident previously evaluated.

The proposed change corrects valve tag and penetration numbers found to be incorrectly or incompletely listed in the St. Lucie Unit 1 Technical Specifications Table 3.6-1[,] "Containment Leakage Paths" and Table 3.6-2[,] "Containment Isolation Valves". Since no change to the facility is proposed, the probability or consequences of an accident previously evaluated would not increase.

In connection with the second standard, the licensee stated:

Use of the modified specification would not create the possibility of a new or different kind of accident from any accident previously evaluated.

The proposed change corrects incorrectly or incompletely listed valve and penetration numbers in Table 3.6-1[,] "Containment Leakage Paths" and Table 3.6-2[,] "Containment Isolation Valves". This administrative/editorial change will not create the possibility of a new or different kind of accident from any accident previously evaluated.

With regard to the third standard, the licensee provided the following rationale:

Use of the modified specification would not involve a significant reduction in a margin of safety.

The proposed change involves correcting valve tag and penetration numbers which are currently incorrectly or incompletely listed in Table 3.6-1[,] "Containment Leakage Paths" and Table 3.6-2[,] "Containment Isolation Valves" of the St. Lucie Unit 1 Technical Specifications and will not reduce [a] margin of safety.

The staff has reviewed the licensee's no significant hazards consideration determination analysis. Based upon this review, the staff believes that the licensee has met the three standards. However, it should be noted that there are four cases in which a gate valve is being relisted as a globe valve. These valves are associated with penetrations 52d and 52e, which are Integrated Leak Rate Test (ILRT) penetrations. These four cases are not strictly administrative/editorial changes, as specified by the licensee. However, the staff believes that this proposed change meets the three standards of 10 CFR 50.92(c) as discussed above.

Based upon the above discussion, the staff proposes to determine that the proposed changes do not involve a significant hazards consideration.

Local Public Document Room location: Indian River Junior College Library, 3209 Virginia Avenue, Fort Pierce, Florida 33450

Attorney for licensee: Harold F. Reis, Esquire, Newman and Holtzinger, 1615 L Street, NW., Washington, DC 20036

NRC Project Director: Herbert N. Berkow

Georgia Power Company, Oglethorpe Power Corporation, Municipal Electric Authority of Georgia, City of Dalton, Georgia, Docket No. 50-321, Edwin I. Hatch Nuclear Plant, Unit 1, Appling County, Georgia

Date of amendment request: May 4, 1984 as revised September 12, 1984, and further revised August 19, 1987

Description of amendment request: The amendment would change the Technical Specifications to expand the present definition of operability to explicitly include functionality of support equipment, redundant trains and electric power supplies. The amendment would also add provisions to the Technical Specifications to allow a system, subsystem, train, component or device to be considered Operable under certain conditions when the normal or emergency power source providing power to the system, subsystem, etc. is Inoperable.

The present definition of operable requires only that a system or component be capable of performing its intended function in its required manner in order to be considered operable.

The proposed change was submitted in response to an April 10, 1980, NRC request that the licensees submit proposed Technical Specifications concerning the definition of the term "Operable" that conform with Model Technical Specifications included with the April 10, 1980 request. A notice of the receipt of this amendment request was previously published in the **Federal Register** on November 21, 1984 (49 FR 45951).

Basis for proposed no significant hazards consideration determination: he Commission has provided guidance concerning the application of the standards in 10 CFR 50.92 by providing certain examples (51 FR 7744). One of the examples of actions involving no significant hazards considerations relates to a change that constitutes an additional limitation, restriction or control not presently in the Technical Specifications (Example (ii)).

The proposed change would add additional limitations and is, therefore, similar to this example.

The Commission, therefore, proposes to determine that this action involves no significant hazards consideration.

Local Public Document Room location: Appling County Public Library, 301 City Hall Drive, Baxley, Georgia 31513

Attorney for licensee: Bruce W. Churchill, Esquire, Shaw, Pittman, Potts and Trowbridge, 2300 N Street, NW., Washington, DC 20037

NRC Project Director: Kahtan N. Jabbour, Acting

Georgia Power Company, Oglethorpe Power Corporation, Municipal Electric Authority of Georgia, City of Dalton, Georgia, Docket No. 50-424, Vogtle Electric Generating Plant, Unit 1, Burke County, Georgia

Date of amendment request: August 26, 1987

Description of amendment request: The proposed amendment would revise the action requirement for inoperable Fuel Handling Building Post-Accident Ventilation System (FHBPAVS) actuation instrumentation. Specifically, the action requirement for Functional Unit 11 of Table 3.3-2 will be revised by removing the reference to the 7-day period for restoration of the inoperable channel. The action requirement will be changed to refer directly to specification 3.9.12 whereby operations within or over the storage pool must be suspended until at least one Fuel Handling Building Post-Accident Ventilation System is returned to operable status.

Basis for proposed no significant hazards consideration determination: he Commission has provided standards for determining whether a significant hazards consideration exists as stated in 10 CFR Part 50.92. A proposed amendment to an operating license for a facility involves no significant hazards considerations if operation of the facility in accordance with a proposed amendment would not: (1) involve a significant increase in the probability or consequences of an accident previously evaluated; or (2) create the possibility of a new or different kind of accident from any accident previously evaluated; or (3) involve a significant reduction in a margin of safety.

The staff has reviewed the licensee's request and has determined that should this request be implemented, it would not (1) involve a significant increase in the probability or consequences of an accident previously evaluated. The proposed change achieves consistency within the Technical Specifications between Table 3.3-2 and specification 3.9.12 and does so in a conservative manner by deleting the option of potentially performing operations involving movement of fuel within the storage pool or crane operations with loads over the storage pool for up to 7 days with either no manual or automatic actuation of the FHBPAVS. The proposed change modifies the action statement to directly invoke specification 3.9.12 thereby prohibiting such operations until at least one FHBPAVS is operable.

Also, the licensee's proposed changes would not (2) create the possibility of a new or different kind of accident from any accident previously evaluated because no new or novel features would be added to plant design. Finally, the licensee's proposed changes would not (3) involve a significant reduction in a margin of safety because the revised action requirement achieves consistency with specification 3.9.12.

Accordingly, the Commission proposes to determine that the proposed change involves no significant hazards consideration.

Local Public Document Room location: Burke County Public Library, 4th Street, Waynesboro, Georgia 30830

Attorney for licensee: Mr. Arthur H. Domby, Troutman, Sanders, Lockerman and Ashmore, Candler Building, Suite 1400, 127 Peachtree Street, N.E., Atlanta, Georgia 30043

NRC Project Director: Kahtan N. Jabbour, Acting

Indiana and Michigan Electric Company, Docket Nos. 50-315 and 50-316, Donald C. Cook Nuclear Plant, Unit Nos. 1 and 2, Berrien County, Michigan

Date of amendments request: December 8, 1986 supplemental on August 7, 1987.

Description of amendments request: The proposed amendment would revise the Technical Specifications by replacing the liquid radwaste effluent line monitor designated as R-18 with a new monitor designated as RRS-1001. The amendment also would add periodic Channel Functional Tests as a surveillance requirement and a footnote to allow R-18 to meet the Technical Specification requirements until the new monitor, RRS-1001, is operable.

Basis for proposed no significant hazards consideration determination: he Commission has provided standards for determining whether a significant hazards consideration exists as stated in 10 CFR 50.92. A proposed amendment to an operating license for a facility involves no significant hazards consideration if operation of the facility in accordance with a proposed amendment would not (1) involve a significant increase in the probability or consequences of an accident previously evaluated, (2) create the possibility of a new or different kind of accident from any accident previously evaluated, or (3) involve a significant reduction in a margin of safety.

The new monitor will be able to support current requirements and includes several enhancements over the old monitor. Design of the new monitor provides solutions to difficulties encountered with the old monitor. An additional surveillance is proposed and is commensurate with the design of the new monitor. Therefore, the proposed change will not involve a significant increase in the probability or consequences of an accident previously analyzed.

The proposed change will not place the plant in a new or unanalyzed condition; therefore, it will not create

the possibility of a new or different kind of accident from any accident previously analyzed or evaluated.

Since the new monitor is a better design, solves difficulties with the old monitor, and new surveillance requirements are added, the proposed change will not involve a significant reduction in a margin of safety.

Therefore, the staff proposes to determine that the changes do not involve a significant hazards consideration.

Local Public Document Room location: Maude Preston Palenske Memorial Library, 500 Market Street, St. Joseph, Michigan 49085.

Attorney for licensee: Gerald Charnoff, Esq., Shaw, Pittman, Potts and Trowbridge, 2300 N Street, NW., Washington, DC 20037.

NRC Project Director: David L. Wigginton, Acting.

Louisiana Power and Light Company, Docket No. 50-382, Waterford Steam Electric Station, Unit 3, St. Charles Parish, Louisiana

Date of amendment request: August 28, 1987.

Description of amendment request: The proposed changes would revise Technical Specification Limiting Condition for Operation (LCO) 3.7.10.2 and its associated Surveillance Requirement 4.7.10.2. The reason for these changes is to implement operability and surveillance requirements for the newly-installed fire suppression equipment in Waterford 3's charcoal filtration systems.

LCO 3.7.10.2 currently specifies the number and location of fire protection sprinkler and spray systems that must be maintained in an operable condition. The proposed changes would add the newly installed charcoal filter spray systems to the LCO. In addition, the proposed changes would add surveillance requirement 4.7.10.2d, which requires an air flow test through each open head spray or sprinkler system every three years to verify that the spray nozzles are unobstructed. A provision has been made for an equivalent demonstration that the spray nozzles are unobstructed by conducting a visual inspection. However, since the spray nozzles in charcoal filter units can be accessed only when the charcoal has been removed, a note has been added to the proposed surveillance requirement indicating that for open nozzles in charcoal filter units, the surveillance will be performed each time the charcoal is changed.

Basis for proposed no significant hazards consideration determination: he NRC staff proposes that the proposed changes do not involve a significant hazards consideration because, as required by the criteria of 10 CFR 50.92(c), operation of the facility in accordance with the proposed amendment would not: (1) Involve a significant increase in the probability or consequences of an accident previously evaluated; or (2) Create the possibility of a new or different kind of accident from any accident previously evaluated; or (3) Involve a significant reduction in the margin of safety. The basis for this proposed finding is given below.

(1) The charcoal filter units in the Shield Building Ventilation System (SBVS) are used to adsorb iodine and other radionuclides that leak into the reactor annulus building following a LOCA. Similarly, the charcoal filter units in the Controlled Ventilation Area System (CVAS) are used to adsorb iodine and other radionuclides that leak from the safety-related equipment used to mitigate the consequences of a LOCA (primarily high pressure safety injection (HPSI) pumps during the recirculation phase). The operability of at least one SBVS train and one CVAS train is required to meet the offsite dose criteria established by 10 CFR Part 100. The addition of fire suppression equipment specifically designed to extinguish fires in these two filtration systems increases the probability that the SBVS and CVAS will be able to perform their design function following a LOCA. Therefore, the proposed changes will not involve a significant increase in the probability or consequences of any accident previously evaluated.

(2) New fire suppression equipment has been added to increase the overall level of fire protection at Waterford 3 and the proposed change implements the operability and surveillance requirements necessary to ensure the equipment remains functional. Since the new equipment is designed to protect portions of the SBVS and CVAS and these systems are required only during post accident conditions, the proposed changes will not create the possibility of a new or different kind of accident from any accident previously evaluated.

(3) The intent of these Technical Specifications is to ensure that adequate fire suppression capability is available to confine and extinguish fires occurring in any portion of the facility where safety-related equipment is located. Since the addition of fire suppression equipment in the charcoal filtration systems will add to the capability of extinguishing fires in the SBVS and CVAS, the proposed changes will result in an increase in the margin of safety.

The Commission has provided guidance concerning the application of standards for determining whether a significant hazards consideration exists by providing certain examples (51 FR 7751) of amendments that are considered not likely to involve significant hazards consideration. Example (ii) relates to a change that constitutes an additional limitation, restriction or control not presently included in the Technical Specifications (e.g., a more stringent surveillance requirement).

In this case the proposed changes are similar to Example (ii) in that they impose additional operability and surveillance requirements for the newly-installed fire suppression equipment which is not now a part of the Technical Specifications.

The staff has reviewed the licensee's no significant hazards consideration analysis. Based on the review and above discussions the staff proposes to determine that the proposed changes do not involve a significant hazards consideration.

Local Public Document Room location: University of New Orleans Library, Louisiana Collection, Lakefront, New Orleans, Louisiana 70122

Attorney for licensee: Bruce W. Churchill, Esq., Shaw, Pittman, Potts and Trowbridge, 2300 N Street, NW., Washington, DC 20037

NRC Project Director: Jose A. Calvo

Louisiana Power and Light Company, Docket No. 50-382, Waterford Steam Electric Station, Unit 3, St. Charles Parish, Louisiana

Date of amendment request: August 28, 1987.

Description of amendment request: The proposed change would revise Technical Specification 3.2.7, Power Distribution Limits - Axial Shape Index (ASI). The reason for this change is to clarify the relationship between the axial shape monitoring limits described in the Technical Specifications and the axial shape assumptions that were used in the Cycle 2 safety analysis. In addition, the proposed change will provide increased ASI operating space at lower core power levels.

Technical Specification 3.2.7 currently states that the ASI shall be maintained between -0.23 and +0.22 when Core Operating Limits Supervisory System (COLSS) is out of service and the Core Protection Calculators (CPCs) are used for ASI monitoring. These limits were based on the non-LOCA safety analysis which assumed an ASI range of -0.30 to +0.30, the LOCA safety analysis which assumed an ASI range of -0.25 to +0.30, and estimated ASI monitoring

uncertainties of ±0.02 for COLSS and ±0.08 for the CPCs.

Although the current Technical Specification is based on the Cycle 2 safety analyses, it does not reflect a re-evaluation of the LOCA that was performed at initial core power levels below 70% nor the actual ASI monitoring uncertainty associated with COLSS. (It should be noted, however, that the COLSS software was changed prior to the Cycle 2 startup to ensure that the actual COLSS ASI monitoring uncertainty (±0.026) was properly accounted for.) In order to restore a more direct relationship between the ASI limits assumed in the safety analyses and the ASI monitoring limits in the Technical Specifications (and to provide additional ASI operating space at lower core power levels), LCO 3.2.7 is being revised to be power dependent and to account for the actual COLSS ASI monitoring uncertainty.

The proposed change would revise LCO 3.2.7a (COLSS operable) to impose ASI limits of -0.22 and +0.27 for the core power levels equal to or greater than 70% and ASI limits of -0.27 and +0.27 for core power levels less than 70%. The proposed change would also revise LCO 3.2.7b (COLSS out of service) to impose ASI limits of -0.17 and +0.22 for core power levels equal to or greater than 70% and ASI limits of -0.22 and +0.22 for core power levels less than 70%. Although this change is being proposed to clarify the relationship between Technical Specification 3.2.7 and the Cycle 2 safety analyses, it is anticipated that the proposed change will remain bounding for Cycle 3 and subsequent cycles as well.

Basis for proposed no significant hazards consideration determination: The NRC staff proposes that the proposed change does not involve a significant hazards consideration because, as required by the criteria of 10 CFR 50.92(c), operation of the facility in accordance with the proposed amendment would not: (1) Involve a significant increase in the probability or consequences of any accident previously evaluated; or (2) Create the possibility of a new or different kind of accident from any accident previously evaluated; or (3) Involve a significant reduction in the margin of safety. The basis for this proposed finding is given below.

(1) The Cycle 2 non-LOCA safety analysis was performed assuming an ASI range of -0.30 to +0.30 while the Cycle 2 LOCA safety analysis was performed assuming an ASI range of -0.25 to +0.30. In order to translate these safety analysis assumptions on ASI into an actual range of values that can be monitored by the plant operators, the ASI range assumed in the safety analyses must be narrowed to account for uncertainties in the ASI monitoring instrumentation. For Waterford 3 both the COLSS and the CPCs can be used for ASI monitoring. An uncertainty analysis performed concurrent with the Cycle 2 safety analyses determined that the COLSS ASI monitoring uncertainty was less than ±0.03 and the CPC ASI monitoring uncertainty was less than ±0.08. Thus, in order to ensure that the Cycle 2 safety analyses remain bounding, the proposed change will require the COLSS-indicated ASI to be maintained between -0.22 and ±0.27 and, if COLSS is out of service, the CPC-indicated ASI be maintained between -0.17 and -0.22. The range of acceptable ASI values discussed above is based on the LOCA safety analysis since these events are analyzed over a more narrow ASI range than the non-LOCA events. However, an evaluation of the LOCA events has determined that if the core power level is less than 70%, the beneficial effects of the lower initial core power level will compensate for the potentially more severe axial power shapes that could result from the wider ASI range assumed for the non-LOCA events; i.e., if the core power is less than 70% both the LOCA and non-LOCA events have been shown to have acceptable consequences over an ASI range of +0.30 to -0.30. Thus, when core power is less than 70%, the COLSS-indicated ASI must be maintained between -0.27 and +0.27 and, if COLSS is out of service, the CPC-indicated ASI must be maintained between -0.22 and +0.22. These ASI limits plus maintaining the core power below 70% ensure that the Cycle 2 safety analysis will remain bounding. Therefore, since the proposed change imposes ASI limits that are directly related to the Cycle 2 safety analyses and the results of safety analyses are acceptable, the proposed change will not result in a significant increase in the probability or consequences of any accident previously evaluated.

(2) The spectrum of axial shapes that was considered during the Cycle 2 safety analysis envelopes the range of ASI values that is allowed by the proposed change. There has been no physical change to plant systems, structures or components nor has there been any change in the manner in which the plant is operated. The only change to plant procedures will be to reflect the new ASI limits in the routine daily logs recorded by the plant operators. Thus, the proposed change will not create the possibility of a new or different kind of accident from any accident previously evaluated.

(3) The intent of Technical Specification 3.2.7 is to ensure that the actual value of ASI is maintained within the range of values that was assumed in the Cycle 2 safety analysis. The ASI is one of several parameters that must be within a specified range in order to ensure that the peak linear heat rate and minimum DNBR remain within their respective safety limits during an anticipated operational occurrence. Since the range of values that is being proposed by this change has been used as a direct input to the Cycle 2 safety analysis and since the Cycle 2 safety analysis has shown acceptable results for all events, the proposed change will not result in a significant reduction in the margin of safety.

The staff has reviewed the licensee's no significant hazards consideration analysis. Based on the review and above discussions the staff proposes to determine that the proposed change does not involve a significant hazards consideration.

Local Public Document Room location: University of New Orleans Library, Louisiana Collection, Lakefront, New Orleans, Louisiana 70122

Attorney for licensee: E. L. Blake, Shaw, Pittman, Potts and Trowbridge, 2300 N St., NW., Washington, DC 20037

NRC Project Director: Jose A. Calvo

Mississippi Power & Light Company, System Energy Resources, Inc., South Mississippi Electric Power Association, Docket No. 50-416, Grand Gulf Nuclear Station, Unit 1, Claiborne County, Mississippi

Date of amendment request: September 10, 1987

Description of amendment request: The amendment would change the System Energy Resources, Inc. (SERI) offsite organization, which is included in the Technical Specifications (TSs), by transferring administrative support functions to a new support services group.

Basis for proposed no significant hazards consideration determination: The Commission has provided standards for determining whether a significant hazards consideration exists as stated in 10 CFR 50.92. A proposed amendment to an operating license for a facility involves no significant hazards consideration if operation of the facility in accordance with a proposed amendment would not: (1) involve a significant increase in the probability or consequences of an accident previously evaluated; or (2) create the possibility of a new or different kind of accident from

any accident previously evaluated; or (3) involve a significant reduction in a margin of safety.

The licensee has provided an analysis of significant hazards consideration in its request for a license amendment. The licensee has concluded, with appropriate bases, that the proposed amendment meets the three standards in 10 CFR 50.92 and, therefore, involves no significant hazards considerations.

The licensee's analysis is reproduced below.

1. The proposed organization changes do not involve a significant increase in the probability or consequences of an accident previously evaluated because they involve only a shift in the responsibility for administrative support services within the SERI corporate offices. Because of the administrative nature of the proposed changes[,] the probability or consequence[s] of an accident are not affected.

2. The proposed organization changes do not create the possibility of a new or different kind of accident from any accident previously evaluated because the proposed shift in administrative responsibility will have no affect on the design, construction, or operation of safety[-]related systems or components.

3. The proposed organization changes do not involve a reduction in a margin of safety because they involve only the realignment of administrative responsibilities. The proposed changes [will] more effectively and efficiently utilize existing administrative resources within the SERI corporate offices.

The NRC staff has made a preliminary review of the licensee's analysis and agrees with the licensee's conclusions that the three standards in 10 CFR 50.92 are met for the proposed changes in the TSs for the Grand Gulf Nuclear Station, Unit 1.

Accordingly, the Commission proposes to determine that the requested changes to the TSs do not involve significant hazards considerations.

Local Public Document Room location: Hinds Junior College, McLendon Library, Raymond, Mississippi 39154

NRC Project Director: Herbert N. Berkow

Northeast Nuclear Energy Company, Docket No. 50-245, Millstone Nuclear Power Station, Unit No. 1, New London County, Connecticut

Date of amendment request: August 17, 1987

Description of amendment request: This amendment would revise the Technical Specifications by increasing minimum required condensate storage tank volume from 225,000 gallons of water to 250,000 gallons to provide a ten hour source of water for decay removal.

Basis for proposed no significant hazards consideration determination: The licensee has reviewed the proposed changes pursuant to 10 CFR 50.59 and has determined that they do not constitute an unreviewed safety question. The probability of occurrence of the consequences of an accident or malfunction of equipment important to safety previously evaluated in the Final Safety Analysis Report have not been increased. The possibility for an accident or malfunction of a different type than any evaluated previously in the FSAR has not been created. There has not been a reduction in the margin of safety as defined in the basis for any Technical Specification. The increased minimum condensate storage tank (CST) water inventory level will not affect the operability of existing plant systems.

The licensee reviewed the proposed changes, in accordance with 10 CFR 50.92, and has concluded that they do not involve a significant hazards consideration in that these changes would not:

(1) Involve a significant increase in the probability or consequences of an accident previously analyzed. The proposed change will ensure that more water is available for core cooling via feedwater coolant injection (FWCI) than was previously required. Therefore, the impact of this change on accidents mitigated by FWCI operating would be favorable.

(2) Create the possibility of a new or different kind of accident from any previously analyzed. The increased minimum water volume is well within the total holding capacity of the CST (approximately 460,000 gallons). Thus, no new failure modes or accidents are introduced by this change.

(3) Involve a significant reduction in a margin of safety. The effects of these changes will not impact plant protective boundaries. Also, the proposed basis revision represents additional conservatism.

The Commission has provided guidance concerning the applications of standards in 10 CFR 50.92 by providing examples (51 FR 7751, March 6, 1986). The changes proposed herein most closely resemble example (ii), a change that constitutes an additional control not presently included in the Technical Specifications, e.g., a more stringent requirement. The increase in minimum CST inventory represents a more stringent condition of operation.

NRC Project Director: Cecil O. Thomas.

Portland General Electric Company et al., Docket No. 50-344, Trojan Nuclear Plant, Columbia County, Oregon

Date of amendment request: January 20, 1987, as supplemented July 2, 1987

Description of amendment request: This amendment proposes to revise Trojan Technical Specification (TS) Section 4.5.1.C, Emergency Core Cooling System Accumulators, to permit verification that power to the isolation valves operators is disconnected without requiring the removal of the breaker from the circuit. The current TS surveillance requirement states that the breaker must be removed from the circuit. It is proposed that power to these valves be removed by the use of a lockout switch.

Basis for proposed no significant hazards consideration determination: 10 CFR 50.92 states that a proposed amendment will not involve a significant hazards consideration if the proposed amendment does not: (i) Involve a significant increase in the probability or consequences of an accident previously evaluated; or (ii) Create the possibility of a new or different kind of accident from any accident previously evaluated; or (iii) Involve a significant reduction in a margin of safety.

The Licensee has evaluated the proposed amendment against the standards of 10 CFR 50.92 as follows:

1. Does the proposed license change involve a significant increase in the probability or consequences of an accident?

This proposed change does not involve a significant increase in the probability or consequences of an accident.

The surveillance requirement for the safety injection accumulator isolation valves ensures the operability of the accumulators in the event of an accident. As part of the Emergency Core Cooling System, the function of the accumulators is to mitigate the consequences of an accident. Thus, the operability of the accumulators does not affect the probability of an accident.

The accumulators mitigate the consequences of an accident by delivering a specified volume of borated water into the Reactor Coolant System. As long as the volume of water delivered to the Reactor Coolant System is unchanged and the time for delivery is not increased, then the consequences of an accident are not affected.

Surveillance Requirement 4.5.1.c prevents the undesired mechanical motion of the accumulator isolation valves by disconnecting power to the electrical control

VOL 52 ISS 194 OCT 7 1987 UMI

system for the valve operators while in Modes 1, 2, or 3*. This action ensures the availability of a flowpath from the accumulators to the Reactor Coolant System and conforms with guidance provided in Branch Technical Position Instrumentation and Control Systems Branch (ICSB) 18 [Power Systems Branch (PSB)], "Application of the Single Failure Criterion to Manually Controlled Electrically Operated Valves." The proposed change to Technical Specification 4.5.1.c does not alter this requirement for disconnecting power, only the requirement that this be accomplished by removal of the breaker from the circuit.

An alternative method is to disconnect power to the valve operator control circuit through a lockout feature on the control switch. Lockout is achieved by pulling out on the switch handle while in the "normal" (12 o'clock) position. In this position, all rotary action of the switch is inhibited, and both the hot and neutral leads of the control circuit are opened. This halts any valve action in progress and precludes any manual or automatic valve actuation. Inadvertent pushing of the handle is prevented by placing a blocking collar over the switch operating shaft when it is pulled out.

Use of a lockout feature on the control switch of these valves does not affect the operation of any other system. Similarly, none of the existing interlocks, setpoints, alarms or operating parameters associated with the valves are changed. Conformance with guidance provided in Branch Technical Position ICSB-4 (PSB), "Requirements on Motor-Operated Valves in the ECCS Accumulator Lines" remains unchanged.

2. Does the proposed license change create the possibility of a new or different kind of accident from any accident previously evaluated?

Changing this surveillance requirement for accumulator isolation valves to allow use of the lockout feature does not create the possibility of a new or different kind of accident. Demonstration of operability for each accumulator remains a requirement.

The control/lockout switches are fully qualified for Nuclear Class 1E applications and preclude any manual or automatic actuation of the valves when placed in lockout. No other system is affected by the change.

3. Does the proposed amendment involve a significant reduction in a margin of safety?

Since the requirement to demonstrate operability of each accumulator remains, there is no significant reduction in the margin of safety. Use of the lockout feature may actually increase the margin of safety since valve position indication is retained and remote valve control can be returned more expeditiously. The volume of water provided by the accumulators and the time for delivery is not affected by this change.

The staff has reviewed the licensee's no significant hazards analysis and concurs with their conclusions. As such, the staff proposes to determine that the requested changes do not involve a significant hazards consideration.

Local Public Document Room location: Branford Price Millar Library, Portland State University, 731 S. W. Harrison Street, Portland, Oregon 97207.

Attorney for licensee: J. W. Durham, Esq., Portland General Electric Company, 121 S. W. Salmon Street, Portland, Oregon 97204

NRC Project Director: George W. Knighton

Portland General Electric Company et al., Docket No. 50-344, Trojan Nuclear Plant, Columbia County, Oregon

Date of amendment request: June 22, 1987

Description of amendment request: The proposed amendment would revise Technical Specification (TS) Table 3.3-1, "Reactor Trip System Instrumentation" and Table 4.3-1, "Reactor Trip System Instrumentation Surveillance Requirements" regarding the operability requirements for the reactor trip breakers (RTBs) and the surveillance requirements for the manual reactor trip, reactor trip breakers, and reactor trip bypass breakers. More specifically:

a. Table 3.3-1 will reference a new Action Statement 12 to Item 21, "Reactor Trip Breakers." The new Action Statement 12 clarifies the operability status of the RTBs with either the undervoltage or shunt trip attachment inoperable.

b. Table 4.3-1 will reference a new Note 13 to Item 1, "Manual Reactor Trip," and a new Note 14 to Item 21, "Reactor Trip Breaker." A new Item 23, "Reactor Trip Bypass Breaker" will be added to the Table, and will reference new Notes 15 and 16.

New Notes 13 through 16 prescribe requirements for the testing of the RTBs, bypass breakers, and manual reactor trip function.

Basis for proposed no significant hazards consideration determination: 10 CFR 50.92 states that a proposed amendment will not involve a significant hazards consideration if the proposed amendment does not: (i) Involve a significant increase in the probability or consequences of an accident previously evaluated; or (ii) Create the possibility of a new or different kind of accident from any accident previously evaluated; or (iii) Involve a significant reduction in a margin of safety. The Commission has also provided guidance concerning the application of these standards by providing certain examples (March 6, 1986, 51 FR 7751). An example of an amendment that is considered not likely to involve significant hazards considerations is Example (ii) A change which constitutes an additional limitation, restriction or control not presently included in the technical specifications, e.g., a more stringent surveillance requirement.

The licensee has evaluated the proposed amendment against the standards of 10 CFR 50.92, and has determined the following:

The proposed revisions follow the sample TS changes included with Generic Letter 85-09, with one exception. The testing required for the reactor trip bypass breakers will be performed on the same frequency as the reactor trip breakers, ie, each train tested every other month (Table 4.3-1, Note 7). Testing each train every 62 days on a staggered test basis is consistent with recommendations in the Westinghouse Standard Technical Specifications (NUREG-0452, Revision 4) for reactor trip breaker testing.

1. The proposed changes do not involve a significant increase in the probability or consequences of an accident. The proposed change adds new testing requirements to help ensure the functioning of the reactor trip system when needed. The change is intended to reduce the frequency of postulated Anticipated Transients Without Scram (ATWS) events.

2. The proposed changes do not create the possibility of a new or different kind of accident from any accident previously evaluated. The proposed change adds new testing requirements intended to reduce the frequency of postulated ATWS events.

3. The proposed changes do not involve a significant reduction in a margin of safety. The proposed changes add additional testing requirements which effect an increase in the margin of safety.

The proposed changes are similar in nature to the Example (ii) provided by the Commission. The changes to the TS add a new TS requiring that: (1) an inoperable undervoltage or shunt trip attachment of the reactor trip breaker shall be restored to operability within 48 hours, (2) the channel functional test shall independently verify the operability of the undervoltage and shunt trip circuits for the manual reactor trip function, and (3) the undervoltage and shunt trip attachments of the reactor trip breakers shall be independently verified for operability. These proposed changes introduce additional controls not presently in the TS and, therefore, involve no significant hazards consideration.

The staff has reviewed the licensee's no significant hazards analysis and concurs with their conclusions. As such, the staff proposes to determine that the requested changes do not involve a significant hazards consideration.

Local Public Document Room location: Branford Price Millar Library,

Portland State University, 731 S. W. Harrison Street, Portland Oregon 97207

Attorney for licensee: J. W. Durham, Senior Vice President, Portland General Electric Company, 121 S. W. Salmon Street, Portland, Oregon 97204

NRC Project Director: George W. Knighton

Portland General Electric Company et al., Docket No. 50-344, Trojan Nuclear Plant, Columbia County, Oregon

Date of amendment request: July 14, 1987

Description of amendment request: The proposed amendment would revise Section 3.11.3.2.b of Technical Specification (TS) 3/4.11.3, "Solid Radioactive Waste," by deleting the reference to a nonexistent TS Section 6.9.1.9.b.

Basis for proposed no significant hazards consideration determination: 10 CFR 50.92 states that a proposed amendment will not involve a significant hazards consideration if the proposed amendment does not: (i) Involve a significant increase in the probability or consequences of an accident previously evaluated; or (ii) Create the possibility of a new or different kind of accident from any accident previously evaluated; or (iii) Involve a significant reduction in a margin of safety. The Commission has also provided guidance concerning the application of these standards by providing certain examples (March 6, 1986, 51 FR 7751). An example of an amendment that is considered not likely to involve a significant hazards considerations is Example (i) A purely administrative change to technical specifications: for example, a change to achieve consistency throughout the technical specifications, correction of an error, or a change in nomenclature. The removal of a nonexisting reference in the TS is a correction of an error, and is considered an editorial change which falls within the scope of the above cited Example. As such, the staff proposes to determine that the requested change does not involve a significant hazards consideration.

Local Public Document Room location: Branford Price Millar Library, Portland State University, 731 S. W. Harrison St., Portland Oregon 97207

Attorney for licensee: J. W. Durham, Esq., Portland General Electric Company, 121 S.W. Salmon Street, Portland, Oregon 97204

NRC Project Director: George W. Knighton

Public Service Electric & Gas Company, Docket No. 50-354, Hope Creek Generating Station, Salem County, New Jersey

Date of amendment request: August 12, 1987

Description of amendment request: The current Technical Specification requires an emergency diesel generator starting air receiver minimum pressure of 380 psig. The proposed amendment would change this minimum required pressure to 325 psig. The licensee states in its request:

The present Technical Specification Section 4.8.1.1.2.a.7 minimum value of 380 PSIG was erroneously selected as the minimum air start receiver pressure. The limit selected should have been the low pressure alarm setpoint of 325 PSIG, as described in the FSAR, not the compressor normal cycling setpoint of 380 PSIG.

It also states:

FSAR Section 9.5.6 (Reference 2) describes the Starting Air System as capable of performing its function (in conformance with Standard Review Plan Section 9.5.6 and IEEE Standard 387 criteria) when the starting air receiver pressure is at the low pressure alarm setpoint of 325 PSIG. The FSAR statements pertaining to the Starting Air System were verified during the Hope Creek Preoperational Test Program.

Basis for proposed no significant hazards consideration determination: The Commission has provided guidance concerning the application of its standards set forth in 10 CFR 50.92 by providing certain examples (51 FR 7744). An example of an amendment that is not likely to involve a significant hazards consideration is "(vi) A change which either may result in some increase to the probability or consequences of a previously-analyzed accident or may reduce in some way a safety margin, but where the results of the change are clearly within all acceptable criteria with respect to the system or component specified in the Standard Review Plan..." The acceptance criteria related to the minimum required pressure of the starting air receivers are stated in items 4g and 4h of Standard Review Plan Section 9.5.6 "Emergency Diesel Engine Starting System." These are:

g. As a minimum, the air starting system should be capable of cranking a cold diesel engine five times without recharging the receiver(s). The air starting system capacity should be determined as follows: (1) each cranking cycle duration should be approximately 3 seconds; (2) consist of two to three engine revolutions; or (3) air start requirements per engine start provided by the engine manufacturer; whichever air start requirement is larger.

h. Alarms should be provided which alert operating personnel if the air receiver pressure falls below the minimum allowable value.

The licensee states in its request:

The margin of safety which forms the basis for this technical specification is the ability to provide sufficient air pressure for Emergency Diesel Generator starting as described in FSAR Section 9.5.6.2 and in PSE&G's response to FSAR Question 430.122. The proposed correction to the Technical Specification limit agrees with FSAR statements regarding system design which have been demonstrated during preoperational testing. Therefore, no reduction in the margin of safety which forms the basis for the technical specification is involved in this proposed change.

Hope Creek FSAR Section 9.5.6.2 states:

Each air receiver can supply starting air for a minimum of five consecutive engine starts with a beginning receiver pressure at the low pressure alarm setpoint.

The starting air low pressure alarm is set at 325 psig.

On the basis of the above information, we conclude that the proposed change meets the acceptance criteria of Section 9.5.6 of the Standard Review Plan and is similar to example (vi) as stated above.

Therefore, the staff has made a proposed determination that the application for amendment involves no significant hazard considerations.

Local Public Document Room location: Pennsville Public library, 190 S. Broadway, Pennsville, New Jersey 08070

Attorney for licensee: Troy B. Conner, Jr., Esquire, Conner and Wetterhahn, 1747 Pennsylvania Avenue, NW., Washington, DC 20006

NRC Project Director: Walter R. Butler

Public Service Electric & Gas Company, Docket No. 50-354, Hope Creek Generating Station, Salem County, New Jersey

Date of amendment request: August 18, 1987

Description of amendment request: The proposed amendment would revise License Condition 2.C(13) to extend the required date for adding four parameters to the Safety Parameter Display System (SPDS) and having them operational from "prior to restart following the first refueling outage" to "prior to the earlier of 90 days after restart from the first refueling outage or July 12, 1988." Plant shutdown for the first refueling is currently scheduled to begin on February 1, 1988.

The licensee plans to meet this requirement for adding parameters by replacing the existing system with a new computer system that, in addition to meeting this requirement for providing the four additional parameters, will have additional capacity for future needs. It is necessary to perform some tests on the new system while the plant

is shutdown and others while the plant is in operation after the outage. Therefore, the licensee has requested the schedular extension in order to perform the tests that must be conducted following restart.

Basis for proposed no significant hazards consideration determination: The Commission has provided standards for determining whether a significant hazards consideration exists (10 CFR 50.92(c)). A proposed amendment to an operating license for a facility involves no significant hazards consideration if operation of the facility in accordance with the proposed amendment would not (1) involve a significant increase in the probability or consequences of an accident previously evaluated; (2) create the possibility of a new or different kind of accident from any accident previously evaluated; or (3) involve a significant reduction in a margin of safety.

The licensee has stated that it has determined that the proposed change does not constitute a significant hazards consideration and has addressed each of the above three standards as follows:

The proposed change does not significantly increase the probability or consequences of an accident previously evaluated. The SPDS system is not a control system and serves only in an advisory capacity to the Operations staff. Additionally, the existing system will be operational until the new system is fully checked out and operational. Therefore, the proposed change does not affect the probability or consequences of previously evaluated accidents.

The proposed change does not create the possibility of a new or different kind of accident from any accident previously evaluated. Although a new system is being installed, it is similar in design to the existing system. As stated before, the SPDS does not control operation in the reactor in any way and serves only as a source of information. The system is designed to be isolated from any safety related system. The isolation system for the new SPDS system will use appropriately qualified optical isolation devices. The existing system will be functional during the schedular extension necessary to make the new system operational. Therefore, the proposed change does not create a new or different kind of accident.

The proposed change does not significantly reduce the margin of safety. The schedular extension will not reduce the margin of safety in that the existing SPDS will remain operational during installation of the new system. The new system represents an improvement in the margin of safety by providing increased capabilities over the old system and is necessary to install the additional parameters as required by License Condition 2.C.(13). The extension does not represent a significant reduction in the margin of safety since the existing SPDS system was found to not constitute a safety concern as stated in Section 18.2 of Supplement 5 to NUREG-1048. The extension is necessary to upgrade to fully meet the guidance of Supplement 1, to NUREG-0737. Thus, the proposed change does not significantly reduce the margin of safety.

The NRC staff has reviewed the proposed amendment and agrees with the licensees' evaluation and determination. Therefore, the staff proposes to determine that the proposed amendment involves no significant hazards consideration.

Local Public Document Room location: Pennsville Public library, 190 S. Broadway, Pennsville, New Jersey 08070

Attorney for licensee: Troy B. Conner, Jr., Esquire, Conner and Wetterhahn, 1747 Pennsylvania Avenue, N.W., Washington, DC 20006

NRC Project Director: Walter R. Butler

Public Service Electric & Gas Company, Docket No. 50-354, Hope Creek Generating Station, Salem County, New Jersey

Date of amendment request: September 2, 1987

Description of amendment request: The proposed amendment would revise the Technical Specification requirement for channel functional tests of the rod block monitor (RBM) to require that the tests be performed prior to exceeding 30% of rated thermal power.

The current Technical Specification requires that the RBM be operable when thermal power is greater than or equal to 30% of rated thermal power; it also requires that the channel functional tests for the RBM be performed within 24 hours prior to startup. These two differing requirements are confusing. The proposed change will eliminate this confusion by making the requirement for performing the functional tests consistent with the requirement for operability. The change will also provide greater operational flexibility by allowing the additional time between startup and reaching 30% power to perform the test.

Basis for proposed no significant hazards consideration determination: The Commission has provided standards for determining whether a significant hazards consideration exists (10 CFR 50.92(c)). A proposed amendment to an operating license for a facility involves no significant hazards consideration if operation of the facility in accordance with the proposed amendment would not (1) involve a significant increase in the probability or consequences of an accident previously evaluated; (2) create the possibility of a new or different kind of accident from any accident previously evaluated; or (3) involve a significant reduction in a margin of safety. In accordance with 10 CFR 50.92 the licensee has reviewed the proposed change and has concluded that they do not involve a significant hazards consideration in that the change:

(1) Does not involve a significant increase in the probability or consequences of an accident previously analyzed. Technical Specification 3/4.1.4.3 specifies that the RBM shall be Operable whenever Thermal Power is greater than or equal to 30% of Rated Thermal Power. Below 30% of Rated Thermal Power the RBM system is automatically bypassed; therefore, whether or not the system has a Channel Functional Test performed prior to startup is immaterial so long as Thermal Power is below 30% of Rated Thermal Power. Hence, it can be concluded that the proposed change does not significantly increase the probability or consequences of an accident previously analyzed because the change only revises when a test for Operability is to be performed, not the fact that such a test will be performed.

(2) Does not create the possibility of a new or different kind of accident from any accident previously evaluated. The proposed change does not involve a modification to the RBM system, including when the system is required to be functional. The proposed change only involves planning considerations and hence it can be concluded that the proposed change does not create the possibility of a new or different kind of accident than any previously analyzed.

(3) Does not involve a significant reduction in a margin of safety. Once again the Technical Specification power limit of 30% of Rated Thermal Power for Operability of the RBM is not changing, nor is the actual requirement to perform a Channel Functional Test prior to reaching 30% of Rated Thermal Power. Therefore the safety margins for the RBM are still maintained and it can be concluded that the proposed change does not involve a reduction in the margin of safety.

The staff reviewed the licensee's determination that the proposed license amendment involves no significant hazards consideration and agrees with the licensee's analyses. Accordingly, the staff proposes to determine that the proposed license amendment does not involve a significant hazards consideration.

Local Public Document Room location: Pennsville Public library, 190 S. Broadway, Pennsville, New Jersey 08070

Attorney for licensee: Troy B. Conner, Jr., Esquire, Conner and Wetterhahn, 1747 Pennsylvania Avenue, N.W., Washington, DC 20006

NRC Project Director: Walter R. Butler

Public Service Electric & Gas Company, Docket Nos. 50-272 and 50-311, Salem Nuclear Generating Station, Unit Nos. 1 and 2, Salem County, New Jersey

Date of amendment request: July 24, 1987

Description of amendment request: The proposed amendment request would revise the Technical Specification Bases, Section 2.2.1 Limiting Safety System Settings, "Reactor Coolant Pump Breaker Position Trip", and Table 3.3-1, Reactor Trip System Instrumentation, Functional Unit 20 "Reactor Coolant Pump Breaker Position Trip" to change the (1/4) RCP breaker open position anticipatory reactor trip logic above power level P-8 into (2/4) RCP breaker open position reactor trip logic above power level P-7. This modification removes a potential source of single failure unit trips and provides a reduction in challenges (e.g. spurious trips) to the Reactor Protection System. This modification is provided as a standard feature or as a retrofit option for all Westinghouse PWR units. All domestic Westinghouse PWR units supplied subsequent to Three Mile Island (TMI) incorporate this change.

Basis for proposed no significant hazards consideration determination: The Commission has provided standards for determining whether a significant hazards consideration exists (10 CFR 50.92(c)). A proposed amendment to an operating license for a facility involves no significant hazards consideration if operation of the facility in accordance with the proposed amendment would not: (1) involve a significant increase in the probability or consequences of an accident previously evaluated; (2) create the possibility of a new or different kind of accident from any accident previously evaluated; or (3) involve a significant reduction in a margin of safety.

The staff has reviewed the licensee's request and concurs with the following basis and conclusions provided by the licensee in its July 24, 1987 submittal.

The proposed changes to the Salem Technical Specifications do not significantly increase the probability or consequences of a previously evaluated accident. UFSAR Section 15.2.5, "Partial Loss of Forced Reactor Coolant Flow" describes the low primary coolant flow reactor trip as providing the required protection against a partial loss of coolant flow accident. Three redundant flow channels are provided in each loop for the low flow reactor trip. Above power level P-8, the loss of flow in any one loop, as sensed by two of the three channels will actuate the low flow reactor trip. The existing (1/4) RCP breaker open position anticipatory reactor trip functions to backup the low flow reactor trip. This same analysis assumes a worst case scenario (e.g. four loops initially operating, two pumps coasting down). UFSAR Section 15.2.5.5 concludes that the DNBR will not decrease below the limiting value of 1.30 at any time during such a transient thus the core safety limit is not breeched. The anticipatory time delay (e.g. the time difference between the initiations of an RCP breaker open position reactor trip and a low primary coolant flow reactor trip) is not significant since the original transient analysis is based on low primary coolant flow. Therefore, the UFSAR Section 15.2.5.5 "Conclusions" bounds the consequences of deleting the (1/4) RCP breaker open position anticipatory reactor trip above power level P-8 and hence the proposed modification does not increase the probability or consequences of this previously evaluated accident scenario.

The proposed changes to the Salem Technical Specifications do not create the possibility of a new or different kind of accident than any previously evaluated. In the event of a single loop loss of flow, the low primary coolant flow reactor trip is the design protection and it meets the design requirement of maintaining the minimum DNBR above the 1.30 limiting value. If credit is not taken for the low primary coolant flow reactor trip, then a reactor trip on either overtemperature or overpower Delta-T will terminate the accident before DNB occurs in the core (UFSAR Section 7.2.3.1). Westinghouse analysis indicates that the hot spot clad temperature (on the inner clad surface) will remain well below the melting point (reference Attachment 2). For all non-LOCA safety analyses, the logic change which results in the deletion of a reactor trip on a single RCP breaker open position above power level P-8 is acceptable since UFSAR Sections 15.2.5.5 and 15.3.4.4 "Conclusions" bound the consequences. The diversity and redundancy of the Reactor Protection System are maintained for a single loop loss of flow.

The proposed changes to the Salem GS Technical Specifications do not involve a significant reduction in the margin of safety. The RCP breaker position reactor trip is modified to actuate on the opening of any two breakers above the P-7 interlock setpoint. This modification only affects the coincidence logic of the Solid State Protection System (SSPS). The existing (2/4) coincident reactor trip logic functions (e.g. the opening of an RCP breaker in any one loop coincident with low flow in a second loop or low flow in any two loops simultaneously) will remain unchanged. This specific modification has undergone Westinghouse analysis and review in accordance with the general requirements of 10 CFR Part 50 Appendix B and the specific requirements of IEEE-279-1971 and does not degrade either its performance or conformance to system design requirements. Two independent RCP breaker open position interlocks are provided to the SSPS logic cabinets to develop the RCP breaker position reactor trip logic (independent interlocks for trains "A" and "B"). The single failure criterion requirement for independence and redundancy of the (2/4) RCP breaker open position reactor trip above power level P-7 is not changed as a result of this modification thus UFSAR Section 7.2.2.2 "Design Basis for Protection Circuits" is not changed and the existing margins of safety are retained. Based on the preceding evaluations, PSE&G concludes that the proposed change to the Salem Technical Specifications does not involve a significant hazards consideration.

Therefore, on the basis of the licensee's evaluations and conclusions with which the staff agrees, the Commission proposes to determine that the proposed changes involve no significant hazards consideration.

Local Public Document Room location: Salem Free Public library, 112 West Broadway, Salem, New Jersey 08079

Attorney for licensee: Mark J. Wetterhahn, Esquire, Conner and Wetterhahn, Suite 1050, 1747 Pennsylvania Avenue, N.W., Washington, DC 20006

NRC Project Director: Walter R. Butler

Southern California Edison Company, et al, Docket Nos. 50-361 and 50-362, San Onofre Nuclear Generating Station, Units 2 and 3, San Diego County, California

Date of amendment request: July 3, 1987 (Reference PCN-236)

Description of amendment request: The proposed change would revise Technical Specification (TS) 6.9.1.14, "Hazardous Cargo Traffic Report". The existing reporting requirements in this TS specify that the hazardous cargo traffic on Interstate 5 (I-5) and the AT&SF railway shall be monitored and the results submitted to the NRC Regional Administrator once every three years. The origin of these requirements is the San Onofre Units 2 and 3 Safety Evaluation Report (SER), NUREG-0712. In the SER, the NRC staff concluded that the risks due to potential explosions or toxic gas releases (with the provisions for protecting against the specific toxic gases described) are acceptably low and meet the criteria described in the Standard Review Plan (SRP), Section 2.2.3. [The toxic gas isolation system (TGIS) currently is designed to isolate the control room air intake upon detection of the presence of Ammonia, Chlorine, Butane and Propane]. The SER conclusion was based in part on the knowledge of present sizes and frequencies of hazardous cargo shipments going past the San Onofre site. However, it was noted by the NRC Staff that significant changes over the lifetime of the plant in traffic density, transportation conditions, cargo composition, size and frequency could have a significant effect on the risk estimates. Therefore, the staff required that the hazardous cargo traffic on I-5 and the AT&SF railway be monitored and the results periodically reported to the staff.

The proposed change would remove from TS 6.9.1.14 the requirement to monitor and report the toxic gas cargo

traffic on I-5. The requirement to monitor and report explosive and flammability hazard cargo on Interstate Route 5 and hazardous cargo traffic on the AT&SF railway would remain in effect.

Basis for proposed no significant hazards consideration determination: The NRC staff proposes to determine that the proposed amendment does not involve a significant hazards consideration because, as required by the criteria of 10 CFR 50.92(c), operation of the facility in accordance with the proposed amendment would not: (1) involve a significant increase in the probability or consequences of an accident previously evaluated; (2) create the possibility of a new or different kind of accident from any accident previously evaluated; or (3) involve a significant reduction in a margin of safety.

The following is a discussion of these three criteria and how the proposed change meets each criterion.

1. The NRC staff proposes to determine that operation of the facility in accordance with the proposed amendment does not involve a significant increase in the probability or consequences of any accident previously evaluated for the reasons given below.

Previously analyzed accidents include the release of toxic gases from an accident on Interstate Route 5 (I-5) which would potentially cause the San Onofre Units 2 and 3 control room to become uninhabitable. In the SER, the NRC staff concluded (based upon prior analyses performed by the licensee) that the risks due to toxic gas releases, when coupled with the provisions for control room isolation, were acceptably low. However, the NRC staff required that hazardous cargo traffic (explosive hazards and hazards from toxic gases) be monitored and the results periodically reported.

The licensee has performed an additional analysis of the toxic gas hazard shipments along I-5. This analysis demonstrates that the combined risk associated with the composite toxic gas hazard from shipments on I-5 is acceptably low and meets the acceptance criteria of Standard Review Plan (SRP) Section 2.2.3. The analysis further demonstrates that this risk will remain acceptably low throughout the time period prior to expiration of the operating licenses for San Onofre Units 2 and 3 (the operating licenses expire on October 18, 2013).

The proposed change does not alter the configuration of the plant or its operation. The proposed change, based upon the results of the analysis, deletes the requirement to monitor toxic gas hazardous cargo along I-5 and report the results to the NRC. Since the risk from toxic gas shipments along I-5 has been demonstrated to be and to remain acceptably low, operation of the facility in accordance with this proposed change will not involve a significant increase in the probability or consequences of accidents previously evaluated.

2. The NRC staff proposes to determine that operation of the facility in accordance with the proposed amendment does not create the possibility of a new or different kind of accident from any accident previously evaluated because the proposed amendment would not change the configuration of the plant, or its manner of operation. Therefore, the proposed change will not create the possibility of a new or different kind of accident from any accident previously evaluated.

3. The NRC staff proposes to determine that operation of the facility in accordance with the proposed amendment does not involve a significant reduction in a margin of safety.

Based upon the licensee's analysis, the risk to control room habitability from toxic gas shipments along I-5 has been demonstrated to be and to remain acceptably low for the duration of the operating licenses for San Onofre Units 2 and 3. Elimination of the requirements to monitor and periodically report this traffic is not needed to assure the habitability of the San Onofre Units 2 and 3 control room. Therefore, operation of the facility in accordance with this proposed change will not involve a significant reduction in a margin of safety.

Local Public Document Room location: General Library, University of California at Irvine, Irvine, California 92713

Attorneys for licensee: Charles R. Kocher, Esq., Southern California Edison Company, 2244 Walnut Grove Avenue, P. O. Box 800, Rosemead, California 91770 and Orrick, Herrington & Sutcliffe, Attn.: David R. Pigott, Esq., 600 Montgomery Street, San Francisco, California 94111

NRC Project Director: George W. Knighton

Southern California Edison Company, et al, Docket Nos. 50-361 and 50-362, San Onofre Nuclear Generating Station, Units 2 and 3, San Diego County, California

Date of amendment request: August 5, 1987 and September 18, 1987 (Reference PCN-237)

Description of amendment request: The proposed change would revise Technical Specification (TS) 3/4.2.7, "Axial Shape Index" and its associated basis. Notice of this action was previously published in the **Federal Register** on September 23, 1987 (52 FR 35807). The licensee has revised the original submittal. This notice supersedes the previous notice.

Technical Specification 3.2.7 is provided to ensure that the actual value of the axial shape index (ASI) is maintained within the range assumed as an initial condition in the safety analyses. The safety analyses assume that ASI is between -0.3 and +0.3. ASI is the power generated in the lower half of the core less the power generated in the upper half of the core divided by the sum of these powers. The ASI can be calculated utilizing either the Core Operating Limit Supervisory System (COLSS) or any operable Core Protection Calculator (CPC) channel. The real time monitoring capability and accuracy of COLSS allows COLSS to monitor power limit margins closely (using incore, self-powered, rhodium detectors).

The proposed change to this specification is required to support Cycle 4 operation (24 month cycle versus the current 18 month cycle). Analysis of COLSS uncertainties has shown that the axial shape uncertainty for Cycle 4 increases from ±0.02 ±0.03. This is due primarily to the effect of increased cycle length on the measurement uncertainties associated with the incore detectors.

Technical Specification 3.2.7 currently requires that the ASI be maintained within the COLSS Operable limits (ASI between -0.28 and +0.28) or the COLSS Out Of Service (CPC) limits (ASI between -0.20 and +0.20). The current COLSS Operable limits for the ASI are based on the value assumed in the safety analyses (ASI between -0.30 and +0.30) taking into account the axial shape uncertainty (±0.02). For Cycle 4 operation, the axial shape uncertainty increases to ±0.03. Therefore, the COLSS ASI alarm limit will be changed from ASI between -0.28 and +0.28 to ASI between -0.27 and +0.27.

Surveillance Requirement 4.2.7 will also be revised. Currently, Section 4.2.7 only requires that ASI be determined to be within its limits once per 12 hours when COLSS is in service or out of service. The proposed change will take advantage of the fact that COLSS continuously monitors ASI when it is in service. Specifically, ASI will be required to be continuously monitored and determined to be within its limit with COLSS in service. With COLSS out of service, the surveillance requirement

will be unchanged. That is, ASI will be required to be verified to be within its limit at least once every 12 hours using any operable CPC channel.

The basis for this specification will be expanded to include discussions of the 20% minimum power limitation in Mode 1, what ASI is and the two methods by which this parameter is calculated. The basis currently states that this specification ensures that the actual value of the ASI is maintained within the range of values used in the safety analyses.

Basis for proposed no significant hazards consideration determination: The NRC staff proposes to determine that the proposed amendment does not involve a significant hazards consideration because, as required by the criteria of 10 CFR 50.92(c), operation of the facility in accordance with the proposed amendment would not: (1) involve a significant increase in the probability or consequences of an accident previously evaluated; (2) create the possibility of a new or different kind of accident from any accident previously evaluated; or (3) involve a significant reduction in a margin of safety.

The following is a discussion of these three criteria and how the proposed change meets each criterion.

1. The NRC staff proposes to determine that operation of the facility in accordance with the proposed amendment does not involve a significant increase in the probability or consequences of any accident previously evaluated for the reasons given below. The proposed change would decrease the range of the ASI limits from ±0.28 to ±0.27, due to an increase in uncertainty factor from ±0.02 to ±0.03. Thus, the proposed change still requires that ASI be maintained within the ASI range assumed in the safety analyses, ±0.30. Further, the proposed change requires continuous monitoring of ASI when COLSS is in service. This is more restrictive than the current TS which requires monitoring once every 12 hours. Therefore, the proposed change will not involve a significant increase in the probability or consequences of any accident previously evaluated.

2. The NRC staff proposes to determine that operation of the facility in accordance with the proposed amendment does not create the possibility of a new or different kind of accident from any accident previously evaluated because the proposed amendment would not change the configuration of the plant, or its manner of operation. The LCO for ASI will be changed from ±0.28 to ±0.27 when COLSS is in service. Therefore, the proposed change will not create the possibility of a new or different kind of accident from any accident previously evaluated.

3. The NRC staff proposes to determine that operation of the facility in accordance with the proposed amendment does not involve a significant reduction in a margin of safety. The proposed change will would revise the range of the ASI limit to be more restrictive when COLSS is in service. Therefore, the proposed change will not involve a significant reduction in a margin of safety.

Local Public Document Room location: General Library, University of California at Irvine, Irvine, California 92713.

Attorneys for licensee: Charles R. Kocher, Esq., Southern California Edison Company, 2244 Walnut Grove Avenue, P. O. Box 800, Rosemead, California 91770 and Orrick, Herrington & Sutcliffe, Attn.: David R. Pigott, Esq., 600 Montgomery Street, San Francisco, California 94111.

NRC Project Director: George W. Knighton

Union Electric Company, Docket No. 50-483, Callaway Plant, Unit 1, Callaway County, Missouri

Date of amendment request: July 31, 1987

Description of amendment request: The proposed amendment would revise the plant heatup and cooldown curves, revise the maximum allowable power operated relief valve (PORV) setpoint curve, and revise the reactor vessel surveillance capsule removal schedule.

Basis for proposed no significant hazards consideration determination: The Commission has provided standards for determining whether a significant hazards consideration exists as stated in 10 CFR 50.92. A proposed amendment to an operating license for a facility involves no significant hazards consideration if operation of the facility in accordance with a proposed amendment would not (1) involve a significant increase in the probability or consequences of an accident previously evaluated, (2) create the possibility of a new or different kind of accident from any accident previously evaluated, or (3) involve a significant reduction in a margin of safety.

The licensee has provided the following analysis of no significant hazards considerations, using the Commission's standards.

This Technical Specification change is being requested to incorporate information gained from surveillance capsule U which was removed during first refueling. These curves also incorporate the effects of a low leakage fuel and plant uprated conditions. The modifications of the plant heatup, cooldown and PORV setpoint curves (Figures 3.4-2, 3.4-3, and 3.4-4) are to incorporate the reference nil-ductility temperature (RT_{NDT}). Table 4.4-5 is being modified to incorporate the new recommended withdrawal schedule. The changes being made are jointly considered in this evaluation for significant hazards.

The proposed change does not involve a significant increase in the probability or consequences of an accident previously evaluated. The revision being made is to merely ensure that the acceptable range of operation is clearly defined using conservative and validated data obtained from the analysis of surveillance capsule U which was withdrawn during the first refueling.

The proposed change does not create the possibility of a new or different kind of accident from any accident previously evaluated. This is based on the fact that the method and manner of plant operation are unchanged.

The proposed change does not involve a significant reduction in a margin of safety. This is based on the fact that the change only revises the heatup and cooldown limitation curves and surveillance program table to reflect operational parameters based on surveillance capsule data as applied to Vantage 5 fuel and uprated conditions. The recalculated limit curves have the same degree of conservatism as the original curves, since they are based on the most limiting values of the nil-ductility reference temperature which includes the radiation induced shift (delta RT_{NDT}) as determined by the surveillance capsule analysis.

Based on the above discussions, the licensee concluded that the proposed amendment request does not involve a significant increase in the probability or consequences of an accident previously evaluated; does not create the possibility of a new or different kind of accident from any accident previously evaluated; does not involve a reduction in the required margin of safety.

The staff has reviewed the licensee's no-significant-hazards-consideration determination and agrees with the licensee's analysis. The staff, therefore, proposes to determine that the proposed amendment does not involve a significant hazards consideration.

NOTICE OF ISSUANCE OF AMENDMENT TO FACILITY OPERATING LICENSE

During the period since publication of the last biweekly notice, the Commission has issued the following amendments. The Commission has determined for each of these amendments that the application complies with the standards and requirements of the Atomic Energy Act of 1954, as amended (the Act), and the Commission's rules and regulations. The Commission has made appropriate findings as required by the Act and the Commission's rules and regulations in 10 CFR Chapter I, which are set forth in the license amendment.

Notice of Consideration of Issuance of Amendment to Facility Operating License and Proposed No Significant Hazards Consideration Determination and Opportunity for Hearing in connection with these actions was published in the **Federal Register** as indicated. No request for a hearing or petition for leave to intervene was filed following this notice.

Unless otherwise indicated, the Commission has determined that these amendments satisfy the criteria for categorical exclusion in accordance with 10 CFR 51.22. Therefore, pursuant to 10 CFR 51.22(b), no environmental impact statement or environmental assessment need be prepared for these amendments. If the Commission has prepared an environmental assessment under the special circumstances provision in 10 CFR 51.12(b) and has made a determination based on that assessment, it is so indicated.

For further details with respect to the action see (1) the applications for amendments, (2) the amendments, and (3) the Commission's related letters, Safety Evaluations and/or Environmental Assessments as indicated. All of these items are available for public inspection at the Commission's Public Document Room, 1717 H Street, N.W., Washington, D. C., and at the local public document rooms for the particular facilities involved. A copy of items (2) and (3) may be obtained upon request addressed to the U. S. Nuclear Regulatory Commission, Washington, D.C. 20555, Attention: Director, Division of Reactor Projects.

Alabama Power Company, Docket Nos. 50-348 and 50-364, Joseph M. Farley Nuclear Plant, Unit 1 and 2, Houston County, Alabama.

Dates of application for amendments: December 19, 1986, supplemented May 4, July 10, and August 25, 1987.

Description of amendments: Technical Specification (TS) 3/4.4.6 is revised to allow the use of an approved steam generator tube sleeving technique in lieu of plugging defective tubes. The Safety Evaluation that was issued with this amendment is proprietary. A non-proprietary version is being prepared.

Date of issuance: September 18, 1987

Effective date: September 18, 1987

Amendment Nos.: 72 and 63

Facility Operating License Nos. NPF-2 and NPF-8. Amendments revise the Technical Specifications.

Date of initial notice in **Federal Register:** June 17, 1987 (52 FR 23094). The July 10, and August 25, 1987 supplements made clarifying statements, but did not change the findings in the original notice. The Commission's related evaluation of the amendment is contained in a Safety Evaluation dated September 18, 1987.

No significant hazards consideration comments received: No

Local Public Document Room location: George S. Houston Memorial Library, 212 W. Burdeshaw Street, Dothan, Alabama 36303

Alabama Power Company, Docket Nos. 50-348 and 50-364, Joseph M. Farley Nuclear Plant, Unit 1 and 2, Houston County, Alabama.

Dates of application for amendments: December 19, 1986, supplemented May 4, July 10, and August 25, 1987.

Description of amendments: Technical Specification (TS) 3/4.4.6 is revised to allow the use of an approved steam generator tube sleeving technique in lieu of plugging defective tubes. The Safety Evaluation that was issued with this amendment is proprietary. A non-proprietary version is being prepared.

Date of issuance: September 18, 1987

Effective date: September 18, 1987

Amendment Nos.: 72 and 63

Facility Operating License Nos. NPF-2 and NPF-8. Amendments revise the Technical Specifications.

Date of initial notice in **Federal Register:** June 17, 1987 (52 FR 23094) The July 10, and August 25, 1987 supplements made clarifying statements, but did not change the findings of the original notice. The Commission's related evaluation of the amendment is contained in a Safety Evaluation dated September 18, 1987.

No significant hazards consideration comments received: No

Local Public Document Room location: George S. Houston Memorial Library, 212 W. Burdeshaw Street, Dothan, Alabama 36303

Alabama Power Company, Docket No. 50-364, Joseph M. Farley Nuclear Plant, Unit 2, Houston County, Alabama.

Date of application for amendment: May 4, 1987

Brief description of amendment: Technical Specifications 3/4.4.6 were modified for surveillance and reporting requirements for testing of the steam generator tubes in the tubesheet region. Plugging or repairing of tubes in the tubesheet region below F* (F-star) are deleted, but reporting indications in the F* region is required.

Date of issuance: September 21, 1987

Effective date: September 21, 1987

Amendment No. 64

Facility Operating License No. NPF-8. Amendment revised the Technical Specifications.

Date of initial notice in **Federal Register:** June 17, 1987 (52 FR 23093) The Commission's related evaluation of the amendment is contained in a Safety Evaluation dated September 21, 1987.

No significant hazards consideration comments received: No

Local Public Document Room location: George S. Houston Memorial Library, 212 W. Burdeshaw Street, Dothan, Alabama 36303

Carolina Power & Light Company, et al., Docket Nos. 50-325 and 50-324, Brunswick Steam Electric Plant, Units 1 and 2, Brunswick County, North Carolina

Dates of application for amendments: August 28, 1985, as supplemented May 15, 1987.

Description of amendments: Amends the Technical Specifications for Brunswick, Units 1 and 2, by changing the required power level for rod block monitor operation.

Date of issuance: September 24, 1987

Effective date: September 24, 1987

Amendments Nos.: 112 and 139

Facility Operating License Nos. DPR-71 and DPR-62. Amendments revise the Technical Specifications.

Date of initial notice in **Federal Register:** July 29, 1987 (52 FR 28373) The Commission's related evaluation of the amendment is contained in a Safety Evaluation dated September 24, 1987.

No significant hazards consideration comments received: No.

Local Public Document Room location: University of North Carolina at Wilmington, William Madison Randall

Library, 601 S. College Road, Wilmington, North Carolina 28403-3297.

Connecticut Yankee Atomic Power Company, Docket No. 50-213, Haddam Neck Plant, Middlesex County, Connecticut

Date of application for amendment: June 1, 1987

Brief description of amendment: During the 1987 outage, new motor-operated valves were installed into the existing emergency core cooling systems (ECCS) to assure the capability of adequate core cooling over the entire spectrum of postulated pipe breaks. This license amendment provides (1) new periodic surveillance requirements to ensure correct valve position, (2) post-maintenance surveillance requirements for throttle valves, and (3) new valve and ECCS retest requirements following modifications to any ECCS subsystem that would alter ECCS flow characteristics.

Date of issuance: September 9, 1987

Effective date: September 9, 1987

Amendment No. 93.

Facility Operating License No. DPR-61. Amendment revised the Technical Specifications.

Date of initial notice in **Federal Register:** July 1, 1987 (52 FR 24545). The Commission's related evaluation of the amendment is contained in a Safety Evaluation dated September 9, 1987.

No significant hazards consideration comments received: No.

Local Public Document Room location: Russell Library, 124 Broad Street, Middletown, Connecticut 06457.

Connecticut Yankee Atomic Power Company, Docket No. 50-213, Haddam Neck Plant, Middlesex County, Connecticut

Date of application for amendment: June 1, 1987

Brief description of amendment: The license amendment revises the heat-up rate curve (Figure 3.4-8) and also provides a larger interval for which the low-temperature pressurization protection system (LTOPS) must be placed into operation. More specifically, the proposed heat-up rate change results in a pressure/temperature limit curve shift. This shift increases the temperature range over which the LTOPS can effectively be placed into operation and decreases the probability of operator error during plant heat-up and cooldown operations.

Date of issuance: September 10, 1987

Effective date: September 10, 1987

Amendment No. 94.

Facility Operating License No. DPR-61. Amendment revised the Technical Specifications.

Date of initial notice in **Federal Register:** July 1, 1987 (52 FR 24545). The Commission's related evaluation of the amendment is contained in a Safety Evaluation dated September 10, 1987.

No significant hazards consideration comments received: No.

Local Public Document Room location: Russell Library, 124 Broad Street, Middletown, Connecticut 06457.

Connecticut Yankee Atomic Power Company, Docket No. 50-213, Haddam Neck Plant, Middlesex County, Connecticut

Date of application for amendment: June 1, 1987

Brief description of amendment: This license amendment revises Technical Specifications (TS) 3.19 and 4.13 pertaining to snubbers by replacing the existing TS with technical specifications which are largely consistent with the NRC model standard technical specifications (STS) and which are more consistent with current industry guidelines such as NRC Generic Letter 84-13.

Date of issuance: September 23, 1987

Effective date: September 23, 1987

Amendment No. 95.

Facility Operating License No. DPR-61. Amendment revised the Technical Specifications.

Date of initial notice in **Federal Register:** July 29, 1987 (52 FR 28373). The Commission's related evaluation of the amendment is contained in a Safety Evaluation dated September 23, 1987.

No significant hazards consideration comments received: No.

Local Public Document Room location: Russell Library, 124 Broad Street, Middletown, Connecticut 06457.

Dairyland Power Cooperative, Docket No. 50-409, LaCrosse Boiling Water Reactor, LaCrosse, Wisconsin

Date of application for amendment: June 19, 1987

Brief description of amendment: This amendment: (1) revises the Technical Specifications (TS) to state that the reactor will not be operated; (2) deletes TS requirements for reactor nuclear instrumentation channels to be in operation; and (3) deletes TS requirements to perform inservice inspection of high pressure primary systems and the TS requirements to use NUREG-0313, Revision 1, to govern repair and replacement of piping.

Date of issuance: September 15, 1987

Effective Date: September 15, 1987

Amendment No.: 57

Provisional Operating License No. DPR-7. This amendment revises the license.

Date of initial notice in **Federal Register:** August 12, 1987 (52 FR 29913). The Commission's related evaluation of the amendment is contained in a Safety Evaluation dated September 15, 1987.

No significant hazards consideration comments received: No.

Local Public Document Room location: La Crosse Public Library, 800 Main Street, La Crosse, Wisconsin 54601.

Duquesne Light Company, Docket No. 50-412, Beaver Valley Power Station, Unit 2, Shippingport, Pennsylvania

Date of application for amendment: July 14, 16, 22, 31, September 14 (3 letters), 17 and 18, 1987.

Brief description of amendment: The amendment changed the license for Beaver Valley Unit 2 to allow sale and leaseback transactions by each of the four owners (Duquesne Light Company, Ohio Edison Company, The Cleveland Electric Illuminating Company and The Toledo Edison Company).

Date of issuance: September 23, 1987

Effective date: September 23, 1987

Amendment No. 1

Facility Operating License No. NPF-73. Amendment revised the license.

Date of initial notice in **Federal Register:** August 12, 1987 (52 FR 29915) The September 14 (3 letters), 17 and 18, 1987 letters provided additional clarifying information and did not change the findings of the initial notice. The Commission's related evaluation of the amendment is contained in a Safety Evaluation dated September 23, 1987.

No significant hazards consideration comments received: No

Local Public Document Room location: B. F. Jones Memorial Library, 663 Franklin Avenue, Aliquippa, Pennsylvania 15001.

Florida Power and Light Company, Docket No. 50-335, St. Lucie Plant, Unit No. 1, St. Lucie County, Florida

Date of application of amendment: October 10, 1986, as supplemented January 9, 1987.

Brief description of amendment: The amendment revised the Unit No. 1 technical specifications that deal with containment air locks, and made them consistent with the Unit No. 2 technical specifications. The associated exemption to 10 CFR Part 50, Appendix J was issued on August 19, 1987.

Date of Issuance: September 15, 1987

Effective Date: September 15, 1987

Amendment No.: 85

Facility Operating License No. DPR-67: Amendment revised the Technical Specifications.

Date of initial notice in **Federal Register:** March 25, 1987 (52 FR 9567). The Commission's related evaluation of the amendment is contained in a Safety Evaluation dated September 15, 1987.

No significant hazards consideration comments received: No.

Local Public Document Room location: Indian River Junior College Library, 3209 Virgina Avenue, Ft. Pierce, Florida.

Florida Power and Light Company, et al., Docket No. 50-389, St. Lucie Plant, Unit No. 2, St. Lucie County, Florida

Date of application of amendment: December 2, 1986, as supplemented February 3, 1987

Brief description of amendment: The amendment reduced the steam generator water level setpoints for reactor trip and auxiliary feedwater initiation. The water level for reactor trip was reduced from 39.5% to 20.5%. The water level for auxiliary feedwater initiation was reduced from 20.6% to 19.0%.

Date of Issuance: September 24, 1987

Effective Date: September 24, 1987

Amendment No.: 23

Facility Operating License No. NPF-16: Amendment revised the Technical Specifications.

Date of initial notice in **Federal Register:** February 11, 1987 (52 FR 4407) Additional information was provided by the licensee by letter dated February 3, 1987. The additional information did not change the initial determination of no significant hazards consideration as published in the **Federal Register.** The Commission's related evaluation of the amendment is contained in a Safety Evaluation dated September 24, 1987.

No significant hazards consideration comments received: No.

Local Public Document Room location: Indian River Junior College Library, 3209 Virginia Avenue, Ft. Pierce, Florida.

Gulf States Utilities Company, Docket No. 50-458, River Bend Station, Unit 1 West Feliciana Parish, Louisiana

Date of application for amendment: September 12, 1986.

Brief description of amendment: The amendment changes the trip setpoints, allowable values, and footnotes for the main steam line flow-high and the reactor core isolation cooling (RCIC) steam line flow-high; and changes a footnote for the residual heat removal (RHR)/RCIC steam line flow-high.

Date of issuance: September 23, 1987.

Effective date: September 23, 1987.

Amendment No. 11

Facility Operating License No. NPF-47. This amendment revised the Technical Specifications.

Date of initial notice in **Federal Register:** July 29, 1987 (52 FR 28377). The Commission's related evaluation of the amendment is contained in a Safety Evaluation dated September 23, 1987.

No significant hazards consideration comments received: No

Local Public Document Room location: Government Documents Department, Louisiana State University, Baton Rouge, Louisiana 70803

Louisiana Power and Light Company, Docket No. 50-382, Waterford Steam Electric Station, Unit 3, St. Charles Parish, Louisiana

Date of amendment request: March 26, 1987, as supplemented by letters dated May 15, July 24 and August 24, 1987.

Brief description of amendment: The amendment changed the Technical Specifications by revising the surveillance requirements associated with demonstrating operability of the emergency diesel generators in order to minimize engine stress and wear in response to Generic Letter 84-15.

Date of issuance: September 22, 1987.

Effective date: September 22, 1987.

Amendment No.: 23

Facility Operating License No. NPF-38. Amendment revised the Technical Specifications.

Date of initial notice in **Federal Register:** June 17, 1987 (52 FR 23100) The July 24 and August 24, 1987 submittals provided additional clarifying information and did not change the finding of the initial notice.

The Commission's related evaluation of the amendment is contained in a Safety Evaluation dated September 22, 1987.

No significant hazards consideration comments received: No.

Local Public Document Room location: University of New Orleans Library, Louisiana Collection, Lakefront, New Orleans, Louisiana 70122

Mississippi Power & Light Company, System Energy Resources, Inc., South Mississippi Electric Power Association, Docket No. 50-416, Grand Gulf Nuclear Station, Unit 1, Claiborne County, Mississippi

Date of application for amendment: June 3, 1987, as supplemented June 22, 1987

Brief description of amendment: This amendment changed the definition of core alteration in the TSs to include certain exceptions and changed footnotes in the TSs to be consistent with the new definition. This amendment also changed a snubber surveillance test sample plan in the TS by decreasing the number of additional snubbers required to be tested from 10% to 5% for each snubber in the initial test sample that failed to meet specified functional test criteria.

Date of issuance: September 10, 1987

Effective date: September 10, 1987

Amendment No. 35

Facility Operating License No. NPF-29. This amendment revised the Technical Specifications

Date of initial notice in **Federal Register:** July 15, 1987 (52 FR 26589) and July 29, 1987 (52 FR 28380) The Commission's related evaluation of the amendment is contained in a Safety Evaluation dated September 10, 1987.

Nebraska Public Power District, Docket No. 50-298, Cooper Nuclear Station, Nemaha County, Nebraska

Date of amendment request: July 9, 1987.

Brief description of amendment: The amendment changes the Technical Specifications to include local leak rate test acceptance criteria for primary containment airlock doors.

Date of issuance: September 9, 1987.

Effective date: September 9, 1987.

Amendment No.: 110

Facility Operating License No. DPR-62. Amendment revised the Technical Specifications.

Date of initial notice in **Federal Register:** August 11, 1987 (52 FR 29922).

The amendment was inadvertently issued two days prior to expiration of the 30-day comment period specified by 10 CFR 50.91(a)(2)(iii). However, due to the fact that no comments or requests for hearing have been received as of September 15, 1987, the staff has determined that the amendment need not be reissued with a revised date.

The Commission's related evaluation of the amendment is contained in a Safety Evaluation dated September 9, 1987.

No significant hazards consideration comments received: No.

Local Public Document Room location: Auburn Public Library, 118 15th Street, Auburn, Nebraska 68305.

Nebraska Public Power District, Docket No. 50-298, Cooper Nuclear Station, Nemaha County, Nebraska

Date of amendment request: February 17, 1987, as revised by letters dated April 6, May 4 and August 3, 1987.

Brief description of amendment: The amendment changes the Physical

Security Plan to reflect changes to the intrusion detection system.

Date of issuance: September 17, 1987.
Effective date: September 17, 1987.
Amendment No.: 111
Facility Operating License No. DPR-62. Amendment revised the license.
Date of initial notice in **Federal Register:** June 17, 1987 (52 FR 23103). The Commission's related evaluation of the amendment is contained in a letter dated September 17, 1987.

No significant hazards consideration comments received: No.

Northeast Nuclear Energy Company, Docket No. 50-245, Millstone Nuclear Power Station, Unit No. 1, New London County, Connecticut

Date of application for amendment: January 21, 1987
Brief Description of amendment: The amendment deletes the limiting conditions for operation (LCO) and the surveillance requirements for the switchyard batteries from the technical specifications since the maintenance responsibility belongs with the New London Substation Maintenance Department.
Date of issuance: September 1, 1987
Effective date: September 1, 1987
Amendment No. 10.
Facility Operating License No. DPR-21. Amendment revised the Technical Specifications.
Date of initial notice in **Federal Register:** February 26, 1987 (52 FR 5863). The Commission's related evaluation of the amendment is contained in a Safety Evaluation dated September 1, 1987.

No significant hazards consideration comments received: No.

Local Public Document Room location: Waterford Public Library, 49 Rope Ferry Road, Waterford, Connecticut 06385.

Northeast Nuclear Energy Company, et al., Docket No. 50-245, Millstone Nuclear Power Station, Unit No. 1, New London County, Connecticut

Date of application for amendment: April 28, 1987.
Brief description of amendment: This amendment revises technical specification Table 3.7.1, Primary Containment Isolation, to reflect plant modifications and to increase the scope of the table to include not only valves which receive a containment isolation signal, but also check valves and valves open during power operation for testing and/or sampling purposes.
Date of issuance: September 8, 1987
Effective date: September 8, 1987
Amendment No.: 11.
Facility Operating License No. DPR-21. Amendment revised the Technical Specifications.
Date of initial notice in **Federal Register:** June 3, 1987 (52 FR 20802). The Commission's related evaluation of the amendment is contained in a Safety Evaluation dated September 8, 1987.

No significant hazards consideration comments received: No.

Local Public Document Room location: Waterford Public Library, 49 Rope Ferry Road, Waterford, Connecticut 06385.

Omaha Public Power District, Docket No. 50-285, Fort Calhoun Station, Unit No. 1, Washington County, Nebraska

Date of amendment request: March 28, 1986 as supplemented April 9, 1986, March 13 and June 22, 1987.
Brief description of amendment: The amendment incorporates revised Surveillance Requirements for the diesel generators in accordance with Generic Letter 84-15 entitled, "Proposed Staff Actions to Improve and Maintain Diesel Generator Reliability."
Date of issuance: September 24, 1987.
Effective date: 30 days from the date of issuance.
Amendment No.: 111
Facility Operating License No. DPR-40. Amendment revised the Technical Specifications.
Date of initial notice in **Federal Register:** May 21, 1986 (51 FR 18689). Since the date of initial notice, the licensee submitted additional information dated April 9, 1986, March 13 and June 22, 1987. This information was substantial enough to warrant renoticing of the requested amendment on August 12, 1987 (52 FR 29924). The Commission's related evaluation of the amendment is contained in a Safety Evaluation dated September 24, 1987.

No significant hazards consideration comments received: No.

POSTAL SERVICE

Stamps By Phone Program

AGENCY: Postal Service.

ACTION: Notice of stamps by phone program with request for comments.

SUMMARY: On September 1, 1987, the Postal Service initiated a test of a Stamps By Phone program at selected cities. This program will permit postal customers to purchase stamps by telephone, with payment made by credit card. Comments are requested concerning this program.

DATE: The Stamps By Phone program began on September 1, 1987. Comments must be received on or before January 31, 1988.

ADDRESS: Written comments should be directed to the General Manager, Retail and Customer Services Clerical Operations Division, United States Postal Service, Room 7226, 475 L'Enfant Plaza West SW., Washington, DC 20260–7225. Copies of all written comments will be available for inspection and photocopying between 9 a.m. and 4 p.m., Monday through Friday at room 7226 at the above address.

FOR FURTHER INFORMATION CONTACT: Mr. Charles Hughes, (202) 268–3547.

SUPPLEMENTARY INFORMATION: Under 39 U.S.C. 404(a)(4), the Postal Service is directed "to provide and sell postage stamps and other stamped paper, cards, and envelops * * * as may be necessary or desirable." Consistent with this responsibility, the Postal Service employs a wide variety of means to sell postage to its customers, including sales at postal facilities, operation of vending machines, sales through rural carriers, a stamps by mail program, and consignment of stamps for sale by private parties.

For the further convenience of its customers, the Postal Service has initiated a test of a new means to distribute postage, a Stamps By Phone program. Under this new program, customers may use a toll-free "800" telephone number to order postage, with payment to be made by either a VISA or Mastercard credit card. Others may be placed 24 hours per day, seven days per week. The following products will be offered:

Three books (20 stamps to a book) of 22¢ stamps	$13.20
Sheet (50 stamps) of 22¢ stamps	$11.00
Roll (100 stamps) of 17¢ stamps	$17.00
Roll (100 stamps) of 22¢ stamps	$22.00
Roll (500 stamps) of 22¢ stamps	$110.00
Book (3 stamps) of $10.75 Express mailstamps	$32.25
Package (50 envelops) of size 6¾ stamped envelops	$13.50
Package (50 envelopes) of size 10 stamped envelopes	$13.50

A two dollar handling charge will be assessed for each order to defray Postal Service costs. Customers will be permitted to purchase an unlimited amount of these postage products in each order. Orders will be mailed from a central location, and should be delivered within five days from the date the order is placed.

The test as described above will be conducted in the following seven cities, with scheduled starting dates ranging from September 1, 1987, through October 27, 1987. These cities, and the implementation date of the program in each city are: Sacramento, California (September 1, 1987); Miami, Florida (September 15, 1987); New York, New York (September 29, 1987); Boston Massachusetts (October 13, 1987); Baltimore, Maryland (October 20, 1987); Minneapolis, Minnesota (October 27, 1987); and San Diego, California (October 27, 1987).

In two additional cities, Norfolk, Virginia (starting September 12, 1987) and Dallas, Texas (starting September 26, 1987), customers will be able to purchase stamps through telephone calls to a local telephone number. These order, which will be fulfilled locally, may also be charged to VISA and Mastercard credit cards. However, no handling charges will be assessed on these orders.

After the completion of the test in all nine cities on April 30, 1988, the Postal Service will evaluate the Stamps By Phone program and determine whether it should be continued and expanded.

The Postal Service invites comments concerning any aspect of this program.

Fred Eggleston.

Assistant General Counsel, Legislative Division.

RAILROAD RETIREMENT BOARD

Agency Forms Submitted for OMB Review

AGENCY: Railroad Retirement Board.

ACTION: In accordance with the Paperwork Reduction Act of 1980. (44 U.S.C. Chapter 35), the Board has submitted the following proposal(s) for the collection of information to the Office of Management and Budget for review and approval.

Summary of Proposal(s)

(1) *Collection title:* Supplemental Information on Accident and Insurance

(2) *Form(s) submitted:* SI–1c, SI–5 and ID–30K(1)

(3) *Type of request:* Extension of the expiration date of a currently approved collection without any change in the substance or in the method of collection

(4) *Frequency of use:* On occasion

BEST COPY AVAILABLE

(5) *Respondents:* Individuals or households, Businesses or other for-profit
(6) *Annual responses:* 25,600
(7) *Annual reporting hours:* 2,134
(8) *Collection description:* The RUIA provides for recovery of sickness benefits paid if the employee receives a settlement for the same injury for which benefits were paid. The collection obtains identifying information about the person or company responsible for such payments and information needed for determining the amount of the Board's entitlement.

Additional Information or Comments: Copies of the proposed forms and supporting documents can be obtained from Pauline Lohens, the agency clearance officer (312–751–4692). Comments regarding the information collection should be addressed to Pauline Lohens, Railroad Retirement Board, 844 Rush Street, Chicago, Illinois 60611 and the OMB reviewer, Elaina Norden (202–395–7316), Office of Management and Budget, Room 3002, New Executive Building, Washington, DC 20503.

Pauline Lohens,

Director of Information and Data Management.

SECURITIES AND EXCHANGE COMMISSION

[Release No. 34–24978; File No. SR–MSTC–87–6]

Self-Regulatory Organizations; Midwest Securities Trust Co.; Changes to MSTC's Fee Schedule Effective August 1, 1987; Filing and Immediate Effectiveness of Proposed Rule Change

Pursuant to section 19(b)(1) of the Securities Exchange Act of 1934, 15 U.S.C. 78s(b)(1), notice is hereby given that on September 21, 1987, the Midwest Securities Trust Company filed with the Securities and Exchange Commission the proposed rule change as described in Items I, II and III below, which Items have been prepared by the self-regulatory organization. The Commission is publishing this notice to solicit comments on the proposed rule change from interested persons.

I. Self-Regulatory Organization's Statement of the Terms of Substance of the Proposed Rule Change

The Midwest Securities Trust Company hereby amends its fee schedule, effective August 1, 1987, as follows:

	New fee	Old fee
Monthly Account Service		
Account Maintenance	$250	$175
Equity/Corp. Service	75	105
Municipal Bond Service	75	105
Total	$325 or $400	$280 or $385
Depository Delivery Instructions (Book-Entry Movements)		
Registered Securities	$0.65	[illegible]
Bearer Securities	0.65	1.50
Safekeeping		
Registered Securities Position.	$0.58	[illegible]
Thinly Held Issue Surcharge:		
Equity (5 or less Participants).	$0.22 (total $0.80).	–0–
Corp/Muni Bond (2 or less Participants).	$0.42 (total $1.00).	–0–
Bearer Securities Position.	$1.10	$1.25
Thinly Held Issue Surcharge:		
2 or less Participants	$0.65 (total $1.75).	$0.25 (total $1.50)
1 Participant	$0.09 (total $2.00).	$0.85 (total $2.10)
Dividend/Interest Collection Processing		
Cash Dividend Credit	$1.40	$1.00
Stock Dividend Credit	4.00	1.00
Registered Bond Interest Credit.	1.50	1.00
Bearer Bond Interest Credit.	3.00	1.50
Deposits		
Registered Securities	$1.00	$0.95
Next Day	$1.50	$1.40
Same Day (7:30–11:00)	15.00	12.00
Last Minute (11:00–11:30).	9.00	7.50
Communications (Rebilled Expense)		
Participants Using Shared Leased Lines.	$0.40/mi	$0.18/mi

II. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

In its filing with the Commission, the self-regulatory organization included statements concerning the purpose of and basis for the proposed rule change. The text of these statements may be examined at the places specified in Item IV below. The self-regulatory organization has prepared summaries, set forth in sections (A), (B) and (C) below, of the most significant aspects of such statements.

(A) Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

The purpose of the changes to MSTC's fee schedule is to more accurately cover the cost of providing the various services to MSTC Participants.

The proposed rule change is consistent with section 17A of the Securities Exchange Act of 1934 in that it provides for the equitable allocation of reasonable dues, fees, and other charges among MSTC's Participants.

(B) Self-Regulatory Organization's Statement on Burden on Competition

The Midwest Securities Trust Company does not believe that the proposed rule change will impose any burdens on competition.

(C) Self-Regulatory Organization's Statement on Comments on the Proposed Rule Change Received from Members, Participants or Others

In response to an MSTC Administrative Bulletin dated August 5, 1987, which described the proposed fee changes, MSTC received four comment letters and approximately ten telephone calls. This represents approximately 4% of all MSTC Participants. In most instances the Participant requested clarification on the fee changes. Each letter and call was replied to by phone and through letters. Each Participant was advised why the increases were recommended and was further provided with an analysis of the overall effect on the individual firm's total costs for depository services. In all cases, once the total cost effect was understood and an explanation of the reasons for the increases were discussed, the Participants indicated that the fee changes were acceptable. The cost effect for most Participants was to increase total depository costs between 1.5% to approximately 3%.

III. Date of Effectiveness of the Proposed Rule Change and Timing for Commission Action

The foregoing rule change has become effective pursuant to section 19(b)(3) of the Securities Exchange Act of 1934 and subparagraph (e) of Securities Exchange Act Rule 19b–4. At any time within 60 days of the filing of such proposed rule change, the Commission may summarily abrogate such rule change if it appears to the Commission that such action is necessary or appropriate in the public interest for the protection of investors, or otherwise in furtherance of the purposes of the Securities Exchange Act of 1934.

IV. Solicitation of Comments

Interested persons are invited to submit written data, views and arguments concerning the foregoing. Persons making written submissions should file six copies thereof with the Secretary, Securities and Exchange Commission, 450 Fifth Street, NW., Washington, DC 20549. Copies of the submission, all subsequent amendments, all written statements with respect to the proposed rule change that are filed with the Commission, and all written communications relating to the proposed

rule change between the Commission and any person, other than those that may be withheld from the public in accordance with the provisions of 5 U.S.C. 552, will be available for inspection and copying at the principal office of the above-referenced self-regulatory organization. All submissions should refer to the file number (File No. SR–MSTC–87–6) and should be submitted by October 28, 1987.

For the Commission, by the Division of Market Regulation, pursuant to delegated authority.

Dated: October 1, 1987.

Shirley E. Hollis,

Assistant Secretary.

BILLING CODE 8010–01–M

[Release No. 34–24971; File No. PHLX 87–32]

Self-Regulatory Organizations; Philadelphia Stock Exchange, Inc.; to its Options Position Limit Rule Providing for a Hedge Exemption

Pursuant to section 19(b)(1) of the Securities Exchange Act of 1934, 15 U.S.C. 78s(b)(1), notice is hereby given that on September 24, 1987 the Philadelphia Stock Exchange, Inc. filed with Securities and Exchange Commission the proposed rule change as described in Items I, II and III below, which Items have been prepared by the self-regulatory organization. The Commission is publishing this notice to solicit comments on the proposed rule change from interested persons.

I. Self-Regulatory Organization's Statement of the Terms of Substance of the Proposed Rule Change

The Philadelphia Stock Exchange, Inc. ("PHLX" of the "Exchange") submits as a proposed rule change an amendment to its options position limit rule providing for a hedge exemptions for options positions that are offset by positions in the underlying stock. The following is the full text of the proposed rule change (additions italicized; deletions bracketed).

OPTIONS RULES

* * * * *

Position Limits

Rule 1001. No change.

* * * Commentary

.01 through .06 No change.

.07 For purposes of position limits for stock options only, the following positions, where each options contract is "hedged" by 100 shares of stock or, in the case of an adjusted option, the same number of shares at options, shall be exempted from established limits: (i) long call and short stock; (ii) short call and long stock; (iii) long put and long stock; and (iv) short put and short stock. In no event may position limits for any call of stock options exceed twice the limits established under Rule 1001 and Commentary .05 above.

II. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

In its filing with the Commission, the self-regulatory organization included statements concerning the purpose of and basis for the proposed rule change and discussed any comments it received on the proposed rule change. The text of these statements may be examined at the places specified in Item IV below. The self-regulatory organization has prepared summaries, set forth in sections (A), (B), and (C) below, of the most significant aspects of such statements.

A. Self-Regulatory Organization's Statements of the Purpose of, and Statutory Basis for the Proposed Rule Change

Position limits circumscribe the amount of options on the same side of the market (*i.e.*, short calls and long puts or long calls and short puts) that an investor may control. Position limits for equity options are determined in accordance with a three-tiered system (*i.e.*, 3,000, 5,500, or 8,000 contracts) based on the underlying stock's trading volume and/or the number of outstanding shares that are publicly held.

The proposed amendment is designed to allow a limited, automatic exemption from equity option *position and exercise limits* for accounts that have established one of the four most commonly used hedged positions consisting of stock and equity options on a 1-for-1 basis, i.e., 100 shares of stock for each option contract.

The exemption is to be automatic and no request or application need be made by a market participant to utilize the exemption. The exemption is intended to apply to exercise limits as well as position limits.[1] Therefore, accounts will be allowed to exercise, during any five consecutive business days, the same number of contracts set forth as the position limit for that option, including those that are hedged. The exempted hedged positions are: (i) long call and short stock, (ii) short call and long stock, (iii) long put and long stock and (iv) short put and short stock. In no event, however, would the maximum position limit (including the allowed exemptions) exceed twice the present position limit.

Utilizing the proposed exemption would afford investors the opportunity to hedge twice the amount of underlying shares of stock without increasing the possibility for manipulation in such securities.

The Exchange believes that this proposal will increase the depth and liquidity of equity options trading. Therefore, the proposed amendment is consistent with the provisions of the Act and the rules and regulations thereunder applicable to the Exchange and, in particular, with section 6(b)(5) of the Act. By limiting the exemption to hedged positions, the proposal is designed to prevent fraudulent and manipulative acts and practices by enhancing the ability of investors to use options for investment and particularly for hedging purposes. It is designed to protect investors and promote the public interest.

B. Self-Regulatory Organizations Statement on Burden on Competition

The PHLX does not believe that the proposed rule change will impose any inappropriate burden on competition.

C. Self-Regulatory Organization's Statement on Comments on the Proposed Rule Change Received from Members, Participants, or Others

The Options Committee, a committee of the PHLX Board of Governors comprised of members and representatives of member firms, has endorsed the proposed rule change. No written comments were either solicited or received.

III. Date of Effectiveness of the Proposed Rule Change and Timing for Commission Action

Within 35 days of the date of publication of this notice in the **Federal Register** or within such longer period (i) as the Commission may designate up to 90 days of such date if it finds such longer period to be appropriate and publishes its reasons for so finding or (ii) as to which the self-regulatory organization consents, the Commission will:

(A) By order approve such proposed rule change, or,

(B) Institute proceedings to determine whether the proposed rule change should be disapproved.

IV. Solicitation of Comments

Interested persons are invited to submit written data, views and

[1] PHLX Rule 1002 relating to exercise limits incorporates the position limits rule by reference, so this proposal also would result in the doubling of exercise limits.

VOL 52 ISS 194 OCT 7 1987 UMI

arguments concerning the foregoing. Persons making written submissions should file six copies thereof with the Secretary, Securities and Exchange Commission, 450 Fifth Street, NW., Washington, DC 20549. Copies of the submission, all subsequent amendments, all written statements with respect to the proposed rule change that are filed with the Commission, and all written communications relating to the proposed rule change between the Commission and any person, other than those that may be withheld from the public in accordance with the provisions of 5 U.S.C. 552, will be available for inspection and copying in the Commission's Public Reference Section, 450 Fifth Street, NW., Washington, DC 20549. Copies of such filing will also be available for inspection and copying at the principal office of the above-mentioned self-regulatory organization. All submissions should refer to the file number in the caption above and should be submitted by October 28, 1987.

For the Commission by the Division of Market Regulation, pursuant to delegated authority.

Dated: September 30, 1987.

Shirley E. Hollis,

Assistant Secretary.

BILLING CODE 8010-01-M

[Rel. No. IC-16025; 811-3471 and 811-3598]

Declaration of Deregistration; American Money Plan, Inc.

October 1, 1986.

AGENCY: Securities and Exchange Commission ("SEC").

ACTION: Notice of Delcaration of Deregistration under the Investment Company Act of 1940 (the "1940 Act").

Registrant: American Money Plan Inc. ("Registrant")

Relevant 1940 Act Section: Section 8(f).

Summary of Notice: The SEC proposes to declare by order on its own motion that Registrant has ceased to be an investment company.

Hearing on Notification of Hearing: If no hearing is ordered, the motion will be granted. Any interested person may request a hearing on this motion, or ask to be notified if a hearing is ordered. Any requests must be received by the SEC by 5:30 p.m., on October 28, 1987. Request a hearing in writing, giving the nature of your interest, the reason for the request, and the issues you contest. Serve the Registrant with the request, either personally or by mail, and also send it to the Secretary of the SEC, along with proof of service by affidavit or, for lawyers, by certificate. Request notification of the date of a hearing by writing to the Secretary of the SEC.

ADDRESSES: Secretary, SEC, 450 Fifth Street NW., Washington, DC 20549. Registrant, 1939A Berryman Street, Berkely, CA 94709.

FOR FURTHER INFORMATION CONTACT: Paul J. Heaney, Financial Analyst (202) 272-2847 or Brion R. Thompson, Special Counsel (202) 272-3016 (Division of Investment Management).

Statement of Facts

1. Registrant is an open-end, non-diversified management investment company which filed a Form N-8A to register under the 1940 Act on May 25, 1982; Form N-1 was filed on November 12, 1982 but no additional filings have been made with the SEC since that date. Efforts made to contact Registrant and its principals have been unsuccessful.

2. Information contained in the files of the SEC indicate that Registrant has never made a public offering of its securities, has not more than 100 securityholders, has no assets, and is not a party to any litigation or administrative proceeding. Thus it appears that Registrant is not currently engaged in the business of an investment company.

For the SEC, by the Division of Investment Management, under delegated authority.

Shirley E. Hollis,

Assistant Secretary.

BILLING CODE 8010-01-M

[Release No. IC-16024; File No. 812-6855]

Application for Exemption; FBL Variable Insurance Series Fund

October 1, 1987.

AGENCY: Securities and Exchange Commission ("SEC").

ACTION: Notice of Application for Exemption under the Investment Company Act of 1940 (the "1940 Act").

Applicant: FBL Variable Insurance Series Funds ("Fund" or "Applicant").

Relevant 1940 Act Sections: Exemption requested under section 6(c) of the 1940 Act from sections 9(a), 13(a), 15(a) and 15(b) of the Act and Rules 6e-2(b)(15) and 6e-3(T)(b)(15) thereunder.

Summary of Application: Applicant seeks an order to the extent necessary to permit shares of the Fund to be sold to and held by variable annuity and variable life insurance separate accounts of both affilitated and unfaffiliated life insurance companies.

Filing Date: August 28, 1987.

Hearing or Notification of Hearing: If no hearing is ordered, the application will be granted. Any interested person may request a hearing on this application or ask to be notified if a hearing is ordered. Any requests must be received by the SEC by 5:30 p.m. on October 26, 1987. Request a hearing in writing, giving the nature of your interest, the reason for the request, and the issues you contest. Serve the applicants with the request, either personally or by mail, and also send it to the Secretary of the SEC, along with proof of service by affidavit, or, in the case of an attorney-at-law, by certificate. Request notifications of the date of a hearing by writing to the Secretary of the SEC.

ADDRESSES: Secretary, SEC, 450 5th Street NW., Washington, DC 20549. FBL Variable Insurance Series Fund, 5400 University Avenue, West Des Moines, Iowa 50265.

FOR FURTHER INFORMATION CONTACT: Jeffrey M. Ulness, Attorney, at (202) 272-2026 or Lewis B. Reich, Special Counsel, at (202) 272-2061 (Division of Investment Management).

SUPPLEMENTARY INFORMATION: Following is a summary of the application; the complete application is available for a fee from either the SEC's Public Reference Branch in person or the SEC's commercial copier (800) 231-3282 (in Maryland (301) 253-4300).

Applicants' Representations

1. The Fund is a Massachusetts business trust seeking registration under the 1940 Act as an open-end diversified investment company. The Fund currently consists of six Portfolios: the Money Market Portfolio, the Growth Common Stock Portfolio, the Aggressive Growth Common Stock Portfolio, the High Quality Bond Portfolio, the High Yield Bond Portfolio, and the Managed Portfolio. Additional Portfolios may be created in the future.

2. The Fund intends to offer shares of its existing and future Series to separate accounts of any interested insurance company in order to fund variable annuity contracts and variable life insurance contracts (collectively referred to herein as "variable contracts"). Insurance companies whose separate account(s) owns shares of the Fund are referred to herein as "participating insurance companies." It is anticipated that participating insurance companies will rely on Rules 6e-2 or 6e-3(T) under the Act, Although some may rely on individual exemptive orders as well, in connection with variable life insurance contracts. The

use of a common management company as the underlying investment medium for both variable annuity and variable life insurance separate accounts is commonly referred to, and is referred to herein, as "mixed funding." The use of a common management company as the underlying investment medium for separate accounts of unaffiliated insurance companes is referred to herein as "shared funding."

3. Rules 6e-2 and 6e-3(T) under the Act provide certain exemptions from the Act in order to permit insurance company separate accounts to issue variable life insurance. Rule 6e-2(b)(15), however, precludes mixed and shared funding and Rule 6e-3(T)(b)(15) precludes shared funding. Applicant has requested exemptive relief to the extend necessary to permit shares of the Applicant to be sold for mixed funding and shared funding. Applicant proposes that the requested relief extend to a class consisting of life insurers and variable life separate accounts investing in Applicant (and principal underwriters and depositors of such separate accounts) which would otherwise be precluded from investing in Applicant by virtue of Applicant offering its shares to variable annuity separate accounts or unaffiliaged separate accounts.

4. Applicants state that permitting mixed and shared funding will facilitate the establishment of additional portfolios serving diverse goals. The applicant also states that the broader base of contract owners can be expected to provide economic justification for the creation of additional portfolios with a greater variety of investment objectives and policies. Further, use of the Fund as a common investment medium for variable contracts would encourage more insurance companies to offer variable contracts. Applicant believes that this will result in increased competition with respect to both variable contract design and pricing, and that this can be expected to result in more product variation and lower charges. Applicant also believes that mixed and shared funding should benefit variable contract owners by eliminating a significant portion of the costs of establishing and administering separate funds and that granting the requested relief should result in an increased amount of assets available for investment by the Fund which in turn may benefit variable contract owners by promoting economies of scale, by permitting greater safety through greater diversification, or by making the addition of new Portfolios of the Fund more feasible. Applicant represents that the Fund will not be managed to favor or disfavor any particular insurer of type of insurance product. Applicant believes that mixed and shared funding will have no adverse federal income tax consequences.

Disqualification

5. Section 9(a) of the Act provides that it is unlawful for any company to serve as investment adviser or principal underwriter of any registered open-end investment company if an affiliated person of that company is subject to a disqualification enumerated in sections 9(a) (1) or (2). Rules 6e-2(b)(15) (i) and (ii), and 6e-3(T)(b)(15) (i) and (ii), provide exemptions from section 9(a) under certain circumstances, subject to limitations on mixed and shared funding. These exemptions limit the application of the eligibility restrictions to affiliated individuals or companies that directly participate in the management of the underlying management company.

6. The partial relief granted in Rules 6e-2(b)(15) and 6e-3(T)(b)(15) from the requirements of section 9 in effect limits the amount of monitoring necessary to ensure compliance with section 9 to that which is appropriate in light of the policy and purposes of section 9. Applicant believes that it is necessary to apply section 9(a) to the many thousands of individuals in various unaffiliated insurance companies (or affiliated companies of participating insurance companies) that may utilize the Fund as the funding medium for variable contracts, and alleges that there is no regulatory purpose in extending the monitoring requirements because of mixed or shared funding. Applicant states that, on the other hand, the increased monitoring costs would reduce the net rates of return realized by contract owners.

Voting

7. The language of Rules 6e-2(b)(15)(iii) and 6e-3(T)(b)(15)(iii) assumes the existence of a pass-through voting requirement with respect to management investment company shares held by a separate account. Applicant states that pass-through voting privileges will be provided with respect to all variable contract owners.

8. Rules 6e-2(b)(15)(iii) and 6e-3(T)(b)(15)(iii) provide exemptions from the pass-through voting requirement with respect to several significant matters, assuming the limitations on mixed and shared funding are observed. Rules 6e-2(b)(15)(iii)(A) and 6e-3(T)(b)(15)(iii)(A) provide that the insurance company may disregard the voting instructions of its contract owners with respect to the investments of an underlying fund or any contract between a fund and its investment adviser, when required to do so by an insurance regulatory authority (subject to the provisions of paragraphs (b)(5)(i) and (b)(7)(ii)(A) of such Rules). According to Applicants, if a particular state insurance regulatory's decision conflicts with the majority of other state regulators, the affected insurer will be required to withdraw its separate account's investment in the Fund. This requirement will be provided for in agreements that will be entered into by participating insurers with respect to participation in the Fund.

Applicant's Conditions

Applicant has consented to the following conditions:

1. A majority of the Board of Trustees of the fund shall consist of persons who are not "interested persons" of the Fund, as defined by section 2(a)(19) of the Act and the Rules thereunder and as modified by any applicable orders of the Commission, except that if this condition is not met by reason of the death, disqualification, or bona fide resignation of any trustee or trustees, then the operation of this condition shall be suspended (a) for a period of 45 days if the vacancy or vacancies may be filled by the Board of Trustees" (b) for a period of 60 days if a vote of shareholders is required to fill the vacancy of vacancies; or (c) for such longer period as the Commission may prescribe by order upon application.

2. The Fund will comply with all provisions of the Act requiring voting by shareholders, and in particular the Fund will either provide for annual meetings or comply with section 16(c) of the Act (although the Fund is not one of the trusts described in section 16(c) of the Act) as well as with sections 16(a) and, if and when applicable, 16(b). Further, the Fund will act in accordance with the Commission's interpretation of the requirements of section 16(a) with respect to periodic elections of trustees and with whatever rules the Commission may promulgate with respect thereto.

3. The Board will monitor the Fund for the existence of any material irreconcilable conflict between the interests of the contract owners of all separate accounts investing in the Fund. An irreconcilable material conflict may arise for a variety of reasons, including: (a) An action by any state insurance regulatory authority; (b) a change in applicable federal or state insurance, tax, or securities laws or regulations, or a public ruling, private letter ruling, no-

VOL

1987
UMI

action or interpretative letter, or any similar action by insurance, tax, or securities regulatory authorities; (c) an administrative or judicial decision in any relevant proceeding; (d) the manner in which the investments of any series are being managed; (e) a difference in voting instructions given by variable annuity contract owners and variable life insurance contract owners; or (f) a decision by an insurer to disregard the voting instructions of contract owners.

4. Participating insurance companies and the Fund's investment adviser, FBL Investment Advisory Services, Inc. ("Adviser"), will report any potential or existing conflicts to the Board of Trustees of the Fund. Participating insurance companies and the Advisers will be responsible for assisting the Board in carrying out its responsibilities under these conditions, by providing the Board with all information reasonably necessary for the Board to consider any issues raised. This includes, but is not limited to, an obligation by each participating insurance company to inform the Board whenever contract owner voting instructions are disregarded. The responsibility to report such information and conflicts and to assist the Board will be contractual obligation of all insurers investing in the Fund under their agreements governing participation in the Fund and such responsibilities will be carried out with a view only to the interests of the contract owners.

5. If it is determined by a majority of the Board of Trustees of the Fund, or a majority of its disinterested trustees, that a material irreconcilable conflict exists, the relevant insurance companies shall, at their expense and to the extent reasonably practicable (as determined by a majority of the disinterested trustees), take whatever steps are necessary to remedy or eliminate the irreconcilable material conflict, up to and including: (a) Withdrawing the assets allocable to some or all of the separate accounts from the Fund or any Portfolio and reinvesting such assets in a different investment medium, including another Portfolio of the Fund, or submitting the question whether such segregation should be implemented to a vote of all affected contract owners and, as appropriate, segregating the assets of any appropriate group (i.e., annuity contract owners, life insurance contract owners, or variable contract owners of one or more participating insurance companies) that votes in favor of such segregation, or offering to the affected contract owners the option of making such a change; and (b) establishing a new registered management investment company or managed separate account. If a material irreconcilable conflict arises because of an insurer's decision to disregard contract owner voting instructions and that decision represents a minority position or would preclude a majority vote, the insurer may be required, at the Fund's election, to withdraw its separate account's investment in the Fund and no charge or penalty will be imposed as a result of such withdrawal. The responsibility to take remedial action in the event of a Board determination of an irreconcilable material conflict and to bear the cost of such remedial action shall be a contractual obligation of all participating insurance companies under their agreements governing participation in the Fund and these responsibilities will be carried out with a view only to the interests of contract owners. For purposes of this condition 5, a majority of the disinterested members of the Board shall determine whether or not any proposed action adequately remedies any irreconcilable material conflict, but in no event will the Fund or the Adviser be required to establish a new funding medium for any variable contract. No participating insurance company shall be required by this condition 5 to establish a new funding medium for any variable contract if an offer to do so has been declined by vote of a majority of contract owners materially adversely affected by the irreconcilable material conflict.

6. The Board's determination of the existence of an irreconcilable material conflict and its implications shall be made known promptly to all participating insurance companies.

7. Participating insurance companies will provide pass-through voting privileges to all variable contract owners so long as the Commission continues to interpret the Act as requiring pass-through voting privileges for variable contract owners. Participating insurance companies shall be responsible for assuring that each of their separate accounts participating in the Fund calculates voting privileges in a manner consistent with other participating insurance companies. The obligation to calculate voting privileges in a manner consistent with all other separate accounts investing in the Fund shall be a contractual obligation of all participating insurance companies under their agreements governing participation in the Fund.

8. The Fund will notify all participating insurance companies that prospectus disclosure regarding potential risks of mixed and shared funding may be appropriate.

9. If and to the extent that Rule 6e–2 and Rule 6e–3(T) are amended, or Rule 6e–3 is adopted, to provide exemptive relief from any provision of the Act or the rules promulgated thereunder with respect to mixed or shared funding on terms and conditions materially different from any exemptions granted in the order requested in this Application, then the Fund and/or the participating insurance companies, as appropriate, shall take such steps as may be necessary to comply with Rules 6e–2 and 6e–3(T), as amended, and Rule 6e–3, as adopted, to the extent such rules are applicable.

10. All reports received by the Board of Trustees of potential or existing conflicts, and all Board action with regard to determining the existence of a conflict, notifying participating insurance companies of a conflict, and determining whether any proposed action adequately remedies a conflict, will be properly recorded in the minutes of the Board or other appropriate records, and such minutes or other records shall be made available to the Commission upon request.

For the Commission, by the Division Investment Management, pursuant to delegated authority.

Shirley E. Hollis,

Assistant Secretary.

[FR Doc. 87–23216 Filed 10–6–87; 8:45 am]

BILLING CODE 8010–01–M

[Release No. 35–24469]

Filings Under the Public Utility Holding Company Act of 1935 ("Act")

October 1, 1987.

Notice is hereby given that the following filing(s) has/have been made with the Commission pursuant to provisions of the Act and rules promulgated thereunder. All interested persons are referred to the application(s) and/or declaration(s) for complete statements of the proposed transaction(s) summarized below. The application(s) and/or declaration(s) and any amendment(s) thereto is/are available for public inspection through the Commission's Office of Public Reference.

Interested persons wishing to comment or request a hearing on the application(s) and/or declaration(s) should submit their views in writing by October 26, 1987 to the Secretary, Securities and Exchange Commission, Washington, DC 20549, and serve a copy on the relevant applicant(s) and/or declarant(s) at the addresses specified below. Proof of service (by affidavit or,

in case of an attorney at law, by certificate) should be filed with the request. Any request for hearing shall identify specifically the issues of fact or law that are disputed. A person who so requests will be notified of any hearing, if ordered, and will receive a copy of any notice or order issued in the matter. After said date, the application(s) and/or declaration(s), as filed or as amended, may be granted and/or permitted to become effective.

Southern Electric International, Inc.; The Southern Company (70–7150)

The Southern Company ("Southern"), 64 Perimeter Center East, Atlanta, Georgia 30346, a registered holding company, and its wholly owned marketing subsidiary, Southern Electric International, Inc. ("SEI"), 100 Ashford Center North, Atlanta, Georgia 30338, have filed a post-effective amendment to their application-declaration pursuant to sections 6(a), 7, 9(a), 10 and 12 of the Act and Rules 43, 45 and 50(a)(5) thereunder.

By order dated November 18, 1985 (HCAR No. 23911), SEI was authorized to issue and sell from time to time through October 1, 1987, pursuant to an exception from the competitive bidding requirements of Rule 50, its long-term unsecured promissory notes in an aggregate principal amount not exceeding $75 million at any one time outstanding, and Southern was authorized to acquire and/or guarantee same or all of the notes. SEI and Southern now propose to extend through December 31, 1992 the period during which the authorized transactions may occur.

Eastern Utilities Associates (70–7426)

Eastern Utilities Associates ("EUA"), P.O. Box 2333, Boston, Massachusetts 02107, a registered holding company, has filed an application-declaration pursuant to sections 6(a), 6(b), 7, 9(a), 10, 12(b), and 13(b) of the Act and Rules 43(a), 45(a), 86, 87, 90 and 91 promulgated thereunder.

EUA proposes to: (1) Organize a new subsidiary corporation ("NewCo") under the laws of the Commonwealth of Massachusetts; (2) subscribe initially to 100 shares of NewCo's initial authorized capital of 300,000 shares of common stock, $0.01 per share par value, at $10.00 per share; and (3) fund NewCo from time-to-time, directly or indirectly, by means of stock purchases, capital contributions and interest-bearing loans and open account advances, in a maximum aggregate amount of $25 million outstanding at any one time. NewCo's capitalization may also include borrowings by NewCo from third party lenders. The aggregate amount of EUA's investments in NewCo together with NewCo's borrowings from third party lenders will not exceed a maximum amount at any one time outstanding of $25 million. EUA will not guarantee any indebteness of NewCo.

NewCo proposes to participate, directly and indirectly, through transactions with affiliates or nonaffiliates, in: (1) Qualifying cogeneration facilities, as defined in the Public Utility Regulatory Policies Act of 1978, located throughout the United States; and (2) qualifying small power production facilities and nonqualifying cogeneration and small power production facilities located within (a) the service territories of EUA's two retail electric subsidiaries, Blackstone Valley Electric Company and Eastern Edison, both members of the New England Power Pool ("NEPOOL"), and (b) the service areas of other members of NEPOOL, or (c) such additional areas as may hereafter be allowed by law or applicable regulation, (collectively, "NewCo Facilities"). NewCo proposes to invest up to a maximum aggregate amount at any one time outstanding of $25 million in NewCo Facilities through the purchase of shares or other acquisitions of interests, loans, guarantee of indebtedness or other contractual arrangements. NewCo also proposes to conduct certain energy or energy conservation research and to invest, directly or indirectly, up to an aggregate of $2 million of the $25 million in such activities.

EUA Service Corporation will provide services to NewCo at cost under a service contract. Employees of other EUA system companies may be used by NewCo from time-to-time, with the cost of these services charged to NewCo.

Gulf Power Company, et al. (70–7430)

The Southern Company ("Southern"), 64 Perimeter Center East, Atlanta, Georgia 30346, and Gulf Power Company ("Gulf"), 500 Bayfront Parkway, Pensacola, Florida 32501, a subsidiary of Southern, a registered holding company, have filed a declaration pursuant to sections 6(a), 7 and 12(b) of the Act, and Rules 45, 50, and 50(a)(5) thereunder.

Gulf proposes to enter into a new coal supply contract to replace an existing contract. In connection therewith an initial payment of approximately $60 million will be required for the termination of the earlier agreement and for certain costs under a new agreement. In order to provide funds to finance the initial payment, or for other general corporate purposes including Gulf's construction program, Gulf contemplates that some combination (not to exceed $60 million) of the following will be used on or before December 31, 1992: (i) Up to $10 million in capital contributions from Southern, (ii) up to $15 million from the issuance and sale of its preferred stock, (iii) up to $60 million from the issuance of notes with maturities of up to 30 years, and (iv) up to $60 million from the issuance and sale of first mortgage bonds.

Gulf proposes to issue and sell the first mortgage bonds and/or preferred stock by competitive bidding in compliance with Rule 50. Gulf may later amend the application to seek an exception from Rule 50 pursuant to subsection 50(a)(5) for a negotiated public offering.

For the Commission, by the Division of Investment Management, pursuant to delegated authority.

Shirley E. Hollis,

Assistant Secretary.

BILLING CODE 8010–01–M

[Rel. No. IC–16020; (812–6715)]

Application; Shearson Lehman Special Income Portfolios

September 30, 1987.

AGENCY: Securities and Exchange Commission ("SEC").

ACTION: Notice of application for exemption under the Investment Company Act of 1940 ("1940 Act").

Applicant: Shearson Lehman Special Income Portfolios.

Relevant 1940 Act Sections: Amended Exemptive Order requested under section 6(c) exempting Applicant from the provisions of section 22(d) and Rule 22d–1.

Summary of Application: Applicant seeks an amended exemptive order to permit it to waive a contingent deferred sales charge currently assessed pursuant to an order granted to Applicant on September 5, 1985 (Investment Company Act Release No. 14706, amended by Investment Company Act Release No. 15005, March 19, 1986, the "1985 Order").

Filing Date: The application was filed on May 12, 1987 and amended on July 22, 1987.

Hearing or Notification of Hearing: If no hearing is ordered, the application will be granted. Any interested person may request a hearing on this application, or ask to be notified if a hearing is ordered. Any requests must be received by the SEC by 5:30 p.m., on October 26, 1987. Request a hearing in writing, giving the nature of your

interest, the reason for the request, and the issues you contest. Serve the Applicant(s) with the request, either personally or by mail, and also send it to the Secretary of the SEC, along with proof of service by affidavit or, for lawyers, by certificate. Request notification of the date of a hearing by writing to the Secretary of the SEC.

ADDRESSES: Secretary, SEC, 450 5th Street NW., Washington, DC 20549. Applicant, Two World Trade Center, New York, NY 10048.

FOR FURTHER INFORMATION CONTACT: Joyce M. Pickholz, Staff Attorney (202) 272–3046, or Curtis R. Hilliard, Special Counsel (202) 272–3030 (Division of Investment Management, Office of Investment Company Regulation).

SUPPLEMENTARY INFORMATION: Following is a summary of the application; the complete application is available for a fee from either the SEC's Public Reference Branch in person or the SEC's commercial copier who can be contacted at (800) 231–3282 (in Maryland (301) 258–4300).

Applicant's Representations

1. Applicant is an open-end, diversified, management investment company that was organized as a business trust under the laws of the Commonwealth of Massachusetts on March 12, 1985. Applicant is a series company that is currently offering shares of nine portfolios (the "Portfolios"). Shares of all of the Portfolios are distributed by Shearson Lehman Brothers, Inc. ("Shearson Lehman"), and affiliates of Shearson Lehman serve as the investment advisers to the various Portfolios.

2. The 1985 Order exempted Applicant from (1) the provisions of sections 2(a)(32), 2(a)(35), 22(c) and 22(d) of the Act and Rules 22c–1 and 22d–1 under the Act to the extent necessary to permit Applicant to assess a contingent deferred sales charge (the "CDSC") on redemptions of the initial and future series of its shares and to permit Applicant under certain circumstances to waive or apply credits against the CDSC, and (2) the provisions of section 11(a) of the Act to permit Applicant to offer to exchange shares of each of Applicant's series for shares of any other of Applicant's series or shares of any series of Shearson Lehman Special Income Portfolios, on the basis of relative net asset values per share of the relevant series at the time of the exchange, subject to a $5.00 service charge on each exchange, which service charge is no longer assessed.

3. Applicant now proposes to waive the CDSC on redemptions effective by any shareholder who is a client of a Shearson Lehman Finanical Consultant and who purchased shares of Applicant with the redemption proceeds of shares of a registered investment company sponsored by the Financial Consultant's previous employer. Under Applicant's proposal, the CDSC would be waived only if (1) the shareholder's purchase of shares of a Portfolio was made within 90 days of the commencement of the Financial Consultant's employment with Shearson Lehman; (2) the purchase was made with proceeds of a redemption of shares of an investment company registered under the Act that was sponsored by the Financial Consultant's previous employer (the "Previous Fund"); (3) the Financial Consultant served as the shareholder's broker on the purchase of the shares of the Previous Fund; and (4) the shares of the Previous Fund were subject to a sales or redemption charge. To ensure that the shares of a Portfolio are purchased with the proceeds of a redemption of shares of a Previous Fund, the shareholder would be required to provide Shearson Lehman with a copy of a confirmation slip or customer statement evidencing the redemption.

4. Applicant requests that any exemption the Commission may grant cover not only the Portfolios, but also any additional series or classes of shares Applicant may offer in the future on substantially the same basis as Applicant offers the shares of the Portfolios.

5. Shearson Lehman believes that the purchase of shares of a Shearson Lehman fund by a client of a Financial Consultant with the redemption proceeds of a fund sponsored by the Financial Consultant's previous employer typically involves little or no selling effort by the Financial Consultant, and as a result, under Shearson Lehman's internal policies, the Financial Consultant receives no compensation with respect to the purchase.

Applicant's Legal Conclusions

1. Applicant submits that the waiver of the CDSC is consistent with the policies underlying section 22(d) of the Act, which prohibits an investment company registered under the Act from selling its redeemable securities other than at a current public offering price described in the company's prospectus. Applicant also believes that the waivers from the CDSC will not harm Applicant or its shareholders or unfairly discriminate among shareholders or purchasers. In light of the lack of selling effort involved, Applicant believes it appropriate to waive the CDSC on a redemption by a client of a Shearson Lehman Financial Consultant of shares of a Portfolio purchased with the redemption proceeds of a fund sponsored by the Financial Consultant's previous employer.

Applicant's Conditions

Applicant expressly agrees that the proposed transactions will conform to the following conditions.

1. Applicant will implement the waiver of the CDSC in accordance with the terms of Rule 22d–1 under the 1940 Act.

2. Applicant will comply with the provisions of proposed Rule 11a–3 under the 1940 Act if and when it is adopted by the Commission.

3. Applicant will comply with the provisions of Rule 12b–1 under the 1940 Act in its present form and as it may be revised in the future.

For the Commission, by the Division of Investment Management, under delegated authority.

Shirley E. Hollis,

Assistant Secretary.

[FR Doc. 87–23143 Filed 10–6–87; 8:45 am]

BILLING CODE 8010–01–M

SMALL BUSINESS ADMINISTRATION

[License No. 06/06–0294]

Application for a Small Business Investment Company License; Revelation Resources, Ltd.

An application for a license to operate a small business investment company under the provisions of the Small Business Investment Act of 1958, as amended (15 U.S.C. 661, *et seq.*) has been filed by Revelation Resources, Ltd., (Applicant), 2929 Allen Parkway, Suite 1705, Houston, Texas 77019, with the Small Business Administration (SBA) pursuant to 13 CFR 107.102 (1987).

The management and control of the Applicant are the officers and directors of Revelation Resources Management Corporation, Corporate General Partner, as follows:

Name and address	*Position*
Michael R. Walker, 15502 Congo Lane, Houston, Texas 77040.	President, Director and General Partner of Applicant.
Christopher J. Matthews, 3820 Lake Street, Houston, Texas 77098.	Vice President and Director.
Robert S. Oliver, 11827 Longleaf Lane, Houston, Texas 77024.	Vice President and Director.

The limited Partner, Darryl K. Anderson, 12 East Rivercrest, Houston, Texas 77042, will contribute approximately $900,000 and the Corporate General Partner will contribute $1,000 to the partnership capital. The Corporate General Partner

is 100 percent owned by Darryl K. Anderson.

The Applicant, Revelation Resources, Ltd., a Texas Limited Partnership, is expected to begin operations with $1,025,000 net partnership private capital. The Applicant will conduct its activities primarily in the State of Texas but will consider investments in businesses in other areas in the United States.

Matters involved in SBA's consideration of the application include the general business reputation and character of the proposed owner and management, and the probability of successful operations of the company under their management, including adequate profitability and financial soundness in accordance with the Small Business Investment Act of 1958, as amended, and the SBA Rules and Regulations.

Notice is further given that any person may, not later than 30 days from the date of publication of this Notice, submit written comments on the proposed Applicant. Any such communication should be addressed to the Deputy Associate Administrator for Investment, Small Business Administration, 1441 "L" Street, NW., Washington, DC 20416.

A copy of the Notice will be published in a newspaper of general circulation in the Houston, Texas area.

(Catalog of Federal Domestic Assistance Program No. 59.011, Small Business Investment Companies)

Robert G. Lineberry,

Deputy Associate Administrator for Investment.

Dated: October 2, 1987.

BILLING CODE 8025-01-M

DEPARTMENT OF TRANSPORTATION

Federal Aviation Administration

Traffic Alert and Collision Avoidance System (TCAS) Airborne Equipment, TCAS II

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Notice of availability of technical standard order (TSO) and request for comments.

SUMMARY: The proposed TSO-C119 prescribes the minimum performance standards that a traffic alert and collision avoidance system (TCAS) airborne equipment, TCAS II, must meet to be identified with the marking "TSO-C119."

DATE: Comments must identify the TSO file number and be received on or before January 15, 1988.

ADDRESS: Send all comments on the proposed technical standard order to:

Technical Analysis Branch, ASW-120, Aircraft Engineering Division, Office of Airworthiness—File No. TSO-C119, Federal Aviation Administration, 800 Independence Avenue SW., Washington, DC 20591

Or deliver comments to: Federal Aviation Administration, Room 335, 800 Independence Avenue SW., Washington, DC 20591.

FOR FURTHER INFORMATION CONTACT: Ms. Bobbie J. Smith, Technical Analysis Branch, AWS-120, Aircraft Engineering Division, Office of Airworthiness, Federal Aviation Administation, 800 Independence Avenue SW., Washington, DC 20591, Telephone (202) 267-9546.

Comments received on the proposed technical standard order may be examined, before and after the comment closing date, in Room 335, FAA Headquarters Building (FOB-10A), 800 Independence Avenue SW., Washington, DC 20591, weekdays except Federal holidays, between 8:30 a.m. and 4:30 p.m.

SUPPLEMENTARY INFORMATION:

Comments Invited

Interested persons are invited to comment on the proposed TSO listed in this notice by submitting such written data, views, or arguments as they desire to the above specified address. All communications received on or before the closing date for comments specified above will be considered by the Director of Airworthiness before issuing the final TSO.

How to Obtain Copies

A copy of the proposed TSO-C119 may be obtained by contacting the person under "For Further Information Contact." TSO-C119 references RTCA/DO-185, dated September 1983 (and MITRE Report MTR-87W00157, Reference 10), for minimum performance standards, RTCA/DO-178A for the computer software requirements, and RTCA/DO-160B for the environmental standards. RTCA/DO-185, DO-178A, and DO-160B may be purchased from the Radio Technical Commission for Aeronautics Secretariat, One McPherson Square, Suite 500, 1425 K Street NW., Washington, DC 20005. MITRE Report MTR-87W00157 may be purchased from the MITRE Corporation, 1820 Dolley Madison Boulevard, McLean, VA 20005.

Issued in Washington, DC, on September 29, 1987.

Thomas E. McSweeny,

Manager, Aircraft Engineering Division, Office of Airworthiness.

Sunshine Act Meetings

Federal Register
Vol. 52, No. 194
Wednesday, October 7, 1987

This section of the FEDERAL REGISTER contains notices of meetings published under the "Government in the Sunshine Act" (Pub. L. 94-409) 5 U.S.C. 552b(e)(3).

NATIONAL TRANSPORTATION SAFETY BOARD

TIME AND DATE: 9:30 a.m., Wednesday, October 14, 1987.

PLACE: Board Room (Room 812A), Eighth Floor, 800 Independence Avenue, SW., Washington, DC 20594.

STATUS: Open to the Public.

MATTERS TO BE CONSIDERED

1. Aircraft Accident Report: Midair Collision Involving a Sachs Electric Company Piper PA-31 and a U.S. Army Beech U-21, Lake City Army Ammunition Plant, Independence, Missouri, January 20, 1987.
2. Marine Accident Report—Grounding of the Panamanian Tankship GRAND EAGLE in the Delaware River, Marcus Hook, Pennsylvania, September 28, 1985.

FOR MORE INFORMATION CONTACT: Bea Hardesty, (202) 382-6525.

Bea Hardesty,
Federal Register Liaison Officer.
October 2, 1987.

BILLING CODE 7533-01-M

NUCLEAR REGULATORY COMMISSION

DATE: Weeks of October 5, 12, 19, and 26, 1987.

PLACE: Commissioners' Conference Room, 1717 H Street, NW., Washington, DC.

STATUS: Open and Closed.

MATTERS TO BE CONSIDERED:

Week of October 5

Friday, October 9

10:00 a.m.
Affirmative/Discussion and Vote (Public Meeting) (if needed)

Week of October 12—Tentative

Friday, October 16

10:00 a.m.
Briefing on Status of Rancho Seco (Public Meeting)
11:30 a.m.
Affirmation/Discussion and Vote (Public Meeting) (if needed)

Week of October 19—Tentative

Wednesday, October 21

10:00 a.m.
Briefing on Status of Unresolved Safety/Generic Issues (Public Meeting)
2:00 p.m.
Briefing on the Federally Funded Research Development Center (FFRDC) (Public Meeting)

Thursday, October 22

3:30 p.m.
Affirmation/Discussion and Vote (Public Meeting) (if needed)

Week of October 26—Tentative

Thursday, October 29

3:30 p.m.
Affirmation/Discussion and Vote (Public Meeting) (if needed)

Note.—Affirmation sessions are initially scheduled and announced to the public on a time-reserved basis. Supplementary notice is provided in accordance with the Sunshine Act as specific items are identified and added to the meeting agenda. If there is no specific subject listed for affirmation, this means that no item has as yet been identified as requiring any Commission vote on this date.

TO VERIFY THE STATUS OF MEETINGS CALL (RECORDING): (202) 634-1498.

CONTACT PERSON FOR MORE INFORMATION: Andrew Bates (202) 634-1410.

Andrew L. Bates,
Office of the Secretary.
October 1, 1987.

DEPARTMENT OF EDUCATION

National Institute on Disability and Rehabilitation Research; Proposed Funding Priorities for Fiscal Year 1988

AGENCY: Department of Education.

ACTION: Notice of proposed funding priorities for fiscal year 1988.

SUMMARY: The Secretary of Education proposes funding priorities for some of the research activities to be supported under the Rehabilitation Research and Training Center (RRTC) program of the National Institute on Disability and Rehabilitation Research (NIDRR) in fiscal year 1988.

On June 5, 1987, NIDRR published in the **Federal Register** (FR 21350) those areas of physical restoration in which it proposes to support RRTCs in fiscal year 1988. This second notice includes other areas, such as vocational rehabilitation, community integration for individuals with developmental disabilities, rehabilitation of special populations and elderly disabled persons, research on families with disabled members, and research to make housing more accessible, that NIDRR proposes to approach through RRTCs in fiscal year 1988.

DATE: Interested persons are invited to submit comments or suggestions regarding the proposed priorities on or before November 6, 1987.

ADDRESSES: All written comments and suggestions should be sent to Betty Jo Berland, National Institute on Disability and Rehabilitation Research, Department of Education, 400 Maryland Avenue, SW., Room 3070, Switzer Building, Mailstop 2305, Washington, DC 20202.

FOR FURTHER INFORMATION CONTACT: Betty Jo Berland, National Institute on Disability and Rehabilitation Research (Telephone: (202) 732–1139). Deaf and hearing-impaired individuals may call (202) 732–1198 for TDD services.

SUPPLEMENTARY INFORMATION: Authority for the research program of NIDRR, formerly NIHR, is contained in section 204 of the Rehabilitation Act of 1973. Under this program, awards are made to public and private agencies and organizations including institutions of higher education, Indian tribes, and tribal organizations. NIDRR can make awards for up to sixty months.

The purpose of the awards is for planning and conducting research, demonstrations, and related activities that have a direct bearing on the development of methods, procedures, and devices to assist in providing vocational and other rehabilitation services to individuals with handicaps, especially those with the most severe handicaps. NIDRR's regulations authorize the Secretary to establish research priorities by reserving funds to support particular research activities (see 34 CFR 352.32).

NIDRR supports a program of Rehabilitation Research and Training Centers to conduct programmatic, multidisciplinary, and synergistic research, training, and information dissemination in designated areas of high priority. The following proposed priorities represent areas of research in a variety of rehabilitation areas which the Secretary believes are high priorities for RRTCs for this fiscal year. The priority may be determined on the basis of the extent and severity of the problem; the need for new knowledge to advance solutions to the problem; the appropriateness of the programmatic approach to the issues at this time; the resources and capacity of the field to provide a coordinated research approach to the problem; the level of other resources available for the problem; and other factors.

NIDRR invites public comment on the merits of the proposed priorities both individually and collectively, including suggested modifications to the proposed priorities. Interested respondents also are invited to suggest the types of expertise which would be needed for independent experts to review and evaluate applications under these proposed priorities.

The final priorities will be established on the basis of public comment, the availability of funds, and any other relevant Departmental considerations. These final priorities will be announced in a notice in the **Federal Register**. A closing date notice will be published at that time, after which application packages will be available. This Notice of Proposed Priorities does not solicit applications, and Department of Education staff will not review concept papers or other types of pre-applications. The publication of these proposed priorities does not bind the Federal Government to fund projects in any of these areas. Funding of particular projects depends on final priorities, the availability of funds, and on the quality of the applications that are received.

The following twelve proposed priorities represent areas in which NIDRR proposes to support research and related activities through cooperative agreements for one or more Rehabilitation Research and Training Centers. Rehabilitation Research and Training Centers have been established to conduct coordinated and advanced programs of rehabilitation research and to provide training to rehabilitation personnel engaged in research or the provision of services. RRTCs must be operated in collaboration with institutions of higher education and must be associated with rehabilitation service programs. Each Center conducts a synergistic program of research, evaluation, and training activities focused on a particular rehabilitation problem area. Each Center is encouraged to develop practical applications for all of its research findings as well as for related findings of other studies. Centers generally disseminate and encourage the utilization of new rehabilitation knowledge through such means as writing and publishing undergraduate and graduate texts and curricula and publishing findings in professional journals. All materials that the Centers develop for dissemination and training must be appropriately accessible to individuals with a range of handicapping conditions. RRTCs also conduct programs of in-service training for rehabilitation practitioners, education at the pre-doctoral and post-doctoral levels, and continuing education. Each RRTC will conduct an interdisciplinary program of training in rehabilitation research, including training in research methodology and applied research experience, that will contribute to the number of qualified researchers working in the area of rehabilitation research. Centers will also conduct state-of-the-art studies in relevant aspects of their priority areas. Each RRTC will also provide training to individuals with disabilities and their families in managing and coping with disabilities.

NIDRR will conduct, not later than three years after the establishment of any RRTC, one or more reviews of the activities and achievements of the Center, to include review by peers. Continued funding depends at all times on satisfactory performance and accomplishment. Each Center will be expected to provide appropriate attendees for a general grants management meeting in Washington, D.C., to be arranged by NIDRR shortly after the Center grant has been awarded.

Proposed Priorities (12)

New Directions for Rehabilitation Facilities

There are approximately 5,500 rehabilitation facilities in the United States. Facilities have traditionally served as settings for vocational training and evaluation, medical rehabilitation,

and long-term employment for individuals with disabilities. State vocational rehabilitation agencies often use contracts and service agreements with facilities for the purchase of vocational rehabilitation services. The Federal Government has provided fiscal incentives for facility expansion and guidelines for the purchase of facility-based services by agencies using Federal grant monies. Rehabilitation services are rapidly shifting from providing evaluation and training in facilities toward providing these services in regular integrated job sites. State rehabilitation agencies may use vendor payments or grant arrangements to obtain transitional employment services that provide training and follow-along services in competitive job sites. Rehabilitation facilities are the most frequent suppliers of these transitional services. At the same time, facilities are also establishing programs for public schools, for post-employment and job retention services, and to train nondisabled persons.

However, many facilities face significant challenges in expanding their expertise and redirecting their services. They are particularly likely to have difficulties organizing programs and services for "new" groups such as persons with traumatic brain injuries, severe learning disabilities, and chronic mental illness in community-based settings.

A critical element of any Center to be funded in response to this priority will be the involvement of disabled individuals in the planning, implementation, and review of the Center's activities, and specifically in the process of selecting work sites and consumer-oriented performance criteria.

An absolute priority is proposed for an RRTC to:

- Develop and evaluate model transitional employment programs, or program components, that assist vocationally limited disabled individuals to acquire and maintain competitive employment;
- Identify, assess, and disseminate new models of enclave and subcontract arrangements that can provide employment for small groups of disabled persons in integrated work settings;
- Develop, based on studies of the direct placement of disabled individuals in competitive jobs, improved techniques and related services to assist disabled individuals to obtain and maintain employment;
- Develop and disseminate new models that facilities can use to provide supportive networks for disabled persons in competitive employment;
- Develop research-based training programs to train staff of rehabilitation facilities to provide services in regular employment settings;
- Develop procedures to assess the needs of disabled youth exiting public schools, to enable communities to develop responsive employment programs;
- Assist facilities that have limited data gathering and research capacities to develop appropriate data and information systems and to participate in research efforts to improve their community-based employment programs;
- Identify and evaluate new technologies such as laser discs, computers, and robotics and provide guidelines and training for the use of such innovations by community employment programs to increase their effectiveness and efficiency in assisting disabled individuals to gain and maintain employment;
- Assess the employment-related needs of special populations of disabled individuals and identify methods by which such groups may be served more effectively by community-based employment services programs;
- Organize and direct an annual study institute on a rehabilitation topic, publish the results in a resource manual, and distribute the manual to State vocational rehabilitation programs; and
- Conduct at least one research dissemination conference to communicate the results of Center projects to rehabilitation consumers and professionals.

Enhancing Employability of Individuals with Handicaps

Approximately thirteen million people between sixteen and sixty-four years of age are work-disabled. Of the disabled population not employed, (9.5 million) an estimated 8.7 million are not seeking employment. Disabled persons, particularly persons with severe disabilities, are far more likely than nondisabled persons to be out of work. Persons with disabilities who are employed tend to work fewer hours, fewer weeks in the year, and earn less than nondisabled persons. A research and training effort is needed to develop capabilities at the national, state, and local levels to enhance employment potentials for all persons with disabilities.

Research at this Center will be concerned with both the enhancement of individual employability and the enhancement of job opportunities. Services to individuals typically include skills training, employment readiness training, and job placement. Services to employers may include increasing awareness of disability, job development, technical assistance on job modifications, and other disability services. The Center will address employability problems of disabled individuals in preparing for, obtaining, maintaining, and advancing in employment. This area of research will focus on career preparation, career initiation, and career enhancement for disabled individuals. The objective of this research will be the development of techniques whereby disabled individuals can improve their work-related skills and general employability.

A second emphasis of the research and training activities will be the development of more and better employment opportunities, primarily through enhancing employer knowledge of disability, and assisting employers to locate and hire qualified disabled workers. The Center will conduct research which will improve work settings and employer practices for workers who experience the onset of disabilities while employed. The RRTC will assist rehabilitation service delivery systems to adapt to the changing employability needs of persons with disabilities, whether by restructuring services programs, retraining staff, or adopting new service techniques.

NIDRR intends to establish one or more Centers that will be national resources for research and training to assist rehabilitation facilities to establish exemplary community-based employment programs. A critical element of any Center to be supported in response to this priority will be the involvement of individuals with disabilities in the planning, conduct, and review of the research and related activities.

An absolute priority is proposed for one or more RRTCs to:

- Develop research and training models to enhance the capabilities of disabled individuals to develop rehabilitation plans, select career goals, and match personal abilities and expectations to available vocational opportunities;
- Conduct research and training to improve the use of vocational evaluations and assessments, and develop reliable and valid assessment measures that will optimize personal choice and the range of employment opportunities for disabled individuals;
- Develop strategies and techniques that will enable special and vocational education and vocational rehabilitation agencies to work together to assist both employers and disabled youth in the transition from school to work;

VOL 52 ISS 194 OCT 7 1987 UMI

• Develop technical assistance and training to enable rehabilitation agencies, business and labor associations, and consumer groups to assist employers to hire, retain, or return to work persons with disabilities;

• Investigate the efficacy of a system to facilitate contacts between disabled people seeking jobs and disabled persons who are employed in order to increase the likelihood that the former will obtain and maintain employment;

• Develop and test new approaches for consumer organizations and independent living programs to enhance employment of persons with disabilities;

• Implement and expand computer-assisted vocational rehabilitation techniques to improve the access of rehabilitation counselors to current job data and expedite employment;

• Organize and direct an annual study institute on a rehabilitation topic, publish the results, and distribute the manual to state vocational rehabilitation agencies; and

• Conduct at least one state-of-the-art study to identify current knowledge and recommend future research, and organize research and training conferences and short-term institutes to disseminate the results of Center projects to rehabilitation consumers and professionals.

Improving Supported Employment Outcomes for Developmentally and Other Severely Disabled Individuals

During the past several years, Federal legislation and various employment programs for developmentally and other severely disabled individuals have incorporated the concept of supported employment (Developmental Disabilities Act of 1984, Pub. L. 98–527, the Education of the Handicapped Act Amendments of 1986, Pub. L. 99–457, and the Rehabilitation Act Amendments of 1986, Pub. L. 99–506). Supported employment is defined as, "competitive work in integrated work settings for individuals with severe handicaps for whom competitive employment has not traditionally occurred, or for individuals for whom competitive employment has been interrupted or intermittent as a result of a severe disability, and who, because of their handicaps, need ongoing support services to perform such work." There is now substantial agreement on many of the issues involved in the administration of supported employment programs, including training needs for direct service and leadership personnel, standards for performance, and measures for the evaluation of outcomes. Preliminary indications from studies of exemplary programs illustrate that these programs can provide significant benefits for program participants at reasonable costs. Other studies have evaluated the role of specific components of supported work, such as paid work in jobs with nondisabled coworkers, behavioral techniques to teach job duties, and the involvement of parents and advocates. The rapid growth in the number and size of supported employment programs has exceeded the capacity of the resource base of trained personnel and established program operating procedures to meet the needs of those persons with more severe disabilities who require ongoing support to maintain regular employment.

Recent research efforts have examined strategies for interagency coordination to promote long-term support for persons with severe disabilities who are employed. Current activities focus on technical assistance, development of information systems, and networks to share information among supported employment programs.

The success of supported employment with developmentally and severely disabled persons has led to replications and expansions to other disability groups. Consequently, NIDRR anticipates there will be a variety of supported employment research and service activities taking place during the period of performance of this RRTC. Although the RRTC to be established under this priority will focus primarily on developmentally disabled persons, the Center will be encouraged to identify methods, techniques and models of value for other efforts in supported employment.

A critical element of any Center to be funded in response to this priority will be the involvement of disabled individuals in the planning, implementation, and review of the Center's activities, and specifically in the process of selecting work sites and consumer-oriented performance criteria. The Center will be an essential component of a national information system on supported employment. It will be expected to share reports, research findings, and program models with other programs on supported employment identified by NIDRR.

An absolute priority is proposed for an RRTC to:

• Analyze vocational assessment techniques, training methods, placement strategies, integration with nondisabled persons, followup and employer assistance, and techniques of imparting job-related social skills, in order to improve supported employment for persons with developmental and other severe disabilities;

• Identify costs and benefits of alternative supported employment models, including time-limited and long-term support programs, for various populations of disabled persons, in order to provide better estimates for planning supported employment opportunities;

• Develop new, and validate existing, approaches to enhancing productivity, wages and benefits, job security, job advancement, and career transitions to increase employment satisfaction for employees and employers in supported work settings;

• Develop and provide training to severely disabled persons, family members, counselors, and peers, to increase their awareness of supported work and to integrate supported employment with other major components of independent living, including transportation, recreation, and residing in the community;

• Analyze and organize training on regulations, employer incentives, standards, contracts, job agreements, economic development factors, and related issues to increase organizational capacities;

• Identify best practices and most effective methods including staffing requirements for large organizations to set up small supported employment units in dispersed locations;

• Conduct research on transition from school to supported employment to improve linkages among programs and to identify issues, methods, and models for both school and adult programs;

• Develop technical assistance and training to ensure that developmentally and other severely disabled youth exiting public school programs will have well-defined pathways for entry into supported employment;

• Analyze long-term funding options for supported employment for individuals who have exhausted the time-limited services provided by the vocational rehabilitation system;

• Analyze the relationship of supported employment to eligibility for income and health insurance benefits in order to inform prospective employers and disabled individuals on financial consequences of supported work;

• Conduct at least one comprehensive study of the state-of-the-art in an important area of supported employment, and serve as a national resource to disseminate information on supported employment programs;

• Provide opportunities for professional development through the temporary exchange of staff with other RRTC's, Federal, State, or local

agencies, private industry, or other relevant organizations;

• Identify and assess methods to use technology to improve supported employment; and

• Develop, evaluate, and disseminate materials to provide information, technical assistance, and motivation for supported employment programs, using various media and assuring that all materials are accessible to various persons with disabilities, and are distributed to businesses that may be interested in supported employment programs.

Improving the Management of Rehabilitation Information Systems

Access to specialized information is an essential element of all rehabilitation activities. Major strides in research and training on such severe, but low-incidence, disabilities as spina bifida, spinal cord injury, and deaf-blindness have come through the establishment of specialized information systems and data linkages among programs. Independent living and vocational and other rehabilitation programs generate and use large amounts of information. Eligibility determinations, case management requirements, organizational structures, decisions of rehabilitation professionals and clients, and client or program evaluations all require complex information systems.

In addition, broad and rapid dissemination of new knowledge requires central data depositories with access through on-line data retrieval at the point of use. The implementation and improvement of rehabilitation information systems have substantial program implications; these systems generate needs for staff competent in the use of computers, for interagency and intra-agency coordinating agreements, and for continuous review and revision of the system. Rehabilitation agencies are increasingly using information technology and various databases in all aspects of their rehabilitation programs. As a result of past research and development efforts in this area, several significant rehabilitation information bases and automated information systems are in place or under development, including Spinal Cord Injury Data Systems, Traumatic Brain Injury Systems, Independent Living Systems, the State-Federal Vocational Rehabilitation System, and the databases on the demographics of disability.

At this time, it is important to assure that current and future databases are properly integrated, maintained, and used to enhance rehabilitation practices and results. A Center working in this area must identify model linkages and other arrangements through which the operators of these information systems can cooperate on mutual program goals; develop and test methods to use specific information system components in planning, delivering, and evaluating rehabilitation services; and provide training and information exchange to improve the management of rehabilitation information systems.

A critical element of any Center to be funded in response to this priority will be the involvement of disabled individuals in the planning, implementation, and review of the Center's activities, and specifically in the process of increasing consumer access to information on rehabilitation program processes and outcomes.

An absolute priority is proposed for an RRTC to:

• Develop specific procedures and methods to enhance access to, and effective use of, disability-related information systems by rehabilitation agencies, consumers, and related organizations;

• Identify program needs, including staffing, system design, and organizational development components, and develop training programs to promote improved rehabilitation information management;

• Evaluate existing computer programs, and develop new programs where needed, to improve rehabilitation use of information systems in such areas as functional assessment, development of service plans, case management, and evaluation of rehabilitation processes and outcomes;

• Provide technical assistance to professional and consumer groups on issues related to rehabilitation information systems, with particular attention to availability of resources, avoidance of duplication of data components, methods of data analysis, and cooperation among information sources;

• Facilitate communication between research and model demonstration systems and rehabilitation service delivery agencies on issues in the management of service programs;

• Conduct conferences, presentations, short-term institutes, and other training activities to facilitate linkages among rehabilitation information systems, particularly those organized as a result of research support from NIDRR; and

• Organize at least two national state-of-the-art conferences on information management for rehabilitation research and service delivery during the period of the project.

Improving Community Integration for Persons with Mental Retardation

A basic tenet of the concept of community integration of people with mental retardation is that they live and work in non-restrictive community environments. The expressed preferences of disabled individuals and their families favor maximum community integration, living in typical residences, working in regular jobs, and using community facilities for daily living activities and recreation. Most States have closed institutions, or parts of institutions, where people with mental retardation had resided in the past, and have discharged their clients into a variety of community settings. One of the major challenges to successful deinstitutionalization is that of developing local community capacity to provide appropriate options in residences, work, education, and recreation for individuals with mental retardation. It is important to support rather than supplant families so that citizens with disabilities are not forced into institutions or other out-of-home settings. Results of previous research indicate that small-scale, normalized living arrangements are most effective in promoting successful integration into the community for most disabled populations.

Social relationships and support systems are an integral part of successful integration into community living. People with disabilities need opportunities and social skills to interact with a range of nondisabled persons in the community, including family members, neighbors, merchants and providers of community services, and other participants in job, school, or recreational settings. The involvement of parents and consumers in all aspects of the design, operation, and monitoring of community services to persons with mental retardation has increased the sensitivity of service providers.

A program of coordinated, interdisciplinary research and training is needed to develop and disseminate rehabilitation approaches that improve the social and community living skills of persons with mental retardation; enhance the available residential options; and increase the capacities of consumers, parents, and professionals to operate a program of community integration that is guided by the needs and preferences of individuals with mental retardation and their families. A critical element of any Center to be supported in response to this priority will be the involvement of disabled persons and their families in the design,

implementation, and evaluation of Center activities.

A Center in this area must serve as a national resource for information on the community integration of persons with mental retardation and maintain a database on the results of research in this area. The Center must also make a particular effort to establish linkages with other RRTC's on community integration, mental retardation, and independent living; national disability organizations; parent training projects; University Affiliated Facilities; and Developmental Disability Councils.

An absolute priority is proposed for an RRTC to:

- Identify existing housing options and document best practices to enable persons with mental retardation to reside with their families, in foster-care homes, or in other small-scale residences, and develop guidelines for effectively matching the living arrangements to the needs of the individual;
- Identify options for long-term financing of housing accommodations, recreational opportunities, health services, respite care, and other support needed by mentally retarded persons and their families, and develop and disseminate information on these options;
- Develop and evaluate new options for living arrangements, recreational activities, health services, and other community programs and services that will improve the integration of persons with mental retardation into their communities;
- Develop and evaluate strategies that will train families and service providers to help persons with mental retardation establish and maintain supportive social relationships in the community;
- Develop and evaluate strategies to train persons with mental retardation to determine their own vocational, recreational, housing, and independent living choices, and to train service providers to respond in positive ways to the choices made by persons with mental retardation; and
- Conduct at least one state-of-the-art conference on improving the community integration of persons with mental retardation in order to disseminate the research findings and to provide guidance for future research.

Access to Community Living Environments

Providing appropriate housing for severely disabled people is a major undertaking involving a complex array of individuals with various types and degrees of disability and housing needs on the one hand, and a variety of housing types and options, design challenges, financial issues, technology requirements, and statutory and administrative authorities on the other.

It is an area in which millions of dollars are spent annually, research is minimal, and useful information is difficult to find. These problems extend beyond housing alone to encompass recreational, educational, vocational, commercial, and transportation barriers that are encountered in the course of daily living.

An immediate objective is to make better use of the information that is available, including research data, models of accessible housing, and standards and guidelines that have been developed for housing construction. Over the longer term, it is important to develop better housing designs, based on field and laboratory research, and tested by disabled persons in regular use. One prerequisite to improving housing design in a permanent and comprehensive way is to make those who design, build, adapt, maintain, manage, and finance housing aware of the potential for creating more accessible environments.

A convergence of knowledge from the fields of architecture, engineering, construction, rehabilitation, independent living, and related areas is required to create appropriate housing, recreational facilities, and other environments in which disabled persons can live independently. The knowledge base must include information about modifications to existing structures and equipment, as well as design concepts that can be used to build facilities to benefit all citizens. The knowledge base must be developed from the results of research, needs assessments, and analysis of the physical capabilities of individuals with disabilities.

A Center to be funded in response to this priority must maintain liaison with the Accessibility Subcommittee of the Interagency Committee on Handicapped Research and the Architectural and Transportation Barriers Compliance Board, as well as with NIDRR-supported research projects and Centers in such areas as housing, independent living, and community integration. A critical element of any Center to be funded under this priority will be the involvement of individuals with disabilities and their families in the planning, conduct, and review of the research and related activities. The Center must form a National Advisory Committee composed of individuals with disabilities and representatives of disability-focused organizations, architects, designers, engineers, planners, builders, manufacturers, and housing providers to provide input on needs and to facilitate the evaluation and dissemination of Center products.

An absolute priority is proposed for an RRTC to:

- Analyze legal, regulatory, commercial, and financial disincentives to the development of suitable living environments for severely disabled persons and develop strategies to address those problems;
- Develop recommendations for housing adaptations appropriate for persons with hearing and vision impairments;
- Develop models of accessible environments and provide for their evaluation by disabled individuals;
- Develop, acquire, and maintain both graphic and text databases and serve as a national resource for information on standards, design criteria, plans, building products, costs, funding sources, and performance evaluations of accessible housing, providing information and referral;
- Conduct training programs to increase awareness of the concepts of accessibility and availability of adaptive environmental design for the full range of audiences concerned with accessible housing;
- Promote the concepts of accessible housing and universal adaptable design, including ideas from abroad, among schools of architecture and urban planning; and
- Conduct at least one state-of-the art study on a significant aspect of accessibility.

Improving the Community Integration of Elderly Persons with Mental Retardation and Other Developmental Disabilities

Demographers and gerontologists estimate that the population of persons over sixty-five years of age in the United States will grow from 27 million in 1983 to 67 million in 2040. In addition, they estimate that by the year 2040, twelve percent of the population will be over seventy-five years of age. The population of elderly persons with mental retardation and other developmental disabilities is of particular concern to NIDRR. There may be more than 150,000 persons over sixty years of age who have mental retardation and other developmental disabilities, and predictions are that this number will approach 600,000 within forty years.

A review of the relevant current literature reveals that services to this specific aging population, and consequently the research and training

to support such services, are very sparse. One reason for this is that neither the public nor private sectors has addressed adequately the needs of the elderly population in general or the problems of this subpopulation in particular. Although some programs have been adopted in an effort to assist elderly citizens to improve their lives, it is difficult for individuals with mental retardation and other developmental disabilities to use the generic service systems.

Only in the last twenty years has living outside of institutions, in normal community settings, been a viable option for older persons with mental retardation. Thus, any existing data about the effects of aging with mental retardation and other developmental disabilities are based on individuals residing in institutions. These data are inadequate to assess the needs of this aging subpopulation living in regular community settings. A third reason for the dearth of programs is that funds for services and research in the area of mental retardation and other developmental disabilities have been directed toward children and young people. Recent legislation pertaining to persons with these disabilities did not anticipate that improved health care, the growth of early intervention programs, improved living arrangements, and improved community-based resources would result in significantly extended lifespans for this population. There has been no organized planning to meet the current and future needs of this aging population.

Older people with and without developmental disabilities share many needs that are not now being met in their communities, and which frequently lead unnecessarily to institutionalization. Both groups require improved home care and supportive living arrangements, and often need mental health services, nutritional guidance, recreational and transportation services, legal assistance, and opportunities to socialize, as well.

A program of coordinated, interdisciplinary research and training is needed to develop and disseminate rehabilitation approaches to maintaining physical, psychological, family, and vocational functioning for aging persons who have mental retardation and other developmental disabilities. A critical element of any Center to be funded under this priority will be the involvement of individuals with developmental disabilities and their families in the planning, conduct, and review of the research and related activities.

A Center in this area must serve as a national resource for information on aging persons who have mental retardation and other developmental disabilities, and maintain information on the results of research in this area. The Center also must make particular effort to establish linkages with other Research and Training Centers focusing on community integration, mental retardation, and independent living; Centers on Aging and University Affiliated Facilities; and organizations representing disabled individuals and their families. This Center must also disseminate its research findings to a broad target audience of service providers, including health care professionals, social workers and gerontologists, attorneys and insurance carriers, rehabilitation professionals, and others.

An absolute priority is proposed for an RRTC to:

- Analyze existing services for noninstitutionalized mentally retarded and other developmentally disabled aging persons, identify those generic services that may be appropriate for this population and barriers to the use of those services, and develop strategies for more effective collaboration between Developmental Disabilities service agencies and those responsible for services to elderly persons;
- Develop and evaluate programs that will enable families and other caregivers to detect declines in behavioral and functional levels of aging persons with mental retardation and other developmental disabilities, with particular attention to persons with Down Syndrome, and to intercede to maintain maximum functional ability;
- Investigate the reactions of this population to transitional periods, such as deaths of family and friends, retirement, change in residence, and changes in physical and mental functioning, and develop effective counseling techniques matched to individual needs;
- Develop and evaluate innovative models using long-term funding streams for small-scale community living arrangements that will allow older people with mental retardation and other developmental disabilities to remain in nonrestrictive settings after their families and other primary caregivers may be unable to care for them;
- Develop and evaluate innovative strategies to provide families and other full-time caregivers with needed respite and support, in order to prevent institutionalization;
- Develop and evaluate materials to increase the awareness of individuals providing services to the general aging population about the needs of individuals with developmental disabilities;
- Conduct at least one state-of-the-art study on improving the functioning of aging persons who have developmental disabilities, to focus attention on the research findings and to provide guidance for future research.

Improving the Functioning of Families Whose Members Have Disabilities

Many of the recently acquired characteristics of American families—single parents, two working parents, geographic mobility, separation from the extended family, economic pressures, lack of leisure time, and increased stress—have particularly severe consequences for families with disabled members. Families with disabled members have the additional pressures of identifying, accessing, arranging, managing, and financing a wide range of medical, educational, rehabilitative, employment, recreation, transportation, and housing services. Families with disabled children, parents, or grandparents must also attend to the social and emotional needs of all members of the family.

Despite the magnitude of these challenges, there are many special needs families who have learned to master these complex tasks and at the same time to assist other disabled persons, raise other children, and engage in a variety of community and leisure time activities. There remain many other special needs families who have not been successful in attaining their goals of creating a balanced and rewarding family life.

The current literature, including a report from an NIDRR-sponsored conference on special needs families, indicates that one cause of inadequate family coping may be that family members, and the professionals on whom they rely, expect disability to have a negative impact on family functioning. This expectation may become a self-fulfilling prophecy which diminishes the self-esteem of the disabled person and adds unnecessary stress to the family unit. Professionals working with special needs families often approach them from a perspective of pathology, which again may undermine the ability of these families to cope constructively. The end product may be a family with low expectations, lacking a support system, unable to cope, and regarding institutionalization

of the disabled member as the only viable option.

The attitudes of society in general also affect the functioning of a family unit and the member who is disabled. Too often, society in general tends to have negative conceptions and low expectations concerning persons with disabilities. People often regard disabled persons as incapable of making decisions or as not sharing wishes, values, and goals typical of the broader society. They are often unaware of the positive contributions that disabled individuals make to their families and to society as a whole. These negative biases make it very difficult for families to find integrated schools, housing, worksites, and recreation programs, or to assist all members of the family to achieve maximum levels of functioning.

A program of coordinated, interdisciplinary research and training is needed to develop and disseminate rehabilitation strategies and information to assist families with disabled members to improve their coping skills, attitudes, and general knowledge about services. The Center must include research and training to address the needs of families whose disabled members are of various ages and have various family roles, including children disabled at birth or who incur disability later, and parents who incur disability as well as disabled persons who become parents. A critical element of any Center funded under this priority will be the involvement of individuals with disabilities and their close relatives in the planning, conduct, and review of the Center's program. These programs must be open to the involvement of diverse groups, such as single parents, members of ethnic and racial minorities, and traditionally underserved families such as those whose members have mental health impairments or are dependent on respirators.

A Center in this area must serve as a national resource for information on families whose members have disabilities and maintain a database on the results of research in this area. The Center must also make particular effort to establish linkages with other NIDRR-supported RRTCs, organizations representing disabled members and their families, independent living centers, and other agencies serving disabled people. The Center must conduct training and other activities to disseminate the results of its research to a wide range of target audiences, including disabled individuals and their families, health care professionals, educators, rehabilitation service providers, communications media, and those who provide social and community services to the general population.

An absolute priority is proposed for an RRTC to:

- Study successful family coping and develop and evaluate individualized interventions that could assist families to improve their functioning;
- Conduct research and training to enable families and their disabled members to become involved in the development, provision, and evaluation of integrated, age-appropriate, community-based services;
- Assess the impact of the attitudes of disabled individuals, the members of their families, and the general public on the functioning of the family unit;
- Evaluate the impact of the availability/unavailability of support services on family functioning, and the disincentives to raising children and maintaining adults at home;
- Develop and disseminate criteria to match disabled individuals and foster-care families, in order to promote maintenance in least restrictive environments; and
- Conduct at least two state-of-the-art studies on improving functioning in special needs families in order to focus attention on the Center's findings and to provide guidance for future research.

Rehabilitation of Economically Disadvantaged Individuals with Disabilities

While the demographic data are inadequate to make precise comparisons of the amount of disability in economically disadvantaged populations, including minorities, one general finding is that the incidence and prevalence of disability is greater in those populations. Furthermore, there is evidence that economically disadvantaged individuals are less likely than other disabled individuals to use vocational rehabilitation services. Indications are that the distribution of rehabilitation facilities and trained personnel does not meet the needs of economically disadvantaged individuals with disabilities, and there are few models of effective rehabilitation service delivery for these special populations.

Different cultures have different attitudes toward disability and different expectations for rehabilitation of persons with disabilities. There are differences in the structure and functioning of disadvantaged Asian, black, Hispanic, and white families. Support systems that often assist middle-class disabled individuals during rehabilitation may be quite different in disadvantaged communities. The willingness of the poor disabled individual to seek and accept rehabilitation differs as a function of the mores of his/her culture. Despite some efforts, the rehabilitation community has conducted insufficient research to illuminate and address effectively the rehabilitation needs of disabled economically disadvantaged individuals. There are many psychological, social, and financial barriers to the optimal rehabilitation of disadvantaged individuals. There are insufficient trained personnel working with these populations; and there is a lack of research on effective rehabilitation techniques and technology applicable to the special problems of disadvantaged disabled individuals.

NIDRR intends to initiate a program of coordinated, inter-disciplinary research and training to develop and disseminate behavioral, medical, and technological rehabilitation approaches to maximizing functional capacity of disadvantaged individuals with disabilities. This Center will serve as a national information resource on issues relating to rehabilitation of economically disadvantaged and create an accessible data base for clinicians, researchers and disabled individuals. The Center will provide, prior to the end of its period of performance, documentation of one or more rehabilitation techniques suitable for consideration for an NIDRR-sponsored consensus conference.

A critical element of any Center to be funded under this priority will be the involvement of economically disadvantaged individuals, with disabilities and their families in the planning, conduct, and review of the research and related activities. Universities and affiliated organizations with particular familiarity with problems of disabled disadvantaged and minority individuals, including historically black colleges and Universities, are encouraged to submit applications under this priority.

An absolute priority is proposed for an RRTC to:

- Conduct research on the incidence and prevalence of disabilities among economically disadvantaged populations, including minorities, to provide an information base for developing services for those populations;
- Identify the factors contributing to unemployment among disabled economically disadvantaged individuals and develop model programs to increase the rate of employment;
- Assess the availability of various technological aids and devices currently

VOL 52 ISS 194 OCT 7 1987 UMI

commercially available for the purpose of improving the access of economically disadvantaged to appropriate technology;

• Conduct research on attitudinal barriers to the rehabilitation of disadvantaged individuals in order to improve rehabilitation services available for these populations;

• Identify and develop formal and informal support systems that assist economically disadvantaged disabled individuals to obtain rehabilitation services and disseminate information on ways to develop optimal systems; and

• Conduct a state-of-the-art conference on rehabilitation techniques that are effective in addressing the special problems of economically disadvantaged individuals with disabilities.

Rehabilitation of Older Persons with Disabilities

Older persons who experienced onset of disability early in life, as well as persons who incurred their disability after they became elderly, have very specific rehabilitation problems that need to be addressed through research. At least eighty percent of individuals over sixty-five years of age have one or more identifiable chronic diseases. The most common of these include arthritis, reported in more than forty percent of older people; impaired vision or hearing (twenty to thirty percent); diabetes (ten to fifteen percent); chronic heart conditions (fifteen to twenty percent); or a diminution of mental function (five percent or more). These conditions often lead to functional losses that interfere with the ordinary activities of daily living. About one-fifth of persons over seventy years of age report that they need the help of another person for at least some part of every day; this figure rises to forty percent for persons over the age of eighty. The number of older Americans with pre-geriatric onset of disability is increasing, and their number is likely to continue to increase as the life expectancies of disabled persons rise.

There are many psychological, social and financial barriers to the optimal rehabilitation of older disabled individuals. The wide range of individual differences within categories of disabling conditions makes the development of individualized treatment a difficult challenge for professionals, disabled individuals, and society. Presently, financial assistance programs facilitate institutionalization of elderly persons with disabilities, there is a lack of well-trained personnel to work in the rehabilitation of older disabled persons, and there is a paucity of research on effective rehabilitation techniques and technology applicable to elderly disabled individuals. Older disabled individuals and their families, as well as those who provide services to them, are expressing a growing preference for the development of options for older disabled persons to participate in the full range of community activities as an alternative to segregated services or institutions. At present, there are insufficient models for rehabilitation services to promote maximum independence and community-based services for older persons with disabilities.

A special emphasis of this project will be the physical and psychosocial functioning of persons with pre-geriatric onset of physical disability, such as persons with spinal cord injury, post-polio syndrome, and cerebral palsy. It is of critical importance to determine their unique rehabilitation needs in order to formulate optimum strategies for supporting individuals with these disabilities in the community. A comparative analysis should be performed on support systems needed by aging persons with both pre- and post-geriatric onset of disability.

A program of coordinated, interdisciplinary research and training is needed to develop and disseminate behavioral, medical, and technological rehabilitation approaches to maximizing the functional capacity of elderly individuals with disabilities. The Center must have a national scope, and must involve all investigators in the development of training programs that will be provided at various sites throughout the country. A critical element of any Center to be funded under this priority will be the involvement of older individuals with disabilities and their families in the planning, conduct, and review of the research and related activities. The Center will provide, prior to the end of its period of performance, documentation of one or more rehabilitation techniques suitable for consideration for an NIDRR sponsored consensus conference.

An absolute priority is proposed for an RRTC to:

• Investigate alternative methods of financing home support and community services for disabled elderly individuals in rehabilitation programs to prevent premature placement of those individuals in domiciliary care;

• Assess the effectiveness of existing rehabilitation techniques and technology in reducing such secondary complications as pressure ulcers, incontinence, depression, and memory loss among older persons;

• Conduct research comparing older disabled individuals with a pre-geriatric onset of disability and individuals who become disabled late in life in order to develop effective rehabilitation programs for both groups;

• Identify, develop, and test models that integrate long-term care facilities for older disabled individuals into community environments to improve existing facilities and develop options for new, integrated community care facilities;

• Assess the availability and effectiveness of various commercially available technological aids and devices in improving the rehabilitation of older disabled individuals;

• Study the special rehabilitation and socio-economic problems of individuals with early onset of physical disabilities, such as spinal cord injury, post-polio syndrome and cerebral palsy.

• Determine the impact, if any, of Independent Living services in providing older severely disabled individuals with the least restrictive environment and the maximum level of independence within their community.

• Develop public education materials outlining strategies for reducing secondary complications of disability.

• Conduct research on attitudinal barriers to the rehabilitation of older disabled individuals and disseminate information to reduce those barriers;

• Identify and develop formal and informal support systems to assist older disabled individuals to obtain and use rehabilitation services and disseminate information to develop effective models; and

• Conduct one state-of-the-art study on rehabilitation and community integration techniques that are effective for older individuals who were disabled early in life and one state-of-the-art study on techniques appropriate to the needs of older persons who become disabled.

Improving Rehabilitation of American Indians

American Indians are often isolated from rehabilitation services by linguistic, attitudinal, cultural, and geographic barriers which may not be evident either to the person who is disabled or to the service provider. The American Indian population with disabilities may require specialized rehabilitation services and a unique service delivery system to meet certain needs that often differ from those of other populations.

Information presently available on the incidence and prevalence of disability among American Indians is based upon

VOL
52
ISS
194
OC
7
1987
UMI

secondary analysis of data on the general population. The representation of American Indians in any general sample is inadequate to reflect accurately the presence and distribution of specific types of disabling conditions among that subgroup. There is not sufficient data on the employment histories or patterns of service use in this population to plan appropriate rehabilitation services for American Indians. However, it is known that there is a high rate of disabling conditions among American Indians and that the distribution is different from that in the general population, and that disabled American Indians are less likely than other disabled people to receive effective rehabilitation services.

A Center to address these problems must involve American Indians with disabilities in various capacities in all facets of the development and operation of the Center, and applicants must include evidence of involvement of disabled American Indians in policymaking and administration of the RRTC. The Center also must form linkages with the various service delivery systems serving American Indians, both on and off reservations. These systems should include Federal, State, regional, tribal, local, and private agencies in order to demonstrate methods for disseminating findings and for utilizing existing resources to improve service delivery.

Such a Center must provide training to rehabilitation service providers, researchers, and managers to increase their awareness of the unique rehabilitation needs of American Indians and of innovative approaches to meet these needs. This training should involve collaborative sponsorship with other Rehabilitation Research and Training Centers, as well as with public, private, and tribal rehabilitation, health, and human services agencies.

An absolute priority is proposed for an RRTC to:

- Survey American Indian populations to determine the incidence, prevalence, and demographic distribution of disability among American Indians, estimate levels of employment and unemployment for Indians with disabilities, and identify patterns of service use;
- Analyze labor market conditions on and around Indian reservations and develop model job training programs that take into account these labor market conditions;
- Develop and evaluate culturally sensitive methods for assessing rehabilitation needs of American Indians;
- Develop methods to evaluate attitudinal barriers to service delivery as a basis for designing improved models of rehabilitation service delivery;
- Identify the rehabilitation training needs and provide training to rehabilitation service providers, researchers, managers, policymakers, and American Indians with disabilities;
- Design appropriate models for career development, job enhancement, and job retention in order to improve employment opportunities and rehabilitation outcomes;
- Develop and disseminate culturally relevant informational materials to increase use of rehabilitation services by American Indians;
- Develop strategies to ensure optimal use of available rehabilitative technology by American Indians; and
- Conduct at least one state-of-the-art study in some significant aspect for improving rehabilitation services to American Indians with disabilities.

Mental Health Rehabilitation of Individuals with Deafness

An estimated fourteen million Americans, or 66 in every 1000, have significant hearing impairment. At least two million—9 in 1000—are profoundly deaf. About half a million persons became deaf before they reached age nineteen, that is, before they had established vocations. About 200,000 persons, one of every thousand Americans, became deaf before the age of three, that is, before they developed effective language. This last group, the prelingually deaf, though a small minority, requires separate attention from those deafened after the acquisition of language. This segment of the population presents a major challenge to public and private mental health rehabilitation efforts. Few skilled professionals and service programs are available to provide timely, expert mental health rehabilitation interventions. For many, satisfactory adjustment is further complicated by the presence of additional disabilities, lower levels of educational attainment, underemployment, and reduced earnings.

Research in this area is needed to identify the characteristics of effective counseling strategies and interventions matched to the characteristics of deaf individuals; to refine the quantitative and qualitative methods for assessing psychological, social, and emotional adjustment and performance; and to develop models for effective delivery of coordinated programs of mental health rehabilitation services.

A critical element of any Center to be supported under this priority will be the involvement of individuals who are deaf in the planning, conduct, and review of all Center activities. All assessment instruments, training materials and courses, databases, and technical assistance developed by the Center must be provided in formats that are fully accessible to individuals with various types of hearing impairments. This Center will develop a national data base in this field of activity and serve as a central repository of information on mental health illness of individuals with deafness.

An absolute priority is proposed for an RRTC to:

- Investigate the causes of abnormal social, emotional, linguistic, and cognitive development of people with deafness or severe hearing impairment;
- Develop assessment techniques, rehabilitation interventions, and training approaches, including interpreter training, to benefit this population;
- Develop models for clinical interventions and service delivery to improve the availability and effectiveness of mental health rehabilitation services for individuals with deafness;
- Develop and evaluate models of technical assistance to state rehabilitation agencies to improve the development and implementation of mental health rehabilitation services for deaf individuals;
- Provide advanced training in research for professional practitioners in mental health rehabilitation of persons who are deaf and hearing impaired, with an emphasis on recruiting individuals with deafness for that training;
- Explore and develop suitable visual media, appropriately captioned, to enhance the dissemination of new knowledge in this area to appropriate audiences;
- Serve as a resource for information on mental health and deafness and maintain a database on the results of research in this area; and
- Conduct at least one state-of-the art study on a significant aspect of mental health rehabilitation of individuals with deafness.

Invitation to Comment

Interested parties are invited to submit comments and recommendations regarding these priorities. All comments submitted in response to these proposed priorities will be available for public inspection during and after the comment period in Room 3070, Mary E. Switzer Building, 330 C Street, SW., Washington, DC, between the hours of 8:30 a.m. and

4:00 p.m., Monday through Friday of each week except Federal holidays.

BILLING CODE 4001-01-M

[CFDA No. 84.133B]

Invitation of Applications for New Awards Under the National Institute on Disability and Rehabilitation Research (NIDRR) Program of Rehabilitation Research and Training Centers for Fiscal Year 1988

Purpose: Provides funding through grants or cooperative agreements to institutions of higher education or to public or private agencies or organizations, including Indian tribes or tribal organizations, in affiliation with institutions of higher education, to conduct programs that meet the specifications in the proposed priorities published in this issue of the **Federal Register**.

Deadline for transmittal of applications: December 15, 1987.

Applications available: October 9, 1987.

Available funds: $7,200,000.

Estimated range of awards: $400,000–700,000 per year.

Estimated average award: $600,000 per year.

Estimated number of awards: 12.

Project period: Up to 60 months.

Applicable regulations: (a) Education Department General Administrative Regulations, 34 CFR Parts 74, 75, 77, and 78, (b) NIDRR regulations at 34 CFR 350 and 352, and (c) when adopted in final form, the annual funding priorities for this program. A notice of Proposed Annual Funding Priorities is published in this issue of the **Federal Register**. Applicants should prepare their applications on the basis of the proposed priorities. If there are significant changes in the final priorities, applicants will be given the opportunity to amend or resubmit their applications.

For applications or information contact: National Institute on Disability and Rehabilitation Research, U.S. Department of Education, 400 Maryland Avenue, SW., Switzer Building, Room 3070, Washington, DC, 20202. Telephone: (202) 732–1207, or (202) 732–1198 for TDD service.

Program authority: 29 U.S.C. 762(b)(1).

Dated: October 2, 1987.

Madeleine Will,

Assistant Secretary for Special Education and Rehabilitative Services.

Part III

Department of the Interior

National Park Service

36 CFR Part 28

Fire Island National Seashore, New York; Federal Zoning Regulations; Proposed Rule

VOL 52 ISS 194 OCT 7 1987 UMI

DEPARTMENT OF THE INTERIOR

National Park Service

36 CFR Part 28

Fire Island National Seashore, New York; Federal Zoning Regulations

AGENCY: National Park Service, Interior.

ACTION: Proposed rule.

SUMMARY: This proposed rulemaking is a revision of the special regulations pertaining to federal zoning standards and the development of local zoning ordinances by local authorities for land within the boundaries of the Fire Island National Seashore. The revision is necessary to comply with changes in the Seashore's enabling legislation and in response to policies developed since the existing rule was issued. The regulations provide for the protection of Seashore resources through limitations on use, location, and size of structure on public and private property; emphasize the primary role of the local governments for zoning and zoning enforcement; and lay out guidelines and procedures for application and issuance of Certificates of Exemption from Federal Condemnation. They also provide the Seashore and Fire Island residents and property owners a clear set of standards and procedures for maintenance, renovation, repair, and development of property within the Seashore.

DATE: Written comments will be accepted through November 6, 1987.

ADDRESS: Comments should be addressed to: Superintendent, Fire Island National Seashore, 120 Laurel Street, Patchogue, New York 11772.

FOR FURTHER INFORMATION CONTACT: Christopher Soller, Management Assistant, Fire Island National Seashore, 120 Laurel Street, Patchogue, New York 11772, Telephone (516) 289–4810.

SUPPLEMENTARY INFORMATION:

Background

The Secretary of the Interior is directed by the Fire Island National Seashore Act (16 U.S.C. 459e) to issue regulations, which may be amended, pertaining to federal zoning standards and the development of local zoning ordinances for local authorities within the boundaries of the Seashore. Once issued, the local authorities may submit their zoning ordinances to the Secretary for review and determination of conformity with the federal standards. If the local ordinances conform to the federal standards and are approved by the Secretary, the Secretary's authority to condemn certain property within the Seashore is suspended for property in accord with the standards.

Since the issuance of the 1980 regulations, the Seashore prepared and had approved (September 1984) a Land Protection Plan. A major plan recommendation called for review of the federal standards, and revision of certain sections. In October 1984, Congress amended the Fire Island National Seashore Act, requiring the federal standards to be based on limitations or restrictions on the size, location, or use of any structures, reconciling population density and protection of the Seashore's natural resources. The Act had previously required the standards to be based on acreage, frontage, and setback requirements. In January 1985, the Secretary approved the four local authorities' ordinances finding them in conformity with the federal standards. Two of the ordinances were approved with exceptions. With approval of the ordinances, property owners whose property conformed to the standards were eligible to receive a Certificate of Suspension of Authority for Acquisition by Condemnation for which there were no guidelines or procedures.

This proposed rule has been developed in response to the policies and directions of the Land Protection Plan and the new requirements developed by Congress and outlined in the 1984 amendment to the Seashore Act; to resolve some of the conflicts between the existing rule and the local ordinances; and to provide guidelines and procedures for application and issuance of Certificates of Suspension from Condemnation. The majority of the provisions of this rulemaking have been in effect since 1980 and are being retained with editorial changes made for the purpose of clarification.

Changes in the Secretarial Standards

The Proposed Rule contains seven changes to the existing standards which concern the scale or manner of residential construction. These proposed revisions reflect the Congressional mandate to use population density as the determining factor in regulating development. The goal of these revisions is to permit the landowner greater flexibility in determining siting, configuration, interior arrangement, and design of a structure while maintaining single-family use.

1. The requirement in § 28.6(a)(1) that maximum plot occupancy not exceed 25% for principal structures and 10% for accessory structures has been revised in the new § 28.6(d) to permit 35% lot occupancy, without regard to principal or accessory structures. This will permit the landowner more freedom to determine whether to construct decks, guest houses, etc. or a larger main structure with no difference in environmental impact.

2. The maximum height limitation of 28 feet has been revised to use either the average ground elevation (as in the existing § 28.6(a)(3) or the minimum elevation established for the federal flood insurance program. Under the current regulations, when the maximum height limitation and minimum floor elevation are applied on some lots, only a single-story house may be built. This change will mean that a building of the same volume will be permitted on all similar-sized lots although the buildings can be taller in low-lying areas. While this change may result in more massive structures, it is the view of the National Park Service that this change is consistent with the Congressional goal of using population density as the guiding criterion for the zoning standards.

3. Section 28.6(a)(4) currently limits a building lot to one kitchen and two and one half bathrooms. The single kitchen or cooking facility requirement is retained in the proposed rule. (See the definition of "single-family home" in § 28.2.) No restrictions are proposed on the number of bathrooms as it is the judgment of the National Park Service that a limitation on the number of kitchens will adequately preserve single-family density without unduly interfering with a landowner's chosen lifestyle.

4. Since Congress eliminated the language calling for acreage, frontage, and setback requirements and instructed the National Park Service to utilize population density (see 16 U.S.C. 459e–2[b]), the proposed rule eliminates § 28.6(a)(5) which incorporated local acreage, frontage, and setback requirements into the Secretarial standards. However, to ensure the protection of the resources of the Seashore, the proposed rule now establishes a minimum lot size of 4,000 square feet, see § 28.6(c). If the zoning authority has established a higher minimum, then the higher standard will apply. The impact of this revision is that the federal government will not be restricting the configuration or placement of structures on lots but will ensure that development does not exceed ten units per acre.

5. Swimming polls, both in-ground and above-ground, are permitted in the proposed rule, and a swimming pool is considered to be an accessory structure counted in calculating lot occupancy, see subsection (g). The current rule only

permits above-ground pools. (See § 28.4(a)(2)(iii)).

6. In the Seashore District, the current § 28.4(c)(1)(i) does not permit any alterations to existing "improved property" (pre-1963 residences) which would increase lot coverage. This has led to the anomalous result that a homeowner can add a complete second story on a house but cannot put on a deck. Therefore, new § 28.6(e) will permit lot occupancy up to 35% on a lot of 7500 square feet or less or up to 2625 square feet for larger lots.

7. The provisions in § 28.6(a)(6) concerning signs (size, number, location, and illumination) have been dropped because signs are effectively being regulated at the local level.

"In Support of Community Living"

The proposed standards retain the language in the present rule, (see § 28.4(a)(1)(ii) and § 28.4(a)(2)(v), numbered as § 28.4(a)(1)(iii) in the proposed rule) which permits commercial and industrial uses if the Superintendent has found that the use provides "a service to the community in support of community living." This phrase has been borrowed from a local zoning ordinance in one of the communities. The National Park Service is aware of the vagueness of this standard. However, given the diversity of community character among the 17 Fire Island communities, the Service has been unable to develop a phrase, or a list of permitted and prohibited commercial uses, which could be uniformly applied, without being insensitive to the varied needs of the different communities. The Service welcomes public comment and suggestions on this issue.

Condemnation Authority

The original language in the Act provided that if a community had an approved zoning ordinance but an individual property failed to conform to the federal standards, that property was subject to condemnation and ineligible for a Certificate of Suspension of Authority for Acquisition by Condemnation. By statutory amendment in October 1984, Congress revised the language of section 3(e) of the Act and established October 11, 1984 as the date after which any property which was exempt from condemnation could lose its exemption if thereafter converted or used in a manner inconsistent with the standards.

However, Congress did not alter the status of properties which were not exempt from condemnation as of October 11, 1984; i.e., they continue, according to the law, to be subject to condemnation.

During 1984, the Service was publicly discussing certain changes in the standards which are proposed here. Since the legislative history reflects a desire to expand the number of properties which are exempt from condemnation and eligible for Certificates, the Service has decided, by administrative interpretation, to expand the language in the Act to also exempt those properties which did not conform to the federal standards as of October 11, 1984 but do conform to the standards proposed here. Again, for administrative consistency, and not because it is statutorily compelled, the Service has determined that property developed after October 11, 1984 which is consistent with these standards will not be subject to condemnation. (See § 28.8 (a) and (b) and § 28.21 (a)(4–7) and (c).

The most significant of the above changes are:

1. The reduction in minimum lot size to 4000 square feet for existing lots, which will mean that many property owners who have variances solely for insufficient lot size will now conform to the federal standards;

2. The elimination of a maximum number of bathrooms, which does not affect population density as much as the number of kitchens does;

3. The change in minimum elevation to conform to the FEMA standards; and

4. The revision of lot occupancy minimums for the Seashore District. Therefore, properties which were previously subject to condemnation solely because of deviations such as these will now be eligible for Certificates. However, properties which were subject to condemnation prior to October 11, 1984 either due to their failure to conform to local law or conform to *both* the pre-1984 federal standards and these standards, will continue to be subject to condemnation.

The substantive changes between the 1980 standards and the proposed rule represents adjustments made due to legislative amendments and agency commitments made in the Land Protection Plan and the zoning ordinance approval process. They are drafted to make the regulation of development, in terms of siting, design, aesthetics, etc., primarily a matter of local regulation. The federal interest is limited to ensuring that the Seashore's resources are managed through limitations on population. Therefore, landowners who were previously subject to condemnation for a "technical" violation of the standards, such as houses built on lots plotted prior to upzoning by the local government will be immune from condemnation. However, the Seashore will continue to vigorously enforce such prohibitions as those on multiple-family uses, excessive lot coverage, inconsistent commercial uses and dune-front development, because these uses have an impact on Seashore resources.

Public Participation

The policy of the National Park Service is, whenever practicable, to afford the public an opportunity to participate in the rulemaking process. Accordingly, interested persons may submit written comments regarding this proposed rule to the address noted at the beginning of this rulemaking.

The Fire Island National Seashore staff has worked and consulted with the Fire Island Association and other groups on Fire Island in development of these regulations.

A copy of the proposed rule and a Determination of Consistency with New York State's Coastal Zone Management Plan have been sent to New York State's Coastal Management Program Office. The consistency determination has been prepared by the Seashore and covers Coastal Zone Management including the State's Tidal Wetlands Program.

Drafting Information

The primary authors of this rulemaking are Jack Hauptman, Superintendent, and Christopher Soller, Management Assistant, both of Fire Island National Seashore.

Paperwork Reduction Act

The information collection requirements contained in sections 28.8 and 28.22 have been submitted to the Office of Management and Budget under 44 U.S.C. 3501 *et seq.* The collection of this information will not be required until approved by the Office of Management and Budget.

Compliance With Other Laws

The Department of the Interior has determined that this document is not a major rule under Executive Order 12291, and certifies that this document will not have a significant economic effect on a substantial number of small entities under the Regulatory Flexibility Act (5 U.S.C. 601 *et seq.*). This rulemaking has no economic effect since it neither removes existing restrictions nor imposes new ones.

The National Park Service has determined that this proposed rulemaking will not have a significant effect on the quality of the human environment, health, and safety because it is not expected to:

VOL 52 ISS 194 OCT 7 1987 UMI

(a) Increase public use to the extent of compromising the nature and character of the area or causing physical damage to it;

(b) Introduce noncompatible uses which might compromise the nature and characteristics of the area, or cause physical damage to it;

(c) Conflict with adjacent ownerships or land uses; or

(d) Cause a nuisance to adjacent owners or occupants.

Based on this determination, this proposed rulemaking is categorically excluded from the procedural requirements of the National Environmental Policy Act (NEPA) by Departmental regulations in 516 DM 6, (49 FR 21438). As such, neither an Environmental Assessment nor an Environmental Impact Statement has been prepared.

List of Subjects in 36 CFR Part 28

Seashores, Zoning.

In consideration of the foregoing, it is proposed to amend 36 CFR Chapter I by revising Part 28 to read as follows:

PART 28—FIRE ISLAND NATIONAL SEASHORE; ZONING STANDARDS

Subpart A—Federal Standards

Sec.

28.1 Purpose.
28.2 Definitions.
28.3 Boundaries: The Community Development District; The Dune District; The Seashore District.
28.4 Permitted and prohibited uses.
28.5 Nonconforming uses.
28.6 Federal standards.
28.7 Approval of local zoning ordinances.
28.8 Variance procedures.
28.9 Emergency action.

Subpart B—Condemnation Authority

28.20 Suspension of condemnation authority in the communities.
28.21 Condemnation authority of the Secretary.
28.22 Certificates of suspension of authority for acquisition by condemnation.
28.23 Severability.

Authority: 16 U.S.C.: 1,3,459e–2.

Subpart A—Federal Standards

§ 28.1 Purpose.

(a) The enabling legislation for Fire Island National Seashore (the Seashore) mandated the Secretary of the Interior (the Secretary) to issue regulations which provide standards for local zoning in order to protect and conserve Fire Island. The regulations in this part set forth federal standards to which local ordinances for Fire Island must conform to enable private property within the Seashore to be exempt from federal condemnation. The standards also apply to use and development of public property. From time to time these standards may be reviewed and revised. These standards are intended:

(1) To promote the protection and development of the land within the Seashore for the purposes of the Act by means of size, location, or use limitations or restrictions on commercial, residential, or other structures with the objective of controlling population density and to protect the island's natural resources;

(2) To limit development and use of land to single-family homes, to prohibit development and use of multiple family homes, and to prohibit the conversion of structures to multiple family homes;

(3) To prohibit commercial or industrial uses initiated after September 11, 1964 or the expansion of existing commercial or industrial uses on any property within the Seashore which is inconsistent with approved local ordinances or the purposes of the Act;

(4) To recognize that the zoning authorities have the primary responsibility for zoning enforcement within the Seashore;

(5) To provide that private property within the Community Development District may be retained by its owner as long as it is maintained in accordance with approved local ordinances;

(6) To provide that, within the Seashore District, private "improved property" may be retained by its owner as long as it is maintained in accordance with approved local ordinances; and

(7) To provide that, in the Dune District, private undeveloped property, if otherwise subject to condemnation, may be retained by its owner as long as it is maintained in its natural state.

(b) The Secretary may utilize any other statutory authority available to the Secretary for the conservation and development of natural resources to the extent the Secretary finds that such authority will further the purpose of the Act.

§ 28.2 Definitions.

"Accessory structure" means any development which is located on the same lot as the principal building or use and is customarily incidental and subordinate to the principal building or use. Accessory structure may include a storage shed, dock, deck, patio, swimming pool, or tennis court but does not include a garbage or bicycle rack and the single primary access walk. Accessory structure includes a guest house without cooking facilities used for overnight habitation.

"Act" means the Act of September 11, 1964, Pub. L. 88–587 (78 Stat. 928, 16 U.S.C. 459e), as amended, as further amended by Section 322 of the Act of November 10, 1978, Pub. L. 95–625 (92 Stat. 3488), and as further amended by Pub. L. 98–482 of October 17, 1984 (98 Stat. 2256).

"Building" means an enclosed structure having a roof supported by columns, walls, or cantilevers. (If a structure is separated by a party wall without openings, it is considered two separate "buildings.")

"Developed property" means any property which has been altered from its natural state by the construction or erection of materials located in, upon, or attached to something located in or upon the ground. Such alterations may include a building, deck, swimming pool, storage shed, patio, dock, tennis court, septic system or leaching field, walkway, groin, fence or sign (except dune protection fences and signs), road, retaining wall, grading, artificial fill, or other structure or material excluding live vegetation.

"Development" means any activity, action, alteration, structure or use which changes undeveloped property into developed property.

"Exception to a zoning ordinance" means any development or change in use of developed property which is not authorized by the zoning ordinance or the variance procedures of the zoning authority or, if authorized by the zoning authority, fails to conform to the approved ordinance or the standards of the Secretary.

"Guest house" means an accessory structure on the same lot as the principal building and that is used for the temporary accommodation of guests of a resident living in the principal building, and that does not contain cooking facilities.

"Improved property" is developed property defined by the Act to mean any building, the construction of which was begun prior to July 1, 1963, together with such amount of land on which said building is situated as the Secretary considers reasonably necessary to the use of said building not, however, to exceed 2 acres in the case of a residence and 10 acres in the case of a commercial use. The Secretary may exclude from such "improved property" any beach or waters, as well as land adjoining such beach or waters, which the Secretary deems necessary for public access thereto.

"Local ordinance" means a state, town, or village law applicable to the development or use of real property.

"Lot" means a parcel of land which meets the minimum acreage and frontage requirements of the zoning authority and is occupied or capable of

being legally occupied by one (1) principal building or main building, and the accessory structures or uses including such open spaces as are required by these standards, but in no case does a lot include lands below the toe of the natural foredune line.

"Non-conforming use" means any use of development that, if commenced after the effective date of these standards, fails to conform to these standards; or, if commenced prior to October 17, 1984, failed to conform to standards previously promulgated and fails to conform to these standards, whether or not the use or development was first commenced in compliance with the local ordinance.

"Single-family home" means a building which contains no more than one kitchen or cooking facility.

"Undeveloped property" means property which has not been altered from its natural state with the exception of dune protection measures such as snow fencing, beach nourishment, dune grass planting, or other approved biological or ecological sand-enhancing or stablization nethods.

"Zoning authority" means the Town of Brookhaven, the Town of Islip, the Village of Saltaire, the Village of Ocean Beach and/or any other legally incorporated village or political subdivision hereafter created and the officials authorized by local ordinance to make rulings and determinations on zoning in said towns and villages.

§ 28.3 Boundaries: The Community Development District; The Dune District; The Seashore District.

(a) *Generally.* The boundaries of the Seashore are described in the Act, as amended, and are delineated on the official boundary maps OGP–0002, dated June 1964, and amended by OGP–0004, dated May 1978. The maps are available for inspection at the Seashore headquarters. There are three districts: the Community Development District, the Seashore District, and the Dune District.

(b) *The Community Development District.* (1) The seventeen communities which comprise the Community Development District are set out below with their respective west/east boundaries:

(i) Lighthouse Shores—Kismet Park Unit:

West Boundary: 100 feet west of the west line of West Lighthouse Walk.
East Boundary: 80 feet east of the east line of Pine Street.

(ii) Seabay Beach Unit:

West Boundary: Approximately 94 feet west of the west line of Seabay Walk.
East Boundary: Approximately 94 feet east of the east line of Seabay Walk.

(iii) Saltaire:

West Boundary: 185 feet west of the west line of West Walk.
East Boundary: 85 feet east of the east line of East Walk.

(iv) Fair Harbor:

West Boundary: The east line of Broadway Walk.
East Boundary: The east line of Spruce Walk.

(v) Dunewood:

West Boundary: The east line of Spruce Walk.
East Boundary: 85 feet east of the east line of East Walk.

(vi) Lonelyville:

West Boundary: 85 feet east of the east line of East Walk.
East Boundary: 100 feet east of the east line of Raven Walk.

(vii) Atlantique:

West Boundary: 80 feet west of the west line of Sea Breeze Walk.
East Boundary: 80 feet east of the east line of East End Walk.

(viii) Robbins Rest:

West Boundary: The west line of Broadway Walk.
East Boundary: 113 feet east of the east line of Ocean Pathway.

(ix) Fire Island Summer Club—Corneille Estates:

West Boundary: 100 feet west of west line of Second Walk.
East Boundary: 100 feet east of east line of Ocean Roadway.

(x) Ocean Beach:

West Boundary: 7 feet west of the west line of Surf Road.
East Boundary: 2 feet east of the east line of Surf View Walk.

(xi) Seaview:

West Boundary: East line of Surf View Walk.
East Boundary: 200 feet east of Laurel Avenue.

(xii) Ocean bay Park:

West Boundary: 90 feet west of Superior Street.
East Boundary: 100 feet East of Cayuga Street.

(xiii) Point O'Woods:

West Boundary: 100 feet East of Cayuga Street.
East Boundary: Western boundary of Sunken Forest Preserve.

(xiv) Cherry Grove:

West Boundary: The west line of West Walk.
East Boundary: Approximately 100 feet east of the east line of Ivy Walk.

(xv) Fire Island Pines:

West Boundary: Approximately 150 feet west of the west line of Sandy Walk.
East Boundary: Approximately 120 feet east of Sail Walk.

(xvi) Water Island:

West Boundary: The west line of Charach Walk.
East Boundary: Approximately 100 feet east of the east line of East Walk.

(xvii) Davis Park:

West Boundary: 90 feet west of the west line of Eider Duck Walk.
East Boundary: 90 feet east of east line of Whalebone Walk.

(2) The northern boundary of the communities listed in paragraph (b)(1) of this section is the mean high water line on the south shore of the Great South Bay.

(3) The southern boundary of the communities listed in paragraph (b)(1) of this section is the mean high water line on the south shore of Fire Island.

(c) *The Seashore District.* The Seashore District is comprised of all portions of the lands and waters within the boundary of the Seashore which are not included in the Community Development District with the exception of the headquarters facilities at Patchogue and the William Floyd Estate at Mastic.

(d) *The Dune District.* The Dune District extends from the mean high water line to 40 feet landward of the primary natural high dune crest, as defined on Fire Island National Seashore Map #OGP–0004 and on Suffolk County Property Maps, section numbers 491–498 (Islip), 002 (Ocean Beach), 022–004 (Saltaire), and 985.70–987 (Brookhaven), as mapped in November 1976 or as subsequently amended. Map overlays of the Dune District are available for inspection in the Superintendent's Office. The Dune District overlaps portions of the Community Development District and the Seashore District.

§ 28.4 Permitted and prohibited uses.

(a) *The Community Development District*—(1) *Permitted uses:* (i) The construction, alteration, expansion, movement, and maintenance of a detached building which is used principally as a single-family home, church, school, or community facility; as an accessory structure; or as an office for a professional occupation, as defined in approved local ordinances is permitted. A professional office may be maintained only incidental to a residential use and shall be utilized by a person residing on the premises.

(ii) A commercial or industrial use in continuous and unchanged operation since September 11, 1964 is permitted. Any change is use of a commerical or

VOL

OC
7
1987
UMI

industrial use since September 11, 1964 including construction, expansion, or conversion of an existing structure or a change in type, mode or manner of operation constitutes a new commerical or industrial use.

(iii) A commercial or industrial use initiated after September 11, 1964 constitutes a new commerical or industrial use and is permitted with the approval of the zoning authority and the Superintendent. The Superintendent's approval is contingent upon his/her finding that the use provides a service to the community in support of community living and is consistent with the purposes of the Act. Any change in use of a commercial or industrial use including construction, expansion, or conversion of an existing structure, or change in type, location, mode, or manner of operation, constitutes a new commercial or industrial use and requires approval of the zoning authority and the Superintendent.

(2) *Prohibitied uses:* (i) The construction or expansion of an apartment building or other building with multiple dwelling units or conversion of an existing building into a multiple family home is prohibited.

(ii) The construction or expansion of a guest house with cooking facilities, or conversion of an existing structure to a guest house with cooking facilities is prohibited.

(iii) The subdivision of land into lots which are less than 4000 square feet, or that do not meet the requirements of the applicable approved zoning ordinance is prohibited.

(iv) The rezoning of an area zoned residential to commercial or business without approval of the Secretary is prohibited.

(b) *The Seashore District.*—(1) *Permitted uses:* (i) The alteration, expansion, movement, and maintenance of privately-held "improved property" used as a single-family home or as an accessory structure is permitted.

(ii) Any use consistent with the purposes of the Act and authorized by the Superintendent on any lands, whether publicly or privately held, which lie below mean high water in either the Atlantic Ocean or the Great South Bay is permitted.

(iii) General recreation, environmental and historic preservation and education, and natural resource protection uses and facilities consistent with the uses and facilities appropriate for each zone as set forth in the General Management Plan and Final Environmental Impact Statement are permitted on publicly-held property.

(2) *Prohibited uses:* Development or expansion of any property other than "improved property" is prohibited. The provisions of paragraph (a)(2) of this section apply to all privately-held property in the Seashore District.

(c) *The Dune District*—(1) *Permitted Uses:* (i) A community vehicular and private or community pedestrian dune crossing permitted by the zoning authority and approved by the Superintendent as necessary for access to areas behind the dune and such dune protection measures as snow fencing, poles, beach nourishment, dune grass planting, or other approved biological or ecological sand-enhancing or stabilization methods are permitted.

(ii) Residential use and maintenance of an existing structure or reconstruction in accordance with § 28.5 of this chapter is permitted.

(2) *Prohibited Uses:* (i) Any development subsequent to November 10, 1978 including construction of a new structure or expansion of an existing structure, such as a building, bulkhead, pile, septic system, revetment, deck, swimming pool, or other structure or man-made dune stabilization device (except one permitted under paragraph (c)(1) of this section) is prohibited.

(ii) Any use of the dune, other than those outlined in paragraph (c)(1)(i) of this section, including recreational use is prohibited.

(3) *Conflict with other provisions.* If a development or lot lies partially within the Dune District and partially in the Community Development District, or partially within the Dune District and partially within the Seashore District, and the standards applicable to the development, lot, or use are in conflict, the standards for the Dune District prevail for the portion of the development, lot, or use which lies within the Dune District.

§ 28.5 Nonconforming uses.

(a) Any use or structure lawfully existing under local law as of October 17, 1984 and rendered nonconforming by the Act or federal standards may continue, subject to the provisions of this section, and will not lose its exemption from condemnation, if otherwise eligible.

(b) *Change in Nonconforming Uses.* (1) No nonconforming development or use may be altered, intensified, enlarged, extended, or moved except to bring the use or structure into conformity with the regulations in Part 28 of this chapter.

(2) A nonconforming use which has been abandoned for more than one (1) year may not be resumed or replaced by another nonconforming use or structure.

(3) A nonconforming use in the Dune District may be moved to bring it into conformity with the regulations in Part 28 of this chapter.

(c) *Reconstruction of Nonconforming Uses.* If a nonconforming use or structure is severely damaged (as determined by fair professional insurance practices), destroyed or rendered a hazard, whether by fire, natural disaster, abandonment or neglect, no alteration, intensification, enlargement, reconstruction, extension, or movement is permitted without compliance with the following conditions:

(1) No use or structure within the Seashore built in violation of a local ordinance when constructed may be reconstructed except in compliance with the regulations in Part 28 of this chapter and the approved local ordinance.

(2) Local building permit applications for reconstruction shall be filed with the appropriate zoning authority within one (1) year of the damage, destruction, or abandonment.

(3) A commercial or industrial use may not be reconstructed without the approval of the zoning authority and the Superintendent.

(4) A nonconforming use in the Community Development District or on improved property in the Seashore District may be reconstructed to previous dimensions. It may not be altered, enlarged, intensified, extended, or moved except to bring the use of structure into conformity with the regulations in Part 28 of this chapter.

(5) A nonconforming use in the Dune District may be reconstructed if it can conform to the regulation in Part 28 of this chapter and lie north of the crest of the dune at the time of reconstruction.

§ 28.6 Federal standards.

No use permitted under § 28.4 of this chapter may be developed, constructed, altered, or conducted unless it complies with the following:

(a) A single-family home is the only type of development permitted in a residential district defined by a zoning authority.

(b) Commercial development is limited to commercial or business districts within the communities defined by a zoning authority and must supply a service in support of community living.

(c) Minimum lot size is 4000 square feet. A subdivision must comply with the subdivision requirements of the applicable zoning authority and may not result in development of any lot which is less than 4000 square feet.

(d) Maximum lot occupancy for all development may not exceed 35% of the lot. Lot occupancy is calculated to include any extension of the upper

floors beyond the developed area on the ground level.

(e) Lot coverage of all privately-held improved property in the Seashore District is limited to 35% of the square footage of a lot that is less than 7500 square feet, and to 2625 square feet for a lot 7500 square feet or greater. Lot coverage is calculated to include all buildings and structure on the property.

(f) No building or structure may be erected to a height in excess of 28 feet as measured from the average existing ground elevation but not less than the minimum elevation necessary to meet the prerequisites for Federal flood insurance as determined by the National Flood Insurance Program/FEMA shown on Flood Insurance Rate Maps for Fire Island communities.

(g) A swimming pool is a permitted accessory structure and is calculated in measuring lot occupancy.

(h) No sign may be self-illuminated.

(i) A zoning authority shall have in effect limitations, requirements, or restrictions on the burning of cover and trash, excavation, displacement or removal of sand or vegetation, and the dumping, storing, or piling of refuse materials, equipment or other unsightly objects which would pose safety hazards and/or detract from the natural or cultural scene. A violation of a local ordinance constitutes a use or development inconsistent with these standards.

(j) A zoning authority shall have in place ordinances to lessen the potential for flood and related erosion and property losses consistent with the Federal Insurance Administration's National Flood Insurance Program criteria for "Land Management and Use," as set forth in 24 CFR Part 1910, subpart A, as it may from time to time be amended. A violation of a local ordinance constitutes a use or development inconsistent with these standards.

§ 28.7 Approval of local zoning ordinances.

(a) The Secretary shall approve local ordinance or amendments to approved ordinances which conform to these regulations. The Secretary may not, however, approve an ordinance or amendment thereto which:

(1) Contains a provision that the Secretary considers adverse to the protection and development of the Seashore;

(2) Does not comply with the uses and federal standards set out in § 28.4, 28.5, and 28.6 of this chapter; or

(3) Fails to provide for the variance procedures of § 28.8 of this chapter.

(b) A zoning authority from time to time may amend its ordinance. At such time the Secretary may revoke the approval of any ordinance or portion of an ordinance which fails to conform to these regulations. Upon resubmission by the zoning authority of an amended ordinance, the Secretary shall approve the ordinance, if it conforms with the requirements of paragraph (a) of this section.

(c) Secretarial approval of a local ordinance will be withdrawn if the Secretary finds that a zoning authority is not enforcing its ordinance.

§ 28.8 Variance procedures.

(a) An alteration after October 17, 1984 to property developed prior to that date renders the property subject to acquisition by condemnation if a variance is required that causes the property to fail to conform to these federal standards.

(b) Property developed after October 17, 1984 shall be constructed in conformity with these federal standards and approved local zoning ordinances. A variance granted that would cause the use or development to violate these standards renders the property subject to acquisition by condemnation.

(c) The zoning authority shall send the Superintendent a copy of all applications for variances, exceptions, special permits and certified-as-completed surveys submitted to the zoning authority within five calendar days of their submission of the completed application by the applicant.

(d) The zoning authority shall send the Superintendent a copy of the written notice of the dates and times of any public hearing to be held concerning an application no less than 10 days prior to the date of the hearing.

(e) The zoning authority shall send the Superintendent a copy of the written notice within the fifteen calender days of the approval or disapproval of any application for a variance, exeception, special permit or certified-as-completed survey and copies of any variance, exception, special permit, or certificate which has been granted.

(f) The Superintendent, within 15 working days of the receipt of a copy of an application for a variance, exception, or special permit submitted by the zoning authority, shall inform the applicant and the appropriate zoning authority whether or not the proposed use or development will be subject to potential acquisition by condemnation. If the application does not conform to the standards, the Superintendent shall also inform the applicant that, should the application be granted, the Park Service may seek to enjoin the development and acquire the property by condemnation, subject to available funds.

(g) The Superintendent may also appeal the decision of the zoning authority pursuant to procedures of local law.

(h) The zoning authority shall send copies of all correspondence referred to in this section to: The Superintendent, Special Attention: Zoning, Fire Island National Seashore, 120 Laurel St., Patchogue, New York 11772.

§ 28.9 Emergency action.

If permitted by local law and if immediate action is essential to avoid or eliminate an immediate threat to the public health or safety or a serious and immediate threat to private property or natural resources, an agency or person may commence a temporary use without a permit from the zoning authority, provided that the agency or person obtains the prior approval of the Superintendent. In all cases, the agency or person shall send an application for a permit to the zoning authority and a copy to the Superintendent within 10 days after the commencement of the use and the applicant shall proceed in full compliance with the provisions of these regulations. When the reasons for undertaking the emergency action no longer exist, the agency or person shall cease an emergency action taken under this section until the provisions of these regulations have been complied with.

Subpart B—Condemnation Authority

§ 28.20 Suspension of condemnation authority in the communities.

The Secretary has the authority to acquire land by condemnation. Upon Secretarial approval of local ordinances, Secretarial authority to acquire by condemnation private property within the communities and improved property in the Seashore District that conform to the Federal Standards and the provisions of the Act is suspended.

§ 28.21 Condemnation authority of the Secretary.

(a) The Secretary has the authority to exercise powers of condemnation with respect to:

(1) Private property within the 8-mile area between the eastern boundary of Davis Park and the westerly boundary of the Smith Point County Park;

(2) Any beach or water and such adjoining land as the Secretary determines is necessary for access to the beach or water;

(3) Any property for which the Certificate of Suspension of Authority

for Acquisition by Condemnation has been revoked;

(4) Any property, if the approval of the ordinance of the zoning authority has been revoked, partially revoked, or an exception was made to the Secretarial approval and such property fails to conform to these standards, or any property where the appropriate local zoning authority does not have an ordinance approved by the Secretary;

(5) Any property built or altered after October 17, 1984 that does not conform to the regulations in Part 28 of this chapter;

(6) Any property which has been granted a variance, exception, or special use permit after October 17, 1984 that fails to conform to the regulations in Part 28 of this chapter; and

(7) Any property with respect to which the Secretary's authority to condemn was not suspended because the property failed to conform to the federal standards existing at the time of construction, modification, or commencement of a use, unless such construction, modification, or use conforms to the regulations found in Part 28 of this chapter.

(b) Undeveloped property which is otherwise subject to condemnation under the Act is not subject to condemnation if it is located in the Dune District and is maintained in its natural state.

(c) The Secretarial authority to condemn any property in the Seashore is suspended for any structure or use constructed, modified, or commenced prior to October 17, 1984 if:

(1) It was built or conducted in conformity with local zoning ordinances and procedures in effect at the time of such construction or commencement or had been issued a variance under local law;

(2) It was built or conducted in conformity to the federal standards existing at the time of such construction or commencement or to these standards; and

(3) The local zoning ordinance is approved by the Secretary without exceptions, or if approved by the Secretary with exceptions, such exceptions are not pertinent or applicable to the property.

(d) The above provisions shall not be interpreted to otherwise limit or circumscribe the authority of the Secretary to condemn property as provided by the Act, or other provisions of law.

§ 28.22 Certificates of suspension of authority for acquisition by condemnation.

Upon approval of a local zoning ordinance, a private property owner may apply to the Superintendent for a Certificate of Suspension of Authority for Acquisition by Condemnation. Procedures for obtaining a certificate are as follows:

(a) An application for a certificate shall contain:

(1) A current survey of the lot showing the dimension of all buildings, accessory structures, garbage and bicycle racks, all access walks, and any extensions of the upper floors beyond the developed area on the ground level;

(2) On the survey, the line of mean high water, the toe of the dune, and the crest of the dune shall be identified if they traverse the lot;

(3) A floor plan of each floor of each building showing the configuration of all rooms and cooking facilities;

(4) A vertical drawing of the structure showing actual ground level and building height; and

(5) Copies of the original and all subsequent building permit applications and permits, certificates of occupancy, certified-as-completed surveys, variances, special use permits, certificates of pre-existing use, or other documents relating to local authorization to develop or use the property. The burden rests on the applicant to show that the structure conformed to local law at the time of construction and at the time of each subsequent alteration and that the structure conforms to current federal standards.

(b) Upon receipt of the application, the Superintendent shall conduct a site inspection of both the interior and exterior of the property.

(c) After review of the materials submitted by the applicant and other pertinent information, and completion of the site inspection, the Superintendent shall determine whether or not the Secretary's authority to acquire by condemnation is suspended, and if so, shall furnish to any eligible party in interest a Certificate of Suspension of Authority for Acquisition by Condemnation.

(d) A Certificate of Suspension of Authority for Acquisition by Condemnation may be revoked at any time that the Secretary's authority to condemn is reinstated or that it becomes evident to the Superintendent that the Certificate was initially issued by mistake or on misinformation.

§ 28.23 Severability.

The invalidation of any provision of this Part 28 by any court of competent jurisdiction shall not invalidate any other provision hereof.

Dated: February 11, 1987.

P. Daniel Smith,

Deputy Assistant Secretary for Fish and Wildlife and Parks.

48 CFR Part 45

Federal Acquisition Regulation (FAR); Accountability for Government Property in Possession of Contractors

AGENCIES: Department of Defense (DoD), General Services Administration (GSA), and National Aeronautics and Space Administration (NASA).

ACTION: Proposed rule.

SUMMARY: The Civilian Agency Acquisition Council and the Defense Acquisition Regulatory Council are considering a change to FAR 45.505 to clarify the property records maintenance responsibilities of contractors in possession of Government property.

DATE: Comments should be submitted to the FAR Secretariat at the address shown below on or before December 7, 1987, to be considered in the formulation of a final rule.

ADDRESS: Interested parties should submit written comments to: General Services Administration, FAR Secretariat (VRS), 18th & F Streets NW., Room 4041, Washington, DC 20405.

Please cite FAR Case 87–36 in all correspondence related to this issue.

FOR FURTHER INFORMATION CONTACT: Ms. Margaret A. Willis, FAR Secretariat, Telephone (202) 523–4755.

SUPPLEMENTARY INFORMATION:

A. Background

Official Government property records must identify all Government property and provide a complete, current, auditable record of all transactions. However, the current FAR procedures do not specify how or in what format these records are to be maintained. Some contractors are unable to provide current, auditable information with respect to Government property because their systems of records maintenance for Government property are not equivalent to their systems for maintaining records of contractor-owned property. The Councils have examined the language of existing FAR coverage in light of the above noted problem and propose revisions which clarify the present FAR coverage on records and reports of Government property.

B. Regulatory Flexibility Act

The proposed rule will apply to all small businesses which are performing under Government contracts which provide for the furnishing of Government property. Approximately fifty thousand small businesses hold Government contracts. However, the number of small businesses being furnished Government property under these contracts is unknown. Nevertheless, the ultimate impact on small businesses should be minimal because it is believed that most small businesses having such contracts already comply with the proposed rule. The problem with dual property systems exists primarily with large contractors. Small businesses normally maintain only one property control system for their own and Government property. An Initial Regulatory Flexibility Analysis has been prepared and submitted to the Chief Counsel for Advocacy for the Small Business Administration.

C. Paperwork Reduction Act

The Paperwork Reduction Act (Pub. L. 96–511) does not apply because the time and financial resources necessary to comply with a collection of information would be incurred by persons in the normal course of their business activities. The proposed revision does not impose any additional recordkeeping or information collection requirements or collection of information from offerors, contractors, or members of the public which require the approval of OMB under 44 U.S.C. 3501, *et seq.*, and requires only that contractors maintain Government property records via a system that is equivalent to their system for maintaining records of their own property. The time and financial resources required to maintain property records are considered normal business activities.

List of Subjects in 48 CFR Part 45

Government procurement.

Dated: September 29, 1987.

Harry S. Rosinski,

Acting Director, Office of Federal Acquisition and Regulatory Policy.

Therefore, it is proposed that 48 CFR Part 45 be amended as set forth below:

PART 45—GOVERNMENT PROPERTY

1. The authority citation for Part 45 continues to read as follows:

Authority: 40 U.S.C. 486(c); 10 U.S.C. Chapter 137; and 42 U.S.C. 2473(c).

2. Section 45.505 is amended by revising paragraph (c) to read as follows:

§ 45.505 Records and reports of Government property.

* * * * *

(c) Official Government property records must identify all Government property and provide a complete, current, auditable record of all transactions. The contractor's system of records maintenance shall be sufficient to adequately control Government property as required by this section and, as a minimum, shall be equivalent to and maintained in the same manner as the contractor's system for maintaining records of contractor-owned property. The records shall be safeguarded from tampering or destruction. Records shall be accessible to authorized Government personnel.

FEDERAL REGISTER Published daily, Monday through Friday, (not published on Saturdays, Sundays, or on official holidays), by the Office of the Federal Register, National Archives and Records Administration, Washington, DC 20408, under the Federal Register Act (49 Stat. 500, as amended; 44 U.S.C. Ch. 15) and the regulations of the Administrative Committee of the Federal Register (1 CFR Ch. I). Distribution is made only by the Superintendent of Documents, U.S. Government Printing Office, Washington, DC 20402.

The **Federal Register** provides a uniform system for making available to the public regulations and legal notices issued by Federal agencies. These include Presidential proclamations and Executive Orders and Federal agency documents having general applicability and legal effect, documents required to be published by act of Congress and other Federal agency documents of public interest. Documents are on file for public inspection in the Office of the Federal Register the day before they are published, unless earlier filing is requested by the issuing agency.

The **Federal Register** will be furnished by mail to subscribers for $340.00 per year, or $170.00 for 6 months, payable in advance. The charge for individual copies is $1.50 for each issue, or $1.50 for each group of pages as actually bound. Remit check or money order, made payable to the Superintendent of Documents, U.S. Government Printing Office, Washington, DC 20402.

There are no restrictions on the republication of material appearing in the **Federal Register**.

Questions and requests for specific information may be directed to the telephone numbers listed under INFORMATION AND ASSISTANCE in the READER AIDS section of this issue.

Title 3—

The President

Notice of October 6, 1987

Intention To Enter Into a Trade Agreement With Canada

On October 3, 1987, under section 102(e)(1) of the Trade Act of 1974, as amended, I notified the Congress of my intention to enter into a trade agreement with the Government of Canada on January 2, 1988, contingent upon a successful completion of negotiations.

Pursuant to section 102(e)(1) of that Act, this notice shall be published in the **Federal Register**.

Rules and Regulations

Federal Register
Vol. 52, No. 195
Thursday, October 8, 1987

This section of the FEDERAL REGISTER contains regulatory documents having general applicability and legal effect, most of which are keyed to and codified in the Code of Federal Regulations, which is published under 50 titles pursuant to 44 U.S.C. 1510.
The Code of Federal Regulations is sold by the Superintendent of Documents. Prices of new books are listed in the first FEDERAL REGISTER issue of each week.

Federal Aviation Administration

14 CFR Parts 21 and 23

[Docket No. 034CE, Special Conditions No. 23-ACE-31]

Special Conditions; Fairchild Model SA227-AC Airplanes [Type Certificate No. A8SW], Incorporating Emergency Lighting

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Final special conditions.

SUMMARY: These special conditions are issued to become part of the type certification basis for the Fairchild Aircraft Corporation Model SA227–AC Airplanes incorporating an emergency lighting system as an aid for emergency evacuation. The applicable requirements for these airplanes do not contain adequate or appropriate safety standards for these systems. These special conditions contain the additional airworthiness standards which the Administrator finds necessary to establish a level of safety equivalent to the airworthiness standards applicable to these airplanes.

EFFECTIVE DATE: November 9, 1987.

FOR FURTHER INFORMATION CONTACT: Ervin Dvorak, Aerospace Engineer, Standards Office (ACE–110), Aircraft Certification Division, Central Region, Federal Aviation Administration, Room 1656, 601 East 12th Street, Federal Office Building, Kansas City, Missouri 64106; telephone (816) 374–5688.

SUPPLEMENTARY INFORMATION:

Background

On August 6, 1986, Fairchild Aircraft Corporation, Post Office Box 32486, San Antonio, Texas 78284, made application to the FAA for approval of type design changes necessary to incorporate an emergency lighting system on the Fairchild Aircraft Corporation Model SA227 Series Airplane.

Fairchild Aircraft Corporation has certified a 19-place airplane which complies with SFAR 41 and incorporates three window exits and a main cabin door for egress from the airplane. Their proposal is to change the interior configuration such that one window emergency exit is eliminated, to decrease the passenger capacity from 19 to 10–12, and to install an emergency lighting system for use during emergency evacuation. Since the airplane type certification basis includes SFAR–41, an emergency evacuation demonstration is required, but an emergency lighting system is not required.

Past emergency evacuation demonstrations on these airplanes have shown that the most critical aspect of the evacuation is for the passengers to find the location of emergency exits. The passenger cabin length is approximately 25 feet with the entrance door at one end of the cabin and the window exits about in the middle of the cabin.

Since the installation of emergency lighting systems was not envisioned when the applicable requirements for the subject airplanes were promulgated, special conditions are being issued. Special conditions may be issued and amended, as necessary, as a part of the type certification basis if the Administrator finds that the airworthiness standards designated in accordance with § 21.101(b)(2) do not contain adequate or appropriate safety standards because of the novel and unusual design features of the airplane. Special conditions, as appropriate, are issued in accordance with § 11.49 after public notice, as required by §§ 11.28 and 11.29(b), effective October 14, 1980, and will become part of the type certification basis, as provided by § 21.101(b)(2).

For the affected airplane, an emergency evacuation demonstration is required by the applicable regulations, but it does not contain a requirement or design criteria for emergency lighting systems to aid in emergency evacuation. If Fairchild Aircraft Corporation chooses to install and to use emergency lighting system in the Model SA227 Series Airplane to aid the required emergency evacuation demonstration, these appropriate standards must be adopted to assure that the lighting used to qualify the airplane design during certification testing is available in survivable crashes and that future changes to the airplane design do not adversely affect the emergency lighting system.

Because the emergency lighting is not required, when an applicant chooses to provide such lighting, the FAA must evaluate such lighting relative to its intended function. If that intended function would affect the showing of compliance with an existing requirement, the FAA must assure that the additional system performs its intended function when the critical event occurs, in this case, an actual emergency evacuation. The FAA concluded that specific criteria is necessary.

Type Certification Basis

The type certification basis for the Fairchild Aircraft Corporation Model SA227–AC Airplane is as follows: Part 23 of the Federal Aviation Regulations, effective February 1, 1965, as amended by Amendments 23–1 through 23–6; § 23.175(d) as amended by Amendment 23–14, effective December 20, 1973; special conditions outlined in FAA letters dated November 19, 1965, August 19, 1967, February 5, 1968, and April 4, 1968; SFAR 23; Amendment C of SFAR No. 41, including paragraph 4(c) and the compartment interior requirements of § 25.853 (a), (b), (b–1), (b–2), and (b–3) effective September 26, 1978; Part 36, Appendix F, effective December 1, 1969, as amended by Amendments 36–1 through 36–6; special conditions number 23–ACE–15, effective October 1, 1986, and these special conditions.

Discussion of Comments

There were two sets of comments received by FAA in response to Notice No. 23–ACE–31, which were published in the **Federal Register** on March 30, 1987 [52 FR 10111]. The comment period closed April 30, 1987. Comments were received from Fairchild Aircraft Corporation and the Aerospatiale Helicopter Corporation.

The first comments being discussed are those comments that did not address specific proposed special conditions, but were of a general nature. Comments discussed later are those comments directed toward specific proposed special conditions.

One of the commenters stated that instead of issuing special conditions for

VOL 52 ISS 195 OC 8 1987 UMI

the emergency lighting systems, an applicant should be able to elect the appropriate section(s) of Part 25 for compliance which would become part of the type certification basis for an airplane even if it was certified under Part 23. The requirements for designating applicable regulations are in Part 21. As established under the provisions of § 21.101 an applicant must comply with either the regulations incorporated by reference in the type certificate or with the applicable regulations in effect on the date of the application, plus any other amendments. If the regulations incorporated by reference in the type certificate do not provide adequate standards with respect to the proposed change, the applicant must comply with the applicable provisions of this subchapter and any special conditions, and amendments to those special conditions, which the Administrator finds necessary to provide a level of safety equal to that established by the regulations incorporated by reference in the type certification basis.

The words "the applicable provisions of this subchapter" in § 21.101 came from the recodifications of the predecessor Civil Air Regulations (CAR) wording which was "with the provisions of this *Part*." To consolidate the procedural requirements into one Part (Part 21) during the recodification from separate Parts of the CARs, the wording was changed to "applicable provisions of this subchapter", which intends to mean the applicable Part. The applicability section in each Part prescribes the airworthiness standards for the issue of type certificates, and changes to those certificates, for a specified category of airplane; i.e., normal, utility, commuter, transport, etc. For an affected product category, the prescribed airworthiness standards are the regulations in the same Part and not in another Part for a different product category. For this case, special conditions are appropriate for the type certification basis since the airplane has novel or unusual design features not envisaged in the applicable airworthiness standards and the applicable standards do not contain adequate or appropriate airworthiness standards.

One commenter requested that these special conditions be applicable to the Fairchild Model SA227–CC Airplanes and subsequent similar models added to the same type certificate. The Model SA227–CC series is planned to be approved under the recent new airworthiness standards for commuter category airplanes in Part 23. Certification basis for the commuter category will be different from that identified herein; therefore, separate special conditions will be necessary for the Model SA227–CC series.

One commenter questioned listing a specific special condition as part of an airplane model's certification basis when the special condition was not issued in response to an application by the airplane manufacturer, but was instead issued in response to an application by an airplane modifier. The special condition of concern was issued to become part of the type certification basis for the Fairchild Model SA227 Series Airplanes in response to an application by King Radio Corporation to install an Electronic Flight Instrument System (EFIS). Although the STC issued to King Radio is proprietary, the criteria for certification is not proprietary, and therefore the FAA issued the special conditions for any EFIS installed in any affected airplane by any applicant. This is consistent with the practice of special conditions issued in response to applications from airplane manufacturers being applicable to all modifications of the affected airplane, regardless of who modifies the airplane.

The type certification basis for each affected product is included when special conditions are proposed or issued in the **Federal Register** for public information. The type certification basis identifies not only the applicable regulations, but also includes special conditions, all exemptions pursuant to Part 11, together with "equivalent safety findings" made in accordance with § 21.21(b)(1). Regardless of this inclusion of the certification basis in the preamble to special conditions, the controlling document for a product's type certification basis remains the product's type certificate data sheet.

One commenter suggested that the emergency lights be automatically activated upon interruption of the airplane's normal electric power rather than the loss of engine-driven electrical generator power, as proposed. The justification given was that in case of a failure in-flight of the engine-driven electrical generator, the emergency power source could be depleted during flight. The proposal contained a requirement that the emergency lights would be automatically activated in a survivable crash in case the cockpit crew may be disabled and unable to turn on the emergency lights. The FAA agrees with this comment that the system should be configured to reduce the possibilities of the emergency lights draining the emergency battery during flight. Therefore, paragraph (c)(1) is revised to require automatic activation to occur upon interruption of the airplane's normal electric power and paragraph (c) is revised so the emergency lights are armed or turned on during taxiing, takeoff, and landing.

One commenter stated that proposed paragraph 1.(g) should be deleted because an airplane of this size would not break up in a survivable crash, especially for the Fairchild Model SA227 Series Airplanes. Regardless of the commenter's contention, the FAA considers an accident severe enough to cause a single transverse vertical separation of a fuselage to be survivable. After a survivable crash, it is not desirable to have the entire emergency lighting system inoperative.

Conclusion

This action affects only the Fairchild Model SA227–AC Airplanes incorporating emergency lighting system as an aid for emergency evacuation. It is not a rule of general applicability and applies only to the series and model of airplane identified in these special conditions.

List of Subjects in 14 CFR Parts 21 and 23

Aviation safety, Aircraft, Air transportation, Safety.

The authority citation for these Special Conditions is as follows:

Authority: Secs. 313(a), 601, and 603 of the Federal Aviation Act of 1958; as amended (49 U.S.C. 1354(a), 1421, and 1423); 49 U.S.C. 106(g) (Revised Pub. L. 97–449, January 12, 1983); 14 CFR 21.16 and 21.101; and 14 CFR 11.28 and 11.29(b).

Adoption of Special Conditions

In consideration of the foregoing, the following special conditions are issued as a part of the type certification basis for the Fairchild Aircraft Corporation Model SA227–AC Airplanes when equipped with an emergency lighting system intended for use during emergency evacuation of the affected airplanes.

PARTS 21 AND 23—[AMENDED]

Emergency Lighting

1. If an emergency lighting system is installed and used as an aid in showing compliance with any applicable regulatory requirement, including emergency evacuation demonstrations, the following special conditions apply:

(a) The source of illumination may be common to both the emergency and the main lighting systems if the power supply to the emergency lighting system

is independent of the power supply to the main lighting system.

(b) There must be a caution light which illuminates in the cockpit when power is on in the airplane and the emergency lighting control device is not armed.

(c) The emergency lights must be operable manually from the flightcrew station and be provided with automatic activation. The cockpit control device must have an "on", "off", and "armed" position so that, when armed in the cockpit, the lights will operate by automatic activation. The emergency light must be armed or turned on during taxiing, takeoff, and landing. For automatic activation of the system, the sensor must—

(1) Activate when airplane's normal electrical power is lost, or

(2) Activate when subjected to a force of 5.0, +2, −0 g. and greater for a duration of 11, +5, −0 milliseconds and greater in the direction of the longitudinal axis of the airplane; must not be activated under conditions less severe; and, after activation, must remain activated when subsequently subjected to shock forces in any direction of up to 50 g and having durations up to 11, +5, −0 milliseconds; or

(3) Activate when subjected to alternate crash forces approved by the FAA; and

(4) Regardless of sensor type, must be capable of being reset by the flightcrew if activated by any occurrence other than a survivable crash.

(d) The energy supply to each emergency lighting unit must provide the required level of illumination for at least 10 minutes at the critical ambient condition after emergency landing.

(e) If rechargeable batteries are used as the energy supply for the emergency lighting system, the charging circuit must be designed to preclude inadvertent battery discharge into charging circuit faults. If the emergency lighting system does not include a charging circuit, then battery condition monitors are required.

(f) Components of the emergency lighting system, including batteries, wiring relays, lamps, and switches must be capable of normal operation after having been subjected to the inertia forces listed in § 23.561(b).

(g) The emergency lighting system must be designed so that a single probable failure, or probable system damage following a survivable crash, will not render the entire emergency lighting system inoperative. Single transverse vertical separation of the fuselage is considered a probable event during a survivable crash. The minimum emergency illumination, after a single probable failure, must be specified by the applicant and during an emergency evacuation demonstration, the maximum emergency illumination must be equal to or less than the specified level.

Issued in Kansas City, Missouri, on September 14, 1987.

Jerold M. Chavkin,

Acting Director, Central Region.

FEDERAL TRADE COMMISSION

16 CFR Part 13

[Docket No. C-3218]

Alleghany Corp.; Prohibited Trade Practices, and Affirmative Corrective Actions

AGENCY: Federal Trade Commission.

ACTION: Consent order.

SUMMARY: In settlement of alleged violations of federal law prohibiting unfair acts and practices and unfair methods of competition, this consent order allows, among other things, a New York City title insurance company to acquire Safeco Title Insurance Co. by requiring respondent to divest two title plants to alleviate concerns that the acquisition could reduce competition in the production and sale of title information in Cook County, Ill. and Los Angeles County, Calif. Respondent is also required to continue to honor all Chicago Title and Trust Company and Safeco plant access contracts that expire pending divestiture.

DATE: Complaint and Order issued September 9, 1987.[1]

FOR FURTHER INFORMATION CONTACT: FTC/A-2308, Michael E. Aptalics, Washington, DC 20580. (202) 326-2682.

SUPPLEMENTARY INFORMATION: On Tuesday, February 3, 1987, there was published in the **Federal Register**, 52 FR 3252, a proposed consent agreement with analysis In the Matter of Alleghany Corporation, for the purpose of soliciting public comment. Interested parties were given sixty (60) days in which to submit comments, suggestions or objections regarding the proposed form of order.

Comments were filed and considered by the Commission. The Commission has ordered the issuance of the complaint in the form contemplated by the modified agreement, made its jurisdictional findings and entered its order to divest in disposition of this proceeding.

The prohibited trade practices and/or corrective actions, as codified under 16 CFR Part 13, are as follows: Subpart—Acquiring Corporate Stock Or Assets: Section 13.5 Acquiring corporate stock or assets; S.13.5-20 Federal Trade Commission Act. Subpart—Combining Or Conspiring: S.13.470 To Restrain and monopolize trade. Subpart—Corrective Actions And/Or Requirements: S.13.533 Corrective actions and/or requirements; S.13.533-50 Maintain means of communication.

16 CFR Part 13

[Docket No. C-3217]

Puritan-Bennett Aero Systems Co.; Prohibited Trade Practices, and Affirmative Corrective Actions

AGENCY: Federal Trade Commission.

ACTION: Consent order.

SUMMARY: In settlement of alleged violations of federal law prohibiting unfair acts and practices and unfair methods of competition, this consent order prohibits, among other things, an El Segundo, California seller of fire and smoke protection masks from making deceptive advertising claims that any emergency escape mask or hood can absorb, remove or filter out any hazardous gas association with fire, or that any mask or hood can protect users from any fire hazards, unless the claim is substantiated and supported by a scientific test. Respondent is required to retain for three years all test reports or materials it uses as substantiation for claims and is also required to make specified disclosures on its packaging and in advertisements.

DELAWARE RIVER BASIN COMMISSION

18 CFR Part 401

Amendments to the Administrative Manual—Rules of Practice and Procedure

AGENCY: Delaware River Basin Commission.

ACTION: Final Rule.

SUMMARY: At its September 22, 1987 business meeting the Delaware River Basin Commission amended its Administrative Manual, *Rules of Practice and Procedure*, in relation to penalties and settlements in lieu of penalties. The amendment addresses notice to possible violators, records for decision-making, adjudicatory hearings, factors to be applied in assessing the amounts of penalties, enforcement, settlement by agreement in lieu of penalty and penalty suspension or modification.

EFFECTIVE DATE: September 22, 1987.

ADDRESS: Copies of the Commission's Administrative Manual, *Rules of Practice and Procedure*, are available from the Delaware River Basin Commission, P.O. Box 7360, West Trenton, New Jersey 08628.

FOR FURTHER INFORMATION CONTACT: Susan M. Weisman, Commission Secretary, Delaware River Basin Commission: Telephone (609) 883–9500.

SUPPLEMENTARY INFORMATION: The Commission held a public hearing on these amendments on August 5, 1987 as noticed in the June 30, 1987 and July 29, 1987 issues of the **Federal Register** (52 FR 24307 and 52 FR 28327). Based upon testimony received and further deliberation, the Commission has amended its Administrative Manual, *Rules of Practice and Procedure*.

List of Subjects in 18 CFR Part 401

Administrative practice and procedure, Environmental impact statements, Freedom of information, Water pollution control, Water resources.

The Commission's Administrative Manual, 18 CFR Subchapter A, Part 401, *Rules of Practice and Procedure* is amended as follows:

PART 401—[AMENDED]

1. The authority citation for Part 401 is revised to read as follows:

Authority: Delaware River Basin Compact (75 Stat. 688).

Subpart H (§§ 401.111—401.114) [Redesignated as Subpart I (§§ 401.121—401.124)]

2. Subpart H, consisting of §§ 401.111—401.114 is redesignated as Subpart I, §§ 401.121—401.124.

Subpart G (§§ 401.91—401.109) [Redesignated as Subpart H (§§ 401.101—401.119)]

3. Subpart G, consisting of §§ 401.91—401.109, is redesignated as Subpart H, §§ 401.101—401.119.

4. New Subpart G is added to read as follows:

Subpart G—Penalties and Settlements in Lieu of Penalties

Sec.
401.91 Scope of subpart.
401.92 Notice to possible violators.
401.93 The record for decision-making.
401.94 Adjudicatory hearings.
401.95 Assessment of a penalty.
401.96 Factors to be applied in fixing penalty amount.
401.97 Enforcement of penalties.
401.98 Settlement by agreement in lieu of penalty.
401.99 Suspension or modification of penalty.

Subpart G—Penalties and Settlements in Lieu of Penalties

§ 401.91 Scope of subpart.

This subpart shall be applicable where the Commission shall have information indicating that a person has violated or attempted to violate any provision of the Commission's Compact or any of its rules, regulations or orders (hereafter referred to as possible violator). For the purposes of this Subpart, person shall include person, partnership, corporation, business association, governmental agency or authority.

§ 401.92 Notice to possible violators.

Upon direction of the Commission the Executive Director shall, and in all other instances, the Executive Director may require a possible violator to show cause before the Commission why a penalty should not be assessed in accordance with the provisions of these Rules and Section 14.17 of the Compact. The notice to the possible violator shall:

(a) Set forth the date on which the possible violator shall respond; and

(b) Set forth any information to be submitted or produced by the possible violator.

§ 401.93 The record for decision-making.

(a) *Written submission.* In addition to the information required by the Commission, any possible violator shall

be entitled to submit in writing any other information that it desires to make available to the Commission before it shall act. The Executive Director may require documents to be certified or otherwise authenticated and statements to be verified. The Commission may also receive written submissions from any other persons as to whether a violation has occurred and the adverse consequences resulting from a violation of the Commission's Compact or its rules, regulations and orders.

(b) *Presentation to the Commission.* At the date set in the Notice, the possible violator shall have the opportunity to supplement its written presentation before the Commission by any oral statement it wishes to present and shall be prepared to respond to any questions from the Commission or its staff or to the statements submitted by persons affected by the possible violation.

§ 401.94 Adjudicatory hearings.

(a) An adjudicatory hearing, which may be in lieu of or in addition to proceedings pursuant to § 401.93 at which testimony may be presented and documents received shall not be scheduled unless:

(1) The Executive Director determines that a hearing is required to have an adequate record for the Commission; or

(2) The Commission directs that such a hearing be held.

(b) If an adjudicatory hearing is scheduled, the possible violator shall be given at least 14 days written notice of the hearing date unless waived by consent. Notice of such a hearing may be given to the general public and the press in the manner provided in Section 14.4(b) of the Compact but may be waived by the Executive Director.

(c) Except to the extent inconsistent with the provisions of this Subpart adjudicatory hearings shall be conducted in accordance with the provisions of §§ 491.83 through 401.88 (including § 401.86 *et seq.*).

§ 401.95 Assessment of a penalty.

The Executive Director may recommend to the Commission the amount of the penalty to be imposed. Such a recommendation shall be in writing and shall set forth the basis for the penalty amount proposed. Based upon the record submitted to the Commission, the Commission shall decide whether a violation has occurred that justifies the imposition of a penalty pursuant to § 14.17 of the Compact. If it is found that such a violation has occurred, the Commission shall determine the amount of the penalty to be paid.

§ 401.96 Factors to be applied in fixing penalty amount.

(a) Consideration shall be given to the following factors in deciding the amount of any penalty or any settlement in lieu of penalty:

(1) Previous violation, if any, of the Commission's Compact and regulations;

(2) Whether the violation was unintentional or willful and deliberate;

(3) Whether the violation caused adverse environmental consequences and the extent of any harm;

(4) The costs incurred by the Commission or any signatory party relating to the failure to comply with the Commission's Compact and regulations;

(5) The extent to which the violator has cooperated with the Commission in correcting the violation and remediating any adverse consequences or harm that resulted therefrom; and

(6) Whether the failure to comply with the Commission's Compact and regulations was economically beneficial to the violator.

(b) The Commission retains the right to waive any penalty or reduce the amount of the penalty should it determine that, after consideration of the factors in paragraph (a) of this section, extenuating circumstances justify such action.

§ 401.97 Enforcement of penalties.

Any penalty imposed by the Commission shall be paid within 30 days or such further time period as shall be fixed by the Commission. The Executive Director and Commission counsel are authorized to take such action as may be necessary to assure enforcement of this Subpart. If a proceeding before a court becomes necessary, the action of the Commission in determining a penalty amount shall constitute the penalty amount recommended by the Commission to be fixed by the court pursuant to § 14.17 of the Compact.

§ 401.98 Settlement by agreement in lieu of penalty.

A possible violator may request settlement of a penalty proceeding by agreement. If the Executive Director determines that settlement by agreement in lieu of a penalty is in the best interest of the Commission, he may submit to the Commission a proposed settlement agreement in lieu of a penalty. No settlement will be considered by the Commission unless the possible violator has indicated to the Commission acceptance of the terms of the agreement and the intention to comply with all requirements of the settlement agreement including payment of any settlement amount within the time period provided. If the Commission determines not to approve a settlement agreement, the Commission may proceed with a penalty action in accordance with this Subpart.

§ 401.99 Suspension or modification of penalty.

The Commission may postpone the imposition of a penalty or provide for reconsideration of the penalty amount imposed pending correction of the condition that gave rise to the violation or pending a satisfactory resolution of any adverse consequences that resulted from the violation.

(Delaware River Basin Compact, 75 Stat. 688)

Susan M. Weisman,

Secretary, September 28, 1987.

BILLING CODE 6360-01-M

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Social Security Administration

20 CFR Parts 404 and 416

Application of Dependency Test to Adopted Great-Grandchildren and Demonstration Projects Under the Disability Insurance and Supplemental Security Income Programs

AGENCY: Social Security Administration, HHS.

ACTION: Final rules.

SUMMARY: The Social Security Administration (SSA) is amending its regulations to implement sections 12101 and 12104 of Pub. L. 99–272 (the Consolidated Omnibus Budget Reconciliation Act of 1985). Section 12101 of Pub. L. 99–272 extends the Secretary's waiver authority on demonstration projects in the title II disability insurance program which was originally provided for by section 505(a)(3) of the Social Security Disability Amendments of 1980 (Pub. L. 96–265). Section 12101 also effectively makes the waiver authority for title XVI demonstration projects permanent. Section 12104 of Pub. L. 99–272 amends section 202(d)(8)(D)(ii)(III) of the Social Security Act (the Act) to provide that great-grandchildren of a Social Security beneficiary or his or her spouse may be entitled to child's insurance benefits as grandchildren currently are, applying the dependency test for legally adopted children.

DATES: These regulations are effective October 8, 1987. The statutory change regarding great-grandchildren which

VOL
52
ISS
195
OC
8
1987
UMI

these regulations reflect is effective with respect to benefits for which applications for child's insurance benefits are filed April 8, 1986 or later. We will consider any comments concerning these rules that we receive on or before December 7, 1987 and will revise such rules if public comments warrant.

ADDRESSES: Send your written comments to the Commissioner of Social Security, Department of Health and Human Services, P.O. Box 1585, Baltimore, Maryland 21203, or deliver them to the Office of Regulations, Social Security Administration, 3–B–4 Operations Building, 6401 Security Boulevard, Baltimore, Maryland 21235 between 8:00 a.m. and 4:30 p.m. on regular business days. Comments received may be inspected during these same hours by making arrangements with the contact person shown below.

FOR FURTHER INFORMATION CONTACT: Henry D. Lerner, Legal Assistant, Office of Regulations, Social Security Administration, 6401 Security Boulevard, Baltimore, Maryland 21235, telephone (301) 594–7463.

SUPPLEMENTARY INFORMATION: We published final regulations covering the rules on demonstration projects in the disability insurance and Supplemental Security Income (SSI) programs on February 23, 1983 (48 FR 7573). The rules implemented section 505 of the Social Security Disability Amendments of 1980 (Pub. L. 96–265). Section 505 directed the Secretary of Health and Human Services to develop and carry out experiments and demonstration projects to test the advantages of various ways to facilitate and encourage the return to employment of individuals who would otherwise remain dependent on disability benefits. A key element in conducting these demonstration projects is the authority for the Secretary to waive requirements of the Act related to the subject matter of the projects. A provision of the 1980 amendments calling for a final report within 5 years of the enactment of that statute (no later than June 9, 1985) was interpreted as terminating the Secretary's authority to initiate projects for which such waivers could be made. Without this waiver authority the Secretary was unable to carry out demonstration projects that had not been implemented when the authority expired.

Section 12101 of Pub. L. 99–272 amends section 505(a)(3) of Pub. L. 96–265 by extending the Secretary's waiver authority for 5 years. The deadline for a final report on the disability insurance projects is extended to June 9, 1990. This requirement is made applicable only to the disability program under title II of the Act (section 505(a) of Pub. L. 96–265). Section 12101 effectively grants a permanent extension of the authority to waive the SSI program rules under title XVI which had been provided by section 505(b) of Pub. L. 96–265.

Section 12104 of Pub. L. 99–272 amends section 202(d)(8)(D)(ii)(III) of the Act to provide that great-grandchildren of a Social Security beneficiary or the beneficiary's spouse may be entitled to child's insurance benefits, as grandchildren currently are, applying the dependency test for legally adopted children. Effective for applications filed on April 8, 1986, or later, a great-grandchild may be entitled to benefits if the child is adopted by and lives with the great-grandparent in the United States for at least 1 year before applying for benefits and received at least one-half of his or her support from the beneficiary for at least 1 year; if the child is born within this 1-year period the child must have lived with the beneficiary and received at least one-half of his or her support from the beneficiary for substantially all of the period that begins on the date of the child's birth.

Justification for Final Rules

The Department, even when not required by statute, as a matter of policy, generally follows the Administrative Procedure Act (APA) Notice of Proposed Rulemaking and public comment procedures specified in 5 U.S.C. 553 in the development of its regulations. The APA provides exceptions to its notice and public comment procedures when an agency finds there is good cause for dispensing with such procedures on the basis that they are impracticable, unnecessary, or contrary to the public interest. We have determined that under 5 U.S.C. 553(b)(B), good cause exists for waiver of Notice of Proposed Rulemaking and public comment procedures on this regulation since opportunity for public comment is unnecessary in this case because the statutory provisions upon which the regulations are based simply extend the Secretary's waiver authority on demonstration projects and entitlement to child's insurance benefits to certain great-grandchildren of Social Security beneficiaries. The title II and XVI provisions on demonstration projects and the title II great-grandchildren provisions reflect the statute, are technical in nature and do not provide additional implementing rules. Therefore, these rules will become effective on the date they are published in the **Federal Register.**

Executive Order 12291

The Secretary has determined that these are not major rules under Executive Order 12291 because these regulations do not meet any of the threshold criteria for a major rule. Therefore, a regulatory impact analysis is not required.

Regulatory Flexibility Act

We certify that these regulations will not have a significant economic impact on a substantial number of small entities because these rules affect only individuals and States. Therefore, a regulatory flexibility analysis as provided in Pub. L. 96–354, the Regulatory Flexibility Act, is not required.

Paperwork Reduction Act

These regulations impose no additional reporting or recordkeeping requirements requiring Office of Management and Budget clearance.

Dorcas R. Hardy,

Commissioner of Social Security.

Approved: April 9, 1987.

Otis R. Bowen,

Secretary of Health and Human Services.

Subparts D and P of Part 404 of Chapter III of Title 20 of the Code of Federal Regulations are amended as follows:

PART 404—[AMENDED]

1. The authority citation for Subpart D of Part 404 continues to read as follows:

Authority: Secs. 202, 203 (a) and (b), 205(a), 216, 223, 228(a)–(e), and 1102 of the Social Security Act; 42 U.S.C. 402, 403 (a) and (b), 405(a), 416, 423, 428(a)–(e), and 1302.

§ 404.362 [Amended]

2. In § 404.362, paragraph (b)(2) is amended by inserting "or great-grandchild" after "grandchild" in the title and introductory sentence.

3. The authority citation for Subpart P of Part 404 continues to read as follows:

Authority: Secs. 202, 205 (a), (b), and (d)–(h), 216(i), 221 (a) and (i), 222(c), 223, 225 and 1102 of the Social Security Act; 42 U.S.C. 402, 405 (a), (b), and (d)–(h), 416(i), 421 (a) and (i), 422(c), 423, 425 and 1302; sec. 505(a) of Pub. L. 96–265, 94 Stat. 473; secs. 2(d)(2), (5), (6), and (15) of Pub. L. 98–460, 98 Stat. 1797, 1801, 1802, and 1808.

§ 404.1599 [Amended]

4. In § 404.1599, the third sentence of paragraph (e) is amended by removing "1985" and adding "1990".

Subpart B of Part 416 of Chapter III of Title 20 of the Code of Federal Regulations is amended as follows:

PART 416—[AMENDED]

5. The authority citation for Subpart B of Part 416 continues to read as follows:

Authority: Secs. 1102, 1110(b), 1602, 1611, 1614, 1615(c), 1619(a), 1631, and 1634 of the Social Security Act; 42 U.S.C. 1302, 1310(b), 1381a, 1382, 1382c, 1382d(c), 1382h(a), 1383, and 1383c; secs. 211 and 212 of Pub. L. 93–66, 87 Stat. 154 and 155; sec. 502(a) of Pub. L. 94–241, 90 Stat. 268; and sec. 2 of Pub. L. 99–643, 100 Stat. 3574.

§ 416.250 [Amended]

6. In § 416.250, paragraph (e) is amended by removing the second and third sentences.

BILLING CODE 4160–11–M

Food and Drug Administration

21 CFR Part 680

[Docket No. 84N–0349]

Additional Standards for Miscellaneous Products; Allergenic Products; Potency Tests

AGENCY: Food and Drug Administration.

ACTION: Final rule.

SUMMARY: The Food and Drug Administration (FDA) is amending the additional standards for allergenic products by adding a reference to the potency test requirement applicable to all biological products under the general biological products standards. The amendment is consistent with the reference in the additional standards for allergenic products to other testing requirements in the general biological regulations, such as identity, safety, and sterility testing. The amendment also provides by regulation for the use of potency testing of allergenic products by methods that measure the allergenic activity of the products. FDA is also removing from its regulations the specific potency test procedure for short ragweed pollen extracts.

DATE: This regulation becomes effective on November 9, 1987.

FOR FURTHER INFORMATION CONTACT: M. Christine Anderson, Center for Drugs and Biologics (HFN–853), Food and Drug Administration, 8800 Rockville Pike, Bethesda, MD 20892, 301–496–4204.

SUPPLEMENTARY INFORMATION:

I. Background

The additional standards for specific biological products are prescribed under 21 CFR Parts 620 through 680. The additional standards for allergenic products under 21 CFR Part 680 contain specific requirements that supplement the general requirements for all biological products under 21 CFR Part 610 and the current good manufacturing practice requirements under 21 CFR Parts 210 and 211. Sections 610.1 and 610.10 of the general biological regulations require that manufacturers perform a potency test on each lot of licensed biological product before it is released for commercial distribution.

Historically, FDA has permitted manufacturers to label allergenic products with an unstandardized potency level based on a simple weight of allergen to volume of extracting fluid ratio (W/V) or a determination of the protein nitrogen units (PNU) in each lot of manufactured product. Those allergenic products that have potency levels based on W/V or PNU must include the phrase "No U.S. Standard of Potency" on the label. The uncodified procedures for determining W/V or PNU do not result in reliable measures of biological or allergenic activity. FDA believes, consistent with the recommendations of the Panel on Review of Allergenic Extracts (50 FR 3112; January 23, 1985), that these designations should be replaced as soon as practicable by a designation that reflects allergenic activity. FDA recognizes that test methods for measuring the potency of allergenic products are analytical test methods, which may be lengthy, complex, and subject to frequent amendment. See 21 CFR 10.90(b).

Thus far, only extracts of several hymenoptera venoms and short ragweed pollen extracts have been standardized for potency and have had their allergenic activity determined by all manufacturers of the products. In addition, FDA has approved five standardized cat extracts, two species of standardized mite extracts, two standardized extracts of alternaria, and several standardized grass pollen extracts. FDA is reviewing other amendments to manufacturers' license applications for standardized allergenic extracts. Because approximately 1,800 to 2,000 generic allergenic products are marketed, FDA believes that it is impractical to codify a description of each new specific potency test procedure for a product as the procedure is developed, such as the procedure in § 680.4 for short ragweed pollen extract.

In the past, FDA has conducted workshops on standardization to assist manufacturers in the development of potency procedures for their allergenic products (see 45 FR 76251, November 18, 1980; 48 FR 52772, November 22, 1983; and 50 FR 52562, December 24, 1985). Those workshops have included discussion of methods of protein measurements, radial immunodiffusion test, radioallergosorbent tests (RAST), isoelectric focusing, and skin testing. FDA will consider conducting more workshops as needed to assist manufacturers in performing specific potency tests for allergenic products.

II. Proposed Rule

In the **Federal Register** of July 24, 1985 (50 FR 30211), FDA proposed to amend 21 CFR Part 680 concerning the additional standards for allergenic products by adding to § 680.3 *Tests* a new paragraph (e) *Potency*. Section 680.3 already requires that allergenic products meet the general biological testing provisions of 21 CFR Part 610 as those provisions concern identity, safety, and sterility testing. For consistency, § 680.3(e) refers to the general potency requirements under § 610.10. A new § 680.3(f) references the recordkeeping requirements related to the tests performed under § 680.3.

Under new § 680.3(e), the test methods used to measure the potency of allergenic products are required to measure the allergenic activity of the product. FDA will recommend potency test methods to manufacturers when FDA believes that the method results in a reliable measure of biologic or allergenic activity. To facilitate the transition from W/V or PNU to a potency method that measures allergenic activity, FDA will recommend a specific potency test method only after the method has been shown to be effective and has been discussed or demonstrated in one or more public workshops, has appeared in scientific publications, or has been discussed with individual manufacturers. The Director, Office of Biologics Research and Review, Center for Drugs and Biologics, will notify each affected manufacturer in writing of the recommended procedure. This notification will allow a reasonable

VOL 52 ISS 195 OC 8 1987 UMI

time period for manufacturers to begin potency testing based on the recommended procedure or another potency test method that also results in a reliable measure of the potency of the product. Manufacturers will be required to submit amendments to the product license application and to obtain FDA's approval of the amendments, including appropriate potency labeling and lot release requirements. On or after the date established by FDA for implementation of a potency test method that reflects allergenic activity, the agency will consider new lots of that product that are introduced initially into interstate commerce by the licensee to be safe and effective and not misbranded only if the product's potency has been measured under FDA approved procedures. The agency intends to initiate license revocation proceedings or other enforcement actions for any such product for which the potency is not measured in terms of allergenic activity.

As discussed above, when FDA recommends a potency test method for an allergenic product, each licensed manufacturer must submit to FDA and receive approval from FDA within a specified time period appropriate amendments to its license application showing that the recommended method (or an approved alternative method) is used and that labeling is revised if necessary. FDA analytical methods are available for public disclosure under 21 CFR Part 20 (see 21 CFR 10.90(b)(10)).

III. Antigen E Requirements

Section 680.4 has required the standardization of short ragweed pollen extracts based on a determination of the quantity of the major allergen (antigen E) that is present in each lot of the product. The method for performing antigen E testing is included in each manufacturer's license application. Section 680.4 has been the only codified requirement for a specific standardized potency test for an allergenic product. Because FDA is publishing new § 680.3(e) and (f), FDA is removing § 680.4 *Short ragweed pollen extracts.* This codified requirement for one product is unnecessary, because the antigen E requirement for short ragweed pollen extracts is replaced by the requirements in new § 680.3(e).

FDA is making available its recommended test procedures for short ragweed pollen extracts as authorized in 21 CFR 10.90(b)(10) of its administrative practices and procedures regulations. The recommended test procedures are described in a document entitled "Recommended Methods for Short Ragweed Pollen Extracts," Docket No. 84S-0344, available for public examination at the Dockets Management Branch (HFA-305), Food and Drug Administration, Rm. 4-62, 5600 Fishers Lane, Rockville, MD 20857. FDA also advises that short ragweed pollen extracts, or any mixed product containing short ragweed pollen extract as a component, continue to be subject to the antigen E method, as set forth in the license applications. The antigen E method is FDA's recommended test method for short ragweed pollen extracts.

IV. Comments

In response to the published proposal of July 24, 1985 (50 FR 30211), FDA received two letters of comment. The comments opposed the proposed rule on the basis that any required new standardized test methods that are not codified as step-by-step procedures may not benefit sufficiently from inputs of the industry, health professionals, scientific societies, researchers, and the general public. One of the comments stated that the promulgation of new specific potency test procedures falls within the scope of the rulemaking provisions of the Federal Food, Drug, and Cosmetic Act (21 U.S.C. 371) and the Administrative Procedure Act (5 U.S.C. 553). One of the comments said that the proposed standardization process could result in a substantial economic and administrative impact on manufacturers. The comments recommended, therefore, that FDA continue the antigen E requirements under § 680.4 and that all future individual official potency standards be codified.

FDA believes the comments misconstrued the intent of the rule. As stated in the preamble to the proposed rule and elsewhere in the preamble to this final rule, the agency believes that the traditional units used as an indicator of a product's potency (i.e., PNU and W/V) do not result in reliable measures of biological or allergenic activity and should be replaced by a designation that reflects allergenic activity. FDA recognizes that the comments may have misinterpreted the proposed rule as requiring manufacturers to adopt whatever particular test method the agency recommends for a specific product. The agency is therefore changing the language of § 680.3(e) to clarify that the rule does not require that manufacturers incorporate a specific test method recommended by FDA into the manufacturer's license application. Rather, the intent of the rule is to provide that the potency of allergenic products be measured by test methods that result in reliable measures of the products' potency. Neither comment objected to the measurement of allergenic activity as the means by which the potency of allergenic products is determined.

With regard to manufacturers' concerns that they be involved in the implementation of potency test methods for specific allergenic products, FDA notes that manufacturers will have an opportunity to participate in any workshop conducted by FDA and may submit their views at any time on any potency test method including methods discussed in scientific publications.

FDA will not recommend a test method until the method has been shown to be effective and has been discussed or demonstrated in public workshops, has appeared in scientific publications, or has been discussed with individual manufacturers.

Although the comments suggested that FDA promulgate specific potency test methods that apply to individual allergenic products, the codification of such methods is unnecessary, and could involve methods that are lengthy, complex, and subject to frequent changes so that their codification could interfere with timely amendments by manufacturers to their license applications to incorporate new advances in scientific procedures. FDA recognizes that more than one appropriate measurement of allergenic activity may exist for a specific allergenic product, and this rule provides flexibility so that more than one method may be used provided any methods used results in reliable measurements of a product's potency.

FDA recognizes that for the vast majority of allergenic products potency test methods have not yet been developed. Therefore, an exception has been built into the final rule to allow the continued use of the traditional units applied to allergenic extracts (i.e., PNU or W/V) until a potency test method that measures allergenic activity exists and FDA notifies manufacturers of the existence of such a test method.

FDA disagrees with the comment suggesting that standardization of allergenic extracts could result in a substantial economic impact on manufacturers. This comment was not accompanied by any data to support the comment. In the economic assessment of the final rule for short ragweed pollen extract, FDA concluded that the standardization of short ragweed pollen extract would not result in a significant adverse economic impact and, indeed, would provide an economic benefit to users of the product (see 46 FR 39131, item number 11, July 31, 1981). Since that

time, several manufacturers of other allergenic products have amended their license applications to include potency test methods which result in reliable measures of the allergenic activity of the products. The allergenic extracts which have been standardized by some manufacturers include, but are not limited to, cat extract, mite extract, purified hymenoptera venom extracts, and several pollen extracts, including extracts of orchard, red top, june, rye, and meadow fescue grasses. The well-established methods that are being used or are being considered for use as approved potency test procedures include radial immunodiffusion, isoelectric focusing, RAST inhibition, and for extracts of purified hymenoptera venoms, a hyaluranidase enzyme assay. FDA believes that testing by these potency procedures would result in better products and would not create a significant economic impact on manufacturers.

V. Environmental Impact

The agency has determined under 21 CFR 25.24(c)(10) that this action is of a type that does not individually or cumulatively have a significant effect on the human environment. Therefore, neither an environmental assessment nor an environmental impact statement is required.

VI. Paperwork Reduction Act

Section 680.3 contains collection of information requirements already submitted to and approved by the Office of Management and Budget (OMB) under section 3507 of the Paperwork Reduction Act of 1980. The requirements of § 680.3 express the requirements of 21 CFR 211.165, 211.167, 211.188, and 211.194 (OMB control number 0910–0139), as those requirements apply to allergenic products tests.

VII. Economic Impact

FDA has examined the regulatory impact and regulatory flexibility implications of the regulation in accordance with Executive Order 12291 and the Regulatory Flexibility Act (Pub. L. 96–354). Specifically, the regulation identifies in the additional standards for allergenic products the potency test requirement under § 610.10 and the requirements in various sections in Parts 210 and 211 that apply to all licensed biological products.

The regulation provides for the eventual standardization of allergenic extracts by well-established methods that will measure the quantity of allergenic activity in specific allergenic extracts. About 15 manufacturers of allergenic extracts, approximately half of which are small establishments, will be affected by this rule. As technology for a new method is developed and the method becomes well-established, the new method or another reliable method would replace the weight-to-volume designation of potency or the PNU potency method as the acceptable potency test for a specific product. The costs to a manufacturer for standardizing a lot of a specific allergenic extract when standardization is required will vary from zero to several hundred dollars depending on whether the manufacturer produces that product and, if so, has already standardized the product or is in the process of standardizing it. A limited number of allergenic extracts produced by several manufacturers have already been standardized. The standardization of these allergenic extracts has not resulted in significant changes in manufacturing procedures or in the costs and availability of the products. Indeed, certain standardized allergenic extracts are sold at the same price as the corresponding unstandardized extracts. Therefore, the agency has concluded that any anticipated costs resulting from this rule are insufficient to warrant designation as a major rule under any of the criteria specified under section 1(b) of Executive Order 12291. Further, the agency certifies that the rule will not have a significant economic impact on a substantial number of small entities, as defined in the Regulatory Flexibility Act.

List of Subjects in 21 CFR Part 680

Biologics, Allergenic products.

Therefore, under the Public Health Service Act and under the authority delegated to the Commissioner of Food and Drugs, Part 680 is amended as follows:

PART 680—ADDITIONAL STANDARDS FOR MISCELLANEOUS PRODUCTS

1. The authority citation for 21 CFR Part 680 continues to read as follows:

Authority: Sec. 215, 351, 58 Stat. 690 as amended, 702 as amended (42 U.S.C. 216, 262); 21 CFR 5.10.

2. In § 680.3 by reserving paragraph (d) and adding new paragraphs (e) and (f) and a parenthetical statement at the end of the section to read as follows:

§ 680.3 Tests.

* * * * *

(d) [Reserved]

(e) *Potency.* The potency of each lot of each Allergenic Product shall be determined as prescribed in § 610.10 of this chapter. Except as provided in this section, the potency test methods shall measure the allergenic activity of the product. Until manufacturers are notified by the Director, Office of Biologics Research and Review, of the existence of a potency test that measures the allergenic activity of an allergenic product, manufacturers may continue to use unstandardized potency designations.

(f) *Records.* The records related to the testing requirements of this section shall be prepared and maintained as required by §§ 211.165, 211.167, 211.188, and 211.194 of this chapter.

(Collection of information requirements in this section were approved by the Office of Management and Budget under OMB control number 0910–0139.)

§ 680.4 [Removed]

3. By removing § 680.4 *Short ragweed pollen extracts.*

Dated: July 27, 1987.

John M. Taylor,

Associate Commissioner for Regulatory Affairs.

BILLING CODE 4160–01–M

DEPARTMENT OF HOUSING AND URBAN DEVELOPMENT

Office of the Assistant Secretary for Housing—Federal Housing Commissioner

24 CFR Parts 201, 203, and 234

[Docket No. N–87–1738; FR–2111]

Mortgage Insurance; Changes to Maximum Mortgage Limits for Single Family Residences, Condominiums and Manufactured Homes and Lots

AGENCY: Office of the Assistant Secretary for Housing—Federal Housing Commissioner, HUD.

ACTION: Notice of revisions to FHA maximum mortgage limits for high-cost areas.

SUMMARY: This notice amends the listing of areas eligible for "high-cost" mortgage limits under certain of HUD's insuring authorities under the National Housing Act by (1) revising the mortgage limits for Windham County, Connecticut; (2) adding "high-cost" mortgage limits for Cheshire County, New Hampshire; and (3) increasing the mortgage limits for Allentown-Bethlehem, Pennsylvania, MSA. Mortgage limits are adjusted in the area when the Secretary determines that middle- and moderate-income persons

have limited housing opportunities because of high prevailing housing sales prices.

EFFECTIVE DATE: October 8, 1987.

FOR FURTHER INFORMATION CONTACT: For single family: Morris Carter, Director, Single Family Development Division, Room 9270; telephone (202) 755–6720. For manufactured homes: Christopher Peterson, Director, Office of Manufactured Housing and Regulatory Functions, Room 9158; telephone (202) 755–5210; 451 Seventh Street, SW., Washington, DC 20410. (These are not toll-free numbers.)

SUPPLEMENTARY INFORMATION:

Background

The National Housing Act (NHA), 12 U.S.C. (1710–1749), authorizes HUD to insure mortgages for single family residences (from one- to four-family structures), condominiums, manufactured homes, manufactured home lots, and combination manufactured home lots. The NHA, as amended by the Housing and Community Development Amendments of 1980 and the Housing and Community Development Amendments of 1981, permits HUD to increase the maximum mortgage limits under most of these programs to reflect regional differences in the cost of housing. In addition, sections 2(b) and 214 of the NHA provide for special high-cost limits for insured mortgages in Alaska, Guam and Hawaii.

On October 1, 1986 (51 FR 34961), the Department published its most recent annual complete lising of areas eligible for "high-cost" mortgage limits under certain of HUD's insuring authorities under the National Housing Act, and their applicable limits for each area.

This Document

Today's document (1) revises the high-cost mortgage amounts for Windham County, Connecticut; (2) adds high-cost mortgage limits for Cheshire County, New Hampshire; and (3) increases the mortgage limits for Allentown-Bethlehem, Pennsylvania, MSA.

These amendments to the high-cost areas appeal in two parts. Part I explains high-cost limits for mortgages insured under Title I of the National Housing Act. Part II lists changes for single family residences insured under section 203(b) or 234(c) of the National Housing Act.

National Housing Act High Cost Mortgage Limits

I. Title I: Method of Computing Limits

A. *Section 2(b)(1)(D). Combination manufactured home and lot (excluding Alaska, Guam and Hawaii).* To determine the high-cost limit for a combination manufactured home and lot loan, multiply the dollar amount in the "one family" column of Part II of this list by .80. For example, Windham County (New London-Norwich, Connecticut-Rhode Island, MSA) has a one-family limit of $90,000. The combination home and lot loan limit for Windham County is $90,000 × .80, or $72,000.

B. *Section 2(b)(1)(E): Lot only (excluding Alaska, Guam and Hawaii).* To determine the high-cost limit for a lot loan, multiply the dollar amount in the "one-family" column of Part II of this list by .20. For example, Windham County (New London-Norwich, Connecticut-Rhode Island, MSA) has a one-family limit of $90,000. The lot-only loan limit for Windham County is $90,000 × .20, or $18,000.

C. *Section 2(b)(2). Alaska, Guam and Hawaii limits.* The maximum dollar limits for Alaska, Guam and Hawaii may be 140% of the statutory loan limits set out in section 2(b)(1).

Accordingly, the dollar limits for Alaska, Guam and Hawaii area as follows:

1. For manufactured homes: $56,700. (40,500×140%).

2. For combination manufactured homes and lots: $75,600. ($54,00×140%).

3. For lots only: $18,900. (13,500×140%).

II. Title II: Updating of FHA Sections 203(b), 234(c) and 214 Area Wide Mortgage Limits

REGION I.—HUD FIELD OFFICE—HARTFORD, CT

Market area designation and local	1-family and condo unit	2-family	3-family	4-family
New London-Norwich CT-RI MSA	$90,000	$101,300	$122,650	$142,650
New London County				
Windham County				

REGION II.—HUD FIELD OFFICE—MANCHESTER OFFICE

Market area designation and local	1-family and condo unit	2-family	3-family	4-family
Cheshire County	$81,700	$92,000	$111,800	$129,000

REGION III.—HUD FIELD OFFICE—PHILADELPHIA OFFICE

Market area designation and local	1-family and condo unit	2-family	3-family	4-family
Allentown-Bethlehem, PA MSA	$76,000	$85,600	$104,000	$120,000
Carbon County				
Lehigh County				
Northampton County				
Warren County				

Dated: October 1, 1987.

Thomas T. Demery,

Assistant Secretary for Housing—Federal Housing Commissioner.

BILLING CODE 4210–27–M

---

24 CFR Part 390

[Docket No. R–87–1271; FR–2135]

Government National Mortgage Association; Guaranty of Mortgage-Backed Securities

AGENCY: Office of the President of the Government National Mortgage Association, HUD.

ACTION: Final rule; notice of effective date.

SUMMARY: On September 29, 1986, the Department published a final rule (51 FR 34465) which revised the regulations governing the date for the first scheduled monthly payment of principal and interest for a mortgage in a pool backing mortgage-backed securities. The rule made a technical revision to help implement GNMA's Commitment Line System, an automated system for handling the issuance of commitments for mortgage-backed securities, which was then being developed. The effective date note in that rule indicated that the Department would not make the rule effective until the Commitment Line System was operational. This notice announces the effective date of that rule.

EFFECTIVE DATE: November 1, 1987.

FOR FURTHER INFORMATION CONTACT: Robert P. Kalish, Acting Vice President, Office of Mortgage-Backed Securities, Government National Mortgage Association, Room 6204, 451 Seventh Street SW., Washington, D.C. 20410–9000. Telephone: (202) 755–5593. (This is not a toll-free number.)

SUPPLEMENTARY INFORMATION: The final rule published on September 29, 1986

amended 24 CFR 390.7, 390.27, and 390.43 to require that a mortgage in a pool backing mortgage-backed securities have a date of first scheduled monthly payment that is no more than 24 months before the issue date of the securities. This revision was made to help implement the Commitment Line System, an automated system for handling the issuance of commitments for mortgage-backed securities, but its effectiveness was delayed pending completion of the System.

The Commitment Line System is ready for operation, and the Department, accordingly, is making this rule effective on November 1, 1987.

Authority: Secs. 306(g) and 309(a) of the National Housing Act, 12 U.S.C. 1721(g) and 1723a(a); sec. 7(d) of the Department of Housing and Urban Development Act, 42 U.S.C. 3535(d).

Date: October 1, 1987.

Grady J. Norris,

Assistant General Counsel for Regulations.

Sale of Government-Furnished Equipment or Materiel and Services to U.S. Companies; Correction

AGENCY: Office of the Secretary, DoD.

ACTION: Final rule; correction.

SUMMARY: Published in the Federal Register on Friday, September 25, 1987, FR Doc. 87-22191, page 36030, the last sentence of the summary is corrected to read: "Articles manufactured by the arsenals and related services may now be sold to an authorized purchaser outside the Department of Defense provided specific requirements are met."

FOR FURTHER INFORMATION CONTACT: Mr. Robert D. Wise, Defense Security Assistance Agency, the Pentagon, telephone (202) 697-8108.

Linda M. Bynum,

Alternate OSD Federal Register Liaison Officer, Department of Defense October 2, 1987

[FR Doc. 87-23355 Filed 10-7-87; 8:45 am]

BILLING CODE 3810-01-M

Department of the Air Force

32 CFR Part 861

Military Airlift Command (MAC) and Military Traffic Management Command (MTMC) Commercial Airlift Safety Review Procedures

AGENCY: Department of the Air Force, DOD.

ACTION: Final rule.

SUMMARY: This part describes the operating procedures of the Joint Transportation Operating Agency (TOA) Commercial Airlift Review Board. The Board reviews commercial carriers providing airlift services to the Department of Defense and has the authority to suspend DOD use or take other actions against carriers when issues of air safety arise. This serves to inform members of the general public, particularly affected air carriers not contracting directly with Military Airlift Command (MAC) and Military Traffic Management Command (MTMC), of the procedures for dealing with and responding to actions by the Joint Transportation Operating Agency (TOA) Commercial Airlift Review Board.

EFFECTIVE DATE: September 18, 1987.

FOR FURTHER INFORMATION CONTACT: Colonel John R. Dumbroski, Director, DOD Air Carrier Survey and Analysis Office, DCS/Air Transportation, Headquarters Military Airlift Command (HQ MAC/TRL), Scott AFB IL 62225-5001. Telephone (618) 256-3115.

SUPPLEMENTARY INFORMATION: The Joint Transportation Operating Agency (TOA) Commercial Airlift Review Board was established by Pub. L. 99-661 (FY 87 National Defense Authorization Act), November 14, 1986, section 1204 (Requirements Concerning Transportation of Members of the Armed Forces by Chartered Aircraft), and Department of Defense Directive 4500.53, May 15, 1987 (Commercial Passenger Airlift Management and Quality Control). Because this part concerns agency management and public contracts and implements a public law and a Department of Defense directive, it is published as a final rule.

The Department of the Air Force has determined that this regulation is not a major rule as defined by Executive Order 12291, is not subject to the relevant provisions of the Regulatory Flexibility Act of 1980 (Pub. L. 96-354), and does not contain reporting or recordkeeping requirements under the criteria of the Paperwork Reduction Act of 1980 (Pub. L. 96-511).

Patsy J. Conner,

Air Force Federal Register Liaison Officer.

List of Subjects in 32 CFR Part 861

Air carriers, Aviation safety

Therefore, 32 CFR, Subchapter F, is amended by adding Part 861 to read as follows:

PART 861—MILITARY AIRLIFT COMMAND (MAC) AND MILITARY TRAFFIC MANAGEMENT COMMAND (MTMC) COMMERCIAL AIRLIFT SAFETY REVIEW PROCEDURES

Sec.

861.1 References.
861.2 Purpose.
861.3 Definitions.
861.4 Causes and conditions for suspension.
861.5 Reinstatement considerations.
861.6 Board procedures.
861.7 Decision by others.
861.8 Appeal of a determination.
861.9 DOD commercial airlift review procedures.

Authority: 10 U.S.C. 8013; 10 U.S.C. 2640.

§ 861.1 References.

(a) Section 1204, Pub. L. 99-661; 10 U.S.C. 2640, Charter Air Transportation of Members of the Armed Forces.

(b) DOD Directive 4500.53, Commercial Passenger Airlift Management and Quality Control.

(c) MACR 70-1, Contract Airlift Management, Civil Air Carriers.

(d) MTMCR 15-1, Procedure for Disqualifying and Placing Carriers in Nonuse.

§ 861.2 Purpose.

(a) This document establishes the procedures to be used by the United States Air Force Military Airlift Command (MAC) and the United States Army Military Traffic Management Command (MTMC) when, in accordance with references § 861.1 (a) through (d):

(1) A commercial air carrier is subject to review or other action by the Joint Transportation Operating Agency (TOA) Commercial Airlift Review Board (hereinafter referred to as the Board),

(2) A warning, suspension, or reinstatement action is taken against a carrier by the Board, or

(3) Review or other Board action is escalated to a higher authority.

These procedures apply to all commercial air carriers providing DOD passenger or cargo airlift through charter, individual ticket movements, contracts, tariffs, or other transportation agreements. They also apply to carriers providing air transportation purchased by DOD individuals for which

BEST COPY AVAILABLE

VOL 52 ISS 195 OCT 8 1987 UMI

government reimbursement will be made in whole or in part.

(b) Safety or airworthiness issues, per reference § 861.1(b) must be referred to the Board. MAC and MTMC may each take independent corrective action in accordance with their respective procedures on standards of service issues when safety and airworthiness issues are not involved. The DOD Air Carrier Survey and Analysis Office will be informed of all actions taken independently by a Transportation Operating Agency (TOA).

(c) Except as otherwise provided herein, the rights and remedies of the government and commercial air carriers outlined in these procedures are not exclusive and are in addition to any other rights and remedies provided for by law, regulation, contract, or agreement.

(d) Section 861.9 provides a diagram of actions contemplated by these procedures and the respective references listed in § 861.1.

§ 861.3 Definitions.

(a) Letter of Warning is a notice to a carrier of a failure to satisfy safety or airworthiness requirements which, if not remedied, may result in temporary nonuse or suspension. The issuance of a Letter of Warning is not a prerequisite to a suspension or other action.

(b) Suspension is the exclusion of an air carrier from participating in the DOD airlift transportation program. The period of suspension will normally:

(1) Remain in effect until the carrier furnishes satisfactory evidence that the conditions causing the suspension have been remedied, or

(2) Be for a fixed period of time as determined at the discretion of the Board.

(c) Temporary Nonuse is the immediate exclusion of a carrier from any flight activities in the DOD airlift transportation program, pending a decision on suspension, taken under the conditions outlined in § 861.6(a).

(d) The procedures for commercial airlift safety review are illustrated in § 861.9 and include five possible levels with increasing authority:

(1) DOD Air Carrier Survey and Analysis Office.

(2) DOD Air Carrier Review Committee.

(3) Joint TOA Commercial Airlift Review Board.

(4) Commanders MTMC and MAC (Joint TOA Commanders).

(5) DOD Commercial Airlift Review Authority.

These levels are described in reference § 861.1(b), with the exception of the DOD Air Carrier Review Committee, which is the successor to the Contract Airlift Capability Survey Committee described in reference § 861.1(c). The Committee provides multifunctional review of the efforts of the DOD Air Carrier Survey and Analysis Office and offers advice and recommendations to the higher authorities when appropriate.

§ 861.4 Causes and conditions for suspension.

(a) Carrier shall be subject to suspension for good cause, including:

(1) Failing to comply with generally accepted standards of airmanship, training, and maintenance practices and procedures.

(2) Failing to comply with all provisions of applicable statutes, tenders of service, and contract terms, as such may affect flight safety, as well as with all applicable Federal Aviation Administration regulations, airworthiness directives, orders, rules, and standards promulgated under the Federal Aviation Act of 1958 as amended.

(3) Failing to keep and maintain all components and surfaces, including all visible components and surfaces, of the aircraft used in performance of service clean, orderly, and in a good state of repair.

(4) Involvement of one of carrier's aircraft in a serious or fatal accident, incident, or operational occurrence (regardless of whether or not such aircraft is being used in the performance of government procured transportation).

(5) Any other condition which affects the safe operation of carrier's flights hereunder.

(b) Compliance with published standards does not, standing alone, constitute compliance with generally accepted standards of airmanship, training, or maintenance practices.

§ 861.5 Reinstatement considerations.

In no event shall reinstatement occur prior to the date set out in the suspension notice, if such date was set as a part of the original such suspension, or unless and until the carrier shows to the satisfaction of the Board that deficiencies that led to suspension have been corrected and that actions have been implemented to preclude the recurrence of similar deficiences.

§ 861.6 Board procedures.

(a) *Temporary nonuse.* (1) In case of a fatal aircraft accident or for other good cause, the two senior members of the Board (see § 861.6(d)(1)) will jointly make an immediate determination whether to place the carrier involved in a temporary nonuse status pending suspension proceedings. Prior notice to the carrier is not required.

(2) Such determination shall include consideration of the advice of the DOD Air Carrier Review Committee, if reasonably available, but will not await such advice.

(3) The carrier shall be promptly notified of the temporary nonuse determination and the basis therefore.

(4) Temporary nonuse status terminates automatically if suspension proceedings are not commenced as set out in § 861.6(b)(2), within 30 days of inception.

(b) *Suspension.* (1) On a recommendation of the DOD Air Carrier Survey and Analysis Office, the DOD Air Carrier Review Committee, or any individual member of the Board, the Board shall consider whether or not to suspend a carrier.

(2) If the Board determines that suspension may be appropriate, it shall notify the carrier that suspension action is under consideration and of the basis for such consideration and offer the carrier a hearing thereon within 15 days of the date of the notice, or such other period as granted by the Board, at which the carrier may be present and may offer evidence. The presiding member of the Board shall establish procedures for such hearing as may be appropriate which shall be as informal as practicable consistent with administrative due process.

(3) Types of evidence which may be considered, if appropriate, shall include, but not be limited to, the following:

(i) Information and analysis provided by the DOD Air Carrier Survey and Analysis Office.

(ii) Carrier's written/oral evidence, if any.

(iii) Corrective actions that may have been taken by the carrier to:

(A) Correct the specific deficiencies that have led the Board to consider suspension, and

(B) Preclude recurring similar deficiencies.

(iv) Such other matters as the Board deems relevant.

(v) The Board's decisions on the reception or exclusion of evidence shall be final.

(4) Carriers shall have the burden of proving their suitability to safely perform DOD airlift services by clear and convincing evidence.

(5) After the conclusion of such hearing, or if no hearing is requested and attended by the carrier within the time specified by the Board, the Board shall consider the matter and make a final decision whether or not to suspend the carrier or to impose such lesser sanction as is appropriate. The carrier shall be notified of the Board's decision.

(c) *Reinstatement.* (1) The Board may consider reinstating a suspended carrier on either Board motion of carrier motion, unless such carrier has become ineligible in the interim.

(2) The carrier has the burden of proving by clear and convincing evidence that the reinstatement considerations in § 861.5 have been satisfied.

(3) Carrier evidence in support of reinstatement will be timely provided to the Board for its review. The Board may independently corroborate the carrier-provided evidence and may, at its option, convene a hearing and request the participation of the carrier.

(d) *Board membership and operating procedures.* (1) The Board shall be composed of:

(i) Vice Commander, HQ MTMC—senior member and voting member.

(ii) Chief of Staff, HQ MAC—senior member and voting member.

(iii) Director of Passenger Traffic, HQ MTMC—voting member.

(iv) Deputy Chief of Staff, Air Transportation, HQ MAC—voting member.

(v) Chief, Passenger Services Division, HQ MTMC—voting member.

(vi) Director, Passenger and Traffic Management, HQ MAC—voting member.

(vii) Legal Representative, HQ MTMC—nonvoting advisor.

(viii) Legal Representative, HQ MAC—nonvoting advisor.

(ix) Air Carrier Survey and Analysis Office Representative—nonvoting advisor/recorder.

(x) Contract Representative, HQ MAC—nonvoting advisor.

(xi) Other additional advisors necessary to the Board's deliberation process—nonvoting members.

(2) The presiding member at a meeting of the Board shall be the senior voting member or alternate present. A voting member, who will not be present at any meeting of the Board, may be represented by an alternate recognized in the normal course as authorized to act on behalf of the absent official, who will attend in his stead and will have power to vote. Four voting members present shall constitute a quorum. Decisions shall be by majority vote.

(3) The meeting date, time, and site of the Board will be determined at the time of the decision to convene the Board.

(4) Minutes of Board hearings may be summarized and will be maintained with all other records pertaining to the Board proceeding.

(5) The Board Recorder shall ensure that the TOAs and the air carrier are notified of the Board's decision and reasons therefor.

§ 861.7 Decision by others.

In the event the Board is unable to decide an issue properly before it, or if the issue in the judgment of the Board requires review at a DOD organizational level higher than the Board, the issue will be referred to the joint TOA commanders for appropriate disposition. In such event, the decision will be made upon the written record only, no hearing will be held.

§ 861.8 Appeal of a determination.

(a) A carrier placed in suspension may administratively appeal this action to the authorities shown in § 861.8(c). An appeal, if any, must be filed within 15 work days after receipt of the decision of the Board or joint TOA commanders. The suspension will not be stayed pending appeal unless for good cause, as determined by the Board. The decision of the appellate authority designated herein is final and is not subject to further administrative review or appeal.

(b) An appeal will be in writing only and carriers shall not be entitled to a de novo hearing before the administrative appellate authorities.

(c) The following administrative appellate authorities will review and make decisions on appeals:

(1) When the decision being appealed was made by the Board, the appellate authorities are the Commander in Chief, MAC, and Commander, MTMC. They will jointly decide the appeal.

(2) When the Commander in Chief, MAC, and Commander, HQ MTMC, are unable to jointly agree on an appeal, they shall refer the matter to the DOD Commercial Airlift Review Authority for its decision.

(3) When the decision being appealed was made by the joint TOA commanders, the appellate authority is the DOD Commercial Airlift Review Authority.

§ 861.9 DOD commercial aircraft review procedures.

Coast Guard

33 CFR Part 67

[CGD11-86-02]

Lines of Demarcation for Classification of Structures; Eleventh Coast Guard District

AGENCY: Coast Guard, DOT.

ACTION: Final rule.

SUMMARY: The Coast Guard is establishing lines of demarcation for the classification of structures in the waters of the Eleventh Coast Guard District. Classification of structures is currently determined at the time an application for a permit to establish and operate lights and fog signals is received. The implementation of lines of demarcation establishes clearly defined boundaries for classifying structures.

EFFECTIVE DATE: November 9, 1987.

FOR FURTHER INFORMATION CONTACT: Lieutenant Junior Grade Michael J. Lodge, Eleventh Coast Guard District, at (213) 499-5410.

SUPPLEMENTARY INFORMATION: On December 11, 1986, the Coast Guard published a notice of proposed rule making in the **Federal Register** for these regulations (51 FR 44642). Interested persons were requested to submit comments and no comments were received.

Drafting Information

The drafters of these regulations are Mr. Mike Van Houten, Aids to Navigation Specialist, Eleventh Coast Guard District, project officer, and Lieutenant Commander Arthur E. Brooks, project attorney, Eleventh Coast Guard District Legal Office.

Discussion of Comments

No comments were received.

Economic Assessment and Certification

These regulations are considered to be non-major under Executive Order 12291 on Federal Regulation and nonsignificant under Department of Transportation regulatory policies and procedures (44 FR 11034; February 26, 1979). The economic impact has been found to be so minimal that a full regulatory evaluation is unnecessary. Only five structures are affected and the costs of compliance are not significant. Since the impact of these regulations is expected to be minimal, the Coast Guard certifies that they will not have a significant economic impact on a substantial number of small entities.

List of Subjects in 33 CFR Part 67

Continental shelf, Navigation (water), Reporting and recordkeeping requirements.

Final Regulations

In considering the foregoing, Part 67 of Title 33, Code of Federal Regulations, is amended as follows:

1. The authority citation for Part 67 continues to read as follows:

Authority: Secs. 83, 85, 92, 633, 63 Stat. 500, 503, 545; sec. 4, 67 Stat. 462; sec. 6(b)(1), 80 Stat. 938 (14 U.S.C. 83, 85, 92, 633; 43 U.S.C. 1333); 49 U.S.C. 1655(b), 1657(e); 49 CFR 1.4(a)(2), (f), (g), unless otherwise noted.

2. Section 67.50-35 is revised to read as follows:

§ 67.50-35 Eleventh Coast Guard District.

(a) *Description.* See § 3.55-1 of this chapter.

(b) *Line of Demarcation.* The line of demarcation described in this section is for adminstrative purposes to distinguish between the areas in which structures shall be subject to Class "A", "B", or "C" requirements. The line delimits the areas to seaward of which class "A" requirements are imposed. The line of demarcation within the jurisdiction of the District Commander is defined as follows:

(1) Commencing at a point of latitude 41°59.8'N., longitude 124°19.5'W., thence southward along the seaward limit of the territorial sea to;

(2) A point at latitude 32°32.0'N, longitude 117°11.0'W.

(c) Structures located within a half nautical mile of Traffic Separation Scheme Los Angeles/Long Beach will also be subject to class "A" requirements. The traffic separation scheme is depicted on National Ocean Service Charts 18740, 18720, 18725, 18746, 18721.

Dated: September 25, 1987.

A. Bruce Beran,

Rear Admiral, U.S. Coast Guard Commander, Eleventh Coast Guard District.

33 CFR Part 110

[CGD8-87-06]

Anchorage Ground; Lower Mississippi River

AGENCY: Coast Guard, DOT.

ACTION: Final rule.

SUMMARY: The Coast Guard is amending the Lower Mississippi River anchorage regulations by decreasing the size of the New Orleans General Anchorage. This action is necessary to provide space for a mid-stream transfer and barge fleeting operation at about mile 89.7 above Head of Passes (AHP), on the Left Descending Bank (LDB).

EFFECTIVE DATE: November 9, 1987.

FOR FURTHER INFORMATION CONTACT: Lt. Edwin M. Stanton, project officer, Commander, Eighth Coast Guard District (merps), Hale Boggs Federal Building, 500 Camp Street, New Orleans, LA 70130-3396; or by telephone at (504) 589-6901.

SUPPLEMENTARY INFORMATION: On 23 July 1987, the Coast Guard published a notice of proposed rule making in the **Federal Register** for these regulations (CGD8-87-06). Interested persons were requested to submit comments.

Drafting Information

The drafters of these regulations are Lt. Edwin M. Stanton, project officer, Eighth Coast Guard District Marine Safety Division, and LCDR James J. Vallone, project attorney, Eighth Coast Guard District Legal Office.

Discussion of Comments

The Board of Commissioners of the Port of New Orleans and the St. Bernard Port District favored the proposal to eliminate the lower mile of the New Orleans General Anchorage based on the potential economic benefits of the proposed barge fleet and mid-stream cargo operations. The Crescent River Port Pilots Association favored elimination of the lower mile of the anchorage for safety reasons. This comment stated that vessels anchored in the lower end of the anchorage restrict the visibility of downbound vessels causing near misses with the Chalmette passenger ferry; and that vessels at anchor in the lower portion of the anchorage leave insufficient room for vessels to pass safely between them and the Tenneco Oil docks. Sea Group, Inc. and the New Orleans Steamship Association, both representing vessels calling in New Orleans objected to the proposal. Both groups stated that loss of the lower end of the New Orleans General Anchorage would result in increased operating costs for their clients. A study commissioned by NOSA and the St. Bernard Port, Harbor and Terminal District did not support this objection. The Louisiana State University Ports and Waterways Management Institute concluded that the negative economic impact on shipping would be negligible. The Louisiana Department of Transportation, the New Orleans-Baton

VOL 52 ISS 195 OCT 8 1987 UMI

Rouge Steamship Pilots Association, and the Associated Federal Coast Pilots of Louisiana offered statements of no objection.

The Coast Guard presented the proposal to the Lower Mississippi River Waterway Safety Advisory Committee at its 18 August 1987 meeting. A representative of the Crescent River Port Pilots Association reiterated that groups support of the proposal.

This regulation is issued pursuant to 33 U.S.C. 471 as set out in the authority citation for all of Part 110.

Economic Assessment and Certification

These regulations are considered to be non-major under Executive Order 12291 on Federal Regulation and nonsignficant under Department of Transportation regulatory policies and procedures (44 FR 11034; February 26, 1979). The economic impact has been found to be so minimal that a full regulatory evaluation is unnecessary. This finding is based upon a study entitled "The Effect of the St. Bernard Midstream Mooring Facility on Anchorages at the Port of New Orleans" by The Ports and Waterways Institute, Center for Wetland Resources, Louisiana State University, Baton Rouge, Louisiana. This study concluded that the economic impact on shipping of reducng the size of the anchorage would be negligible. The study showed that, at present traffic loads, costs for vessels using anchorages in the area would increase 0.4%. This was considered the most likely case. At worst, if shipping were to increase dramatically and, if other nearby anchorages were closed, the additional cost to shipping would not exceed $90,000 per year (a 2.7% increase). The study further stated that the direct economic benefit from fees to the Ports of St. Bernard and New Orleans would equal $150,000 per year.

Since the impact of these regulations is expected to be minimal the Coast Guard certifies that they will not have a significant economic impact on a substantial number of small entities.

List of Subjects in 33 CFR Part 110

Anchorage grounds.

Final Regulations

In consideration of the foregoing, Part 110 of Title 33, Code of Federal Regulations, is amended as follows:

1. The authority citation for Part 110 continues to read as follows:

Authority: 33 U.S.C. 471, 2030, 2035 and 2071; 49 CFR 1.46 and 33 CFR 1.05–1(g).

2. Section 110.195, paragraph (a)(15) is revised to read as follows:

§ 110.195 Mississippi River below Baton Rouge, LA including South and Southwest Passes.

(a) * * *

(15) New Orleans General Anchorage. An area .4 of a mile in length along the right descending bank of the river extending from mile 90.5 to mile 90.9 above Head of Passes. The area's width is 800 feet measured from the shore.

BILLING CODE 4910–14–M

VETERANS ADMINISTRATION

38 CFR Part 21

Veterans' Education; Nonpunitive Grades

AGENCY: Veterans Administration.

ACTION: Final regulations.

SUMMARY: A veteran's award of educational assistance allowance must be reduced when he or she withdraws from a course or when he or she receives a nonpunitive grade for a course. Regulations exist for determining the effective date of the reduction. Some readers of the regulations have been uncertain as to which of the pertinent regulations apply when a veteran withdraws from a course and, as a result of that withdrawal, receives a nonpunitive grade for it. This regulation eliminates this problem. It addresses this situation by expanding the regulation which deals with the effective date of reduction and termination of educational assistance allowance.

EFFECTIVE DATE: September 14, 1987.

FOR FURTHER INFORMATION CONTACT: June C. Schaeffer, Assistant Director for Education Policy and Program Administration, Vocational Rehabilitation and Education Service, Department of Veterans Benefits, Veterans Administration, 810 Vermont Avenue NW., Washington, DC 20420, (202) 233–2092.

SUPPLEMENTARY INFORMATION: On pages 18400 and 18401 of the **Federal Register** of May 15, 1987, there was published a notice of proposed rulemaking to amend Part 21 of title 38 Code of Federal Regulations to clarify the effective dates of discontinuance or reduction when a veteran withdraws from a course and receives a nonpunitive grade as a result of the withdrawal. Interested people were given 30 days to submit comments, suggestions or objections. The VA received one telephone call concerning the proposal.

The caller expressed concern because he was unable to determine from reading the proposal what a veteran's reduction or discontinuance date would be if he or she dropped a course during a school's official drop-add period. He stated that if the VA considered such a reduction in training to have occurred with mitigating circumstances, the VA should state this in the final amendment to § 21.4135.

After careful consideration the VA has decided not to adopt this proposal. A discussion of mitigating circumstances appears in sections other than § 21.4135. The Agency does not think that it would be appropriate to repeat the discussion in § 21.4135. However, the suggestion appears to have merit. The VA will consider making the changes in the appropriate regulations, and proposing these changes at a later date. For now, the Agency is making the proposal published May 15, 1987, final.

The VA has determined that this amended final regulation does not contain a major rule as that term is defined by E.O. 12291, entitled Federal Regulation. The regulation will not have a $100 million annual effect on the economy, and will not cause a major increase in costs or prices for anyone. It will have no significant adverse effects on competition, employment, investment, productivity, innovation, or on the ability of United States-based enterprises to compete with foreign-based enterprises in domestic or export markets.

The Administrator of Veterans Affairs has certified that this amended final regulation will not have a significant economic impact on a substantial number of small entities as they are defined in the Regulatory Flexibility Act (RFA), 5 U.S.C. 601–612. Pursuant to 5 U.S.C. 605(b), the amended regulation, therefore, is exempt from the initial and final regulatory flexibility analyses requirements of sections 603 and 604.

This certification can be made because the regulation affects only individuals. It will have no significant economic impact on small entities, i.e., small businesses, small private and nonprofit organizations and small governmental jurisdictions.

The Catalog of Federal Domestic Assistance number for the program affected by this regulation is 64.111.

List of Subjects in 38 CFR Part 21

Civil rights, Claims, Education, Grant programs—education, Loan programs—education, Reporting and recordkeeping requirements, Schools, Veterans, Vocational education, Vocational rehabilitation.

Approved: September 14, 1987.

Thomas K. Turnage,

Administrator.

In 38 CFR Part 21, *Vocational Rehabilitation and Education,* § 21.4135 is amended by revising paragraphs (e)(1), (s), and (w) to read as follows:

§ 21.4135 Discontinuance dates.

* * * * *

(e) *Course discontinued; course interrupted; course terminated; course not satisfactorily completed or withdrawn from §§ 21.4136 and 21.4137.* (1) If the individual withdraws from all courses; receives all nonpunitive grades; and there are no mitigating circumstances as provided in § 21.4136(k) or § 21.4137(h), the VA will terminate the individual's education assistance allowance effective the later of the following:

(i) The first date of the term in which the withdrawal occurs, or

(ii) December 1, 1976.

* * * * *

(s) *Reduction in rate of pursuit of course (§ 21.4270).*

(1) The VA will reduce an individual's educational assistance allowance effective the first date of the term in which the individual reduces training by withdrawing from part of a course, if the reduction occurs at the beginning of the term.

(2) The VA will reduce an individual's educational assistance allowance effective the earlier of the end of the month or end of the term in which an individual reduces training by withdrawing from part of a course when:

(i) The reduction does not occur at the beginning of the term; and

(ii) There are mitigating circumstances, or the individual receives a punitive grade for the portion of the course from which he or she withdrew.

(3) If the individual reduces training by withdrawing from a part of a course; there are no mitigating circumstances; and the individual receives a nonpunitive grade from that portion of the course from which he or she withdrew; the VA will reduce the individual's educational assistance allowance effective the later of the following:

(i) The first date of enrollment of the term in which the reduction occurs; or

(ii) December 1, 1976. See paragraphs (e) and (w) of this section also.

(4) An individual, who enrolls in several subjects and reduces his or her rate of pursuit by completing one or more of them while continuing training in others, may receive an interval payment based on the subjects completed, if the requirements of § 21.4138(f) are met. If those requirements are not met, the VA will reduce the individual's educational assistance allowance effective the date the subject or subjects were completed.

(Authority: 38 U.S.C. 1780; Pub. L. 98-466)

* * * * *

(w) *Nonpunitive grade assigned without a withdrawal from courses.* (1) If an individual receives a nonpunitive grade for a particular course for any reason other than a withdrawal from it, the VA will reduce the individual's educational assistance allowance effective the last date of attendance when mitigating circumstances are found.

(2) If an individual receives a nonpunitive grade in a particular course for any reason other than a withdrawal from it, and there are no mitigating circumstances, the VA will reduce his or her educational assistance effective the later of the following:

(i) The first date of enrollment for the term in which the grade applies, or

(ii) December 1, 1976. See paragraphs (e) and (s) of this section.

(Authority: 38 U.S.C. 1780(a)(4))

38 CFR Part 36

Increase in Maximum Permissible Interest Rates on Guaranteed Manufactured Home Loans, Home and Condominium Loans, and Home Improvement Loans

AGENCY: Veterans Administration.

ACTION: Final regulations.

SUMMARY: The VA (Veterans Administration) is increasing the maximum interest rates on guaranteed manufactured home unit loans, lot loans, and combination manufactured home unit and lot loans. In addition, the maximum interest rates applicable to fixed payment and graduated payment home and condominium loans, and to home improvement and energy conservation loans are also increased. These increases are necessary because previous rates were not competitive enough to induce lenders to make guaranteed or insured home loans without substantial discounts, or to make manufactured home loans. The increase in the interest rates will assure a continuing supply of funds for home mortgages, home improvement and manufactured home loans.

EFFECTIVE DATE: October 5, 1987.

FOR FURTHER INFORMATION CONTACT: Mr. George D. Moerman, Loan Guaranty Service (264), Department of Veterans Benefits, Veterans Administration, 810 Vermont Avenue, NW., Washington, DC 20420 (202-233-3042).

SUPPLEMENTARY INFORMATION: The Administrator is required by section 1819(f), title 38, United States Code, to establish maximum interest rates for manufactured home loans guaranteed by the VA as he finds the manufactured home loan capital markets demand. Recent market indicators—including the prime rate, the general increase in interest rates charged on conventional manufactured home loans, and the increase in other short-term and long-term interest rates—have shown that the manufactured home capital markets have become more restrictive. It is now necessary to increase the interest rates on manufactured home unit loans, lot loans, and combination manufactured home unit and lot loans in order to assure an adequate supply of funds from lenders and investors to make these types of VA loans.

The Administrator is also required by section 1803(c), title 38, United States Code, to establish maximum interest rates for home and condominium loans, including graduated payment mortgage loans, and for loans for home improvement purposes. Recent market indicators—including the rate of discount charged by lenders on VA loans and the general increase in interest rates charged by lenders on conventional loans, have shown that the mortgage money market has become more restrictive. The maximum rates in effect for VA guaranteed home and condominium loans and those for energy conservation and home improvement purposes have not been sufficiently competitive to induce private sector lenders to make these types of VA guaranteed or insured loans without imposing substantial discounts. To assure a continuing supply of funds for home mortgages through the VA loan guaranty program, it has been determined that an increase in the maximum permissible rates applicable to home and improvement loans is

necessary. The increased return to the lender will make VA loans competitive with other available investments and assure a continuing supply of funds for guaranteed and insured mortgages.

Regulatory Flexibility Act Executive Order 12291

For the reasons discussed in the May 7, 1981 **Federal Register**, (46 FR 25443), it has previously been determined that final regulations of this type which change the maximum interest rates for loans guaranteed, insured, or made pursuant to chapter 37 of title 38, United States Code, are not subject to the provisions of the Regulatory Flexibility Act, 5 U.S.C. 601–612.

These regulatory amendments have also been reviewed under the provisions of Executive Order 12291. The VA finds that they do not come within the definition of a "major rule" as defined in that Order. The existing process of informal consultation among representatives within the Executive Office of the President, OMB, the VA and the Department of Housing and Urban Development has been determined to be adequate to satisfy the intent of this Executive Order for this category of regulations. This alternative consultation process permits timely rate adjustments with minimal risk of premature disclosure. In summary, this consultation process will fulfill the intent of the Executive Order while still permitting compliance with statutory responsibilities for timely rate adjustments and a stable flow of mortgage credit at rates consistent with the market.

These final regulations come within exceptions to the general VA policy of prior publication of proposed rules as contained in 38 CFR 1.12. The publication of notice of a regulatory change in the VA maximum interest rates for VA guaranteed, insured, and direct home and condominium loans, loans for energy conservation and other home improvement purposes, and loans for manufactured home purposes would create an acute shortage of funds pending the final rule publicaiton date which would necessarily be more than 30 days after publication in proposed form. Accordingly, it has been determined that publication of proposed regulations prior to publication of final regulations is impracticable, unnecessary, and contrary to the public interest.

(Catalog of Federal Domestic Assistance Program numbers 64.113, 64.114, and 64.119).

These regulations are adopted under authority granted to the Administrator by sections 210(c), 1803(c)(1), 1811(d)(1), and 1819 (f) and (g) of title 38, United States Code. The regulations are clearly within that statutory authority and are consistent with Congressional intent.

These increases are accomplished by amending §§ 36.4212(a) (1), (2), and (3), and 36.4311 (a) (b), and (c), and 36.4503(a), title 38, Code of Federal Regulations.

List of Subjects in 38 CFR Part 36

Condominiums, Handicapped, Housing, Loan programs—housing and community development, Manufactured homes, Veterans.

Approved: October 2, 1987.

By Direction of the Administrator.

James E. DeWire,

Chief of Staff.

PART 36—[AMENDED]

38 CFR Part 36, *Loan Guaranty*, is amended as follows:

1. In § 36.4212, paragraph (a) is revised as follows:

§ 36.4212 Interest rates and late charges.

(a) The interest rate charged the borrower on a loan guaranteed or insured pursuant to 38 U.S.C. 1819 may not exceed the following maxima except on loans guaranteed or insured pursuant to guaranty or insurance commitments issued by the Veterans Administration prior to the respective effective date:

(Authority: 38 U.S.C. 1819(f))

(1) Effective October 5, 1987, 13–½ percent simple interest per annum for a loan which finances the purchase of a manufactured home unit only.

(2) Effective October 5, 1987, 13 percent simple interest per annum for a loan which finances the purchase of a lot only and the cost of necessary site preparation, if any.

(3) Effective October 5, 1987, 13 percent simple interest per annum for a loan which will finance the simultaneous acquisition of a manufactured home and a lot and/or the site preparation necessary to make a lot acceptable as the site for the manufactured home.

* * * * *

2. In § 36.4311, paragraphs (a), (b), and (c) are revised as follows:

§ 36.4311 Interest rates.

(a) Excepting loans guaranteed or insured pursuant to guaranty or insurance commitments issued by the VA which specify an interest rate in excess of 11 per centum per annum, effective October 5, 1987, the interest rate on any home or condominium loan, other than a graduated payment mortgage loan, guaranteed or insured wholly or in part on or after such date may not exceed 11 per centum per annum on the unpaid principal balance.

(Authority: 38 U.S.C. 1803(c)(1))

(b) Excepting loans guaranteed or insured pursuant to guaranty or insurance commitments issued by the VA which specify an interest rate in excess of 11¼ per centum per annum, effective October 5, 1987, the interest rate of any graduated payment mortgage loan guaranteed or insured wholly or in part on or after such date may not exceed 11¼ per centum per annum.

(Authority: 38 U.S.C. 1803(c)(1))

(c) Effective October 5, 1987, the interest rate on any loan solely for energy conservation improvements or other alterations, improvements or repairs, which is guaranteed or insured wholly or in part on or after such date may not exceed 12½ per centum per annum on the unpaid principal balance.

(Authority: 38 U.S.C. 1803(c)(1))

* * * * *

3. In § 36.4503, paragraph (a) is revised as follows:

§ 36.4503 Amount and amortization.

(a) The original principal amount of any loan made on or after October 1, 1980, shall not exceed an amount which bears the same ratio to $33,000 as the amount of the guaranty to which the veteran is entitled under 38 U.S.C. 1810 at the time the loan is made bears to $27,500. This limitation shall not preclude the making of advances, otherwise proper, subsequent to the making of the loan pursuant to the provisions of § 36.4511. Except as to home improvement loans, loans made by the VA shall bear interest at the rate of 11 percent per annum. Loans solely for the purpose of energy conservation improvements or other alterations, improvements, or repairs shall bear interest at the rate of 12½ percent per annum.

(Authority: 38 U.S.C. 1811(d) (1) and (2)(A))

ENVIRONMENTAL PROTECTION AGENCY

40 CFR Part 61

[FRL-3274-2]

National Emission Standards for Hazardous Air Pollutants; Amendments to General Provisions

AGENCY: Environmental Protection Agency (EPA).

ACTION: Final rule.

SUMMARY: The Environmental Protection Agency (EPA) amended Subpart A, the General Provisions for national emission standards for hazardous air pollutants (NESHAPS), on November 7, 1985 (50 FR 46284) and April 1, 1986 (51 FR 11021). The promulgated amendments included a list of substances for which EPA has published a notice that included consideration of the serious health effects, including cancer, from ambient air exposure to the substance. This notice amends this list to include additional substances.

DATE: Effective October 8, 1987.

FOR FURTHER INFORMATION CONTACT: Beth M. Hassett, Pollutant Assessment Branch, Strategies and Air Standards Division (MD–12), Office of Air Quality Planning and Standards, U.S. Environmental Protection Agency, Research Triangle Park, NC 27711; FTS 629–5346 or (919) 541–5346.

SUPPLEMENTARY INFORMATION: On November 7, 1985 (50 FR 46284) and April 1, 1986 (51 FR 11201), EPA promulgated amendments to subpart A of Part 61. These amendments included the publication of a list of substances for which the Agency has published a **Federal Register** notice which included consideration of serious health effects, including cancer, from ambient exposure to the substance. This list was published for informational purposes only. Publication of this list serves to inform the public as to the status of EPA's program for assessing potentially toxic air pollutants as well as to provide a useful reference for those **Federal Register** notices that EPA has published on potentially toxic air pollutants. This notice amends the previously published list to include recent notices which EPA has published for additional substances.

Paperwork Reduction Act

These amendments do not add any information collection burden for sources subject to standards currently in Part 61. Thus, this action is not an informational collection request under the Paperwork Reduction Act of 1980, 44 U.S.C., *et seq.*

Regulatory Flexibility Analysis Certification

Pursuant to the provisions of 5 U.S.C. 615(b), I hereby certify that these amendments to Part 61 will not have a significant economic impact on a substantial number of small entities. The amendments will not add any new regulatory requirements to Part 61; consequently, they will not add significant costs.

List of Subjects in 40 CFR Part 61

Arsenic, Asbestos, Beryllium, Benzene, Hazardous substances, Mercury, Radionuclides, Reporting and recordkeeping requirements, Vinyl chloride.

Dated: October 2, 1987.

Don R. Clay,

Acting Assistant Administrator for Air and Radiation.

PART 61—[AMENDED]

1. The authority citation for Part 61 continues to read as follows:

Authority: 42 U.S.C. 7401, 7412, 7414, 7416, and 7601.

2. Section 61.01 paragraph (b) is amended by adding the following entries alphabetically in the list of substances.

§ 61.01 Lists of pollutants and applicability of Part 61.

FEDERAL COMMUNICATIONS COMMISSION

47 CFR Part 15

[FCC 87–293]

Requirement for Submission of Circuit Diagrams for Computing Devices

AGENCY: Federal Communications Commission.

ACTION: Final rule.

SUMMARY: This action amends § 15.45 of the Commission's Rules to delete the requirement for submission of circuit diagrams for computing devices when applying for an equipment authorization.

This action is taken to reduce the collection of unnecessary information during the equipment authorization process.

This action will reduce the amount of technical information manufacturers are required to file at the FCC.

EFFECTIVE DATE: November 9, 1987.

FOR FURTHER INFORMATION CONTACT: Frank Rose, Authorization and Evaluation Division, Office of Engineering and Technology, (202) 653–6288.

SUPPLEMENTARY INFORMATION:

Order

In the matter of amendment of Part 15, § 15.45(e), to modify the requirement for submission of circuit diagrams for computing devices.

Adopted: September 10, 1987.
Released: September 24, 1987.
By the Commission.

1. By this Order, the Commission is deleting the requirement of § 15.45 of the Rules for submission of circuit diagrams for computing devices when applying for an equipment authorization under Part 15 of the Rules.

2. Circuit diagrams can be an aid in identifying a device for which an equipment authorization is requested. In addition, they can help determine if a particular device being marketed is the same as the device for which an equipment authorization was granted. In the case of computing devices, however, circuit diagrams have lost their utility. Indeed, the staff reports that circuit diagrams submitted with applications for certification of computing devices are, in almost all cases, unused. Because of the use of multilayer boards and integrated circuits in the design and assembly of computing devices, circuit diagrams bear little or no resemblance to what is observable on the circuit boards themselves. Photographs of the interiors of computing devices, as required pursuant to § 15.46 of the Rules, are sufficient for purposes of identification. In light of the Commission's limited need for circuit diagrams with computing devices, we are modifying § 15.45(e) to exclude computing devices from the requirement of § 15.45 that circuit diagrams be submitted.

3. We find that good cause exists to dispense with the notice and comment procedures of the Administrative Procedure Act. Good cause exists when, among other things, notice and comment is unnecessary, 5 U.S.C., section 553(b)(B). In this instance, we find that notice and comment rule making procedures are unnecessary for eliminating computing devices from the requirements of § 15.45. The subject

VOL 52 ISS 195 OCT 8 1987 UMI

data is only submitted for the benefit of the Commission. Yet the Commission's staff has no use for the data. Furthermore, there has never been any regulatory purpose for collecting such data for the public generally. Thus, the elimination of the rule should be non-controversial and is unlikely to elicit any adverse comments. Indeed, serious discourse on this subject is not anticipated.

4. Accordingly, it is ordered, that under the authority contained in section 4(i), 302 and 303(r) of the Commissions Act of 1934, as amended, Part 15 of the Commission's Rules is amended as set forth below. This action is effective November 9, 1987.

5. Further information on this action may be obtained from Frank Rose at 653–6288.

Federal Communications Commission.

William J. Tricarico,

Secretary.

List of Subjects in 47 CFR Part 15

Communications equipment.

Rule Change

Part 15 of Title 47 of the Code of Federal Regulations is amended as follows:

PART 15—[AMENDED]

1. The authority citation for Part 15 continues to read as follows:

Authority: Secs. 4, 303, 48 Stat. 1066, 1082, as amended; 47 U.S.C. 154, 303, unless otherwise noted. Interpret or apply sec. 301, 48 Stat. 1081; 47 U.S.C. 301.

2. Section 15.45, paragraph (e) is amended by adding the following text after the last sentence:

§ 15.45 Expository statement required.

* * * * *

(e) * * * For computing devices, as defined § 15.4, the submission of a circuit diagram is not normally required, and need only be supplied upon specific request by the Commission.

BILLING CODE 6712–01–M

GENERAL SERVICES ADMINISTRATION

48 CFR Parts 522 and 552

[Acquisition Circular AC–87–2, Supplement 1]

Annual Report From Federal Contractors

AGENCY: Office of Acquisition Policy, GSA.

ACTION: Temporary regulation.

SUMMARY: This supplement to the General Services Administration Acquisition Regulation, Acquisition Circular AC–87–2 extends the expiration date to April 1, 1988. The intended effect is to extend the policies and procedures established in AC–87–2, which revised Parts 522 and 552 of the regulation to implement the Department of Labor (DOL) regulations that require Federal contractors to submit a report at least annually to the Secretary of Labor regarding employment of Vietnam era and special disabled veterans.

DATES:

Effective date: October 1, 1987.

Expiration date: April 1, 1988.

FOR FURTHER INFORMATION CONTACT: Mr. John Joyner, Office of GSA Office of GSA Acquisition Policy and Regulations, (VP), (202) 523–4916.

SUPPLEMENTARY INFORMATION: This temporary rule was not published for public comment because it merely implements the Department of Labor regulations which have already undergone the public comment process. The Director, Office of Management and Budget (OMB), by memorandum dated December 14, 1984, exempted certain agency procurement regulations from Executive Order 12291. The exemption applies to this rule. The Secretary of Labor certified to the Chief Counsel for Advocacy, Small Business Administration, that the annual reporting requirement would not have a significant economic effect on a substantial number of small entities under the Regulatory Flexibility Act (5 U.S.C. 601 *et seq.*). Therefore, no regulatory flexibility analysis has been prepared. The information collection requirement contained in this rule has been approved by the Office of Management and Budget (OMB) under the Paperwork Reduction Act and assigned OMB Control No. 1293–0005.

List of Subjects in 48 CFR Parts 522 and 552

Government procurement.

PARTS 522 AND 552—[AMENDED]

1. The authority citation for 48 CFR Parts 522 and 552 continues to read as follows:

Authority: 40 U.S.C. 486(c).

2. 48 CFR Parts 522 and 552 are amended by the following supplement to Acquisition Circular AC–87–2.

General Services Administration Acquisition Regulation, Acquisition Circular AC–87–2; Supplement 1

To: All GSA contracting activities.

Subject: Annual Report from Federal Contractors.

1. *Purpose.* This supplement extends the expiration date of the General Services Administration Acquisition Regulation (GSAR) Acquisition Circular AC–87–2.

2. *Effective date.* October 1, 1987.

3. *Expiration date.* Acquisition Circular AC–87–2 and this supplement will expire on April 1, 1988, unless canceled earlier.

Patricia A. Szervo,

Associate Administrator for Acquisition Policy.

Proposed Rules

Federal Register
Vol. 52, No. 195
Thursday, October 8, 1987

This section of the FEDERAL REGISTER contains notices to the public of the proposed issuance of rules and regulations. The purpose of these notices is to give interested persons an opportunity to participate in the rule making prior to the adoption of the final rules.

DEPARTMENT OF AGRICULTURE

Commodity Credit Corporation

7 CFR Part 1421

Standards for Approval of Warehouses for Grain, Rice, Dry Edible Beans, and Seed

AGENCY: Commodity Credit Corporation, USDA.

ACTION: Proposed rule.

SUMMARY: This proposed rule would amend the regulations at 7 CFR 1421.5551 *et seq.* relating to the Commodity Credit Corporation (CCC) Standards for Approval of Warehouses for Grain, Rice, Dry Edible Beans, and Seed. The proposed rule would: (1) Require bonding from warehousemen in any State where the State law does not guarantee very depositor a pro rata share of the commodities or proceeds from warehouse liquidation or bankruptcy; (2) provide that CCC would charge a fee for voluntary examinations requested by a warehouseman; and, (3) provide that CCC would publish in the **Federal Register** a Schedule of Contract Fees only when there is a change in the amount of annual contract fees to be collected.

DATE: Comments must be received on or before November 9, 1987 in order to be assured of consideration.

ADDRESS: Interested persons are invited to send written comments to Paul W King, Director, Warehouse Division, Agricultural Stabilization and Conservation Service, U.S. Department of Agriculture, P.O. Box 2415, Washington, DC 20013, (202) 447–4018 or 447–7433.

FOR FURTHER INFORMATION CONTACT: Steven Closson, Chief, Storage Contract Branch, Warehouse Division, USDA, Room 5962-South Building, P.O. Box 2415, Washington, DC 20013, (202) 447–5647.

SUPPLEMENTARY INFORMATION: This proposed rule has been reviewed in conformity with Executive Order 12291 and Departmental Regulation 1512–1 and has been classified as "not major" since implementation of the provisions of this proposed rule will not result in: (1) An annual effect on the economy of $100 million or more; (2) a major increase in costs or prices for consumers, individual industries, federal, State or local governments, or geographical regions; or (3) significant adverse effects on competition, employment investment, productivity, inovation, the environment, or the ability of United States-based enterprises to compete with foreign-based enterprises in domestic or export markets.

This program is not subject to the provisions of Executive Order 12372 which requires intergovernmental consultation with State and local officials. See the Notice related to 7 CFR Part 3015, Subpart V, published at 48 FR 28115 (June 24, 1983).

It has been determined that the Regulatory Flexibility Act is not applicable to this proposed rule since CCC is not required by 5 U.S.C. 553 or any other provision of law to publish a notice of proposed rulemaking with respect to the subject matter of this proposed rule.

It has been determined by an environmental evaluation that this action will have no significant adverse impact on the quality of the human environment. Therefore, neither an Environmental Assessment nor an Environmental Impact Statement is needed.

The CCC Charter Act (15 U.S,C. 714 *et seq.*) authorizes CCC to conduct various activities to stabilize, support, and protect farm income and prices. CCC is authorized to carry out such activities as making price support available with respect to various agricultural commodities, removing and disposing of surplus agricultural commodities, exporting or adding in the exportation of agricultural commodities, and procuring agricultural commodities for sale both in the domestic market and abroad.

Section 4(h) of the CCC Charter Act provides that CCC shall not acquire real property in order to provide storage facilities for agricultural commodities, unless CCC determines that private facilities for the storage for such commodities are inadequate. Further, Section 5 of the CCC Charter Act provides that, in carrying out the Corporation's purchasing and selling operations, and in the warehousing, transporting, processing, or handling of agricultural commodities, CCC is directed to use, to the maximum extent practicable, the usual and customary channels, facilities, and arrangements of trade and commerce.

Accordingly, CCC has published Standards for Approval of Warehouses for Grain, Rice, Dry Edible Beans, and Seed which must be met by warehousemen before CCC will enter into storage agreements with such warehousemen for the storage of grain and other commodities which are owned by CCC or which are serving as collateral for CCC price support loans.

Changes in the grain warehousing industry, financial institution requirements, State warehousing laws, and federal contracting requirements during the past few years require revision of the Standards for Approval of Warehouses for Grain, Rice Dry Edible Beans, and Seed.

The number of grain warehouse bankruptcies over the past few years has steadily increased with 67 grain warehouse bankruptcies recorded in 1985. These bankruptcies have increased the risk of loss to CCC and other depositors and in some cases caused serious financial losses. These warehouse bankruptcies have occurred in several different States with the legal prcceedings to satisfy claims against a warehouse varying from State to State. Some State laws governing warehouse bankrupticies do not specifically state that every depositor will receive a pro rata share of the commodities remaining in storage or guarantee to every grain depositor a pro rata share of bonding or other deposits posted by the warehouseman to assure compliance with the Standards for Approval of Warehouses for Grain, Rice, Dry Edible Beans, and Seed. Other State laws set a maximum monetary amount or a maximum percentage amount that each grain depositor can receive against a total claim. Since CCC is often the largest grain depositor in a warehouse, these State laws adversely affect CCC's chances of receiving a fair settlement.

In order to reduce the vulnerability of losses to CCC and other grain depositors as a result of warehouse failures, it is propsed that a bond or other security be required for all CCC approved grain warehouses licensed in

VOL 52 ISS 195 OC 8 1987 UMI

those States where existing laws governing warehouse bankruptcies do not guarantee to each depositor: (1) A pro rata share of the commodities remaining in storage; (2) a pro rata share of the bonding or other deposits posted by the warehouseman as required by any State licensing authority and any deficiency bonds or other security required to be in compliance with this subpart; and (3) that the full pro rata share will not be reduced because the State law sets a maximum dollar or percentage limit that any creditor may receive. The amount of bond required will not exeed the amount grain warehousemen must obtain to be licensed under the United States Warehouse Act. CCC also proposes to assess a fee for all warehouse examinations that CCC conducts solely for the benefit of a warehouseman. Some warehousemen request that CCC conduct a warehouse examination of the facility in order to enable them to: (1) Meet requests or requirements of depositors or lending agencies; (2) determine the quantity and quality of grain in storage; (3) determine whether the quantity and quality of grain in storage is sufficient to meet outstanding storage obligations; or (4) have an independent physical inventory coinciding with an end of fiscal year audit.

Under this proposal, CCC contemplates that a warehouseman would submit a written request for such an examination stating the purposes of the examination and agreeing to pay the prescribed fee.

The warehouse contract fees are calculated at ½ of the actual cost of conducting a warehouse examination, administering the storage contract, and determining the net worth. Since a requested examination does not require a net worth determination and certain other administrative procedures, the actual cost of such examinations is calculated at 1½ times the annual contract fee.

It is also proposed that CCC publish the contract fee schedule in the **Federal Register** only when there is a change in the amount of contract fee to be collected. Presently, CCC publishes the contract fee schedule in the **Federal Register** each year prior to the annual contract renewal date even when there are no changes in the fee schedule. This practice is time consuming and increases the costs to CCC. It is therefore proposed that the contract fee schedule be published only when there are changes in the amount of contract fee to be collected from CCC approved warehousemen.

List of Subjects in 7 CFR Part 1421

Grain, Loan programs, Agriculture, Oilseeds, Peanuts, Price support programs, Soybeans, Surety bonds, Tobacco, and Warehouses.

Proposed Rule

PART 1421—[AMENDED]

Accordingly, it is proposed that 7 CFR Part 1421 be amended as follows:

1. The authority citation for 7 CFR Part 1421, Standards for Approval of Warehouses for Grain, Rice, Dry Edible Beans, and Seed continues to read as follows:

Authority: Secs. 4 and 5 of the Commodity Credit Corporation Charter Act, as amended, 62 State. 1070, as amended, 1072 (15 U.S.C. 714b and 714c); secs. 101, 201, 301, 401, 403, and 405 of the Agricultural Act of 1949, as amended, 63 Stat. 1051, as amended, 1052, as amended, 1053, as amended, 1054, as amended (7 U.S.C. 1441, 1446, 1447, 1421, 1423, and 1425); secs. 101A, 105C, and 107D of Pub. L. 99–198, unless otherwise noted.

2. In § 1421.5552, a new paragraph (a)(10) is added to read as follows:

§ 1421.5552 Basic standards

* * * * *

(a) * * *

(10) Furnish a warehouse bond, payable to CCC, if the warehouse is located in a State where laws governing warehouse liquidations in case of shortages in quality or quantity do not guarantee to each depositor:

(i) A pro rata share of the commodities remaining in storage;

(ii) A pro rata share of the bonding or other deposits posted by the warehouseman as required by any State licensing authority and any deficiency bond or other security required to be posted by the warehouseman; and

(iii) That the full pro rata share of proceeds available to depositors will not be reduced by a maximum dollar or percentage limit posted by the State. The amount of bond required will not exceed the amount a grain warehouseman must obtain to be licensed under the United States Warehouse Act at 7 CFR 736.

3. In § 1421.5558, a new paragraph (a)(4) is added and paragraph (b) is revised to read as follows:

§ 1421.5558 Contract and application and inspection fees.

(a) * * *

(4) CCC may, upon the request of a warehouseman, conduct an examination of a warehouse for the sole benefit of the warehouseman and such warehouseman shall pay to CCC a fee equal to 1½ times the amount of the warehouseman's annual contract fee for such examination.

(b) Any subsequent changes in the contract and application fees shall be announced in the **Federal Register**.

Signed at Washington, DC on September 29, 1987.

Milton Hertz,

Executive Vice President, Commodity Credit Corporation.

BILLING CODE 3410–05–M

DEPARTMENT OF TRANSPORTATION

Federal Aviation Administration

14 CFR Part 39

[Docket No. 87–NM–118–AD]

Airworthiness Directives; Boeing Model 757 Series Airplanes

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Notice of Proposed Rulemaking (NPRM).

SUMMARY: This notice proposes a new airworthiness directive (AD), applicable to certain Boeing 757 series airplanes, which would require modification of the hydraulic power auxiliary ram air turbine deploy mode wiring. This proposal is prompted by reports of inadvertent ram air turbine deployment on the ground while parked, due to false actuation of the airspeed switch, and inhibition of deployment during flight at low airspeeds. This condition, if not corrected, could lead to injury of ground personnel or loss of hydraulic flight controls during low speed operations following loss of two engines.

DATE: Comments must be received no later than November 10, 1987.

ADDRESSES: Send comments on the proposal in duplicate to Federal Aviation Administration, Northwest Mountain Region, Office of the Regional Counsel (Attn: ANM–103), Attention: Airworthiness Rules Docket No. 87–NM–118–AD, 17900 Pacific Highway South, C–68966, Seattle, Washington 98168. The applicable service information may be obtained from the Boeing Commercial Airplane Company, P.O. Box 3707, Seattle, Washington 98124. This information may be examined at the FAA, Northwest Mountain Region, 17900 Pacific Highway South, Seattle, Washington, or the Seattle Aircraft Certification Office, 9010 East Marginal Way South, Seattle, Washington.

FOR FURTHER INFORMATION CONTACT: Mr. Robert McCracken, Systems and

Equipment Branch, ANM–130S; telephone (206) 431–1947. Mailing address: FAA, Northwest Mountain Region, 17900 Pacific Highway South, C–68966, Seattle, Washington 98168.

SUPPLEMENTARY INFORMATION:

Comments Invited

Interested persons are invited to participate in the making of the proposed rule by submitting such written data, views, or arguments as they may desire. Communications should identify the regulatory docket number and be submitted in duplicate to the address specified above. All communications received on or before the closing date for comments specified above will be considered by the Administrator before taking action on the proposed rule. The proposals contained in this Notice may be changed in light of the comments received. All comments submitted will be available, both before and after the closing date for comments, in the Rules Docket for examination by interested persons. A report summarizing each FAA/public contact concerned with the substance of this proposal will be filed in the Rules Docket.

Availability of NPRM

Any person may obtain a copy of this Notice of Proposed Rulemaking (NPRM) by submitting a request to the FAA, Northwest Mountain Region, Office of the Regional Counsel (Attn: ANM–103), Attention: Airworthiness Rules Docket No. 87–NM–118–AD, 17900 Pacific Highway South, C–68966, Washington 98168.

Discussion

One operator of a Boeing Model 757 airplane has reported two occurrences of inadvertent ram air turbine deployment on the ground while parked, due to false actuation of the airspeed switch by taxing aircraft jet blast. Additionally, three operators have reported eleven occurances of contaminated airspeed switches resulting in ram air turbine deploy inhibition at lower airspeeds up to as high as 210 knots. Inadvertent actuation on the ground could result in injury to personnel. Failure to deploy at low airspeeds when needed could result in loss of hydraulic power for the flight controls and inability to control the airplane following loss of two engines.

The FAA has reviewed and approved Boeing Alert Service Bulletin 757–29A0032, dated July 9, 1987, which describes modifications to the ram air turbine manual and automatic deploy circuits. Addition of an air/ground input to the automatic deploy circuit removes power from the airspeed switch during actuation, which will improve airspeed switch reliability and inhibit deployment on the ground. Removal of the airspeed switch from the manual deploy circuit will improve overall deploy reliabilty.

Since this condition is likely to exist or develop on other airplanes of this same type design, an AD is proposed which would require modification of the ram air turbine electrical circuitry in accordance with the service bulletin previously mentioned.

It is estimated that 81 airplanes of U.S. registry would be affected by this AD, that it would take approximately 30 manhour per airplane to accomplish the required actions, and that the average labor cost would be $40 per manhour. Based on these figures, the total cost impact of the AD on U.S. operators is estimated to be $97,200.

For these reasons, the FAA has determined that this document (1) involves a proposed regulation which is not major under Executive Order 12291 and (2) is not a significant rule pursuant to the Department of Transportation Regulatory Policies and Procedures (44 FR 11034; February 26, 1979); and it is further certified under the criteria of the Regulatory Flexibility Act that this proposed rule, if promulgated, will not have a significant economic impact on a substantial number of small entities because few, if any, Boeing Model 757 airplanes are operated by small entities. A copy of a draft regulatory evaluation prepared for this action is contained in the regulatory docket.

List of Subjects in 14 CFR Part 39

Aviation safety, Aircraft.

The Proposed Amendment

Accordingly, pursuant to the authority delegated to me by the Administrator, the Federal Aviation Administration proposes to amend § 39.13 of Part 39 of the Federal Aviation Regulations (14 CFR 39.13) as follows:

PART 39—[AMENDED]

1. The authority citation for Part 39 continues to read as follows:

Authority: 49 U.S.C. 1354(a), 1421 and 1423; 49 U.S.C. 106(g) (Revised Pub. L. 97–449, January 12, 1983); and 14 CFR 11.89.

§ 39.13 [Amended]

2. By adding the following new airworthiness directive:

Boeing: Applies to Model 757 series airplanes, as listed in Boeing Alert Service Bulletin 757–29A0032, dated July 9, 1987, certificated in any category. Compliance required within the next six months after the effective date of this AD, unless previously accomplished.

To prevent inadvertent ram air turbine deployment on the ground while parked, and to ensure proper deployment in flight, accomplish the following:

A. Modify the ram air turbine wiring in accordance with Boeing Alert Service Bulletin 757–29A0032, dated July 9, 1987, or later FAA-approved revision.

B. An alternate means of compliance or adjustment of the compliance time, which provides an acceptable level of safety, may be used when approved by the Manager, Seattle Aircraft Certification Office, FAA, Northwest Mountain Region.

C. Special flight may be issued in accordance with FAR 21.197 and 21.199 to operate airplanes to a base in order to comply with the requirements of this AD.

All persons affected by this directive who have not already received the appropriate service documents from the manufacturer may obtain copies upon request to Boeing Commercial Airplanes Company, P.O. Box 3707, Seattle, Washington 98124. These documents may be examined at the FAA, Northwest Mountain Region, 17900 Pacific Highway South, Seattle, Washington, or the Seattle Aircraft Certification Office, 9010 East Marginal Way South, Seattle, Washington.

Issued in Seattle, Washington, on September 11, 1987.

Wayne J. Barlow,

Director Northwest Mountain Region.

[FR Doc. 87–23250 Filed 10–7–87; 8:45 am]

BILLING CODE 4910–13–M

---

14 CFR Part 39

[Docket No. 87–NM–115–AD]

Airworthiness Directives; Shorts Brothers Model SD3–60 Series Airplanes

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Notice of Proposed Rulemaking (NPRM).

SUMMARY: This notice proposes an airworthiness directive (AD), applicable to certain Short Brothers Model SD3–60 series airplanes, that would require modification of an aileron control lever and bracket. This action is necessary to prevent incorrect installation of an aileron control lever and attaching rods. Improper installation of the lever and rods would cause an increase in aileron control forces and improper control surface travel.

VOL 52 ISS 195 OCT 8 1987 UMI

DATE: Comments must be received no later than November 9, 1987.

ADDRESSES: Send comments on the proposal in duplicate to the Federal Aviation Administration, Northwest Mountain Region, Office of the Regional Counsel (Attention: ANM-103), Attention: Airworthiness Rules Docket No. 87-NM-115-AD), 17900 Pacific Highway South, C-68966, Seattle, Washington 98168. The applicable service information may be obtained from Shorts Brothers PLC, 2011 Crystal Drive, Suite 713, Arlington, Virginia 22202-3702. This information may be examined at the FAA, Northwest Mountain Region, 17900 Pacific Highway South, Seattle, Washington, or the Seattle Aircraft Certification Office, 9010 East Marginal Way South, Seattle, Washington.

FOR FURTHER INFORMATION CONTACT: Ms. Judy Golder, Standardization Branch, ANM-113; telephone (206) 431-1967. Mailing address: FAA, Northwest Mountain Region, 17900 Pacific Highway South, C-68966, Seattle, Washington 98168.

SUPPLEMENTARY INFORMATION:

Comments Invited

Interested persons are invited to participate in the making of the proposed rule by submitting such written data, views, or arguments as they may desire. Communications should identify the regulatory docket number and be submitted in duplicate to the address specified above. All communications received on or before the closing date for comments specified above will be considered by the Administrator before taking action on the proposed rule. The proposals contained in this Notice may be changed in light of the comments received. All comments submitted will be available, both before and after the closing date for comments, in the Rules Docket for examination by interested persons. A report summarizing each FAA-public contact concerned with the substance of this proposal will be filed in the Rules Docket.

Availability of NPRM

Any person may obtain a copy of this Notice of Proposed Rulemaking (NPRM) by submitting a request to the FAA, Northwest Mountain Region, Office of the Regional Counsel (Attention: ANM-103), Attention: Airworthiness Rules Docket No. 87-NM-115-AD, 17900 Pacific Highway South, C-68966, Seattle, Washington 98168.

Discussion

The United Kingdom Civil Aviation Authority (CAA) has, in accordance with existing provisions of a bilateral airworthiness agreement, notified the FAA of an unsafe condition which may exist or develop on certain Short Brothers Model SD3-60 series airplanes. It has been reported that improper installation of an aileron control level could occur which would result in increased aileron control system forces and improper aileron travel. Short Brothers issued Service Bulletin SD360-27-09, Revision 3, dated November 1986, which describes a modification that would prevent this from occurring. The CAA has declared Short Brothers service bulletin as mandatory.

The re-assembling of the aileron rods to the lever normally occurs during maintenance operations, but the SD3-60 maintenance manual does not highlight the possibility of incorrect installation of the aileron rods. Therefore, the FAA is proposing to require installation of modification kit No. SD360-27-09, in accordance with the Short Brothers service bulletin described previously, which would prevent incorrect installation of the aileron rods.

This airplane model is manufactured in the United Kingdom and type certificated in the United States under the provisions of section 21.29 of the Federal Aviation Regulations and the applicable bilateral airworthiness agreement.

Since this condition is likely to exist or develop on airplanes of this model registered in the United States, an AD is proposed that would require modification of the aileron controls in accordance with the previously mentioned service bulletin.

It is estimated that 42 airplanes of U.S. registry would be affected by this AD, that it would take approximately 14 manhours per airplane to accomplish the required actions, and that the average labor cost would be $40 per manhour. Estimated cost of parts is $50.00 per airplane. Based on these figures, the total cost impact of this AD to U.S. operators is estimated to be $25,620.

For the reasons discussed above, the FAA has determined that this document (1) involves a proposed regulation which is not major under Executive Order 12291 and (2) is not a significant rule pursuant to the Department of Transportation Regulatory Policies and Procedures (44 FR 11034; February 26, 1979); and it is further certified under the criteria of the Regulatory Flexibility Act that this proposed rule, if promulgated, will not have a significant economic impact on a substantial number of small entities because of the minimal cost of compliance per airplane ($610). A copy of a draft regulatory evaluation prepared for this action is contained in the regulatory docket.

List of Subjects in 14 CFR Part 39

Aviation safety, Aircraft.

The Proposed Amendment

Accordingly, pursuant to the authority delegated to me by the Administrator, the Federal Aviation Administration proposes to amend § 39.13 of Part 39 of the Federal Aviation Regulations as follows:

PART 39—[AMENDED]

1. The authority citation for Part 39 continues to read as follows:

Authority: 49 U.S.C. 1354(a), 1421 and 1423; 49 U.S.C. 106(g) (Revised Pub. L. 97-449, January 12, 1983); and 14 CFR 11.89.

§ 39.13 [Amended]

2. By adding the following new airworthiness directive:

Shorts Brothers PLC: Applies to Model SD3-60 series airplanes, Serial Numbers SH3601 through SH3676, certificated in any category. Compliance required as indicated, unless previously accomplished.

To prevent incorrect installation of aileron control levers and rods, which would result in increased aileron control forces and improper aileron travel, accomplish the following:

A. Within the next 4,800 flight hours after the effective date of this AD or at the next time the aileron control system is disassembled following 90 days after the effective date of this AD, whichever occurs first, install the guards (plates) in the aileron control system, as described in the Accomplishment Instructions of Shorts Service Bulletin No. SD360-27-09, Revision No. 3, dated November 1986.

B. An alternate means of compliance or adjustment of the compliance time, which provides an acceptable level of safety, may be used when approved by the Manager, Standardization Branch, ANM-113, FAA, Northwest Mountain Region.

C. Special flight permits may be issued in accordance with FAR 21.197 and 21.199 to operate airplanes to base for the accomplishment of the modification required by this AD.

All persons affected by this directive who have not already received the appropriate service information from the manufacturer may obtain copies upon request to Shorts Brothers PLC, 2011 Crystal Drive, Suite 713, Arlington, Virginia 22202-3702. This information may be examined at the FAA, Northwest Mountain Region, 17900 Pacific Highway South, Seattle, Washington, or at the Seattle Aircraft

Certification Office, 9010 East Marginal Way South, Seattle, Washington.

Issued in Seattle, Washington, on September 21, 1987.

Frederick M. Isaac,

Acting Director, Northwest Mountain Region.

[Docket No. 87-NM-83-AD]

Airworthiness Directives; British Aerospace (BAe) 125-800 Model Airplanes

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Notice of Proposed Rulemaking (NPRM).

SUMMARY: This notice proposes an airworthiness directive (AD), applicable to all BAe 125-800 series airplanes, that would require inspection of the plumbing near the ventral fuel tank, and repair, if necessary. This action is prompted by a report of chafing between fuel, oxygen and hydraulic lines. This condition, if not corrected, could result in a fire hazard due to subsequent system leakage.

DATE: Comments must be received no later than November 9, 1987.

ADDRESSES: Send comments on the proposal in duplicate to the Federal Aviation Administration, Northwest Mountain Region, Office of the Regional Counsel (Attention: ANM-103), Attention: Airworthiness Rules Docket No. 87-NM-83-AD, 17900 Pacific Highway South, C-68966, Seattle, Washington 98168. The applicable service information may be obtained from British Aerospace Librarian for Service Bulletins, P.O. Box 17414, Dulles International Airport, Washington D.C. 20041. This information may be examined at the FAA, Northwest Mountain Region, 17900 Pacific Highway South, Seattle, Washington, or the Seattle Aircraft Certification Office, 9010 East Marginal Way South, Seattle, Washington.

FOR FURTHER INFORMATION CONTACT: Ms. Judy Golder, Standardization Branch, Seattle Aircraft Certification Office, ANM-113; telephone (206) 431-1967. Mailing address: FAA, Northwest Mountain Region, 17900 Pacific Highway South, C-68966, Seattle, Washington 98168.

SUPPLEMENTARY INFORMATION:

Comments Invited

Interested persons are invited to participate in the making of the proposed rule by submitting such written data, views, or arguments as they may desire. Communications should identify the regulatory docket number and be submitted in duplicate to the address specified above. All communications received on or before the closing date for comments specified above will be considered by the Administrator before taking action on the proposed rule. The proposals contained in this Notice may be changed in light of the comments received. All comments submitted will be available, both before and after the closing date for comments, in the Rules Docket for examination by interested persons. A report summarizing each FAA-public contact concerned with the substance of this proposal will be filed in the Rules Docket.

Availability of NPRM

Any person may obtain a copy of this Notice of Proposed Rulemaking (NPRM) by submitting a request to the FAA, Northwest Mountain Region, Office of the Regional Counsel (Attention: ANM-103), Attention: Airworthiness Rules Docket No. 87-NM-83-AD, 17900 Pacific Highway South, C-68966, Seattle, Washington 98168.

Discussion

The United Kingdom Civil Aviation Authority (CAA) has, in accordance with existing provisions of a bilateral airworthiness agreement, notified the FAA of a potential for interference between fuel, oxygen and hydraulic piping in an area near the ventral fuel tank. The resultant chafing, if not corrected, could cause a fire hazard due to system leaks. British Aerospace (BAe) issued Service Bulletin 53-60, dated November 8, 1985, which describes procedures for inspection of the piping and repair, if necessary. The CAA has classified this service bulletin as mandatory.

This airplane model is manufactured in the United Kingdom and type certificated in the United States under the provisions of section 21.29 of the Federal Aviation Regulations and the applicable bilateral airworthiness agreement.

Since these conditions are likely to exist or develop on airplanes of this model registered in the United States, an AD is proposed that would require inspection of the fuel, oxygen, and hydraulic lines, and repair, as necessary, in accordance with the service bulletin previously mentioned.

It is estimated that 420 airplanes of U.S. registry would be affected by this AD, that it would take approximately 0.5 manhours per airplane to accomplish the required actions, and that the average labor cost would be $40 per manhour. Based on these figures, the total cost impact of this AD to U.S. operators is estimated to be $8,400.

For the reasons discussed above, the FAA has determined that this document (1) involves a proposed regulation which is not major under Executive Order 12291 and (2) is not a significant rule pursuant to the Department of Transportation Regulatory Policies and Procedures (44 FR 11034; February 26, 1979); and it is further certified under the criteria of the Regulatory Flexibility Act that this proposed rule, if promulgated, will not have a significant economic impact on a substantial number of small entities because of the minimal cost of compliance per airplane ($20). A copy of a draft regulatory evaluation prepared for this action is contained in the regulatory docket.

Aviation safety, Aircraft.

The Proposed Amendment

Accordingly, pursuant to the authority delegated to me by the Administrator, the Federal Aviation Administration proposes to amend § 39.13 of Part 39 of the Federal Aviation Regulations as follows:

PART 39—[AMENDED]

1. The authority citation for Part 39 continues to read as follows:

Authority: 49 U.S.C. 1354(a), 1421 and 1423; 49 U.S.C. 106(g) (Revised Pub. L. 97-449, January 12, 1983); and 14 CFR 11.89.

§ 39.13 [Amended]

2. By adding the following new airworthiness directive:

British Aerospace: Applies to Model BAe 125-800 airplanes certificated in any category. Compliance required within 90 days after the effective date of this AD, unless previously accomplished.

To reduce the risk of leakage from fuel, oxygen, and hydraulic systems and the fire and functional risks such leaks could present, accomplish the following:

A. Inspect the plumbing in the area of the ventral fuel tanks, and repair as necessary, in accordance with British Aerospace Service Bulletin 53-60, dated November 8, 1985.

B. An alternate means of compliance or adjustment of the compliance time, which provides an acceptable level of safety, may be used when approved by the Manager, Standardization Branch, ANM-113, FAA, Northwest Mountain Region.

C. Special flight permits may be issued in accordance with FAR 21.197 and 21.199 to operate airplanes to a base for the accomplishment of inspections and/or modification required by this AD.

VOL 52 ISS 195 OC 8 1987 UMI

All persons affected by this proposal who have not already received the appropriate service documents from the manufacturer may obtain copies upon request to British Aerospace Librarian for Service Bulletins, P.O. Box 17414, Dulles International Airport, Washington, DC 20041. These documents may be examined at the FAA, Northwest Mountain Region, 17900 Pacific Highway South, Seattle, Washington, or at the Seattle Aircraft Certification Office, 9010 East Marginal Way South, Seattle, Washington.

Issued in Seattle, Washington, on September 21, 1987.

14 CFR Part 39

[Docket No. 87-NM-111-AD]

Airworthiness Directives; Shorts Model SD3-60 Series Airplanes

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Notice of Proposed Rulemaking (NPRM).

SUMMARY: This notice proposes an airworthiness directive (AD), applicable to all Shorts Model SD3-60 series airplanes, that would require inspection of interference bushings for looseness in each of four fittings on the rear fuselage used for attachment of the horizontal stabilizer. This proposal is prompted by a report of an interference fit bushing that was found to be loose in its fitting on the forward right stabilizer attachment located on the rear fuselage cant frame. This condition, if not corrected, could lead to failure of the horizontal stabilizer attachment fittings.

DATE: Comments must be received no later than November 9, 1987.

ADDRESSES: Send comments on the proposal in duplicate to the Federal Aviation Administration, Northwest Mountain Region, Office of the Regional Counsel (Attention: ANM-103), Attention: Airworthiness Rules Docket No. 87-NM-111-AD, 17900 Pacific Highway South, C-68966, Seattle, Washington 98168. The applicable service information may be obtained from Short Brothers PLC, 2011 Crystal Drive, Suite 713, Arlington, Virginia 22202-3702. This information may be examined at the FAA, Northwest Mountain Region, 17900 Pacific Highway South, Seattle, Washington, or the Seattle Aircraft Certification Office, 9010 East Marginal Way South, Seattle, Washington.

FOR FURTHER INFORMATION CONTACT: Ms. Judy Golder, Standardization Branch, ANM-113; telephone (206) 431-1967. Mailing address: FAA, Northwest Mountain Region, 17900 Pacific Highway South, C-68966, Seattle, Washington 98168.

SUPPLEMENTARY INFORMATION:

Comments Invited

Interested persons are invited to participate in the making of the proposed rule by submitting such written data, views, or arguments as they may desire. Communications should identify the regulatory docket number and be submitted in duplicate to the address specified above. All communications received on or before the closing date for comments specified above will be considered by the Administrator before taking action on the proposed rule. The proposals contained in this Notice may be changed in light of the comments received. All comments submitted will be available, both before and after the closing date for comments, in the Rules Docket for examination by interested persons. A report summarizing each FAA-public contact concerned with the substance of this proposal will be filed in the Rules Docket.

Availability of NPRM

Any person may obtain a copy of this Notice of Proposed Rulemaking (NPRM) by submitting a request to the FAA, Northwest Mountain Region, Office of the Regional Counsel (Attention: ANM-103), Attention: Airworthiness Rules Docket No. 87-NM-111-AD, 17900 Pacific Highway South, C-68966, Seattle, Washington 98168.

Discussion

The Civil Aviation Authority (CAA), which is the airworthiness authority of the United Kingdom, has notified the FAA of an unsafe condition which may exist on Shorts Model SD3-60 series airplanes. There has been a report of an interference fit bushing that was found to be loose. This bushing was located on one of four fittings on the rear fuselage cant frame used for the attachment of the horizontal stabilizer. This condition, if not corrected, could lead to failure of the horizontal stabilizer attachment fittings.

Shorts has issued Service Bulletin Number SD360-55-10, dated November 1985, which describes procedures for inspection and replacement of the interference fit bushings in each of the four horizontal stabilizer attachment fittings. The British CAA has classified this service bulletin as mandatory.

This airplane model is manufactured in the United Kingdom and type certificated in the United States under the provisions of Section 21.29 of the Federal Aviation Regulations and the applicable bilateral airworthiness agreement.

Since these conditions are likely to exist or develop on airplanes of this model registered in the United States, an AD is proposed that would require inspection of the horizontal stabilizer attachment fittings in accordance with the service bulletin previously mentioned. Fittings found with a loose bushing that exceeds 0.005 inches movement would be required to be replaced prior to further flight. Fittings with a loose bushing that does not exceed 0.005 inches movement would be required to be replaced within 56 days.

It is estimated that 66 airplanes of U.S. registry would be affected by this AD, that it would take approximately 4 manhours per airplane to accomplish the required actions, and that the average labor cost would be $40 per manhour. Based on these figures, the total cost impact of this AD to U.S. operators is estimated to be $10,560.

For the reasons discussed above, the FAA has determined that this document (1) involves a proposed regulation which is not major under Executive Order 12291 and (2) is not a significant rule pursuant to the Department of Transportation Regulatory Policies and Procedures (44 FR 11034; February 26, 1979); and it is further certified under the criteria of the Regulatory Flexibility Act that this proposed rule, if promulgated, will not have a significant economic impact on a substantial number of small entities because of the minimal cost of compliance per airplane ($160). A copy of a draft regulatory evaluation prepared for this action is contained in the regulatory docket.

List of Subjects in 14 CFR Part 39

Aviation safety, Aircraft.

The Proposed Amendment

Accordingly, pursuant to the authority delegated to me by the Administrator, the Federal Aviation Administration proposes to amend § 39.13 of Part 39 of

the Federal Aviation Regulations as follows:

PART 39—[AMENDED]

1. The authority citation for Part 39 continues to read as follows:

Authority: 49 U.S.C. 1354(a), 1421 and 1423; 49 U.S.C. 106(g) (Revised Pub. L. 97–449, January 12, 1983); and 14 CFR 11.89.

§ 39.13 [Amended]

2. By adding the following new airworthiness directive:

Short Brothers: Applies to Model SD3–60 series airplanes, as listed in Shorts Service Bulletin Number SD360–55–10, dated November 1985, certificated in any category. Compliance required as indicated, unless previously accomplished.

To preclude failure of the horizontal stabilizer attach fittings, accomplish the following:

A. Within the next 3 months after the effective date of this AD, inspect the interference fit bushings in each of the four horizontal stabilizer attach fittings in accordance with Shorts Service Bulletin Number SD360–55–10, dated November 1985.

B. If the bushing is found to be loose in its fitting and the movement exceeds 0.005 inches, replace the fitting before further flight.

C. If the bushing is found to be loose in its fitting and the movement does not exceed 0.005 inches, replace the fitting within the next 56 days.

D. An alternate means of compliance or adjustment of the compliance time, which provides an acceptable level of safety, may be used when approved by the Manager, Standardization Branch, ANM–113, FAA, Northwest Mountain Region.

E. Special flight permits may be issued in accordance with FAR 21.197 and 21.199 to operate airplanes to a base for the accomplishment of the requirements of this AD.

All persons affected by this directive who have not already received the appropriate service documents from the manufacturer may obtain copies upon request to Short Brothers PLC, 2011 Crystal Drive, Suite 713, Arlington Virginia 22202–3702. These documents may be examined at the FAA, Northwest Mountain Region, 17900 Pacific Highway South, Seattle, Washington, or at the Seattle Aircraft Certification Office, 9010 East Marginal Way South, Seattle, Washington.

Issued in Seattle, Washington, on September 21, 1987.

Frederick M. Isaac,

Acting Director, Northwest Mountain Region.

BILLING CODE 4910–13–M

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Social Security Administration

20 CFR Part 416

[Regulations No. 16]

Supplementary Security Income for the Aged, Blind, and Disabled; Definition of Resources

AGENCY: Social Security Administration, HHS.

ACTION: Proposed rule.

SUMMARY: We propose to amend our regulations to exclude from the definition of resources in the Supplemental Security Income (SSI) Program, for one calendar month following their receipt, certain cash payments for medical or social services.

DATE: To be sure that your comments are considered, we must receive them no later than December 7, 1987.

ADDRESSES: Comments should be submitted in writing to the Commissioner of Social Security, Department of Health and Human Services, P.O. Box 1585, Baltimore, Maryland 21203, or delivered to the Office of Regulations, Social Security Administration, 3–B–4 Operations Building, 6401 Security Boulevard, Baltimore, Maryland 21235, between 8:00 a.m. and 4:30 p.m. on regular business days. Comments received may be inspected during these same hours by making arrangements with the contact person shown below.

FOR FURTHER INFORMATION CONTACT: Henry D. Lerner, Legal Assistant, Office of Regulations, Social Security Administration, 6401 Security Boulevard, Baltimore, Maryland 21235, telephone (301) 594–7463.

SUPPLEMENTARY INFORMATION: Certain cash payments intended specifically to enable people to pay for medical or social services (20 CFR 416.1103 (a) and (b)) are not income for SSI purposes because they are assumed not to be available for support and maintenance. However, the recipient is not always able to use the cash for payment of medical or social services in the month of receipt. Lacking a regulatory resource provision for medical or social services comparable to that for income, the cash is a countable resource as of the first moment of the month following receipt and may cause ineligibility for SSI benefits.

Resources are defined in regulations (20 CFR 416. 1201(a)) as including cash or other liquid assets that an individual owns and can use for support and maintenance. Thus, even though intended for the purchase of medical or social services, cash meets the definition of a resource unless its use is legally restricted.

We propose to amend 20 CFR 416.1201(a) so that, for one calendar month following its receipt, cash which is not income under 20 CFR 416.1103 (a) or (b) because it is payment for medical or social services is not a resource. If the cash is still being held at the beginning of the second calendar month following its receipt, it will be a resource. This proposal does not extend to cash received as reimbursement for medical or social services bills the individual has already paid. Even though such reimbursement is not income by operation of 20 CFR 416.1103 (a) or (b), it serves only to replace the individual's previously countable resources that have been used to pay for medical or social services prior to receipt of the reimbursement. Since the individual has already paid for the medical or social services, there is no reason for extending to the reimbursement the one-month disbursement period during which cash received for medical or social services is not a resource. Thus, if retained, the cash is included in countable resources beginning with the first month following receipt.

This proposal recognizes that it is not reasonable to expect an individual to use certain funds for support and maintenance. To use these funds for support and maintenance tends to thwart the purpose of the payor program and could result in individuals having to do without needed services that the payor program intended to provide. The proposal allows a reasonable period for individuals to make disbursement, but if they do not do so, the money becomes a resource.

Regulatory Procedures

Executive Order 12291

The Secretary has determined that this is not a major rule under Executive Order 12291 since the program and administrative costs of this proposed regulation will be insignificant and the threshold criteria for a major rule are not otherwise met. Therefore, a regulatory impact analysis is not required.

Paperwork Reduction Act

This proposed regulation imposes no additional reporting and recordkeeping requirement requiring Office of Management and Budget clearance.

Regulatory Flexibility Act

We certify that this proposed regulation will not, if promulgated, have a significant economic impact on a substantial number of small entities because this rule affects only individuals and States. Therefore, a regulatory flexibility analysis as provided in Pub. L. 96–354, the Regulatory Flexibility Act, is not required.

(Catalog of Federal Domestic Assistance Program No. 13.807, Supplementary Security Income Program).

List of Subjects in 20 CFR Part 416

Administrative practice and procedure, Aged, Blind, Disability benefits, Public assistance programs, Supplemental security income.

Dated: August 3, 1987.

Dorcas R. Hardy,

Commissioner of Social Security.

Approved: September 4, 1987.

Otis R. Bowen,

Secretary of Health and Human Services.

PART 416—[AMENDED]

Subpart L of Part 416 of Chapter III of Title 20 of the Code of Federal Regulations is proposed to be amended as follows:

1. The authority citation for Subpart L of Part 416 continues to read as follows:

Authority: Secs. 1102, 1602, 1611, 1612, 1613, 1614(f), 1621 and 1631 of the Social Security Act; 42 U.S.C. 1302, 1381a, 1382, 1382a, 1382b, 1382c(f), 1382j and 1383; sec. 211 of Pub. L. 93–66, 87 Stat. 154.

2. Section 416.1201 is amended by revising paragraph (a) to read as follows:

§ 416.1201 Resources; general.

(a) *Resources; defined.* For purposes of this Subpart L, resources means cash or other liquid assets or any real or personal property that an individual (or spouse, if any) owns and could convert to cash to be used for his or her support and maintenance.

(1) If the individual has the right, authority or power to liquidate the property or his or her share of the property, it is considered a resource. If a property right cannot be liquidated, the property will not be considered a resource of the individual (or spouse).

(2) Support and maintenance assistance not counted as income under § 416.1157(c) will not be considered a resource.

(3) Except for cash reimbursement of medical or social services expenses already paid for by the individual, cash received for medical or social services that is not income under § 416.1103 (a) or (b) is not a resource for the calendar month following the month of its receipt. However, cash retained until the first moment of the second calendar month following its receipt is a resource at that time.

BILLING CODE 4190–11–M

INTER-AMERICAN FOUNDATION

22 CFR Part 1001

Employee Responsibilities and Conduct

AGENCY: Inter-American Foundation.

ACTION: Proposed rule.

SUMMARY: This notice invites written comments on the Inter-American Foundation's proposal to amend and clarify its Employee Responsibilities and Conduct. The Inter-American Foundation proposes to take this action so that employees of the Foundation will have a clear understanding of their responsibilities with respect to federal ethics laws and regulations. The Inter-American Foundation finds and determines that publication of these regulations in the Code of Federal Regulations is necessary for the effective discharge of its functions and activities.

DATE: Comments must be received on or before November 9, 1987.

ADDRESS: Comments may be mailed to the General Counsel, 5th Floor, Inter-American Foundation, 1515 Wilson Boulevard, Arlington, VA 22209, or delivered to the same address between the hours of 8:30 a.m. and 5:15 p.m.

FOR FURTHER INFORMATION CONTACT: Charles M. Berk, General Counsel, (703) 841–3812.

SUPPLEMENTARY INFORMATION: The Inter-American Foundation is proposing to revise its current Employee Responsibilities and Conduct regulations to conform with the requirements of E.O. 11222 (3 CFR 1964–1965 Comp.; 5 CFR 735.104); Title 18, U.S.C. 203, 205, 207, 208, 209; and Title II of the Ethics in Government Act of 1978, as amended (Pub. L. 96–19 and 96–28). The intended result of this action is to avoid employee conflicts of interest and to assure impartiality on the part of employees by doing the following:

1. Clarifying existing regulations regarding the standards of conduct required of Government employees and special Government employees associated with Foundation contractors or potential contractors.

2. Establishing regulations to guide employees in determining whether it is permissible for them to participate in conferences or accept speaking engagements.

3. Establishing regulations which specifically prohibit certain economic and financial activities of employees abroad.

4. Establishing regulations prohibiting discrimination by any employee of the Foundation against any other employee or applicant due to race, political affiliation, or religious belief.

5. Establishing regulations modifying and enlarging the number of employees required to submit Executive Personnel Financial Disclosure Reports.

6. Establishing regulations requiring the President or his or her designee to follow the administrative enforcement procedures set forth in 5 CFR 737.27 in the event that the Foundation receives information that there has been a possible violation of restrictions against post-employment activities contained in section 207 (a), (b), or (c) of Title 18 United States Code.

The proposed rule is patterned after similar ethics regulations adopted by other federal agencies following enactment of the Ethics in Government Act in 1978. The proposed rule is patterned most closely after the rule implemented in 1986 by the African Development Foundation (ADF). The ADF is an independent federal agency whose mandate and program objectives are similar to those of the Inter-American Foundation.

The penalties prescribed by the proposed rule are those provided for in the applicable laws, regulations, and executive orders cited herein.

The public is invited to submit their comments to the Foundation for review. These should be forwarded to Charles M. Berk, General Counsel, The Foundation does not intend to hold hearings on the proposed rule.

Regulatory Flexibility Act of 1980

Generally, these proposed regulations do not contain substantive new material. It is, therefore, certified that they will not have a significant economic impact on a substantial number of small entities under the Regulatory Flexibility Act.

Executive Order 12291

The Inter-American Foundation has determined that this rule is not a major rule for purposes of E.O. 12291 because it is not likely to result in an annual effect on the economy of $100 million or more.

Paperwork Reduction Act

This rule imposes no obligatory information requirements on the general public.

List of Subjects in 22 CFR Part 1001

Conflicts of Interest.

Accordingly, it is proposed to amend 22 CFR Part 1001 as follows:

1. The authority citation for Part 1001 continues to read as follows:

Authority: E.O. 11222, 3 CFR, 1964–1965/comp.; 5 CFR 735.104.

2. Part 1001 is amended by redesignating the sections shown in the following table. For the convenience of the reader the new table of contents for Part 1001 is set out below:

Subpart A—General Provisions

Old section	New section
1001.735–1	1001.1
1001.735–2	1001.2

Subpart B—Standards of Conduct

Old section	New section
1001.735–10	1001.3
1001.735–11	1001.4
1001.735–12	1001.5
1001.735–13	1001.7
1001.735–14	1001.8
1001.735–15	1001.9
1001.735–16	1001.10
1001.735–17	1001.11
1001.735–18	1001.12
1001.735–19	1001.17

Subpart C—Procedures

Old section	New section
1001.735–20	1001.18
1001.735–21	1001.19
1001.735–22	1001.21
1001.735–23	1001.22
1001.735–24	1001.23
1001.735–25	1001.24
1001.735–26	1001.25
1001.735–27	1001.26
1001.735–28	1001.27
1001.735–29	1001.28
1001.735–30	1001.30

1001.20 Executive personnel financial disclosure.
1001.21 Confidential statements of employment and financial interests.
1001.22 Employees not required to submit statements.
1001.23 Employee's complaint on filing requirement.
1001.24 Time and place of submission, and forms.
1001.25 Information required.
1001.26 Supplementary statements.
1001.27 Review of statements and determination as to conflicts of interest.
1001.28 Penalties for violation.
1001.29 Administrative enforcement proceedings.
1001.30 Confidentiality of employees' statements.
1001.31 Effect of employees' statements on other requirements.

Subpart A—General Provisions

3. Section 1001.2 is amended by removing the paragraph designations and alphabetizing the definitions, revising the definition of "Counselor" and adding the definitions of "is associated with", "organization", and "potential contractor", as follows:

§ 1001.2 Definitions.

"Counselor" means the Foundation's Counselor on Ethical Conduct and Conflicts of Interest. The Counselor for the Foundation will be the General Counsel of the Foundation. The Deputy General Counsel will serve as Deputy Counselor.

* * * * *

"Is associated with" as used in §§ 1001.13 and 1001.14 means:

(1) Is a director of an organization or is a member of a board or committee which exercises a recommending or supervisory function in an organization; or

(2) Serves as an employee, officer, owner, trustee, partner, consultant, or paid advisor in an organization; or

(3) Owns (or his or her spouse, minor child, or other member of his or her immediate household owns) individually or collectively, 1 percent or more of the voting shares of an organization; or

(4) Owns (or his or her spouse, minor child, or other member of his or her immediate household owns), individually or collectively, either beneficially or as a trustee, a direct financial interest in an organization through stock, stock options, bonds, or other securities, or obligations; or

(5) Has a continuing financial interest in an organization, such as participation in or entitlement under a bona fide pension plan, through an arrangement resulting from prior employment or business or professional association.

* * * * *

"Organization" as used herein includes profit and non-profit corporations, associations, partnerships, trusts, sole proprietorships, foundations, and foreign, State and local government units.

"Potential contractor" means any organization or individual that has submitted a proposal, application, or otherwise indicated in writing its intent to apply for or seek from the Foundation a specific contract or other agreement, including a grant, loan or loan guarantee.

* * * * *

Subpart B—Standards of Conduct

4. Section 1001.5 (c) is revised to read:

§ 1001.5 Outside employment and other activities.

* * * * *

(c) Employees are encouraged to engage in teaching, lecturing, and writing that is not prohibited by law or regulations upon prior approval of the Counselor. However, an employee shall not, either for or without compensation, engage in teaching, lecturing, or writing (including teaching, lecturing, or writing for the purpose of the special preparation of a person or class of persons for an examination of the Office of Personnel Management or Board of Examiners for the Foreign Service) that depends on information obtained as a result of Government employment, except when that information has been made available to the general public or will be made available on request, or when the President gives written authorization for use of nonpublic

information on the basis that the use is in the public interest.

* * * * *

5. Section 1001.6 is added to read:

§ 1001.6 Speeches and participation in conferences.

(a) *Fees and expenses.* An employee may not accept a fee for his or her own use or benefit for making a speech, delivering a lecture, or participating in a discussion if the subject is the Foundation or Foundation programs or if such services are part of the employee's official Foundation duties.

(b) When a meeting, discussion, or other gathering to which paragraph (a) of this section refers takes place at a substantial distance from the employee's home, he or she may accept such reimbursement, upon prior approval of the Counselor, for the actual cost of transportation and necessary subsistence or expenses, as is compatible with this Part and for which no Government payment or reimbursement is made. If an employee receives accommodations, goods, or services in-kind from a non-Government source while on official travel, such items will be treated as a donation to the Foundation and an appropriate reduction will be made in per diem or other travel expenses payable.

(c) Upon prior approval of the Counselor, an employee may accept fees for speeches, etc., dealing with subjects other than Foundation programs when no official funds have been used in connection with his or her appearance and such activities do not interfere with the efficient performance of his or her duties, and for which leave of absence, where necessary, is obtained.

(d) No employee may participate for the Foundation in a conference or speak for the Foundation before audiences when he or she has reason to believe that any racial, ethnic, religious, or minority group has been segregated or excluded from the meeting, from any of the facilities or conferences, or from membership in the organization sponsoring the conference or meeting.

§ 1001.7 [Amended]

6. Section 1001.7 (d) is amended by changing the reference to "§ 1001.735–12" to "§ 1001.5".

7. Section 1001.10 *Misuse of information* is revised to read:

§ 1001.10 Misuse of information.

(a) For the purpose of furthering a private interest, an employee shall not, except as provided in § 1001.5, directly or indirectly, use, or allow the use of, official information obtained through or in connection with Government employment which has not been made available to the general public.

(b) This section is not intended to discourage disclosure through proper channels of information which has been or should be made available to the public by law.

8. Section 1001.13 is added to read:

§ 1001.13 Association with potential contractor prior to employment.

(a) No employee, or any person subject to his or her supervision, may participate in the decision to award a contract to any organization with which that employee has been associated in the past two years. When an employee becomes aware that such an organization is under consideration for or has applied for a contract with the Foundation, the employee shall notify his or her immediate supervisor in writing. The supervisor shall take whatever steps are necessary to exclude the employee from all aspects of the decision-making process regarding the contract or agreement.

(b) When an employee becomes aware that an organization with which he or she has been associated in the past two years is under consideration for or has applied for a contract with the Foundation, he or she shall refrain from participating in the decision process.

9. Section 1001.14 is added to read:

§ 1001.14 Association with Foundation contractor, potential contractor, grantee or potential grantee while an employee.

(a) No regular employee may be associated financially with any Foundation contractor, potential contractor, grantee, or potential grantee. Any organization that is associated with a regular employee shall be suspended from consideration as a contractor or grantee.

(b) No regular or special employee, except in his or her official capacity as a Foundation employee, shall participate in any way on behalf of any organization in the preparation or development of a contract or grant proposal involving the Foundation, or represent any other organization in a matter pending before the Foundation when such participation or representation would result in or create the appearance of the use of public office for private gain. In such cases, if a regular or special employee participates, while an employee of the Foundation, in any aspect of the development of a contract, grant, or other agreement proposal on behalf of an organization, or represents another organization in a matter pending before the Foundation, that organization shall be suspended from consideration for the contract, grant, or other agreement.

(c) No regular or special employee who, prior to his or her employment at the Foundation, participated in the development of a contract, grant, or other agreement proposal on behalf of another organization, shall participate in any aspect of the decision process regarding that contract, grant, or other agreement, or, if the contract, grant, or other agreement is awarded, in any oversight or management capacity in relation to that contract, grant, or other agreement. In the event a regular or special employee who participated in the development of the contract, grant, or other agreement proposal prior to being employed at the Foundation does participate as a Foundation employee in the decision process for such contract, grant, or other agreement, the organization shall be suspended from consideration.

10. Section 1001.15 is added to read:

§ 1001.15 Economic and financial activities of employees abroad.

(a) Foundation employees are specifically prohibited from engaging in the activities listed below in any foreign country:

(1) Speculation in currency exchange;

(2) Transactions at exchange rates differing from local legally allowable rates, unless such transactions are duly authorized in advance by the Foundation;

(3) Sales to unauthorized persons, whether at cost or for profit, of currency acquired at preferential rates through diplomatic or other restricted arrangements;

(4) Transactions which entail the use, without official sanction, of the diplomatic pouch;

(5) Transfers of funds on behalf of blocked nationals, or otherwise in violation of U.S. foreign funds and assets control;

(6) Independent and unsanctioned private transactions which involve an employee as an individual in violation of applicable control regulations of foreign governments;

(7) Acting as an intermediary in the transfer of private funds for persons in one country to persons in another country, including the United States; and

(8) Permitting use of his or her official title in any private business transactions or in advertisements for business purposes.

(b) U.S. citizen-Foundation employees on official travel or assignment abroad are prohibited from engaging in the activities listed below:

(1) Transacting or having an interest in any business or engaging for profit in any profession or undertaking or other gainful employment in any country or countries in which he or she is on official travel assignment in his or her own name or through the agency of any other person.

(2) Investing in real estate or mortgages on properties located in his or her country of assignment. (The purchase of a house and land for personal occupancy is not considered a violation of this subparagraph);

(3) Investing money in bonds, shares, or stocks of commercial concerns headquartered in his or her country of assignment or conducting a substantial portion of business in such country. (Such investments, if made prior to knowledge of assignment or detail to such country or countries, may be retained during such assignment or detail); and

(4) Selling or disposing of personal property, including automobiles, at prices producing profits which result primarily from import privileges derived from his or her officials status as an employee of the U.S. Government.

11. Section 1001.16 is added to read:

§ 1001.16 Discrimination.

No employee may make inquiry concerning the race, political affiliation, or religious beliefs of any employee or applicant in connection with any personnel action, and may not practice, threaten, or promise any action against or in favor of any employee or applicant for employment because of race, color, religion, sex, age or national origin, and in the competitive service, on the basis of politics, marital status, or physical handicap.

Subpart C—Procedures

12. Section 1001.20 is added to read:

§ 1001.20 Executive personnel financial disclosure.

(a) The following employees of the Foundation shall submit completed Executive Personnel Financial Disclosure Reports (SF278) containing information required in accordance with 5 CFR Part 734, Subpart C:

(1) Within five days after transmittal by the President to the Senate of their nomination, each member of the Board of Directors of the Foundation.

(2) Within 30 days, after assuming the position, any newly appointed employee of the Foundation whose position is classified at GS–16 or above of the General Schedule, or whose basic rate of pay (excluding "step" increases) under other pay schedules is equal to or greater than the rate for GS–16 (Step 1).

(3) Within 30 days after designation, the designated Foundation Counselor on Ethical Conduct and Conflicts of Interest and the Deputy Counselor.

(b) Employees, who perform the duties of a position or office described in this section in excess of sixty days in any calendar year, must submit annual statements as of May 15 of each year containing the information described in 5 CFR Part 734, Subpart C.

(c) Executive Personnel Financial Disclosure Statements filed pursuant to this section shall be made available to the public in accordance with the provisions of 5 CFR 734.603.

13. In § 1001.21 the heading is revised, paragraph (a) is removed, paragraph (b) is redesignated as paragraph (a) and paragraph (c) is redesignated as paragraph (b) and revised to read:

§ 1001.21 Confidential statements of employment and financial interests.

* * * * *

(b) Other employees, including those classified at GS–13 through GS–15, whose submission of confidential statements of employment and financial interest has been approved by the Office of Government Ethics, whose duties and responsibilities require them to report employment and financial interests in order to avoid involvement in a possible conflict of interest situation and to carry out the purposes of the law, Executive Order 11222, and the Foundation's regulations.

14. Section 1001.22(a) introductory text is amended by changing the reference to "§ 1001.735–22" to "§ 1001.21" and paragraph (b) is revised to read:

§ 1001.22 Employees not required to submit confidential statements.

* * * * *

(b) A confidential statement of employment and financial interests is not required by these regulations from employees of GS–16 and above or the Foundation's Counselor on Ethical Conduct and Conflicts of Interests, who file Executive Personnel Financial Disclosure Reports required by Section 1001.20.

* * * * *

§ 1001.23 [Amended]

15. Section 1001.23 is amended by changing the reference to "§ 1001.735–22" to "§ 1001.21" and the reference to "§ 1001.735–21" to "§ 1001.19".

16. Section 1001.25(b) is amended by changing the reference to "§ 1001.735.2" to "§ 1001.2" and adding (e) to read:

§ 1001.25 Information required.

* * * * *

(e) *Indirect interest.* An indirect interest, such as ownership of shares in a mutual fund, which in turn owns an interest in other organizations, unless such mutual fund is substantially involved in ventures in Latin America or the Caribbean. Such an "indirect" interest is hereby determined pursuant to 18 U.S.C. 208(b)(2) to be too remote to affect the integrity of employees' services.

17. Section 1001.26 is amended by revising paragraph (a), removing paragraph (b), and redesignating paragraph (c) as paragraph (b):

§ 1001.26 Supplementary statements.

(a) Employees, other than those occupying positions requiring the filing of Executive Personnel Financial Disclosure statements, who perform the duties of a position or office for a period in excess of sixty days in any calendar year, including special government employees, must submit annual statements as of May 15 of each year.

* * * * *

§ 1001.27 [Amended]

18. Section 1001.27 (c) and (d) are amended by changing the references to "§ 1001.735–29" to "§ 1001.28".

19. Section 1001.29 is added to read:

§ 1001.29 Administrative enforcement proceedings.

In the event that the Foundation receives information that there has been a possible violation involving the Foundation of the restrictions against post-employment activities contained in section 207 (a), (b), or (c) of Title 18 U.S.C., the President or his designee shall follow the procedures set forth in 5 CFR 737.27 with respect to the initiation and conduct of an administrative disciplinary hearing.

20. § 1001.30 is revised to read:

§ 1001.30 Confidentiality of employees' statements.

The Foundation shall hold each statement of employment and financial interests, and each supplementary statement, in confidence. To insure this confidentiality only the Counselor and Deputy Counselor are authorized to review and retain the statements. The Counselor is responsible for maintaining the statements in confidence and shall not allow access to, or allow information to be disclosed from, a statement except to carry out the purpose of this Part. The Foundation may not disclose information from a statement except as the Office of Personnel Management or the President of the Foundation may determine for good cause shown.

21. Section 1001.31 is revised to read:

BEST COPY AVAILABLE

VOL 52 ISS 195 OCT 8 1987 UMI

§ 1001.31 Effect of employees' statements on other requirements.

The statements of employment and financial interests and supplementary statements required for employees are in addition to, and not in substitution for, or in derogation of, any similar requirement imposed by law, order, or regulation. The submission of a statement or supplementary statement by an employee does not permit participation in a matter in which such participation is prohibited by law, order, or regulation.

Charles M. Berk,

General Counsel, Inter-American Foundation.

BILLING CODE 7025-01-M

DEPARTMENT OF JUSTICE

Attorney General

28 CFR Part 50

[Order No. 1226-87]

Procedures Governing the Destruction of Contraband Drug Evidence in the Custody of Federal Law Enforcement Authorities

AGENCY: Department of Justice.

ACTION: Notice of proposed rulemaking.

SUMMARY: This proposed drug destruction policy is being published by the Attorney General of the Department of Justice (DOJ) to solicit comments on the best way to provide for the timely destruction of unnecessary seized contraband drugs. This proposed regulation is intended to prevent the warehousing of large quantities of seized contraband drugs which are unnecessary for due process in criminal cases. Such stockpiling of contraband drugs presents inordinate security and storage problems which create additional economic burdens on limited law enforcement resources of the United States. It is necessary since the retention of controlled substances and the continuing acquisition of additional amounts pose increased storage problems and will result in the elimination of unnecessary seized controlled substances, while retaining an amount that will provide sufficient documentary evidence.

DATE: Comments should be received on or before November 9, 1987.

ADDRESSES: Comments should be addressed to: Dennis F. Hoffman, Chief Counsel, Office of the Chief Counsel, Drug Enforcement Administration, Room 1112, Eye Street Building, 1405 Eye Street NW., Washington, DC 20537, Telephone (202) 633-1276.

FOR FURTHER INFORMATION CONTACT: Dennis F. Hoffman, 202-633-1276.

List of Subjects in 28 CFR Part 50

Drugs, Drug traffic control, Law enforcement.

SUPPLEMENTARY INFORMATION: This is not a major rule within the meaning of Executive Order 12291. This will not have a substantial impact on a significant number of small businesses within the meaning of the Regulatory Flexibility Act. 5 U.S.C. 605.

Under the authority vested in the Attorney General, including 28 U.S.C. 509, 510, 3 U.S.C. 301, and 21 U.S.C. 811(a), and for the reasons set forth in the preamble, it is proposed to amend 28 CFR Part 50 as follows:

1. The authority citation for Part 50 is revised to read as follows:

Authority: 28 U.S.C. 508, 509, 510; 5 U.S.C. 301, 552, 552a, 15 U.S.C. 16(d); 21 U.S.C. 881(f)(2).

PART 50—[AMENDED]

2. Part 50 is amended by a new § 50.21 to read as follows:

§ 50.21 Procdures governing the destruction of contraband drug evidence in the custody of Federal law enforcement authorities.

(a) *General.* The procedures set forth below are intended as a statement of policy of the Department of Justice and will be applied by the Department in exercising its responsibilities under federal law relating to the destruction of seized contraband drugs.

(b) *Purpose.* This policy implements the authority of the Attorney General under Title I, section 1006(c)(3) of the Anti-Drug Abuse Act of 1986, Pub. L. 99-570 which is codified at 21 U.S.C. 881(f)(2), to direct the destruction, as necessary, of Schedule I and II contraband substances.

(c) *Policy.* This regulation is intended to prevent the warehousing of large quantities of seized contraband drugs which are unnecessary for due process in criminal cases. Such stockpiling of contraband drugs presents inordinate security and storage problems which create additional economic burdens on limited law enforcement resources of the United States.

(d) *Definitions.* As used in this subpart, the following terms shall have the meanings specified.

(1) The term "Act" means the Controlled Substances Act (84 Stat. 1242; 21 U.S.C. 801) and/or the Controlled Substances Import and Export Act (84 Stat. 1285; 21 U.S.C. 951).

(2) The term "Contraband drugs" are those controlled substances listed in Schedules I and II of the Controlled Substances Act seized for violation of that Act.

(3) The term "Marijuana" is as defined in 21 U.S.C. 802(15) but does not include for the purposes of this regulation, the derivatives hashish or hashish oil for purposes of destruction.

(4) The term "Representative sample" means the exemplar for testing and a sample aggregate portion of the whole amount seized sufficient for current criminal evidentiary practice.

(5) The term "Threshold amount" means:

(i) Two kilograms of a mixture or substance containing a detectable amount of heroin;

(ii) Ten kilograms of a mixture or substance containing a detectable amount of—

(A) Coca leaves, except coca leaves and extracts of coca leaves from which cocaine, ecgonine, and derivatives of ecgonine or their salts have been removed;

(B) Cocaine, its salts, optical and geometric isomers, and salts of isomers;

(C) Ecgonine, its derivatives, their salts, isomers and salts of isomers; or

(D) Any compound, mixture, or preparation which contains any quantity of any of the substances referred to in paragraph (d)(5)(ii) (A) through (C) of ths section;

(iii) Ten kilograms of a mixture or substance described in paragraph (d)(5)(ii)(B) which contains cocaine base;

(iv) Two hundred grams of phencyclidine (PCP) or two kilograms of a mixture or substance containing a detectable amount of phencyclidine (PCP);

(v) Twenty grams of a mixture or substance containing a detectable amount of Lysergic Acid Diethylamide (LSD);

(vi) Eight hundred grams of a mixture or substance containing a detectable amount of N-phenyl-N[1-(2-phenylethyl)-4-piperidinyl] propanamide [commonly known as fentanyl] or two hundred grams of a mixture or substance containing a detectable amount of any analogue of N-phenyl-N-[1-(2-phenylethyl)-4-piperidinyl] propanamide; or

(vii) Twenty kilograms of hashish or two kilograms of hashish oil [21 U.S.C. 841(b)(1)(D), 960(b)(4)];

(viii) In the event of any change to section 401(b)(1) of the Controlled Substances Act (21 U.S.C. 841(b)(1)) as amended occurring after the date of these regulations, the threshold amount

of any substance therein listed, except marijuana, shall be twice the minimum amount requested for the most severe mandatory minimum sentence .

(e) *Procedures. Responsibilities of the Federal Bureau of Investigation and Drug Enforcement Administration.* When contraband drug substance in excess of the threshold amount or in case of marijuana a quantity in excess of the representative sample are seized pursuant to a criminal investigation and retained in the custody of the Federal Bureau of Investigation or Drug Enforcement Administration, the Agency having custody shall:

(1) Immediately notify the appropriate United States Attorney, Assistant United States Attorney, or the responsible State/local prosecutor that the amount of seized contraband drug exceeding the threshold amount and its packaging, will be destroyed after sixty days from the date notice is provided of the seizures, unless the agency providing notice is requested in writing by the authority receiving notice not to destroy the excess contraband drug; and

(2) Assure that appropriate tests of samples of the drug are conducted to determine the chemical nature of the contraband substance and its weight sufficient to serve as evidence before the trial courts of that jurisdiction; and

(3) Photographically depict, and if requested by the appropriate prosecutorial authority, videotape, the contraband drugs as originally packaged or an appropriate display of the seized contraband drugs so as to create evidentiary exhibits for use at trial; and

(4) Isolate and retain the appropriate threshold amounts of contraband drug evidence when an amount greater than the appropriate threshold amounts has been seized, or when less than the appropriate threshold amounts of contraband drugs has been seized, the entire amount of the seizure, with the exception of marijuana, for which a representative sample shall be retained; and

(5) Maintain the retained portions of the contraband drugs in appropriate laboratory or division vaults until the evidence is no longer required for legal proceedings, at which time it may be destroyed, first having obtained consent of the United States Attorney, an Assistant United States Attorney, or the responsible state/local prosecutor;

(6) Notify the appropriate United States Attorney, Assistant United States Attorney, or the responsible State/local prosecutor to obtain consent to destroy the retained amount or representative sample whenever the related suspect(s) has been a fugitive from justice for a period of five years. An exemplar sufficient for testing will be retained consistent with this section.

(f) *Procedures. Responsibilities of the United States Attorney or the District Attorney (or equivalent State/local prosecutorial authority).* When so notified by the Federal Bureau of Investigation or the Drug Enforcement Administration of an intent to destroy excess contraband drug, the United States Attorney or the District Attorney (or equivalent) may:

(1) Agree to the destruction of the contraband drug evidence in excess of the threshold amount, or for marijuana in excess of the representative sample prior to the normal sixty day period. The United States Attorney, or the District Attorney (or equivalent) may delegate to his/her assistants authority to enter into such agreement; or

(2) Request an exception to the destruction policy in writing to the Special Agent in Charge of the responsible division prior to the end of the sixty day period when retaining only the threshold amount of representative sample will significantly affect any legal proceedings; and, in the event of a denial of the request may appeal the denial to the Assistant Attorney General, Criminal Division. Such authority may not be redelegated. Appeal shall stay the destruction until the appeal is complete.

(g) *Supplementing regulations.* The Federal Bureau of Investigation and the Drug Enforcement Administration are authorized to issue regulations and establish procedures consistent with this section.

Date: September 21, 1987.

Edwin Meese III,

Attorney General

BILLING CODE 4410–01–M

DEPARTMENT OF DEFENSE

Department of the Air Force

32 CFR Part 811

Release, Dissemination, and Sale of Visual Information Materials

AGENCY: Department of the Air Force, Department of Defense.

ACTION: Proposed rule.

SUMMARY: The Department of the Air Force is revising the regulation to establish policy on the release, dissemination, and sale of Air Force visual information (VI) materials. It explains how reproductions may be sold, distributed, or released. This revision incorporates DOD Instruction 7230.7 which updates the schedule of fees. It also updates terminology, functional addresses and information on requesting visual material.

DATE: Comments must be submitted on or before November 9, 1987.

ADDRESS: HQ USAF/SCV, Washington, DC 20330.

FOR FURTHER INFORMATION CONTACT: Major Cultice, HQ USAF/SCV, Washington, DC 20330, telephone (202) 695–9610.

SUPPLEMENTARY INFORMATION: The Department of the Air Force has determined that this regulation is not a major rule as defined by Executive Order 12291, is not subject to the relevant provisions of the Regulatory Flexibility Act of 1980 (Pub. L. 96–354), and does not contain reporting or recordkeeping requirements under the criteria of the Paperwork Reduction Act of 1980 (Pub. L. 96–511).

Patsy J. Conner,

Air Force Federal Register Liaison Officer.

List of Subjects in 32 CFR Part 811

Classified information, Motion pictures, Television.

Therefore, 32 CFR 811 is revised to read as follows:

PART 811—RELEASE, DISSEMINATION, AND SALE OF VISUAL INFORMATION MATERIALS

Sec.

811.0 Purpose.
811.1 Exclusions.
811.2 Agencies authorized to release VI materials.
811.3 Policy on the dissemination and sale of VI products.
811.4 Restrictions on the use of government VI records.
811.5 Procedures for requesting VI materials.
811.6 How to collect fees.
811.7 Schedule of fees.
811.8 Requests for motion media.
811.9 Requests for still VI media.

Authority: 10 U.S.C. 8013.

Note: Part 806 of this chapter states the basic policies and instructions governing the disclosure of records and tells members of the public what they must do to inspect or obtain copies of the material referenced herein.

§ 811.0 Purpose.

This part establishes policy on the release, dissemination, and sale of Air Force visual information (VI) materials. It explains how reproductions may be sold, distributed, or released. It implements 32 CFR Part 288 (Department of Defense (DOD) Instruction 7230.7), DOD Directive 4000.19, DOD Directive 7290.3–M, and

DOD Directive 5040.2. It should be used with Part 806 (AFR 12–30, Air Force Freedom of Information Act Program); Part 812 (AFR 12–32, Schedule of Fees for Copying, Certifying, and Searching Records and Other Documentary Material); AFR 177–108, Paying and Collecting Transactions at Base Level; Part 837 (AFR 190–1, Public Affairs Policies and Procedures); and AFR 205–1, Information Security Program. It applies to all Air Force personnel including United States Air Force Reserve and Air National Guard units and members. The term major command (MAJCOM), when used in this part, includes separate operating agencies and direct reporting units.

§ 811.1 Exclusions.

This volume does not apply to:

(a) The sale of aerial reconnaissance or cartographic type photography. Request this photography from the Defense Mapping Agency/ODS, ATTN: DDCP, Washington, DC 20315–0020.

(b) The sale of completed productions. Requests for purchase of completed Air Force productions should be sent to the National Archives and records Administration, National Audiovisual Center, Information Office, 8700 Edgeworth Drive, Capitol Heights, MD 20722–3701.

(c) VI materials made for the Air Force Office of Special Investigations (AFOSI) for use in an investigation or a counterintelligence report. Part 806 and AFR 124–4, Requesting AFOSI Investigations and Safeguarding, Handling and Releasing Information from AFOSI Reports, show who may use these VI materials.

(d) VI materials made for aircraft and missile mishap investigators for investigations of Air Force aircraft and missile mishaps per AFR 127–4. Part 806 and AFR 124–4 show who may use these materials.

§ 811.2 Agencies authorized to release VI materials.

(a) The Secretary of the Air Force, Office of Public Affairs (SAF/PA), per Part 837, may release VI materials to:

(1) News media, commerical publications, or electronic mail.

(2) Film companies.

(3) Industries.

(4) Nonprofit organizations.

(5) Agencies outside the federal government.

(6) The general public (not associated with the news media).

(b) The Secretary of the Air Force, Office of Legislative Liaison (SAF/LL), arranges for the release of VI material through SAF/PA upon request from members of Congress and provides such material for official use.

(c) The International Affairs Division (HQ USAF/CVAII) (or, in some cases, MAJCOM Foreign Disclosure Office) authorization is required to release classified and unclassified materials for use by foreign governments and international organizations or their representatives.

§ 811.3 Policy on the dissemination and sale of VI products.

(a) Sale of VI material. Although copies of Air Force VI products may be sold, Air Force policy is to not compete with commercial industry. When VI materials are sold to persons or organizations outside the federal government, charges and fees must be assessed according to Part 812.

(b) Dissemination of VI material to state and local governments. Copies of VI material that meet the requirements of this part may be loaned or sold to state and local governments, or any tax exempt organization, under Title III of the 1968 Intergovernmental Cooperation Act. The requester must certify that such materials are not available from commercial sources. The only Air Force organization authorized to loan copies of VI materials is the United States Air Force Central Visual Information Library (AFCVIL), managed by 1352d Audiovisual Squadron, Norton AFB CA.

(c) Disseminating and Selling Activities. Dissemination and sale of Air Force VI documentation is accomplished by the DOD Motion Media Records Center, operated by the 1352d Audiovisual Squadron (AAVS) (MAC), Norton AFB CA and the DOD Still Media Records Center, operated by the US Navy at the Anacostia Naval Station, Washington, DC.

(d) Sale of original VI material. Original VI material is not for sale. Reproductions of the original may be sold. HQ USAF/SCV may authorize the loan of copies or duplicates of original material for federal government use. SAF/PA may lend copies or duplicates of original material to agencies outside the federal government and to the public.

(1) DOD VI records centers use only government-owned VI material in servicing approved requests for dissemination and sale. The use of nongovernment VI material must be with the written permission of the owner.

(2) Production of material for sale must not stop or slow official Air Force work or be used to justify facility expansion or additional manpower.

(e) Requests and services exempt from fees. In accordance with Part 813, requests received from the sources below are exempt from paying fees if funds are available for producing the material, production does not impair the mission of the furnishing agency, all clearances and releases specified by this part have been obtained, and the work can be done during normal duty hours. When requests cannot be accomplished within the above criteria, the request will be processed only when fees are paid by the requester.

(1) DOD and other government agencies requesting VI materials for official activities (DOD Directive 4000.19 and DOD Directive 5040.2).

(2) Members of Congress requesting VI materials for use in official activities.

(3) VI records center materials or services furnished according to law or Executive order.

(4) Federal, state, territorial, county, or municipal governments, or their agencies, for functions related to or furthering an Air Force or other DOD objective.

(5) Nonprofit organizations for functions related to public health, education, or welfare.

(6) Members of the Armed Forces in a casualty status, their next of kin, or authorized representative, when the requested VI material relates to the member and does not compromise classified information or the work of an accident investigation board.

(7) The general public, to further the Armed Forces recruiting program or public understanding of the Armed Forces, when such VI materials or services are determined by SAF/PAM to be in the best interest of the Air Force.

(8) Incidental or occasional requests for VI records center materials or services (including requests from residents of foreign countries) when it is determined that fees would be inappropriate. (For the distribution of VI materials to foreign nations, see Part 837 of this chapter).

§ 811.4 Restrictions on the use of government VI records.

Activities sending materials to the DOD VI records centers must ensure that any limitation on their use is noted on the materials. The following restrictions on VI material disseminated or sold from the records centers must also be observed:

(a) Materials must not be used to promote or endorse a commercial service or product (see Part 837).

(b) Rights to official Air Force VI material may not be claimed by any other agency or person.

(c) The waiver of propriety and privacy rights cannot be granted with

the sale or release of VI materials unless these rights and the rights of transfer are owned by the Air Force.

(d) VI materials received from Air Force contractors may be released, disseminated, or sold if not identified as properietary material in the applicable contract.

(e) When provisions of formal agreements between the Air Force and other government agencies on release of VI materials differ from this part, the provisions of the formal agreement apply.

§ 811.5 Procedures for requesting VI materials.

(a) Informal inquiries may be made to the appropriate DOD records center on VI materials available in broad subject areas. Such inquiries are not formal requests. Research of, or access to, materials are provided only by submission of a formal request. Inquiries regarding motion picture or television materials should be sent to the DOD Central Motion Media Records Center (1352d AVS/AVOS, Norton AFB CA 92409–5996). Inquiries regarding still photo materials should be sent to the DOD Still Media Records Center, ATTN: Code LGP–R, Bldg 168, Anacostia Naval Station, Washington, DC 20374–1681.

(b) Submit formal requests according to § 811.8 and § 811.9. When advised that the request has been approved, the requester may communicate directly with the records center about the selection of materials.

§ 811.6 How to collect fees.

(a) The Air Force or DOD activity making the sale collects the funds in advance.

(b) The fees due the United States must be paid by cash, United States Treasury check, certified check, cashiers check, bank draft, or postal money order (AFM 177–108). Personnel checks may not be used.

§ 811.7 Schedule of fees.

Fees are established by the Department of Defense and are listed as follows:

(a) Still Photography. Still pictorial or documentary photographic prints.

Unlisted standard sizes of prints may be furnished, if available, at prevailing contract or activity rates.

Price Per Print	Quantity	1–9		
		10–20	21–50	50+
8" x 10" single weight (RC) type) paper	$4.50	$3.25	$2.50	$1.75
11" x 14" single weight (RC) type) paper	9.00	7.00	5.00	4.00
16" x 20" single weight (RC) type) paper	19.00	15.00	12.00	9.50
20" x 24" single weight (RC) type) paper	30.00	25.00	20.00	15.00
8" x 10" single weight color paper	11.00	7.50	3.50	3.00
11" x 14" single weight color paper	17.00	9.00	6.50	5.50
16" x 20" single weight color paper	35.00	25.00	14.00	11.50
35mm color transparency slide made from color negative	5.00	3.50	3.00	3.00
35mm duplicate from 35mm slide	1.00	.60	.50	.45
Print mounted on 16" x 20" cardboard	8.00	(1)		
Print mounted on 20" x 24" cardboard	8.00	(1)		
8"x10" color transparencies	[2]20.00	[3]16.00		
4"x5" transparencies	4.50			
4"x5" B&W negative	2.00			
70mm color negative	7.50			

[1] Unit price of print.
[2] First.
[3] Each additional.

Note: DOD Still Records Center photographic services are not normally done in-house by DOD. Charges for the above processing and services will be at prevailing contract rates on a case-by-case basis. All prices are subject to change without notice. Fees for copies of photographs which are part of a patient's medical record should be coordinated with the Patient Affairs Officer at the medical treatment facility.

(b) Motion Picture.

	Price Per Foot Contact
Color:	
16mm work print (positive) work print from an original negative	$.20
16mm reversal work print	.20
16mm color master ("A" roll)	.60
16mm duplicate negative (from master positive)	.60
16mm reversal duplicate negative	.85
16mm internegative (from reversal original)	.70
16mm short rolls (under 100 ft)	[1].10
16mm tab-to-tab printing	[1].10
Black and White:	
16mm work print (negative/positive)	.10
16mm master positive (fine grain)	.25
16mm duplicate negative	.25
16mm short rolls (under 200 ft)	[1].10
16mm tab-to-tab printing	[1].10
Miscellaneous:	
Magnetic tape—dub from 16mm film	$65.00
Searching (per hour or fraction thereof)	18.00
Minimum charge per film order (including search)	35.00
16mm film to videotape (broadcast quality tape format per hour)	[2] 275.00
Minimum charge for film to videotape transfer	[2] 140.00

[1] Plus basic price.
[2] Plus raw stock.

Note: 35mm film processing for motion pictures and some motion picture services are not done in-house by the DOD. Charges for these types of processing and services will be at prevailing contract rates on a case-by-case basis. Prices are subject to change without notice.

§ 811.8 Requests for motion media.

Rules	A	A	B	D	E
	If the requester is	And material requested is		Then furnish in writing the	And send the request to
		Unclassified	Classified		
1	News media	X			SAF/PA, Wash DC 20330-5000 for regional, national or international release; servicing PA for local release.
2	The general public including entertainment, documentary, advertisers, industrial media producers, editors & writers.	X		Film sequence outline of script: intended use of the film/video; type of film stock needed (neg, interneg, print, ¾" video tape) approx number of screen feet.	SAF/PAMB, Wash DC 20330-5000
3	An Air Force or other federal government agency.	X		Intended use of the film/video type stock needed (neg, interneg, print, ¾" video tape); approx number of screen feet/minutes.	1352 AVS/AVOS, Norton AFB CA 92409-5996
4	A federal government contractor (to meet USAF requirements specified in federal contract).	X			USAF plant representative
5	An Air Force contractor (to meet VI requirements specified in a USAF contract).		X	Intended use of the material; type of material needed (print, neg, interneg, video); required number of prints, slides, negs, etc.; a full justification for access to classified material.	USAF plant representative
6	A federal government contractor (to provide material for public release).	X			
7	USAF plant representative (to provide material to federal government contractor that is specified in federal contract).	X			1352 AVS/AVOS Norton AFB, CA 92409-5996
8	USAF plant representative (to provide material to federal government contractor for release to public).	X			SAF/PA, 1352 AVS/AVOS IN TURN
9	USAF plant representative (to provide material to an Air Force contractor that was specified in USAF contract).		X		MAJCOM (CC), 1352 AVS/AVOS IN TURN
10	A nonfederal government agency (state, county, territorial, municipal).	X		Intended use of VI materials; type of film, video tape stock needed (neg, interneg, print, ¾", 1", etc.); approx number of screenfeet/minutes; a certification that requested material cannot be procured reasonably and expeditiously through normal business channels.	SAF-PAMB, Wash DC 20330-5000
11	Member of Congress	X	X	Intended use of VI products; type of film/video stock needed (neg, interneg, print, 3/4", 1", etc.); approx number of screen feet: full justification for access to classified material.	SAF-LL, Wash DC 20330-5000
12	Foreign governments, international organizations or their representatives.	X	X		HQ USAF/CVAII or MAJCOM (if delegated authority)
13	Foreign nationals or foreign industries (other than representatives of foreign governments or international organizations).	X			ICA office serving the foreign country (see note)
14	Same as 13		X		HQ USAF/CVAII or MAJCOM (if delegated authority)
15	An Air Force activity		X		MAJCOM (CC) 1352 AVS/AVOS IN TURN

Rules	A	A B		D	E
	If the requester is	And material requested is		Then furnish in writing the	And send the request to
		Unclassified	Classified		
16	Other non-Air Force activities		X	Intended use of VI product; type of film stock/video tape needed (neg, interneg, print, ¾", 1", tape, etc.); approx number of screen feet; full justification for access to classified material; a statement describing the measures to be taken—at least equal to those in DOD 5200.1R/AFR 205-1, to safeguard and protect the material against unauthorized disclosure.	HQ USAF/SCV, Wash DC 20330-5190

Note: Requests originating within the United States may be sent to SAF/PA, Wash DC 20330-5000, for coordination with HQ USAF/CVAI(S) and ICA clearance.

§ 811.9 Requests for still VI media.

Rule	A	B C		D	E
	If the requester is	And material requested is		Then furnish in writing the	And send the request to
		Unclassified	Classified		
1	News media	X			SAF/PAMB, Wash DC 20330-5000 for regional, national or international release; servicing PA, for local release.
2	The general public including entertainment, documentary, advertisers, industrial media producers, editors & writers.	X		Story outline or ad copy; intended use of the material; type of material needed (neg, print, interneg); required number of prints, slides, negs, etc..	SAF/PAMB, Wash DC 20330-5000
3	An Air Force or other federal government agency.	X			DOD Still Media Records Center, ATTN: Code LGP-R, Bldg 168, Anacostia Naval Station, Wash DC 20374-1681
4	A federal government contractor (to meet VI requirements specified in federal contract).	X			USAF plant representative
5	An Air Force plant representative (to meet a federal government contractor's needs specified in federal contract).	X			SAF/PA, Wash DC 20330-5000
6	An Air Force contractor (to meet VI requirements specified in a USAF contract).		X	Intended use of the material, type of material needed (print, neg, interneg);.	AF plant representative
7	An Air Force plant representative (to meet a federal government contractor's needs specified in a USAF contract).		X	Required number of prints, slides, negs, etc.; a full justification for access to classified material.	MAJCOM (CC). DOD Central Still Media Records Center
8	A nonfederal government agency (state, county, territorial, municipal).	X		Intended use of the material; type of material needed (neg, print, interneg); required number of prints, slides, negs, etc; a certification that the requested material cannot be procured reasonably and expeditiously through ordinary business channels.	SAF/PA, Wash DC 20330-5000
9	Members of Congress	X	X		SAF/LL, Wash DC 20330-5000

BILLING CODE 3910–01–M

32 CFR Part 811a

Visual Information Documentation (VIDOC) Program

AGENCY: Department of the Air Force, Department of Defense.

ACTION: Proposed rule.

SUMMARY: This part is being revised to update functional address symbols and implement new terminology. This part establishes policy for the management of the Air Force visual information documentation (VIDOC) program. It implements Department of Defense (DOD) Directive 5040.2, and describes how the program is accomplished.

DATE: Comments must be submitted on or before November 9, 1987.

ADDRESS: HQ USAF/SCV, Washington, DC 20330.

FOR FURTHER INFORMATION CONTACT: Major Cultice, HQ USAF/SCV, Washington, DC 20330, telephone (202) 695–9610.

SUPPLEMENTARY INFORMATION: The Department of the Air Force has determined that this regulation is not a major rule as defined by Executive Order 12291, is not subject to the relevant provisions of the Regulatory Flexibility Act of 1980 (Pub. L. 96–354), and does not contain reporting or recordkeeping requirements under the criteria of the Paperwork Reduction Act of 1980 (Pub. L. 96–511).

List of Subjects in 32 CFR Part 811a

Archives and records, Motion pictures.

Therefore, 32 CFR Part 811a is revised to read as follows:

PART 811a—VISUAL INFORMATION DOCUMENTATION (VIDOC) PROGRAM

Sec.

811a.1 Purpose.
811a.2 Material sources for the VIDOC program.
811a.3 Disposition of VI documentation materials.

Authority: 10 U.S.C. 8013.

§ 811a.1 Purpose.

This part establishes policy for the management of the Air Force visual information documentation (VIDOC) program. It implements Department of Defense (DOD) Director 5040.2 and describes how the program is accomplished. It applies to all Air Force personnel including United States Air Force Reserve and Air National Guard units and members. The term major command (MAJCOM), when used in this part includes separate operating agencies and direct reporting units. The Air Force VIDOC program:

(a) Records, through visual information (VI) means (still photographs, motion pictures, video, audio tape, and so forth) imagery of significant Air Force events that document the employment, growth, progress, and exercise of Air Force resources during peacetime and in combat.

(b) Collects and preserves visual imagery of significant Air Force events with known or potential historical or archival value.

(c) Ensures imagery which depicts the prime mission, support activities, and significant events of key Air Force organizations is available. VIDOC imagery or products are used for many purposes, at all levels, in the Air Force. Examples are:

(1) *Immediate use.* Documentation used to help analyze and evaluate concepts and results of deployments, contingencies, tests, exercises, and so forth, during peacetime and in combat to support Air Force, DOD, and national objectives. VIDOC provides source material for slides, motion picture clips, video tapes, multimedia products, and

so forth; used for training, management, information, and briefing purposes. In wartime, products are used to support theater commanders psychological operations objectives, operational briefings, status reports, public affairs requirements, collateral intelligence, and the historical record.

(2) *Future use.* VIDOC materials with long-term or permanent value are retained in DOD central record centers, the National Air and Space Museum, and the National Archives. These make up the pictorial records of development, growth, and progress of air power and provide a continued resource for VI productions and other media presentations.

§ 811a.2 Material sources for the VIDOC program.

(a) The primary sources of VI documentation materials are:

(1) Aerospace Audiovisual Service (AAVS) documentation crews, both ground and aerial, whose primary mission is to acquire Air Force imagery in peacetime and in combat.

(2) Base VI support centers (VISC).

(3) Optical instrumentation and engineering imagery of Air Force research, development, test, and evaluation (RDT&E) projects, including that material originated by defense and aerospace contractors.

(4) Armament delivery recording (ADR) imagery.

(b) Although the imagery may not originate from a documentation requirement, when properly processed, indexed, and stored, it serves as a valuable source of VI documentation.

§ 811a.3 Desposition of VI documentation materials.

(a) VI materials generated or acquired by Air Force members, employees, or contractors in conducting official duties are the property of the United States Air Force. Personal use of VI material for sale or any other reason not directly related to an official Air Force activity is prohibited. Any deviation from this policy must be approved by HQ USAF/SCV. This policy also applies when Air Force members or employees, by choice or agreement, occasionally use personally owned equipment or supplies in conducting official duties.

(b) Photographs, motion picture films, transparencies, video tapes, audio recordings, and other VI products are subject to safeguards and release requirements when released outside the Department of Defense (see Part 806 and Part 837 of this chapter).

Patsy J. Conner,

Air Force Federal Register Liaison Officer.

BILLING CODE 3910-01-M

DEPARTMENT OF TRANSPORTATION

Coast Guard

33 CFR Part 165

[CGD8-86-12]

Regulated Navigation Area in Houston Ship Channel

AGENCY: Coast Guard, DOT.

ACTION: Cancellation of rulemaking.

SUMMARY: The Coast Guard withdraws the proposed rule to establish a Regulated Navigation Area in the Houston Ship Channel that appeared at page 42595 in the **Federal Register** of Tuesday, November 25, 1986 (51 FR 42595) due to adverse public comment.

EFFECTIVE DATE: October 8, 1987.

FOR FURTHER INFORMATION CONTACT: LT Edwin M. Stanton, project officer, Commander (merps), Eighth Coast Guard District, Rm. 1341, Hale Boggs Federal Bldg., 500 Camp St., New Orleans, LA 70130-3396, (504) 589-6901.

SUPPLEMENTARY INFORMATION: On 25 November, 1986, the Coast Guard published a notice of proposed rulemaking in the **Federal Register** for these regulations (CGD8-86-12). Interested persons were asked to submit comments and five comments were received.

Drafting Information

The drafters of these regulations are CDR Al Dujenski, project officer, Coast Guard Port Safety Station Houston; and LCDR J.J. Vallone, project attorney, Eight Coast Guard District Legal Office.

Discussion of Comments

Five comments were received. All five comments noted that the present system of voluntary cooperation is working well and that the regulations are unnecessary. All five comments also stated that the proposed regulations would have a direct negative economic impact on marine commerce in the Port of Houston, by placing unrealistic time and reporting requirements on bunkering and breasted-up cargo operations. One of the five commented that the requirement to clear the channel in 30 minutes would provide sufficient time to safely shut down and survey a bunker or liquid cargo operation.

Conclusion

The Coast Guard concludes that the imposition of restrictions on vessels mooring abreast in the Houston Ship Channel is unnecessary and not conducive to the facilitation of maritime commerce.

Notice of Proposed Rulemaking CGD8-86-12 (51 FR 42595) is cancelled.

No further rulemaking on this subject is being considered.

Dated: September 25, 1987.

J.D. Sipes,

Captain, U.S. Coast Guard, Commander, 8th Coast Guard District, Acting.

ENVIRONMENTAL PROTECTION AGENCY

40 CFR Part 52

[Region II Docket No. 82; FRL-3274-4]

Approval and Promulgation of Implementation Plans; Revision to the State of New Jersey Implementation Plan for Lead

AGENCY: Environmental Protection Agency.

ACTION: Proposed rule.

SUMMARY: This notice announces that the Environmental Protection Agency is proposing approval of a revision to the New Jersey State Implementation Plan (SIP) for lead. This revision consists of material prepared by the New Jersey Department of Environmental Protection pursuant to a SIP commitment to conduct studies and implement appropriate actions in order to provide for attainment and maintenance of the ambient air quality standard for lead in the vicinity of the United States Metals Refining Company (USMR) in the Borough of Carteret. Among the actions proposed are specific measures to control fugitive dust emissions from the USMR plant property due to the demolition of buildings at the site and to continue ambient air monitoring for lead in the vicinity of the facility until at least August 1989.

DATE: Comments must be received by November 9, 1987. Public comments on this document are requested and will be considered before taking final action on this SIP revision.

ADDRESSES: All comments should be addressed to: Christopher J. Daggett, Regional Administrator, Environmental Protection Agency, Region II Office, 26 Federal Plaza, New York, New York 10278.

Copies of the SIP revision are available at the following addresses for inspection during normal business hours:

Environmental Protection Agency, Region II Office, Air Programs Branch, 26 Federal Plaza, Room 1005, New York, New York 10278.

New Jersey Department of Environmental Protection, Division of Environmental Quality, 401 East State Street, Trenton, New Jersey 08625.

FOR FURTHER INFORMATION CONTACT: William S. Baker, Chief, Air Programs Branch, Environmental Protection Agency, Room 1005, 26 Federal Plaza, New York, New York 10278, (212) 264–2517.

SUPPLEMENTARY INFORMATION:

Background

On November 25, 1986 [51 FR 42565] The Environmental Protection Agency (EPA) approved, with the exception of the Borough of Carteret, the New Jersey State Implementation Plan (SIP) for the attainment and maintenance of the national ambient air quality standards (NAAQS) for lead. As described in that notice, EPA was unable to take final action with respect to the Borough of Carteret because of the need for a revised control plan for United States Metals Refining Company (USMR), a smelting facility located in the area. Even though the State had issued an Administrative Consent Order requiring specific control measures to result in 90 percent control efficiency of fugitive process emissions at the USMR facility and modeling of air emissions at the facility had shown that implementation of the measures contained in this order should have provided for the attainment of the lead standards in its vicinity, violations of the lead NAAQS continued to be monitored.

On March 4, 1986, the New Jersey Department of Environmental Protection (NJDEP) issued an Administrative Order requiring the development and implementation of a compliance plan for the facility. This new order includes air quality modeling analysis and an extension of the requirements for ambient sampling. USMR submitted the compliance plan on August 11, 1986. This plan demonstrates that the principal contributors of lead to the ambient air were baghouse dust piles and stockpile and process fugitive emissions. In September of 1986, USMR shut down operations at all lead emitting sources on the site (except the laboratory which is permitted to emit 0.015 tons per year of lead) and announced plans for the development of the property for other uses. As a consequence of this shut down, the facility's air pollution control permits were terminated by the State. The subsequent demolition of the plant raised the question of what control measures, if any, were needed to attain and maintain the ambient standard for lead.

The State Submittal

On July 23, 1987 the State of New Jersey sent EPA a SIP revision for USMR. The primary purpose of this submittal was to fulfill requirements necessary to complete the State's SIP for lead. Today's action only discusses the adequacy and approvability of revisions to the New Jersey SIP for lead as they relate to the USMR facility. A public announcement requesting comments on this SIP submittal was made in the *New Jersey Register* on July 20, 1987. At the request of the State, EPA is proposing approval of this revision concurrently with New Jersey and will take final action only after New Jersey completes its review and adoption process.

This specific SIP revision addresses those violations of the lead standard which were recorded from late 1984 through mid-1986. It includes a modeling demonstration which shows that these monitored violations resulted from both stack and fugitive process emissions during plant operations. It is important to note that there are some minor technical deficiencies in the modeling and air quality demonstration that were performed to assess the impact of the facility. However, it is clear that, because the source is shut down, and its major emission points eliminated, the U.S. Metals facility will no longer cause violations of the lead standard. However, it also shows that wind-blown dust from piles of baghouse dust which had accumulated were a significant contributor to the high ambient concentration of lead and that operations at the Anchor Abrasives plant (which processes slag that was generated by USMR), located in Carteret adjacent to the USMR facility, have no significant effect on the ambient lead concentrations ($<.001$ ton/year).

Operations at the USMR facility have now been permanently terminated and the piles of dust which contributed to the ambient concentration have been removed. Therefore, the control strategy needed for the attainment and maintenance of the NAAQS includes the permanent shutdown of the plant's significant lead emitting operations, the removal of loose piles of baghouse dust, and other measures, such as wetting down and vacuum sweeping, to prevent any lead contaminated dust from being blown away. Similar dust control measures will be implemented during the dismantling of the plant and monitoring will be continued until attainment of the standard has been demonstrated for two consecutive years. NJDEP will be notified in advance by USMR of each phase of the demolition and dismantling of the facility.

Finding

EPA finds that the measures being carried out by USMR to end operations, remove the dust piles, and control wind-blown dust will provide for the attainment and continued maintenance of the lead standard at this location.

EPA is soliciting public comments on this notice and on issues relevant to EPA's proposed action. Comments will be considered before taking final action. Interested parties may participate in the federal rulemaking procedure by submitting written comments to the address noted at the beginning of today's notice.

The revisions are being proposed under a procedure called "parallel processing" (June 23, 1982, 47 FR 27073). If the proposed revision is substantially changed by the State from that specified in today's notice, EPA may request additional public comment. Otherwise, EPA proposes to take final rulemaking action. The final rulemaking action by EPA will occur only after the SIP revision has been adopted by New Jersey and submitted to EPA for incorporation into the SIP. Parallel processing will reduce the time necessary for final approval of this SIP revision.

Conclusions

EPA is proposing to approve the revision pertaining to the Borough of Carteret as a part of the New Jersey lead SIP. EPA is proposing expressly to incorporate the strategy for the USMR facility into the SIP for the State of New Jersey. This revision has been found to fulfill the commitment made by New Jersey in its lead SIP to study the facility and implement appropriate control measures.

This notice is issued as required by Section 110 of the Clean Air Act, as amended. The Administrator's decision regarding the approval of this plan revision is based on its meeting the requirements of section 110 of the Clean Air Act and 40 CFR Part 51.

Under 5 U.S.C. section 605(b), I certify that this SIP revision will not have a significant impact on a substantial number of small entities. (See 46 FR 8709.)

The Office of Management and Budget has exempted this rule from the

requirements of section 3 of Executive Order 12291.

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Public Health Service

42 CFR Part 84

Revision of Tests and Requirements for Certification of Permissibility of Respiratory Protective Devices Used in Mines and Mining

AGENCY: National Institute for Occupational Safety and Health (NIOSH), Centers for Disease Control (CDC), Public Health Service, HHS.

ACTION: Proposed rule; extension of comment period, change in address and notice of meetings.

SUMMARY: On August 27, 1987, the National Institute for Occupational Safety and Health published in the **Federal Register** (52 FR 32401) a proposed rule for certification of respiratory protective devices. Due to requests from the public, this Notice announces that NIOSH is extending the period for public comment on its proposed rule. The close of the comment period has been changed from October 26, 1987, to December 28, 1987.

The administrative record for this rulemaking may be viewed in the NIOSH Docket Office in Atlanta, Georgia, during normal business hours of 8 a.m. to 4:30 p.m., Monday through Friday, except for Federal holidays. Due to requests from the public, this Notice further announces informal public meetings on that proposed rule in San Francisco, California, and Washington, DC, on the dates and at the addresses listed below.

DATES: Written comments on the proposed rule must be received at the NIOSH Docket Office before the close of business on December 28, 1987. Informal public meetings on the proposed rule are scheduled to begin at 9 a.m. on January 20, 1988, in San Francisco, California, and at 9 a.m. on January 27, 1988, in Washington, DC. The San Francisco meeting is scheduled for 1 day and the Washington meeting is scheduled for 2 days. Interested persons wishing to provide oral comments at one of the informal public meetings should file a request for appearance with the NIOSH Docket Office no later than the close of business January 5, 1988, for the San Francisco meeting and no later than the close of business January 12, 1988, for the Washington meeting. The record of the informal public meetings will remain open for 30 days following the close of the Washington meeting to allow interested persons to submit written statements or comments regarding oral presentations made at either public meeting.

ADDRESSES: Comments on the proposed rule should be mailed in triplicate to the NIOSH Docket Office, Mail Stop E–23, 1600 Clifton Road, NE, Atlanta, Georgia 30333. The Docket Office is now located at Room 506, 255 East Paces Ferry Road, NE, Atlanta, Georgia, telephone (404) 264–6890. These are changes from the address listed in the proposed rule. However, comments received at the address listed in the proposed rule will be forwarded to Atlanta.

Requests to participate in the public meetings should be mailed in duplicate to the NIOSH Docket Officer, Mail Stop E–23, 1600 Clifton Road, NE, Atlanta, Georgia 30333. The public meeting in San Francisco, California, on January 20, 1988, will be held at Room 300, City and County of San Francisco Public Health Building, 101 Grove Street, San Francisco. The public meeting in Washington, DC, on January 27–28, 1988, will be held at the First Floor Auditorium, back of the Great Hall, Hubert H. Humphrey Building, 200 Independence Avenue, SW., Washington, DC 20201.

FOR FURTHER INFORMATION CONTACT: Dr. Nelson Leidel, Docket Officer, National Institute for Occupational Safety and Health, Mail Stop D–37, 1600 Clifton Road, NE., Atlanta, Georgia 30333, telephone (404) 264–6890 or (404) 329–3901

SUPPLEMENTARY INFORMATION: The administrative record of this rulemaking will consist of the August 28, 1987, Notice of Proposed Rulemaking, all other relevant **Federal Register** notices, agency records on this subject, all written submissions made in response to the Notices, and the record of the informal public meetings. The record of the informal public meetings will consist of the meeting schedules, transcripts made by NIOSH of the oral comments at the meetings, any written comments submitted by presenters at the meetings, and statements or comments regarding oral presentations made at either public meeting submitted by interested persons within 30 days following the close of the Washington public meeting. No written submission, or any portion thereof, made in response to this Notice will be received or held in confidence. The administrative record of the rulemaking will be made available for viewing and copying in the NIOSH Docket Office. All requests for any portion of the administrative record must be submitted in writing.

To facilitate computer entry of written comments into the administrative record, parties are encouraged, but not required, to submit all written comments in a format meeting the following guidelines: each of the three copies should be on paper measuring 8½-inch by 11-inch paper; with double-spaced text having top, bottom, and side margins of at least 1-inch width; and typed with a Courier 10, Courier 12, Courier 72, Elite 12, Letter Gothic, Prestige Pica 10, or Prestige Elite 12 typeface.

All interested persons are encouraged to submit written comments to assure receipt on or before the close of business December 28, 1987, and to advise the NIOSH Docket Office by the necessary date of their intent to participate in one of the informal public meetings. All requests for appearance at one of the informal public meetings should contain the name, address, and telephone number, any business affiliation of the person desiring to make a presentation, a brief summary of the presentation, and the approximate time requested for the presentation. NIOSH requests that oral presentations be limited to 15 minutes, if possible. Groups having similar interests are requested to combine their comments and present them through a single representative. NIOSH will assign the time available for each meeting among the persons who properly file a request for appearance.

After reviewing the submitted summaries and the requests for appearance, NIOSH will schedule each appearance and notify each participant by mail or telephone of the time assigned to the person and the approximate time the person's oral presentation is scheduled to begin. The meeting schedules will be placed on file in the NIOSH Docket Office.

The proceedings of the meetings will be transcribed. Any interested person may, consistent with the orderly conduct of each meeting, record or otherwise make a transcript of each meeting. Each participant may present relevant written information, data, or views for inclusion in the record of the meetings.

Any person who desires to submit an advance written statement may file three copies with the NIOSH Docket Office. A participant may be accompanied by a reasonable number of additional persons, space permitting.

If a participant is not present when his or her presentation is scheduled to begin, the remaining participants will be heard in order. At the conclusion of a meeting, an attempt will be made to hear any scheduled participants who missed his or her assigned time. Interested persons attending a meeting who did not request an opportunity to make an oral presentation may be given an opportunity to do so at the conclusion of each meeting, at the discretion of the presiding officer.

Dated: October 2, 1987.

Larry W. Sparks,

Executive Officer, National Institute for Occupational Safety and Health.

BILLING CODE 4160-19-M

DEPARTMENT OF THE INTERIOR

Fish and Wildlife Service

50 CFR Part 17

Endangered and Threatened Wildlife and Plants; Extension of Comment Period on Proposal to Reclassify Wild Nile Crocodile Populations in Zimbabwe From Endangered to Threatened

AGENCY: Fish and Wildlife Service, Interior.

ACTION: Proposed rule; extension of comment peirod.

SUMMARY: The Service extends the comment period on a proposed rule to reclassify wild Nile crocodile populations in Zimbabwe from endangered to threatened.

DATE: Comments on this proposal must be received by November 1, 1987.

ADDRESS: Comments and other information concerning the proposal should be sent to the Director (OES), Broyhill 500, U.S. Fish and Wildlife Service, Washington, DC 20240. Comments and materials received will be available for public inspection, by appointment, during normal business hours at the above address.

SUPPLEMENTARY INFORMATION:

Background

The Nile crocodile occurs along the lower Nile, in parts of tropical and southern Africa, and in Madagascar. In 1983, the Conference of the Parties to the Convention on International Trade in Endangered Species of Wild Fauna and Flora moved Nile Crocodile populations in Zimbabwe from Appendix I to II. This change in status recognized that Zimbabwe populations are not in immediate danger of extinction, but that certain threats still exist to the species, and prompted the Service to reclassify Zimbabwe's ranched Nile crocodiles from endangered to threatened (52 FR 23148).

On June 17, 1987 (52 FR 23152), the Service published a proposed rule to reclassify wild Nile crocodiles in Zimbabwe from endangered to threatened under section 4 of the Endangered Species Act of 1973. Because the Government of Zimbabwe did not have enough time to comment on the proposed rule, and because the Service desires to avail itself of the most complete and current information available in diciding a final course action, the period for comment on this proposal is extended to November 1, 1987. All information received by November 1, 1987, will be considered. The Service hereby requests all interested parties to provide any additional information regarding wild populations of the Nile crocodile in Zimbabwe

DEPARTMENT OF AGRICULTURE

Animal and Plant Health Inspection Service

[Docket No. 87-112]

Genetically Engineered Tobacco Plant; Determination of Plant Pest Risk Status

AGENCY: Animal and Plant Health Inspection Service, USDA.

ACTION: Notice.

SUMMARY: The Animal and Plant Health Inspection Service (APHIS) has reviewed a protocol submitted by Calgene, Inc., Davis, California, for the field testing of genetically engineered herbicide resistant tobacco plants. Based upon the data submitted in the protocol, APHIS has made a determination of the plant pest risk of the genetically engineered tobacco plants. APHIS has concluded that the field testing of the genetically engineered tobacco plants does not present a risk of plant pest introduction or dissemination.

ADDRESS: Copies of the APHIS opinion latter may be obtained by contacting Shirley Ingebritsen, Biotechnology and Environmental Coordination Staff, Animal and Plant Health Inspection Sercice, U.S. Department of Agriculture, Room 406, Federal Building, 6505 Belcrest Road, Hyattsville, MD 20782, 301–436–7907.

FOR FURTHER INFORMATION CONTACT: Mr. Terry L. Medley, Director, Biotechnology Environmental and Coordination Staff, Animal and Plant Health Inspection Service, U.S. Department of Agriculture, Room 406, Federal Building, 6505 Belcrest Road, Hyattsville, MD 20782, 301–436–7602.

SUPPLEMENTARY INFORMATION: On April 16, 1987, Calgene Inc., of Davis, California, submitted to the Animal and Plant Health Inspection Service (APHIS) a protocol for the field testing of genetically engineered tobacco plants in Yolo County, California. The genetically engineered tobacco plants were altered by the addition of a single gene, from the bacterium *Salmonella typhimurium*, for the purpose of making the plants resistant to glyphosate herbicide. The field testing is designed to evaluate the performance of the tobacco plants against glyphosate under field conditions.

The Federal Plant Pest Act, as amended (7 U.S.C. 150aa through 150jj), and regulations issued thereunder, requires APHIS to prevent the introduction and dissemination of plant pests in the United States. Pursuant to the Calgene, Inc. request, APHIS has reviewed the Calgene protocol to determine the plant pest risk of the proposed field trial of the genetically engineered tobacco plants. APHIS has determined that the proposed field trial of the genetically engineered tobacco plants does not present a risk of plant pest introduction or dissemination. The APHIS determination is not in the form of a "permit," but rather is an opinion letter, dated June 10, 1987, which concludes that the genetically engineered tobacco plants do not present a risk of plant pest introduction or dissemination.

The basis for this determination was as follows:

1. The plasmid of *Agrobacterium tumefaciens* used to infect and transform the subject tobacco plants was biologically "disarmed" and the transformed tobacco cells were tested and shown to be free of *A. tumefaciens*. Therefore, it is extremely unlikely that the plasmid used to transfer to the tobacco plants, the gene *aroA* for 5-enopyruvl shikimate-3-phosphate (EPSP) synthase, which is the glyphosate resistance gene, and the antibiotic marker would be able to incite disease in the recipient plant or to escape and infect other plants in the environment.

2. Both the Kanamycin (antibiotic marker) and the herbicide resistance genes have been stably incorporated into the genome of the recipient tobacco plants. The risk of horizontal movement of these genetic traits from the experimental tobacco plants into the genetic environment is negligible because of their stable incorporation and the complete lack of a suitable mechanism to vector the genetic material.

3. The donor organism used to supply the glyphosate resistance gene (*aro*A) was the bacterium *Salmonella typhimurium*. The modified *aro*A gene codes for an enzyme (EPSP synthase) that is less sensitive to glyphosate than its wild-type counterpart. A complete description of the modified *aro*A gene, including the method of isolation and complete gene sequence, is contained in two papers published in refereed journals. Data is provided to show that the modified *aro*A gene is stably integrated in these tobacco lines and spread of the genetic determinant will be prevented by rigorous monitoring and prevention of flowering and concomitant pollen production. Therefore, spread of the gene does not pose a risk of plant pest introduction or dissemination. The other gene, Kanamycin resistance, which is also involved in the transformation of the tobacco, has no inherent plant pest characteristics, and functions only as a genetic marker in the initial cell selection process following transformation. Therefore, it poses no plant pest risk.

4. It appears that the field test is to be conducted in such a way to insure that there will be no significant risk of plant material from field testing surviving in the environment beyond the termination of the experiment, or becoming mixed with the genetic material of other tobacco populations outside of the test site at the Yolo County, California, facility.

Done in Washington, DC, this 5th day of October, 1987.

W.F. Helms,

Deputy Administrator, Plant Protection and Quarantine, Animal and Plant Health Inspection Service.

BILLING CODE 3410–34–M

DEPARTMENT OF COMMERCE

Agency Form Under Review by Office of Management and Budget

DOC has submitted to OMB for clearance the following proposal for collection of information under the provisions of the Paperwork Reduction Act (44 U.S.C. Chapter 35).

Agency: International Trade Administration

Title: Participation Agreement

Form Numbers: Agency—ITA 4008P and 4008P(a); OMB—0625–0147
Type of Request: Extension of the expiration date of a currently approved collection
Burden: 3,000 respondents; 1,000 reporting hours
Needs and Uses: The International Trade Administration sponsors up to 200 overseas trade promotion events each fiscal year. These events include trade fairs, trade and seminar missions, and catalogue or video-catalogue shows in which U.S. companies display, demonstrate, and promote their goods and services in foreign markets. The Participation Agreement is the vehicle by which individual firms agree to participate in ITA's trade promotion program, identify the products or services they intend to sell or promote, and record their required financial contribution to the Department of Commerce.
Affected Public: Businesses or other for-profit institutions; small businesses or organizations
Frequency: On occasion
Respondent's Obligation: Required to obtain or retain a benefit
OMB Desk Officer: John Griffen, 395–7340

Copies of the above information collection proposal can be obtained by calling or writing DOC Clearance Officer, Edward Michals, (202) 377–3271, Department of Commerce, Room 6622, 14th and Constitution Avenue NW., Washington, DC 20230.

Written comments and recommendations for the proposed information collection should be sent to John Griffen, OMB Desk Officer, Room 3228, New Executive Office Building, Washington, DC 20503.

Dated: October 5, 1987.

Edward Michals,

Departmental Clearance Officer, Office of Management and Organization.

BILLING CODE 3510–CW–M

International Trade Administration

Export Trade Certificate of Review

ACTION: Notice of application for an amendment to an Export Trade Certificate of Review.

SUMMARY: The Office of Export Trading Company Affairs, International Trade Administration, Department of Commerce, has received an application for an amendment to an Export Trade Certificate of Review. This notice summarizes the amendment and requests comments relevant to whether the certificate should be amended.

FOR FURTHER INFORMATION CONTACT: George Muller, Acting Director, Office of Export Trading Company Affairs, International Trade Administration, 202/377–5131. This is not a toll-free number.

SUPPLEMENTARY INFORMATION: Title III of the Export Trading Company Act of 1982 (Pub. L. 97–290) authorizes the Secretary of Commerce to issue Export Trade Certificates of Review. A certificate of review protects its holder and the members identified in it from private treble damage actions and from civil and criminal liability under Federal and state antitrust laws for the export conduct specified in the certificate and carried out during its effective period in compliance with its terms and conditions. Section 302(b)(1) of the Act and 15 CFR 325.6(a) require the Secretary to publish a notice in the **Federal Register** identifying the applicant and summarizing its proposed export conduct.

Request for Public Comments

Interested parties may submit written comments relevant to the determination whether a certificate should be issued. An original and five (5) copies should be submitted no later than 20 days after the date of this notice to: Office of Export Trading Company Affairs, International Trade Administration, Department of Commerce, Room 5618, Washington, DC 20230. Information submitted by any person is exempt from disclosure under the Freedom of Information Act (5 U.S.C. 552). Comments should refer to this application as "Export Trade Certificate of Review, application number 85–A0015."

OETCA has received the following application for an amendment to Export Trade Certificate of Review #85–00015, which was issued on January 27, 1986 (51 FR 3996, January 31, 1986)

Applicant: California Dried Fruit Export Trading Company, 64 North Fulton Street; P.O. Box 12148, Fresno, California 93776, Contact: Mr. Kermit W. Almstedt, Legal Counsel, Telephone: (202) 383–5367.
Application #: 85–A0015
Date Deemed Submitted: September 28, 1987

Current Members (in addition to applicant): A & M Farms, Inc.; American Raisin Packers; Boghosian Raisin Packing Co., Inc.; Bonner Packing Company; California Prune Packing Co.; Caruthers Raisin Packing Company; Central California Raisin Packing Company; Champion Raisin International; Chooljian & Sons dba Del Rey Packing Company; Choolijian Bros. Packing Co., Inc.; Enoch Packing Co., Inc.; Lion Enterprises, Inc. (d/b/a Lion Dehydrator; Lion Packing Company, Lion Ranches); Lion Packing Company; National Raisin Company; Prize Exports, Inc.; Sun-Diamond Growers of California; Sun-Maid Growers of California; Sunsweet Growers Inc.; Tagus Ranch Packing; and Victor Packing, Inc.

Summary of the Application

California Dried Fruit Export Trading Company seeks to add the following entities as "Members" of the certificate:

1. Fresno Cooperative Raisin Growers, Inc. of Fresno, California.
2. Madera Raisin Sales Co. of Madera, California.
3. West Coast Growers and Packers, Inc. of Selma, California (controlling entity: Commercial International Corporation).

Dated: October 5, 1987.

George Muller,

Acting Director, Office of Export Trading Company Affairs.

BILLING CODE 3510–DR–M

Switching Subcommittee of the Telecommunications Equipment Technical Advisory Committee; Partially Closed Meeting

A meeting of the Switching Subcommittee of the Telecommunications Equipment Technical Advisory Committee will be held October 28, 1987, 9:30 a.m., Room 3708, at the Herbert C. Hoover Building, 14th Street and Constitution Avenue, NW., Washington, DC. The Switching Subcommittee was formed to study computer controlled switching equipment with the goal of making recommendations to the Office of Technology & Policy Analysis relating to the appropriate parameters for controlling exports for reasons of national security.

Agenda

1. Opening remarks by the Chairman.
2. Presentation of papers or comments by the public.
3. Discussion of sensitivity hierarchy of technical data transfer for switching.

Executive Session

5. Discussion of matters properly classified under Executive Order 12356, dealing with the U.S. and COCOM control program and strategic criteria related thereto.

The general session of the meeting will be open to the public and a limited number of seats will be available. To the

extent time permits, members of the public may present oral statements to the Committee. Written statements may be submitted at any time before or after the meeting. The Assistant Secretary for Administration, with the concurrence of the delegate of the General Counsel, formally determined on January 10, 1986, pursuant to section 10(d) of the Federal Advisory Committee Act, as amended by section 5(c) of the Government in the Sunshine Act, Pub. L. 94–409, that the matters to be discussed in the Executive Session should be exempt from the provisions of the Federal Advisory Committee Act relating to open meetings and public participation therein, because the Executive Session will be concerned with matters listed in 5 U.S.C. 552b(c)(1) and are properly classified under Executive Order 12356. A copy of the Notice of Determination to close meetings or portions thereof is available for public inspection and copying in the Central Reference and Records Inspection Facility, Room 6628, U.S. Department of Commerce, Telephone: (202) 377–4217. For further information or copies of the minutes, call Betty Ferrell at (202) 377–4959.

Date: October 2, 1987.

Margaret A. Cornejo,

Director, Technical Support Staff, Office of Technology and Policy Analysis.

[FR Doc. 87–23272 Filed 10–7–87; 8:45 am]

BILLING CODE 3510–DT–M

Telecommunications Equipment Technical Advisory Committee; Partially Closed Meeting

A meeting of the Telecommunications Equipment Technical Advisory Committee will be held October 27, 1987, 9:30 a.m. Herbert C. Hoover Building, Room B841, 14th Street and Constitution Avenue, NW., Washington, DC. The Committee advises the Office of Technology and Policy Analysis with respect to technical questions that affect the level of export controls applicable to telecommunications and related equipment or technology.

Agenda

1. Opening remarks by the Chairperson.
2. Review and approval of the minutes of August 11, 1987, meeting.
3. Presentation of papers or comments by the public.

Executive Session

4. Discussion of matters properly classified under Executive Order 12356, dealing with the U.S. and COCOM control program and strategic criteria related thereto.

The general session of the meeting will be open to the public and a limited number of seats will be available. To the extent time permits, members of the public may present oral statements to the Committee. Written statements may be submitted at any time before or after the meeting.

The Assistant Secretary for Administration, with the concurrence of the delegate of the General Counsel, formally determined on January 10, 1986, pursuant to section 10(d) of the Federal Advisory Committee Act, as amended by section 5(c) of the Government in the Sunshine Act, Pub. L. 94–409, that the matters to be discussed in the Executive Session should be exempt from the provisions of the Federal Advisory Committee Act relating to open meetings and public participation therein, because the Executive Session will be concerned with matters listed in 5 U.S.C. 552b(c)(1) and are properly classified under Executive Order 12356.

A copy of the Notice of Determination to close meetings or portions thereof is available for public inspection and copying in the Central Reference and Records Inspection Facility, Room 6628, U.S. Department of Commerce, Telephone: (202) 377–4217. For further information or copies of the minutes, call Betty Ferrell at (202) 377–4959.

Date: October 2, 1987.

Margaret A. Cornejo,

Director, Technical Support Staff, Office of Technology and Policy Analysis.

COMMITTEE FOR PURCHASE FROM THE BLIND AND OTHER SEVERELY HANDICAPPED

Procurement List 1987; Addition; Correction

In FR Doc. 87–22139 appearing on page 36084 in the issue of Friday, September 25, 1987, make the following correction:

On page 36084, under the listing for Screwdriver, Flat Tip, the four-digit numbers reading "5210–" should read "5120–".

C.W. Fletcher,

Executive Director.

BILLING CODE 6820–33–M

DEPARTMENT OF DEFENSE

Department of the Air Force

USAF Scientific Advisory Board; Meeting

September 29, 1987.

The USAF Scientific Advisory Board Armament Division Advisory Group will meet on November 18, 1987, from 8:00 a.m. to 5:00 p.m. and on November 19, 1987, from 8:00 a.m. to 3:00 p.m. at Armament Division Headquarters, Building 1, Eglin Air Force Base, Florida.

The purpose of this meeting is to receive briefings on and to advise the Commander, Armament Division, on the sensor fuzed weapon full-scale development program.

This meeting will involve discussions of classified defense matters listed in section 552b(c) of Title 5, United States Code, specifically subparagraph (1) thereof, and accordingly will be closed to the public.

VOL 52 ISS 195 OC 8 1987 UMI

For further information, contact the Scientific Advisory Board Secretariat at (202) 697–4648.

Patsy J. Conner,

Air Force Federal Register Liaison Officer.

BILLING CODE 3910–01–M

Corps of Engineers; Department of the Army

Intent To Prepare a Joint Environmental Impact Statement (EIS)/Environmental Impact Report (EIR) for the Proposed San Pedro Bay Ports 2020 Plan; Phase I/Los Angeles; Long Beach Harbors Feasibility Study, Los Angeles County, CA

AGENCY: Los Angeles District, U.S. Army Corps of Engineers, Department of Defense and the Port of Los Angeles and the Port of Long Beach.

ACTION: Notice of intent to prepare a joint Environmental Impact Statement (EIS)/Environmental Impact Report (EIR).

SUMMARY:

1. Proposed Action

A joint Environmental Impact Statement (EIS)/Environmental Impact Report (EIR) will be prepared to evaluate alternatives to the proposed San Pedro Bay Ports 2020 Plan Phase I/ Los Angeles—Long Beach Harbors Feasibility Study. This EIS/EIR is being prepared for two purposes. The first is to satisfy the Corps of Engineers regulatory requirements for evaluation of permit applications for dredging and landfilling activities associated with Phase I projects pursuant to section 10 of the Rivers and Harbors Act and section 404 of the Clean Water Act. These projects include Pier K in the Port of Long Beach, the South landfill (Pier 400) in the Port of Los Angeles, and a joint transportation corridor. In addition, the Port of Long Beach Pier J landfill and the Port of Los Angeles Pactex Project are considered part of the Phase I of the 2020 Plan for the purposes of the Federal Feasibility Study. The environmental documents already published for these two projects shall be incorporated by reference. The second purpose for preparation of the EIS/EIR is to satisfy requirements for environmental review of the proposed Corps of Engineers' Feasibility Study for channel improvements.

2. Alternatives

The proposed project consists of creating landfill in the outer portion of San Pedro Bay within both the Port of Los Angeles and the Port of Long Beach, creation of landfill to support a joint transportation corridor to Terminal Island, and dredging navigation channels to planned and existing landfills. Approximately 1200 acres of landfill may be created. Alternatives to be evaluated will include, but not necessarily be limited to, no project, other landfill configurations, other nonlandfill alternatives which could accommodate projected increases in cargo, and ocean disposal of material dredged from the navigation channels.

3. Scoping Process

An extensive mailing list is being developed which includes Federal, state, and local agencies and other interested public and private organizations and parties. Each entity on the mailing list will receive a copy of the scoping public notice which will have details of the proposed studies and dates of public scoping meetings. Formal coordination with appropriate Federal, state, and local agencies has begun. Public meetings will be held during the review period of the draft EIS/EIR. Specific meeting dates, times, and places will be published in local newspapers.

4. Potentially Significant Issues

Potentially significant issues identified include impacts to water quality and circulation, biological resources, endangered species, land and water use, transportation, recreation, and cultural resources.

5. Availability of Joint EIS/EIR

The draft EIS/EIR is expected to be available to the public in early 1989.

6. Comments

Comments and questions regarding the project may be addressed to: U.S. Army Corps of Engineers, Los Angeles District, Attn: Ms. Shannon Cunniff, CESPL–PD–RP, P.O. Box 2711, Los Angeles, CA 90053–2325, (213) 894–0239.

Tadahiko Ono,

Colonel, Corps of Engineers, District Engineer.

BILLING CODE 3710–KF–M

DEPARTMENT OF ENERGY

Economic Regulatory Administration

[Docket No. ERA C&E 87–60; Certification Notice-5]

Filing of Certification of Compliance; Coal Capability of New Electric Powerplants; Texas-New Mexico Power Co. et al.

AGENCY: Economic Regulatory Administration, DOE.

ACTION: Notice of filing.

SUMMARY: Title II of the Powerplant and Industrial Fuel Use Act of 1978, as amended ("FUA" or "the Act") (42 U.S.C. 8301 *et seq.*) provides that no new electric powerplant may be constructed or operated as a base load powerplant without the capability to use coal or another alternate fuel as a primary energy source (section 201(a)). In order to meet the requirement of coal capability, the owner or operator of any new electric powerplant to be operated as a base load powerplant proposing to use natural gas or petroleum as its primary energy source may certify, pursuant to section 201(d) to the Secretary of Energy prior to construction, or prior to operation as a base load powerplant, that such powerplant has capability to use coal or another alternate fuel. Such certification establishes compliance with section 201(a) as of the date it is filed with the Secretary. The Secretary is required to publish in the **Federal Register** a notice reciting that the certificaiton has been filed. Three owners or operators of proposed new electric base load powerplants have filed self certifications in accordance with section (d). Further information is provided in the **SUPPLEMENTARY INFORMATION** section below.

SUPPLEMENTARY INFORMATION: The following companies filed self certifications:

Name	Date received	Type facility	Megawatt capacity	Location
Texas-New Mexico Power Company, Robertson County, TX	8–24–87	Combined Cycle	600	Robertson County, Texas
Ada Cogeneration, Walnut Creek, CA	9–9–87	Combined Cycle	29.5	Ada, MI
Enserch Development Corp., Houston, TX	9–16–87	Combined Cycle	255	Sweetwater, TX

Amendments to FUA on May 22, 1987 (Pub. L. 100-42) altered the general prohibitions to include only new electric baseload powerplants and to provide for the self certificaiton procedure.

Issued in Washington, DC, on September 24, 1987.

Robert L. Davies,

Director, Office of Fuels Programs, Economic Regulatory Administration.

BILLING CODE 6450-01-M

Federal Energy Regulatory Commission

[Docket Nos. ER87-670-000 et al.]

Montana Power Company et al.; Electric Rate and Corporate Regulation Filings

Take notice that the following filings have been made with the Commission:

1. Montana Power Edison

[Docket No. ER87-670-000]

October 1, 1987.

Take notice that on September 25, 1987, Montana Power Company (Montana Power) tendered for filing Notice of Cancellation of Montana Power Rate Schedules FERC Nos. 154, 155, 156, 157 (and Supplement No. 1), 158 (and Supplement No. 1), 159 (and Supplement No. 1), 160, 161 and 162. Montana Power states that the short term power sales agreements have expired and are to be cancelled in accordance with their own terms. Montana Power states that Notice of Cancellation have been submitted to the participating parties.

Comment date: October 15, 1987, in accordance with Standard Paragraph E at the end of this notice.

2. Carolina Power & Light Co.

[Docket No. ER87-676-000]

October 2, 1987.

Take notice that on September 28, 1987, Carolina Power & Light Company tendered for filing proposed changes in its Service Agreement FPC No. T1R1.S18. with the Wake Electric Membership Corporation (EMC). This filing reflects the installation of Wake EMC's new point of delivery, Pocomoke 115 kV, with an in-service date of early November 1987. The Pocomoke 115 kV point of delivery will have special metering facilities to provide metering pulse information as provided under Carolina Power & Light Company's additional facilities plan.

Comment date: October 19, 1987, in accordance with Standard Paragraph E at the end of this notice.

3. Central Illinois Public Service Co.

[Docket No. ES87-41-000]

October 2, 1987.

Take notice that on September 24, 1987, Central Illinois Public Service Company (Applicant), filed an Application with the Commission. pursuant to section 204 of the Federal Power Act, seeking authorization to issue from time to time, short-term debt obligations in the aggregate maximum principal amount not exceeding $120,000,000 outstanding at any time with final maturities not later than December 31, 1989.

Comment date: October 23, 1987, in accordance with Standard Paragraph E at the end of this notice.

4. Cliffs Electric Service Co., Upper Peninsula Generating Co., Upper Peninsula Power Co.

[Docket No. ER87-632-000]

October 2, 1987.

Take notice that on September 28, 1987, Cliffs Electric Service Company, Upper Peninsula Generating Company, and Upper Peninsula Power Company tendered for filing additional information to the 1978 Basic Agreement (FERC Rate Schedule No. 22). The information is a three page exhibit which sets forth the basis upon which the parties to the 1978 Basic Agreement negotiated a revision to the procedure by which costs associated with the new dispatch center will be shared.

Comment date: October 19, 1987, in accordance with Standard Paragraph E at the end of this document.

5. Gulf Power Co.

[Docket No. ER87-671-000]

Take notice that on September 28, 1987, Gulf Power Company (Gulf) tendered for filing revised sheets to the AEC-Gulf Power Company Interconnection Agreement. These revised sheets, consisting of Informational Schedules A, B, T (for Levels B-2, C, D, E), P-11 of Exhibit A, and M-14 of Exhibit T, reflect a reduction in rates for transmission service under Service Schedules A, B, and T resulting from a negotiated reduction in the return on common equity component of the formulary rates from 15.25% to 14.00%. These revisions are proposed to become effective for service on September 1, 1987; and Gulf, therefore, requests waiver of the Commission's notice requirements to allow such effective dates.

The customer has consented to the proposed tariff change as evidenced by the executed letter of consent submitted with the filing.

Comment date: October 19, 1987, in accordance with Standard Paragraph E at the end of this notice.

6. Idaho Power Co.

[Docket No. ER87-675-000]

October 2, 1987.

Take notice that on September 28, 1987, Idaho Power Company (IPCo) of Boise, Idaho, tendered for filing rate reductions in compliance with the Federal Energy Regulatory Commission Order No. 475 in Docket No. 87-4-000 re Rate Changes Relating to Corporate Income Tax Rates for Public Utilities.

This filing regards rate reductions in wholesale contracts with the City of Weiser, Idaho, CP National Company and Sierra Pacific Power Company and transmission service agreements with Utah Power & Light Company and Pacific Power & Light Company (June 1, 1974), Pacific Power & Light Company (September 10, 1980), Sierra Pacific Power Company (May 29, 1981) and Utah Power & Light Company (March 19, 1982).

IPCo states that it has served copies of its filing on all parties who purchase wholesale or firm transmission service from IPCo.

Comment date: October 19, 1987, in accordance with Standard Paragraph E at the end of this notice.

7. Iowa Electric Light and Power Co.

[Docket No. ES87-42-000]

October 2, 1987.

Take notice that on September 25, 1987, the Iowa Electric Light and Power Company (Applicant) filed an Application pursuant to section 204 of the Federal Power Act with the Federal Energy Regulatory Commission (Commission) seeking authority to issue short-term notes in the aggregate principal amount of $75,000,000 with a final maturity date no later than December 31, 1990.

Comment date: October 27, 1987, in accordance with Standard Paragraph E at the end of this notice.

8. Kentucky Utilities Co.

[Docket No. ER87-672-000]

October 2, 1987.

Take notice that on September 28, 1987, Kentucky Utilities Company (KU) tendered for filing an agreement for electric service to the City of Nicholasville (City) at the delivery point of the City's Shun Road Substation.

KU states that no reasonable billing estimates can be made since the load served will build up over a period of time and other loads transferred from other delivery points from time to time.

VOL
52
ISS
195
OC
8
1987
UMI

KU further states that copies of the tendered filing have been sent to the City and the Kentucky Public Service Commission. KU proposed an effective date of October 15, 1987.

Comment date: October 19, 1987, in accordance with Standard Paragraph E at the end of this notice.

9. Northern States Power Co.

[Docket No. ER87-674-000]

October 2, 1987.

Take notice that on September 28, 1987, Northern States Power Company (Minnesota) tendered for filing the Supplement No. 3 to the Transmission Service Agreement between Northern States Power Company (NSP) and the State of South Dakota.

The Supplement No. 3 provides for a change in the amount of power and energy required to be wheeled by Northern States Power Company for the State of South Dakota from the Western Area Power Administration. The Transmission Service Agreement is on file with the Commission and is designated as FERC Rate Schedule No. 385.

Northern States Power Company requests this Supplement become effective on April 20, 1987, and therefore, requests waiver of the Commission's notice requirements.

Comment date: October 19, 1987, in accordance with Standard Paragraph E at the end of this notice.

10. Public Service Co. of New Mexico

[Docket No. ER87-673-000]

October 2, 1987.

Take notice that on September 28, 1987, Public Service Company of New Mexico (PNM) tendered for filing a Precommercial Energy Sale Letter Agreement (Letter Agreement) between PNM and San Diego Gas & Electric Company (SDG&E).

The service to be provided under the Letter Agreement is the sale to SDG&E of varying amounts of on-peak and off-peak PNM precommercial energy generated by Palo Verde Nuclear Generating Station Unit 3. The price for the precommercial energy is based on 87 percent of SDG&E's hourly decremental costs, not to exceed $27/MWh on-peak and $17/MWh off/peak.

PNM requests an effective date of August 3, 1987, and therefore requests waiver of the Commission's notice requirements.

Copies of the filing were served upon SDG&E and the New Mexico Public Service Commission.

Comment date: October 19, 1987, in accordance with Standard Paragraph E at the end of this document.

Standard Paragraph:

E. Any person desiring to be heard or to protest said filing should file a motion to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, DC 20426, in accordance with Rules 211 and 214 of the Commission's Rules of Practice and Procedure (18 CFR 385.211 and 385.214). All such motions or protests should be filed on or before the comment date. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a motion to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

Kenneth F. Plumb,

Secretary.

[FR Doc. 87-23324 Filed 10-7-87; 8:45 am]

BILLING CODE 6717-01-M

[Docket Nos. CP87-539-000 et al.]

Tennessee Gas Pipeline Co. et al.; Natural Gas Certificate Filings

Take notice that the following filings have been made with the Commission:

1. Tennessee Gas Pipeline Co. a Division of Tenneco Inc.

[Docket No. CP87-539-000]

September 29, 1987.

Take notice that on September 15, 1987, Tennessee Gas Pipeline Company, a Division of Tenneco Inc. (Tennessee), P.O. Box 2511, Houston, Texas 77252, filed in Docket No. CP87-539-000, as supplemented on September 28, 1987, a request pursuant to § 157.205 of the Regulations under the Natural Gas Act (18 CFR 157.205) for authorization to reassign volumes of gas authorized for delivery to Connecticut Natural Gas Corporation (Connecticut Natural) near Greenwich, Connecticut to an existing delivery point near Putnam Lake, Connecticut and to upgrade the Putnam Lake metering facilities, under the authorization issued in Docket No. CP82-413-000 pursuant to section 7 of the Natural Gas Act, all as more fully set forth in the request which is on file with the Commission and open to public inspection.

Tennessee states that it presently provides service to Connecticut Natural of up to 36,794 Mcf of natural gas per day at several points, including the Greenwich and Putnam Lake delivery points. Tennessee has been authorized, in Docket Nos. CP86-251-000 and CP86-251-001, to deliver an additional 2,000 Mcf per day at the Greenwich delivery point, it is stated. Tennessee states that Connecticut Natural has requested that delivery of the additional 2,000 Mcf per day be made at Putnam Lake rather than at Greenwich. Tennessee further states that the total volumes to be delivered to Connecticut Natural under the proposed reassignment would not exceed the presently authorized delivery volumes and the change is not prohibited by Tennessee's existing tariff.

Comment date: November 13, 1987, in accordance with Standard Paragraph G at the end of this notice.

2. Lone Star Gas Co. a Division of Enserch Corp.

[Docket No. CP87-555-000]

September 29, 1987.

Take notice that on September 24, 1987, Lone Star Gas Company, a Division of Enserch Corporation (Applicant), 301 South Harwood Street, Dallas, Texas 75201, filed in Docket No. CP87-555-000 an application pursuant to section 7(c) and 7(b) of the Natural Gas Act for a certificate of public convenience and necessity authorizing the construction and operation of certain facilities and for permission and approval to abandon certain facilities, all as more fully set forth in the application which is on file with the Commission and open to public inspection.

Applicant requests authorization to install and operate a 370 horsepower compressor station on its Line H-3, replace 2.80 miles of its 4-inch pipeline H-3 with 6-inch and 4-inch pipeline, and a crossover between its Line H-3 and Line T. Applicant also requests authorization to construct and operate facilities necessary to connect to its Line T all existing taps on a portion of its existing Line H-3 in interstate commerce, and to operate a pipebridge in interstate commerce. Applicant further requests authorization to abandon approximately 13.4 miles of its Line H and a small portion of its Line H-1.

The facilities Applicant proposes to construct, operate and/or abandon are or will be located in Cotton County, Oklahoma and Clay County, Texas, it is stated. Applicant estimates that the cost of the facilities to be constructed will be $430,910.

Applicant states that the requested proposed construction and abandonment of facilities are necessary because of recent flooding in the North Texas area damaged Applicant's Lines H and T at the Red River.

Comment date: October 13, 1987, in accordance with Standard Paragraph F at the end of this notice.

3. El Paso Natural Gas Co.

[Docket No. CP87–553–000]

October 1, 1987.

Take notice that on September 22, 1987, El Paso Natural Gas Company (El Paso), a Delaware corporation, whose mailing address is P.O. Box 1492, El Paso, Texas, 79978, filed an application in Docket No. CP87–553–000 under section 7(b) of the Natural Gas Act, for permission and approval to abandon certain services and properties to El Paso Production Company (El Paso Production) effective July 1, 1986, all as more fully set forth in the application on file with the Commission and open to public inspection.

The application states that on February 6, 1987, El Paso Production filed with the Commission an application in Docket No. CI87–290–000 for authorization to sell and deliver natural gas to El Paso, as successor-in-interest to El Paso, effective July 1, 1986. The instant application is a companion to El Paso Production's successor-in-interest application in Docket No. CI87–290–000. The details of the transfer of El Paso's title and interest in certain gas properties to El Paso Production is fully described in El Paso Production's companion application in Docket No. CI87–290–000. Applicant states that the transfer is a result of corporate consolidation of the overall responsibilities for the exploration, development, and production of natural gas from these transferred properties into a separate corporate entity, whose primary purpose is the production of oil and natural gas. Accordingly, in connection with the corporate realignment of responsibilities as to these properties, El Paso proposes to abandon said properties (together with wells, wellhead equipment and appurtenances) by transfer to El Paso Production. Applicant states that all of the acreage transferred to El Paso Production subject to this application continues to be committed to El Paso and its customers and that, upon approval, the sale and price of the gas will continue to be subject to present and future orders, rules and regulations of the Commission.

As described more fully in El Paso Production's companion application in Docket No. CI87–290–000, El Paso has transferred to El Paso Production all of its interest in producing properties, including wells, wellhead equipment, and apputenances for two categories of gas production, "Old Wells on Old Leases"—production from wells commended prior to January 1, 1973 on leases acquired prior to October 8, 1969 and "New Wells on Old Leases"—Production from wells commenced on or after January 1, 1973, on leases acquired prior to October 8, 1969, as such classifications are established according to the manner in which the gas production therefrom is to be valued or priced by El Paso in accordance with Section 11.3 of the Stipulation and Agreement in Settlement of Rate Proceedings filed March 16, 1983 in Docket No. RP82–33–000, *et al.* Accordingly, El Paso seeks those regulatory approvals necessary under the NGA in connection with the transfer of its interest in certain gas producing properties to El Paso effective July 1, 1986.

Comment date: October 16, 1987, in accordance with Standard Paragraph F at the end of this notice.

4. Algonquin Gas Transmission Co.

[Docket No. CP87–554–000]

October 2, 1987.

Take notice that on September 23, 1987, Algonquin Gas Transmission Company (Applicant), 1284 Soldiers Field Road, Boston, Massachusetts 02135, filed in Docket No. CP87–554–000 an application pursuant to section 7(c) of the Natural Gas Act for a certificate of public convenience and necessity for authorization to render a firm transportation service and to construct and operate certain required facilities, all as more fully set forth in the application which is on file with the Commission and open to public inspection.

Applicant proposes to render a firm transportation service to Bristol and Warren Gas Company, Central Hudson Gas & Electric Corporation, Colonial Gas Company, Town of Middleborough, Massachusetts, The Pequot Gas Company, South County Gas Company and Valley Gas Company (collectively referred to as the Algonquin Shippers) pursuant to a proposed Rate Schedule PSS–T to be filed as part of Applicant's FERC Gas Tariff Second Revised Volume No. 1. It is indicated that Rate Schedule PSS–T service is related to a long-term firm storage and firm transportation service to be rendered by PennEast Gas Services Company (PennEast). It is further indicated that such storage and transportation service by PennEast would be offered for a primary term beginning April 1, 1988, and continuing through March 31, 2011.

Applicant proposes to provide the following maximum daily transportation quantities for the respective Algonquin Shippers:

FIRM TRANSPORATION QUANTITY IN MMBTU PER DAY

Customer	Nov. 15, 1988	Nov. 15, 1989	Nov. 15, 1990
Bristol and Warren Gas Company	784	778	781
Central Hudson Gas & Electric Corporation	3,855	5,741	5,763
Colonial Gas Company	1,992	1,978	1,986
Town of Middleborough, Massachusetts	149	198	249
The Pequot Gas Company	120	120	120
South County Gas Company	239	237	238
Valley Gas Company	963	956	960
Total	8,102	10,008	10,097

Applicant states that these Algonquin Shippers have requested Applicant to provide firm transportation service on Applicant's pipeline system for the gas quantities available to them from PennEast. Applicant further states that such service by Applicant would involve the receipt of gas from PennEast at Lambertville, New Jersey for the account of an Algonquin Shipper, transportation and redelivery on a firm basis of such quantities at designated deliver points with Applicant. It is indicated that the Algonquin Shippers requesting service have entered into precedent agreements (attach as Exhibit I to the application) with Applicant dated April 9, 1987, which contemplates commencement of initial firm transportation service by Applicant on or about November 15, 1988, pursuant to a service agreement under Rate Schedule PSS–T (attached as Exhibit P to the application).

In order to render the proposed firm transportation service, Applicant proposes to construct and operate the following facilities:

1. Approximately 1.3 miles of 16" G–4 system loop from the system tap to Woods Road in Tiverton, Rhode Island;

2. Approximately 0.6 miles of 16" G–5 system loop from the end of the existing G–5 system loop to downstream of Route 6 in Seekonk, Massachusetts;

3. Approximately 1.2 miles of 20" G–8 system loop from the end of the existing G–8 system 20-inch loop to the G–9 system tap in Plymouth, Massachusetts;

4. Approximately 1.2 miles of 12" I–4 system loop from the system tap to the Westwood Meter & Regulator Station in Westwood, Massachusetts;

5. A meter and regulator station at Cumberland, Rhode Island;

6. Miscellaneous meter station modifications; and

7. Restage various existing compressor units.

Applicant states that the proposed facilities would be constructed during the summer of 1988 for an in-service date of November 15, 1988. Applicant estimates the cost of the facilities to be $8,013,000.

Applicant proposes to recover its facilities costs through a PSS–T monthly demand charge. Applicant states that it would also charge a commodity charge for transportation quantities within the maximum daily quantity. Applicant further states that quantities in excess of the maximum daily quantity would be subject to overrun charges. It is indicated that the rates for commodity related charges are based upon those set forth in Applicant's pending section 4 rate filing in Docket No. RP87–14–000.

Common date: October 23, 1987, in accordance with Standard Paragraph F at the end of this notice.

5. K N Energy, Inc.

[Docket No. CP87–549–000]

October 2, 1987.

Take notice that on September 21, 1987, K N Energy, Inc. (Applicant), P.O. Box 15265, Lakewood, Colorado, 80215, filed in Docket No. CP87–549–000 a request pursuant to § 157.205 of the Regulations under the Natural Gas Act (18 CFR 157.205) that Applicant be allowed to operate a sales tap for the delivery of gas to an end-user under authorization issued in Docket Nos. CP83–140–000, CP83–140–001, and CP83–140–002 pursuant to section 7 of the Natural Gas Act, all as more fully set forth in the request which is on file with the Commission and open to public inspection.

Applicant proposes the operation of a sales tap to an end-user, Nucor Steel Corporation (Nucor), located near its jurisdictional pipeline in Madison County, Nebraska. Applicant states that the proposed sales tap is not prohibited by any of its existing tariffs, and that the sale will have no impact on K N's peak day and annual deliveries since K N presently serves Nucor indirectly.

Applicant proposes to sell approximately 4,500 Mcf on a peak day and 900,000 Mcf annually to Nucor. It is stated that the subject gas will be delivered through an existing sales tap via Minnegasco, Inc., a local distribution company and wholesale customer of Applicant. Applicant states that Minnegasco, in turn, resells the gas at retail to its customers, including Nucor, in and around the town of Norfolk, Nebraska. It is stated that Minnegasco supports the direct sale by Applicant to Nucor and has agreed to transport through its existing distribution system gas purchased by Nucor from Applicant, and to deliver such gas to Nucor at Nucor's steel plant located in Minnegasco's distribution system in the Norfolk area.

Comment date: November 16, 1987, in accordance with Standard Paragraph G at the end of this notice.

6. Northern Natural Gas Co., Division of Enron Corp.

[Docket No. CP87–542–000]

October 2, 1987.

Take notice that on September 16, 1987, Northern Natural Gas Company, Division of Enron Corp. (Northern), 2223 Dodge Street, Omaha, Nebraska 68102, filed in Docket No. CP87–542–000 a request pursuant to § 157.205 of the Commission's Regulations under the Natural Gas Act (18 CFR 157.205 and 157.216) for permission and approval to abandon certain metering facilities, under the certificate issued in Docket No. CP82–401–000 pursuant to section 7 of the Natural Gas Act, all as more fully set forth in the request on file with the Commission and open to public inspection.

Specifically, Northern proposes to abandon two 23M meters from its Black River Falls Town Border Station No. 2 located in Jackson County, Wisconsin. Northern explains that Black River Falls No. 2 was installed to deliver natural gas to Wisconsin Gas Company (Wisconsin Gas) for resale to Jackson County Iron Company (Jackson County Iron). Northern further explains that Jackson County Iron has shut down and that Wisconsin Gas has requested Northern to abandon and remove the two 23M at Black River Falls No. 2. Northern states that the meters would be removed and used elsewhere on Northern's system. It is explained that the estimated cost to remove the meters is $1,000.

Comment date: November 16, 1987, in accordance with Standard Paragraph G at the end of this notice.

7. Northern Natural Gas Co., Division of Enron Corp.

[Docket No. CP87–558–000]

October 1, 1987.

Take notice that on September 28, 1987, Northern Natural Gas Company, Division of Enron Corp. (Northern), 2223 Dodge Street, Omaha, Nebraska 68102, filed in Docket No. CP87–558–000 a request pursuant to § 157.205 of the Regulations under the Natural Gas Act (18 CFR 157.205) for authorization to realign certain volumes of Contract Demand and Seasonal Service to future deliveries of natural gas to Iowa Public Service Company (IPSC) and to modify two (2) delivery points and appurtenant facilities to be served by IPSC, under the certificate issued in Docket No. CP82–401–000 pursuant to section 7 of the Natural Gas Act, all as more fully set forth in the request on file with the Commission and open to public inspection.

Northern states that by letter dated September 9, 1987, IPSC advised Northern that it wished to realign certain volumes purchased under Northern's Rate Schedules CD–1 and SS–1 between existing delivery points commencing with the 1987/1988 contract year. Northern further states that in accordance with IPSC's request and the Service Agreements dated September 25, 1987, between the parties, it proposes to realign volumes as follows:

Delivery point	SS–1	CD–1	Total
Anoka #1		225	225
Anoka #1A		625	625
Dayton		2,850	2,850
Elk River #1	(200)	400	200
Lexington #1A	(200)	200	
Ham Lake	400	1,200	1,600
Perry, Iowa		1,000	1,000
Yankton, SD		700	700
Terra Chemical		(7,200)	(7,200)
Total			

Northern states that the realignment of volumes between existing delivery points as herein described is within the firm entitlement presently authorized for IPSC. Northern further states that the volumes to be reassigned are presently sold to IPSC under Rate Schedules CD–1 and SS–1 of Northern's FERC Gas Tariff, Third Revised Volume No. 1, it is indicated. Northern explains that no changes are proposed for WPS–1 and PS–1 volumes sold and delivered by Northern to IPSC.

It is stated that IPSC has also informed Northern that the areas served by the Anoka No. 1A and Yankton No. 1 town border stations (TBS) has experienced considerable expansion over the past several years, with a subsequent load increase due to additional residential and commercial customers. In order to accommodate the delivery of natural gas to IPSC at the Anoka No. 1A and Yankton No. 1 TBS', Northern indicates it must modify the existing metering capacity. Northern states that the Anoka No. 1A TBS was originally authorized by Commission order dated January 17, 1973 in Docket No. CP73–111–000 and the Yankton No. 1 was authorized by Commission Order issued in Docket No. G–280 on April 6, 1943.

Northern states that the meter capacity of the existing Anoka No. 1A TBS and Yankton No. 1 TBS facilities is 158 and 474 Mcf per hour respectively.

In order to serve the increased requirements, as well as provide for anticipated additional expansion, Northern indicates that the modified TBS' will be designed to serve volumes up to 264 and 711 Mcf per hour, respectively.

Northern indicates that the total estimated cost to modify the proposed delivery points is $63,000.

Comment date: November 16, 1987, in accordance with Standard Paragraph G at the end of this notice.

8. Texas Gas Transmission Corp.

[Docket No. CP87–546–000]

October 2, 1987.

Take notice that on September 18, 1987, Texas Gas Transmission Corporation (Texas Gas) P.O. Box 1160, Owensboro, Kentucky 42302, filed in Docket No. CP87–546–000, a request pursuant to §§ 157.205, 157.212 and 157.216 of the Regulations under the Natural Gas Act to abandon by removal a delivery point to its customer, Dome Gas Company, Inc. (Dome); to add a new delivery point for Dome; to abandon by removal a delivery point to its customer, Ohio Valley Gas, Inc. (Ohio Valley); and to abandon eight sale taps for Ohio Valley, under the authorization issued to it in Docket No. CP82–407–000 pursuant to section 7 of the Natural Gas Act, all as more fully set forth in the request on file with the Commission and open to public inspection.

Dome and Ohio Valley has requested that Texas Gas obtain the appropriate abandonment authority of the above-discussed facilities. It is stated that the natural gas measurement stations and the eight sales taps, located on Texas Gas' Slaughters-Montezuma 12-inch pipeline in Sullivan County, Indiana, are no longer needed due to the fact that a major surface coal mining project is scheduled to commence in the near future. It is stated that the natural gas service, with the exception to the Town of Dugger, Indiana, and its environs, will not be resumed after the completion of the mining operation because the residences and associated structures have been demolished or will be demolished by the coal company. It is further stated that the Town of Dugger, Indiana, will receive natural gas service through the new delivery point proposed to be installed for Dome.

Comment date: November 16, 1987, in accordance with Standard Paragraph G at the end of this notice.

Standard Paragraphs

F. Any person desiring to be heard or make any protest with reference to said filing should on or before the comment date file with the Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, DC 20426, a motion to intervene or a protest in accordance with the requirements of the Commission's Rules of Practice and Procedure (18 CFR 385.211 and 385.214) and the Regulations under the Natural Gas Act (18 CFR 157.10). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceeding. Any person wishing to become a party to a proceeding or to participate as a party in any hearing therein must file a motion to intervene in accordance with the Commission's Rules.

Take further notice that, pursuant to the authority contained in and subject to jurisdiction conferred upon the Federal Energy Regulatory Commission by sections 7 and 15 of the Natural Gas Act and the Commission's Rules of Practice and Procedure, a hearing will be held without further notice before the Commission or its designee on this filing if no motion to intervene is filed within the time required herein, if the Commission on its own review of the matter finds that a grant of the certificate is required by the public convenience and necessity. If a motion for leave to intervene is timely filed, or if the Commission on its own motion believes that a formal hearing is required, further notice of such hearing will be duly given.

Under the procedure herein provided for, unless otherwise advised, it will be unnecessary for the applicant to appear or be represented at the hearing.

G. Any person or the Commission's staff may, within 45 days after the issuance of the instant notice by the Commission, file pursuant to Rule 214 of the Commission's Procedural Rules (18 CFR 385.214) a motion to intervene or notice of intervention and pursuant to § 157.205 of the Regulations under the Natural Gas Act (18 CFR 157.205) a protest to the request. If no protest is filed within the time allowed therefor, the proposed activity shall be deemed to be authorized effective the day after the time allowed for filing a protest. If a protest is filed and not withdrawn within 30 days after the time allowed for filing a protest, the instant request shall be treated as an application for authorization pursuant to section 7 of the Natural Gas Act.

Kenneth F. Plumb,

Secretary.

[FR Doc. 87–23325 Filed 10–7–87; 8:45 am]

BILLING CODE 6717–01–M

Determinations Under the Natural Gas Policy Act for OCS Leases Issued on or After April 20, 1977

Issued: October 2, 1987.

On September 27, 1983, the Federal Energy Regulatory Commission (Commission) issued Order No. 336 under Docket Nos. RM83–3 and RM81–12 (48 FR 44,508 September 29, 1983). In that order, the Commission amended its regulations relating to filing requirements for well category applications under the Natural Gas Policy Act of 1978 (NGPA). The determination process for natural gas produced from a new lease, i.e., a lease entered into on or after April 20, 1977, on the Outer Continental Shelf (OCS), and qualifying as new natural gas under section 102 of the NGPA, was amended in two respects. First, the Commission eliminated the requirement that a determination be made for each well producing gas from a new OCS lease. Second, in lieu of filing an application for each well, the Commission now permits the grant of a new OCS lease to constitute the requisite jurisdictional agency determination that the gas is produced from a new OCS lease.

Under the revised procedures, the U.S. Department of Interior, Minerals Management Service (MMS), must file within 60 days of the grant of the lease a notice of determination which includes the lease number, the area and block number, and the date on which the OCS lease was issued by the Secretary of the Interior. The determination is subject to Commission review in the same manner as other jurisdictional agency determinations.

On September 8, 1987, the Commission received notice from MMS, Gulf of Mexico OCS Region, that 192 leases were issued as a result of OCS Sale No. 110 for the Central Gulf of Mexico on April 22, 1987. Gas produced from the following leases has been determined to be gas produced from a new OCS lease under NGPA section 102:

Lease No. OCS-G	Area	Block

BILLING CODE 6717-01-M

[Docket No. GP87-70-000]

Burk Royalty Co. v. Northern Natural Gas Co.; Complaint Regarding Production-Related Costs

October 2, 1987.

On August 3, 1987, Burk Royalty Company (Burk) filed a complaint pursuant to 18 CFR 271.1105(d)(3) and Rule 206 of the Federal Energy Regulatory Commission's (Commission) Rules of Practice and Procedure, 18 CFR 385.206. On September 4, 1987, Burk supplemented its complaint with additional information. Burk requests that the Production-Related Costs Board (Board) find that Northern Natural Gas Company (Northern) is in violation of 18 CFR 271.1104 by refusing to reimburse Burk for certain production-related costs.

Burk states that on January 20, 1982, Burk (seller) and Northern (buyer) entered into a gas sales contract covering gas produced from the Wilson No. 1 Well (Well) located in Ochiltree County, Texas. The point of sale is the connection of Burk's gathering line and Northern's gas meter. The Well is the only well on the gathering line which was constructed on or after November 9, 1978.

Burk claims that their 3500-foot gathering line is a recent system which entitles them to collect the $0.07 per MMBtu allowance for recent delivery systems and that the commingling rule is satisfied when gas from the Well is combined with other gas already in Northern's transmission line. Burk states that Northern was invoiced for the delivery allowance incurred during the period December 1983 through December 1985 and that Northern's failure to pay the gathering charge is contrary to 18 CFR 271.1104. Accordingly, Burk requests that the Board find that Burk is entitled to the $1,933.12 as invoiced.

Under Rules 206(b) and 213(a), 18 CFR 385.206(b) and 385.213(a), Northern must file an answer to Burk's complaint with the Commission unless otherwise ordered by the Commission. Under Rule 213(e), 18 CFR 385.213(e), any person failing to answer a complaint may be considered in default, and all relevant facts stated in such complaint may be deemed admitted. Northern shall file its answer with the Commission not later than 15 days after publication of this notice in the **Federal Register**.

Any person desiring to be heard or to protest said filing should file a protest or a motion to intervene with the Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, DC 20426, in accordance with Rules 211 and 214, 18 CFR 385.211 and 385.214. All such protests or motions should be filed not later than 15 days after publication of this notice in the **Federal Register**. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Copies of this filing are on file with the Commission and are available for public inspection.

Kenneth F. Plumb,

Secretary.

[FR Doc. 87-23327 Filed 10-7-87; 8:45 am]

BILLING CODE 6717-01-M

[Docket No. CI87-915-000]

Capital A Corp.; Application

October 2, 1987.

Take notice that on September 21, 1987, Capital A Corporation (Capital A), 7410 Blanco Road, Suite 100, San Antonio, TX 78216 filed in this proceeding an application pursuant to sections 4 and 7 of the Natural Gas Act (NGA) and Part 157 of the Commission's regulations, requesting blanket certificate authorization for self-implementing sales for resale of certain natural gas in interstate commerce, without market restriction, by Capital A. Capital A also seeks pre-granted abandonment of all sales for resale for which sales certificate authority is sought herein.

Capital A states that the purpose of its application is to enable Capital A to make sales in interstate commerce for resale of gas which is available for sale to new markets, but is still subject to the certificate and abandonment provisions of the Natural Gas Act. Finally, Capital A requests that the Commission declare in its order issuing the authorizations that the Commission's NGA jurisdiction over the activities and operations of Capital A is limited to the transactions

for which authorization is sought in the Application.

Any person desiring to be heard or to make any protest with reference to said filing should on or before October 20, 1987, file with the Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, DC 20426, a motion to intervene or a protest in accordance with the requirements of the Commission's Rules of Practice and Procedure (18 CFR 385.214 or 385.211). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceeding. Any person wishing to become a party to a proceeding or to participate as a party in any conference or hearing therein must file a motion to intervene in accordance with the Commission's Rules.

Kenneth F. Plumb,

Secretary.

BILLING CODE 6717-01-M

[Docket No. CI87-918-000]

Chevron U.S.A. Inc.; Application

October 2, 1987.

Take notice that on September 24, 1987, Chevron U.S.A. Inc. (Chevron) filed an application requesting the Federal Energy Regulatory Commission (Commission) to issue an Order Permitting and Approving a Blanket Limited-Term Certificated for Sales for Resale with Pregranted Abandonment upon the expiration of the term of such sales. The requested authorizations would enable Chevron to initiate sales of gas into interestate commerce from acreage subject to the jurisdiction of the Commission under the Natural Gas Act which is currently not dedicated by contract to a specific purchaser.

Chevron asked that the Commission also: (1) Grant the requested authority for a term of three years; (2) include the undedicated interests of co-owners in the same wells under the requested authorizations; (3) waive requirements under sections 154 and 271 of the Commission's Regulations concerning the establishment and maintenance of rate schedules and blanket affidavits; and (4) include all categories of Outer Continental Shelf gas subject to the jurisdiction of the Commission under the NGA. Chevron anticipates that sales will most likely be from wells prescribed by sections 109 or 102(d) of the Natural Gas Policy Act of 1978 from wells drilled offshore on old OCS leases.

Chevron states that the authority will give Chevron maximum flexibility in moving new gas supplies from wellhead to burner tip at market responsive prices, and thus serve the public interest by promoting competition in the nationwide gas market.

Any person desiring to be heard or to make any protests with reference to said application should on or before October 20, 1987, file with the Federal Energy Regulatory Commission, Washington, DC 20436, a petition to intervene or protest in accordance with the requirements of the Commision's Rules of Practice and Procedure (18 CFR 385.211, .214). All protests filed with the Commissions will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceeding. Any person wishing to become a party in the proceeding herein must file a petition to intervene in accordance with the Commission's rules.

Under the procedure herein provided for, unless otherwise advised, it will be unnecessary for Applicants to appear or to be represented at the hearing.

Kenneth F. Plumb,

Secretary.

BILLING CODE 6717-01-M

[Docket Nos. TA87-5-21-001]

Columbia Gas Transmission Corp.; Proposed Changes in FERC Gas Tariff

October 5, 1987.

Take notice that Columbia Gas Transmission Corporation (Columbia) on September 30, 1987, tendered for filing the following proposed changes to its FERC Gas Tariff, Original Volume No. 1, to become effective as follows:

Effective September 1, 1987

Substitute One hundred and nineteenth Revised Sheet No. 16
Substitute Forty-ninth Revised Sheet No. 64

Effective October 1, 1987

Substitute One hundred and twentiet Revised Sheet No. 16
Substitute Eleventh Revised Sheet No. 16A2

Columbia states the foregoing tariff sheets are being filed in compliance with the Commission's Order issued August 31, 1987 in Docket No. TA87-5-21-000 and TA87-4-21-002. Columbia states that such order directed it to refile its PGA tariff sheets to be effective September 1, 1987 to reflect the following:

(1) The removal of the Appalachian Marketing Program (AMP) costs from the calculation of both the Unrecovered Purchased Gas Surcharge and the Benchmark Surcharge;

(2) The recalculation of amounts relating to the Benchmark period to reflect actual commodity gas costs which have been paid; and

(3) The use of Texas Eastern Transmission Corporation's currently effective rates.

Columbia states that the revised rates set forth on Substitute One hundred and nineteenth Revised Sheet No. 16 reflect overall reducations of .32¢ per Dth in the Commodity sales rate and $.799 per Dth in the Demand-1 sales rate and an increase of 4.79¢ per Dth in the Demand-2 sales rate.

Columbia further states that the revised rates set forth on Substitute One hundred and twentieth Revised Sheet No. 16 and Substitute Eleventh Revised Sheet No. 16A2, to become effective October 1, 1987, applicable to the Annual Charge Adjustment, reflect the impact of the Commission ordered changes in the September 1, 1987 effective rates.

Copies of the filing were served upon the Company's jurisdicational customers and interested state commissions.

Any person desiring to be heard or to protest said filing should file a motion to intervene or protest with the Federal Energy Regulatory Commission, Union Center Plaza Building, 825 North Capitol Street NE., Washington, DC 20426, in accordance with Rules 211 and 214 of the Commission's Rules of Practice and Procedure. All such motions or protests should be filed on or before October 13, 1987. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceedings. Any person wishing to become a party must file a motion to intervene. Copies of Columbia's filings are on file with the Commission and are available for public inspection.

BILLING CODE 6717-01-M

[Docket No. TA87-3-22-001]

Consolidated Gas Transmission Corp.; Proposed Changes in FERC Gas Tariff

October 5, 1987.

Take notice that Consolidated Gas Transmission Corporation (Consolidated) on September 29, 1987, filed the following revised tariff sheets to Original Volume No. 1 of its FERC Gas Tariff:

Second Substitute Alternate Fourteenth Revised Sheet No. 31
Substitute Fifteenth Revised Sheet No. 31
First Revised Sheet No. 100
Second Revised Sheet Nos. 122, 123, 124, 125, 127, 130, 131, 132, 133, and 137
Third Revised Sheet Nos. 128 and 129

Consolidated states that it is also resubmitting the following tariff sheets (all to Original Volume No. 1) that were filed originally in Docket No. RP87-111-000 on August 31, 1987, and are currently awaiting Commission approval.

Second Revised Sheet Nos. 121, 126, 134, and 135
Third Revised Sheet No. 136.

Consolidated states that the purpose of Second Substitute Alternate Fourteenth Revised Sheet No. 31 is to comply with the Commission's August 31, 1987, order in this proceeding effective September 1, 1987. Further, Consolidated states that this tariff sheet reflects Consolidated's semi-annual PGA computed in accordance with PGA tariff provisions currently in effect.

Consolidated points out that the remaining tariff sheets are tendered to implement a change in PGA methodology, proposed to become effective October 1, 1987. Consolidated states that the proposed change in PGA methodology is acceptable to the Commission Staff and all parties attending a technical conference held September 15, 1987 in this proceeding.

Copies of the filing were served upon Consolidated's jurisdictional customers as well as interested state commissions.

Any person desiring to be heard or to protest said filing should file a protest or motion to intervene with the Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, DC 20426, in accordance with Rules 211 and 214 of the Commission's Rules of Practice and Procedure (18 CFR Sections 385.211, 385.214). All motions or protests should be filed on or before October 13, 1987. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a motion to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

Kenneth F. Plumb,

Secretary.

Eastern Shore Natural Gas Co.; Tariff Filings

October 1, 1987.

Take notice that on September 16, 1987, Eastern Shore Natural Gas Company (Applicant), P.O. Box 615, Dover, Delaware 19903, filed a revised tariff sheet to become effective November 1, 1987, pursuant to § 281.204(b) of the Commission's Regulations, which requires interstate pipelines to update their indices of entitlements annually to reflect changes in priority 2 entitlements (Essential Agricultural Users) Applicant's filing consists of the Ninth Revised Sheet No. 424 of its FERC Tariff, Original Volume No. 1.

Any person desiring to be heard or to make any protest with reference to said tariff sheet filing should on or before October 9, 1987, file with the Federal Energy Regulatory Commission, Washington DC 20426, a motion to intervene or a protest in accordance with the requirements of the Commission's Rules of Practice and Procedure (18 CFR 385.214 or 385.211). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceeding. Any person wishing to become a party to a proceeding or to participate as a party in any hearing therein must file a motion to intervene in accordance with the Commission's Rules.

Mississippi River Transmission Corp.; Tariff Sheet Filings

October 1, 1987.

Take notice that on September 15, 1987 Mississippi River Transmission Corporation (Applicant), 9900 Clayton Road, St. Louis, Missouri 63124, filed revised tariff sheets to become effective November 1, 1987, pursuant to § 281.204(b) of the Commission's Regulations which requires interstate pipelines to update their indices of entitlements annually to reflect changes in priority 2 entitlements (Essential Agricultural Users).

Applicant's filing consists of:

Tenth Revised Sheet No. 75
Eighth Revised Sheet No. 76
Fifth Revised Sheet No. 77
Tenth Revised Sheet No. 78
Eighth Revised Sheet No. 79

Any person desiring to be heard or to make any protest with reference to said tariff sheet filing should on or before October 9, 1987, file with the Federal Energy Regulatory Commission, Washington, DC 20426, a motion to intervene or a protest in accordance with the requirements of the Commission's Rules of Practice and Procedure (18 CFR 385.214 or 385.214 or 385.211). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceeding. Any person wishing to become a party to a proceeding or to participate as a party in any hearing therein must file a motion to intervene in accordance with the Commission's Rules.

Kenneth F. Plumb,

Secretary.

BILLING CODE 6717-01-M

[Docket No. RP87-136-000]

Sierra Pacific Power Co. v. Southwest Gas Corp.; Complaint

October 2, 1987.

Take notice that on September 2, 1987, Sierra Pacific Power Company (Sierra) filed a complaint against Southwest Gas Corporation (Southwest) pursuant to Rules 206, 207, and 209 of the Rules of Practice and Procedure, 18 CFR 385.206, 385.207 and 385.209 (1987).

Sierra contends that the currently effective Southwest PGA provisions fail to match cost incurrence and cost allocation, which failure allegedly results in a substantial overallocation of costs to Southwest's jurisdictional customers. Sierra also alleges that the peak usage allocation provided by Southwest's currently effective PGA provisions contravenes Commission policy and results in an overallocation of costs to Southwest's jurisdictional customers. Finally, Sierra contends that Southwest's currently effective PGA provisions are unreasonably anticompetitive.

Southwest requests that the Commission institute an expedited proceeding to determine the extent to which Southwest's currently effective provisions relating to PGA cost recovery must be changed, and grant such other and different relief as may be appropriate.

Any person desiring to be heard or to protest said complaint should file a motion to intervene or protest with the

Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, DC 20426, in accordance with Rules 214 and 211 of the Commission's Rules of Practice and Procedure. All such motions or protests must be filed on or before November 2, 1987. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a motion to intervene. Copies of this filing are on file with the Commission and are available for public. Answers to this complaint shall be due on or before November 2, 1987.

Kenneth F. Plumb,

Secretary.

BILLING CODE 6717-01-M

[Docket No. RP87-145-000]

Southwest Gas Transmission Co.; Compliance Filing

October 2, 1987

Take notice that on September 18, 1987, Southwest Gas Transmission Company, A Limited Partnership (SGTC), tendered for filing its Rate Schedule T-1 rate, as a part of its FERC Gas Tariff, Original Volume No. 2, in accordance with the Commission's Order issued September 19, 1984, in Docket No. CP83-284-000 which granted SGTC a certificate of public convenience and necessity. Ordering Paragraph (E)(1) of the Order conditioned the certificate upon SGTC's filing for review its rate applicable to Rate Schedule T-1 pursuant to § 154.63 of the Commission's Regulations and section 4(e) of the Natural Gas Act within three years of the date of issuance of the Order.

SGTC is proposing that the present rate for Rate Schedule T-1 be retained because of the *de minimis* nature of the deficiency in recovering its cost of service. Consequently, by its filing, SGTC is proposing no change in its present rates and no other change in its existing tariff.

SGTC states that a copy of this filing has been mailed to El Paso Natural Gas Company and that copies of the filing are available for inspection during regular business hours at Southwest Gas Corporation's (Southwest) office in Las Vegas, Nevada. Southwest is the general partner of SGTC.

Any person desiring to be heard or to protest said filing should file a motion to intervene or a protest with the Federal Energy Regulatory Commission, 825 North Capitol Street NE., Washington, DC 20426, in accordance with Rules 211 and 214 of the Commission's Rules of Practice and Procedure (18 CFR 385.211, 385.214). All such motions or protests should be filed on or before October 9, 1987. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a motion to intervene. Copies of this filing are on file with the Commission and are available for public inspection

Kenneth F. Plumb,

Secretary.

[FR Doc. 87-23335 Filed 10-7-87; 8:45 am]

BILLING CODE 6717-01-M

[Docket No. TA87-2-30-001]

Trunkline Gas Co.; Change in Tariff

October 5, 1987

Take notice that Trunkline Gas Company (Trunkline), on September 30, 1987 tendered for filing the following proposed changes in its FERC Gas Tariff, Original Volume No. 1:

Description	Proposed effective date
First Substitute Fifty-Sixth Revised Sheet No. 3-A	September 1, 1987
Second Substitute Fifty-Seventh Revised Sheet No. 3-A.	October 1, 1987

Trunkline states that these revised tariff sheets represent a downward revision of the PGA rate adjustment which became effective September 1, 1987 in Docket No. TA87-2-30-000 and are being filed at this time in compliance with Ordering Paragraph (D) of the Commission's Order in the subject proceeding dated August 31, 1987.

Copies of the filing were served on the Company's jurisdictional customers and applicable state regulatory agencies.

Any person desiring to be heard or to protest said filing should file a motion to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street NE., Washington, DC 20426, in accordance with Rules 211 and 214 of the Commission's Rules of Practice and Procedure (18 CFR 385.211 and 385.214). All such motions or protests should be filed on or before October 13, 1987. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a motion to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

BILLING CODE 6717-01-M

[Docket No. TA88-1-50-000]

Valley Gas Transmission, Inc.; Change in Rates Pursuant To Purchased Gas Adjustment

October 5, 1987.

Take notice that on September 30, 1987, Valley Gas Transmission, Inc. ("Valley") tendered for filing and acceptance the following tariff sheets as part of its FERC Gas Tariff:

Thirty-sixth Revised Sheet No. 2A to Original Volume No. 1

Ninth Revised Sheet No. 10 to Original Volume No. 2

Valley states that these tariff sheets, which are proposed to become effective on November 1, 1987 are being filed pursuant to the purchased gas cost adjustment provisions of its tariff. Valley further states that these proposed changes reflect adjustments to its current surcharge adjustment and current gas cost adjustment, and that its filing has been served on all jurisdictional customers.

Any person desiring to be heard or to protest said filing should file a motion to intervene or protest with the Federal Energy Regulatory Commission, 825 N. Capitol Street NE., Washington, DC 20426 in accordance with §§ 385.211 and 385.214 of the Commission's Rules of Practice and Procedure (18 CFR 385.211, 385.214). All such motions or protests should be filed on or before October 13, 1987. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a motion to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

ENVIRONMENTAL PROTECTION AGENCY

[FRL-3274-3]

National Drinking Water Advisory Council; Request for Nomination of Members

The Environmental Protection Agency (EPA) invites all interested persons to nominate qualified individuals to serve as members of the National Drinking Water Advisory Council. This Advisory Council was established to provide advice, consultation and recommendations to the Agency on the activities, functions and policies relating to the implementation of the Safe Drinking Water Act as amended, which became effective December 16, 1974. The Charter for this Advisory Committee is reproduced below.

Any interested person or organization may nominate qualified persons for membership. Nominees should be identified by name, occupation, position, address, and telephone number. Nominations should include a resume of the nominee's background, experience and qualifications.

This request for nominations does not imply any commitment by the Agency as to the procedure to be followed in making selections.

Persons selected for membership will receive per diem compensation for travel and nominal daily compensation while attending meetings.

Nominations should be submitted to Charlene E. Shaw, Executive Secretary, National Drinking Water Advisory Council, Office of Drinking Water (WH-550), U.S. Environmental Protection Agency, 401 M Street SW., Washington, DC 20460, no later than November 1, 1987. The Agency will not formally acknowledge or respond to nominations.

Lawrence J. Jensen,

Assistant Administrator for Water.

Dated: September 22, 1987.

National Drinking Water Advisory Council

1. Purpose

This Charter is reissued for the National Drinking Water Advisory Council in accordance with the requirements of the Federal Advisory Committee Act, 5 U.S.C. (App. I) 9(c).

2. Authority

The Council was created on December 16, 1974, under the Safe Drinking Water Act of 1974, Pub. L. 93-523, 42 U.S.C. 300j-5 and the charter was renewed on December 23, 1976; December 1, 1978; November 7, 1980; November 29, 1982; and December 7, 1984.

3. Objective and Scope of Activity

The Council advises, consults with, and makes recommendations on a continuing basis to the Administrator, through the Assistant Administrator for Water, on matters relating to activities, functions, and policies of the Agency under the Safe Drinking Water Act.

4. Functions

The Council provides practical and independent advice to the Agency on matters and policies relating to drinking water quality and hygiene, and maintains an awareness of developing issues and problems in the drinking water area. It reviews and advises the Administrator on regulations and guidelines that are required by the Safe Drinking Water Act; makes recommendations concerning necessary special studies and research; recommends policies with respect to the promulgation of drinking water standards; assists in identifying emerging environmental or health problems related to potentially hazardous constituents in drinking water; and proposes actions to encourage cooperation and communication between the Agency and other governmental agencies, interested groups, the general public, and technical associations and organizations on drinking water quality.

5. Composition and Meetings

The Council consists of fifteen members including a Chairperson, appointed by the Deputy Administrator after consultation with the Secretary, Department of Health and Human Services. Five members shall be appointed from the general public; five members shall be appointed from appropriate State and local agencies concerned with water representatives of private organizations or groups demonstrating an active interest in the field of water hygiene and public water supply. Except as provided in section 1446 of the Safe Drinking Water Act, each member of the Council will hold office for a term of three years and will be eligible for reappointment. The Council is authorized to form Subcommittees to consider specific matters and report back to the full Council. Meetings will be held as necessary and convened by the Assistant Administrator for Water. A full-time salaried officer or employee of EPA will be designated as the Executive Secretary. Each meeting will be conducted in accordance with an agenda approved in advance of the meeting by the designated Agency official. The Designated Federal Official will be present at all meetings and is authorized to adjourn any meeting whenever it is determined to be in the public interest. The estimated annual operating cost of the Council is approximately $60,000, which includes .75 work-year of staff support. The Office of Water will provide the necessary staff and support of the Council.

6. Duration

As provided in the Safe Drinking Water Act, "Section 14(a) of the Federal Advisory Committee Act (relating to termination) shall not apply to the Council." However, the Charter is subject to the renewal process upon the expiration of each successive two-year period following the date of enactment of the Act establishing this Council.

7. Supersession

The former National Drinking Water Advisory Council charter signed on December 7, 1984, is hereby superseded.

Approval Date: December 4, 1986.

A. James Barnes,

Deputy Administrator.

BILLING CODE 6560-50-M

[OW-FRL-3273-6]

Water Quality Criteria; Availability of Document

AGENCY: Environmental Protection Agency.

ACTION: Notice of request for comments on an ambient water quality criteria document for ammonia in saltwater.

SUMMARY: EPA announces the availability and provides a summary of a proposed ambient water quality criteria document for ammonia in saltwater. When published in final form after review of public comments, these water quality criteria may form the basis for enforceable State water quality standards. These criteria are published pursuant to section 304(a)(1) of the Clean Water Act.

DATE: Written comments should be submitted to the person listed directly below by December 7, 1987.

FOR FURTHER INFORMATION CONTACT: Dr. Frank Gostomski, Criteria and Standards Division (WH-585), U.S. Environmental Protection Agency, 401 M Street SW., Washington, DC 20460, (202) 475-7321.

Availability of Document: This notice contains a summary of the document

containing proposed ambient water quality criteria for ammonia in saltwater for the protection of aquatic life and its uses. Copies of the complete criteria document may be obtained upon request from the person listed above. This document is also available for public inspection and copying during normal business hours at: Public Information Reference Unit, U.S. Environmental Protection Agency, Room 2404 (rear), 401 M Street, SW., Washington, DC 20460. As provided in 40 CFR Part 2, a reasonable fee may be charged for copying services. Copies of this document are also available for review in the EPA Regional Office libraries.

SUPPLEMENTARY INFORMATION:

Background

Section 304(a)(1) of the Clean Water Act (33 U.S.C. 1314(a)(1)) requires EPA to publish and periodically update ambient water quality criteria. These criteria are to reflect the latest scientific knowledge on the identifiable effects of pollutants on public health and welfare, aquatic life, and recreation.

EPA has periodically issued ambient water quality criteria, beginning in 1973 with publication of the "Blue Book" (Water Quality Criteria 1972). In 1976, the "Red Book" (Quality Criteria for Water) was published. On November 28, 1980 (45 FR 79318), EPA announced the publication of 64 individual ambient water quality criteria documents for pollutants listed as toxic under section 307(a)(1) of the Clean Water Act. A document addressing 2,3,7,8-tetrachlorodibenzo-p-dioxin (TCDD) was announced on February 15, 1984 (49 FR 5831), completing the coverage of the 65 priority pollutants listed under section 307(a)(1).

EPA issued nine individual water quality criteria documents on July 29, 1985 (50 FR 30784) which updated or revised criteria previously published in the "Red Book" or in the 1980 water quality criteria documents. A revised version of the National Guidelines for Deriving Numerical National Water Quality Criteria for the Protection of Aquatic Organisms and Their Uses was announced at the same time. A bacteriological ambient water quality criteria document was published on March 7, 1986 (51 FR 8012). A water quality criteria document for dissolved oxygen was published on June 24, 1986 (51 FR 22978). All of the publications cited above were summarized in "Quality Criteria for Water, 1986" which was released by the Office of Water Regulations and Standards on May 1, 1986. Final water quality criteria documents for chlorpyrifos, nickel, pentachlorophenol, parathion, and toxaphene were issued by EPA on December 3, 1986 (51 FR 43665). On March 2, 1987, (52 FR 6213), EPA announced the publication of revised ambient water quality criteria for zinc which updated criteria previously published in a 1980 ambient water quality document.

Today EPA is announcing the availability for public comment of a proposed water quality criteria document for ammonia in saltwater for the protection of aquatic organisms. The criteria document announced today may form the basis for enforceable State water quality standards when published in final form.

Dated: September 25, 1987.

Lawrence J. Jensen,

Assistant Administrator for Water.

Summary of Water Quality Criteria

Saltwater Aquatic Life

The procedures described in the "Guidelines for Deriving Numerical National Water Quality Criteria for the Protection of Aquatic Organisms and Their Uses" indicate that, except possibly where a locally important species is very sensitive, saltwater aquatic organisms should not be affected unacceptably if the four-day average concentration of un-ionized ammonia does not exceed 0.013 mg/L more than once every three years on the average, and if the one-hour average concentration does not exceed 0.108 mg/L more than once every three years on the average.

Criteria concentrations based on total ammonia for the pH range of 7.0 to 9.0, temperature range of 0 to 35 °C, and salinities of 10, 20 and 30 g/kg are provided in Text Tables 2 and 3.

Three years is the Agency's best scientific judgment of the average amount of time aquatic ecosystems should be provided between excursions. The ability to recover differs greatly, however, and site-specific criteria may be established if adequate justification is provided.

Use of criteria for developing water quality-based permit limits and for designing waste treatment facilities requires selection of an appropriate wasteload allocation model. Dynamic models are preferred for the application of these criteria. Limited data or other considerations might make their use impractical, in which case one must rely on a steady-state model.

Final water quality criteria documents for chlorpyrifos, nickel, pentachlorophenol, parathion, and toxaphene were issued by EPA on December 3, 1986 (51 FR 43665). On March 2, 1987, (52 FR 6213), EPA announced the publication of revised ambient water quality criteria for zinc which updated criteria previously published in a 1980 ambient water quality document.

Today EPA is announcing the availability for public comment of a proposed water quality criteria document for chloride for the protection of aquatic organisms. The criteria document announced today may form the basis for enforceable State water quality standards when published in final form.

Dated: September 25, 1987.

Lawrence J. Jensen,

Assistant Administrator for Water.

Summary of Water Quality Criteria

Freshwater Aquatic Life

The procedures described in the "Guidelines for Deriving Numerical National Water Quality Criteria for the Protection of Aquatic Organisms and Their Uses" indicate that, except possibly where a locally important species is very sensitive, freshwater aquatic organisms and their uses should not be affected unacceptably if the four-day average concentration of dissolved chloride does not exceed 230 mg/L more than once every three years on the average and if the one-hour average concentration does not exceed 860 mg/L more than once every three years on the average. This criterion probably will not be adequately protective when the chloride is associated with potassium, calcium, or magnesium, rather than sodium. In addition, because freshwater animals have a narrow range of acute susceptibilities to chloride, this criterion is probably not adequately protective.

Implementation

As discussed in the Water Quality Standards Regulation and the Foreword to this document, a water quality criterion for aquatic life has regulatory impact only after it has been adopted in a State water quality standard. Such a standard specifies a criterion for a pollutant that is consistent with a particular designated use. With the concurrence of the U.S. EPA, States designate one or more uses for each body of water or segment thereof and adopt criteria that are consistent with the use(s). In each standard a State may adopt the national criterion, if one exists, or, if adequately justified, a site-specific criterion.

Site-specific criteria may include not only site-specific criterion concentrations, but also site-specific, and possible pollutant-specific, durations of averaging periods and frequencies of allowed excursions. The averaging periods of "one hour" and "four days" were selected by the U.S. EPA on the basis of data concerning how rapidly some aquatic species react to increases in the concentrations of some pollutants, and "three years" is the Agency's best scientific judgment of the average amount of time aquatic ecosystems should be provided between excursions. However, various species and ecosystems react and recover at greatly differing rates. Therefore, if adequate justification is provided, site-specific and/or pollutant-specific concentrations, durations, and frequencies may be higher or lower than those given in national water quality criteria for aquatic life.

Use of criteria, which have been adopted in State water quality standards, for developing water quality-based permit limits and for designing waste treatment facilities requires selection of an appropriate wasteload allocation model. Although dynamic models are preferred for the application of these criteria limited data or other considerations might require the use of a steady-state model. Guidance on mixing zones and the design of monitoring programs is also available.

BILLING CODE 6712-01-M

FEDERAL MARITIME COMMISSION

Agreements Filed

The Federal Maritime Commission hereby gives notice of the filing of the following agreement(s) pursuant to section 5 of the Shipping Act of 1984.

Interested parties may inspect and obtain a copy of each agreement at the Washington, D.C. Office of the Federal Maritime Commission, 1100 L Street NW., Room 10325. Interested parties may submit comments on each agreement to the Secretary, Federal Maritime Commission, Washington, DC 20573, within 10 days after the date of the **Federal Register** in which this notice appears. The requirements for comments are found in § 572.603 of Title 46 of the Code of Federal Regulations. Interested persons should consult this section before communicating with the Commission regarding a pending agreement.

Agreement No.: 202–000093–038.
Title: North Europe-U.S. Pacific Freight Conference.
Parties:

Hapag-Lloyd AG
Johnson Scanstar
Compagnie Generale Maritime
Incotrans BV
Sea-Land Service, Inc.

Synopsis: The proposed amendment would provide that a resigning member would have no vote on any matter which would take effect after the date of its resignation and would allow a party to give a proxy to another party, the Chairman or the Secretary of the agreement. It would also tie quorum and majority decision requirements to voting entitlements.

Agreement No.: 202–010987–004.
Title: United States/Central America Liner Association.
Parties:

Crowley Caribbean Transport, Inc.
Sea-Land Service, Inc.
Seaboard Marine Ltd.

Synopsis: The proposed amendment provides that failure by a member to vote within two working days after the commencement of a telecommunications poll, or an abstention by a member in a telecommunications poll, shall be counted as a vote against the matter. The parties have requested a shortened review period.

Agreement No.: 217–011151
Title: Naviera Pacifico/Nedlloyd Lines Space Charter Agreement
Parties:

Naviera Pacifico C.A.
Nedlloyd Lines

Synopsis: The proposed agreement would permit the parties to charter space aboard one another's vessels in the trade between U.S. Pacific Coast ports and ports in Venezuela. The parties have requested a shortened review period.

By Order of the Federal Maritime Commission.

Joseph C. Polking,

Secretary.

Dated: October 5, 1987.

FEDERAL RESERVE SYSTEM

Acquisitions of Shares of Banks or Bank Holding Companies; Monke Farm and Cattle Co. et al.

The notificants listed below have applied under the Change in Bank Control Act (12 U.S.C. 1817(j)) and § 225.41 of the Board's Regulation Y (12 CFR 225.41) to acquire a bank or bank holding company. The factors that are considered in acting on the notices are set forth in paragraph 7 of the Act (12 U.S.C. 1817(j)(7)).

The notices are available for immediate inspection at the Federal Reserve Bank indicated. Once the notices have been accepted for processing, they will also be available for inspection at the offices of the Board of Governors. Interested persons may express their views in writing to the Reserve Bank indicated for that notice or to the offices of the Board of Governors. Comments must be received not later than October 23, 1987.

A. **Federal Reserve Bank of Kansas City** (Thomas M. Hoenig, Vice President) 925 Grand Avenue, Kansas City, Missouri 64198:

1. *Monke Farm & Cattle Co.*, Nickerson, Nebraska, and William Monke, Fremont, Nebraska, to acquire 8.54 percent; Willard Hegne, Fremont, Nebraska, to acquire 8.55; and Wendell Bruner, Fremont, Nebraska, to acquire 8.55 percent of the voting shares of American Banc Corporation, Fremont, Nebraska, and thereby indirectly acquire American National Bank of Fremont, Fremont, Nebraska.

B. **Federal Reserve Bank of Dallas** (W. Arthur Tribble, Vice President) 400 South Akard Street, Dallas, Texas 75222:

1. *William Nesbitt,* Waco, Texas, to acquire 13.16 percent; Willard J. Still, Waco, Texas, to acquire 13.16 percent; Pat Beard, Waco, Texas, to acquire 8.77 percent; David B. Kultgen, Waco, Texas, to acquire 8.77 percent; and Bernard Rapoport, Waco, Texas, to acquire 8.77 percent of the voting shares of CentraBank Corporation, Waco, Texas, and thereby indirectly acquire Central National Bank of Woodway-Hewitt, Waco, Texas.

C. **Federal Reserve Bank of San Francisco** (Harry W. Green, Vice President) 101 Market Street, San Francisco, California 94105:

1. *John E. Wertin,* Irvine, California; to acquire 80.4 percent of the voting shares of San Clemente Bancorp, San Clemente, California, and thereby indirectly acquire The Bank of San Clemente, San Clemente, California.

Board of Governors of the Federal Reserve System, October 2, 1987.

James McAfee,

Associate Secretary of the Board.

BILLING CODE 6210–01–M

Formations of; Acquisitions by; and Mergers of Bank Holding Companies; Peoples Bancorp of Worcester, Inc., et al.

The companies listed in this notice have applied for the Board's approval under section 3 of the Bank Holding Company Act (12 U.S.C. 1842) and § 225.14 of the Board's Regulation Y (12 CFR 225.14) to become a bank holding company or to acquire a bank or bank holding company. The factors that are considered in acting on the applications are set forth in section 3(c) of the Act (12 U.S.C. 1842(c)).

Each application is available for immediate inspection at the Federal Reserve Bank indicated. Once the application has been accepted for processing, it will also be available for inspection at the offices of the Board of Governors. Interested persons may express their views in writing to the Reserve Bank or to the offices of the Board of Governors. Any comment on an application that requests a hearing must include a statement of why a written presentation would not suffice in lieu of a hearing, identifying specifically any questions of fact that are in dispute and summarizing the evidence that would be presented at a hearing.

Unless otherwise noted, comments regarding each of these applications must be received not later than October 27, 1987.

A. **Federal Reserve Bank of Boston** (Robert M. Brady, Vice President) 600 Atlantic Avenue, Boston, Massachusetts 02106:

1. *Peoples Bancorp of Worcester, Inc.*, Worcester, Massachusetts; to become a bank holding company by acquiring 100 percent of the voting shares of Peoples Savings Bank, Worcester, Massachusetts, which engages in Massachusetts Savings Bank Life Insurance activities. Comments on this application must be received by October 23, 1987.

B. **Federal Reserve Bank of Richmond** (Lloyd W. Bostian, Jr., Vice President) 701 East Byrd Street, Richmond, Virginia 23261:

1. *First Union Corporation,* Charlotte, North Carolina; to acquire 100 percent of the voting shares of First Union Corporation of Tennessee, Nashville, Tennessee, and thereby indirectly acquire First Union National Bank of Tennessee, Nashville, Tennessee.

2. *Sandy Spring Bancorp, Inc.*, Olney, Maryland; to become a bank holding company by acquiring 100 percent of the voting shares of Sandy Spring National Bank of Maryland, Olney, Maryland.

C. **Federal Reserve Bank of Atlanta** (Robert E. Heck, Vice President) 104 Marietta Street, N.W., Atlanta, Georgia 30303:

1. *BOL Bancshares, Inc.*, New Orleans, Louisiana; to become a bank holding company by acquiring 100 percent of the voting shares of Bank of Louisiana in New Orleans, New Orleans, Louisiana, Fidelity Bank and Trust Co., Slidell, Louisiana, and BOS Bancshares, Inc., Metairie, Louisiana, and thereby indirectly acquire Bank of the South, Metairie, Louisiana.

2. *South Banking Company*, Alma, Georgia; to acquire 50 percent of the voting shares of Georgia Peoples Bankshares, Baxley, Georgia.

C. **Federal Reserve Bank of Chicago** (David S. Epstein, Assistant Vice President) 230 South LaSalle Street, Chicago, Illinois 60690:

1. *First Mid-Illinois Bancshares, Inc.*, Mattoon, Illinois; to acquire 100 percent of the voting shares of Eagle Bank of Charleston, Charleston, Illinois. Comments on this application must be received by October 23, 1987.

2. *Heritage Racine Corporation*, Racine, Wisconsin; to acquire 87 percent of the voting shares of Bank of Hayward, Hayward, Wisconsin.

3. *Water Tower Bancorp, Inc.*, Chicago, Illinois; to acquire 82.62 percent of the voting shares of Belmont National Bank, Chicago, Illinois.

D. **Federal Reserve Bank of Dallas** (W. Arthur Tribble, Vice President) 400 South Akard Street, Dallas, Texas 75222:

1. *McCamey Financial Corporation*, McCamey, Texas; to become a bank holding company by acquiring 100 percent of the voting shares of McCamey Bancshares, Inc., McCamey, Texas, and thereby indirectly acquire Security State Bank, McCamey, Texas.

Board of Governors of the Federal Reserve System, October 2, 1987.

James McAfee,

Associate Secretary of the Board.

BILLING CODE 6210-01-M

Formation of, Acquisition by, or Merger of Bank Holding Companies; and Acquisition of Nonbanking Company; National Westminister Bank, PLC

The company listed in this notice has applied under § 225.14 of the Board's Regulation Y (12 CFR 225.14) for the Board's approval under section 3 of the Bank Holding Company Act (12 U.S.C. 1842) to become a bank holding company or to acquire voting securities of a bank or bank holding company. The listed company has also applied under § 225.23(a)(2) of Regulation Y (12 CFR 225.23(a)(2)) for the Board's approval under section 4(c)(8) of the Bank Holding Company Act (12 U.S.C. 1843(c)(8)) and § 225.21(a) of Regulation Y (12 CFR 225.21(a)) to acquire or control voting securities or assets of a company engaged in a nonbanking activity that is listed in § 225.25 of Regulation Y as closely related to banking and permissible for bank holding companies, or to engage in such an activity. Unless otherwise noted, these activities will be conducted throughout the United States.

The application is available for immediate inspection at the Federal Reserve Bank indicated. Once the application has been accepted for processing, it will also be available for inspection at the offices of the Board of Governors. Interested persons may express their views in writing on the question whether consummation of the proposal can "reasonably be expected to produce benefits to the public, such as greater convenience, increased competition, or gains in efficiency, that outweigh possible adverse effects, such as undue concentration of resources, decreased or unfair competition, conflicts of interests, or unsound banking practices." Any request for a hearing on this question must be accompanied by a statement of the reasons a written presentation would not suffice in lieu of a hearing, identifying specifically any questions of fact that are in dispute, summarizing the evidence that would be presented at a hearing, and indicating how the party commenting would be aggrieved by approval of the proposal.

Comments regarding the application must be received at the Reserve Bank indicated or the offices of the Board of Governors not later than October 23, 1987.

A. **Federal Reserve Bank of New York** (William L. Rutledge, Vice President) 33 Liberty Street, New York, New York 10045:

1. *National Westminster Bank PLC*, London, England, and NatWest Holdings Inc., New York, New York, to acquire 100 percent of the voting shares of National Westminster Bank USA, New York, New York; First Jersey National Corporation, Jersey City, New Jersey, and thereby indirectly acquire The First Jersey and National Bank, Jersey City, New Jersey; The First Jersey National Bank/Central, Trenton, New Jersey; The First Jersey National Bank/South, Atlantic City, New Jersey; The First Jersey National Bank/West, Denville, New Jersey; and The First Jersey National Bank/Fort Lee, Fort Lee, New Jersey; and First Jersey Fort Lee Corporation, Jersey City, New Jersey. In connection with this application, National Westminster Bancorp, Inc., Wilmington, Delaware, has applied to become a bank holding company.

In connection with this application, National Westminster Bank PLC, London, England, and Natwest Holdings Inc., New York, New York, propose to acquire FJN Corporation, Jersey City, New Jersey, and thereby engage in leasing real property, and to acquire Tilden of Florida, Inc., Fort Lauderdale, Florida, and thereby engage in leasing personal property pursuant to § 225.25(b)(5) of the Board's Regulation Y.

Board of Governors of the Federal Reserve System, October 2, 1987.

James McAfee,

Associate Secretary of the Board.

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Centers for Disease Control

Immunization Practices Advisory Committee; Meeting

In accordance with section 10(a)(2) of the Federal Advisory Committee Act (Pub. L. 92-463), the Centers for Disease Control announces the following Committee meeting:

Name: Immunization Practices Advisory Committee.

Date: October 28-29, 1987.

Place: Conference Room 207, Centers for Disease Control 1600 Clifton Road NE., Atlanta, Georgia 30333.

Time: 8:30 a.m.

Type of Meeting: Open.

Contact Person: Jeffrey P. Koplan, M.D., Executive Secretary of Committee, Centers for Disease Control (1-2047), 1600 Clifton Road, N.E., Atlanta, Georgia 30333. *Telephone:* FTS: 236-3751. Commercial: 404/329-3751.

Purpose: The Committee is charged with advising on the appropriate uses of immunizing agents.

Agenda: The Committee will discuss draft revisions of typhoid and cholera recommendations; hear updates on *Haemophilus influenzae* type b, meningococcal, BCG, influenza, and Japanese B encephalitis vaccines; discuss measles vaccine and AIDS patients, and inactivated polio vaccine; and consider other matters of relevance among the committee's objectives.

Agenda items are subject to change as priorities dictate.

Dated: October 2, 1987.

Elvin Hilyer,

Associate Director for Policy Coordination, Centers for Disease Control.

[FR Doc. 87-23239 Filed 10-7-87; 8:45 am]

BILLING CODE 4160-18-M

National Institute for Occupational Safety and Health; Board of Scientific Counselors; Meeting

In accordance with section 10(a)(2) of the Federal Advisory Committee Act (Pub. L. 92-463), the Centers for Disease Control (CDC) announces the following National Institute for Occupational Safety and Health (NIOSH) committee meeting:

Name: Board of Scientific Counselors (BSC)

Date: October 27, 1987

Place: Conference Room 138, Appalachian Laboratory for Occupational Safety and Health, 944 Chestnut Ridge Road, Morgantown, West Virginia 26505

Time and Type of Meeting: Open: 8:30 a.m. to 9:30 a.m.—October 27; Closed: 9:30 a.m. to 10:00 a.m.—October 27

Contact Person: Roy M. Fleming, Sc.D., Executive Secretary, BSC, NIOSH, CDC, 1600 Clifton Road, NE., Atlanta, Georgia 30333, Telephone: Commercial: (404) 329-3343; FTS: 236-3343

Purpose: The Board is charged with advising the Director of the National Institute for Occupational Safety and Health on the scientific quality and efficacy of the Institute's research.

Agenda: Agenda items for the meeting will include announcements, consideration of minutes of the previous meeting, planning of site visits to review NIOSH divisions, and further meeting dates and locations. Beginning at 9:30 a.m. through 10 a.m., October 27, the Board will discuss certain matters the public disclosure of which could constitute a violation of sections 552b(c)(6) and/or 552b(c)(9)(B) of Title 5 U.S. Code. Therefore, pursuant to said provisions and the determination of the Director, Centers for Disease Control, this portion of the meeting will not be open to the public.

Agenda items are subject to change as priorities dictate. The portion of the meeting so indicated is open to the public for observation and participation. Anyone wishing to make an oral presentation should notify the contact person listed above as soon as possible before the meeting. The request should state the amount of time desired, the capacity in which the person will appear, and a brief outline of the presentation. Oral presentations will be scheduled at the discretion of the Chairperson and as time permits.

A roster of members and other relevant information regarding the meeting may be obtained from the contact person listed above.

Dated: October 2, 1987.

Elvin Hilyer,

Associate Director for Policy Coordination, Centers for Disease Control.

BILLING CODE 4160-19-M

Food and Drug Administration

[Docket No. 87D-0292]

Guidelines for the Sampling and Certification of Imported Swordfish for Mercury Residues by Private Laboratories; Availability

AGENCY: Food and Drug Administration.

ACTION: Notice.

SUMMARY: The Food and Drug Administration (FDA) is announcing the availability of guidelines for the sampling and the certification of imported swordfish for mercury residues by private laboratories. These guidelines were approved August 13, 1987. These guidelines are of interest to all importers of swordfish and to the private laboratories that are offering certification services.

ADDRESS: Requests for a copy of the guidelines may be submitted to the Dockets Management Branch (HFA-305), Food and Drug Administration, Rm. 4-62, 5600 Fishers Lane, Rockville, MD 20857. (Send two self-addressed adhesive labels to assist the Branch in processing your requests.)

FOR FURTHER INFORMATION CONTACT: Sonia I. Delgado, Center for Food Safety and Applied Nutrition (HFF-314), Food and Drug Administration, 200 C St. SW., Washington, DC 20204, 202-485-0250.

SUPPLEMENTARY INFORMATION: FDA is announcing the availability of guidelines for the sampling and the certification of imported swordfish for mercury residues by private laboratories. The agency issued these guidelines to its field offices on August 14, 1987. FDA issued these guidelines in response to the swordfish industry's request that FDA institute uniform sampling procedures to obtain representative samples from lots of swordfish subject to automatic

1987
UMI

detention and certification for mercury residues. This request is based on concern that inconsistencies in sampling procedures between FDA and industry can lead to inconsistencies in analytical results between private laboratories and FDA laboratories.

These guidelines are available for review at the Dockets Management Branch (address above) between 9 a.m. and 4 p.m., Monday through Friday.

Dated: October 2, 1987.

John M. Taylor,

Associate Commissioner for Regulatory Affairs.

BILLING CODE 4160-01-M

[Docket No. 87M-0304]

Premarket Approval of Sandimmune® Radioimmunoassay Kit; Sandoz Pharmaceuticals Corp.

AGENCY: Food and Drug Administration.

ACTION: Notice.

SUMMARY: The Food and Drug Administration (FDA) is announcing its approval of the application by Sandoz Pharmaceutical Corp., East Hanover, NJ, for premarket approval, under the Medical Device Amendments of 1976, of the Sandimmune® Radioimmunoassay Kit. After reviewing the recommendation of the Clinical Chemistry and Clinical Toxicology Devices Panel, FDA's Center for Devices and Radiological Health (CDRH) notified the applicant of the approval of the application.

DATE: Petitions for administrative review by November 9, 1987.

ADDRESS: Written requests for copies of the summary of safety and effectiveness data and petitions for administrative review to the Dockets Management Branch (HFA-305), Food and Drug Administration, Rm. 4-62, 5600 Fishers Lane, Rockville, MD 20857.

FOR FURTHER INFORMATION CONTACT: Kaiser Aziz, Center for Devices and Radiological Health (HFZ-440), Food and Drug Administration, 8757 Georgia Avenue, Silver Spring, MD 20910, 301-427-7550.

SUPPLEMENTARY INFORMATION: On November 26, 1985, Sandoz Pharmaceutical Corp., East Hanover, NJ 07936, submitted to CDRH an application for premarket approval of the Sandimmune® Radioimmunoassay Kit. The device is an in vitro radioimmunoassay kit for the cyclosporine drug Sandimmune®. It is indicated for measuring levels of Sandimmune® in whole blood, plasma, or serum as an aid in monitoring the dosage of the drug.

On October 27, 1986, the Clinical Chemistry and Clinical Toxicology Devices Panel, an FDA advisory committee, reviewed and recommended approval of the application. On August 31, 1987, CDRH approved the application by a letter to the applicant from the Director of the Office of Device Evaluation, CDRH.

A summary of the safety and effectiveness data on which CDRH based its approval is on file in the Dockets Management Branch (address above) and is available from that office upon written request. Requests should be identified with the name of the device and the docket number found in brackets in the heading of this document.

A copy of all approved labeling is available for public inspection at CDRH—contact Kaiser Aziz (HFZ-440), address above.

Opportunity for Administrative Review

Section 515(d)(3) of the Federal Food, Drug, and Cosmetic Act (the act) (21 U.S.C. 360e(d)(3)) authorizes any interested person to petition, under section 515(g) of the act (21 U.S.C. 360e(g)), for administrative review of CDRH's decision to approve this application. A petitioner may request either a formal hearing under Part 12 (21 CFR Part 12) of FDA's administrative practices and procedures regulations or a review of the application and CDRH's action by an independent advisory committee of experts. A petition is to be in the form of a petition for reconsideration under § 10.33(b) (21 CFR 10.33(b)). A petitioner shall identify the form of review requested (hearing or independent advisory committee) and shall submit with the petition supporting data and information showing that there is a genuine and substantial issue of material fact for resolution through administrative review. After reviewing the petition, FDA will decide whether to grant or deny the petition and will publish a notice of its decision in the Federal Register. If FDA grants the petition, the notice will state the issue to be reviewed, the form of review to be used, the persons who may participate in the review, the time and place where the review will occur, and other details.

Petitioners may, at any time on or before November 9, 1987, file with the Dockets Management Branch (address above) two copies of each petition and supporting data and information, identified with the name of the device and the docket number found in brackets in the heading of this document. Received petitions may be seen in the office above between 9 a.m. and 4 p.m., Monday through Friday.

This notice is issued under the Federal Food, Drug, and Cosmetic Act (secs. 515(d), 520(h), 90 Stat. 554-555, 571 (21 U.S.C. 360e(d), 360(h))) and under authority delegated to the Commissioner of Food and Drugs (21 CFR 5.10) and redelegated to the Director, Center for Devices and Radiological Health (21 CFR 5.53).

Dated: September 30, 1987.

John C. Villforth,

Director, Center for Devices and Radiological Health.

[FR Doc. 87-23320 Filed 10-7-87; 8:45 am]

BILLING CODE 4160-01-M

Public Health Service

Office of Minority Health; Delegation of Authority

Notice is hereby given that in furtherance of the delegation by the Secretary of Health and Human Services on January 14, 1981, to the Assistant Secretary for Health, the Assistant Secretary for Health has delegated to the Director, Office of Minority Health, with authority to redelegate, all the authority delegated to the assistant Secretary for Health under Title III of the General Powers and duties of Public Health Service Act, section 301 (42 U.S.C. 241), as amended, relative to research, investigation, and testing functions, insofar as they pertain to the functions assigned to the Office of Minority Health. In addition, I hereby affirm and ratify any actions taken by the director, Office of Minority Health, and subordinates which involved the exercise of the authorities delegated herein prior to the effective date of delegation. The authorities delegated exclude the authorities to promulgate regulations and to submit reports to the Congress.

The delegation to the Director, Office of Minority Health became effective on September 29, 1987.

Date: September 29, 1987.

Robert E. Windom,

Assistant Secretary for Health.

[FR Doc. 87-23319 Filed 10-7-87; 8:45 am]

BILLING CODE 4160-17-M

Privacy Act of 1974; New System of Records

AGENCY: Public Health Service, HHS.

ACTION: Notification of a new system of records.

SUMMARY: In accordance with the requirements of the Privacy Act, the Public Health Service (PHS) is publishing a notice of a new system of records, 09–30–0049, "Consultant Records Maintained by ADAMHA Contractors, HHS/ADAMHA/OA." We are also proposing routine uses for this new system.

DATES: PHS invites interested parties to submit comments on the proposed routine uses on or before November 9, 1987. PHS has sent a Report of a New System to the Congress and to the Office of Management and Budget (OMB) on October 1, 1987. The routine uses will be effective 30 days after the date of publication unless PHS receives comments which would result in a contrary determination.

ADDRESS: Please submit comments to: Privacy Act Officer, Alcohol, Drug Abuse, and Mental Health Administration, Room 6–102, Parklawn Building, 5600 Fishers Lane, Rockville, Maryland 20857, (301) 443–4543.

Comments received will be available for inspection at this same address from 8:30 a.m. to 4 p.m., Monday through Friday.

FOR FURTHER INFORMATION CONTACT: Contract Officer, National Institute on Drug Abuse, Room 10–49, Parklawn Building, 5600 Fishers Lane, Rockville, Maryland 20857, (301) 443–6677.

The numbers listed above are not toll free.

SUPPLEMENTARY INFORMATION: The Alcohol, Drug Abuse, and Mental Health Administration (ADAMHA) proposes to establish a new system of records: 09–30–0049, "Consultant Records Maintained by ADAMHA Contractors, HHS/ADAMHA/OA." This proposed umbrella system of records will comprise records generated by ADAMHA contractors who provide logistical support for review of grants and/or contracts, conferences; meetings, etc. The records will be used to obtain and pay consultants.

Records collected under this system will be organized and maintained according to the particular study which they support. Records will not be entered into a general or comprehensive data base, nor will there be any general index identifying all persons who are subjects of records in the separate studies covered by this system. However, ADAMHA will be treating the separate sets of records as a single system under the Privacy Act (1) because all of the sets of records serve the same purposes and contain similar types of data, (2) in order to apply consistent policies and practices in the maintenance of such records, and (3) to make it easier for subject individuals to obtain notification of, or access to, their records.

Individuals will be required to supply Social Security numbers in order to receive payment. However, ADAMHA will not use records in this system to make any determination concerning rights, benefits, or privileges of the individuals.

The records in this system will be maintained in a secure manner compatible with their content and use. Access will be given only to authorized contractor staff whose official duties require access for purposes of carrying out the contract. Individually identifiable records will be kept in a locked, limited-access area. Computerized records will be maintained in accordance with Part 6, "ADP System Security," in the HHS Information Resource Management Manual.

The first routine use proposed for this system allows disclosure to the Department of Justice or a court in the event of litigation. The second routine use, permitting disclosure to a congressional office, is proposed to allow subject individuals to obtain assistance from their representatives in Congress, should they so desire. The third routine use is proposed to allow contractors to accomplish logistical work related to the projects. The fourth routine use proposes to allow disclosure to the Internal Revenue Service of customary tax information related to payment of consultants and experts.

This system notice is written in the present, rather than the future tense, in order to avoid the unnecessary expenditure of public funds to republish the notice after it becomes effective.

Dated: October 1, 1987.

Wilford J. Forbush,

Deputy Assistant Secretary for Health Operations and Director, Office of Management.

09–30–0049

SYSTEM NAME:

Consultant Records Maintained By ADAMHA Contractors, HHS/ADAMHA/OA.

SECURITY CLASSIFICATION:

None.

SYSTEM LOCATION:

Records are located at various contractor sites. A list of specific contractor sites is available from the appropriate System Manager.

CATEGORIES OF INDIVIDUALS COVERED BY THE SYSTEM:

Consultants who participate in Alcohol, Drug Abuse, and Mental Health Administration (ADAMHA) conferences, meetings, evaluation projects, or technical assistance at site locations arranged by contractors.

CATEGORIES OF RECORDS IN THE SYSTEM:

Names, addresses, Social Security numbers, qualifications, curricula vitae, travel records, and payment records for consultants.

AUTHORITY FOR MAINTENANCE OF THE SYSTEM:

Public Health Service Act, as amended, Section 501, (42 U.S.C. 290aa). This section covers program authorities for ADAMHA and its three Institutes.

PURPOSE(S):

This umbrella system of records covers a varying number of separate sets of records used in different projects. These records are established by contractors to organize programs, obtain and pay consultants, and to provide necessary reports related to payment to the Internal Review Service for these programs for ADAMHA. ADAMHA personnel may use records when a technical assistance consultant is needed for a specialized area of research, review, advice, etc.

ROUTINE USES OF RECORDS MAINTAINED IN THE SYSTEM, INCLUDING CATEGORIES OF USERS AND THE PURPOSES OF SUCH USE:

1. The Department of Health and Human Services (HHS) may disclose information from this system of records to the Department of Justice, or to a court or other tribunal, when (a) HHS, or any component thereof; or (b) any HHS employee in his or her official capacity; or (c) any HHS employee in his or her individual capacity where the Department of Justice (or HHS, where it is authorized to do so) has agreed to represent the employee; or (d) the United States or any agency thereof where HHS determines that the litigation is likely to affect HHS or any of its components, is a party to litigation or has an interest in such litigation, and HHS determines that the use of such records by the Department of Justice, the court or other tribunal is relevant and necessary to the litigation and would help in the effective representation of the governmental party, provided however, that in each case, HHS determines that such disclosure is compatible with the purpose for which the records were collected.

2. Disclosure may be made to a congressional office from the record of

an individual in response to a verified inquiry from the congressional office made at the written request of that individual.

3. ADAMHA proposes to contract with private firms for the purposes of handling logistics for conferences, reviews, development of training materials, and of obtaining the services of consultants. Relevant records will be disclosed to such a contractor or may be developed by the contractor for use in the project. The contractor shall be required to maintain Privacy Act safeguards with respect to such records.

4. Information in this system of records is used routinely to prepare W–2 and 1099 Forms to submit to the Internal Revenue Service and applicable State and local governments those items to be included as income to an individual.

POLICIES AND PRACTICES FOR STORING, RETRIEVING, ACCESSING, RETAINING AND DISPOSING OF RECORDS IN THE SYSTEM:

STORAGE:

Records may be stored in file folders, on index cards, computer tapes and disks, microfiche, microfilm.

RETRIEVABILITY:

Information will be retrieved by name.

SAFEGUARDS:

Measures to prevent unauthorized disclosures are implemented as appropriate for each location. Each site implements personnel, physical, and procedural safeguards such as the following:

1. Authorized Users: Only ADAMHA personnel working on these projects and personnel employed by ADAMHA contractors to work on these projects are authorized users as designated by the system managers.

2. Physical Safeguards: Records are stored in locked rooms, locked file cabinets, and/or secured computer facilities.

3. Procedural Safeguards: Contractors who maintain records in this system are instructed to make no further disclosure of the records except as authorized by the system manager and permitted by the Privacy Act. Privacy Act requirements are specifically included in contracts and in agreements with grantees or collaborators participating in research activities supported by this system. HHS project directors, contract officers, and project officers oversee compliance with these requirements.

4. Implementation Guidelines: DHHS Chapter 45–13 and supplementary Chapter PHS.hf: 45–13 of the General Administration Manual, and Part 6, "ADP System Security" in the HHS Information Resource Management Manual.

RETENTION AND DISPOSAL:

Records will be destroyed 3 years after they are no longer used, or, if payment is involved, 3 years after closeout of the contract.

SYSTEM MANAGER(S) AND ADDRESS:

The policy coordinating official for this system of records is also the System Manager for NIDA.

Contract Officer, National Institute on Drug Abuse, RM 10–49 Parklawn, 5600 Fishers Lane, Rockville, Maryland 20857

Contract Officer, National Institute of Mental Health, RM 15–81 Parklawn, 5600 Fishers Lane, Rockville, Maryland 20857

Contract Officer, National Institute on Alcohol Abuse and Alcoholism, RM 14C–06 Parklawn, 5600 Fishers Lane, Rockville, Maryland 20857

NOTIFICATION PROCEDURES:

To determine if a record exists, write to the appropriate System Manager at the address above. Provide notarized signature as proof of identity. The request should include as much of the following information as possible: (a) Full name; (b) title of projet individual participated in; (c) ADAMHA project officer; and (d) approximate date(s) of participation.

RECORD ACCESS PROCEDURES:

Same as notification procedures. Requesters should also reasonably specify the record contents being sought. Individuals may also request an accounting of disclosures of their records, if any.

CONTESTING RECORD PROCEDURES:

Contact the official at the address specified under Notification Procedures above and reasonably identify the record, specify the information being contested, and state the corrective action sought, with supporting information to show how the record is inaccurate, incomplete, untimely, or irrelevant.

RECORD SOURCE CATEGORIES:

Information gathered from individual consultants and from assignment or travel documents.

SYSTEMS EXEMPTED FROM CERTAIN PROVISIONS OF THE ACT:

None.

[FR Doc. 87–23321 Filed 10–7–87; 8:45 am]
BILLING CODE, 4160–20–M

Privacy Act; Systems of Records

AGENCY: Public Health Service; Department of Health and Human Services.

ACTION: Notification of new system of records, 09–37–0020, "Office of Minority Health Grant Records System, HHS/OASH/OMH."

SUMMARY: In accordance with the requirements of the Privacy Act, the Public Health Service (PHS) is publishing a notice of a proposal to create a new system of records, 09–37–0020 "Office of Minority Health Grants Records System, HHS/OASH/OMH." This new system will maintain the grant files for the Office of Minority Health. We are proposing nine routine uses for this system.

DATE: PHS invites interested persons to submit comments on the proposed routine uses on or before November 9, 1987. PHS has sent a report of the new system to the Congress and to the Office of Management and Budget (OMB) on October 1, 1987. The system of records will be effective 60 days from the date submitted to OMB, unless PHS receives comments on the routine uses which would result in a contrary determination.

ADDRESS: Please submit comments to: Mr. J. Henry Montes, Associate Director for External Programs, Office of Minority Health, PHS, Room 118F, HHH Building, 200 Independence Ave., SW., Washington, D.C. 20201.

Comments received will be available for inspection at the same address from 9:00 a.m. to 4:00 p.m., Monday through Friday.

FOR FURTHER INFORMATION CONTACT: Ralph L. Sloat, Chief, Grants Management Branch, Room 18A–10, Parklawn Building, 5600 Fishers Lane, Rockville, Maryland 20857, Telephone (301) 443–4033. This is not a toll free number.

SUPPLEMENTARY INFORMATION:

The Office of Minority Health (OMH) is proposing to establish a new system of records which will contain its grant program records. The Report of the Secretary's Task Force on Black and Minority Health identified six health problems that account for 80 percent of the excess deaths among minorities. These six, listed in alphabetical order are: cancer; cardiovascular disease and stroke; chemical dependency, measured by death due to cirrhosis; diabetes; homicide, suicide, and accidents (unintentional injuries); and infant mortality. This grant program is designed to stimulate community

coalitions to work on activities aimed at reducing the risk factors associated with these six categories of disease.

There are nine routine uses of information proposed for this new system. These routine uses will permit OMH to release information in certain specified cases to other organizations or individuals for assistance in review of applications or for good administrative procedures, or to protect the government's interests.

Specifically, routine uses are proposed for the following situations:

Routine use 1 will permit OMH to respond to a Congressional inquiry made at the request of a subject individual.

Routine use 2 will permit the DHHS to provide information to the Department of Justice or any other agency in cases where government litigation interests require it.

Routine use 3 will permit OMH to make use of an outside consulting firm to make special analyses, if needed, on trends or data in OMH grant files and for other management purposes. Any such firms would have to certify to abide by Privacy Act requirements before being given access to any files in the system of records.

Routine use 4 will permit OMH to utilize the expertise of individuals who are not official members of a grant review committee to provide comments on particular applications as requested by the Executive Secretary of the review committee.

Routine use 5 will permit OMH to respond to any valid request which may be received from another Federal agency for information in a particular grant file which might bear on an employment, licensing, contracting or grant award action to be taken by that agency.

Routine use 6 acknowledges that OMH will respond to any valid subpoena issued by a Federal agency which may be received requesting information in the system of records.

Routine use 7 permits OMH to assist in any requests for information by the cognizant audit agency.

Routine use 8 permits OMH to assist with any investigation of a violation or potential violation of law by making information in a particular file in the system of records available to the appropriate Federal or State agency as requested.

Routine use 9 permits OMH to disclose information to a grantee in the grant file relevant to the administration of that grant.

The records will be maintained in locked files with general building security. The records will be available to staff of the Office of Minority Health for administrative purposes, other DHHS staff with a need-to-know, and to contractors for data analysis. Contractors will be bound by the same confidentiality rules that apply to staff.

This notice is written in the present tense, rather than in the future tense, in order to avoid the unnecessary expenditure of public funds to republish the notice after the system becomes effective.

Dated: October 1, 1987.

Wilford J. Forbush,

Deputy Assistant Secretary for Health Operations and Director, Office of Management, Public Health Service.

09-37-0020

SYSTEM NAME:

Office of Minority Health Grants Records System, HHS/OASH/OMH.

SECURITY CLASSIFICATION:

None.

SYSTEM LOCATION:

Office of Minority Health, Parklawn Building, Room 18A-10, 5600 Fishers Lane, Rockville, Maryland 20857.

A current list of contractor sites is available by writing to the address below under SYSTEM MANAGER.

Inactive records are located at the Federal Records Center, 4205 Suitland Road, Suitland, Maryland 20409.

CATEGORIES OF INDIVIDUALS COVERED BY THE SYSTEM:

Project Grant Program Directors.

CATEGORIES OF RECORDS IN THE SYSTEM:

Grant files, including grant applications, grant award notices, summary comments of peer reviewers, salary information, staffing lists, general correspondence, and Social Security Numbers (optional).

AUTHORITY FOR MAINTENANCE OF THE SYSTEM:

Public Health Service Act Section 301 (42 U.S.C. 242). This section authorizes support of health-related grants.

PURPOSE(S):

The information in this system is used to facilitate day-to-day grants management operations and for purposes of review, analysis, planning and policy formulation by OMH staff members and by other components of DHHS.

ROUTINE USES OF RECORDS MAINTAINED IN THE SYSTEM, INCLUDING CATEGORIES OF USERS AND THE PURPOSES OF SUCH USES:

(1) Disclosure may be made to a congressional office from the record of an individual in response to an inquiry from the congressional office made at the request of that individual.

(2) The Department may disclose information from this system of records to the Department of Justice, to a court or other tribunal, when

(a) HHS, or any component thereof; or

(b) Any HHS employee in his or her official capacity; or

(c) Any HHS employee in his or her individual capacity where the Department of Justice (or HHS, where it is authorized to do so) has agreed to represent the employee; or

(d) The United States or any agency thereof where HHS determines that the litigation is likely to affect HHS or any of its components, is a party to litigation or has an interest in such litigation, and HHS determines that the use of such records by the Department of Justice, the court or other tribunal, is relevant and necessary to the litigation and would help in the effective representation of the governmental party, provided, however, that in each case, HHS determines that such disclosure is compatible with the purpose for which the records were collected.

(3) Disclosure may be made to a private firm for the purposes of providing services related to grant review, or for carrying out quality assessment, program evaluation, and/or management reviews. Any such contractors will be required to maintain Privacy Act safeguards with respect to such records.

(4) Disclosure may be made to qualified experts not within the definition of Department employees for opinions as a part of the application review and award process.

(5) Disclosure may be made to a Federal agency, in response to its request, in connection with the hiring or retention of an employee, the issuance of security clearance, the reporting of an investigation of an employee, the letting of a contract, or the issuance of a license, grant, or other benefit of the requesting agency, to the extent that the record is relevant and necessary to the requesting agency's decision on the matter.

(6) Where Federal agencies having power to subpoena other Federal agencies' records, such as the Internal Revenue Service or Civil Rights Commission, issue a subpoena to the Department for records in this system of records, the Department will make such records available.

(7) Disclosure may be made to the cognizant Audit Agency for auditing.

(8) In the event that a system of records maintained by the Department indicates a violation or potential

violation of law, whether civil, criminal, or regulatory in nature, and whether arising by statute or by regulation, rule or order issued pursuant thereto, the relevant records in the system of records may be referred as a routine use, to the appropriate agency, whether Federal (e.g., the Department of Justice), or State (e.g., the State Attorney General's office) charged with the responsibility of investigating or prosecuting such violation or charged with enforcing or implementing the statute or rule, regulation or order issued pursuant thereto for litigation.

(9) Disclosure may be made to the grantee institution in connection with performance or administration under the terms and conditions of the award.

POLICIES AND PRACTICES FOR STORING, RETRIEVING, ACCESSING, RETAINING, AND DISPOSING OF RECORDS IN THE SYSTEM:

STORAGE:

Manual files (files folders).

RETRIEVABILITY:

Retrievable by program director name and grant number.

SAFEGUARDS:

1. Authorized Users: Only staff members of the office of Minority Health (OMH) have regular access. Staff members of other DHHS components have access on a need-to-know basis only.

2. Physical Safeguards: Locked file cabinets, locked offices, general building security.

3. Procedural Safeguards: OMH staff may inspect and review records, with the approval of Grant Management Branch staff. Other DHHS staff will be granted access by the System manager only on a need-to-know basis. Visitors will not be left unattended in the office containing the files. Grant records are either transmitted in sealed envelopes or are hand-carried.

RETENTION AND DISPOSAL:

Approved grant applications and their respective files are retained by OMH for one year beyond the termination date of the project. Disapproved grant applications are held for six months. The grant files are then retired to a Federal Records Center and subsequently disposed of in accordance with the PHS/OASH records control schedule. The records control schedule may be obtained by writing to the System Manager at the following address.

SYSTEM MANAGER(S) AND ADDRESS:

Mr. J. Henry Montes, Associate Director for External Programs, Office of Minority Health, PHS, Room 118F, HHH Building, 200 Independence Ave. SW, Washington, DC 20201.

NOTIFICATION PROCEDURE:

To determine if a record exists, write to the System Manager at the above address. Specify program director's name and/or grant number.

RECORD ACCESS PROCEDURE:

Same as notification procedures. Requesters should also reasonably specify the record contents being sought. Positive identification is required. You may also request an accounting of disclosures that have been made of your record, if any.

CONTESTING RECORD PROCEDURES:

Contact the official at the address specified under System Manager above and reasonably identify the record, specify the information being contested, the corrective action sought, and your reasons for requesting the correction, along with supporting information to show how the record is inaccurate, incomplete, untimely, or irrelevant.

RECORD SOURCE CATEGORIES:

Grant applications, reports and correspondence from organizations interested in improving minority health, summary statements from grant review committees and incoming correspondence from project staff.

SYSTEMS EXEMPTED FROM CERTAIN PROVISIONS OF THE ACT:

None.

BILLING CODE 4160-17-M

DEPARTMENT OF HOUSING AND URBAN DEVELOPMENT

Office of Assistant Secretary for Housing—Federal Housing Commissioner

[Docket No. N-87-1739; FR-2417]

National Manufactured Home Advisory Council; Meeting

AGENCY: Assistant Secretary for Housing–Federal Housing Commissioner, HUD.

ACTION: Notice, meeting of National Manufactured Home Advisory Council.

SUMMARY: This notice announces a meeting of the National Manufactured Home Advisory Council. The meetings will be held on October 29, and 30, 1987.

FOR FURTHER INFORMATION CONTACT: Mabel Mishler, Compliance Branch, Manufactured Housing and Construction Standards Division, Office of Manufactured Housing and Regulatory Functions, 451 7th Street, SW., Room 9158, Washington, DC 20410–8000; telephone: (202) 755–6584. (This is not a toll-free number).

SUPPLEMENTARY INFORMATION: The National Manufactured Housing Construction and Safety Standards Act of 1974 (hereinafter "the Act"), 42 U.S.C. 5401 *et seq.*, requires the Secretary of the Department of Housing and Urban Development to establish Federal construction and safety standards for manufactured homes. The Act also requires that the Secretary appoint a National Manufactured Home Advisory Council composed of twenty-four members. The membership of the Council is selected equally from each of the following categories: (a) The manufactured home industry and related groups, including at least one representative of small business; (b) consumer organizations, community organizations, and recognized consumer leaders; and (c) government agencies including Federal, State and local governments. The purpose of the National Manufactured Home Advisory Council is to advise the Department, to the extent feasible, prior to the establishment, amendment or revocation of any manufactured home construction and safety standard.

In accordance with the Federal Advisory Committee Act, 5 U.S.C. App. I, section 10(a)(2), announcement is made of the following meeting:

The National Manufactured Home Advisory Council will meet on October 29 and 30, 1987. The meetings are open to the public and will convene at 1:00 p.m. on Thursday, October 29, 1987, at the Department of Housing and Urban Development, Departmental Conference Room 10233, 451 7th Street, SW., Washington, DC 20410–8000.

The Advisory Council will discuss and evaluate proposed revisions to the Federal Manufactured Home Construction and Safety Standards (FMHCSS). Revisions to the Standards are being proposed in the areas of thermal energy conservation standards and lead content in potable water lines.

The final agenda will be available at the meeting. Inquiries concerning the agenda may be made after September 30, 1987, by contacting the Office of Manufactured Housing and Construction Standards, HUD, at (202) 755–6584.

Authority

Sec. 605 of the National Manufactured

Housing Construction and Safety Standards Act of 1974, 42 U.S.C. 5404; Sec. 10 of the Federal Advisory Committee Act, 5 U.S.C. App. I.

Date: October 1, 1987.

Thomas T. Demery,

Assistant Secretary for Housing—Federal Housing Commissioner.

DEPARTMENT OF THE INTERIOR

Bureau of Land Management

[AK-967-4213-15 AA-50379-22]

Alaska Native Claims Selection; Chugach Alaska Corp.

In accordance with Departmental regulation 43 CFR 2650.7(d), notice is hereby given that a decision to issue conveyance under the provisions of secs. 12(c), 14(h)(8) and 22(f) of the Alaska Native Claims Settlement Act of December 18, 1971 (ANCSA), 43 U.S.C. 1601, 1611(c), 1613(h)(8), 1621(f), and the 1982 CNI Settlement Agreement of January 10, 1983, entered into pursuant to ANCSA and secs. 1302(h) and 1430(a) of the Alaska National Interest Lands Conservation Act of December 2, 1980, Pub. L. 96-487, 94 Stat. 2371, 2475, 2531, will be issued to Chugach Alaska Corporation for approximately 762 acres. The lands involved are located in Secs. 6, 7, and 18, T. 2 N., R. 1 E., Seward Meridian, Alaska, on the Snow River in the vicinity of Seward, Alaska.

A notice of the decision will be published once a week, for four (4) consecutive weeks, in the Anchorage Times. Copies of the decision may be obtained by contacting the Bureau of Land Management, Alaska State Office, 701 C Street, Box 13, Anchorage, Alaska 99513, ((907) 271-5960).

Any party claiming a property interest which is adversely affected by the decision, an agency of the Federal government or regional corporation, shall have until November 9, 1987 to file an appeal. However, parties receiving service by certified mail shall have 30 days from the date of receipt to file an appeal. Appeals must be filed in the Bureau of Land Management, Division of Conveyance Management (960), address identified above, where the requirements for filing an appeal may be obtained. Parties who do not file an appeal in accordance with the requirements of 43 CFR Part 4, Subpart E, shall be deemed to have waived their rights.

Terry R. Hassett,

Chief, Branch of KCS Ajudication.

Salmon District; Emergency Interim Closure of Public Lands, Idaho

AGENCY: Bureau of Land Management, Interior.

ACTION: Notice of emergency interim vehicle closure for Snaketrail Ridge Road located on public lands in Custer County, Idaho. The area is located about 2.5 miles southeast of the junction of the East Fork and main Salmon Rivers and about 20 miles south of Challis, Idaho. The closure will be year-round for vehicles greater than 40" in width, thus allowing winter snowmobile use. This Bureau action will take place as a cooperative venture with Idaho Department of Fish and Game, Challis National Forest, and concerned local citizens.

FOR FURTHER INFORMATION CONTACT: Bob Hale, Bureau of Land Management, P.O. Box 430, Salmon, ID 83567; telephone (208) 756-5400.

Dated: September 29, 1987.

National Public Lands Advisory Council; Call for Nominations

AGENCY: Bureau of Land Management, Interior.

ACTION: Call for nominations for National Public Lands Advisory Council.

SUMMARY: The purpose of this notice is to call for nominations for seven memberships on the Bureau of Land Management's National Public Lands Advisory Council.

The Council consists of 21 members. Under the staggered-term arrangement instituted by the Secretary of the Interior in 1981, the terms of seven members on the Council will expire on December 31, 1987. Current Council members may be reappointed or new members may be appointed. Terms of appointment will be for 3 years, beginning January 1, 1988, and expiring December 31, 1990.

Nominees for membership should be well qualified through education, training and experience to give informed and objective advice concerning land use and resource planning for the public lands.

DATE: Nominations should be received by the Bureau of Land Management by November 10, 1987.

VOL 52 ISS 195 OCT 8 1987 UMI

ADDRESS: Persons wishing to nominate individuals to serve on the Council should send biographical data that includes name, address, profession, and other relevant information about the candidate's qualifications to: Director (150), Bureau of Land Management, MS–5558, Department of the Interior, Washington, DC 20240.

SUPPLEMENTARY INFORMATION: The function of the Council is to advise the Secretary of the Interior, through the Director, Bureau of Land Management, on policies and programs of a national scope related to the resources and uses of public lands under the jurisdiction of the Bureau of Land Management.

The Council is expected to meet three times a year. Additional meetings may be called by the Director in connection with special needs for advice. Members will serve without salary, but will be reimbursed for travel and per diem expense rates prevailing for Government employees.

FOR FURTHER INFORMATION CONTACT: Karen Slater, Bureau of Land Management (150), MS–5558, Department of the Interior, Washington, DC 20240, Telephone: (202) 343–2054.

Dated: October 2, 1987.

Management Framework Plan; Owyhee and Bruneau-Kuna; Idaho

AGENCY: Bureau of Land Management, Boise District Office, Interior.

ACTION: Notice to amend the Owyhee and Bruneau-Kuna Management Framework Plans.

SUMMARY: The Boise District, Bureau of Land Management proposes to amend the Owyhee and Bruneau-Kuna Management Framework Plans (MEPs) to establish research natural areas as Areas of Critical Environmental Concern.

ADDRESS: Requests for additional information and requests to be involved in this planning action can be directed to the Bureau of Land Management, Chief, Planning and Environmental Assistance, 3948 Development Avenue, Boise, Idaho 83705.

FOR FURTHER INFORMATION CONTACT: Ted S. Milesnick, Chief, Planning and Environmental Assistance at the above address or call (208) 334–1582; (FTS) 554–1582.

SUPPLEMENTARY INFORMATION: The Boise District, BLM will evaluate five to ten sites in Owyhee County, Idaho for management as Areas of Critical Environmental Concern to protect research natural area values. These sites are located in the Bruneau and Owyhee Resource Areas. The sites vary in size from 100 acres to approximately 2,000 acres each. These sites would provide representation and protection for several vegetative communities which occur within Idaho. The sites being considered are primarily in good to excellent ecological condition. The main issues anticipated are conflicts between managing the areas as Research Natural Areas or allowing the areas to be open for livestock grazing or unrestricted mineral and energy exploration and development.

An interdisciplinary team including range, wildlife, wilderness and mineral and energy specialists will prepare the amendment and the environmental analysis. A draft amendment and environmental analysis will be circulated to interested publics prior to approval of the proposed amendment.

The existing MFPs for the areas being considered are available for review at the above listed address.

Dated: September 24, 1987.

J. David Brunner,

District Manager.

SUMMARY: The following described lands and interests therein have been determined to be available for lease under section 302 of the Federal Land Policy and Management Act of 1976 (43 U.S.C. 1732):

San Bernadino Meridian, California

T. 8 N., R. 23 E.,
Sec. 22, SW¼SW¼, containing 40 acres.

The United States proposes to lease these lands on a modified-competitive basis for use as a full-service truck stop and related facilities. Applications shall be considered.

Such lease will be subject to those rights for a highway access right-of-way granted to California Department of Transportation by right-of-way No. RI-04112 and for a 12 kV electric distribution line granted to the City of Needles by right-of-way No. RI-07071.

Publication of this Notice segregate the subject lands from all appropriations under any other public land laws, including location under the mining laws. This segregation will terminate upon issuance of a lease for these lands, 2 years from the date of this publication, or upon publication of a Notice of Termination, whichever occurs first.

For a period of 45 days from the date of publication of this Notice, interested parties may submit comments to the District Manager, Yuma, Arizona 85364. Any objections will be reviewed by the State Director, who may sustain, vacate, or modify this realty action. In the absence of any objections, this realty action will become the final determination of the Department of Interior, effective 60 days from the date of publication in the **Federal Register.**

FOR FURTHER INFORMATION CONTACT: Mike Ford, Area Manager, Havasu Resource Area, Bureau of Land Management, 3189 Sweetwater Avenue, Lake Havasu City, Arizona 86403, 602-855-8017.

Dated: September 30, 1987.

J. Darwin Snell,

District Manager.

[FR Doc. 87-23367 Filed 10-7-87; 8:45 am]

BILLING CODE 4310-32-M

[ID-050-08-4212-14]

Realty Action; Sale of Public Land; Idaho

AGENCY: Bureau of Land Management, Interior.

ACTION: Notice of Realty Action, I-21974, I-21982 through I-21986 inclusive and I-24538, I-24539, I-24540, Sale of Public Lands in Lincoln, Jerome, Elmore, and Gooding Counties, Idaho.

SUMMARY: The following described lands were examined, and through land use planning and public input were determined to be suitable for disposal by sale pursuant to section 203(a) of the Federal Land Policy and Management Act of 1976. Only sealed bids will be accepted.

Parcel	Acres	Legal	Case file No.
1	40.00	T. 5 S., R. 15 E., B.M., Section 27: NW¼SE¼	I-21974
2	5.00	T. 6 S., R. 12 E., B.M., Section 1: N½NE¼NE¼SW¼	I-21982
3	30.00	T. 5 S., R. 11 E., B.M., Section 33: E½E½NW¼SE¼; Section 34: S½SW¼SE¼	I-21983
4	160.00	T. 7 S., R. 18 E., B.M., Section 19: NE¼SE¼; Section 30: NW¼NE¼, SE¼NW¼, NE¼SW¼	I-21984
5	40.00	T. 5 S., R. 17 E., B.M., Section 15: SW¼NW¼	I-21985
6	40.00	T. 9 S., R. 19 E., B.M., Section 7: SW¼NE¼	I-21986
7	20.00	T. 6 S., R. 17 E., B.M., Section 2: E½SW¼SW¼	I-24538
8	20.00	T. 9 S., R. 17 E., B.M., Section 21: N½NW¼NW¼	I-24539
9	20.00	T. 9 S., R. 17 E., B.M., Section 21: S½NW¼NW¼	I-24540

Parcels 1 through 9, when patented, will be subject to the following reservations:

1. A right-of-way for ditches or canals constructed by the authority of the United States. Act of August 30, 1890, 26 Stat. 391; 43 USC 945.

2. Oil and gas shall be reserved to the United States.

3. All valid existing rights and reservations.

Parcels 2, 3, 8, and 9, when patented, will also be subject to geothermal resources being reserved to the United States.

Parcels 3, when patented, will also be subject to sodium and potassium resources being reserved to the United States.

The lands are hereby segregated from all appropriation under the public land laws including the mining laws until sold or this sale is suspended.

Sealed bids must be received in this office no later than 1:00 p.m. on December 11, 1987. Bids for less than the appraised fair market value will not be accepted. The appraised values are not available at this time, but will be made public approximately one month before the sale date. A bid will constitute an application for conveyance of mineral interests of no known value. A $50.00 filing fee for processing such mineral conveyance, along with, but separate from, 30 percent of the full bid price, must accompany each bid.

Parcel 1 was previously offered on December 13, 1985, but was not sold. This is a reoffering of that parcel.

If a parcel is not sold on December 11, 1987, the parcel(s) will be offered the second Friday of each month at the same time and place until sold or the sale is suspended.

All parcels are offered as open competitive sales without preference to past users or adjacent landowners, except parcels 2, 3, 4, and 8. Those parcels are modified competitive bids for December 11, 1987. To qualify as a designated preference-right bidder, the following identified parties must submit a qualified bid on the original sale date.

Parcel 2 is being sold at public auction, subject to a preference bidding designation to allow Mr. Leroy Hess of L&J Development Company to meet the highest bid based on historical occupancy use and adjacent landownership. Refusal or failure to meet the highest qualifying bid within 31 calendar days of this offering shall constitute a waiver of such bidding provisions and the land will be offered to the highest bidder. If no bid is received on the date of this offering, preference provisions will be waived and the land will be offered for sale using competitive procedures on January 8, 1988, and thereafter on the second Friday of each month until sold or the sale is suspended.

Parcel 3 is being sold at public auction, subject to a preference bidding designation to allow Mr. John C. Parke to meet the highest bid based on historical occupancy use and adjacent landownership. Refusal or failure to meet the highest qualifying bid within 31 calendar days of this offering shall constitute a waiver of such bidding provisions and the land will be offered to the highest bidder. If no bid is received on the date of this offering, preference provisions will be waived and the land will be offered for sale using competitive procedures on January 8, 1988, and thereafter on the second Friday of each month until sold or the sale is suspended.

Parcel 4 is being sold at public auction, subject to a preference bidding designation to allow Reservoir Land Company to meet the highest bid based on historical occupancy use and adjacent landownership. Refusal or failure to meet the highest qualifying bid within 31 calendar days of this offering shall constitute a waiver of such bidding provisions and the land will be offered to the highest bidder. If no bid is received on the date of this offering, preference provisions will be waived and the land will be offered for sale using competitive procedures on January 8, 1988, and thereafter on the second Friday of each month until sold or the sale is suspended.

Parcel 8 is being sold at public auction, subject to a preference bidding designation to allow Mr. Jack Watts to meet the highest bid based on historical occupancy use and adjacent landownership. Refusal or failure to meet the highest qualifying bid within 31 calendar days of this offering shall constitute a waiver of such bidding provisions and the land will be offered to the highest bidder. If no bid is received on the date of this offering, preference provisions will be waived and the land will be offered for sale using competitive procedures on January 8, 1988, and thereafter on the second Friday of each month until sold or the sale is suspended.

DATE AND ADDRESS: The sale offering will be held on December 11, 1987, at 1:00 p.m. in the Shoshone District, 400 West F Street, Shoshone, Idaho 83352.

FOR FURTHER INFORMATION CONTACT: Detailed information concerning the sale and conditions, appraised value, bidding procedures, and other details can be obtained by contacting Joe Aitken at (208) 886–2206 or writing to BLM, P.O. Box 2–B, Shoshone, Idaho 83352.

SUPPLEMENTARY INFORMATION: For a period of 45 days from the date of this notice, interested parties may submit comments to the Shoshone District Manager at the above address.

K Lynn Bennett,

District Manager.

Realty Action; Exchange of Public Lands in Elko County, NV

The following described public lands administered by the Bureau of Land Managment have been determined to be suitable for disposal by exchange under Section 206 of the Federal Land Policy and Managment Act of 1976, 43 U.S.C. 1716:

Mount Diablo Meridian, Nevada

T. 40 N., R. 69 E.,
- Sec. 4, Lots 1 and 4, SE¼NE¼, E½SE¼;
- Sec. 6, All;
- Sec. 8, NW¼NE¼, NE¼NW¼, SW¼NW¼, SW¼, NW¼SE¼, S½SE¼;
- Sec. 14, N½NE¼, NW¼NW¼;
- Sec. 16, NE¼, NE¼SE¼;
- Sec. 18, All;
- Sec. 20, All;
- Sec. 28, W½, W½SE¼, SE¼SE¼.

T. 41N., R. 69 E.,
- Sec. 18, Lots 1–4 inclusive, NW¼NE¼, S½NE¼, E½W½, N½SE¼, SW¼SE¼;
- Sec. 20, W½W½, SE¼SW¼;
- Sec. 30, All;
- Sec. 32, W½NW¼, SW¼.

The areas described above aggregate 4,841.87 acres.

In exchange for these lands the United States will acquire the following described private lands for Lands of Sierra, Inc.:

Mount Diablo Meridian, Nevada

T. 40 N., R. 62 E.,
- Sec. 1, All;
- Sec. 2, Lots 1–4 inclusive, 6, 7, SE¼NW¼, N½SW¼, SW¼SW¼, SE¼;
- Sec. All;
- Sec. 10, All;
- Sec. 11, All;
- Sec. 12, W½NW¼, SE¼SW¼.

T. 41 N., R. 62 E.,
- Sec. 26, E½, S½NW¼, SE¼NW¼;
- Sec. 27, All;
- Sec. 34, All;
- Sec. 35, All;
- Sec. 36, S½SW¼, SW¼SE¼.

The areas described above aggregate 6,206.75 acres.

In addition to the private lands described above, Lands of Sierra is providing an easement to insure public access to the property.

The purpose of the exchange is to acquire non-Federal lands in the Snake Mountain Range with demonstrated wildlife, riparian and recreation potential. The exchange is consistent with the Wells, Resource Management Plan and is in the public interest. The lands to be disposed of are within the Lands of Sierra, Inc., grazing allotment and contain a total of 417 AUMs. Lands of Sierra does not own the mineral estate for the private offered lands. Therefore there would be no exchange of mineral estates by either party. The exchange would not be consummated any sooner than 60 days after the date this notice is published in the **Federal Register.**

The above described lands will be subject to an appraisal to determine the value of the lands to be exchanged. The lands involved may be adjusted to

equalize values following the completion of the appraisal.

Land transferred from the United States will contain the following reservations in the patent:

1. A right-of-way thereon for ditches and canals constructed by the authority of the United States; Act of August 30, 1980 (26 Stat. 391; 43 U.S.C. 945).

2. All mineral deposits in the lands, and to it, or persons authorized by it, the right to prospect for, mine and remove such deposits from the same under applicable laws and such regulations as the Secretary of Interior may prescribe.

The patent would be issued subject to:

1. Those rights for powerline purposes granted to Raft River Electric Company, its successors or assigns, by right-of-way No. Nev-044466, pursuant to the Act of March 4, 1911 (36 Stat. 1253; 43 U.S.C. 961).

2. Those rights for communication line purposes granted to CP National Telephone, its successors or assigns by right-of-way No. N–2614, pursuant to the Act of March 4, 1911 (36 Stat. 1253; 43 U.S.C. 961).

3. Those rights for roadway purposes granted to Elko County, its successors or assigns, by right-of-way No. N–46813, pursuant to the Act of October 21, 1976 (90 Stat. 2776; 43 U.S.C. 1761).

4. Those rights for roadway purposes granted to the Bureau of Land Management, its successors or assigns, by right-of-way No. N–47144, pursuant to the Act of October 21, 1976 (90 Stat. 2781; 43 U.S.C. 1767).

5. Those rights for roadway purposes granted to the Bureau of Land Management, its successors or assigns, by right-of-way No. N–47145, pursuant to the Act of October 21, 1976 (90 Stat. 2781; 43 U.S.C. 1767).

Title to the offered lands when conveyed to the United States will contain the following reservations:

1. An easement over a portion of sections 1, 2, 3 and 10, T. 40 N., R. 62 E., MDM, of 20 feet in width for communication facilities and incidental purposes, as granted to American Telephone and Telegraph Company by easement recorded in Book 98 of Official Records at Page 294, Elko County, Nevada.

2. A right-of-way executed by Winecup Ranch Partnership to American Telephone and Telegraph Company over a portion of Section 1, T. 40 N., R. 62 E., MDM., for road purposes by document recorded January 13, 1972, in Book 158 of Official Records at Page 373, Elko County, Nevada.

Publication of this notice in the **Federal Register** will segregate the subject lands from all appropriations under the public land laws including the mining and mineral leasing laws. This segregation will terminate upon the issuance of patent or two years from the date of this notice or upon publication of a Termination of Segregation.

Further information regarding this exchange including the Environmental Assessment is available for review at the Elko District Office, Bureau of Land Management, 3900 E. Idaho, Elko, Nevada 89801. For a period of 45 days from the date of publication of this notice in the **Federal Register**, interested parties may submit comments to the District Manager, Elko District, at the above address. All objections will be reviewed by the State Director who may sustain, vacate, or modify this realty action. In the absence of timely objections, this proposal shall become the final determination of the Department of the Interior.

Dated: September 30, 1987.

Rodney Harris,

District Manager.

BILLING CODE 4310–HC–M

[NV–930–07–4212–13 (N–46056)]

Land Exchange Conveyance; Opening of Public Lands, Nevada

AGENCY: Bureau of Land Management, Interior.

ACTION: Notice; issuance of land exchange conveyance document and order providing for opening of public lands, Nevada.

SUMMARY: This notice identifies Federal and non-Federal lands involved in a recently completed exchange transaction. The lands acquired by the United States will become open to the operation of the public land laws on the date specified below. No minerals were reconveyed to the United States.

EFFECTIVE DATE: November 9, 1987.

FOR FURTHER INFORMATION CONTACT: Rod Harris, District Manager, Elko District Office, P.O. Box 831, Elko, Nevada 89801 (702) 738–4071.

SUPPLEMENTARY INFORMATION: The United States issued Deed No. NV–87–001 to Newmont Gold Company on September 25, 1987, for the following described lands pursuant to section 206 of the Act of October 21, 1976 (43 U.S.C. 1716):

Mount Diablo Meridian, Nevada

T. 31 N., R. 53 E.,
Sec. 4, lots 1, 2, 3, 4, S½N½, S½.
T. 32 N., R. 53 E.,
Sec. 33, lots 1, 2, 3, 4, N½, N½S½.

The area described contains 1,287.44 acres in Elko County, Nevada.

In exchange for these lands, the United States acquired the following described lands from Newmont Gold Company:

Mount Diablo Meridian, Nevada

T. 37 N., R. 55 E.,
Sec. 27 lots 1, 2, 3, 4, E½W½, SW¼SE¼.
Sec. 33, All.

The area described contains 1,027.64 acres in Elko County, Nevada.

The purpose of this exchange was to acquire non-Federal land with demonstrated fishery values and recreation potential. The public interest was served through completion of this exchange.

The Federal and non-Federal land in the exchange were of equal value, $77,000.00.

At 10:00 a.m., on November 9, 1987, the lands will be open to operation of the public land laws generally, subject to valid existing rights, the provisions of existing withdrawals, and the requirements of applicable law. All valid applications received at or prior to 10:00 a.m., on November 9, 1987, shall be considered as simultaneously filed at that time. Those received thereafter shall be considered in the order of filing.

Edward F. Spang,

State Director, Nevada.

[FR Doc. 87–23370 Filed 10–7–87; 8:45 am]

BILLING CODE 4310–HC–M

[NV–930–08–4212–18; N–45233]

Realty Action; Non-Competitive Sale of Public Lands in Clark County, NV

The following described land in Mesquite, Clark County, Nevada has been determined to be suitable for sale utilizing non-competitive procedures, at not less than fair market value. Authority for the sale is the Act of October 27, 1986, 100 Stat. 3061 (Pub. L. 99–548). The lands will be offered for sale no later than October 26, 1987.

Mount Diablo Meridian

T. 13 S., R. 71 E.,
Sec. 8, lots, 1–3, NW¼NE¼, S½NE¼, NW¼, N½S½, SW¼SW¼;
Sec. 9, lots 1, 5, 6, 8, 11, 17, 19, 21, NE¼, NE¼NW¼, S½NW¼, N½SW¼, N½NW¼SE¼;
Sec. 10, lots 5–9, W½NW¼, NW¼SW¼;
Sec. 17, lot 1;
Sec. 18, N½NW¼.

Aggregating 1,439.62 acres, more or less.

This parcel of land, situated in Mesquite is being offered as a direct sale to the City of Mesquite. Public Law 99–548 directed the Secretary of the Interior through the Bureau of Land Management to sell certain public lands

BEST COPY AVAILABLE

VOL 52 ISS 195 OCT 8 1987 UMI

to the City of Mesquite to allow for community expansion. This is the first phase of a three phase process.

This land is not required for any federal purposes. The sale is consistent with the Bureau's planning system.

A deposit of twenty (20) percent of the appraised fair market value must be paid to the Bureau of Land Management, Las Vegas District Offict, no later than October 26, 1987. The balance of the full purchase price shall be paid within 180 days of the City's receipt of the sale offer.

Conveyance of the available mineral estate except for oil, gas, sodium and potasssium will occur simultaneously with the sale of the land. The subject lands have no known mineral values, with the exception of oil and gas, sodium and potassium. Acceptance of a direct sale offer will constitute an application for conveyance of those mineral interests. The applicant will be required to pay a $50.00 non-returnable filing fee for conveyance of the available mineral interests.

The patent, when issued, will contain the following reservations to the United States:

1. A right-of-way thereon for ditches and canals constructed by the authority of the United States, Act of August 30, 1890, 26 Stat. 391, 43 U.S.C. 945.

2. All oil and gas, sodium and potassium mineral deposits. A more detailed description of this reservation, which will be incorporated into the patent document, is available for review at the Las Vegas District Office.

and will be subject to:

1. Those rights for highway purposes granted to the State of Nevada, Department of Highways, its successors and assigns by Permit No. N–125, under the Act of August 27, 1958, as amended, 23 U.S.C. 107(d).

2. Those rights for communication site purposes which have been granted to Clark County School District, its successors or assigns, by Permit No. N–3886 under the Act of March 4, 1911, 36 Stat. 1253, formerly 43 U.S.C. 961.

The lands are segregated from all forms of appropriation under the public land laws, including the general mining laws by the Act of October 27, 1986.

Detailed information concerning the sale is available for review at the Las Vegas District Office, Bureau of Land Management, 4765 W. Vegas Dr., Las Vegas, NV.

Dated: October 1, 1987.

Ben F. Collins,

District Manager, Las Vegas, NV.

BILLING CODE 4310–HC–M

[MT–930–03–4212–13; NDM 62060]

Montana; Conveyance and Order Providing for Opening of Public Land in Bowman County, ND

AGENCY: Bureau of Land Management, Interior.

ACTION: Notice.

SUMMARY: This order will open lands reconveyed to the United States in an exchange under the Federal Land Policy and Management Act of 1976, 43 U.S.C. 1701 *et seq.* (FLPMA), to the operation of the public land laws. It also informs the public and interested state and local governmental officials of the issuance of the conveyance document.

EFFECTIVE DATE: At 9 a.m. on November 25, 1987, the lands reconveyed to the United States shall be open to the operation of the public land laws, subject to valid existing rights, the provisions of existing withdrawals and the requirements of applicable law. The lands described in paragraph 1 below were segregated from settlement, sale, location and entry, including the mining laws, but not from exchange, by the Notices of Realty Action published in the **Federal Register** on December 31, 1985 (50 FR 53404) and on June 25, 1986 (51 FR 23161). The segregation terminated for the affected lands on issuance of the Patent on August 4, 1987.

FOR FURTHER INFORMATION CONTACT: Edward H. Croteau, BLM, Montana State Office, P.O. Box 36800, Billings, Montana 59107, 406–657–6082.

SUPPLEMENTARY INFORMATION: 1. Notice is hereby given that pursuant to section 206 of FLPMA, the following described surface estate was conveyed to Everett Real Estate, Inc.:

Fifth Principal Meridian, North Dakota

T. 151 N., R. 99 W.,
Sec. 6, lot 5.
T. 152 N., R. 99 W.,
Sec. 7, lot 3;
Sec. 24, NW¼NE¼.
T. 141 N., R. 101 W.,
Sec. 18 SE¼SE¼.
T. 152 N., R. 101 W.,
Sec. 12, NW¼SE¼;
Sec. 14, SW¼SW¼, SE¼SE¼;
Sec. 22, SE¼NW¼.
T. 152 N., R. 103 W.,
Sec. 24, SE¼SW¼.
T. 129 N., R. 106 W.,
Sec. 18, lots 2, 3, NE¼SW¼;
Sec. 19, lot 4;
Sec. 30, lot 1.
T. 129 N., R. 107 W.,
Sec. 12, SW¼SW¼;
Sec. 13, NW½NE¼, N½NW¼, NE¼SE¼;
Sec. 24, E½SE¼, SW¼SE¼;
Sec. 34, lot 4.

Aggregating 923.99 acres.

2. In exchange for the above selected land, the United States acquired the surface estate of the following described land in Bowman County, North Dakota:

Fifth Principal Meridian, North Dakota

T. 131 N., R. 106 W.,
Sec. 23, lots 2, 3, W½NE¼, NE¼NW¼ NW¼, E½NW¼NW¼NW¼, SW¼NW¼NW¼NW¼, S½NW¼ NW¼, S½NW¼, SW¼, W½SE¼;
Sec. 26, W½NW¼, N½NW¼SW¼; and
Sec. 27, SE¼NE¼.

Containing 629.5 acres, more or less.

3. The values of Federal public land and the nonfederal land in the exchange were appraised at $56,500 each. No minerals were transferred by either party in the exchange.

4. At 9 a.m. on November 25, 1987, the lands described in paragraph 2 above that were conveyed to the United States will be open to the operation of the public land laws.

John A. Kwiatkowski,

Deputy State Director, Division of Lands and Renewable Resources.

September 30, 1987.

Exchange of Public Lands; Stevens County, WA

AGENCY: Bureau of Land Management, Interior.

ACTION: Exchange of Public Lands in Stevens County, Washington. The following described public lands have been determined to be suitable for disposal by exchange under section 206 of the Federal Land Policy and Management Act of 1976, 43 U.S.C. 1716:

Willamette Meridian

T. 32 N., R. 38 E.,
Sec. 9, SW¼NE¼NW¼.
T. 35 N., R. 38 E.,
Sec. 3, Lot 4;
Sec. 6, Lots 9 & 11, MS996;
Sec. 7, Lot 6;
Sec. 9, SW¼NW¼, SW¼NE¼.
T. 37 N., R. 38 E.,
Sec. 15, SW¼SE¼;
Sec. 22, E½NE¼.
T. 34 N., R. 39 E.,
Sec. 20, SW¼SW¼;
Sec. 28, SW¼SW¼.
T. 38 N., R. 41 E.,
Sec. 18, SE¼SE¼;
Sec. 19, SE¼SE¼;
Sec. 20, SE¼NE¼, SW¼SW¼;
Sec. 29, NW¼NW¼, SE¼SW¼, E½SE¼;
Sec. 30, NW¼NE¼.
T. 40 N., R. 41 E.,
Sec. 24, Lot 1, S½NE¼;

Sec. 25, Lots 2, 3 & 4.
T. 40 N., R. 42 E.,
Sec. 18, S½SE¼.

The area described above aggregates approximately 913 acres in Stevens County, Washington.

In exchange for all or part of these lands, the Federal Government will acquire all or part of the following described private lands from Arden Tree Farms, Inc.:

Williamette Meridian

T. 29 N., R. 37 E.,
Sec. 1, Lots 3, 4, & 5.
T. 31 N., R. 38 E.,
Sec. 24, Lots 4 & 5, NW¼NE¼SE¼;
Sec. 25, Lots 1 & 2, W½NE¼.
T. 31 N., R. 39 E.,
Sec. 2, Portions of S½SE¼NE¼, N½SE¼;
Sec. 3, S½SW¼;
Sec. 4, Lots 1, 2, 3, 4, S½N½, E½SE¼;
Sec. 8, SE¼NE¼SE¼, SE¼SE¼;
Sec. 9, W½SW¼NW¼, W½SW¼;
Sec. 11, S½NE¼;
Sec. 17, MS735;
Sec. 19, W½ of Lot 4;
Sec. 29, SW¼.
T. 39 N., R. 40 E.,
Sec. 20, SE¼NW¼.

The area described above aggregates approximately 1,375 acres in Stevens County, Washington.

The purpose of the land exchange is to facilitate resource management opportunities in selected management areas as identified in the Spokane District's Resource Management Plan. The private lands being offered have very important values for recreation, wildlife habitat, riparian and forest management. The public interest will be highly served by making this exchange.

The value of the lands to be exchanged is approximately equal, and the acreage will be adjusted to equalize the values upon completion of the final appraisal of the lands.

The exchange will be subject to:

1. The reservation to the United States of a right-of-way for ditches or canals constructed by the authority of the United States, Act of August 30, 1890 (43 U.S.C. 945).

2. All other valid existing rights, including, but not limited to any right-of-way, easement, or lease of record.

The publication of this notice in the **Federal Register** will segregate the public lands described above to the extent that they will not be subject to appropriation under the public land laws, including the mining laws. As provided by the regulations of 43 CFR 2201.1(b), any subsequently tendered application shall not be accepted, shall not be considered as filed, and shall be returned to the applicant.

Detailed information concerning the exchange, including the environmental analysis is available for review at the Spokane District Office, East 4217 Main Avenue, Spokane, Washington 99202.

For a period of 45 days, from the date of publication of this notice in the **Federal Register**, interested parties may submit comments to the Spokane District Manager at the above address. Any adverse commments will be evaluated by the District Manager who may vacate or modify this realty action and issue a final determination. In the absence of any action by the District Manager, this realty action will become a final determination of the Department of the Interior. Interested parties should continue to check with the District Office to keep themselves advised of changes.

Date of Issue: October 1, 1987.

Joseph K. Buesing,

District Manager.

BILLING CODE 4310-33-M

[AZ-942-08-4520-12]

Arizona; Filing of Plats of Survey

October 1, 1987.

1. The plats of survey of the following described lands were officially filed in the Arizona State Office, Phoenix, Arizona, on the dates indicated:

A plat representing a dependent resurvey of a portion of the subdivisional lines and a portion of Homestead Entry Survey No. 86, and a survey of the subdivision and a metes-and-bounds survey of lots 8, 9 and 10, in section 11, Township 21 North, Range 7 East, Gila and Salt River Meridian, Arizona, was accepted August 24, 1987, and was officially filed August 31, 1987.

This plat was prepared at the request of the U.S. Forest Service, Coconino National Forest.

A plat representing a dependent resurvey of a portion of subdivisions in section 33, and a survey of lot 20, section 33, Township 11 North, Range 10 East, Gila and Salt River Meridian, Arizona, was accepted September 16, 1987, and was officially filed September 18, 1987.

This plat was prepared at the request of the U.S. Forest Service, Region Three.

A plat (in two sheets) representing a dependent resurvey of the north boundary and of a portion of the south, east, and west boundaries, and the subdivisional lines, and the survey of subdivisions of sections 2 and 5 in Township 19 North, Range 25 East, Gila and Salt River Meridian, Arizona, was accepted September 21, 1987, and was officially filed September 23, 1987.

A plat representing a dependent resurvey of the south boundary and a portion of the west boundary of Township 20 North, Range 26 East, Gila and Salt River Meridian, Arizona, was accepted September 21, 1987, and was officially filed September 23, 1987.

These plats were prepared at the request of the Navajo and Hopi Indian Relocation Commission.

A supplemental plat showing amended lottings created by the segregation of Mineral Survey No. 3210 in section 17, Township 12 North, Range 1 West, Gila and Salt River Meridian, Arizona, was accepted September 16, 1987, and was officially filed September 18, 1987.

This plat was prepared at the request of the Bureau of Land Management, Arizona State Office.

A supplemental plat showing amended lottings created by the segregation of Mineral Survey No. 2744 in section 24, Township 5 North, Range 13 West, Gila and Salt River Meridian, Arizona, was accepted July 1, 1987, and was officially filed July 2, 1987.

This plat was prepared at the request of the Bureau of Land Management, Phoenix District Office.

A supplemental plat showing amended lottings in section 2, Township 3 North, Range 15 West, Gila and Salt River Meridian, Arizona, was accepted August 21, 1987, and was officially filed August 25, 1987.

This plat was prepared at the request of the Bureau of Land Management, Yuma District Office.

2. These plats will immediately become the basic records for describing the land for all authorized purposes. These plats have been placed in the open files and are available to the public for information only.

3. All inquiries relating to these lands should be sent to the Arizona State Office, Bureau of Land Management, P.O. Box 16563, Phoenix, Arizona 85011.

James P. Kelley,

Chief, Branch of Cadastral Survey.

Oregon; Prineville District Advisory Council Meeting

September 29, 1987.

AGENCY: Bureau of Land Management, Interior.

ACTION: Notice is hereby given that a meeting of the Prineville District Advisory Council will be held on November 12, 1987. The meeting will

begin at 10:00 AM in the conference room of the Bureau of Land Management Office located at 185 East Fourth Street, Prineville, Oregon 97754. The agenda will include the following items: (1) Discussion of the Draft Brothers/LaPine Resource Management Plan; (2) the decisions and implementation of the Oregon/Washington BLM Organization Study; (3) the progress on the Prineville District land exchange program; (4) progress on the development of the John Day River Management Plan.

The meeting is open to the public. Anyone wishing to attend and/or make written or oral comments to the Board is requested to contact the District Manager at the above address prior to November 9, 1987.

Summary minutes of the meeting will be available for review and reproduction within 30 days following the meeting.

Dated: September 29, 1987.

James L. Hancock,

District Manager, Prineville District Office.

BILLING CODE 4310-33-M

[U-34712]

Proposed Reinstatement of Terminated Oil and Gas Lease; Utah

In accordance with Title IV of the Federal Oil and Gas Royalty Management Act (Pub. L. 97-451), a petition for reinstatement of oil and gas lease U-34712 for lands in Uintah County, Utah, was timely filed and required rentals and royalties accruing from December 1, 1986, the date of termination, have been paid.

The lessee has agreed to new lease terms for rentals and royalties at rates of $7 per acre and 16-⅔ percent, respectively. The $500 administrative fee has been paid and the lessee has reimbursed the Bureau of Land Management for the cost of publishing this notice.

Having met all the requirements for reinstatement of lease U-34712 as set out in section 31 (d) and (e) of the Mineral Leasing Act of 1920 (30 U.S.C. 188), the Bureau of Land Management is proposing to reinstate the lease, effective December 1, 1986, subject to the original terms and conditions of the lease and the increased rental and royalty rates cited above.

Orval L. Hadley,

Chief, Branch of Lands and Minerals Operations.

BILLING CODE 4310-DQ-M

[CO-940-07-4220-11; C-027679]

Proposed Continuation of Withdrawal; Colorado

September 29, 1987.

AGENCY: Bureau of Land Management, Interior.

ACTION: Notice.

SUMMARY: The Forest Service, U.S. Department of Agriculture, proposes that the order which withdrew lands for an indefinite period of time for various campground sites, be modified and the withdrawal be continued for 20 years insofar as it affects 10 acres of National Forest System land. The land will remain closed to surface entry and mining, but not to mineral leasing.

DATE: Comments should be received by January 6, 1988.

ADDRESS: Comments should be addressed to State Director, Colorado State Office, 2850 Youngfield Street, Lakewood, Colorado 80215.

FOR FURTHER INFORMATION CONTACT: Doris E. Chelius, BLM Colorado State Office, (303) 236-1768.

The Forest Service, U.S. Department of Agriculture, proposes that the existing withdrawal made by Public Land Order No. 2282, as amended, for an indefinite period of time, be modified to expire in 20 years pursuant to section 204 of the Federal Land Policy and Management Act of 1976, 90 Stat. 2751, 43 U.S.C. 1714, insofar as it affects the following described lands:

New Mexico Principal Meridian

Rio Grande National Forest

T. 44 N., R. 6 E.,
Sec. 18, SE¼NE¼NE¼.

The area described aggregates 10 acres in Saguache County.

The purpose of this withdrawal is for the administration and protection of the Big Springs Campground. No change is proposed in the purpose or segregative effect of the withdrawal. The land will continue to be withdrawn from surface entry and mining, but not from mineral leasing.

For a period of 90 days from the date of publication of this notice, all persons who wish to submit comments in connection with this proposed action may present their views in writing to this office.

The authorized officer of the Bureau of Land Management will undertake such investigations as are necessary to determine the existing and potential demand for the land and its resources. A report will be prepared for consideration by the Secretary of the Interior, the President, and Congress, who will determine whether or not the withdrawal will be modified and continued and, if so, for how long. Notice of the final determination will be published in the **Federal Register.** The existing withdrawal will continue until such determination is made.

James D. Crisp,

Chief, Branch of Lands and Minerals Operations.

BILLING CODE 4310-JB-M

Minerals Management Service

Environmental Documents Prepared for Proposed Oil and Gas Operations on the Alaska Outer Continental Shelf

AGENCY: Minerals Management Service (MMS), Interior.

ACTION: Notice of the availability of environmental documents prepared for Outer Continental Shelf (OCS) minerals exploration proposals on the Alaska OCS.

SUMMARY: The MMS, in accordance with Federal regulations (40 CFR 1501.4 and 1506.6) that implement the National Environmental Policy Act (NEPA), announces the availability of NEPA-related Environmental Assessments (EA's) and Findings of No Significant Impact (FONSI's) prepared by the MMS for the following oil and gas exploration activities proposed on the Alaska OCS. This listing inclues all proposals for which FONSI's were prepared by the Alaska OCS in the 3-month period preceding this Notice.

Proposal

Standard Alaska Production Company (Standard Alaska) has submitted a plan for permanent abandonment of the artificial gravel structure "Mukluk Island." Mukluk Island is located at the common corner of the below-named leases. Standard Alaska proposes the removal of all materials making up this island and facilities associated with the drilling and support of drilling operations with the exception of some slope-protection materials to depth of 15 feet below sea level and for materials not presently covered by gravel to 25 feet below sea level. Standard Alaska proposes to monitor the island for 5 years after abandonment through photo documentation.

Location

Lease	Block(s)
OCS-Y:	
0334	280

Lease	Block(s)
0335	281
0343	324
0344	325

Environmental Assessment

EA No. AK 87–04

FONSI Date

July 2, 1987.

Proposal

Tenneco Oil Company (designated as the operator by the leassee, ARCO Alaska, Inc.) proposes to drill up to two wells to explore two leases in the eastern Alaska Beaufort Sea Sale 87 area. The FONSI and associated EA evaluate the potential environmental effects of activities associated with drilling the initial well. These activities include moving the drilling unit to the initial well site during the 1987 open-water season, drilling the initial well between November 1, 1987, and June 2, 1988, and removing the drilling unit from the initial well during the 1988 open-water period.

Location

Lease	Block(s)
OCS–Y:	
0943	560
0950	935/936

Environmental Assessment

EA No. AK 87–05

FONSI Date

August 18, 1987.

FOR FURTHER INFORMATION CONTACT: Persons interested in reviewing environmental documents for the proposals listed above or obtaining information about EA's and FONSI's prepared for activities on the Alaska OCS are encouraged to contact the MMS office in the Alaska OCS Region.

The FONSI and assoicated EA are available for public inspection between the hours of 7:45 a.m. and 4:30 p.m., Monday through Friday at: Minerals Management Service, Alaska OCS Region, Library, 949 East 36th Avenue, Room 502, Anchorage, Alaska 99508, phone: (907) 261–4435.

SUPPLEMENTAL INFORMATION: The MMS prepares EA's and FONSI's for proposals which relate to exploration for oil and gas resources on the Alaska OCS. The EA's examine the potential environmental effects of activities described in the proposals and present MMS conclusions regarding the significance of those effects. The EA is used as a basis for determining whether or not approval of the proposals constitutes major Federal Actions that significantly affect the quality of the human environment in the sense of NEPA 102(2)(C). A FONSI is prepared in those instances where MMS finds that approval will not result in significant effects on the quality of the human environment. The FONSI briefly presents the basis for that finding and includes a summary or copy of the EA.

This Notice constitutes the public Notice of Availability of environmental documents required under the NEPA regulations.

Dated: September 29, 1987.

Irven F. Palmer, Jr.,

Acting Regional Director, Alaska OCS Region.

BILLING CODE 4310–MR–M

Development Operations Coordination Document; Raintree Resources, Inc.

AGENCY: Minerals Management Service.

ACTION: Notice of the receipt of a proposed Development Operations Coordination Document (DOCD).

SUMMARY: Notice is hereby given that Raintree Resources, Inc. has submitted a DOCD describing the activities it proposes to conduct on Lease OCS–G 4769, Block 425, West Cameron Area, offshore Louisiana. Proposed plans for the above area provide for the development and production of hydrocarbons with support activities to be conducted from an onshore base located at Cameron, Louisiana.

DATES: The subject DOCD was deemed submitted on October 1, 1987. Comments must be received by October 23, 1987, or 15 days after the Coastal Management Section receives a copy of the plan from the Minerals Management Service.

ADDRESSES: A copy of the subject DOCD is available for public review at the Public Information Office, Gulf of Mexico OCS Region, Minerals Management Service, 1201 Elmwood Park Boulevard, Room 114, New Orleans, Louisiana (Office Hours: 8 a.m. to 4:30 p.m., Monday through Friday). A Copy of the DOCD and the accompanying Consistency Certification are also available for public review at the Coastal Management Section Office located on th 10th Floor of the State Lands and Natural Resources Building, 625 North 4th Street, Baton Rouge, Louisiana (Office Hours: 8 a.m. to 4:30 p.m., Monday through Friday). The public may submit comments to the Coastal Management Section, Attention OCS Plans, Post Office Box 44487, Baton Rouge, Louisiana 70805.

FOR FURTHER INFORMATION CONTACT: Ms. Angie D. Gobert; Minerals Management Service, Gulf of Mexico OCS Region, Field Operations, Plans, Platform and Pipeline Section, Exploration/Development Plans Unit; Telephone (504) 736–2867.

SUPPLEMENTARY INFORMATION: The purpose of this Notice is to inform the public, pursuant to section 25 of the OCS Lands Act Amendments of 1978, that the Minerals Management Service is considering approval of the DOCD and that it is available for public review. Additionally, this Notice is to inform the public, pursuant to § 930.61 of Title 15 of the CFR, that the Coastal Management Section/Louisiana Department of Natural Resources is reviewing the DOCD for consistency with the Louisiana Coastal Resources Program. .

Revised rules governing practices and procedures under which the Minerals management Service makes information contained in DOCDs available to affected States, executives of affected local governments, and other interested parties became effective December 13, 1979 (44 FR 53685).

Those practices and procedures are set out in revised § 250.34 of Title 30 of the CFR.

Dated: October 2, 1987.

J. Rogers Pearcy,

Regional Director, Gulf of Mexico OCS Region.

INTERNATIONAL DEVELOPMENT COOPERATION AGENCY

Overseas Private Investment Corporation

Board of Directors; Public Hearing

AGENCY: Overseals Private Investment Corporation.

ACTION: Notice of public hearing.

SUMMARY: This notice sets forth the schedule and requirements for participation in an annual public hearing to be conducted by the Board of Directors of Overseas Private Investment Corporation (OPIC) on November 16, 1987. The hearing is required by the OPIC Amendments Act of 1985, and this notice is being published to facilitate public participation. The notice also describes OPIC and the subject matter of the hearing.

DATE: The hearing will be held on November 16, 1987 and will begin promptly at 1:00 p.m. Prospective participants must submit to OPIC on or before October 30, 1987 notice of their intent to participate.

ADDRESS: The location of the hearing will be: Interstate Commerce Commission, Hearing Room A, 12th Street and Constitution Avenue, NW., Washington, DC

Notices and prepared statements should be sent to: James R. Offutt, Office of General Counsel, Overseas Private Investment Corporation, Washington, DC 20527.

Procedure

(a) Attendance; Participation

The hearing will be open to the public. However, a person wishing to present his or her views at the hearing must provide OPIC with advance notice on or before October 30, 1987. The notice must include the name, address, and telephone number of the person who will make the presentation, the name and address of the organization which the person represents (if any) and a concise summary of the subject matter of the presentation.

(b) Prepared Statements

Any participant wishing to submit a prepared statement for the record must submit it to OPIC with the notice or, in any event, not later than 5:00 p.m. on November 6, 1987. Prepared statements must be typewritten, double spaced and may not exceed thirty (30) pages.

(c) Duration of Presentations

Oral presentations will in no event exceed twenty (20) minutes, and the time for individual presentations may be reduced proportionately, if necessary, to afford all prospective participants on a particular subject an opportunity to be heard or to permit all subjects to be covered.

(d) Agenda

Upon receipt of the required notices, OPIC will draw up an agenda for the hearing setting forth the subject or subjects on which each participant will speak and the time allotted for each presentation. OPIC will provide each prospective participant with a copy of the agenda.

(e) Publication of Proceedings

A verbatim transcript of the hearing will be compiled and a record of the hearing will be published. The record of the hearing will be available to members of the public at the cost of reproduction.

SUPPLEMENTARY INFORMATION: OPIC is a U.S. Government agency which provides, on a commercial basis, political risk insurance and financing in friendly developing countries for projects which confer positive developmental benefits upon the project country while avoiding negative effects on the U.S. economy. OPIC's Board of Directors is required by 22 U.S.C. 2191A(b) to hold at least one public hearing each year.

FOR FURTHER INFORMATION CONTACT: James R. Offutt, Office of General Counsel, Overseas Private Investment Corporation, 1615 M Street, NW., Washington, DC 20527 (202/457–7038).

Peggy A. Kole,

Corporate Secretary.

INTERSTATE COMMERCE COMMISSION

[Finance Docket No. 31112]

Joint Application; Canadian Pacific Ltd. & Incan Ships Ltd.

AGENCY: Interstate Commerce Commission.

ACTION: Institution of proceeding.

SUMMARY: Canadian Pacific Ltd. (CPL) and Incan Ships Ltd. (Incan Ships) filed a joint application for this Commission to determine if CPL's proposed purchase of a controlling stock interest in Incan Ships, and thus its wholly-owned subsidiary, Incan Superior, Ltd. (Incan Superior), would violate provisions of 49 U.S.C. 11321.

DATES: An original and 10 copies of comments must be filed by October 28, 1987. An original and 10 copies of applicants' replies to the comments must be filed by November 17, 1987. Comments and replies referring to Finance Docket No. 31112 must be sent to: Office of the Secretary, Case Control Branch, Interstate Commerce Commission, Washington, DC 20423.

A copy of comments must be served on applicants' representative: G. Paul Moates, Sidley & Austin, 1722 Eye Street NW., Washington DC 20006.

Applicants must serve their reply on all parties who file comments.

The application may be inspected at the Commission's office in Washington, DC. Copies are also available from applicants' counsel, G. Paul Moates, at the above address.

VOL 52 ISS 195 OC 8 1987 UMI

FOR FURTHER INFORMATION CONTACT: Joseph H. Dettmar, (202) 275–7246. [TTD for hearing impaired: (202) 275–1721].

SUPPLEMENTARY INFORMATION: CPL has owned a 38 percent share of Incan Ships since the latter's establishment in 1973. The remaining shares are owned by Inchcape Canada Ltd. (54.4 percent) and Halidon Holdings, Ltd. (7.5 percent). Both have agreed to sell their holdings to CPL. CPL would then own 100 percent of Incan Ships and Incan Ships' wholly-owned subsidiary, Incan Superior. CPL currently controls, *inter alia*, CP Rail and Soo Line Corporation (which in turn controls Soo Line Railroad).

Incan Superior owns one vessel and provides the only seasonal railcar ferry service on Lake Superior between Thunder Bay, Ontario and Superior, Wisconsin. Great Lakes Forest Products, Ltd. (GLFP), which is controlled by CPL, provides over 87 percent of Incan Superior's traffic.

Applicants contend that the section 11321(a) prohibition against common ownership of a railroad and a water common carrier or vessel carrying property or passengers with which it does or may compete may not apply to the subject transaction because there is no effective competition between CP Rail and the vessel operated by Incan Superior. They admit, however, that CP Rail's limited participation in traffic moving from Thunder Bay to destinations in the Midwest may be sufficient to support a finding of competition betwen CP Rail and Incan Superior. In any case, the applicants maintain that the proposed transaction is authorized under section 11321(b) as there will not be a reduction in competition on the water route. Applicants state that the rail and water operations are complementary rather than competitive, and that CPL intends to improve Incan Superior's efficiency and cost competitiveness through joint marketing programs and coordinated operations to improve vessel use.

The proposed transaction initially appears to have no significant effects on the human environment or energy conservation, but comments on these aspects are invited.

Decided: October 2, 1987.

By the Commission, Jane F. Mackall, Director, Office of Proceedings.

Noreta R. McGee,

Secretary.

BILLING CODE 7035–01–M

DEPARTMENT OF JUSTICE

[Civil Action No. 87–1430–CIV–T–10C]

Lodging of Consent Decree Pursuant to Clean Water Act: General Development Utilities, Inc.

In accordance with Departmental policy, 28 CFR 50.7, notice is hereby given that on September 23, 1987, a proposed consent decree in *United States v. General Development Utilities, Inc.*, Civil Action No. 87–1430–CIV–T–10C, was lodged with the United States District Court for the Middle District of Florida. The Complaint filed by the United States alleged violations of the Clean Water Act for failure to obtain a National Pollutant Discharge Elimination System permit for discharges from the defendant's North Port, Florida and Silver Springs Shores, Florida wastewater treatment plants. The complaint sought injunctive relief to require the defendant to comply with the Clean Water Act and civil penalties for past violations. The decree requires defendants to achieve compliance with the Clean Water Act by ceasing all discharges by no later than April 30, 1988. In addition, defendant must comply with interim discharge requirements and effluent limitations and must perform monitoring and reporting activities. Defendant must also pay a civil penalty for past violations of $487,000.00.

The Department of Justice will receive, for a period of thirty (30) days from the date of this publication, comments relating to the proposed consent decree. Comments should be addressed to the Assistant Attorney General of the Land and Natural Resources Division, Department of Justice, Washington, DC 20530, and should refer to *United States v. General Development Utilities, Inc.*, D.J. Ref. 90–5–1–1–2887.

The proposed consent decree may be examined at the office of the United States Attorney, Middle District of Florida, Robert Timberlake Building, 500 Zack Street, Tampa, Florida, and at the Region IV office of the Environmental Protection Agency, 345 Courtland Street, NE., Atlanta, Georgia 30365. Copies of the proposed consent decree may be examined at the Environmental Enforcement Section, Land and Natural Resources Division, Department of Justice, Room 1517, Ninth Street and Pennsylvania Avenue, NW., Washington, DC. A copy of the proposed consent decree may be obtained in person from the above address or by mail from the Environmental Enforcement Section, Land and Natural Resources Division, Department of Justice. P.O. Box 7611, Washington, DC. 20044. When requesting a copy, please refer to *United States v. General Development Utilities, Inc.*, D.J. Ref. 90–5–1–1–2887, and enclose a check in the amount of $1.70 (10 cents per page reproduction cost) payable to the Treasurer of the United States.

Roger J. Marzulla,

Acting Assistant Attorney General, Land and Natural Resources Division.

[FR Doc. 87–23307 Filed 10–7–87; 8:45am]

BILLING CODE 4410–01–M

[Civil Action No. B–86–88 TFGD)]

Lodging of Consent Decree Pursuant to Clean Air Act; Raymark Industries, Inc., et al.

In accordance with Departmental policy, 28 CFR 50.7, notice is hereby given that on *September 24, 1987*, a proposed Consent Decree in *United States v. Raymark Industries, Inc., et al.*, Civil Action No. B–86–88 (TFGD), was lodged with the United States District Court for the District of Connecticut. The proposed Consent Decree concerns the alleged discharge of asbestos, a hazardous air pollutant, from that portion of the manufacturing facility located at 75 East Main Street, Stratford, Connecticut, that is presently operated by Brake Systems, Inc. The proposed Consent Decree requires Brake Systems, Inc. to implement a comprehensive compliance plan and pay a civil penalty for an alleged past violation of the Clean Air Act.

The Department of Justice will receive for a period of thirty (30) days from the date of this publication comments relating to the proposed Consent Decree. Comments should be addressed to the Assistant Attorney General of the Land and Natural Resources Division, Department of Justice, Washington, DC 20530, and should refer to *United States v. Raymark Industries, Inc.*, D.J. Ref. 90–5–2–1–865.

The proposed Consent Decree may be examined at the offices of the United States Attorney, United States Court House, 141 Church Street, New Haven, Connecticut 06510; the Environmental Protection Agency, Region I, JFK Federal Building, Boston, Massachusetts 02203; and the Environmental Enforcement Section, Land and Natural Resources Division, United States Department of Justice, Room 1517, Ninth Street and Pennsylvania Avenue, NW., Washington, DC 20530. A copy of the proposed Consent Decree may be obtained in person or by mail from the Environmental Enforcement Section,

Land and Natural Resources Division of the United States Department of Justice at the above address. In requesting a copy, please enclose a check in the amount of $4.10 payable to the Treasurer of the United States, to cover the cost of reproduction.

Roger J. Marzulla,

Acting Assistant Attorney General, Land and Natural Resources Division.

[AAG/A Order No. 5-87]

Privacy Act of 1974; Removal of a System of Records

Pursuant to the provisions of the Privacy Act of 1974 (5 U.S.C. 552a), the Justice Management Division, Department of Justice is eliminating a system of records entitled "Executive Biography, JUSTICE/JMD-012." The Division is eliminating the system because it has found that it is not a useful management tool. The index has been destroyed in accordance with General Records Schedule 23, item 7.b., as approved by the Archivist of the United States. Accordingly, the system, as published in the **Federal Register** on January 10, 1980, (45 FR 2229), is removed from the Department's compilation of Privacy Act systems.

Dated: September 16, 1987.

Harry H. Flickinger,

Assistant Attorney General for Administration.

DEPARTMENT OF LABOR

Employment and Training Administration

Investigations Regarding Certifications of Eligibility To Apply for Worker Adjustment Assistance; Babcock and Wilcox Co. et al.

Petitions have been filed with the Secretary of Labor under section 221(a) of the Trade Act of 1974 ("the Act") and are identified in the Appendix to this notice. Upon receipt of these petitions, the Director of the Office of Trade Adjustment Assistance, Employment and Training Administration, has instituted investigations pursuant to section 221(a) of the Act.

The purpose of each of the investigations is to determine whether the workers are eligible to apply for adjustment assistance under title II, Chapter 2, of the Act. The investigations will further relate, as appropriate, to the determination of the date on which total or partial separations began or threatened to begin and the subdivision of the firm involved.

The petitioners or any other persons showing a substantial interest in the subject matter of the investigations may request a public hearing, provided such request is filed in writing with the Director, Office of Trade Adjustment Assistance, at the address shown below, not later than October 19, 1987.

Interested persons are invited to submit written comments regarding the subject matter of the investigations to the Director, Office of Trade Adjustment Assistance, at the address shown below, not later than October 19, 1987.

The petitions filed in this case are available for inspection at the Office of the Director, Office of Trade Adjustment Assistance, Employment and Training Administration, U.S. Department of Labor, 601 D Street NW., Washington, DC 20213.

Signed at Washington, DC, this 28th day of September 1987.

Glenn M. Zech,

Acting Director, Office of Trade Adjustment Assistance.

BILLING CODE 4510-30-M

[TA-W-19,764]

Negative Determination Regarding Application for Reconsideration; Inexco Oil Co., Houston, TX

By an application dated August 20, 1987, one of the petitioners requested administrative reconsideration of the Department's negative determination on the subject petition for trade adjustment assistance for workers at Inexco Oil Company, Houston, Texas. The denial notice was signed on July 27, 1987 and published in the **Federal Register** on August 25, 1987 (52 FR 32071).

Pursuant to CFR 90.18(c) reconsideration may be granted under the following circumstances:

(1) If it appears on the basis of facts not previously considered that the determination complained of was erroneous;

(2) If it appears that the determination complained of was based on a mistake in the determination of facts not previously considered; or

(3) If, in the opinion of the Certifying Officer, a misinterpretation of facts or of the law justified reconsideration of the decision.

The initial petition was filed on behalf of corporate staff workers of Inexco Oil Company and its wholly owned subsidiary Wilson Brothers Drilling Company, Seminole, Texas. Inexco Oil was sold to the Louisiana Land and Exploration Company (LLE) in July, 1986.

The petitioner claims that the Department never considered Inexco's crude oil sales and production. The petitioner subsequently provided the names of four major oil companies who purchased crude oil from Inexco in 1986. Further, the petitioner claims that to deny adjustment assistance benefits because the workers were not separately identifiable by product is inconsistent with the data collection of other Federal government agencies, such as the Bureau of Labor Statistics which groups production, clerical and white collar employees together in its industry employment data for the petroleum industry.

First, the corporate staff at Inexco Oil performed a service and do not produce an article as required in the Trade Act of 1974. Therefore, the corporate staff cannot be certified for adjustment assistance unless other workers of the firm producing articles are independently certified for adjustment assistance and reduced demand for their services can be substantiated. Workers who produced natural gas at Inexco did not meet the increased import criterion of the Group Eligibility Requirements. U.S. imports of dry natural gas declined absolutely and relative to domestic shipments in 1986 compared with 1985, which is the period applicable to the petition. The ratio of imports of natural gas to domestic shipments in 1986 was four percent. Workers producing crude oil at Inexco were not denied adjustment assistance because they were not separately identifiable by product. All workers at Inexco Oil were denied adjustment assistance because the "contributed importantly" test was not met. The Department's findings show the "dominant cause" of worker separations at Inexco to be the sale of Inexco to LLE which resulted in workers separations to reduce duplicate activities especially at the corporate level. Inexco's 1985 Annual Report states that Inexco was actively seeking to sell its assets or the company. Worker separations caused by the sale of the company and a subsequent severance program would not form a basis for certification.

Further, workers of the Wilson Brothers Drilling Company, performed oil and gas drilling services. The workers were denied certification to apply for adjustment assistance on September 25, 1986, under an earlier petition (TA-W-17,610). The denial notice was published in the **Federal Register** on October 10, 1986 (51 FR 36186). The Department has consistently determined that the performance of services does not constitute the production of an article, as required by section 222 of the Trade Act of 1974 and this determination has been upheld in the U.S. Court of Appeals.

Investigation findings show that although Inexco was primarily a gas producer a substantial amount of its revenues came from crude oil. The findings also show that Inexco Oil sold all the crude oil it could produce. A review of Inexco's crude oil properties, which constitute the major share of its crude oil revenues, show that there was a slight decline, in barrels, of crude oil production, in the first half of 1986 compared to the same period in 1985. However, this is attributed to a natural decline resulting from the gradual exhaustion of crude oil in the various fields. Officials of several of major crude oil customers reported that their firms purchase all the domestic crude oil available and meet their shortfall with imported oil. Other customers, whose names were furnished by the petitioner, showed increased purchases of crude oil from Inexco in the first half of 1986 compared to the same period in 1985 as a result of new wells and fields in other geographic areas coming into operation.

The petitioner also claims that the Department did not investigate the relationship between the proven reserves of hydrocarbon producers and how they interact with lending institutions. The consideration of such relationships is not a matter for investigation because it is not a criterion for certification under the Trade Act. This relationship would not satisfy any of the group eligibility criteria for certification in section 222 of the Act.

Conclusion

After review of this application and investigative findings, I conclude that there has been no error or misinterpretation of the law or of the facts which would justify reconsideration of the Department of Labor's prior decision. Accordingly, the application is denied.

Signed at Washington, DC, this 29th Day of September, 1987.

Stephen A. Wandner,

Deputy Director, Office of Legislative and Actuarial Services, UIS.

Bureau of Labor Statistics

Request for Comments on Changes in Local Area Unemployment Statistics (LAUS) Procedures

AGENCY: Bureau of Labor Statistics, Labor.

ACTION: Request for comments on proposed changes in local area unemployment statistics methodology.

SUMMARY: Following a year of optional use and numerous comments and simulations in two research areas, the Bureau of Labor Statistics intends to introduce mandatory methodological improvements in the procedures for developing local area unemployment statistics. These procedures involve the estimation of agricultural employment and Federal and Railroad unemployment. These proposals had been available as optional methodological procedures during 1987 as announced in a **Federal Register** Notice dated December 19, 1986, and published on December 29, 1986 at 51 FR 46958.

DATE: Comments must be submitted on or by November 9, 1987.

ADDRESS: Send comments to: U.S. Department of Labor, Bureau of Labor Statistics, 441 G Street NW., Room 2083, Washington, DC 20212

FOR FURTHER INFORMATION CONTACT: Sharon Brown, 202-523-1081.

Dated at Washington, DC, this 30th day of September 1987.

Janet L. Norwood,

Commissioner.

BILLING CODE 7537-01-M

Music Advisory Panel; Meeting

Pursuant to section 10(a)(2) of the Federal Advisory Committee Act (Pub. L. 92-463), as amended, notice is hereby given that a meeting of the Music Advisory Panel (Opera-Musical Theater New American Works Prescreening) to the National Council on the Arts will be held on October 27-29, 1987, from 9:00 a.m.-5:30 p.m. in room 716 of the Nancy Hanks Center, 1100 Pennsylvania Avenue, NW., Washington, DC 20506.

This meeting is for the purpose of Panel review, discussion, evaluation, and recommendation on applications for financial assistance under the National Foundation on the Arts and the Humanities Act of 1965, as amended, including discussion of information given in confidence to the Agency by grant applicants. In accordance with the determination of the Chairman published in the **Federal Register** of February 13, 1980, these sessions will be closed to the public pursuant to subsections (c)(4), (6) and (9)(B) of section 552b of Title 5, United States Code.

Further information with reference to this meeting can be obtained from Ms. Yvonne M. Sabine, Advisory Committee Management Officer, National Endowment for the Arts, Washington, DC 20506, or call (202) 682-5433.

Yvonne M. Sabine,

Acting Director, Council and Panel Operations, National Endowment for the Arts.

October 1, 1987.

BILLING CODE 7537-01-M

NATIONAL SCIENCE FOUNDATION

Permit Applications Received Under Antarctic Conservation Act of 1978

AGENCY: National Science Foundation.

ACTION: Notice of permit applications received under the Antarctic Conservation Act of 1978.

SUMMARY: The National Science Foundation (NSF) is required to publish notice of permit applications received to conduct activities regulated under the Antarctic Conservation Act of 1978 (Pub. L. 95-541). NSF has published regulations under the Antarctic Conservation Act of 1978 at Title 45 Part 670 of the Code of Federal Regulations. This is the required notice of permit applications received.

DATES: Interested parties are invited to submit written data, comments, or views with respect to this permit application by November 6, 1987. Permit applications may be inspected by interested parties at the Permit Office, address below.

ADDRESS: Comments should be addressed to Permit Office, Room 627,

Division of Polar Programs, National Science Foundation, Washington, DC 20550.

FOR FURTHER INFORMATION CONTACT: Charles E. Myers at the above address or (202) 357–7934.

SUPPLEMENTARY INFORMATION: The National Science Foundation, as directed by the Antarctic Conservation Act of 1978 (Public Law 95–541), has developed regulations that implement the "Agreed Measures for the Conservation of Antarctic Fauna and Flora" for all United States citizens. The Agreed Measures, developed in 1964 by the Antarctic Treaty Consultative Parties, recommended establishment of a permit system for various activities in Antarctica and designation of certain animals and certain geographic areas as requiring special protection. The regulations establish such a permit system to designate Specially Protected Areas and Sites of Special Scientific Interest. Additional information was published in the **Federal Register** on July 24, 1987.

The application received is as follows:

Applicant: John L. Bengtson, National Marine Mammal Laboratory, 7600 Sand Point Way, NE., Seattle, Washington 98115.

Activity for Which Permit Requested

Taking. The applicant is conducting seabird research in the vicinity of the Antarctic Penninsula and South Shetland Islands. Take by capture, marking, handling, and release is requested for up to 6150 Chinstrap penguins, 1100 Macaroni penguins, and 400 Cape Petrels. Take by sacrifice and collection of specimen material is requested for up to 3 American Sheathbills. Permission is requested to import the Sheathbill specimens into the U.S. and subsequently export them to Canada for analysis.

Location: Antarctic Peninsula Area

Dates: November 1987–October 1988.

Charles E. Myers,

Permit Office.

[FR Doc. 87-23384 Filed 10-7-87; 8:45 am]

BILLING CODE 7555-01-M

NUCLEAR REGULATORY COMMISSION

[Docket No. 50-483]

Environmental Assessment and Finding of no Significant Impact; Union Electric Co.

The U.S. Nuclear Regulatory Commission (the Commission) is considering issuance of an amendment which involves a core reload and would permit operation of the Callaway Plant, located at the licensee's site in Callaway County, Missouri, with high burnup fuel. The proposed amendment would be in response to the licensee's application for Cycle 3 operation, dated March 31, 1987.

Environmental Assessment

Identification of proposed action: The amendment would allow the licensee to use extended burnup fuel during the Cycle 3 and subsequent reloads. The highest region average burnup at the end of the cycle is expected to be 48,000 megawatt days per metric ton of uranium (MWD/MTU). The current generic assessment (including Tables S–3 and S–4) of the environmental impact of the nuclear fuel cycle contained in the Code of Federal Regulations and other NRC reports was prepared for discharge fuel burnups of 33,000 MWD/MTU.

The need for the proposed action: The proposed amendment is needed to permit the licensee to operate the plant with extended burnup fuel.

Environmental impacts of the proposed action

1.0 *Impacts On General Public*

In the Final Environmental Statement Related to the Operation of the Callaway Plant (FES) dated January 1982, the staff calculated the dose commitments to individuals and the population residing around Callaway Unit 1 to assess the impacts on people from radioactive material released as part of the normal operation of the plant. Although the concentrations of some of the radionuclides in the primary coolant may increase due to the use of the higher burnup fuel, it is expected that the quantities of radioactive effluents that were previously estimated to be released (see Tables C.1 and C.2 on pp. C–3 and C–4 of the FES) contain a sufficient amount of conservatism to offset this increase. These values were based on a reactor power level of 3565 megawatts thermal (see Tables 11.1 through 11.3 on pages 11–2 through 11–4 of the Safety Evaluation Report Related to Operation of Callaway Plant, NUREG–0830). Since the previously estimated quantities of radioactive effluents remain valid, the radiological impact analysis of the FES for members of the public remains valid. The staff concludes that doses to members of the public would remain below the dose design objectives of 10 CFR Part 50, Appendix I, and would not be significant.

In Chapter 5.9.4 of the FES, the staff evaluated the environmental impacts of two types of accidents: (1) "design basis accidents" and (2) "severe accidents." "Design basis accidents" were postulated to occur to determine whether specific safety features (e.g., containment sprays, filters for the containment and fuel handling building) of the Callaway Plant met acceptable design and performance criteria. These safety features are described more thoroughly in the Final Safety Analysis Report (FSAR) for Callaway. "Severe accidents" are accidents with more severe sequences than the design basis accidents and they lead to a severely damaged reactor core or core melt.

Estimated doses were listed in the FES (Table 5.6 on page 5–46; and Table 15.1 on page 15–12 of NUREG–0830) for six design basis accidents: (1) Rod ejection; (2) steam generator tube rupture; (3) fuel handling accident; (4) main steam line break; (5) failure of a letdown line; and (6) large break loss-of-coolant-accident (LOCA). The staff's methodology for evaluating each of these accidents is described in the Standard Review Plan, NUREG–0800, and the references therein. The doses to the thyroid and whole body are primarily due to exposure of individuals to radioiodines and noble gases, respectively. These radionuclides quickly reach an equilibrium in the core of the reactor because their halflives are much less than one year.

Of the six design basis accidents listed in Table 5–6 of the FES, the doses from the two design basis accidents whose doses could be increased by the use of higher burnup fuel were reevaluated since they involve the release of gap activity. Only the control-rod-ejection accident and the fuel-handling accident result in the release of principally the gap activity. The staff has reestimated the doses for these two accidents, and the potential doses are less than 25% of the guideline values given in 10 CFR Part 100.

It was not necessary to reevaluate the other accidents because the doses from these accidents are not primarily due to the release of gap activity. The technical specifications limit the doses for the steam generator tube rupture, the failure of a letdown line, and the main steamline break by limiting the concentrations of radioiodines in the primary system and secondary system. For the LOCA analysis, the quantity of radionuclides assumed to be released already exceeded the amount of gap activity estimated to be in the higher burnup fuel.

In regard to "severe accidents," by their very nature they involve releases greater than the gap activity. Although the higher burnup fuel would contain

higher quantities of the long-lived nuclides (e.g., Cs–134, Cs–137, Sr–90, and the transuranics), it is the staff's judgement that the Summary of Environmental Impacts and Probabilities presented in Table 5.8, page 5–54, of the FES remains valid given the uncertainties involved in such assessments.

Further, as stated in the FES (page 5–64), "the overall assessment of environmental risk of accidents, assuming protective action, shows that it is less than the risk for normal operational releases, although accidents have a potential for acute fatalities and economic costs that cannot arise from normal operations." The staff concludes that the proposed increase in burnup would not result in a significant increase in the annual risk to members of the public from reactor accidents.

2.0 Occupational Radiation Exposure

Although the doses to nuclear power plant workers varies from reactor to reactor and from year to year, it can be projected for environmental impact purposes by using previous experience. Exposure of workers was assessed in the FES (Chapter 5.9.3, pages 5–25 through 5–28), and a range of values was presented. The FES discussion is still applicable.

3.0 Uranium Fuel Cycle and Transportation

In addition to the impacts associated with the operation of the reactor, there are impacts associated with the uranium fuel cycle. The uranium fuel cycle consists of those facilities (e.g., uranium mills, fuel fabrication plants, etc.) that are necessary to support the operation of the reactor. The FES (Chapter 5.10 and Appendix G) described the impacts associated with the uranium fuel cycle. These impacts were based on 30 years of operation of a model light-water reactor for discharge fuel burnups of 33,000 MWD/MTU.

The current generic assessment of the environmental impacts of the fuel cycle are contained in Tables S–3 and S–4 of 10 CFR Part 51. Table S–3 presents the environmental impacts of the fuel cycle in terms of natural resource use and chemical and radiological effluents. Table S–4 presents the environmental impacts of the transportation of fuel to and from a reference reactor.

A study was conducted by the Atomic Industrial Forum National Environmental Studies Project, AIF/NESP–032 dated June 1985, entitled, "The Environmental Consequences of Higher Fuel Burn-up." The results of this report are expressed in terms of extended values of Tables S–3 and S–4, extended burnup source terms for Rn–222 and Tc–99, and environmental dose commitment. The study concluded that extending fuel burnup to 60,000 MWD/MTU results in environmental consequences which are either less than or virtually the same as those assumed in the current regulations. The staff considers the AIF/NESP–032 report values acceptable for use in support of higher fuel burnup rates at NRC-licensed facilities.

Data extracted from AIF/NESP–032 and 10 CFR Part 51 Table S–3 are reproduced in Table 1. The environmental impacts were prorated by the projected fuel cycle requirements at higher burnups. AIF/NESP–032 used the following reference conditions for the development of the front-end requirements: (a) 80% Capacity Factor; (b) 1000 MWe Reference Reactor; (c) 0.25 w/o Tails; (d) Uranium Recycle; (e) 18-month Refueling Cycle; (f) U–236 neutron effect; (g) 0.1% Ore Grade; and (h) 90% Milling Efficiency. These reference conditions are the same as used by the staff in Table S–3 except for the last four items which were updated to reflect current conditions or knowledge more accurately. The 18-month cycle is considered more typical than the 12-month cycle previously used. The neutron poison effect of U–236 was included to maintain the conservative nature of the requirements. The ore grade and milling efficiency were reduced from previous values of 0.2% and 100%, respectively, to reflect expected average conditions over the next 20 years. AIF/NESP–032 also utilized the updated ORIGEN 2 code to determine the isotopics of the back-end of the fuel cycle.

Table 1 shows environmental fuel cycle impacts from the AIF/NESP–032 report at fuel burnup rates of 33,000 and 60,000 MWD/MTU. Also shown are the comparable values from the S–3 Table (33,000 MWD/MTU burnup rate) in 10 CFR 51.51. The reason that the AIF and 10 CFR Part 51 values at 33,000 MWD/MTU are different is because the AIF values reflect the more accurate current conditions and knowledge for refueling cycle, U–236 neutron effect, ore grade, and milling efficiency, as discussed above. The principal influence is the change in ore grade from 0.2% to 0.1%. The differences between the NESP 33,000 MWD/MTU and NESP 60,000 MWD/MTU columns are due only to changes in fuel burnup rates and are the values that should be compared for the purposes of this assessment.

TABLE 1.—ENVIRONMENTAL FUEL CYCLE IMPACTS AT EXTENDED BURNUP

	NESP 33000 MWD/MT	NESP 60000 MWD/MT	10CFR 51 Table S–3

Total Dose (man-rem)	4	3
Public (onlookers)	1,100	1,100

VOL 52 ISS 195 OCT 8 1987 UMI

TABLE 2.—ENVIRONMENTAL IMPACTS FROM TRANSPORTATION OF RADIOACTIVE MATERIALS FOR EXTENDED BURNUP—Continued

	NESP [1] 33000 MWD/MT	NESP 60000 MWD/MT
Dose (mrem/person)..	0.003–1.3	0.003–1.3
(along route).....	600,000	600,000
Dose (mrem/person)..	0.0001–0.06	0.0001–0.06
Total Dose (man-rem).....	3	2.1
Accidents:		
Radiological Effects Common Causes.....	([2])	([2])
(years between deaths).....	126	202
(years between injury)	7	12
Property Damage per reactor year.....	$475	$296

[1] These values are the same as Table S–4 in 10 CFR 51.
[2] Small.

As can be seen from Tables 1 and 2, when different assumptions are taken into account, extending fuel burnup results in slight changes to the radiological and non-radiological environmental consequences which would not lead to significant changes to the impacts associated with the uranium fuel cycle and transportation.

Alternative to the Proposed Action: Since we have concluded that the environmental effects of the proposed action are negligible, any alternatives with equal or greater environmental impacts need not be evaluated.

The principal alternative would be to deny the amendment request. Such actions would not reduce environmental impacts.

Alternative Use of Resources: This action involved no use of resources not previously considered in the Final Environmental Statements (construction permits and operating license) for the Callaway Plant.

Agencies and Persons Consulted: The NRC staff reviewed the licensee's request that supports the proposed amendment. The NRC staff did not consult other agencies or persons. However, the NRC staff was assisted by a study conducted by the Atomic Industrial Forum National Environmental Studies Project, AIF/NESP–032 dated June 1985, entitled "The Environmental Consequences of Higher Fuel Burnup."

Finding of no Significant Impact

The Commission has determined not to prepare an environmental impact statement for the proposed amendment.

Based upon the environmental assessment, we conclude that the proposed action will not have a significant effect on the quality of the human environment.

For details with respect to this action, see the request for amendment dated March 31, 1987 and supplemented April 15, June 5, June 18, July 16, July 28, August 7, August 31, and September 9, 1987, which are available for public inspection at the Commission's Public Document Room, 1717 H Street, NW., Washington, DC, and at the Callaway County Public Library, 710 Court Street, Fulton, Missouri 65251 and the John M. Olin Library, Washington University, Skinker and Lindell Boulevards, St. Louis, Missouri 63130.

Dated at Bethesda, Maryland, this 2nd day of October 1987.

For the Nuclear Regulatory Commission.

BILLING CODE 8010–01–M

[Release No. 34–24979; SR–NASD–87–20]

Self-Regulatory Organizations; National Association of Securities Dealers, Inc.; Order Approving Proposed Rule Change

The National Association of Securities Dealers, Inc. ("NASD") submitted on April 16, 1987, copies of a proposed rule change pursuant to section 19(b) of the

Securities Exchange Act of 1934 ("Act") [1] and Rule 19b–4 [2] thereunder, proposing a Pilot Program, for a period of two years, between the NASD and the International Stock Exchange of the United Kingdom and The Republic of Ireland, Ltd., formerly the Stock Exchange, London, England ("Exchange").[3]

Notice of the proposed rule change, together with its terms of substance, was provided by the issuance of a Commission release (Securities Exchange Act Release No. 24364, April 17, 1987), and by publication in the **Federal Register** (52 FR 13891, April 27, 1987). The Commission received two comment letters on the proposed rule change [4] and a response to the first comment letter from the NASD.[5]

I. Background

The Pilot Program is the first program for the transmission of quotation information between a United States self-regulatory organization ("SRO") and an exchange not located in North America.[6] The terms of the Pilot Program are set forth in an agreement entered into between the NASD and the Exchange. Under the agreement, the Exchange furnishes the NASD with current bid and ask quotations for the securities that comprise the Financial Times/Stock Exchange ("FTSE")–100 and for non-U.K. domiciled securities disseminated through the TOPIC [7] International Service. The Exchange also provides on a real-time basis the current level of the FTSE–100 Index.[8] The display of information received from the Exchange includes symbols of the Exchange securities, the competing market makers' quotations for those securities, and a directory of Exchange market makers' symbols and telephone numbers. The NASD will display the Exchange information on authorized NASDAQ terminals.

The NASD provides the Exchange with the current bid and ask quotations of all market makers for the securities comprising the NASDAQ–100 Index,[9] the NASDAQ Financial Index,[10] and all American Depositary Receipts ("ADRs") underlying non-U.K. domiciled securities. It also provides the current level of the NASDAQ–100 Index on a real-time basis. The Exchange will display the NASDAQ information on its TOPIC authorized terminals and TOPICLINE.

The Pilot Program is an informational link only and does not have an execution capability. Currently there is no provision for orders to be automatically routed to specific market makers. Any subscriber who wishes to execute a trade based on a quote viewed via NASDAQ or TOPIC must consult a telephone list and contact a market maker in the security in order to execute a trade.

The NASD, after consultation with the Exchange, modified its original proposal to address certain concerns raised by Instinet in its comment letter on the original proposal.[11] The NASD's current rule filing reflects those changes. As modified, the Pilot Program will permit access to linkage data exclusively by NASDAQ market makers and Exchange dealers that make markets in one or more issues that are quoted in the linkage and traded in both market centers.[12]

II. Comments

The principal issue raised by Instinet is whether the costs of the program have been equitably allocated.[13] Currently, Instinet pays the NASD a vendor fee of $1,600 per month and a subscriber fee of $8.75 per terminal per month for receipt of the National Quotation Data Service ("NQDS") feed. Similarly, TOPIC subscribers in the United Kingdom are charged approximately $8,656 per year for the first terminal receiving TOPIC information, and approximately $4,160 per year for each additional terminal receiving the information.[14] The Stock Exchange Automated Quotations ("SEAQ") charge is approximately $3,084 per terminal per year.[15] Under the terms of the Pilot Program, however, market makers who receive the quote information will not be separately charged for receipt of that information. The NASD argues that such an "in-kind" exchange of quote information is consistent with its obligation to charge reasonable fees under section 15A(b)(5)

---

[1] 15 U.S.C. 78s(b) (1982).

[2] 17 CFR § 240.19b–4 (1987).

[3] The Exchange and the NASD requested a no-action position with respect to broker-dealer registration raised by the dissemination in the United States of individual market maker quotations from foreign broker-dealers. The staff granted this no-action request on a temporary basis, noting however that this position did not extend to any activities resulting in substantial U.S. contacts or involving solicitations of U.S. investors other than the transmission of quotations from the Exchange to NASDAQ and the executions of trades based on these quotations. Letter from Mary Chamberlin, Chief Counsel, Division of Market Regulation, SEC, to Frank Wilson, General Counsel, NASD, dated May 2, 1986; letter from Robert L.D. Colby, Deputy Chief Counsel, Division of Market Regulation, SEC, to Richard B. Smith, Esq., Davis, Polk & Wardwell, dated July 3, 1986. This position has been extended until December 31, 1987. Letter from Robert L.D. Colby, Chief Counsel, Division of Market Regulation, SEC, to Frank Wilson, General Counsel, NASD, dated June 9, 1987.

[4] Letters from Daniel T. Brooks, Cadwalader, Wickersham and Taft, Counsel for Institutional Networks Corporation ("Instinet"), to Jonathan G. Katz, Secretary, SEC, dated June 30, 1987 and September 25, 1987.

[5] Letter from Frank J. Wilson, Executive Vice President and General Counsel, NASD, to Jonathan G. Katz, Secretary, SEC, dated August 6, 1987.

[6] The terms of the Pilot Program were filed with the Commission as SR–NASD–86–4. The Commission approved the Pilot Program for a six-month period. *See* Securities Exchange Act Release No. 23158 (April 21 1986), 51 FR 15989 (April 29, 1986) ("original proposal"). The Pilot Program has been extended a number of times since then, most recently until September 30, 1987. *See* Securities Exchange Act Release Nos. 23729 (October 20, 1986), 51 FR 39444 (October 28, 1986); 23952 (January 5, 1987), 52 FR 887 (January 9, 1987); 24292 (April 2, 1987), 52 FR 11578 (April 9, 1987); 24544 (June 3, 1987), 52 FR 21781 (June 9, 1987); and 24862 (August 28, 1987), 52 FR 33674 (September 4, 1987).

[7] TOPIC is the acronym for Teletext of Price Information by Computer.

[8] The FTSE–100 Index consists of a capitalization weighted measure of the individual securities included in the Index.

[9] NASDAQ is the acronym for National Association of Securities Dealers Automated Quotations. The NASDAQ–100 Index represents 100 of the largest non-financial foreign and domestic companies in the NASDAQ/National Market System ("NMS"). It is a capitalization weighted measure of the value of the individual securities included in the Index.

[10] The NASDAQ Financial Index represents the 100 largest domestic financial companies in the NASDAQ/NMS.

[11] See letter from Daniel T. Brooks, Cadwalader, Wickersham and Taft, Counsel for Instinet, to John Wheeler, Secretary, SEC, dated April 16, 1986.

[12] Under the terms of the original proposal, all NASDAQ Level 2 and 3 terminals and all TOPIC terminals were eligible to receive the quotation information without any additional charge. Both NASDAQ Level 2 and 3 services include the bids and offers of individual market makers for each individual security.

[13] In addition, Instinet asserts that the Pilot Program is inconsistent with sections 11A and 15A of the Act and with the antitrust laws.

[14] These estimates assume a dollar/pound exchange rate of $1.60/pound. The actual charges in pounds are 4,160 and 2,600, respectively.

TOPIC screens are used to view the market for Exchange securities and will carry the NASDAQ information. The TOPIC service carries the mid-price for United Kingdom equity securities. To receive the competitive market maker quotes for these securities, a subscriber also must subscribe to the SEAQ Level 2 service. Exchange member firms that are market makers must use a SEAQ terminal to input and view their own quotations.

[15] The actual charge in pounds is 1,928. A TOPIC subscriber in the United States must pay $15,000 per year to receive the TOPIC service that does not include the SEAQ Level 2 feed. In order to receive SEAQ information, a TOPIC subscriber in the United States must pay an additional subscriber fee of $3,000—discounts are available for additional terminals. At present, there are only 126 TOPIC terminals in the United States. Subscribers in the United Kingdom pay subscriber fees that are considerably less than those charged to subscribers based in the United States. We understand that the difference in-cost is attributable to satellite charges that are an integral part of the transatlantic dissemination of information.

VOL 52 ISS 195 OCT 8 1987 UMI

of the Act [16] because of the impracticality of undertaking a separate cost allocation, the similarity of the information exchanged, and the pilot nature of the program. In addition, as discussed below, the NASD asserts that the Pilot Program constitutes a marketplace to marketplace exchange.

In contrast, Instinet argues that the NASD, by refusing to allocate separately the costs attributable to the Pilot Program, has impeded Instinet's ability to compete in the United States and the United Kingdom markets for the distribution of quotation information. Specifically, Instinet asserts that because neither party will charge the other party or the subscribers of either party for the exchange of quotation information, Instinet's ability to compete will be impeded because its customers will be required to pay separate subscriber charges for receipt of substantially the same information.

In addition, Instinet disagrees with the NASD's assertion that the charges being foregone are comparable. Instinet states that, based on the present fee structure, the Exchange would owe the NASD approximately $102,060 per year and the NASD would owe the Exchange approximately $24 million per year for the information each receives. Instinet argues that unless the costs allocable to the link are separately billed to subscribers receiving information pursuant to the link, it is at a competitive disadvantage both in the United States and the United Kingdom. For example, Instinet asserts that it is unable to compete with the NASD in the United States to provide Exchange data to NASDAQ subscribers because the NASD is providing the data to them at no cost.[17] Similarly, Instinet asserts that it will have difficulty competing with the Exchange for the distribution of data for NASDAQ securities in the United Kingdom,[18] because the Exchange receives the data from the NASD and disseminates it to its market makers free of charge.

In its response to Instinet's comment letter, the NASD asserts that the Pilot Program constitutes a marketplace to marketplace exchange that was undertaken to foster more efficient market operations and expanded opportunities for competitive market making. The NASD further points out that the Pilot Program is an experiment similar to those commonly undertaken by self-regulatory organizations to foster progress in the securities markets. The NASD believes that during the two-year period the benefits of the Pilot Program will become evident.

III. Discussion

The Commission generally views agreements between American and foreign securities exchanges as positive developments in the increasing internationalization of the world's securities markets. The Commission believes there are benefits to be gained from the first transatlantic linkage of major equity securities markets. A two-year Pilot Program for the exchange of quotation information is a useful preliminary step to determine the degree of interest in London for OTC securities and the degree of interest in the United States for Exchange securities. The two-year Pilot Program also will facilitate the joint exploration of the implications of a trading linkage between the NASD and the Exchange, and will provide a mechanism for the two organizations to address any problems that might arise with the information exchange and the future allocation of fees to the subscribers of the Pilot Program. The Commission believes that this is a rational way to approach any contemplated linkage.[19]

At the same time, however, the increased availability of quotation information raises the need for appropriate surveillance and investigatory procedures. Before approving the Pilot Program for the two-year period the Commission must be satisfied that adequate safeguards have been established to protect investors and to detect fraudulent or manipulative acts and practices. In this connection, the NASD and the Exchange have provided for information sharing, investigatory, and surveillance measures in the agreement memorializing the linkage.

First, the agreement provides that the NASD will have access to all regulatory information it needs for purposes of its surveillance and investigation responsibilities with respect to the securities in the Pilot Program. The NASD states that for several years the Exchange has been willing to cooperate with the NASD in the area of information disclosure, quotation halts, suspensions and resumption of trading, and the surveillance and investigation of trading in securities of mutual market concern. The agreement reached between the NASD and the Exchange also specifically confirms that the Commission and the United Kingdom regulatory authorities will have access to shared surveillance information. In this regard, although the NASD/Exchange surveillance sharing agreement is extremely general, in view of the fact that the Pilot Program is solely an information exchange, the Commission believes that the surveillance measures in the agreement, in conjunction with the Commission's own Memorandum of Understanding with the United Kingdom Department of Trade and Industry,[20] constitute adequate regulatory safeguards for the limited purposes of the Pilot Program.

Section 15A(b)(5) requires that the NASD's rules provide for the equitable allocation of fees, and section 15A(b)(9) prohibits the NASD from adopting a rule that fosters any burden on competition not necessary or appropriate in furtherance of the purposes of the Act. Furthermore, section 11A(a)(1)(C)(ii) of the Act sets forth as among the goals of the Act the furthering of fair competition between exchange markets and markets other than exchange markets.[21]

The Commission finds Instinet's assertion that the Pilot Program is anti-competitive because the costs of the program are not reasonably allocated, to

---

[16] Instinet, under a variety of different labels, (*i.e.*, Sections 11A and 15A of the Act) makes essentially one argument, *i.e.*, that because the costs of the Pilot Program are not separately allocated, Instinet finds itself at a competitive disadvantage. For purposes of this order, the Commission is considering this argument in unity.

[17] Although Instinet's calculations are based on the only information available to Instinet, they implicitly assume that a per terminal subscriber fee is the proper way to measure the cost of the Pilot Program. In a program that is temporary as well as of a start-up nature, however, there may be alternative methods of assessing the costs. For example, the parties could have agreed to use their out of pocket costs as a measure of the cost of the program. Also, the NASD and the Exchange are providing information on a limited group of securities; subscribers to NASDAQ receive the entire NASDAQ feed.

[18] Instinet asserts that the provision of the data at no cost is inconsistent with Section 15A of the Act in that it is not a reasonable allocation of costs and it establishes a burden on competition not necessary or appropriate in furtherance of the purposes of the Act.

[19] The Commission expects the NASD to report its findings on the costs and benefits of the Pilot Program within eighteen months of the date of this order. The NASD's analysis should include a monthly survey of market makers participating in the linkage in both the United States and the United Kingdom including share volume and the number of quotation inquiries in each security.

[20] Since the original approval order authorizing the temporary operation of the Pilot Program, the Commission, the Commodity Futures Trading Commission and the United Kingdom Department of Trade and Industry entered into a Memorandum of Understanding ("MOU") that is intended to enhance international enforcement of both countries' securities laws by providing assistance for investigations of violative conduct as well as market oversight. In particular, matters involving insider trading, market manipulation and misrepresentation relating to market transactions in the respective jurisdictions are subject to the MOU.

[21] *See also* section 11A(c)(1)(D).

be unpersuasive.[22] While the NASD is subject to an obligation under the Act to charge fair and reasonable fees, any NASD rule filing also must be analyzed as to its effects on the statutory goal to enhance the efficient execution of securities transactions. A quotation exchange will enhance the ability of NASD and Exchange market makers to make competitive and efficient markets and improve their ability to ensure that their customers receive best execution of their orders. In particular, such information should permit market makers in both countries to disseminate more accurate quotations that reflect the trading activity that has occurred or is occurring in the other country. Finally, the quotation exchange may increase interest in securities traded through NASDAQ and SEAQ and, as a result, increase the liquidity of both markets. In view of these additional purposes of the Act which may be served by a market maker to market maker approach (in contrast to the dissemination of quotation information to non-market makers which primarily only serves the goal of the widespread dissemination of such information), the Commission believes that, for purposes of commencing a pilot program limited to an exchange of quotations it is unnecessary, given the practical difficulties of accomplishing such an allocation in an international context, for the NASD to allocate separately the costs of such an exchange. The Commission continues to believe, however, that, as a matter of analytical clarity, it would be preferable for the NASD and the Exchange to establish a separate cost allocation for the information that they are mutually providing.[23]

In this connection, the Commission believes that the NASD has made a good faith effort to address the competitive concerns raised by Instinet. For example, the NASD and the Exchange significantly reduced the number of recipients of the information. Only marker makers that are making a market in the securities traded in the linkage will receive the information at no additional charge, *i.e.*, if a dual market is made in a security then a market maker on either side can receive the quotations. Thus, under the modified proposal only 972 TOPIC terminals will receive the information, in contrast to the 9,500 terminals that would have received the information under the original proposal. Similarly, only 1,634 NASDAQ Level 3 terminals will receive the information under the current proposal, in contrast to 2,807 NASDAQ Level 2 and 3 terminals that would have received the information under the original proposal. All other users of the information will have to pay to receive it, including any United States firms that are not making a market in any of the Exchange securities quoted in the link and any institutional investors that would be interested in obtaining quotation information on Exchange securities they may have in their portfolios. In addition, the information being exchanged as part of the Pilot Program is limited to a subset of the NASDAQ and SEAQ information. In light of the limited competitive impact, the Commission believes it is reasonable for the NASD and the Exchange to absorb their respective costs, and unnecessary for them to allocate separately to one another those costs for purposes of the two-year pilot.

The Commission recognizes, however, that Instinet also objects to these modifications by the NASD which are designed to mitigate any potential effects of the program on Instinet.[24] Specifically, Instinet argues that such a limitation raises concerns about fair allocation of costs among NASD members because implicit in such an arrangement is the fact that some NASDAQ market makers will not be receiving the London information even though other NASDAQ subscribers will receive the information without paying any additional charges. The Commission believes, however, that in conceiving a new program to establish potential new markets, it is reasonable for the NASD to allocate costs in a manner that is sensitive to the start-up nature of the program.[25]

Accordingly, the Commission finds that the NASD's proposed rule change does not foster any burden on competition not necessary or appropriate in furtherance of the purposes of the Act and that approval of the proposed rule change on a two-year pilot basis is consistent with the Act and the rules and regulations thereunder applicable to the NASD, and, in particular, the requirements of sections 11A and 15A, and the rules and regulations thereunder. We have carefully considered all of Instinet's arguments. While we recognize that the NASD/Exchange quotation exchange may have some impact on Instinet and other vendors, we conclude that because effects on vendors are as narrowly limited as is practically consistent with the start up of the Pilot Program, any such impact outweighs the benefits outlined above. Nevertheless, the Commission will monitor carefully the impact of the quotation exchange on competing vendors during the pilot period. The Commission, therefore, emphasizes that it is not reaching any final determination with respect to the issues raised by Instinet but is only determining that the allocation of costs and fees for purposes of the two-year Pilot is reasonable and, therefore, does not impose an inappropriate competitive burden on Instinet.

It is therefore ordered, pursuant to section 19(b)(2) of the Act, that the above-mentioned proposed rule change be, and hereby is, approved for a period of two years from the date of this order.

---

[22] Instinet also argues that the NASD's proposal is inconsistent with the federal antitrust laws. The Act, however, contains its own competition standard for evaluating proposed rule changes. *See United States v. NASD*, 422 U.S. 694 (1975); *Gordon v. New York Stock Exchange, Inc.*, 422 U.S. 659 (1975). Section 15A(b)(9) of the Act requires that "[t]he rules of the association do not impose any burden on competition not necessary or appropriate in furtherance of the purposes of [the Act]." As interpreted by the courts and elaborated by the legislative history of the Securities Acts Amendments of 1975, Pub. L. 94–29, 89 Stat. 97 (1975), it is clear that neither the Commission in its own rulemaking nor the exchanges are required to pursue the least anti-competitive alternative. *See* Belenke v. SEC, 606 F.2d 193, 199–200 (7th Cir. 1979); Bradford Nat'l Clearing Corp. v. SEC, 590 F.2d 1085, 1105; and Senate Committee on Banking, Housing and Urb. Affs., *Report to Accompany S. 249: Securities Acts Amendments of 1975*, ("Senate Report"), S. Rep. No. 94–75, 94th Cong., 1st Sess. 30 (1975). Rather, the Commission is required to balance competitive implications in light of the other purposes of the Act, such as the protection of investors and the maintenance of fair and orderly markets. *See* sections 11A(a)(1)(C)(ii); 11A(b)(5)(B); and 11A(c)(1) (C) and (D) of the Act.

[23] In addition, the Commission expects that, during the pilot period, the NASD will continue to examine the possibility of developing a separate allocation of costs associated with the pilot. In this regard, the Commission requests that the NASD report to the Commission the results of that analysis within 18 months of the date of this order.

[24] Instinet also expressed concern that the NASD is planning to expand the quotation link to provide for automatic execution of trades. Of course, any change in the terms or operation of the Pilot Program must be submitted to the Commission for its review pursuant to section 19(b) of the Act.

[25] The Commission previously has approved proposed rule changes in which transaction fees were waived as a competitive response to market conditions or to encourage trading in a developing product. *See, e.g.*, Securities Exchange Act Release No. 24827 (August 20, 1987), 52 FR 32380 (August 27, 1987), in which the Commission approved the Pacific Stock Exchange's request to waive transaction and order book charges for trades executed in options on Microsoft Corporation and Mentor Corporation and Securities Exchange Act Release No. 22470 (September 26, 1985), 50 FR 40640 (October 4, 1985), in which the Commission permitted the Chicago Board Options Exchange to forego charging transaction fees on foreign currency option contracts for a limited period in order to encourage trading of those contracts.

[Release No. 34–24981; File No. SR–Phlx–86–36]

Self-Regulatory Organizations; Philadelphia Stock Exchange, Inc.; Order Approving Proposed Rule Change

I. Introduction

On October 20, 1986, the Philadelphia Stock Exchange, Inc. ("Phlx") filed with the Securities and Exchange Commission ("Commission"), pursuant to Section 19(b) of the Securities Exchange Act of 1934 ("Act") [1] and Rule 19b–4 thereunder,[2] a proposal to make permanent its customer margin letter of credit ("LC") program.[3] The proposal was published for comment on November 24, 1986.[4] No comments were received. For the reasons discussed below, the Commission is approving the proposed rule change.

II. Description of the Proposed Rule Change

The proposed rule change requests that the Commission approve on a permanent basis Phlx's program relating to use of LCs to satisfy foreign currency option customer margin requirements. In brief, the proposal would amend Phlx Rule 722 to enable Phlx members to be named beneficiaries on "standby letters of credit" [5] issued for their customers' accounts by Phlx-approved banks and trust companies. Those LCs would secure customers' initial and maintenance margin requirements relating to their open short foreign currency option positions. As described in detail below, the proposal requires LCs to contain certain terms and establishes LC issuer qualification standards. It also establishes a comprehensive financial protection scheme for issuers of LCs.

Regarding LC terms, the proposal requires each LC to contain an LC issuer's unqualified commitment to pay to the Phlx member, on demand, a specified sum of money equal to, or greater than, the amount of the original margin required when the position was opened. Further, the LC commitment must be irrevocable. Moreover, the LC must not expire later than 18 months after its issuance date.[6] Finally, any LC issued by a non-U.S. institution must be issued and payable at a United States agency or branch of the issuer.

To ensure that only financially responsible institutions can issue LCs under the program, the proposal contains comprehensive issuer qualification standards. Both U.S. and non-U.S. institutions can qualify as issuers under those standards. United States issuers must: (1) Be organized under the laws of the U.S. or a state thereof and be regulated and examined by federal or state authorities having regulatory authority over banks or trust companies; and (2) have, at the time of approval and continuously thereafter, shareholders' equity of at least $200,000,000.[7] A non-U.S. issuer (organized under the laws of a country other than the U.S.) must: (1) Have a branch or agency located in the U.S.; (2) have, at the time of approval and continuously thereafter, shareholders' equity of more than $200,000,000; (3) have its principal executive office in a country (a) rated Aaa by Moody's Investors Service ("Moody's") and/or AAA by Standard & Poor's Corp. ("S&P")[8] or (b) approved by Phlx's Business Conduct Committee ("BCC") as an AAA equivalent country based on consultations with at least two entities satisfactory to the BCC as experienced in international banking and finance; and (4) have a P–1 rating from Moody's and/or an A–1 rating from S&P on its commercial paper or other short-term obligations.[9]

To enable Phlx to analyze an applicant's financial condition, the proposal requires each applicant to provide Phlx initially with its most recent annual report. If a U.S. issuer applicant's annual report is more than 90 days old, the applicant must supply Phlx with its most recent quarterly financial statement; a non-U.S. applicant must supply semi-annual financial reports.[10] The proposal also requires each applicant to inform Phlx in writing about those individuals authorized to sign LCs and the applicant's legal authority to issue LCs.

After Phlx approval, both issuers and Phlx members must comply with ongoing, special reporting requirements. All issuers must supply Phlx with annual reports as they are issued. In addition, U.S. institutions must provide Phlx with quarterly financial statements and non-U.S. institutions must provide Phlx with semi-annual financial reports. In addition, whenever a Phlx member approves a customer foreign currency options account and accepts an LC under the program, it must report to Phlx: (1) The LC issuer's name; (2) the customer's name; (3) the LC dollar amount; (4) the LC expiration date; and (5) customer suitability information including, but not limited to, net income, net worth, occupation or type of business enterprise, and experience in trading securities and/or commodities. Members also must provide Phlx with copies of any subsequent LC accepted for an approved account. In addition, Phlx members must report monthly the

---

[1] 15 U.S.C. 78s(b)(1) (1982).

[2] 17 CFR 240.19b–4 (1987).

[3] The Commission approved the LC program on a one year pilot basis in December 1983. Securities Exchange Act Release No. 20497 (December 16, 1983), 48 FR 56882. In this pilot, LCs could be used for initial margin purposes only. In June 1985, the Commission extended the pilot program and expanded it to permit the use of LCs to meet maintenance, as well as initial, margin requirements. Securities Exchange Act Release No. 22189 (June 28, 1985), 50 FR 31802.

[4] Securities Exchange Act Release No. 23821 (November 17, 1986), 51 FR 42321 ("November 1986 Notice").

[5] A "standby letter of credit" represents an obligation to the beneficiary on the part of the issuer: (1) To repay money borrowed by or advanced to or for the account of the account party; or (2) to make payment on account of any evidence of indebtedness undertaken by the account party; or (3) to make payment on account of any default by the account party in the performance of an obligation. See, e.g., 12 CFR 208.8(d) (1987).

[6] The proposal eliminates the pilot program requirement that an LC not terminate before expiration of any related options positions. A member firm accepting an LC that would terminate before the option's expiration would be required to monitor the customer's account to ensure that the customer posts adequate substitute margin, such as another LC, cash, or cash equivalents, before the LC termination date. This will ensure that adequate margin will be maintained at all times.

[7] Banks meeting this standard and approved to issue LCs under the Phlx program are Amro Bank ($2.13 billion shareholders' equity as of 12/31/86), Bank of America ($3.78 billion as of 12/31/86), Fidelity Bank ($393 million as of 6/30/87), Philadelphia National Bank ($502 million as of 6/30/87), Pittsburgh National Bank ($627 million as of 12/31/86), and Provident Bank ($329 million as of 12/31/86). *See* letter from Diana Anderson, Director of Examinations, Phlx, to David Underhill, Attorney, Division of Market Regulation, SEC, dated August 28, 1987.

[8] These ratings are based on the rating assigned to sovereign debt issued by the country's central government.

[9] If a non-U.S. institution's short-term obligations are not rated, it still can qualify if: (1) Any commercial paper or short-term obligation issued by its parent or an affiliated entity has such a rating, or (2) any commercial paper or short-term obligation issued by non-affiliated entities and supported or guaranteed by the institution has such a rating, or (3) the issuer, its parent or any affiliated entity has an Aaa rating from Moody's or an AAA rating from S&P on its long-term obligations, or (4) it has been approved by the BCC as a P–1 equivalent institution.

[10] During the pilot program, non-U.S. issuers were required to supply their most recent quarterly financial statements, as were U.S. applicants.

class and series of each LC-secured option position and the transaction date establishing the position. Finally, each member must notify Phlx promptly of: (1) The withdrawal of any LC; (2) the assignment of an exercise notice to any LC-secured option position; and (3) the liquidation of any LC-secured option position.

As noted above, the proposal contains several provisions designed to ensure the controlled use of LCs. First, the proposal includes concentration requirements that are intended to protect Phlx members against the financial risk arising from over-reliance on LCs of any one LC issuer or for any one customer. The proposal requires that the total amount of LCs issued and outstanding by any one finanacial institution for the account of any one customer not exceed 15% of the unimpaired capital and surplus of the issuing institution.[11] Moreover, the total amount of LCs issued and outstanding at any time by an institution naming any one Phlx member as beneficiary must not exceed 20% of the unimpaired capital and surplus of the issuer. Second, the proposal prohibits a member from allowing a customer to effect a transaction or to maintain a position in foreign currency options against an LC if the amount of margin required under Regulation T of the Board of Governors of the Federal Reserve System ("Federal Reserve Board" or "FRB") [12] would exceed the amount of the LC. If such a deficiency occurs the member must require the customer to deposit promptly with the member: (1) A new or modified LC in an amount equal to, or greater than, the required margin amount, or (2) other acceptable forms of margin in an amount equal to, or greater than, the margin deficiency under Regulation T. If the customer fails to provide the needed collateral, the member, under Regulation T, must liquidate open customer positions sufficient to meet the margin deficit.[13] Third, the proposal prohibits a bank or trust company from issuing an LC to cover its own foreign currency option positions.

Finally, the proposal provides flexibility to Phlx in dealing with LC issuers. Phlx can at any time refuse or revoke it approval of any financial institution as an LC issuer under the program. In addition, Phlx at any time can suspend, terminate or otherwise modify a member's ability to accept an LC, on its own initiative or at the direction of the Commission or the Board of Governors of the Federal Reserve System.

[11] This 15% requirement is equivalent to the current federal lending limitation of 15% of stockholders' equity. *See, e.g.*, 2 U.S.C. 84 (1982).

[12] 12 CFR 220.18(h) (1987).

[13] If the additional margin required is $500 or less, however, the member is not required to liquidate positions. Phlx Rule 722 (c)(8).

III. Phlx's Experience Under the Pilot Program

Phlx outlined its experience under the pilot program in its rule filing and in an April 1986 report to the Commission.[14] With respect to the scope of pilot program use, Phlx noted that seven issuers had been approved under the program, two being non-U.S. institutions. Moreover, three of the seven have been actively issuing LCs. In addition, five customers have been using LCs, and three Phlx members have been accepting LCs for margin purposes.[15] To date, seven LCs have been issued under the program. Phlx anticipates that LC use will expand to at least 30 foreign currency option customers if the program is made permanent.[16]

Phlx represented that members accepting LCs have found the LC program requirements and procedures uncomplicated. Moreover, those members report that LC use facilitates monitoring of cutomer margin deposits. Indeed, members reported that, notwithstanding the absence of "economies of scale" due to the relatively small use of LCs to date, they did not incur any meaningful increase in related administrative costs.[17]

IV. Phlx's Rationale for the Proposed Rule Change [18]

Phlx believes that the LC Program should be approved for several reasons. First, customer use of LCs for margin purposes facilitates trading. Customers can focus more readily on effecting appropriate trading strategies without being distracted by the need to monitor margin deposits or by potential cash flow problems arising form margin requirements.[19] Second, LC use frees up customer assets that otherwise would be needed to meet margin deposit requirements. Phlx notes that customer costs relating to LC issuance are small in comparison to the costs related to posting traditional margin collateral, *e.g.*, cash, Treasury bills or marginable securities.[20] Third, administrative costs are reduced. LC use eliminates the daily cost of wiring funds back and forth between customers and members to meet margin requirements. In sum, Phlx believes that, as LC use grows,[21] it will contribute to increased trading of foreign currency options, thereby increasing market liquidity, to the benefit of all market participants.[22]

Finally, Phlx believes that the several minor amendments to the program should be approved. The first amendment requires non-U.S. issuers to provide Phlx with semi-annual, not quarterly, financial reports. Phlx believes that this amendment is needed to conform the proposal to the different financial reporting timetable of non-U.S. institutions. Generally, those institutions do not prepare quarterly reports. Phlx believes it will be able to protect its members by relying on semi-annual reports as well as information supplied by reputable rating agencies and research organizations specializing in bank and institutional ratings.

The second amendment eliminates the requirement that an LC not terminate earlier than the expiration date of the related options contracts. Phlx believes that this limitation hindered customers wishing to roll forward foreign currency option writing programs because customers seeking to write call options that expire after the letter of credit terminates needed to post either cash margin on the options or second LC with an extended expiration date. Phlx believes that the amendment will increase customer flexibility and will reduce the costs associated with LC use.

[18] While the Options Clearing Corporation ("OCC") has established an LC program, Phlx members currently cannot pass through customer LCs to OCC to satisfy members' related OCC margin requirements. This is due largely to the fundamental differences between clearing and margin LCs. In particular, a clearing LC names OCC as its beneficiary (rather than a Phlx member) and is issued according to OCC's required clearing margin levels (rather than those set by the Federal Reserve Board for securities margin). The member therefore must use its own assets that qualify as forms of margin under OCC Rule 604, including cash, certain government securities, and common stocks. Some Phlx members have passed on the incremental OCC margin-related costs to customers that participate in the Phlx program. OCC and Phlx currently are discussing ways to allow customers LCs to be used to secure OCC margin obligations.

VOL 52 ISS 195 OC 8 1987 UMI

As additional support for the amendment, Phlx noted that OCC accepts from its clearing members for OCC margin purposes LCs that terminate before the related options positions expire. To protect itself, OCC ensures that before an LC terminates, clearing members post adequate collateral to secure their obligations.[23]

V. Discussion

The Commission recognizes that the proposal raises concerns over providing investors with increased leverage through use of LCs to meet their Regulation T margin deposit requirements (particularly because LCs will be uncollateralized).[24] More specifically, brokers and their customers are exposed to special financial risks relating to the use of uncollateralized LCs should an LC issuer delay or fail to make payment on demand of the LC beneficiary (*i.e.*, the Phlx member) because (1) the issuer becomes insolvent or (2) the issuer believes that "fraud in the underlying transaction" occurred.[25] For the reasons detailed below, the Commisison believes Phlx's LC Program is designed to minimize these risks and should facilitate transactions in foreign currency options.

With respect to concerns over issuer insolvency, the Commission's analysis begins with its experience with LCs in the clearing agency context.[26] The Phlx LC program is similar to previously-approved LC programs at several registered clearing agencies. In connection with the Commission's approval of a segment of OCC's LC program in 1983, the Commission articulated several factors that are necessary to ensure that an LC program does not create unnecessary financial risks arising from issuer insolvency.[27] The Commission suggested that an LC program should: (1) Contain measures designed to ensure that LCs are accepted only from financially responsible issuers; (2) protect the LC beneficiary from becoming exclusively dependent upon any one bank as an LC issuer; and (3) contain sufficient safeguards to protect beneficiaries in the event that an issuer delays or refuses payment.

Respecting the first factor, the Commission believes that the proposal's comprehensive LC issuer qualification standards described in detail above should enable Phlx to approve only financially sound institutions as LC issuers. The Commission notes that nearly identical standards have worked well over the years at OCC and other clearing agencies. Moreover, because LC issuers must continue to comply with the qualification standards (together with the related financial reporting requirements), the proposal should enable Phlx to monitor continuously and effectively the financial condition of LC issuers. That monitoring ability will be complemented by the information provided Phlx through the proposal's member reporting scheme. Thus, Phlx should have a continuous, clear picture of LC use and the extent of its members' potential exposure. Finally, Phlx's authority to revoke issuer approval or to terminate a member's ability to accept LCs assures the Commission that LC use under Phlx's program will be controlled and safe.

The Commission believes that the proposal satisfies the second factor, i.e., that the LC recipient not be dependent upon any one bank as an LC issuer. As described above, the proposal contains specific "concentration requirements" for LC issuers. Those requirements are designed to reduce the risks of a member becoming excessively dependent upon any single LC issuer or relying on an excessive amount of LCs for the account of any one customer. The Commission notes that analogous concentration requirements in the clearing agency context have been effective in guarding against these risks.[28]

Finally, the Commission concludes that the proposal satisfies the third factor, *i.e.*, that Phlx members are protected against the risks of delayed or refused payment arising from issuer insolvency. Members generally must obtain from customers sufficient margin deposits respecting short foreign currency option positions within seven business days after the sale.[29] Failing this, the Phlx member promptly must liquidate the position. If an LC was deposited as margin and the foreign currency option customer became insolvent so that it could not meet its settlement obligation upon exercise of an option, the Phlx member would draw on the LC. If payment on the customer's LC then were delayed or refused by the issuer due to issuer insolvency, the member still would be able to liquidate any other customer postitions to satisfy the customer's settlement obligations. Generally, the obligation of the issuer to pay the beneficiary of an irrevocable LC

---

[23] In any event, OCC Rule 605 requires OCC to report any OCC margin deficit to its members before 9:00 a.m., Central Time.

[24] When it approved the pilot program, the Commission noted that the use of uncollateralized LCs is less problematic in the foreign currency options market because of certain special characteristics of that market. In particular, LCs are customary in international trade, and persons likely to participate in the foreign currency options market are accustomed to their use. In addition, LCs often are issued in international trade against anticipated production of other goods that would be difficult to deposit as collateral. Finally, the depth and liquidity of the underlying foreign currency market reduces the volatility concerns underlying margin regulation. Because of the special characteristics and uses of foreign currency options, the Commission believed that a flexible method of margin to permit firms to write such options without locking up their cash reserves as warranted. Any proposal to permit LCs for margin purposes for other securities would raise additional issues not addressed by this order.

[25] Problems also can arise if the account party to an LC (*i.e.*, the foreign currency options customer) becomes insolvent. Courts generally have held that an LC beneficiary can draw on an LC even though the account party is bankrupt. *See* Westinghouse Credit Corp. v. Page, 18 Bankr. 713 (D.D.C. 1982) ("In re Page"); Postal v. Smith (In re Marine Distrib., Inc.), 552 F. 2d 791, 795 (9th Cir. 1975). One court, however, issued a preliminary injunction to halt payment on an LC because of the incongruity of the security interests of the issuer and the LC beneficiaries. Twist Cap, Inc. v. Southeast Bank of Tampa, 1 Bankr. 284 (M.D. Fla. 1979). The Twist Cap decision has been widely criticized. See, e.g., Planes, Inc. v. Fairchild Aircraft Corp., 29 Bankr. 370, 371 (N.D. Ga. 1983); Baird, Standby Letters of Credit in Bankruptcy, 49 U. Chi. L. R. 130 (1982); Chaitman and Sovern, Enjoining Payment on a Letter of Credit in Bankruptcy: A Tempest in a Twist Cap, 38 Bus. Law. 21, 33 (1982); McLaughlin, Letters of Credit as Preferential Transfers in Bankruptcy, 50 Fordham L. Rev. 1033 (1982). One court noted that "the overwhelming authority of the law after [Twist Cap] indicates that an [LC] and its proceeds are not property of the estate * * * and therefore the payment of an [LC] is not a transfer of assets in violation of the automatic stay provisions of [the Bankruptcy Code]." Braucher v. Continental Ill. Nat'l Bank & Trust Co. of Chicago (In re Ill/-Cal. Express, Inc.), 50 Bankr. 232, 234–35 (D. Col. 1985). In this regard, the Commission expects that the Phlx promptly would reexamine the availability of continued reliance on LCs if there were a material change in the law such that substantial questions were raised regarding whether a Phlx member still could recover under an LC in the event of a customer's insolvency. Indeed, the very rationale for the use of LCs would be in doubt were such a question to arise.

[26] For example, in August 1981, the Commission approved a proposal submitted by National Securities Clearing Corporation ("NSCC") that enables NSCC's participants to secure their clearing fund obligations with LCs issued by NSCC-approved banks. See Securities Exchange Act Release No. 18052 (August 21, 1981), 46 FR 43341. Similarly, OCC's LC program is much like Phlx's program, although the LCs issued under the two programs are different (see note 18, *supra*). See, e.g., Securities Exchange Act Release No. 19422 (January 12, 1983), 48 FR 2481 ("OCC Release").

[27] *See* OCC Release, supra note 26, 48 FR at 2483.

[28] *See, e.g.*, NSCC Rule 4, Section 1; OCC Rule 604, Interpretation and Policy .02; and Midwest Clearing Corporation Aarticel IX, Rule 2, Section 1.

[29] Phlx Rule 722(c) (6) (ii). Similarly, Phlx's proposal prohibits members from effecting additional foreign currency options transactions or maintaining such positions for a customer against an LC when the LC amount is smaller than the customer's margin deposit requirement. To lift these restrictions, the member must obtain from the customer additional margin deposits in the form of a new or amended LC acceptable to Phlx or other assets acceptable under Regulation T. Moreover, if the customer fails to provide adequate margin promptly, the Phlx member can liquidate the customer's positions to satisfy the deficiency.

is independent of any contractual obligations between the beneficiary and the account party. An LC issuer, however, may properly refuse to make payment when there is "fraud in the transaction" with respect to either the underlying contract between the account party and the beneficiary or the beneficiary's procurement of the issuance of the LC.[30]

The Commission believes that several factors reduce significantly the risk that an LC issuer would default based on fraud in the transaction. As described above, Phlx will monitor actively the initial issuance of LCs, as well as the day-to-day functioning of the program. In addition, the Commission notes that the LC beneficiaries *i.e.*, Phlx members), issuers, and account parties (*i.e.*, foreign currency options customers) that can be expected to participate in the LC program are large institutions operating in a unique, institutionalized market.[31] Finally, the Commission notes that U.S. courts generally follow a policy favoring enforcement of letters of credit [32] and that conduct giving rise to fraud in the transaction claims generally has arisen in the context of documentary sales transactions.[33]

Accordingly, the Commission believes that the Phlx proposal is consistent with the policies underlying section 7 of the Act.[34] The Phlx proposal should help to increase the liquidity and depth of the foreign currency options market, while ensuring that proper margin as required by secion 7, is initially extended and subsequently maintained on foreign currency options positions.[35]

VI. Conclusion

On the basis of the foregoing, the Commission has concluded that the proposed rule change is consistent with the requirements of the Act and the rules and regulations thereunder, and, in particular, the requirements of sections 6(b)(5) [36] and 7.

It Is Therefore Ordered, pursuant to section 19(b)(2) of the Act, [37] that Phlx's proposed rule change be, and hereby is, approved.

For the Commission, by the Division of Market Regulation pursuant to delegated authority.

Dated: October 2, 1987.

Shirley E. Hollis,

Assistant Secretary.

[FR Doc. 87-23350 Filed 10-7-87; 8:45 am]

BILLING CODE 8010-01-M

---

[30] *See* U.C.C. section 5-114(2) (1986); Itek Corp. v. First Nat'l Bank of Boston, 730 F.2d 19, 24-25 (1st Cir. 1984); W.O.A., Inc. v. City Nat'l Bank of Fort Smith, Ark., 640 F. Supp. 1157, 1158-59 (W.D. Ark. 1986); Stejn v. Schroder Banking Corp., 177 Misc. 719, 31 N.Y.S.2d 631 (Sup. Ct. 1941). One court described fraud in the transaction as "situations of fraud in which the wrongdoing of the beneficiary has so vitiated the entire transaction that the legitimate purpose of the independence of the issuer's obligation would no longer be served." Intraworld Indus., Inc. v. Girard Trust Bank, 461 Pa. 343, 359, 336 A.2d 316, 324-25 (1975).

[31] Because of the size and depth of the foreign currency market and the nature of its participants, it is unlikely that any dislocation to the foreign currency options market arising out of the nonperformance of an LC would have an effect on the underlying currency.

[32] *See, e.g.*, Pringle-Associated Mortgage Corp. v. Southern Nat'l Bank of Hattiesburg, Miss., 571 F.2d 871, 874 (5th Cir. 1978); In re Page, *supra* note 25, 18 Bankr. at 717.

[33] If the issuing bank were to allege fraud in the transaction and refuse or delay payment on an LC, the Phlx member still would be able to liquidate customer positions to satisfy the customer's settlement obligations.

[34] 15 U.S.C. section 78(g) (1982). The Commission notes that use of LCs in areas beyond foreign currency options would raise additional questions. The relatively low cost of LCs permits an investor to increase the leverage in his investment. This increased leverage correspondingly increases his potential losses from adverse price movements in the underlying stock. In turn, those increased losses could result in liquidations in the options or underlying security market, raising certain of the price volatility concerns underlying federal margin regulation. Accordingly, the Commission expresses no opinion on the appropriateness of extending the use of LCs to options products other than foreign currency options.

[35] The FRB staff has represented that, while Regulation T does not specifically authorize LC use [see 12 CFR section 220.18(h) (1978)], the FRB will not object to Commission approval of the Phlx proposal and will continue this "no-action" position "until the necessary Regulation T amendment can be considered by the Board." See Letter from Laura Homer, Securities Credit Officer, FRB, to David L. Underhill, Staff Attorney, Division of Market Regulation, SEC, dated February 2, 1987.

[File No. 1-8103]

Issuer Delisting; Notice of Application To Withdraw From Listing and Registration; Collins Foods International Inc. (Common Stock, $.10 Par Value)

October 2, 1987.

Collins Foods International, Inc. ("Company"), has filed an application with Securities and Exchange Commission pursuant to section 12(d) of the Securities Exchange Act of 1934 ("Act") and Rule 12d-2(d) promulgated thereunder, to withdraw the above specified security from listing and registration on the Pacific Stock Exchange, Inc. ("PSE").

The reasons alleged in the application for withdrawing this security from listing and registration include the following:

The Company does not believe the volume of trading in the shares on the PSE is sufficient to justify the expense of maintaining the listing. The shares are also listed on the New York Stock Exchange, Inc. ("NYSE"). During the six month period January 1, 1987 to June 30, 1987, a total of 7,878,700 shares of CFI stock were traded, on which 85.52% was traded on the NYSE and 6.31% was handled on the PSE. The remaining sales took place on other exchanges or over the counter.

The Company believes that maintenance of a single listing on the NYSE will adequately serve the needs of the investing public in providing a fair and ready market for the shares, since such a large proportion of total trading takes place on the NYSE already. Withdrawal of the shares from listing on the PSE will result in savings of approximately $5,000 in yearly fees payable to the PSE as well as savings relating to the cost of compliance with PSE rules and regulations, relating to the listing, which costs are difficult to quantify but are deemed by the Company, not be insignificant.

Any interested person may, on or before October 26, 1987, submit by letter to the Secretary of the Securities and Exchange Commission, Washington, DC 20549, facts bearing upon whether the application has been made in accordance with the rules of the Exchange and what terms, if any, should be imposed by the Commission for the protection of investors. The Commission, based on the information submitted to it, will issue an order granting the application after the date mentioned above, unless the Commission determines to order a hearing on the matter.

For the Commission, by the Division of Market Regulation, pursuant to delegated authority.

Shirley E. Hollis,

Assistant Secretary.

BILLING CODE 8010-01-M

[Release No. IC-16028; File No. 812-6600]

Application; Germany Fund

October 2, 1987

AGENCY: Securities and Exchange Commission ("SEC").

ACTION: Notice of application for exemption under Investment Company Act of 1940 ("1940 Act").

Applicant: The Germany Fund, Inc.

Relevant 1940 Act Sections: Exemption requested under section 6(c) from the provisions of section 12(d)(3) of the 1940 Act.

Summary of Application: Applicant seeks an order permitting it to invest in securities of the following major German banks, which are publicly traded on one or more of the German stock exchanges: Dresdner Bank, Commerzbank, Bayerische Hypotheken-und Weschel-Bank, Bayerische Vereinsbank and BHF Bank (collectively hereinafter referred to as the "Banks"). Such investments would be subject to the same quantitative limits as and comparable conditions to those imposed on investments in U.S. broker-dealers in Rule 12d3–1 under the 1940 Act.

Filing Date: The application was filed on January 16, 1987 and amended on August 21, 1987 and September 10, 1987.

Hearing or Notification of Hearing: If no hearing is ordered, the requested exemption will be granted. Any interested person may request a hearing on this application, or ask to be notified if a hearing is ordered. Any requests must be received by the SEC by 5:30 p.m., on October 27, 1987. Request a hearing in writing, giving the nature of your interest, the reason for the request, and the issues you contest. Serve Applicant with the request, either personally or by mail, and also send it to the Secretary of the SEC, along with proof of service by affidavit, or, in the case of an attorney-at-law, by certificate. Request notification of the date of a hearing by writing to the Secretary of the SEC.

ADDRESSES: Secretary, SEC, 450 5th Street NW., Washington, DC 20549. The Germany Fund., c/o Stephen K. West, Esq., Sullivan & Cromwell, 125 Broad Street, New York, NY 10004.

FOR FURTHER INFORMATION CONTACT: Brion Thompson, Special Counsel (202) 272–3016 (Office of Investment Company Regulation).

SUPPLEMENTARY INFORMATION: Following is a summary of the application; the complete application is available for a fee from either the SEC's Public Reference Branch in person or the SEC's commercial copier (800) 231–3282 (in Maryland (301) 258–4300).

Applicant's Representations

1. Applicant is a diversified closed-end management investment company registered under the 1940 Act. Applicant's common stock is listed on the New York Stock Exchange.

2. Applicant's investment objective is to seek long-term capital appreciation through investment in equity and equity-linked securities of German companies which are either listed or planned to be listed on one or more of the German stock exchanges or admitted or to be admitted to regulated unlisted trading on such exchanges.

Applicant may also invest in Deutsche mark ("DM")-denominated bonds issued by the Federal Republic of Germany, the German Federal Railways and Post Office, as well as in DM-denominated debt instruments issued by certain private and public entities, including multinational lending institutions and supranational institutions. For temporary defensive purposes, Applicant may invest in U.S. dollar and DM-denominated money market instruments.

3. The Investment Adviser of Applicant is Capital Management International GmbH of Deutsche Bank ("CMI"), an entity organized under the laws of the Federal Republic of Germany, and the Manager of Applicant is Deutsche Bank Capital Corporation ("DBCC"), a corporation organized under the laws of the State of New York. Both are wholly-owned subsidiaries of Deutsche Bank AG ("Deutsche Bank"), an entity organized under the laws of the Federal Republic of Germany. Both CMI and DBCC are registered as investment advisers under the Investment Advisers Act of 1940.

Pursuant to the Investment Advisory Agreement, CMI, in accordance with Applicant's stated investment objective, policies and restrictions, makes recommendations to DBCC with respect to Applicant's investments, and upon instructions given by DBCC as to suitable securities for investment by Applicant, transmits purchase and sale orders and selects brokers and dealers to execute portfolio transactions on behalf of Applicant. Pursuant to the Management Agreement, DBCC acts as the corporate manager and administrator of Applicant and, subject to the supervision of Applicant's Board of Directors and pursuant to recommendations made by CMI, determines suitable securities for investment by Applicant.

4. German commerical and banking laws permit banks to act, either directly or indirectly, as securities broker/dealers, investment bankers/underwriters, mutual and other investment funds managers and investment advisers. All the major German commercial and central savings banks, including the Banks, are members of the German stock exchanges. Therefore, investment in such Banks would be subject to the prohibitions of section 12(d)(3) of the 1940 Act. With respect to the relief provided by Rule 12d3–1, because German companies, including banks, are not required to publicly disclose their income by line of business, it is not possible for Applicant to defintively ascertain whether the Banks derive more or less than 15 percent of their gross revenues from securities-related activities for any given period. Because of the extent of the Banks' participation in securities-related business at the present time, Applicant has assumed for purposes of this application that investment in the Banks would be subject to the conditions of Rule 12d3–1(b).

5. As of October 31, 1986, the five Banks represented 9.13% of the F.A.Z. Index, which includes a broadly representative list of major industrial, mining, financial and utility stocks. In addition, as of April 25, 1986, Dresdner Bank, Commerzbank, and Bayerische Vereinsbank were the eleventh, thirteenth, and sixteenth largest companies in Germany, respectively, based on market capitalization.

Applicant's Legal Analysis

Applicant has reviewed all the conditions set forth in Rule 12d3–1(b) and represents that it will be able to satisfy all but one of the conditions. Applicant cannot satisfy the condition that any equity security acquired must be a "margin security" as defined in Regulation T promulgated by the Board of Governors of the Federal Reserve System. Because the equity securities of the Banks are not listed on a United States securities exchange or traded in the United States in the over-the-counter market, they cannot be "margin securities." Because Applicant is unable to satisfy all of the conditions of Rule 12d3–1(b), it is unable to take advantage of good investment opportunities and to increase the diversification of its portfolio, particularly its diversification within the financial sector of the German economy.

2. In support of the requested relief, Applicant submits that the securities of the Banks clearly have at least the degree of investor interest and depth and breadth of market as certain securities traded on U.S. national securities exchanges or in the U.S. over-the-counter market which have been designated as "OTC margin stocks." Applicant also submits that the Banks' securities would meet listing criteria concering total market value, earning power and share distribution and would, based on these grounds, be eligible for listing on one or more the following: The New York Stock Exchange, The American Stock Exchange or the NASDAQ National Market System. Applicant further submits that its investment in securities issued by the

Banks would clearly have no adverse effect on the liquidity of its portfolio.

Applicant asserts that the public information available about the Banks in Germany is at least equal to information available in Germany about other German issuers in nonregulated industries in which the Fund regularly invests, including those listed on German stock exchanges. Applicant submits that the disclosure required by the German Commercial Code, Corporation Act and Stock Exchange Law, while not in all respects as comprehensive as U.S. securities laws, provide significant disclosure in connection with the issuance of securities which is the "substantial equivalent" of the disclosure required by the Securities Act of 1933.

Applicant therefore asserts that the five Banks and their securities would meet the criteria necessary to qualify as "OTC margin stock" if they were U.S. issuers. Thus, the policy for the requirement that equity securities acquired must be "margin securities" would not be compromised by granting the exemption requested in order to allow Applicant to invest in these well-established and highly regulated companies.

8. Applicant submits that, given the significant market share of the Banks and their prominence in the financial services sector of the German economy, it would be able to take advantage of good investment opportunities and to increase the diversification of its portfolio were it permitted to invest in equity and debt securities of the Banks. Applicant asserts that the granting of the requested exemptive order is appropriate in the public interest and consistent with the protection of investors and the purposes fairly intended by the policy and provisions of the 1940 Act.

9. Applicant undertakes that it will invest in the debt and equity securities of Dresdner Bank, Commerzbank, Bayerische Hypotheken-und Wechsel-Bank, Bayerische, Vereinsbank and BHF Bank only if:

(i) Subject to Applicant's undertaking that each such investment will comply with all the requirements of Rule 12d3–1 except the requirement that such equity securities be margin securities;

(ii) The equity securities are listed on one or more of the German stock exchanges.

Applicant's Conditions

Applicant agrees that if the requested order is granted, such order will be expressly conditioned on Applicant's compliance with the undertaking set forth above.

For the SEC, by the Division of Investment Management, pursuant to delegated authority.

Shirley E. Hollis,

Assistant Secretary.

BILLING CODE 8010–01–M

[Rel. No. IC–16027; 812–6734]

Application and Temporary Order; GW Utilities Limited

October 2, 1987.

AGENCY: Securities and Exchange Commission ("SEC").

ACTION: Notice of application under the Investment Company Act of 1940 ("1940 Act").

Applicant: GW Utilities Limited.

Relevant 1940 Act Sections: Order requested under section 3(b)(2) or, alternatively, under section 6(c).

Summary of Application: Applicant seeks an order declaring it to be primarily engaged in a business other than that of investing, reinvesting, owning, holding or trading in securities, or, alternatively, granting it an exemption from all provisions of the 1940 Act and rules and regulations thereunder. Applicant further requests an order pursuant to section 3(b)(2) of the 1940 Act exempting it during the period from July 25, 1987, until the SEC shall make a final determination on the application.

Filing Date: The application was filed on May 26, 1987, and amended on September 4, 1987.

Hearing or Notification of Hearing: If no hearing is ordered, the application will be granted. Any interested person may request a hearing on this application, or ask to be notified if a hearing is ordered. Any requests must be received by the SEC by 5:30 p.m., on October 26, 1987. Request a hearing in writing, giving the nature of your interest, the reason for the request, and the issues you contest. Serve the Applicant with the request, either personally or by mail, and also send it to the Secretary of the SEC, along with proof of service by affidavit or, for lawyers, by certificate. Request notification of the date of a hearing by writing to the Secretary of the SEC.

ADDRESSES: Secretary, SEC, 450 5th Street, NW., Washington, DC 20549. GW Utilities Limited, One First Canadian Place, Suite 600, Toronto, Ontario, Canada M5X 1A1, Attention: Secretary; with a copy to: Gregory K. Palm, Esq., Sullivan & Cromwell, 125 Broad Street, New York, NY 10004.

FOR FURTHER INFORMATION CONTACT: Victor R. Siclari, Staff Attorney (202) 272–2190 or Brion R. Thompson, Special Counsel (202) 272–3016 (Division of Investment Management).

SUPPLEMENTARY INFORMATION: Following is a summary of the application; the complete application is available for a fee from either the SEC's Public Reference Branch in person or the SEC's commercial copier who can be contacted at (800) 231–3282 (in Maryland (301) 258–4300).

Applicant's Representations

1. As a result of the reorganization of Gulf Canada Corporation ("Gulf"), a Canadian corporation, pursuant to a court-approved statutory arrangement (the "Arrangement"), Applicant acquired and is conducted certain businesses formerly conducted by Gulf, Gulf Canada Limited, and Hiram Walker Resources Ltd. ("Hiram Walker"). The Arrangement was authorized by Gulf's board of directors and approved by Gulf's shareholders.

2. Prior to the effective date of the Arrangement, July 1, 1987 (the "Effective Date"), Applicant had no material assets or operations. Pursuant to the Arrangement, Applicant now is engaged primarily in four lines of business: in the distilled spirits business through its 49% ownership of Hiram Walker-Gooderham & Worts Limited ("HW–GW"); in the natural gas distribution business through an 83% interest in The Consumers' Gas Company Ltd. ("Consumers"); in the pipeline business through its 40.8% interest in Interprovincial Pipe Line Limited ("IPL"); and in the oil and gas business through IPL's wholly-owned subsidiary, Home Oil Company Limited ("Home").

3. Consumers is one of Canada's largest natural gas distribution utilities, serving residential, commercial and industrial customers in parts of Canada and New York. IPL is the operator of the longest crude oil and liquids pipeline system in North America. Home, which carries on IPL's natural resource operations, is engaged in the exploration for and production of hydrocarbons. Home's activities are primarily conducted in Canada and, to a lesser extent, in other countries, excluding the United States. HW–GW and certain of its subsidiaries carry on the distilled spirits business which they formerly carried on as subsidiaries of Hiram Walker. HW–GW ranks among the largest distillers in the world, and certain of its brands are marketed throughout the world.

4. Applicant's investments in minority-owned IPL and HW–GW and

VOL
52
ISS
195
OC
8
1987
UMI

majority-owned Consumers, calculated on a pro forma basis at estimated fair market value as at March 31, 1987, account for approximately $824 million (35%), $814 million (34%), and $721 million (30%), respectively, or 99% in the aggregate, of Applicant's total assets of $2.4 billion. All dollar amounts are stated in Canadian dollars.

Applicant's Legal Analyses

1. Applicant comes within the definition of an investment company as contained in section 3(a)(3) of the 1940 Act since more than 40% of its assets on an unconsolidated basis are "investment securities." Therefore, Applicant requests under section 3(b)(2) of the 1940 Act that the SEC find and declare by order that Applicant is primarily engaged in a business or businesses other than that of investing, reinvesting, owning, holding, or trading in securities either directly or (A) through majority-owned subsidiaries or (B) through controlled companies conducting similar types of businesses.

2. With respect to section 3(a)(1) of the 1940 Act, Applicant did not in the past, does not now and does not propose to hold itself out as being engaged primarily in the business of investing, reinvesting or trading in securities. Rather, it is a holding company engaged in a number of business enterprises through its majority-owned subsidiary, Consumers, and through IPL and HW–GW, two companies each of which Applicant jointly "controls" with another major shareholder within the meaning of section 2(a)(9) of the 1940 Act. Neither Consumers, IPL or HW–GW is an investment company itself within the meaning of section 3(a) of the 1940 Act. Furthermore, Applicant is not a special situation investment company. The acquisition of the stock of the companies in which it has ownership interests and the holding of such stock was and is for the purpose of engaging in the business activities of the companies involved and is not for the purpose of increasing the value of such companies' securities for profitable resale at some future date.

3. Applicant's historical development, its public representations of policy, the activities of its directors and officers, the nature of its present assets and the source of its present income further support issuance of the order requested under section 3(b)(2), as follows.

4. Applicant's predecessors (Gulf, Gulf Canada Limited, and Hiram Walker) historically have actively conducted the businesses which Applicant is engaging in as integral parts of its current business. Consumers amalgamated with HW–GW in 1980 and both became wholly-owned subsidiaries of Hiram Walker in 1981. Consumers subsequently issued shares to the public and was 83% owned when Hiram Walker was acquired by Gulf in 1986. HW–GW remained a wholly-owned subsidiary of Hiram Walker until December 1986. Certain of the Applicant's executive officers have had long associations working with their counterparts in HW–GW. Four of HW–GW's current directors are also directors or officers of Applicant. Applicant and its predecessors also have had an established relationship with IPL. Prior to the Effective Date, Gulf exercised its right to appoint five directors. Of the IPL directors most recently elected, three are also directors of and one is a senior vice president of Applicant. These directors, and the other directors nominated by Applicant's predecessor, have played and are expected to continue to play an important role in the management of IPL. IPL's president and chief executive officer is a former executive vice president of Applicant's predecessor, Hiram Walker. Similarly, IPL's vice president-finance and chief financial officer, vice president-corporate services and treasurer were officers of a subsidiary of Hiram Walker prior to 1987. Furthermore, on the Effective Date, Gulf's shareholders became Applicant's shareholders and as such, are aware of the historical involvement in these lines of business.

5. Applicant's representations of policies to date have been few, and were, in fact, made by Gulf in connection with the Arrangement. In the Proxy Statement, Gulf stated that Applicant would "be engaged in the gas distribution, pipelines, natural resources and distilled spirits businesses through interests in Consumers, IPL * * * and HW–GW." Applicant intends to engage in these four distinct lines of business through significant equity interests in the three operating corporations, not in the business of trading in securities, and does not hold itself out as being an investment company.

6. Applicant's directors and executive officers have had extensive involvement in the management of businesses with extensive natural resource operations. Certain of Applicant's directors and executive officers are also directors and officers of HW-GW, IPL and Consumers. In addition, a majority of Applicant's directors and executive officers are engaged, either as directors or officers or both, in the management of businesses with substantial operations in areas of activity similar to that conducted by Applicant through its operating subsidiaries. With the exception of one, all of Applicant's directors and senior officers had been or are directors or senior officers of Gulf and thus are farmiliar with Applicant's businesses. None of Applicant's directors or executive officers is a portfolio management or brokerage professional.

7. Moreover, on a fair market value, pro forma basis, Consumers, IPL and HW-GW accounted for 30 percent, 35 percent and 34 percent, respectively, or 99 percent cumulatively, of Applicant's assets at March 31, 1987. Because minority-owned IPL and HW-GW are each engage in a type of business different from that of the other, however, section 3(b) (2) (B) may not permit such assets to be considered together with those of majority-owned Consumers in support of Applicant's contention that it is primarily engaged in businesses other than investing, reinvesting, owning, holding or trading in securities. Nevertheless, Applicant asserts that it should be deemed to be primarily engaged in operating businesses because, on an unconsolidated basis, (1) the combined value of its investment in regulated utilities through Consumers and IPL represents 65 percent of Applicant's total assets, or (2) the combined value of Consumers and HW-GW represents 64 percent of Applicant's total assets.

8. Applicant's 1986 annual pro forma equity earnings from Consumers, IPL and HW-GW are $59 million (39 percent), $43 million (28 percent), and $50 million (32 percent), respectively. Applicant's earnings from other sources (primarily interest income) represent less than 1 percent of such earnings.

9. In the alternative, Applicant requests an order under section 6(c) of the 1940 Act exempting it from all provisions of the 1940 Act. Applicant submits that exempting it from all provisions of the 1940 Act is necessary or appropiate in the public interest and consistent with the protection of investors and the purposes fairly intended by the policy and provisions of the 1940 Act.

Applicant's Conditions

If the requested order is granted, Applicant agrees to the following conditions:

1. Applicant will not engage in the trading of investment securities for speculative purposes so as to bring Applicant's activities within those intended to be regulated by the 1940 Act.

2. Applicant intends to continue to be primarily engaged in non-investment company businesses.

3. Applicant will notify the staff of the Division of Investment Management immediately of any proposed material changes to be made in its investments.

Temporary Order

The request for exemptive relief pending final determination on the application by the SEC has been considered, and it is found that, in view of the circumstances set forth above and in the application, cause has been shown for granting such relief. Accordingly,

It Is Ordered, pursuant to section 3(b)(2) of the 1940 Act, that the application for an order exempting Applicant from all provisions of the 1940 Act be, and hereby is, granted, during the period from July 25, 1987, until the SEC shall make a final determination upon the request for the permanent order set forth in the application, subject to the undertakings to which Applicant has consented and which are set forth above and in the application.

For the SEC, by the Division of Investment Management, under delegated authority.

Shirley E. Hollis,

Assistant Secretary.

BILLING CODE 8010-01-M

[File No. 1-8297]

Issuer Delisting; Notice of Application To Withdraw From Listing and Registration; Homefree Village Resorts, Inc. (Common Stock, $.001 Par Value)

October 1, 1987.

Homefree Village Resorts, Inc. ("Company"), has filed an application with the Securities and Exchange Commission pursuant to section 12(d) of the Securities Exchange Act of 1934 ("Act") and Rule 12d2-2(d) promulgated thereunder, to withdraw the above specified security from listing and registration on the Boston Stock Exchange, Inc. ("BSE").

The reasons alleged in the application for withdrawing this security from listing and registration on the BSE include the following:

Trading in the Company's common stock on the Exchange has been minimal. The Company's common stock is traded on the over-the-counter market under the symbol HMFR with trading reported by the National Association of Securities Dealers Automated Quotation System ("NASDAQ"). Substantially all trading in the company's common stock occurs in the over-the-counter market. Upon approval by its stockholders, the Company intends to implement a "Pairing Plan" pursuant to which the Company will "pair" its shares of common stock with interests in Homefree Investors L.P. so that such shares and interests may be purchased or sold only as a unit. If the Company continued to list its common stock on the Exchange, it would be necessary to list the partnership interests in Homefree Investors L.P. on the Exchange in order to implement the Pairing Plan.

Any interested person may, on or before October 22, 1987 submit by letter to the Secretary of the Securities and Exchange Commission, Washington, DC 20549, facts bearing upon whether the application has been made in accordance with the rules of the Exchange and what terms, if any, should be imposed by the Commission for the protection of investors. The Commission, based on the information submitted to it, will issue an order granting the application after the date mentioned above, unless the Commission determines to order a hearing on the matter.

For the Commission, by the Division of Market Regulation, pursuant to delegated authority.

Jonathan G. Katz,

Secretary.

BILLING CODE 8010-01-M

[Release No. IC-16031 /File No. 812-6785]

Application for Exemption; John Hancock Mutual Life Insurance Co. ("John Hancock") and John Hancock Variable Annuity Account V "Account V")

October 2, 1987.

AGENCY: Securities and Exchange Commission ("SEC").

ACTION: Notice of application for exemption under the Investment Company Act of 1940 (the "1940 Act").

Applicants: John Hancock Mutual Life Insurance Company "John Hancock") and John Hancock Variable Annuity Account V ("Account V").

Relevant 1940 Act Sections: Exemption requested under section 6(c) from sections 26(a)(2)(C) and 27(c)(2).

Summary of Application: Applicants seek an order to permit John Hancock to deduct from Account V the mortality and expense risk charges imposed under individual combination fixed/variable annuity contracts (the "Contracts") issued by John Hancock and a deferred sales charge equal to one percent of certain purchase payments made on the contract.

Filing Date: The application was filed on June 8, 1987 and amended on September 22, 1987.

Hearing or Notification of Hearing: If no hearing is ordered, the application will be granted. Any interested person may request a hearing on this application, or ask to be notified if a hearing is ordered. Any request must be received by the SEC by 5:30 p.m., on October 28, 1987. Request a hearing in writing, giving the nature of your interest, the reason for the request, and the issues you contest. Serve the Applicants with the request, either personally or by mail, and also send it to the Secretary of the SEC, along with proof of service by affidavit, or, for lawyers, by certificate. Request notification of the date of a hearing by writing to the Secretary of the SEC.

ADDRESSES: Secretary, SEC, 450 5th Street, Washington, DC 20549; John Hancock, c/o Sandra M. Molley, John Hancock Place, Boston, Massachusetts 02117.

FOR FURTHER INFORMATION CONTACT: Clifford E. Kirsch, Staff Attorney (202) 272-3032 or Lewis B. Reich, Special Counsel (202) 272-2061 (Office of Insurance Products and Legal Compliance).

SUPPLEMENTARY INFORMATION: Following is a summary of the application; the complete application is available for a fee from either the SEC's Public Reference Branch in person or the SEC's commercial copier (800) 231-3282 (in Maryland (301) 253-4300).

Applicants' Representations

1. Account V, a registered unit investment trust under the 1940 Act, was established by John Hancock pursuant to Massachusetts law to fund the Contracts. A registration statement on Form N-4 under the Securities Act of 1933 has been filed to register the offering of the Contracts. Account V presently comprises five subaccounts each of which invests solely in the shares of one of the portfolios of John Hancock Variable Series Fund I, Inc., and a fixed annuity account. John Hancock, a registered broker/dealer, is the principal underwriter for the Contracts.

2. Prior to a Contract's maturity, John Hancock assesses an Annual Maintenance Charge of $30 (with the right reserved to increase the charge to $50) at the beginning of each Contract year after the first and at full surrender

during a Contract year. In addition, for certain administrative services, John Hancock makes a daily charge to the Account equal to .35% on an annual basis of the current value of its assets.

3. Prior to a Contract's maturity, a deferred sales charge equal to 1 percent of the purchase payments made in the immediately preceding Contract year is deducted from the Accumulated Value of the Contract at the beginning of each Contract Year after the first. A Withdrawal Charge is assessed whenever any amount is withdrawn from a deferred Contract prior to maturity. During the first two Contract Years, any amount withdrawn is subject to a Withdrawal Charge. In any Contract Year after the second, a Withdrawal Charge is assessed upon any amount withdrawn in excess of 10% of the difference between the purchase payments made prior to the beginning of the Contract year and any partial withdrawals (including Withdrawal Charges assessed) made prior to the beginning of the Contract Year without the assessment of any charges.

4. Withdrawal Charges are based upon a percentage of the purchase payments made to date less any partial withdrawals, deferred sales charges, Annual Maintenance Charges, and Withdrawal Charges to date and are assessed as follows:

Years from date of deposit to date of withdrawal	Withdrawal charge, (percent)
less than 1	8.5
1 but less than 2	7.5
2 but less than 3	7.5
3 but less than 4	7.5
4 but less than 5	6.0
5 but less than 6	4.5
6 but less than 7	3.0
7 or more	0

5. The application states that in no event will the aggregate withdrawal charges against a contract plus the 1% deferred sales charge ever exceed 8.5% of the purchase payments received.

6. For assuming certain risks under the Contracts, John Hancock imposes a daily mortality and expense risk charge of .90% of the net asset value of each subaccount of Account V. The charge is allocable .45% to John Hancock's assumption of mortality risks and .45% to John Hancock's assumption of expense risks. Applicants represent that the level of this charge is guaranteed and will not change.

7. Applicants represent that the mortality and expense risk charge is reasonable in relation to the risks assumed by John Hancock under the Contracts and that John Hancock is entitled to reasonable compensation for its assumption of mortality and expense risks.

8. Applicants further represent that the mortality and expense risk charge is within the range of industry practice with respect to comparable annuity products. This representation is based upon John Hancock's analysis of publicly available information about similar industry products, taking into consideration such factors as current charge levels, the existence of charge level guarantees, and guaranteed annuity rates.

9. Applicants also represent that there is a reasonable likelihood that Account V's proposed distribution financing arrangement will benefit Account V and the contract owners.

10. Applicants submit that the deferred sales charge is a very small fraction of the amount of front-end sales load charges permitted under section 27 of the 1940 Act and, as such, is much more favorable to owners of the Contracts than the imposition of a sales load of the permitted amount. Because small amounts will be deducted during the lives of the Contracts for sales expenses, more money will be available for investment for the benefit of the owners of the Contracts.

Applicants' Conditions

If the requested order is granted, Applicants agree to the following conditions:

1. John Hancock will maintain at its administrative offices, available to the Commission, a memorandum setting forth in detail the products analyzed in the course of, and the methodology and results of, its comparative survey.

2. John Hancock will maintain at its administrative offices and make available to the Commission a memorandum setting forth the basis for the conclusion that Account V's distribution financing agreement will benefit Account V and the contract owners.

3. Account V will invest only in management investment companies which undertake, in the event such company adopts a plan under Rule 12b–1 to finance distribution expenses, to have a board of trustees (or directors), a majority of whom are not interested persons of the company, approve any such plan under Rule 12b–1.

4. Applicants will monitor Account V to ensure that, with respect to any Contract, total deferred sales charges assessed plus total Withdrawal Charges assessed will not exceed 8.5 percent of the total purchase payments made under the Contract.

For the Commission, by the Division of Investment Management, pursuant to delegated authority.

Shirley E. Hollis,

Assistant Secretary.

BILLING CODE 8010–01–M

[Release No. IC–16029; (812–6784)]

Application; Pilgrim Government Securities Fund et al.

October 2, 1987.

AGENCY: Securities and Exchange Commission ("SEC").

ACTION: Notice of application for an amended order under the Investment Company Act of 1940 (the "1940 Act").

Applicants: Pilgrim Government Securities Fund, Pilgrim High Income Fund, Pilgrim International Bond Fund (collectively, "Applicants" or the "Partnerships").

Relevant 1940 Act Sections: Exception requested under section 6(c) from section 2(a)(19).

Summary of Application: Applicants seek to amend an existing order exempting Applicants' Managing General Partners to the extent that they are deemed interested persons solely because they are general partners in the Partnerships (Investment Company Act Release No. 15507, December 30, 1986) ("Existing Order") to now include an additional and future independent Managing General Partners elected subsequent to the Existing Order.

Filing Date: The application was filed on July 7, 1987.

Hearing or Notification of Hearing: If no hearing is ordered, the application will be granted. Any interested person may request a hearing on this application, or ask to be notified if a hearing is ordered. Any requests must be received by the SEC by 5:30 p.m., on October 27, 1987. Request a hearing in writing, giving the nature of your interest, the reason for the request, and the issues you contest. Serve the Applicants with the request, either personally or by mail, and also send it to the Secretary of the SEC, along with proof of service by affidavit, or, for lawyers, by certificate. Request notification of the date of a hearing by writing to the Secretary of the SEC.

ADDRESSES: Secretary, SEC, 450 5th Street NW., Washington, DC 20549. Applicants, c/o Murray L. Simpson, Gaston Snow & Ely Bartlett, 101 California Street, 30th Floor, San Francisco, California 94111.

FOR FURTHER INFORMATION CONTACT: Paul J. Heaney, Financial Analyst (202) 272–2847, or Brion R. Thompson, Special Counsel, (202) 272–3016 (Division of Investment Management).

SUPPLEMENTARY INFORMATION: Following is a summary of the application; the complete application is available for a fee from either the SEC's Public Reference Branch in person, or the SEC's commercial copier who can be contacted at (800) 231–3282 (in Maryland (301) 258–4300).

Applicants' Representations

1. Each Partnership is a diversified, open-end management investment company registered under the 1940 Act. Each Partnership is organized as a limited partnership in the State of California and shares of each fund are being offered exclusively to foreign investors with the objective of earning income that is not subject to U.S. Federal income tax.

2. Each Partnership will offer a single class of shares registered under the Securities Act of 1933 and the 1940 Act and purchasers will be required to become limited partners of that Partnership. Each Partnership's shareholders will have the voting, approval and other rights required under the 1940 Act but, consistent with the California Revised Limited Partnership Act, will not have the right to participate in the control of a Partnership's business.

3. The general partners of each Partnership consist of one corporate general partner (the "Non-Managing General Partner"), which will not take any role in management (except temporarily, in extraordinary circumstances) and a number of individual general partners (the "Managing General Partners"), who establish the investment policies and supervise and review its operations. The Existing Order exempts certain existing individual Managing General Partners of each Partnership, as of the date of the Existing Order, from the provisions of section 2(a)(19) of the 1940 Act to the extent that they are deemed "interested persons" solely because they are partners and co-partners of each Partnership and the non-Managing General Partner ("Independent Managing General Partners"), but does not exempt any future individual Managing General Partners of the Partnerships. Applicants seek to amend the Existing Order to extend to future individual Managing General Partners and one existing individual Managing General Partner, Felice R. Cutler, in particular, on the same basis set forth in the original application on which the Existing Order was granted.

Applicants' Legal Conclusions

1. Certain individual Managing General Partners are "interested persons" of the Partnerships and their investment manager and principal underwriter, as defined in section 2(a)(19) of the 1940 Act, solely by virtue of being partners of the Partnerships and co-partners of the non-Managing General Partner.

2. Section 2(a)(19) contains a proviso that excludes those individuals who would be interested persons of an investment company solely because they are directors of an investment company in corporate form, but contains no comparable exclusions for partners or co-partners if such company is a partnership. Applicants state that the Partnerships have been structured so that the independent Managing General Partners are the functional equivalents of the non-interested directors of an incorporated investment company.

3. Absent the requested exemption, Ms. Cutler may not be able to act as an independent Managing General Partner and the limitation could restrict the ability of the Partnerships to respond on decisions requiring the action of independent Managing General Partners. Prospective relief is also necessary and appropriate to permit independent Managing General Partners who may be elected in the future to begin fulfilling their obligations as the functional equivalents of independent directors upon election without the need for repeated amendments of the Existing Order.

4. The amendment to the Existing Order is necessary and appropriate in the public interest, and consistent with the protection of investors and the purposes fairly intended by the policies and provisions of the 1940 Act.

For the SEC, by the Division of Investment Management, under delegated authority.

Privacy Act of 1974; Telephone Station Message Detail Reports

The Department of Transportation herewith proposes to modify the system of records on telephone usage for administrative billing purposes, titled "Telephone Station Message Detail Reports", DOT/A11–4. The proposed modification provides for dissemination of telephone usage reports to managers for review. The records will identify Departmental employees use of telephones to place Federal Telecommunications Systems (FTS) and Commercial Long Distance Calls.

Any person or agency may submit written comments on the proposed system to the Privacy Officer (M–34) Room 7109, U.S. Department of Transportation, 400 Seventh Street, SW. Washington, DC., 20590. Comments must be received within 30 days from date of this notice to be considered.

If no comments are received, the proposed changes will become effective 60 days from the date of issuance. If comments are received, the comments will be considered and where adopted the document will be republished with the changes.

Issued in Washington, DC, October 2, 1987.

Jon H. Seymour,

Assistant Secretary for Administration.

Narrative Statement for the Department to Transportation Assistant Secretary for Administration, Office of Information Resource Management, Telephone Station Message Detail Report

The Department of Transportation proposes to modify the existing Privacy Act systems of records relating to telephone usage for administrative billing purposes. The modification provides for dissemination of telephone usage reports to managers for review.

The records will relate to the use of the Department's telephones to place Federal Telecommunications System (FTS) and Commercial Long Distance calls. They will also identify assignment of telephone numbers and locations of telephones to Department employees.

Each month the Office of the Secretary (OST) and the Operating Administrations' telecommunications representatives will be provided a report of all commercial long distance calls made from each telephone number in their respective organizations during the previous month. The report will include information on all commercial long distance calls made form the number; employee name; telephone number; the time the call was made and the duration and cost of the call. There will also be periodic reports of off-net FTS calls providing the same information.

OST and Operating Administrations' telecommunications representatives will coordinate these reports with the appropriate office managers to review, certify, and when necessary, to arrange for reimbursement to the Federal Government for nonofficial commercial long distance and off-net FTS calls.

Only Telecommunications Management Branch personnel within the Office of the Secretary and selected operation and maintenance contact personnel will have access to tapes. Printed copies of the OST and Operating Administration reports will be provided to the respective telecommunications contacts, as appropriate, for dissemination to managers. All will be responsible for implementation of necessary safeguards. The purpose of this report is to comply with the Office of Management and Budget Circular A–130, Appendix I, entitled "Federal Agency Responsibilities for Maintenance of Records about Individuals" [50 FR 52738 (1985)].

Privacy Act Implications of Call Detail Programs; Proposed Notice

SYSTEM NAME:

Station Message Detail Recording (SMDR)

SYSTEM LOCATIONS:

U.S. Department of Transportation, Assistant Secretary for Administration, Room 9112, 400 7th Street, SW., Washington, DC 20590.

Decentralized segments are located at Operating Administrations' contacts offices.

CATEGORIES OF INDIVIDUALS COVERED BY THE SYSTEM:

Department of Transportation employees who make Federal Telecommunications Systems (FTS) and Domestic and International Commercial Long Distance calls from the three Headquarters Buildings: The Nassif and Trans Point Buildings and Federal Building-10A.

CATEGORIES OF RECORDS IN THE SYSTEM:

Records relating to the use of the Department's administrative telephones to place FTS and Commercial Long Distance calls, records indicating assignment of telephone numbers to Departmental employees, and records relating to the location of telephones.

ROUTINE USES OF RECORDS MAINTAINED IN THE SYSTEM:

See Prefatory Statement of General Routine Uses.

POLICIES AND PRACTICES FOR STORING, RETRIEVING, ACCESSING, RETAINING, AND DISPOSING OF RECORDS IN THE SYSTEM:

STORAGE:

Magnetic Tape storage via batch processing and paper copy.

RETRIEVABILITY:

Records are retrieved by telephone number or routing symbol, from the telecommunications contacts in the Operating Administrations and the Telecommunications Management Branch in OST.

SAFEGUARDS:

Only telecommunications personnel within the Office of the Secretary and operation and maintenance contract personnel have access to tapes. Telecommunications contacts and managers in OST and the Operating Administrations will have access to printed records. Printed records will have a cover sheet indicating Privacy Act coverage.

RETENTION AND DISPOSAL:

Records are disposed of as provided in National Archives and Records Administration General Records Schedule 12.

SYSTEM MANAGER(S) AND ADDRESS:

Chief, Telecommunications Management Branch, M–33, U.S. Department of Transportation, Office of the Secretary, Office of Information Resource Management, 400 Seventh Street SW., Room 9112, Washington, DC 20590.

NOTIFICATION PROCEDURES:

Contact Telecommunications Management Branch, M–33, at the above address.

RECORD ACCESS PROCEDURE:

Contact Telecommunications Management Branch, M–33 at the above address or telecommunications contacts in the Operating Administrations.

Individuals may review their own data upon presentation of a valid Department of Transportation identification card to their Operating Administration contact or the Telecommunications Management Branch in OST.

RECORD SOURCE CATEGORIES:

Telephone assignment records, call detail listings and results of administrative inquiries relating to assignment of responsibility for placement of specific long distance calls.

SYSTEMS EXEMPTED FROM CERTAIN PROVISIONS OF THE ACT:

None.

Federal Aviation Administration

Proposed Advisory Circular 25.785–1A; Flight Attendant Seat Requirements

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Notice of availability of proposed Advisory Circular 25.785–1A and request for comments.

SUMMARY: This notice announces the availability of and requests comments on a proposed advisory circular (AC) pertaining to flight attendant seat installations. This notice is necessary to give all interested persons an opportunity to present their views on the proposed AC.

DATES: Comments must be received on or before February 5, 1988.

ADDRESS: Send all comments on the proposed AC to: Federal Aviation Administration, Attention: Transport Standards Staff, ANM–110, Northwest Mountain Region, 17900 Pacific Highway South, C–68966, Seattle, Washington 98168. Comments may be inspected at the above address between 7:30 a.m. and 4:00 p.m. weekdays, except Federal holidays.

FOR FURTHER INFORMATION CONTACT: Jan Thor, Transport Standards Staff, at the address above, telephone (206) 431–2127.

SUPPLEMENTARY INFORMATION:

Comments Invited

A copy of the proposed AC may be obtained by contacting the person named above under **"FOR FURTHER INFORMATION CONTACT."** Interested persons are invited to comment on the proposed AC by submitting such written data, views, or arguments as they desire. Commenters should identify AC 25.785–1A and submit comments, in duplicate, to the address specified above. All communications received on or before the closing date for comments will be considered by the Transport Standards Staff before issuing the final AC.

Background

Advisory Circular 25.785–1 was issued on December 4, 1981, in order to clarify changes made to §§ 25.785 and 121.311 of the Federal Aviation Regulations, by Amendments 25–51 and 121–155, respectively.

In September 1985, the FAA held a Public Technical Conference on Emergency Evacuation of Transport Airplanes in Seattle, Washington. As a result of the conference, three working groups were formed to discuss the issues and recommendations expressed at the conference. The three groups were Design and Certification, Operations and Training, and Maintenance and Reliability. The Design and Certification Working Group, in turn, subdivided into three subgroups: Evacuation Demonstration, exits, and Escape Slides. The Exits Subgroup recommended, in part, that AC 25.785–1 be revised to provide guidance relative to the close proximity of aft-facing flight attendant seats and forward-facing passenger seats. Information is given in this AC which would assist in the design of airplane interiors or the placement of seats which would preclude a passenger from strking a flight attendant during an emergency landing.

Other recommendations from the Exits Subgroup pertained to the width of single and double flight attendant seats, and the proper installation of torso restraint systems. This AC also includes guidance relating to these two areas of flight attendant seat installation.

Issued in Seattle, Washington, on July 21, 1987.

Darrell M. Pederson,

Acting Manager, Aircraft Certification Division, ANM–100.

BILLING CODE 4910–13–M

[Summary Notice No. PE–87–25]

Petition For Exemption; Summary of Petitions Received; Dispositions of Petitions Issued; Aviall, Inc., et al

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Notice of petitions for exemption received and of dispositions of prior petitions.

SUMMARY: Pursuant to FAA's rulemaking provisions governing the application, processing, and disposition of petitions for exemption (14 CFR Part 11), this notice contains a summary of certain petitions seeking relief from specified requirements of the Federal Aviation Regulations (14 CFR Chapter I), dispositions of certain petitions previously received, and corrections. The purpose of this notice is to improve the public's awareness of, and participation in, this aspect of FAA's regulatory activities. Neither publication of this notice nor the inclusion or omission of information in the summary is intended to affect the legal status of any petition or its final disposition.

DATE: Comments on petitions received must identify the petition docket number involved and must be received on or before: October 28, 1988.

ADDRESS: Send comments on any petition in triplicate to: Federal Aviation Administration, Office of the Chief Counsel, Attn: Rules Docket (AGC–204), Petition Docket No. _____, 800 Independence Avenue, SW., Washington, DC 20591.

FOR FURTHER INFORMATION: The petition, any comments received, and a copy of any final disposition are filed in the assigned regulatory docket and are available for examination in the Rules Docket (AGC–204), Room 915G, FAA Headquarters Building (FOB 10A), 800 Independence Avenue, SW., Washington, DC 20591; telephone (202) 267–3132.

This notice is published pursuant to paragraphs (c), (e), and (g) of § 11.27 of Part 11 of the Federal Aviation Regulations (14 CFR Part 11).

Issued in Washington, DC, on October 1, 1987.

Denise D. Hall,

Acting Manager, Program Management Staff.

PETITIONS FOR EXEMPTION

Docket No	Petitioner	Regulations affected	Description of relief sought
25366	Aviall, Inc. and Caledonian Airmotive, Ltd	14 CFR 145.47(b) and 145.51(d)	To allow petitioner to perform services including inspection, repair, maintenance, overhaul, and return to service of aircraft engines, appliances, parts and components for which petitioner is appropriately rated for installation on any U.S.-registered aircraft without geographical limitation, and in accordance with their ratings
25315	Eugene G. Lewis	14 CFR 65.91(c)	To allow petitioner relief from the 3-year requirement relating to a currently effective mechanic certificate with both an airframe rating and a powerplant rating.
21991	United Airlines	14 CFR 63.39(b)(1) and (b)(2), and 121.425(a)(2)(1) and (a)(2)(ii)	To allow petitioner, its flight engineers and flight engineer applicants to use a FAA-approved pictorial means and an approved simulator, in lieu of an actual static airplane for demonstrating the satisfactory performance of a preflight inspection and assigned flight engineer duties.
25389	Executive Air Fleet Corporation	14 CFR 61.57(d) and 135.247(a)(2)	To allow pilots of petitioner holding airline transport pilot certificates and serving as pilot in command in passenger-carrying operations of a turbojet airplane, operating under Part 91 or 135, to serve as PIC of aircraft carrying passengers during the hours of darkness without having made three takeoffs and landings during the hours of darkness within the preceding 90 days.
003SW	Parker Hannefin	14 CFR 29.305(a) and (b) and 29.501	To allow petitioner to design the elastic spring members of a Bell Model 412 helicopter wheel landing gear design to the same standards required for a helicopter skid landing gear. The elastic spring members would experience permanent yield under limit design load and would be subject to ultimate design load derived from a "reserve energy" landing condition § 29.501(a)(2) and (3)).
042CE	British Aerospace Public Limited Co	§ 23.807(d)(1)(ii)	To allow certification of the Jetstream Series 3200 in the Community Category of Part 23 with one larger overwing exit on the side opposite the passenger entrance door in lieu of the required two smaller exits
033CE	Beech Aircraft Corporation	§ 23.807(d)(1)(i)	To permit certification of a Model 2000 Airplane with one emergency exit in the cabin opposite the main entrance door, which will not comply with § 23.807(d)(1)(i). The Beech Model 2000 is a twin-turbopropeller engine, nine-passenger airplane intended to be certified in the commuter category. Granted: 4 September 1987
036CE	OMAC, Inc	§ 23.903(e)(2)	To permit certification of a OMAC Model L300 airplane with an engine installation that does not provide a means for stopping the rotation of the engine, which does not comply with § 23.903(e)(2). The OMAC Model L300 is a single pusher turbo-propeller engine, eight-passenger airplane intended to be certificated in the normal category. Granted: 27 August 1987.
038CE	Porsche Aviation Products, Inc	§23.991(a)(1)	To permit supplemental type certification of a Cessna Model 172 Airplanes using the Porsche PFM3200No1 engine, which will not comply with § 23.991(a)(1). The Cessna Model 172 is a small single reciprocating engine, four place airplane. Granted: 27 August 1987
039CE	Porsche Aviation Products, Inc	§23.991(a)(1)	To permit supplemental type certification of a Cessna Model 182 Airplanes using the Porsche PFM3200No3 engine, which will not comply with § 23.991(a)(1) The Cessna Model 182 is a small single reciprocating engine, four place airplane. Granted: 27 August 1987
24808	Pan American World Airways	§§ 121.433(c)(9)(iii), 121.441(a)(11) and 121.441(b)(1) and Appendix F of Part 121 of the FAR	To permit PAA to combine recurrent training and proficiency checks for pilots in command (PIC) into one annual training and proficiency check session. In addition, the line check required by § 121.440 would be administered 6 months subsequent to the annual training and proficiency check session in lieu of the recurrent training presently required. Granted: August 10, 1987
24085	Air Transport Association	Appendix H of Part 121 of the FAR	Petitioned on behalf of ATA's members and other air carriers for an exemption from a specific provision of Appendix H of Part 121 of the Federal Aviation Regulations (FAR) to accomplish total initial and upgrade pilot training and checkin in a Phase II simulator, in lieu of a Phase II simulator. Denial: August 10, 1987
012NM	United Airlines	§25.1305(d)(3)	This exemption would allow United Airlines to operate all of their Boeing Model 737-300 airplanes without having engine rotor unbalance indicators installed. Denial: 19 August 1987
25201	Department of the Air Force	14 CFR 61.73(b)(1)	To allow petitioner's Academy cadet soaring instructors to obtain an FAA commercial pilot-glider certificate without having to comply with the commercial pilot-glider certification requirements of Part 61 or the military pilot qualification requirements. Denied, September 21, 1987
25370	Britt Airways, Inc	14 CFR 135.337 and 135.339	To allow petitioner to use certain instructor pilots of Embraer Aircraft Corporation to train petitioner's initial cadre of pilots in the Embraer 120 type airplane without holding U.S. certificates and ratings and without meeting all of the applicable training requirements of Subpart H of Part 135 of the FAR. Granted, September 25, 1987
25067	Flightsafety International	14 CFR 61.2	To allow foreign nationals who already posess U.S. pilot certificates to receive additional aircraft training and ratings at training centers operated by petitioner outside the United States. Denied, September 21, 1987
21605	Alaska Airlines, Inc	14 CFR 121.574(a)(1) and (3)	To allow the carriage and operation of oxygen storage, generating, and dispensing equipment when the equipment is furnished and maintained by hospitals within the State of Alaska for medical use by patients who are passengers' requiring emergency medical attention. Granted, September 14, 1987
19634	Douglas Aircraft Company	14 CFR 121.310(d)(4)	To allow operators of DC-8 series aircraft to operate these aircraft in passenger-carrying operations with a cockpit control device for each emergency light as required. Granted, September 16, 1987
25358	Britt Airways, Inc	14 CFR 121.411(a)(1), (a)(2), (a)(3), and (a)(6) and 121.413(b) and (c).	To allow petitioner to utilize certain highly qualified pilot flight instructors from Aeroformation and Aerospatiale for the purpose of training petitioner's initial cadere of pilots in the Aerospatiale 42 type airplane in Toulouse, France, without holding appropriate U.S. certificates and ratings and without meeting all of the applicable training requirements of Subpart H of Part 121. Granted, September 14, 1987

VOL 52 ISS 195 OC 8 1987 UMI

PETITIONS FOR EXEMPTION—Continued

Docket No	Petitioner	Regulations affected	Description of relief sought
25374	Bar Harbor Airways, Inc., d.b.a. Eastern Express	14 CFR 121.411(a)(1), (a)(2), (a)(3), and (a)(6) and 121.413(b) and (c).	To allow petitioner to utilize certain highly qualified pilot flight instructors from Aeroformation and Aerospatiale for the purpose of training petitioner's initial cadere of pilots in the Aerospatiale 42 type airplane in Toulouse, France, without holding U.S. certificates and ratings and without meeting all of the applicable training requirements of Subpart N of Part 121. Granted, September 14, 1987.

Federal Highway Administration

[FHWA Docket No. 87-20]

Contract Procedures; Buy America Requirements

AGENCY: Federal Highway Administration (FHWA), DOT.

ACTION: Notice of request for national waiver of Buy America; request for comments.

SUMMARY: In accordance with 23 CFR 635.410(c)(6), the FHWA hereby provides notice that it has received a request for a national waiver of the requirements of 23 CFR 635.410 (Buy American Requirements) for Reno Mattresses (Gabion wire baskets). The Federal regulations in 23 CFR 635.410 provide, with exceptions, that no Federal-aid highway construction project in which steel materials are to be used is to be authorized for advertisement or authorized to proceed unless all manufacturing processes for such materials occur in the United States. The request stated that since there is only one domestic producer of Reno Mattresses, the waiver would stimulate competition thus serving the public interest. To assist FHWA in assessing this request for waiver, comments are specifically requested on the present availability of the domestic supply and if there exists a reasonably available quantity of satisfactory quality to meet present needs. Additionally, comments are requested on the comparative costs of Reno Mattresses and competition in the industry.

The request was made by Terra Aqua, Inc., Reno, Nevada. Copies of the petition for waiver have been placed in the docket file identified above. Interested parties are encouraged to comment on this request.

Buy American requirements are contained in section 165 of the Surface Transportation Assistance Act of 1982 (Pub. L. 97-424, 96 Stat. 2136), as amended.

DATE: Written comments must be received on or before December 7, 1987.

ADDRESS: Submit signed, written comments, preferably in triplicate, to FHWA Docket No. 87-20, Federal Highway Administration, Room 4205, HCC-10, 400 Seventh Street, SW., Washington, DC 20590. All comments received will be available for examination at the above address from 8:30 a.m. to 3:30 p.m., e.t., Monday through Friday, except legal holidays. Those desiring notification of receipt of comments must include a self-addressed, stamped postcard.

FOR FURTHER INFORMATION CONTACT: Mr. Stuart A. Bender, Office of the Chief Counsel (202) 366-0780, at the above address.

Section 165 of Pub. L. 97-424, 96 Stat. 2097, 2136, as amended; 23 U.S.C. 315; 49 CFR 1.48

Issued on: October 1, 1987.

R.A. Barnhart,

Federal Highway Administrator, Federal Highway Administration.

BILLING CODE 4910-22-M

Environmental Impact Statement; Honolulu, HI

AGENCY: Federal Highway Administration (FHWA), DOT.

ACTION: Notice of intent.

SUMMARY: The FHWA is issuing this notice to advise the public that an environmental impact statement (EIS) will be prepared for a proposed highway project in Honolulu, Hawaii.

FOR FURTHER INFORMATION CONTACT: William R. Lake, Division Administrator, Federal Highway Administration, Box 50206, Honolulu, Hawaii 96850.

SUPPLEMENTARY INFORMATION: The FHWA, in cooperation with the Hawaii Department of Transportation, will prepare an EIS on a proposal to improve Kahekili Highway (FAP 83) in Honolulu, Hawaii. The proposed improvement would involve the widening of the existing FAP 83 between Kamehameha Highway and Likelike Highway for a distance of about 4 miles. Also included in this proposal is the construction of an interchange with Likelike Highway. These improvements are considered necessary to provide for the existing and projected traffic demand.

Alternatives under consideration other than widening the existing roadway include (1) Taking no action and (2) improving alternate corridors.

A Notice describing the proposed action has been sent by the Hawaii Department of Transportation, to appropriate Federal, State, and local agencies, and to private and community organizations and citizens who have previously expressed interest in this proposal. A public hearing will be scheduled. The draft EIS will be available for public and agency review and comment. No formal scoping meeting is planned at th is time.

To ensure that the full range of issues related to this proposed action are addressed and all significant issued identified, comments and suggestions are invited from all interested parties. Comments or questions concerning this proposed action and the EIS should be directed to the FHWA at the address provided above.

William R. Lake,

Division Administrator, Honolulu, Hawaii.

Research and Special Programs Administration

Grants and Denials of Applications for Exemptions

AGENCY: Research and Special Programs Administration, DOT.

ACTION: Notice of grants and denials of applications for exemptions.

SUMMARY: In accordance with the procedures governing the application for, and the processing of, exemptions from the Department of Transportation's Hazardous Materials Regulations (49 CFR Part 107, Subpart B), notice is hereby given of the exemptions granted in June 1987. The modes of transportation involved are identified by a number in the "Nature of Application" portion of the table below as follows: 1—Motor vehicle, 2—Rail freight, 3—Cargo vessel, 4—Cargo-only aircraft, 5—Passenger-carrying aircraft. Application numbers prefixed by the letters EE represent applications for Emergency Exemptions.

RENEWAL AND PARTY TO EXEMPTIONS

Application No	Exemption No	Applicant	Regulation(s) affected	Nature of exemption thereof
2582-X	DOT-E 2582	Ozark-Mahoning Co., Tulsa, OK	49 CFR 173, 175.3, Subparts D, E, F, G	To authorize shipment of certain hazardous materials in cylinders made in compliance with DOT Specification 3E1800, with certain exceptions (modes 1, 2, 3, 4)
3600-X	DOT-E 3600	U.S. Department of Defense, Falls Church, VA	49 CFR 172.101, 173.87, 172.300	To authorize shipment of Lance rocket engines in specific configurations which contain Class B and Class C explosives. (modes 1, 2)
4453-P	DOT-E 4453	Quick Supply Co., Des Moines, IA	49 CFR 173.114a(h)(3), 172.101, 176.83, 176.415	To authorize use of a non-DOT specification bulk, hopper-type tank, for transportation of blasting agent, n.o.s., or ammonium nitrate-fuel oil mixtures. (modes 1, 3)
4453-X	DOT-E 4453	ECONEXPRESS, Inc., Wheaton, IL	49 CFR 173.114a(h)(3), 172.101, 176.83, 176.415.	To authorize use of a non-DOT specification bulk, hopper-type tank, for transportation of blasting agent, n.o.s., or ammonium nitrate-fuel oil mixtures. (modes 1, 3).
4884-X	DOT-E 4884	Union Carbide Corp., Danbury CT	49 CFR 173.302(a)(1), 175.3, 178.61, 173.3a, 173.304, 173.119(m), 173.136, 173.247, 173.251.	To authorize shipment of Boron trichloride and silicon chloride, corrosive materials, and trichlorosilane, a flammable liquid in Type 304 or Type 316 stainless steel cylinders. (modes 1, 2, 3, 4, 5)
6712-X	DOT-E 6712	Air Products and Chemicals, Inc., Allentown, PA	49 CFR 173.34(e)(15)(i)	To authorize shipment of certain flammable and nonflammable gases in DOT Specification 3A or 3AA cylinders or ICC-3, 3A or 3AA cylinders. (modes 1, 2, 3, 4, 5).
6752-X	DOT-E 6752	ATOCHEM, Paris, France	49 CFR 173.304(a)(2), 173.301(d)(3)	To authorize use of DOT Specification 3A, 3AA, 3AX, 3AAX or 3T cylinders to form part of a tube trailer or tube bank, for transportation of a liquefied flammable compressed gas. (modes 1, 2, 3)
7051-P	DOT-E 7051	Aldrich Chemical Co., Inc., Milwaukee, WI	49 CFR 173.246(a), 175.3	To authorize use of non-DOT specification Teflon bottles overpacked with either a DOT Specification 12A or 12B fiberboard box to transport a corrosive liquid. (modes 1, 4).
7052-P	DOT-E 7052	Teledyne Systems Co., Northridge, CA	49 CFR 172.101, 175.3, 172.420	To authorize shipment of batteries containing lithium and other materials, classed as a flammable solids. (modes 1, 2, 3, 4).
7605-X	DOT-E 7605	U.S. Department of Defense, Falls Church, VA.	49 CFR 173.87, 173.92, 173.101, 173.102, 173.113, 175.3, 176.83, 177.848	To authorize transport of certain explosives contained in a partially dis-assembled aircraft or canopy assembly. (modes 1, 3, 4).
7835-X	DOT-E 7835	Lincoln Big Three, Inc., Baton Rouge, LA.	49 CFR 177.848, Part 107 Appen. B(1)	To authorize transport of cylinders bearing the flammable gas label, the oxidizer label, the flammable liquid label, the corrosive label or the poison gas label and tank car tanks bearing the poison gas label on the same motor vehicle. (mode 1).
7835-X	DOT-E 7835	Scott Specialty Gases, Plumsteadville, PA	49 CFR 177.848, Part 107 Appen. B(1)	To authorize transport of cylinders bearing the flammable gas label, the oxidizer label, the flammable liquid label, the corrosive label or the poison gas label and tank car tanks bearing the poison gas label on the same motor vehicle. (mode 1).
8214-X	DOT-E 8214	Morton Thiokol, Incorporated, Ogden, UT	49 CFR 173.153, 173.154, 175.3	To authorize transport of inflators and modules in passive restraint systems used in automobiles as flammable solids, n.o.s. (modes 1, 2, 3, 4)
8215-X	DOT-E 8215	Olin Corp., East Alton, IL	49 CFR 173.60, 173.74, 173.78, 173.93, 173.101, 173.107.	To authorize shipment of certain identified Class A, B, and C explosives, in non-DOT specification containers. (modes 1, 2)
8225-X	DOT-E 8225	Hoover Group, Inc., Beatrice, NE	49 CFR 173.266, Part 173, Subpart F, 173.119, 173.256.	To authorize manufacture, marking and sale of non-DOT specification rotationally molded polyethylene portable tanks, for transportation of corrosive liquids, flammable liquids or an oxidizer. (modes 1, 2, 3).
8255-X	DOT-E 8255	Applied Companies, San Fernando, CA	49 CFR 173.302, 175.3	To authorize manufacture, marking and sale of nonreusable (nonrefillable) non-DOT specification welded steel cylinders, for shipment of certain nonflammable gases. (modes 1, 2, 4)
8256-X	DOT-E 8256	E. I. du Pont de Nemours & Company, Inc., Wilmington, DE.	49 CFR 173.273(a)(4), 174.3, 179.102-16, 179.202-13	To authorize shipment of stabilized sulfur trioxide in DOT Specification 105A100W and 111A100W2 tank cars equipped with standpipe electrical heaters and a modified safety relief device. (mode 2).
8554-P	DOT-E 8554	Quick Supply Co., Des Moines, IA	49 CFR 173.93, 173.114a, 173.154	To authorize transport of propellant explosives, blasting agents and oxidizers, in a DOT Specification MC-306, MC-307 and MC-312 cargo tanks. (mode 1).
8667-X	DOT-E 8667	Federal Emergency Management Agency, Washington, DC.	49 CFR 173.416, 175.3	To authorize use of CDV-794 calibrators instead of DOT Specification or Nuclear Regulatory Commission certified packages, for shipment of radioactive materials. (modes 1, 3, 4).
8684-X	DOT-E 8684	Great Lakes Chemicals Corporation, El Dorado, AR	49 CFR 173.315(a)(1), 178.337(1)(c)(2)(ii)	To authorize use of DOT Specification MC-331 cargo tanks equipped with a manway cover not fully complying with 49 CFR 178.337-1(c)(2)(ii), for transportation of nonflammable gases. (mode 1)
8706-X	DOT-E 8706	Petro-Steel Division of Prairie State Equipment, Sioux Falls, SD.	49 CFR 173.119(a), 173.245(a), 178.340-7, 178.342-5, 178.343-5, 173.119(m), 173.346(a)	To authorize manufacture, marking and sale of non-DOT specification cargo tanks complying generally with DOT Specification MC-307/MC-312 except for bottom outlet valve variations for transportation of flammable or corrosive waste liquids or semi-solids (mode 1)
8723-P	DOT-E 8723	Explosives Supply Company, Inc., Shirley, MA.	49 CFR 173.114a(h)(3), 172.101, 176.83, 176.415.	To authorize use of non-DOT specification motor vehicles and portable tanks, for bulk shipment of certain blasting agents. (modes 1, 3)
8723-P	DOT-E 8723	A.E. Sibley, Inc., Middletown, CT	49 CFR 173.114a(h)(3), 172.101, 176.83, 176.415.	To authorize use of non-DOT specification motor vehicles and portable tanks, for bulk shipment of certain blasting agents. (modes 1, 3).
8723-P	DOT-E 8723	Falconi Construction, Inc., dba Alpha Explosives, Lincoln, CA.	49 CFR 173.114a(h)(3), 172.101, 176.83, 176.415.	To authorize use of non-DOT specification motor vehicles and portable tanks, for bulk shipment of certain blasting agents. (modes 1, 3).
8763-X	DOT-E 8763	Liquid Air Corp., San Francisco, CA	49 CFR 173.316(a), 173.315(a)	To authorize use of non-DOT specification vacuum insulated cargo tanks for shipment of liquefied hydrogen. (mode 1).
8924-X	DOT-E 8924	Kane Closures Inc., Westfield, NJ	49 CFR 173.119, 178.118-6 ftnte 3-(1, 173.128	To authorize manufacture, marking and sale of non-DOT steel drums complying with DOT-17H, except for § 178.118-6, Footnote 3-(1)—there will be at least one corrugation in the removable head near the periphery and the head is durablymarked "18"—for shipment of traffic paint. (mode 1).
8978-P	DOT-E 8978	Yardney Electric Corp., Pawcatuck, CT	49 CFR 172.101, 175.3	To authorize transport of lithium cells containing more than 12 but not more than 50 grams of lithium metal, in non-DOT specification, non-reusable, open head, steel drums. (modes 1, 2, 3, 4).

RENEWAL AND PARTY TO EXEMPTIONS—Continued

Application No.	Exemption No.	Applicant	Regulation(s) affected	Nature of exemption thereof
8988-X	DOT-E 8988	GOEX, Inc., Cleburne, TX	49 CFR 172.101, 173.110, 173.80, 175.30.	To authorize transport of charged oil well guns as Class C explosive when the net weight of explosive material in the vehicle or vessel does not exceed 200 pounds. (modes 1, 3, 4).
8998-X	DOT-E 8998	Oil-Air Industries, Inc., Brookshire, TX	49 CFR 173.302(a)(1), 175.3	To authorize shipment of nitrogen in hydraulic accumulators (modes 1, 2, 3, 4).
9001-X	DOT-E 9001	Chesterfield Cylinder Company, Inc., Huntingdon Valley, PA.	49 CFR 178.45, 173.301, 173.302, 173.304, 175.3.	To authorize use of a non-DOT specification cylinder complying in part with DOT Specification 3T, for transportation of certain flammable and nonflammable gases. (modes 1, 2, 3, 4)
9001-X	DOT-E 9001	T. I. Chesterfield, Ltd., Derbyshire, England.	49 CFR 178.45, 173.301, 173.302, 173.304, 175.3.	To authorize use of a non-DOT specification cylinder complying in part with DOT Specification 3T, for transportation of certain flammable nonflammable gases. (modes 1, 2, 3, 4).
9004-X	DOT-E 9004	Metric Corp., Tulsa, OK	49 CFR 173.119, 173.304, 173.315	To authorize manufacture, marking and sale of non-DOT specification containers, for transportation of flammable liquids and flammable gases. (mode 1).
9041-X	DOT-E 9041	IRECO Inc., Salt Lake City, UT	49 CFR 173.100(bb), 175.30	To authorize transport of explosive devices as detonating fuzes, in aluminum trays, packed in a DOT Specification 12H fiberboard box. (modes 1, 4).
9143-X	DOT-E 9143	McCarthy Tank and Steel Co., Bakersfield, CA.	49 CFR 173.119(a), (m), 173.245(a), 173.346(a), 178.340-7, 178.342-5, 173.343-5.	To authorize manufacture, marking and sale of non-DOT specification cargo tanks complying in general with DOT Specification MC-307/312 except for bottom outlet valve variations for shipment of waste liquids or semi-solids, classed as flammable, corrosive or poison B. (mode 1).
9275-P	DOT-E 9275	DuPont Pharmaceuticals, Inc., Waukegan, IL.	49 CFR Parts 100 through 199	To authorize exceptions to specification packaging, marking and labeling requirements for certain ethyl alcohol solutions. (modes 1, 2, 3, 4, 5).
9275-X	DOT-E 9275	Fritzsche, Dodge & Olcott, Inc., New York, NY.	49 CFR Parts 100 through 199	To authorize exceptions to specification packaging, marking and labeling requirements for certain ethyl alcohol solutions. (modes 1, 2, 3, 4, 5).
9275-X	DOT-E 9275	Sterling Drug, Inc., New York, NY	49 CFR Parts 100 through 199	To authorize exceptions to specification packaging, marking and labeling requirements for certain ethyl alcohol solutions. (modes 1, 2, 3, 4, 5).
9275-X	DOT-E 9275	The Upjohn Co., Kalamazoo, MI	49 CFR Parts 100 through 199	To authorize exceptions to specification packaging, marking and labeling requirements for certain ethyl alcohol solutions. (modes 1, 2, 3, 4, 5).
9275-X	DOT-E 9275	Warner-Lambert Co., Morris Plains, NJ	49 CFR Parts 100 through 199	To authorize exceptions to specification packaging, marking and labeling requirements for certain ethyl alcohol solutions. (modes 1, 2, 3, 4, 5).
9275-X	DOT-E 9275	Merrell Dow Pharmaceuticals, Inc., Cincinnati, OH.	49 CFR Parts 100 through 199	To authorize exceptions to specification packaging, marking and labeling requirements for certain ethyl alcohol solutions. (modes 1, 2, 3, 4, 5).
9275-X	DOT-E 9275	The Proctor & Gamble Distribution Co., Cincinnati, OH.	49 CFR Parts 100 through 199	To authorize exceptions to specification packaging, marking and labeling requirements for certain ethyl alcohol solutions. (modes 1, 2, 3, 4, 5).
9275-X	DOT-E 9275	Ortho Pharmaceutical Corp., Raritan, NJ	49 CFR Parts 100 through 199	To authorize exceptions to specification packaging, marking and labeling requirements for certain ethyl alcohol solutions. (modes 1, 2, 3, 4, 5).
9275-X	DOT-E 9275	Amway Corp., Ada, MI	49 CFR Parts 100 through 199	To authorize exceptions to specification packaging, marking and labeling requirements for certain ethyl alcohol solutions. (modes 1, 2, 3, 4, 5).
9275-X	DOT-E 9275	Firmenich, Inc., Princeton, NJ	49 CFR Parts 100 through 199	To authorize exceptions to specification packaging, marking and labeling requirements for certain ethyl alcohol solutions. (modes 1, 2, 3, 4, 5).
9275-X	DOT-E 9275	Mary Kay Cosmetics, Dallas, TX	49 CFR Parts 100 through 199	To authorize exceptions to specification packaging, marking and labeling requirements for certain ethyl alcohol solutions. (modes 1, 2, 3, 4, 5).
9275-X	DOT-E 9275	Carter-Wallace, Inc., Cranbury, NJ	49 CFR Parts 100 through 199	To authorize exceptions to specification packaging, marking and labeling requirements for certain ethyl alcohol solutions. (modes 1, 2, 3, 4, 5).
9275-X	DOT-E 9275	A. H. Robins Co., Richmond, VA	49 CFR Parts 100 through 199	To authorize exceptions to specification packaging, marking and labeling requirements for certain ethyl alcohol solutions. (modes 1, 2, 3, 4, 5).
9275-X	DOT-E 9275	Nowell Corp., Hunt Valley, MD	49 CFR Parts 100 through 199	To authorize exceptions to specification packaging, marking and labeling requirements for certain ethyl alcohol solutions. (modes 1, 2, 3, 4, 5).
9275-X	DOT-E 9275	Avon Products, Inc., New York, NY	49 CFR Parts 100 through 199	To authorize exceptions to specification packaging, marking and labeling requirements for certain ethyl alcohol solutions. (modes 1, 2, 3, 4, 5).
9275-X	DOT-E 9275	DuPont Critical Care, Inc., Waukegan, IL	49 CFR Parts 100 through 199	To authorize exceptions to specification packaging, marking and labeling requirements for certain ethyl alcohol solutions. (modes 1, 2, 3, 4, 5).
9275-X	DOT-E 9275	Universal Fragrance Corp., South Plainfield, NJ.	49 CFR Parts 100 through 199	To authorize exceptions to specification packaging, marking and labeling requirements for certain ethyl alcohol solutions. (modes 1, 2, 3, 4, 5).
9275-X	DOT-E 9275	Liz Claiborne Cosmetics, North Bergen, NJ.	49 CFR Parts 100 through 199	To authorize exceptions to specification packaging, marking and labeling requirements for certain ethyl alcohol solutions. (modes 1, 2, 3, 4, 5).
9275-X	DOT-E 9275	Max Factor & Co., Oxford, NC	49 CFR Parts 100 through 199	To authorize exceptions to specification packaging, marking and labeling requirements for certain ethyl alcohol solutions. (modes 1, 2, 3, 4, 5).
9275-X	DOT-E 9275	Halston Fragrances, Oxford, NC	49 CFR Parts 100 through 199	To authorize exceptions to specification packaging, marking and labeling requirements for certain ethyl alcohol solutions. (modes 1, 2, 3, 4, 5).
9416-X	DOT-E 9416	CIBA-GEIGY Corp., Ardsley, NY	49 CFR 173.359	To authorize shipment of organophosphorous pesticide, liquid, in a DOT Specification 12P fiberboard box containing two inside DOT Specification 2U polyethylene containers of 2-½ gallons capacity. (mode 1)
9440-X	DOT-E 9440	Hoover Group, Inc., Beatrice, NE	49 CFR Part 173, Subpart F, 173.119, 173.256, 173.266, 178.19, 178.253.	To authorize an optional design of a polyethylene portable tank in metal frame for shipment of certain corrosive and flammable liquids and an oxidizer. (modes 1, 2, 3).

RENEWAL AND PARTY TO EXEMPTIONS—Continued

Application No.	Exemption No.	Applicant	Regulation(s) affected	Nature of exemption thereof
9571–P	DOT–E 9571	United States Department of Interior, Pittsburgh, PA.	49 CFR Parts 100 through 177	To authorize transport of not more than 5 grams of an approved or unapproved explosive in a special packaging essentially without regulation. (modes 1, 2, 3, 4, 5).
9683–X	DOT–E 9683	Meter Engineers, Inc., Wichita, KS	49 CFR 173.119, 173.304, 173.315	To authorize manufacture, marking and sale of non-DOT specification containers described as mechanical displacement meter provers mounted on a truck chassis or trailer. (mode 1).

NEW EXEMPTIONS

Application No.	Exemption No.	Applicant	Regulation(s) affected	Nature of exemption thereof
9697–N	DOT–E 9697	E. I. du Pont de Nemours & Co., Inc., Wilmington, DE.	49 CFR 173.31(c)	To authorize use of DOT Specification 105A300W and 105A500W tank car tanks with the tank overdue for retesting, for a one-time shipment of a waste corrosive liquid. (Mode 2.)
9710–N	DOT–E 9710	Union Carbide Corp., Danbury, CT	49 CFR 173.318(g)	To authorize abbreviated marking of the one-way travel time on the tank and on shipping papers. (Modes 1, 2, and 3.)
9728–N	DOT–E 9728	Smith Systems, A Moorco Operation, Corpus Christi, TX.	49 CFR 173.119, 173.305, 173.315	To authorize manufacture, marking and sale of non-DOT specification containers described as mechanical displacement meter provers mounted on a truck chassis or trailer. (Mode 1.)
9730–N	DOT–E 9730	Air Products and Chemicals, Inc., Allentown, PA.	49 CFR 172.101	To authorize use of super-insulated DOT Specification MC–338 cargo tank for transportation of flammable cryogenic liquid. (Mode 3.)
9735–N	DOT–E 9735	Hapag-Lloyd, AG Hamburg, West Germany.	49 CFR 176.30(a)	To authorize the Dangerous Cargo Manifest on cargo vessels owned and operated by Hapag-Lloyd AG to be retained in a location other than on or near the bridge of the vessel while the vessel is in port. (Mode 3.)
9746–N	DOT–E 9746	Air Products and Chemicals, Inc., Allentown PA.	49 CFR 173.264(b)(1)	To authorize use of DOT Specification 3BN cylinders for transportation of hydrogen fluoride, anhydrous. (Mode 1.)
9775–N	DOT–E 9775	Essex Environmental Industries, Inc., Hurst, TX.	49 CFR 173.3(c)	To authorize manufacture, marking and sale of a polyethylene, removable head salvage drum of 85-gallon for overpacking of damaged or leaking packages of hazardous materials of no greater than 55-gallon, or for packing hazardous materials that have spilled or leaked, for repackaging or disposal. (Modes 1, 2.)

EMERGENCY EXEMPTIONS

Application No.	Exemption No.	Applicant	Regulation(s) affected	Nature of exemption thereof
EE 6614–X	DOT–E 6614	All Pure Chemical Co., Tracy, CA	49 CFR 173.263(a)(28), 173.277(a)(6)	To authorize use of non-DOT specification polyethylene bottles, packed inside a high density polyethylene box, for transportation of certain corrosive liquids. (Mode 1.)
EE 7648–X	DOT–E 7648	Sunwest Aviation, Roy, UT	49 CFR 172.204(c), 172.300(a), 172.400(a), 173.91(a), 173.91(l), 175.3, 175.35(a).	To authorize carriage of aerial illuminating flares for testing purposes in cargo-only aircraft. (Mode 4.)
EE 8518–P	DOT–E 8518	International Technology Corp., Torrance, CA.	49 CFR 173.119 (a), (m), 173.245(a), 178.340–7, 178.342–5, 178.343–5, 173.36(a).	To authorize use of non-DOT specification cargo tanks designed and constructed in full compliance with DOT Specification MC–307 or MC–312 except for bottom outlet valve variations, for transportation of flammable liquids or corrosive or poison B materials. (Mode 1.)
EE 8723–P	DOT–E 8723	Harrison Explosives, Inc., Allentown, PA	49 CFR 173.114a(h)(3), 172.101, 176.83, 176.415.	To authorize use of non-DOT specification motor vehicles and portable tanks, for bulk shipment of certain blasting agents. (Modes 1 and 3.)
EE 9776–N	DOT–E 9776	Lithium Corp. of America, Gastonia, NC	49 CFR Part 107, Subpart B, App. B(1), 173.206.	To authorize a one time shipment of approximately 782 non-DOT specification, 30 gallon capacity, metal drums containing lithium metal. (Mode 1.)
EE 9794–N	DOT–E 9794	Anglo Airlines Ltd., Crainley, W. Sussex, England.	49 CFR 172.101	To authorize transport of rocket ammunition with explosive projectile, Class A explosive, in cargo-only aircraft, although it is forbidden for transportation by air. (Mode 4.)
EE 9795–N	DOT–E 9795	Piedmont Airlines, Winston-Salem, NC	49 CFR Part 107, Appendix B, Part 172, Subparts C, D, E, 173.21, 173.118, 175.30, 175.85.	To authorize carriage of small quantities of a flammable liquid in safety lamps in the passenger cabin of an aircraft. (Mode 5.)
EE 9796–N	DOT–E 9796	Heavy Cargo Airlines Ltd., Stansted, Essex, England.	49 CFR 172.101	To authorize a one time shipment of rocket ammunition with explosive projectile, Class A explosive, cargo-only aircraft, although it is forbidden for transportation by air. (Mode 5.)
EE 9798–N	DOT–E 9798	Societe Euromissile, Fontenay-aux-Roses, France.	49 CFR 172.101 Column 6(b), 175.30	To authorize shipment of rocket ammunition with explosive projectile, Class A explosive, in cargo-only aircraft, although it is forbidden for transportation by air. (Mode 4.)
EE 9799–N	DOT–E 9799	Southern Air Transport, Miami, FL	40 CFR 172.101 Column 6(b)	To authorize shipment of rocket ammunition with explosive projectile, Class A explosive, and rocket ammunition withinert projectile, Class B explosive, in cargo-only aircraft, although they are forbidden for transportation by air. (Mode 4.)

WITHDRAWAL EXEMPTIONS

Application No.	Applicant	Regulation(s) affected	Nature of exemption thereof
9052–X	Chemical Handling Equipment Co., Inc. Southfied, MI.	49 CFR Part 173, Subpart F, 173.119, 173.125, 178.19, 178.253.	To authorize manufacture, marking and sale of non-DOT specification rotationally molded, cross-linked polyethylene portable tanks, for shipment of corrosive and flammable liquids or an oxidizer. (modes 1, 2, 3)

Denials

9388–P—Request by Gulf Central & Terminal Company Tulsa, OK to authorize an additional loading procedure be allowed to determine the amount of liquefied gas loaded into a tank car denied 06/08/1987.

Issued in Washington, DC, on September 18, 1987.

J. Suzanne Hedgepeth,

Chief, Exemptions Branch, Office of Hazardous Materials Transportation.

Grants and Denials of Applications for Exemptions

AGENCY: Research and Special Programs Administration, DOT.

ACTION: Notice of grants and denials of applications for exemptions.

SUMMARY: In accordance with the procedures governing the application for, and the processing of, exemptions from the Department of Transportation's Hazardous Materials Regulations (49 CFR Part 107, Subpart B), notice is hereby given of the exemptions granted in August 1987. The modes of transportation involved are identified by a number in the "Nature of Application" portion of the table below as follows: 1—Motor vehicle, 2—Rail freight, 3—Cargo vessel, 4—Cargo-only aircraft, 5—Passenger-carrying aircraft. Application numbers prefixed by the letters EE represent applications for Emergency Exemptions.

RENEWAL AND PARTY TO EXEMPTIONS

Application No.	Exemption No.	Applicant	Regulation(s) affected	Nature of exemption thereof
2462–P	DOT–E 2462	ETI Explosives Technologies International Inc., Wilmington, DE.	49 CFR 173.73(b)	To authorize shipment of certain lead azide in glass bottles overpacked in non-DOT specification wooden boxes. (Mode 1.)
2582–X	DOT–E 2582	Matheson Gas Products, Inc. Secaucus, NJ.	49 CFR Part 173, 175.3, Subparts D, E, F, G.	To authorize shipment of certain hazardous materials in cylinders made in compliance with DOT specification 3E1800, with certain exceptions. (Modes 1, 2, 3, and 4.)
4554–X	DOT–E 4354	Vanchem, Inc. Lockport, NY	49 CFR 173.119(m), 173.245, 173.288(d), 173.288(e).	To authorize shipment of chloroformates in DOT Specification 6D or 37M cylindrical steel overpack with an inside DOT Specification 2S, 2SL or 2T polyethylene container. (Modes 1, 2, and 3.)
4453–P	DOT–E 4453	Brandywine Explosives & Supply, Inc., Lexington, KY.	49 CFR 173.114a(h)(3), 172.101, 176.83, 176.415.	To authorize use of a non-DOT specification bulk, hopper-type tank, for transportation of blasting agent, n.o.s., or ammonium nitrate-fuel oil mixtures. (Modes 1, 3.)
4453–P	DOT–E 4453	Landshaw Explosives, Inc., New Brunfels, TX.	49 CFR 173.114a(h)(3), 172.101, 176.83, 176.415.	To authorize use of a non-DOT specification bulk, hopper-type tank, for transportation of blasting agent, n.o.s., or ammonium nitrate-fuel oil mixtures. (Modes 1, 3.)
4453–X	DOT–E 4453	E.I. du Pont de Nemours & Co., Inc., Wilmington, DE.	49 CFR 173.114a(h)(3), 172.101, 176.83, 176.415.	To authorize use of a non-DOT specification bulk, hopper-type tank, for transportation of blasting agent, n.o.s., or ammonium nitrate-fuel oil mixtures. (Modes 1, 3.)
4453–X	DOT–E 4453	Maynes Explosives Co., Lee's Summit, MO.	49 CFR 173.114a(h)(3), 172.101, 176.83, 176.415.	To authorize use of a non-DOT specification bulk, hopper-type tank, for transportation of blasting agent, n.o.s., or ammonium nitrate-fuel oil mixtures. (Modes 1, 3.)
4453–X	DOT–E 4453	Wampum Hardware Co., New Galilee, PA	49 CFR 173.114a(h)(3), 172.101, 176.83, 176.415.	To authorize use of a non-DOT specification bulk, hopper-type tank, for transportation of blasting agent, n.o.s., or ammonium nitrate-fuel oil mixtures. (Modes 1, 3.)
4453–P	DOT–E 4453	ETI Explosives Technologies International Inc., Wilmington, DE.	49 CFR 173.114a(h)(3), 172.101, 176.83, 176.415.	To authorize use of a non-DOT specification bulk, hopper-type tank, for transportation of blasting agent, n.o.s., or ammonium nitrate-fuel oil mixtures. (Modes 1, 3.)
4453–X	DOT–E 4453	Strawn Explosives, Inc., Dallas, TX	49 CFR 173.114a(h)(3), 172.101, 176.83, 176.415.	To authorize use of a non-DOT specification bulk, hopper-type tank, for transportation of blasting agent, n.o.s., or ammonium nitrate-fuel oil mixtures. (Modes 1, 3.)
4453–X	DOT–E 4453	A. M. Contracting, Grove City, PA	49 CFR 173.114a(h)(3), 172.101, 176.83, 176.415.	To authorize use of a non-DOT specification bulk, hopper-type tank, for transportation of blasting agent, n.o.s., or ammonium nitrate-fuel oil mixtures. (Modes 1, 3.)
5967–X	DOT–E 5967	Rocket Research Co., Redmond, WA	49 CFR 173.304(a)(2), 175.3, 178.44	To authorize use of non-DOT specification cylinders conforming in part with DOT Specification 3HT, for shipment of a nonflammable gas. (Modes 1, 2, 4, and 5.)
6816–X	DOT–E 6816	U.S. Department of Defense, Falls Church, VA.	49 CFR 173.53(p)	To authorize shipment of completely assembled liquid and solid fueled missiles in packaging prescribed in 173.57(a). (Modes 1, 2, and 3.)
6902–X	DOT–E 6902	Great Lakes Chemical Corp., El Dorado, AR.	49 CFR 173.314(c), 179.300–15	To authorize shipment of a liquefied nonflammable compressed gas, in a modified DOT Specification 110A800W multi-unit tank car tank. (Modes 1, 2.)
6974–X	DOT–E 6974	Tavco, Inc., Chatsworth, CA	49 CFR 173.302(a)(1), 178.42, 175.3	To authorize use of non-DOT specification cylinders, for transportation of certain nonliquified compressed gases. (Modes 1, 2, and 4.)
7060–X	DOT–E 7060	Federal Express Corp., Memphis, TN	49 CFR 175.75(a)(3)(ii), 175.702(b)	To authorize carriage of non-fissile radioactive materials aboard cargo-only aircraft when the combined transport index exceeds 50.0 and/or the separation criteria cannot be met. (Mode 4.)
7071–X	DOT–E 7071	Olin Hunt Specialty Products Corp., West Paterson, NJ.	49 CFR 173.245, 172.101, 175.3	To authorize shipment of a certain corrosive liquid, in non-DOT specification polyethylene bottles overpacked in a non-DOT specification single-wall fiberboard box, or DOT Specification 2U polyethylene containers overpacked in a DOT Specification 12P fiberboard box. (Modes 1, 2, 3, and 4.)
7252–P	DOT–E 7252	ETI Explosives Technologies International Inc., Wilmington, DE.	49 CFR 173.93	To authorize transport of Pourvex and Tovex Extra in DOT Specification 17H metal drums. (Modes 1, 3.)
7282–X	DOT–E 7282	MarChem Corp., Maryland Heights, MO	49 CFR 173.315(a)(1)	To authorize use of non-DOT specification steel portable tanks, for shipment of certain mixtures of nonpoisonous, nonflammable compressed gases. (Mode 1.)
7454–P	DOT–E 7454	ETI Explosives Technologies International Inc., Wilmington, DE.	49 CFR 176.83, 176.410(e)(2)	To authorize blastings agent to be stowed in proximity to certain explosives without a bulkhead separating these materials. (Mode 3.)
7455–P	DOT–E 7455	ETI Explosives Technologies International Inc., Wilmington, DE.	49 CFR 176.177(g), 176.177(h), 176.177(n), 176.177(q), 176.177(r), 176.410(e).	To authorize handling and stowage of explosive material in an anchored and unmanned barge. (Mode 3.)
7458–X	DOT–E 7458	Ekohwerks Co., Eastlake, OH	49 CFR 173.304(a)(2), 178.42	To authorize manufacture, marking and sale of non-DOT specification seamless cylinders, for transportation of nonflammable gases (Modes 1, 2, and 3.)

RENEWAL AND PARTY TO EXEMPTIONS—Continued

Application No.	Exemption No.	Applicant	Regulation(s) affected	Nature of exemption thereof
7648-X	DOT-E 7648	Sunwest Aviation, Ogden, UT	49 CFR 172.204(c), 172.300(a), 172.400(a), 173.91(a), 173.91(i) 175.3, 175.35(a).	To authorize carriage of aerial illuminating flares for testing purposes in cargo-only aircraft. (Mode 4.)
7857-X	DOT-E 7857	Makhteshim Darom (Ramat Hovav) Ltd., Beer Sheva, Israel.	49 CFR 173.315	To authorize use of certain non-DOT specification portable tanks, for shipment of certain flammable gases. (Modes 1, 3.)
7972-P	DOT-E 7972	ETI Explosives Technologies International Inc., Wilmington, DE	49 CFR 172.504	To authorize transport of limited quantities of explosive in a special shipping container without placarding the vehicle. (Mode 1.)
8065-X	DOT-E 8065	U.S. Department of Energy, Washington, DC	49 CFR 173.65, 173.93, 173.94	To authorize shipment of certain Class A and B explosives, in non-DOT specification plywood boxes. (Mode 1.)
8084-P	DOT-E 8084	ETI Explosives Technologies International Inc., Wilmington, DE.	49 CFR 173.65(a)(5)	To authorize transport of Class A explosives containing more than 5% of moisture in plastic tubes, overpacked in DOT Specification wooden or fiberboard boxes. (Modes 1, 2, and 3.)
8141-X	DOT-E 8141	Altus Corp., San Jose, CA	49 CFR 172.101, 173.206, 173.247	To authorize transport of individual cells and modules consisting of three cells containing lithium metal and thionyl chloride in non-DOT specification wooden boxes. (Modes 1, 3.)
8195-X	DOT-E 8195	McDonnell Douglas Corp., Saint Louis, MO.	49 CFR 173, Subparts D, F, H, 173.6(b)(3), 175.3.	To authorize use of non-DOT specification metal drums as outside containers in lieu of prescribed DOT specification fiberboard and wood containers, for shipments of flammable liquids, corrosive materials, and Class B poisons subject to 49 CFR 173.6(b)(3) (Modes 1, 2, 4, and 5.)
8214-X	DOT-E 8214	Mercedes-Benz of North America, Inc., Montvale, NJ.	49 CFR 173.153, 173.154, 175.3	To authorize transport of inflators and modules in passive restraint systems used in automobiles as flammable solids, n.o.s. (Modes 1, 2, 3, and 4.)
8230-X	DOT-E 8230	Seastar Chemicals, Division of Seastar Instruments, Sidney, B.C., Canada.	49 CFR 173.268(b)(6), 173.269(a)(4)	To authorize shipment of certain oxidizers, in non-DOT specification inside containers packed in DOT Specification 33A single bottle case. (Modes 1, 2, 3, and 4.)
8278-X	DOT-E 8278	Maintenance Mechanical Corp., Houston, TX.	49 CFR 173.119, 173.304, 173.315	To authorize manufacture, marking and sale of non-DOT specification containers, for shipment of flammable gases and flammable liquids. (Mode 1.)
8549-X	DOT-E 8549	United Pumping Service, Inc., City of Industry, CA.	49 CFR 178.340-7, 178.342-5, 178.343-5, 173.119(m), 173.119(a), 173.245(a), 173.346(a).	To authorize manufacture, marking and sale of certain non-DOT specification cargo tanks complying with DOT Specification MC-307/MC-312 except for bottom outlet valve variations, for transportation of liquid and semi-solid waste materials. (Mode 1.)
8554-P	DOT-E 8554	ETI Explosives Technologies International Inc., Wilmington, DE.	49 CFR 173.93, 173.114a, 173.154	To authorize transport of propellant explosives, blasting agents and oxidizers, in a DOT Specification MC-306, MC-307 and MC-312 cargo tanks. (Mode 1.)
8579-P	DOT-E 8579	ETI Explosives Technologies International Inc., Wilmington, DE.	49 CFR 176.410(d)	To authorize shipment of ammonium nitrate fertilizer in multiple-wall paper bags or plastic bags stacked on wooden pallets aboard cargo vessel exempt from spacing criteria. (Mode 3.)
8606-X	DOT-E 8606	Makhteshim Darom (Ramat Hovav) Ltd., Beer Sheva, Israel.	49 CFR 173.315	To authorize shipment of monomethylamine in non-DOT Specification IMO Type 5 portable tanks. (Modes 1, 3.)
8645-X	DOT-E 8645	A.M. Contracting, Groove City, PA	49 CFR 173.154(a)(18)	To authorize bulk shipment of a thickened solution of an oxidizing material, commercially designated as "HEF", in DOT Specification MC-307 or MC-311 insulated cargo tanks at ambient temperature. (Mode 1.)
8723-P	DOT-E 8723	Winchester Building Supply Co., Inc., Winchester, VA.	49 CFR 173.114a(h)(3), 172.101, 176.83, 176.415.	To authorize use of non-DOT specification motor vehicles and portable tanks, for bulk shipment of certain blasting agents. (Modes 1, 3.)
8723-P	DOT-E 8723	Savage Brothers Inc., American Fork, UT	49 CFR 173.114a(h)(3), 172.101, 176.83, 176.415.	To authorize use of non-DOT specification motor vehicles and portable tanks, for bulk shipment of certain blasting agents. (Modes 1, 3.)
8723-P	DOT-E 8723	Dama Inc., Roanoke, VA	49 CFR 173.114a(h)(3), 172.101, 176.83, 176.415.	To authorize use of non-DOT specification motor vehicles and portable tanks, for bulk shipment of certain blasting agents. (Modes 1, 3.)
8723-P	DOT-E 8723	Explosives Engineers, Inc., Sparks, MD	49 CFR 173.114a(h)(3), 172.101, 176.83, 176.415.	To authorize use of non-DOT specification motor vehicles and portable tanks, for bulk shipment of certain blasting agents. (Modes 1, 3.)
8723-P	DOT-E 8723	Cherokee Explosives, Inc. Plantsville, CT	49 CFR 173.114a(h)(3), 172.101, 176.83, 176.415.	To authorize use of non-DOT specification motor vehicles and portable tanks, for bulk shipment of certain blasting agents. (Modes 1, 3.)
8742-X	DOT-E 8742	Cusco Fabricators Ltd., Richmond Hill, Ont., Can.	49 CFR 173.119(a), 173.245(a), 173.346(a), 178.340-7, 178.342-5, 178.343-5, 173.119(m).	To authorize manufacture, marking and sale of non-DOT specification cargo tanks complying generally with DOT Specification MC-307/MC-312 except for bottom outlet valve variations, for transportation of flammable or corrosive waste liquids or semi-solids. (Mode 1.)
8812-X	DOT-E 8812	The Protectoseal Co., Bensenville, IL	49 CFR 173.119, 178.89	To authorize Naphtha, Turpentine, Butyl and Ethyl alcohol as additional commodities for shipment in 5 gallon containers similar to DOT Specification 5L. (Mode 1.)
8938-X	DOT-E 8938	Cryogenic Services, Inc., Canton, GA	49 CFR 173.304(a), 175.3	To authorize an additional cylinder design for shipment of certain refrigerated liquids. (Modes 1, 2, 3, and 4.)
9030-X	DOT-E 9030	LND, Inc., Oceanside, NY	49 CFR 173.302, 175.3	To authorize use of non-DOT specification, metal, single trip, inside container, for shipment of a nonflammable gas. (Modes 1, 2, 3, 4, and 5.)
9048-X	DOT-E 9048	Brooks Instrument Div./Emerson Electric Co., Statesboro, GA.	49 CFR 173.119, 173.304, 173.315	To renew and to authorize flow tubes on mechanical displacement meters to be manufactured with Type 304 and 17-4 PH stainless steel used for shipping flammable liquid or gas, n.o.s. (Mode 1.)
9064-X	DOT-E 9064	Corning Glass Works, Corning, NY	49 CFR 173.245, 173.271, 173.247	To authorize various modification to composite type packaging configuration for the shipment of corrosive liquids, n.o.s. (Modes 1, 3.)
9064-X	DOT-E 9064	Amalgamet Canada—Division of Premetalco, Inc., Toronto, Ontario, Canada.	49 CFR 173.245, 173.271, 173.247	To authorize shipment of corrosive materials, in a glass container placed in a cushioned cylindrical steel overpack, which is then packed in a cushioned plywood box, of which no more than four can be overpacked in a compartmented wooden outer box. (Modes 1, 3.)
9064-X	DOT-E 9064	Corning Glass, Works Corning, NY	49 CFR 173.245, 173.271, 173.247	To authorize shipment of corrosive materials, in a glass container placed in a cushioned cylindrical steel overpack, which is then packed in a cushioned plywood box, of which no more than four can be overpacked in a compartmented wooden outer box. (Modes 1, 3.)

RENEWAL AND PARTY TO EXEMPTIONS—Continued

Application No.	Exemption No.	Applicant	Regulation(s) affected	Nature of exemption thereof
9064-X	DOT-E 9064	Preussag AG Metall Goslar, West Germany.	49 CFR 173.245, 173.271, 173.247	To authorize shipment of corrosive materials, in a glass container placed in a cushioned cylindrical steel overpack, which is then packed in a cushioned plywood box, of which no more than four can be overpacked in a compartmented wooden outer box. (Modes 1, 3.)
9078-X	DOT-E 9078	Monsanto Chemical Co., St. Louis, MO	49 CFR 173.245	To authorize use of DOT Specification 57 stainless steel portable tanks, for transportation of a waste formic acid/phenol mixture. (Mode 1.)
9108-P	DOT-E 9108	ETI Explosives Technologies International Inc., Wilmington, DE.	49 CFR 173.77	To authorize transport of pentaerythrite tetranitrate (PETN) wet with 25% water in a 4 mil polyethylene bag placed in a DOT specification 12H fiberboard box. (Mode 1.)
9110-X	DOT-E 9110	KemaNord, Inc. Columbus, MS	49 CFR 173.163	To authorize shipment of sodium chlorate, in non-DOT specification collapsible polyethylene-lined, woven polypropylene bags. (Modes 1, 2, and 3.)
9181-X	DOT-E 9181	Honeywell, Inc., Horsham, PA	49 CFR 173.21, 173.206, 173.247	To authorize transport of lithium metal and a thionyl chloride solution in the same non-DOT specification stainless steel vessel. (Mode 1.)
9617-P	DOT-E 9617	ETI Explosives Technologies International Inc., Wilmington, DE.	49 CFR 177.848(f), Part 107 Append B(1)	To authorize transport of a specially defined detonating cord on the same motor vehicle with Class A and C detonators. (Mode 1.)
9623-P	DOT-E 9623	ETI Explosives Technologies International Inc., Wilmington, DE.	49 CFR 177.835(c)(3)	To authorize transport of a blasting agent or an oxidizer in a DOT Specification MC-306 or MC-307 cargo tank with a storage box containing Class A explosives mounted directly behind the tractor cab. (Mode 1.)
9623-P	DOT-E 9623	Woodard Explosives, Inc., Albuquerque, NM.	49 CFR 177.835(c)(3)	To authorize transport of a blasting agent or an oxidizer in a DOT Specification MC-306 or MC-307 cargo tank with a storage box containing Class A explosives mounted directly behind the tractor cab. (Mode 1.)
9632-X	DOT-E 9632	Eurotainer S.A., Paris, France	49 CFR 173.315, 178.245	To exclude use of a rupture disk on portable tanks when the lading does not require a combination relief device. (Modes 1, 2, and 3.)

NEW EXEMPTIONS

Application No.	Exemption No.	Applicant	Regulation(s) affected	Nature of exemption thereof
9515-N	DOT-E- 9515	Leake Oil Co., Inc., St. Francisville, LA	49 CFR 173.119, 178.341-5	To authorize shipment of gasoline in a non-DOT specification cargo tank equipped with external self-closing shut off valves. (Mode 1.)
9645-N	DOT-E- 9645	Bonar Rosedale Plastics, Ltd., Lindsay, Ont., Canada.	49 CFR 173, Subpart F, 173.119, 173.256, 173.266, 178.19, 178.253.	To authorize manufacture, marking and sale of non-DOT rotationally molded, cross-linked polyethylene or linear low density polyethylene portable tanks, enclosed within either a protective steel frame or a foam-filled steel reinforced outer cage. (Modes 1, 2.)
9688-N	DOT-E- 9688	GTE Government Systems Corp., Waltham, MA.	49 CFR 173.247	To authorize shipment of thionyl chloride, classed as a corrosive material in non-DOT specification bottles of "Teflon" PFA, ranging in size from 10 to 16 ounces capacity, overpacked in DOT Specification 17H stainless steel drums, not to exceed 54 bottles per drum. (Mode 1.)
9694-N	DOT-E- 9694	All Pure Chemical Co., Inc., Tracy, CA	49 CFR 173.33(f)(9), 173.33(h)(5)(i), 173.315(i)(13).	To authorize use of MC-331 cargo tanks equipped with angle valves and pressure relief valves not presently authorized in the regulations. (Mode 1.)
9715-N	DOT-E- 9715	Pennwalt Corp., Buffalo, NY	49 CFR 173.154(a)(12)	To authorize shipment of dicumylperoxide, dry, or organic peroxide, solid, insider polyethylene bags in quantities of up to 40 pounds, overpacked in a DOT Specification 12B65 corrugated fiberboard box. (Modes 1, 3.)
9717-N	DOT-E- 9717	Mobay Corp., Kansas City, MO	49 CFR 173.119(b),175.3	To authorize shipment of certain flammable liquids in inside containers of up to 1 gallon capacity, overpacked in a DOT Specification 21C fiber drum. (Modes 1, 4.)
9718-N	DOT-E- 9718	Bignier Schmid-Laurent, Ivry Sur Seine, France.	49 CFR 173.315,178.245	To authorize shipment of flammable and nonflammable gases in a non-DOT specification portable tank comparable to DOT Specification 51 portable tanks. (Modes 1, 2, and 3.)
9729-N	DOT-E- 9729	Allied-Signal Inc., Morristown, NJ	49 CFR 173.246(a)(1), 178.61-5	To authorize shipment of corrosive material in stainless steel cylinders complying with requirements of DOT Specification 4BW with specific exceptions. (Modes 1, 2, and 3.)
9731-N	DOT-E- 9731	Richmond Lox Equipment Co., Delphi, IN	49 CFR 173.338-9(c)	To authorize manufacture, marking and sale of MC-338 cargo tanks for shipment of liquid hydrogen with holding time tests performed in a manner other than as prescribed in the regulations. (Mode 1.)
9741-N	DOT-E- 9741	Moura Batteries Co., Inc., Mount Vernon, NY.	49 CFR 173.260(a)(3)	To authorize shipment of batteries palletized and shipped as a unit without means of protection from any superimposed weight. (Modes 1, 2, and 3.)
9742-N	DOT-E- 9742	M1 Engineering Ltd., West Yorkshire, England.	49 CFR 173.353, 178.245	To authorize shipment of methyl bromide liquid in a non-DOT specification portable tank meeting all the requirements of a DOT Specification 51, with exceptions. (Modes 1, 2, and 3.)
9744-N	DOT-E- 9744	Noury Chemicals, Chicago, IL	49 CFR 173.157(a)(5)	To authorize shipment of benzoyl peroxide, wet with at least 30% water, classed as an organic peroxide, in a DOT Specification 12B65 fiberboard box containing a bag with 31.5 pounds of material (dry weight). (Mode 1.)
9752-N	DOT-E- 9752	Ethyl Corp., Baton Rouge, LA	49 CFR 173.354(a)(7)	To authorize shipment of motor fuel antiknock compound, class B poison, in a DOT Specification 12B fiberboard box with inside packaging consisting of an inner metal can, surrounded by vermiculite and then hermetically sealed in an outer metal can. (Modes 1, 3, and 4.)
9756-N	DOT-E- 9756	General Electric Co., Schenectady, NY	49 CFR 173.245b(a)(8)	To authorize a one way shipment of corrosive solids for disposal in four non-DOT specification steel portable tanks. (Mode 1.)
9757-N	DOT-E- 9757	JP Services, Inc., Benicia, CA	49 CFR 173.245b,a)(8)	To authorize shipment of non-DOT specification steel portable tanks containing corrosive solid, n.o.s. to an approved disposal facility. (Mode 1.)
9763-N	DOT-E- 9763	Air Products and Chemicals, Inc., Allentown, PA.	49 CFR 173.302(a), 173.247, 173 3a.	To authorize shipment of certain hazardous materials in DOT Specification 3BN cylinders, a specification cylinder not presently authorized. (Mode 1.)

NEW EXEMPTIONS—Continued

Application No	Exemption No.	Applicant	Regulation(s) affected	Nature of exemption thereof
9780–N	DOT–E– 9780	Majestic Lubricating Co., Tulsa, OK	49 CFR 173.119(a)(27)	To authorize shipment of flammable liquids, n.o.s., classed as flammable liquid, in three DOT Specification 2U polyethylene containers of two-gallon capacity each, overpacked in a DOT Specification 12P corrugated fiberboard box. (Mode 1.)
9782–N	DOT–E– 9782	Grumman Aircraft Systems, Bethpage, NY.	49 CFR 173.206	To authorize shipment of potassium metal in non-DOT specification container. (Modes 1, 2, and 4.)
9783–N	DOT–E– 9783	Helios Container Systems, Addison, IL	49 CFR 173.366, 173.154, 173.164, 173.178, 173.182, 173.217, 173.234, 173.245b.	To authorize manufacture, marking and sale of large, collapsible polyethylene-lined woven polyprepylene bulk bags having a capacity of approximately 2260 pounds each, and top and bottom outlets, for shipment of flammable solids, oxidizing materials, poison B solids and corrosive solids. (Modes 1, 2.)
9790–N	DOT–E–9790	Taylor-Wharton Div. of Harsco Corp., Indianapolis, IN.	49 CFR 178.57–21(a), 173.316	To authorize manufacture, marking and sale of non-DOT specification welded cylinders conforming with the DOT Specification 4L except that the container is made of Type 316L stainless steel. (Mode 1.)

EMERGENCY EXEMPTIONS

Application No.	Exemption No.	Applicant	Regulation(s) affected	Nature of exemption thereof
EE 4354–X	DOT–E 4354	PPG Industries, Inc., Pittsburgh, PA	49 CFR 173.119 (m), 173.245, 173.268(d), 173.288(e).	To authorize shipment of chloroformates in DOT Specification 6D or 37M cylindrical steel overpack with an inside DOT Specification 2S, 2SL or 2T polyethylene container. (modes 1, 2, 3)
EE 8390–X	DOT–E 8390	Olin Hunt Specialty Products, Inc., West Paterson, NJ.	49 CFR 173.272, 178.24a, 178.210	To authorize shipment of 95%–98% sulfuric acid in DOT Specification 2E polyethylene bottles overpacked in DOT Specification 12A80 fiberboard boxes. (mode 1)
EE 9693–X	DOT–E 9593	Honeywell, Inc., Minnetonka, MN	49 CFR 172.101, 175.30	To authorize transport of ammunition for cannon, Class A explosives, and certain non-hazardous materials aboard cargo aircraft. (mode 4)
EE 9814–N	DOT–E 9814	Westinghouse Electric Corp., Pittsburgh, PA.	49 CFR 172.203(c)	To authorize disclosure of the technical name of a hazardous substance explicitly listed in 49 CFR 172.101 as a hazardous material. (mode)
EE 9815–N	DOT–E 9815	PMC Specialties Group, Chicago, IL	49 CFR 179.200–19(b)	To authorize a one time shipment of para cresol, classed as a corrosive material, in a DOT Specification 111A60W1 tank car (GATX 19808) equipped with an anti-shift bracket welded directly to the tank shell without the required reinforcement pad. (mode 2)
EE 9834–N	DOT–E 9834	Northwest Airlines, St. Paul, MN	49 CFR Parts 100 through 199	To authorize a one time shipment of an insulated stainless steel dewar containing liquid nitrogen to be transported in the cabin of a passenger-carrying aircraft under special conditions. (mode 5)
EE 9835–N	DOT–E 9835	O.H. Materials, Findlay, OH	49 CFR Part 107, Appendix B, Part 172, Subpart B, C, E, F, Part 173, 177.848.	To authorize a one time shipment of hazardous materials that are not specifically identified. (mode 1)

WITHDRAWAL EXEMPTIONS

Application No.	Applicant	Regulation(s) affected	Nature of exemption thereof
6902–X	Great Lakes Chemical Corp. El Dorado, AR.	49 CFR 173.314(c), 179.200–15	To authorize shipment of a liquefied nonflammable compressed gas, in a modified DOT Specification 110A800W multi-unit tank car tank. (Modes 1, 2.)

Denials

9684–N—Request by General Electric Railcar Services Corporation Chicago, IL to authorize shipment of anyhdrous ammonia, classed as non-flammable gas, in DOT Specification 112J and 114J tank cars which are restenciled as DOT Specification 112S and 114S tank cars denied 08/27/1987.

9745–N—Request by Metal Box Enterprises, Inc. Vernona, NJ to manufacture, mark and sell "aerosol containers" conforming with Specification DOT 2P (49 CFR 178.33), except for volumetric capacity denied 08/28/1987.

Issued in Washington, DC, on September 23, 1987.

J. Suzanne Hedgepeth,

Chief, Exemptions Branch, Office of Hazardous Materials Transportation.

Grants and Denials of Applications for Exemptions

AGENCY: Research and Special Programs Administration, DOT.

ACTION: Notice of grants and denials of applications for exemptions.

SUMMARY: In accordance with the procedures governing the application for, and the processing of, exemptions from the Department of Transportation's Hazardous Materials Regulations (49 CFR Part 107, Subpart B), notice is hereby given of the exemptions granted in July 1987. The modes of transportation involved are identified by a number of the "Nature of Application" portion of the table below as follows: 1—Motor vehicle, 2—Rail freight, 3—Cargo vessel, 4—Cargo-only aircraft, 5—Passenger-carrying aircraft. Application numbers prefixed by the letter EE represent applications for Emergency Exemptions.

RENEWAL AND PARTY TO EXEMPTIONS

Application No.	Exemption No.	Applicant	Regulation(s) affected	Nature of exemption thereof
2582-X	DOT-E 2582	Union Carbide Corp., Danbury, CT	49 CFR 173, 175.3, Subparts D, E, F, G	To authorize shipment of certain hazardous materials in cylinders made in compliance with DOT Specification 3E1800, with certain exceptions. (Modes 1, 2, 3, and 4.)
4453-X	DOT-E 4453	Pacco, Inc., Tenino, WA	49 CFR 173.114a(h)(3), 172.101, 176.83, 176.415.	To authorize use of non-DOT specification bulk, hopper-type tank, for transportation of blasting agent, n.o.s., or ammonium nitrate-fuel oil mixtures. (Modes 1, 3.)
4453-X	DOT-E 4453	Atlas Powder Company Dallas, TX	49 CFR 173.114a(h)(3), 172.101, 176.83, 176.415.	To authorize use of a non-DOT specification bulk, hopper-type tank, for transportation of blasting agent, n.o.s., or ammonium nitrate-fuel oil mixtures. (Modes 1, 3.)
4453-X	DOT-E 4453	IRECO, Incorp., Salt Lake City, UT	49 CFR 173.114a(h)(3). 172.101, 176.83, 176.415.	To authorize use of a non-DOT specification bulk, hopper-type tank, for transportation of blasting agent, n.o.s., or ammonium nitrate-fuel oil mixtures. (Modes 1, 3.)
4453-X	DOT-E 4453	Autin Powder Co., Cleveland OH	49 CFR 173.114a(h)(3), 172.101, 176.83, 176.415.	To authorize use of a non-DOT specification bulk, hopper-type tank, for transportation of blasting agent, n.o.s., or ammonium nitrate-fuel oil mixtures. (Modes 1, 3.)
5243-X	DOT-E 5243	Austin Powder Co., Cleveland, OH	49 CFR 173.66(g)(1), 173.103(a), 177 825(g).	To authorize modified non-DOT specification packaging for transportation of Class C or Class A explosives. (Modes 1, 2, and 3.)
6816-X	DOT-E 6816	General Dynamics/Convair Division, San Diego, CA.	49 CFR 173.53(p)	To authorize shipment of completely assembled liquid and solid fueled missiles in packaging prescribed in §173.57(a). (Modes 1, 2, and 3.)
6824-P	DOT-E 6824	Grow Group, Inc., Montebello, CA	49 CFR 173.217(a), 173.154	To authorize packagings not provided for in the Hazardous Materials Regulations, for shipment of certain oxidizing materials. (Modes 1, 2, and 3.)
6902-X	DOT-E 6902	Halocarbon Products Corp., North Augusta, SC.	49 CFR 173.314(c), 179.300-15	To authorize shipment of a liquefied nonflammable compressed gas, in a modified DOT Specification 110A800W multi-unit tank car tank. (Modes 1, 2.)
6971-P	DOT-E 6971	Alltech Associates, Inc., Deerfield, IL	49 CFR Parts 100-199	To authorize transport of small quantities of reagent chemicals in inside glass bottles packed in metal boxes, overpacked in a strong wooden or fiberboard box. (Modes 1, 2, 3, 4, and 5.)
6974-X	DOT-E 6974	U.S. Department of Defense, Falls Church, VA.	49 CFR 173.302(a)(1), 178.42, 175.3	To authorize use of non-DOT specification cylinders, for transportation of certain nonliquefied compressed gases. (Modes 1, 2, and 4.)
7023-X	DOT-E 7023	Texas Instruments, Inc., Dallas, TX	49 CFR 173.245(a), 173.264(a), 173.266, 173.268(f)(5), 173.272(g), 173.272(i)(24), 173.263(a).	To authorize use of non-DOT specification steel portable tanks, for shipment of an oxidizer or corrosive material. (Mode 1.)
7051-X	DOT-E 7051	Ozark-Mahoning Co., Tulsa, OK	49 CFR 173.246(a), 175.3	To authorize use of non-DOT specification Teflon bottles overpacked with either a DOT Specification 12A or 12B fiberboard box to transport a corrosive liquid. (Modes 1, 4.)
7555-X	DOT-E 7555	Provost Cartage, Incorp., Ville d'Anjou, Quebec.	49 CFR 173, Subpart F	To authorize manufacture, marking and sale of non-DOT specification cargo tanks made from non-metallic materials, for transportation of certain hazardous materials. (Mode 1.)
7607-X	DOT-E 7607	Ecology and Environment, Inc., Buffalo, NY.	49 CFR 172.101, 175.3	To authorize shipment of hydrogen in certain non-DOT specification seamless stainless steel cylinders (Mode 5.)
7730-X	DOT-E 7730	Western Company of North America, Fort Worth, TX.	49 CFR 178.343-5(b)(2)(ii)	To authorize use of a DOT Specification MC-312 cargo tank, for transportation of certain corrosive materials. (Mode 1.)
7835-X	DOT-E 7835	Big Three Industries, Inc., Houston, TX	49 CFR 177.848, Part 107 Appen. B(1)	To authorize transport of cylinders bearing the flammable gas label, the oxidizer label, the flammable liquid label, the corrosive label or the poison gas label and tank car tanks bearing the poison gas label on the same motor vehicle. (Mode 1.)
7876-X	DOT-E 7876	General Chemical Corp., Morristown, NJ	49 CFR 173.299(a), 175.3	To authorize an additional mixture to be shipped as etching acid, liquid, n.o.s. (Modes 1, 2, 3, and 4.)
7891-P	DOT-E 7891	King's Laboratory, Inc., Blythewood, SC	49 CFR 172.400, 172.402(a)(2), 172.402(a)(3), 172.504(a), 172.504 Table 1, 173.25(a), 175.3 173.126, 173.136, 173.237, 173.246.	To authorize transport of packages bearing the DANGEROUS WHEN WET label, in motor vehicles which are not placarded FLAMMABLE SOLID W. (Modes 1, 2, and 4.)
7943-P	DOT-E 7943	Grow Group, Inc., Montebello, CA	49 CFR 173.263(a)(15), 173.272(c). 173.272(i)(12), 173.277(a)(1).	To authorize shipment of corrosive liquids in one or two one-gallon polyethylene containers packed in fiberboard boxes, complying with DOT Specification 12B except for handholes in top flaps. (Mode 1.)
8168-X	DOT-E 8168	Container Corporation of America, Wilmington, DE.	49 CFR 173.217, 173.245b, 178.19, 173.239a.	To authorize manufacture, marking and sale of non-DOT specification fully removable head polyethlene drums, for shipment of certain corrosive solids and solid oxidizers. (Modes 1, 2, and 3.)
8221-X	DOT-E 8221	Applied Companies, San Fernando, CA	49 CFR 173.302(a), 175.3	To authorize use of non-DOT specification high pressure cylinders of welded construction for military missile systems use only. (Modes 1, 2, and 4.)
8232-X	DOT-E 8232	GCS Container Service, SA Chiasso, Switzerland.	49 CFR 173.315, 173.123(a)	To authorize use of a non-DOT specification portable tank, for transportation of certain compressed gases and a flammable liquid. (Modes 1, 2, and 3.)
8239-X	DOT-E 8239	Westinghouse Electric Corp. Horseheads, NY.	49 CFR 173.302, 172.101 Column 6(a), 172.101 Column 6(b), 175.3.	To authorize use of non-DOT specification containers, for the shipment of nonflammable gases. (Modes 1, 2, 3, 4, and 5.)
8363-P	DOT-E 8363	IMR Powder Co., Plattsburgh, NY	49 CFR 173.93(a)	To authorize shipment of certain solid propellant explosives in metal cannisters overpacked in DOT Specification 12H 65 fiberboard boxes. (Modes 1, 3.)
8426-P	DOT-E 8426	Southwest Pumping Services, Whittier, CA.	49 CFR 173.119(a), (m), 173.245(a), 178.342-5, 178.343-5, 178.340-7, 173.346(a).	To authorize manufacture, marking and sale of non-DOT specification cargo tanks complying with DOT Specification MC-307/312 with certain exceptions, for transportation of liquid and semi-solid waste materials. (Mode 1.)
8426-F	DOT-E 8426	Crosby & Overton, Inc., Long Beach, CA	49 CFR 173.119(a), (m), 173.245(a), 178.342-5, 178.343-5, 178.340-7, 173.346(a).	To authorize manufacture, marking and sale of non-DOT specification cargo tanks complying with DOT Specification MC-307/312 with certain excepeons, for transportation of liquid and semi-solid waste materials. (Mode 1.)
8426-P	DOT-E 8426	C.K.C., Inc., Paso Robles, CA	49 CFR 173.119(a), (m), 173.245(a), 178.342-5, 178.343-5, 178.340-7, 173.346(a).	To authorize manufacture, marking and sale of non-DOT specification cargo tanks complying with DOT Specification MC-307/312 with certain exceptions, for transportation of liquid and semi-solid waste materials. (Mode 1.)
8445-P	DOT-E 8445	Bishop & Associates, Inc., Brooklandville, MD.	49 CFR 173, Subpart D, E, F, H	To authorize shipment of various hazardous substances and wastes packed in inside plastic, glass, earthenware or metal containers, overpacked in a DOT Specification removable head steel, fiber or polyethylene drum, only for the purposes of disposal, repackaging or reprocessing. (Mode 1.)

Application No	Exemption No	Applicant	Regulation(s) affected	Nature of exemption thereof
8518-P	DOT-E 8518	J.J. Magana, Corp., Richmond, CA	49 CFR 173.119(a), (m), 173.245(a), 178.340-7, 178.342-5, 178.343-5, 173.346(a).	To authorize use of non-DOT specification cargo tanks designed and constructed in full compliance with DOT Specification MC-307 or MC-312 except for bottom outlet valve variations, for transportation of flammable liquids or corrosive or poison B materials. (Mode 1.)
8522-X	DOT-E 8522	Tuscarora Plastics, Inc., Sterling, VA	49 CFR 178.150, Part 173 Subpart F, §§ 177.839(a), 177.839(b).	Request authorization to modify polystyrene case by increasing thickness; incorporate a third strap etc., for shipment of commodities authorized in DOT Specification 33A. (Modes 1, 2, and 3.)
8547-X	DOT-E 8547	Natco, Inc., Chicago, IL	49 CFR 173 Subpart F, 178.116	To authorize manufacture, marking and sale of a non-DOT specification 55 gallon steel tight head drum incorporating a molded polyethylene top head, in lieu of a steel top head, for shipment of certain corrosive liquids. (Modes 1, 2.)
8569-P	DOT-E 8569	Garrett Fluid Systems Company, Tempe, AZ.	49 CFR 172.101(6)(b), 173.276, 175.3	To authorize shipment of 6.6 gallons of hydrazine, aqueous solution in non-DOT Specification F-16 emergency fuel tanks. (Modes 1, 3, and 4.)
8573-X	DOT-E 8573	All Pure Chemical Company, Inc., Tracy, CA.	49 CFR 173.217(a)(8)	To authorize transport of certain solid oxidizers in non-DOT specification polyethylene bottles packed in a DOT Specification 12B double-wall corrugated fiberboard box. (Modes 1, 2, and 3.)
8579-P	DOT-E 8579	Nitram, Inc., Tampa, FL	49 CFR 176.410(d)	To authorize shipment of ammonium nitrate fertilizer in multiple-wall paper bags or plastic bags stacked on wooden pallets aboard cargo vessel exempt from spacing criteria. (Mode 3.)
8582-P	DOT-E 8582	Chicago South Shore & South Bend R R. Co., Michigan City, IN.	49 CFR Parts 100-177	To authorize transportation of railway track torpedoes and fusees packed in metal kits, in motor vehicles by railroad maintenance crews as non-regulated rail carrier equipment. (Mode 1.)
8582-P	DOT-E 8582	Chicago Missouri & Western Railway Co, Chicago, IL.	49 CFR Parts 100-177	To authorize transportation of railway track torpedoes and fusees packed in metal kits, in motor vehicles by railroad maintenance crews as non-regulated rail carrier equipment. (Mode 1.)
8582-P	DOT-E 8582	Springfield Terminal Railway Company, Sterling, MA.	49 CFR Parts 100-177	To authorize transportation of railway track torpedoes and fusees packed in metal kits, in motor vehicles by railroad maintenance crews as non-regulated rail carrier equipment. (Mode 1.)
8609-X	DOT-E 8609	Natco, Inc., Chicago, IL	49 CFR 177.841(e), 178.118	To authorize manufacture, marking and sale of non-DOT specification removable head metal drums, for transportation of poison B materials. (Mode 1.)
8678-X	DOT-E 8678	E. I. du Pont de Nemours & Company, Inc., Wilmington, DE.	49 CFR 173.315(a)	To renew and change six months shipping experience report requirement to two years to correspond with renewal application. (Modes 1, 2, and 3.)
8689-X	DOT-E 8689	Schlumberger Offshore Services, Houston, TX.	49 CFR 173.302, 173.304, 175.3	To authorize manufacture, marking and sale of a non-DOT specification oil well sampling device, for the shipment of various compressed gases, n.o.s. (Modes 1, 2, 3, and 4.)
8689-X	DOT-E 8689	Schlumgerger Well Services, Houston, TX	49 CFR 173.302, 173.304, 175.3	To authorize manufacture, marking and sale of a non-DOT specification oil well sampling device, for the shipment of various compressed gases, n.o.s. (Modes 1, 2, 3, and 4.)
8693-X	DOT-E 8693	CAN-TRO, Inc., Kansas City, MO	49 CFR 173.230	To authorize shipment of sodium, metal dispersion in organic solvent, in DOT Specification 4BW240 cylinders. (Modes 1, 3.)
8723-P	DOT-E 8723	High West, Inc., Billings, MT	49 CFR 173.114a(h)(3), 172.101, 176.83, 176.415.	To authorize use of non-DOT specification motor vehicles and portable tanks, for bulk shipment of certain blasting agents. (Modes 1, 3.)
8723-P	DOT-E 8723	Strawn Explosives, Inc., Dallas, TX	49 CFR 173.114a(h)(3), 172.101, 176.83, 176.415.	To authorize use of non-DOT specification motor vehicles and portable tanks, for bulk shipment of certain blasting agents. (Modes 1, 3.)
8723-P	DOT-E 8723	Hamson Explosives, Inc., Allentown, PA	49 CFR 173.114a(h)(3), 172.101, 176.83, 176.415.	To authorize use of non-DOT specification motor vehicles and portable tanks, for bulk shipment of certain blasting agents. (Modes 1, 3.)
8937-X	DOT-E 8937	Spectrulite Consortium, Inc., Madison, IL	49 CFR 173.178	To authorize shipment of coated magnesium granules in collapsible polyethylene-lined, woven polypropryiene bags having a capacity of approximately 2000 pounds each. (Modes 1, 2, and 3.)
8978-X	DOT-E 8978	GN Lithium Batteries as Loege, Denmark	49 CFR 172.101, 175.3	To authorize transport of lithium cells containing more than 12 but not more than 50 grams of lithium metal, in non-DOT specification, non-reusable, open head, steel drums. (Modes 1, 2, 3, and 4.)
8988-X	DOT-E 8988	Schlumberger Well Services, Houston, TX	49 CFR 172.101, 173.110, 173.80, 175.30.	To authorize transport of charged oil well guns as Class C explosive when the net weight of explosive material in the vehicle or vessel does not exceed 200 pounds. (Modes 1, 3, and 4.)
8988-X	DOT-E 8988	Schlumberger Offshore Services, Houston, TX.	49 CFR 172.101, 173.110, 173.80, 175.30.	To authorize transport of charged oil well guns as Class C explosive when the net weight of explosive material in the vehicle or vessel does not exceed 200 pounds. (Modes 1, 3, and 4.)
8988-X	DOT-E 8988	Welex, Houston, TX	49 CFR 172.101, 173.110, 173.80, 175.30.	To authorize transport of charged oil well guns as Class C explosive when the net weight of explosive material in the vehicle or vessel does not exceed 200 pounds. (Modes 1, 3, and 4.)
8988-X	DOT-E 8988	Dresser Industries, Inc., Houston, TX	49 CFR 172.101, 173.110, 173.80, 175.30.	To authorize transport of charged oil well guns as Class C explosive when the net weight of explosive material in the vehicle or vessel does not exceed 200 pounds. (Modes 1, 3, and 4.)
8992-X	DOT-E 8992	General Dynamics/Pomona Division Aviation Dept., Pomona, CA.	49 CFR 172.101, 172.204(c)(3), 173.27, 175.320(b), 175.30(a)(1), Part 107, Appendix B.	To authorize transport of certain Class A and B explosives not permitted for air shipment or in quantities greater than those prescribed for air shipment. (Mode 4.)
9010-X	DOT-E 9010	United Technologies, Corp., San Jose, CA.	49 CFR 173.92, 173.88(e)(2)(ii)	To authorize transport of a large motor with or without igniter installed and which may be in a propulsive state, or a rocket motor igniter. (Mode 1.)
9017-X	DOT-E 9017	EVA Eisenbahn-Verkehrsmittel-Gesellschaft GmbH, Dusseldorf, West Germany	49 CFR 173.264(b)	To authorize use of a non-DOT specification IMO Type 5 portable tank, for transportation of anhydrous hydrofluoric acid. (Modes 1, 2, and 3.)
9026-X	DOT-E 9026	Continental Fibre Drum, Inc., Lombard, IL	48 CFR 178.224, 172.101, 175.3, 175.30	To authorize manufacture, marking and sale of non-DOT specification fiber drums of not over 75-gallon capacity, similar to DOT Specification 21C except that the top head is of molded polyethylene and secured to the sidewall by a lever locking ring. (Modes 1, 2, 3, and 4.)
9027-X	DOT-E 9027	McGean-Rohco, Inc., Cleveland, OH	49 CFR 178.131, 178.28(h), 178.28(m)	To authorize a one-time reuse of DOT Specification 37A (single-trip) drums, for shipment of chromic acid, solid and chromic acid mixture, classed as an oxidizer. (Modes 1, 2.)
9034-X	DOT-E 9034	Union Carbide, Corp., Danbury, CT	49 CFR 173.302, 175.3, 173.304, 173.328, 173.334	To authorize use of a previously unauthorized DOT Specification 3AL aluminum cylinder, for transportation of certain gases and gas mixtures. (Modes 1, 2, 3, 4, and 5.)

RENEWAL AND PARTY TO EXEMPTIONS—Continued

Application No	Exemption No.	Applicant	Regulation(s) affected	Nature of exemption thereof
9040-X	DOT-E 9040	Continental Fibre Drum, Inc., Lombard, IL	49 CFR 173.249a(d)(3)	To authorize manufacture, marking and sale of non-DOT specification fibre drums of not over 55-gallon capacity, lined or coated on the inside with a plastic material, and having modified non-removable top heads of steel or plastic, for transportation of certain corrosive liquids. (Modes 1, 2, and 3.)
9059-X	DOT-E 9059	Air Products and Chemicals, Inc., Allentown, PA.	49 CFR 172.101, 172.202, 172.302(d), 173.34(d)(4).	To authorize use of cylinders currently used for transportation of fluorine, for shipment of a fluorine-helium mixture. (Modes 1, 2.)
9062-X	DOT-E 9062	UOP Inc., Des Plaines, IL	49 CFR 173.245	To authorize use of DOT Specification 57 carbon steel portable tanks, for transportation of a corrosive liquid. (Modes 1, 2.)
9064-X	DOT-E 9064	J.T. Baker Chemical Co., Phillipsburg, NJ	49 CFR 173.245, 173.271, 173.247	To authorize shipment of corrosive materials, in a glass container placed in a cushioned cylindrical steel overpack, which is then packed in a cushioned plywood box, of which no more than four can be overpacked in a compartmented wooden outer box. (Modes 1, 3.)
9079-X	DOT-E 9079	E. I. du Pont de Nemours & Co., Inc., Wilmington, DE.	49 CFR 173.315	To authorize use of carbon steel DOT Specification 51 portable tanks, for transportation of a liquefied compressed gas. (Modes 1, 3.)
9108-X	DOT-E 9108	E.I. du Pont de Nemours & Co., Inc., Wilmington, DE.	49 CFR 173.77	To authorize transport of pentaerythrite tetranitrate (PETN) wet with 25% water in a 4 mil polyethylene bag placed in a DOT specification 12H fiberboard box. (Mode 1.)
9108-X	DOT-E 9108	Ensign-Bickford Co., Simsbury, CT	49 CFR 173.77	To authorize transport of pentaerythrite tetranitrate (PETN) wet with 25% water in a 4 mil polyethylene bag placed in a DOT specification 12H fiberboard box. (Mode 1.)
9141-X	DOT-E 9141	Bristol Flare Corp., Bristol, PA	49 CFR 172.101, 173.108	To authorize transport of certain hand signal devices, as a flammable solid instead of a class C explosive. (Mode 1.)
9192-X	DOT-E 9192	Air Products and Chemicals, Inc., Allentown, PA.	49 CFR 173.304(a)(2)	To authorize shipment of various refrigerated compressed gases classed as flammable gas in DOT Specification 4L-112 cylinders. (Mode 1.)
9275-X	DOT-E 9275	International Flavors & Fragrances (IFF-US), Hazlet, NJ.	49 CFR Parts 100-199	To authorize exceptions to specification packaging, marking and labeling requirements for certain ethyl alcohol solutions. (Modes 1, 2, 3, 4, and 5.)
9282-X	DOT-E 9282	Halocarbon Products Corp., Hackensack, NJ.	49 CFR 173.314(c)	To authorize rail and cargo vessel as additional modes to transportation. (Modes 1, 2.)
9364-P	DOT-E 9364	Platte Chemical Co., Fremont, NE	49 CFR 173.359	To authorize shipment of a parathion mixture, liquid, in a DOT Specification 12P corrugated fiberboard box containing two inside DOT Specification 2U polyethylene containers of 2½ gallon capacity. (Mode 1.)
9402-P	DOT-E 9402	Atochem S.A., Paris, France	49 CFR 173.315, 178.245	To authorize use of non-DOT specification IMO Type 5 portable tanks, for transportation of flammable and nonflammable liquefied compressed gases. (Modes 1, 2, and 3.)
9446-X	DOT-E 9446	Matson Navigation Co., San Francisco, CA.	49 CFR 176.305(c)(5)	To authorize stowage of flammable liquids with flash points below 73 degrees Fahrenheit in holds or compartments that are fitted with a goose neck type of vent head. (Mode 3.)
9549-P	DOT-E 9549	GOEX, Inc., Cleburne, TX	49 CFR 173.100(v), 175.30	To authorize transport of oil well cartridges containing more than 350 grains, but not more than 600 grains of Class A, type 3 explosive, as Class C explosive, in DOT Specification 12H fiberboard box. (Modes 1, 3, and 4.)
9678-X	DOT-E 9678	Rosseborough Manufacturing Co., Avon Lake, OH.	49 CFR 173.154	To authorize shipment of various mixtures: Magnesium granules 0 to 30%; Salt-coated magnesium granules 0 to 30%; Calcium carbide 40 to 90%; and Calcium oxide 5 to 20% classes as flammable solids. (Mode 1.)
9732-P	DOT-E 9732	Shell Oil Company, Houston, TX	49 CFR 173.115	Request party status and to authorize additional materials to be shipped as combustible liquid, n.o.s. (Mode 1.)

NEW EXEMPTIONS

Application No	Exemption No.	Applicant	Regulation(s) affected	Nature of exemption thereof
9579-N	DOT-E 9579	IRECO, Inc., Salt Lake City, UT	49 CFR 173.154(a)(18)	To authorize use of a non-DOT specification motor vehicle for bulk shipment of oxidizers. (mode 1).
9675-N	DOT-E 9675	Surpass Chemical Co., Inc., Albany, NY	49 CFR 172.301(a), Part 107, Appendix b(1), (2), 172.203(a).	To authorize shipment of approximately 100,000 DOT Specification drums of five gallon capacity, containing hypochlorite solution, classed as a corrosive material which have labels marked "NA 1791" instead of the required "UN 1791". (mode 1).
9709-N	DOT-E 9709	Crown Rotational Molded Products, Inc., Marked Tree, AR.	49 CFR 173.3(c)	To authorize manufacture, marking and sale of a polyethylene, removable head salvage drum of 85-gallon capacity for overpacking of damaged or leaking packages of hazardous materials or for packing hazardous materials that have spilled or leaked for repackaging or disposal. (modes 1, 2).
9748-N	DOT-E 9748	Greif Bros. Corp., Springfield, NJ	49 CFR 178.224, Part 173	To authorize manufacture, marking and sale of non-DOT fibre drums of not over 75-gallon capacity, similar to DOT-21C except that the top head is of molded polyethylene or polypropylene and secured to the side wall by a level locking ring, for transportation of various hazardous materials (solids) (modes 1, 2).
9749-N	DOT-E 9749	Union Carbide Corp., Danbury, CT	49 CFR 172.203(c)(1),172.324(a)	To authorize shipment of a material containing a hazardous substance without listing the name of the hazardous substance on the shipping papers and on the package when transported by private or contract carriers. (mode 1).
9750-N	DOT-E 9750	IRECO, Inc., Salt Lake City, UT	49 CFR 173.154(a)(18)	To authorize transport of ammonium nitate solution containing not less than 13% water in DOT specification MC-307 insulated cargo tank or a DOT Specification MC-311 insulated cargo tank. (mode 1).
9770-N	DOT-E 9770	AMSPEC Chemical Corp., Gloucester City, NJ.	49 CFR 173.154(a)(2), 178.118, 173.28(m).	To authorize reuse of DOT Specification 17H drums of 55-gallon capacity for multiple shipments of sodium methylate, classed as a flammable solid, without subjecting drums to reconditioning requirements. (mode 1).

NEW EXEMPTIONS—Continued

Application No.	Exemption No.	Applicant	Regulation(s) affected	Nature of exemption thereof
9792-N	DOT-E 9792	Foam Fabricators, Bloomsburg, PA	49 CFR Part 173, Subpart F, §§ 177.839(a), (b), 178.150.	To authorize manufacture, marking and sale of a non-reusable expanded polystyrene case similar to DOT-33A, except it will have six cavities to contain not more than six five-pint or six 20 ounce bottles, for shipment of those commodities authorized by in a DOT-33A packaging. (modes 1, 2, 3).
9800-N	DOT-E 9800	Space Ordnance Systems, Canyon Country, CA.	49 CFR 173.65	To authorize a one time shipment of a limited quantity of Class A, Type 4 explosive, to be placed in special packaging not prescribed in 49 CFR. (mode 1).

EMERGENCY EXEMPTIONS

Application No.	Exemption No.	Applicant	Regulation(s) affected	Nature of exemption thereof
EE 9801-N	DOT-E 9801	Phelps Dodge Corp., Phoenix, AZ	49 CFR 173.31(c)(2), footnote (d) Table 1.	To authorize retesting of DOT Specification 111A100W2 tank car tanks, over ten years of age, with sulfuric acid in lieu of water. (mode 2.)

WITHDRAWAL EXEMPTIONS

Application No.	Applicant	Regulation(s) affected	Nature of exemption thereof
7991-X	Union Pacific Railroad Co., Salt Lake City, UT.	49 CFR Parts 100-177	To authorize transport of railway track torpedoes and fusees in flagging kits of specified construction. (mode 1.)
8426-P	Southwest Pumping Services, Whittier, CA.	49 CFR 173.119(a), (m), 173.245(a), 178.342-5, 178.343-5, 178.340-7, 173.346(a).	To authorize manufacture, marking and sale of non-DOT specification cargo tanks complying with DOT Specification MC-307/312 with certain exceptions, for transportation of liquid and semi-solid waste materials. (mode 1.)
8723-X	Atlas Powder Co., Dallas, TX	49 CFR 173.114a(h)(3), 172.101, 176.83, 176.415.	To authorize use of non-DOT specification motor vehicles and portable tanks, for bulk shipment of certain blasting agents. (modes 1, 3.)

Denials

7872-X—Request by Baker Performance Chemicals, Inc. Houston, TX to authorize a portable tank capacity in excess of that set forth in the regulations for a tank transporting a certain flammable liquid denied 07/27/1987.

9293-N—Request by Air Products and Chemicals, Inc. Allentown, PA to request authorization to substitute acoustic emission testing for the periodic retesting prescribed in 49 CFR 173.34 for 3AX, 3AAX and 3T cylinders denied 07/30/1987.

9681-X—Request by Space Ordnance Systems Canyon Country, CA to authorize limited quantities of Class A, Type 4 explosives, to be placed in special packaging not prescribed in 49 CFR denied 07/30/1987.

Issued in Washington, DC, on September 17, 1987.

J. Suzanne Hedgepeth,

Chief, Exemptions Branch, Office of Hazardous Materials Transportation.

DEPARTMENT OF THE TREASURY

Internal Revenue Service

[Delegation Order No. 226]

Delegation of Authority; Director, National Computer Center

AGENCY: Internal Revenue Service, Treasury.

ACTION: Delegation of authority.

SUMMARY: This new delegation order authorizes the Director, National Computer Center, to grant an extension of time to file Form 1042, Annual Withholding Tax Return for U.S. Source Income of Foreign Persons, when an extension to file the associated Forms 1042S on magnetic tape is necessary.

The text of the delegation order appears below.

EFFECTIVE DATE: September 10, 1987.

FOR FURTHER INFORMATION CONTACT: Phyllis K. Andrews, D:R:R:R, Rm. 7041, 1111 Constitution Ave. NW., Washington, DC 20224, (Telephone 202 566-4089). This is not a toll-free telephone number).

Martha M. Seeman,

Chief, Information and Productivity Improvement Branch.

Authority To Extend the Time To File Form 1042

1. Pursuant to the authority vested in the Commissioner of the Internal Revenue by 26 CFR 1.6081-1, 301.7701-9 and 301.6011-2, there is hereby delegated to the Director, National Computer Center, the authority to grant extensions of time to file Form 1042, Annual Withholding Tax Return for U.S. Source Income of Foreign Persons, only when also approving extensions to file associated Forms 1042S on magnetic tape.

2. This authority may be redelegated no lower than Magnetic Media Specialists.

Dated: August 13, 1987.

James I. Owens.

BILLING CODE 8230–01–M

United States Advisory Commission on Public Diplomacy; Meeting

A meeting of the U.S. Advisory Commission on Public Diplomacy will be held October 14, 1987, in Room 600, 301 4th Street, SW., Washington, DC from 11:00 a.m. to 12:00 noon.

The Commission will meet with members of the Senate Foreign Relations staff to discuss programs of the U.S. Information Agency.

Please call Gloria Kalamets, (202) 485–2468, if you are interested in attending the meeting since space is limited and entrance to the building is controlled.

Dated: October 2, 1987.

Charles N. Canestro,

Management Analyst, Federal Register Liaison.

Sunshine Act Meetings

Federal Register
Vol. 52, No. 195
Thursday, October 8, 1987

This section of the FEDERAL REGISTER contains notices of meetings published under the "Government in the Sunshine Act" (Pub. L. 94-409) 5 U.S.C. 552b(e)(3).

FEDERAL RESERVE SYSTEM BOARD OF GOVERNORS

"FEDERAL REGISTER" CITATION OF PREVIOUS ANNOUNCEMENT: 52 FR 36493, September 29, 1987.

PREVIOUSLY ANNOUNCED TIME AND DATE OF THE MEETING: 11:00 a.m., Monday, October 5, 1987.

CHANGES IN THE MEETING: Addition of the following closed item(s) to the meeting:

Proposed Federal Reserve Bank salary structure adjustments.

CONTACT PERSON FOR MORE INFORMATION: Mr. Joseph R. Coyne, Assistant to the Board; (202) 452–3204.

Date: October 5, 1987.

James McAfee,

Associate Secretary of the Board.

[FR Doc. 87–23389 Filed 10–6–87; 10:11 am]

BILLING CODE 6210–01–M

FEDERAL RESERVE SYSTEM BOARD OF GOVERNORS

TIME AND DATE: 11:00 a.m., Tuesday, October 13, 1987.

PLACE: Marriner S. Eccles Federal Reserve Board Building, C Street entrance between 20th and 21st Streets NW., Washington, DC 20551.

STATUS: Closed.

MATTERS TO BE CONSIDERED:

1. Proposed response to a request by the General Accounting Office for Board comment on a draft report regarding supervision of county risk and international lending.

2. Personnel actions (appointments, promotions, assignments, reassignments, and salary actions) involving individual Federal Reserve System employees.

3. Any items carried forward from a previously announced meeting.

CONTACT PERSON FOR MORE INFORMATION: Mr. Joseph R. Coyne, Assistant to the Board; (202) 452–3204. You may call (202) 452–3207, beginning at approximately 5 p.m. two business days before this meeting, for a recorded announcement of bank and bank holding company applications scheduled for the meeting.

Date: October 5, 1987.

James McAfee,

Associate Secretary of the Board.

Corrections

Federal Register
Vol. 52, No. 195
Thursday, October 8, 1987

This section of the FEDERAL REGISTER contains editorial corrections of previously published Presidential, Rule, Proposed Rule, and Notice documents and volumes of the Code of Federal Regulations. These corrections are prepared by the Office of the Federal Register. Agency prepared corrections are issued as signed documents and appear in the appropriate document categories elsewhere in the issue.

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Cheeses; Proposal to Permit Expanded Use of Antimycotics on the Exterior of Bulk Cheeses During Curing and Aging and to Update Formats of Several Standards

Correction

In proposed rule document 87-21708 beginning on page 35426 in the issue of Monday, September 21, 1987, make the following corrections:

§ 133.127 [Corrected]

1. On page 35428, in the third column, in § 133.127(a)(1), in the ninth line, "prescribed" should read "described".

2. On page 35429, in the first column, in § 133.127(d), in the sixth line, insert "or" after "plant,".

§ 133.136 [Corrected]

3. On page 35429, in the third column, in § 133.136(a)(3), in the seventh line, "clotting" was misspelled.

§ 133.137 [Corrected]

4. On page 35430, in the first column, in the heading for § 133.137, "cured" should read "curd".

§ 133.140 [Corrected]

5. On page 35430, in the second column, in § 133.140(b), in the first line, "Nomenclature" was misspelled.

§ 133.144 [Corrected]

6. On page 35431, in the second column, in § 133.144(b)(3)(iv), in the first line, "Antimycotic" was misspelled.

7. In the same column, in § 133.144(b)(3)(v), in the fourth line, "to" should read "of".

8. In the same column, in § 133.144(d)(2), in the fourth line, insert "and" after "milkfat".

§ 133.162 [Corrected]

9. On page 35433, in the second column, § 133.162(b)(3)(ii) was incorrectly added to § 133.162(b)(3)(i) and should become a separate paragraph; the next paragraph should be correctly designated "(iii)".

Proposed Establishment of Airport Radar Service Areas; Proposed Rulemaking

VOL
52
ISS
1
95
OC
8
1987
UMI

DEPARTMENT OF TRANSPORTATION

Federal Aviation Administration

14 CFR Part 71

[Airspace Docket No. 87-AWA-27]

Proposed Establishment of Airport Radar Service Areas; Cedar Rapids Municipal Airport, IA, et al.

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Notice of proposed rulemaking.

SUMMARY: This notice proposes to establish an Airport Radar Service Area (ARSA) at Cedar Rapids Municipal Airport, IA; Champaign University of Illinois-Willard Airport, IL; Chicago Midway Airport, IL; Columbus Air Force Base (AFB), MS, and Jackson Allen C. Thompson Field, MS. With the exception of Midway Airport, each location is an airport at which a nonregulatory Terminal Radar Service Area (TRSA) is currently in effect. Establishment of each ARSA would require that pilots maintain two-way radio communication with air traffic control (ATC) while in the ARSA. Implementation of ARSA procedures at each of the affected locations would promote the efficient control of air traffic and reduce the risk of midair collision in terminal areas.

DATES: Comments must be received on or before February 1, 1988. Informal airspace meeting dates are as follows: Cedar Rapids Municipal Airport, IA—December 8, 1987; Champaign University of Illinois-Willard Airport, IL—December 9, 1987; Chicago Midway Airport, IL—December 14, 1987; Columbus AFB, MS—December 9, 1987, and Jackson Allen C. Thompson Field, MS—December 8, 1987.

ADDRESSES: Send comments on the proposal in triplicate to: Federal Aviation Administration, Office of the Chief Counsel, Attention: Rules Docket [AGC-204], Airspace Docket No 87-AWA-27, 800 Independence Avenue, SW., Washington, DC 20591.

The informal airspace meeting places are as follows:

Cedar Rapids Municipal Airport, IA, ARSA
Time: 7:00 p.m.
Location: Prairie Junior High School, Lecture Hall, 401 76th Avenue, SW., Cedar Rapids, IA

Champaign University of Illinois-Willard Airport, IL, ARSA
Time: 7:00 p.m.
Location: Chancellor Hotel and Convention Center, 1501 South Neil Street, Champaign, IL

Chicago Midway Airport, IL, ARSA
Time: 7:00 p.m.
Location: Midway Motor Inn, 5600 South Cicero Avenue, Chicago, IL

Columbus AFB, MS ARSA
Time: 7:00 p.m.
Location: Officer's Open Mess, Columbus AFB, MS, (Directions at Main Gate)

Jackson Allen C. Thompson Field, MS, ARSA
Time: 7:30 p.m.
Location: Aircrew Briefing Room, Mississippi Air National Guard Base, Thompson Field, Jackson, MS

The official docket may be examined in the Rules Docket, weekdays, except Federal holidays, between 8:30 a.m. and 5:00 p.m. The FAA Rules Docket is located in the Office of the Chief Counsel, Room 916, 800 Independence Avenue, SW., Washington, DC.

The informal docket may also be examined during normal business hours at the office of the Regional Air Traffic Division.

FOR FURTHER INFORMATION CONTACT: Joe Gill, Airspace Branch (ATO-240), Airspace-Rules and Aeronautical Information Division, Air Traffic Operations Service, Federal Aviation Administration, 800 Independence Avenue, SW., Washington, DC 20591; telephone: (202) 267-9252.

SUPPLEMENTARY INFORMATION:

Comments Invited

This notice involves five locations. Interested parties are invited to participate in this proposed rulemaking by submitting such written data, views, or arguments as they may desire. Comments that provide the factual basis supporting the views and suggestions presented are particularly helpful in developing reasoned regulatory decisions on the proposal. Comments are specifically invited on the overall regulatory, economic, environmental, and energy aspects of the proposal. Communications should identify the airspace docket and be submitted in triplicate to the address listed above. Commenters wishing the FAA to acknowledge receipt of their comments on this notice must submit with those comments a self-addressed, stamped postcard on which the following statement is made: "Comments to Airspace Docket No. 87-AWA-27." The postcard will be date/time stamped and returned to the commenter. All communications received before the specified closing date for comments will be considered before taking action on the proposed rule. The proposal contained in this notice may be changed in the light of comments received. All comments submitted will be available for examination in the Rules Docket both before and after the closing date for comments. A report summarizing each substantive public contact with FAA personnel concerned with this rulemaking will be filed in the docket.

Availability of NPRM's

Any person may obtain a copy of this Notice of Proposed Rulemaking (NPRM) by submitting a request to the Federal Aviation Administration, Office of Public Affairs, Attention: Public Inquiry Center, APA-230, 800 Independence Avenue SW., Washington, DC 20591, or by calling (202) 267-3484. Communications must identify the notice number of this NPRM. Persons interested in being placed on a mailing list for future NPRM's should also request a copy of Advisory Circular No. 11-2 which describes the application procedure.

Meeting Procedures

In addition to seeking written comments on this proposal, the FAA will hold informal airspace meetings for the proposed ARSA locations in order to receive additional input with respect to the proposal. The dates, times, and places for these meetings are listed above. Persons who plan to attend the meetings should be aware of the following procedures to be followed:

(a) The meetings will be informal in nature and will be conducted by the designated representative of the Administrator. Each participant will be given an opportunity to make a presentation.

(b) There will be no admission fee or other charge to attend and participate. The meetings will be open to all persons on a space-available basis. The FAA representative may accelerate the agenda to enable early adjournment if the progress of the meetings is more expeditious than planned.

(c) The meetings will not be recorded. A summary of the comments made at these meetings will be filed in the docket.

(d) Position papers or other handout material relating to the substance of the meetings may be accepted. Participants submitting handout materials should present an original and two copies to the presiding officer. There should be an adequate number of copies provided for further distribution to all participants.

(e) Statements made by FAA participants at the meetings should not be taken as expressing a final FAA position.

Agenda

Presentation of Meeting Procedures
FAA Presentation of Proposal
Public Presentations and Discussion

Background

On April 22, 1982, the National Airspace Review (NAR) plan was published in the **Federal Register** (47 FR 17448). The plan encompassed a review of airspace use and procedural aspects of the ATC system. Among the main objectives of the NAR was the improvement of the ATC system by increasing efficiency and reducing complexity. In its review of terminal airspace, NAR Task Group 1–2 concluded that TRSA's should be replaced. Four types of airspace configurations were considered as replacement candidates, of which Model B, since redesignated ARSA, was the consensus recommendation.

In response, the FAA published NAR Recommendation 1–2.2.1, "Replace Terminal Radar Service Areas with Model B Airspace and Service" in Notice 83–9 (July 28, 1983; 48 FR 34286) proposing the establishment of ARSA's at the Robert Mueller Municipal Airport, Austin, TX, and the Port of Columbus International Airport, Columbus, OH. ARSA's were designated at these airports on a temporary basis by SFAR No. 45 (October 28, 1983; 48 FR 50038) in order to provide an operational confirmation of the ARSA concept for potential application on a national basis.

Following a confirmation period of more than a year, the FAA adopted the NAR recommendation and, on February 27, 1985, issued a final rule (50 FR 9252; March 6, 1985) defining an ARSA and establishing air traffic rules for operation within such an area. Concurrently, by separate rulemaking action, ARSA's were permanently established at the Austin, TX, and Columbus, OH, airports and also at the Baltimore/Washington International Airport, Baltimore, MD (50 FR 9250; March 6, 1985). The FAA has stated that future notices would propose ARSA's for other airports at which TRSA procedures were in effect.

Additionally, the NAR Task Group recommended that the FAA develop quantitative criteria for proposing to establish ARSA's at locations other than those which are included in the TRSA replacement program. The task group recommended that these criteria take into account, among other things, traffic mix, flow and density, airport configuration, geographical features, collision risk assessment, and ATC capabilities to provide service to users. This criteria has been developed and is being published via the FAA directives system.

The FAA has established ARSA's at 89 locations under a paced implementation plan to replace TRSA's with ARSA's. This is one of a series of notices to implement ARSA's at locations with TRSA's or locations without TRSA's which warrant implementation of an ARSA.

Related Rulemaking

This notice proposes ARSA designation at five locations identified as candidates for an ARSA in the preamble to Amendment No. 71–10 (50 FR 9252). Other candidate locations will be proposed in future notices published in the **Federal Register**.

The Current Situation at the Proposed ARSA Locations

A TRSA is currently in effect at four of the locations at which ARSA's are proposed in this notice. Midway Airport is a radar facility currently providing Stage II service. A TRSA consists of the airspace surrounding a designated airport where ATC provides radar vectoring, sequencing, and separation for all aircraft operating under instrument flight rules (IFR) and for participating aircraft operating under visual flight rules (VFR), Stage II service, with the exception of separation, provides the same. TRSA airspace and operating rules are not established by regulation, and participation by pilots operating under VFR is voluntary, although pilots are urged to participate. This level of service is known as Stage III and is provided at all locations identified as TRSA's. The NAR task group recommended the replacement of most TRSA's with ARSA's.

A number of problems with the TRSA program were identified by the task group. The task group stated that because there are different levels of service offered within the TRSA, users are not always sure of what restrictions or privileges exist, or how to cope with them. According to the task group, there is a shared feeling among users that TRSA's are often poorly defined, are generally dissimilar in dimensions, and encompass more area than is necessary or desirable. There are other users who believe that the voluntary nature of the TRSA does not adequately address the problems associated with nonparticipating aircraft operating in relative proximity to the airport and associated approach and departure courses. There is strong advocacy among user organizations that terminal radar facilities should provide all pilots the same service, in the same way, and, to the extent feasible, within standard size airspace designations.

The provisions of FAR § 91.87 relating to an airport traffic area (ATA), while necessary, do not eliminate the problem identified by the task group. For example, aircraft operating under VFR to or from a satellite airport and within the ATA of the primary airport are excluded from the two-way radio communications requirement of § 91.87. This condition is acceptable until the volume and density of traffic at the primary airport requires more complete ATC awareness and/or control of traffic in the area.

The Proposal

The FAA is considering an amendment to § 71.501 of Part 71 of the Federal Aviation Regulations (14 CFR Part 71) to establish ARSA's at Cedar Rapids Municipal Airport, IA; Champaign University of Illinois-Willard Airport, IL; Chicago Midway Airport, IL, and Jackson Allen C. Thompson Field, MS, which are public airports, and Columbus AFB, MS, a military airport. Four of these currently have nonregulatory TRSA's in effect. The proposed locations are depicted on charts in Appendix 1 to this notice.

FAA regulations, 14 CFR 91.88, define ARSA and prescribe operating rules for aircraft, ultralight vehicles, and parachute jump operations in airspace designated as an ARSA.

The ARSA rule provides in part that, prior to entering the ARSA, any aircraft arriving at any airport in an ARSA or flying through an ARSA must: (1) Establish two-way radio communications with the ATC facility having jurisdiction over the area, and (2) while in the ARSA, maintain two-way radio communications with that ATC facility. For aircraft departing from the primary airport within the ARSA, two-way radio communications must be maintained with the ATC facility having jurisdiction over the area. For aircraft departing a satellite airport within the ARSA, two-way radio communications must be established as soon as practicable after takeoff with the ATC facility having jurisdiction over the area, and thereafter maintained while operating within the ARSA.

All aircraft operating within an ARSA are required to comply with all ATC clearances and instructions and any FAA arrival or departure traffic pattern for the airport of intended operation. However, the rule permits ATC to authorize appropriate deviations to any of the operating requirements of the rule when safety considerations justify the deviation or more efficient utilization of

VOL 52 ISS 195 OCT 8 1987 UMI

the airspace can be attained. Ultralight vehicle operations and parachute jumps in an ARSA may only be conducted under the terms of an ATC authorization.

The FAA adopted the NAR task group recommendation that each ARSA be of the same airspace configuration insofar as practicable. The standard ARSA consists of airspace within 5 nautical miles of the primary airport extending from the surface to an altitude of 4,000 feet above that airport's elevation, and that airspace between 5 and 10 nautical miles from the primary airport from 1,200 feet above the surface to an altitude of 4,000 feet above that airport's elevation. Proposed deviation from the standard has been necessary at some airports due to adjacent regulatory airspace, international boundaries, topography, or unusual operational requirements.

Definitions, operating requirements, and specific airspace designations applicable to ARSA may be found in 14 CFR Part 71, § 71.14 and § 71.501, and Part 91, § 91.1 and § 91.88.

For the reasons discussed under "Regulatory Evaluation," the FAA has determined that this proposed regulation is not a "major rule" under Executive Order 12291 and is not a "significant rule" under DOT Regulatory Policies and Procedures (44 FR 11034; February 26, 1979).

Regulatory Evaluation

The FAA has conducted a Regulatory Evaluation of the proposed establishment of these additional ARSA sites. The major findings of that evaluation are summarized below, and the evaluation is available in the regulatory docket.

a. Costs

Costs which potentially could result from the establishment of additional ARSA sites fall into the following categories:

(1) Air traffic controller staffing, controller training, and facility equipment costs incurred by the FAA.

(2) Costs associated with the revision of charts, notification of the public, and pilot education.

(3) Additional operating costs for circumnavigating or flying over the ARSA.

(4) Potential delay costs resulting from operations within an ARSA.

(5) The need for some operators to purchase radio transceivers.

(6) Miscellaneous costs.

It has been the FAA's experience, however, that these potential costs do not materialize to any appreciable degree, and when they do occur, they are transitional, relatively low in magnitude, or attributable to specific implementation problems that have been experienced at a very small minority of ARSA sites The reasons for these conclusions are presented below.

FAA expects that the additional ARSA sites proposed in this notice can be implemented without requiring additional controller personnel above current authorized staffing levels, because participation in radar services at these locations is already quite high, and the separation standards permitted in ARSA's will allow controllers to absorb the slight increase in participating traffic by handling all traffic much more efficiently. Further, because controller training will be conducted during normal working hours, and these facilities already operate the necessary radar equipment. FAA does not expect to incur any appreciable implementation costs. Essentially, the FAA will modify its terminal radar procedures at the proposed ARSA sites in a manner that will make more efficient use of existing resources.

No additional costs are expected to be incurred because of the need to revise sectional charts to incorporate the new ARSA airspace boundaries. Changes of this nature are routinely made during charting cycles, and the planned effective dates for newly established ARSA's are scheduled to coincide with the regular 6-month chart publication intervals.

This rulemaking proceeding and process will satisfy much of the need to notify the public and educate pilots about ARSA operations. The informal public meeting being held at each location where an ARSA is being proposed provides pilots with the best opportunity to learn both how an ARSA works and how it will affect their local operations. The expenses associated with these public meetings are considered costs attributable to the rulemaking process; however, any public information costs following establishment of a new ARSA are strictly attributable to the ARSA. The FAA expects to distribute a Letter to Airmen to all pilots residing within 50 miles of ARSA sites explaining the operation and configuration of the ARSA finally adopted. The FAA also has issued an Advisory Circular on ARSA's. The combined Letter to Airmen and prorated Advisory Circular costs have been estimated to be approximately $500 for each ARSA site. This cost is incurred only once upon the initial establishment of an ARSA.

Information on ARSA's following the establishment of additional sites will also be disseminated at aviation safety seminars conducted throughout the country by various district offices. These seminars are regularly provided by the FAA to discuss a variety of aviation safety issues and, therefore, will not involve additional costs strictly as a result of the ARSA program. Additionally, no significant costs are expected to be incurred as a result of the follow-on user meetings that will be held at each site following implementation of the ARSA which will allow users to provide feedback to the FAA on local ARSA operations. These meetings are being held at public or other facilities which are being provided free of charge or at nominal cost. Further, because these meetings are being conducted by local FAA facility personnel, no travel, per diem, or overtime costs will be incurred by regional or headquarters personnel.

FAA anticipates that some pilots who currently transit the terminal area without establishing radio communications or participating in radar services may choose to circumnavigate the mandatory participation airspace of an ARSA rather than participate. Some minor delay costs will be incurred by these pilots because of the additional aircraft variable operating cost and lost crew and passenger time resulting from the deviation. Other pilots may elect to overfly the ARSA, or transit below the 1,200 feet above ground level (AGL) floor between the 5- and 10-nautical-mile rings. Although this will not result in any appreciable delay, a small additional fuel burn will result from the climb portion of the altitude adjustment (which will be offset somewhat by the descent).

FAA recognizes that the potential exists for delay to develop at some locations following establishment of an ARSA. The additional traffic that the radar facilities will be handling as a result of the mandatory participation requirement may, in some instances, result in minor delays to aircraft operations. FAA does not expect such delay to be appreciable. FAA expects that the greater flexibility afforded controllers in handling traffic as a result of the separation standards allowed in an ARSA will keep delay problems to a minimum Those that do occur will be transitional in nature, diminishing as facilities gain operating experience with ARSA's and learn how to tailor procedures and allocate resources to take fullest advantage of the efficiencies that an ARSA will permit. This has been the experience at most of the locations where ARSA's have been in effect for the longest period of time and is the

recurring trend at the locations that have been more recently designated.

The FAA does not expect that any operator will find it necessary to install radio transceivers as a result of establishing the ARSA's proposed in this notice. Aircraft operating to and from primary airports already are required to have two-way radio communications capability because of existing airport traffic areas and, therefore, will not incur any additional costs as a result of the proposed ARSA's. Further, the FAA has made an effort to minimize these potential costs throughout the ARSA program by providing airspace exclusions, or cutouts, for satellite airports located within 5 nautical miles of the ARSA center where the ARSA would otherwise have extended down to the surface. Procedural agreements between the local ATC facility and the affected airports have also been used to avoid radio installation costs.

At some proposed ARSA locations, special situations might exist where establishment of an ARSA could impose certain costs on users of that airspace. However, exclusions, cutouts, and special procedures have been used extensively throughout the ARSA program to alleviate adverse impacts on local fixed base and airport operators. Similarly, the FAA has eliminated potential adverse impacts on existing flight training practice areas, as well as soaring, ballooning, parachuting, ultralight and banner towing activities, by developing special procedures to accommodate these activities through local agreements between ATC facilities and the affected organizations. For these reasons, the FAA does not expect that any such adverse impact will occur at the candidate ARSA sites proposed in this notice.

b. Benefits

Much of the benefit that will result from ARSA's is nonquantifiable and is attributable to simplification and standardization of ARSA configurations and procedures. Further, once experience is gained in ARSA operations, the flexibility allowed air traffic controllers in handling traffic within an ARSA will enable them to move traffic with both efficiency and increased safety.

Some of the benefits of the ARSA cannot be specifically attributed to individual candidate airports, but rather will result from the overall improvements in terminal area ATC procedures realized as ARSA's are implemented throughout the country. ARSA's have the potential of reducing both near and actual midair collisions at the airports where they are established. Based upon the experience at the Austin and Columbus ARSA confirmation sites, FAA estimates that near midair collisions may be reduced by approximately 35 to 40 percent. Further, FAA estimates that implementation of the ARSA program nationally may prevent approximately one midair collision every 1 to 2 years throughout the United States. The quantifiable benefits of preventing a midair collision can range from less than $100,000, resulting from the prevention of a minor nonfatal accident between general aviation aircraft, to $300 million or more, resulting from the prevention of a midair collision involving a large air carrier aircraft and numerous fatalities. Establishment of ARSA's at the sites proposed in this notice will contribute to these improvements in safety.

c. Comparison of Costs and Benefits

A direct comparison of the costs and benefits of this proposal is difficult for a number of reasons. Many of the benefits of the rule are nonquantifiable, and it is difficult to specifically attribute the standardization benefits, as well as the safety benefits, to individual candidate ARSA sites.

FAA expects that any adjustment problems that may be experienced at the ARSA locations proposed in this notice will only be temporary, and that once established, the ARSA's will result in efficient terminal area operations. This has been the experience at the vast majority of ARSA sites that have already been implemented. In addition, establishment of the proposed ARSA sites will contribute to a reduction in near and actual midair collisions. For these reasons, FAA expects that establishment of the ARSA sites proposed in this notice will produce long term, ongoing benefits that will far exceed their costs, which are essentially transitional in nature.

International Trade Impact Analysis

This proposed regulation will only affect terminal airspace operating procedures at selected airports within the United States. As such, it will have no affect on the sale of foreign aviation products or services in the United States, nor will it affect the sale of United States aviation products or services in foreign countries.

Regulatory Flexibility Determination

The Regulatory Flexibility Act of 1980 (RFA) was enacted by Congress to ensure that small entities are not unnecessarily and disproportionately burdened by government regulations. Small entities are independently owned and operated small businesses and small not-for-profit organizations. The RFA requires agencies to review rules that may have a significant economic impact on a substantial number of small entities.

The small entities that potentially could be affected by implementation of the ARSA program include the fixed-base operators, flight schools, agricultural operators and other small aviation businesses located at satellite airports within 5 nautical miles of the ARSA center. If the mandatory participation requirement were to extend down to the surface at these airports, where under current regulations participation in radar services and radio communication with ATC is voluntary, operations at these airports might be altered, and some business could be lost to airports outside of the ARSA core. FAA has proposed to exclude many satellite airports located within 5 nautical miles of the primary airport at candidate ARSA sites to avoid adversely impacting their operations and to simplify coordinating ATC responsibilities between the primary and satellite airports. In some cases, the same purposes will be achieved through Letters of Agreement between ATC and the affected airports that establish special procedures for operating to and from these airports. In this manner, FAA expects to eliminate any adverse impact on the operations of small satellite airports that potentially could result from the ARSA program. Similarly, FAA expects to eliminate potentially adverse impacts on existing flight training practice areas, as well as soaring, ballooning, parachuting, ultralight, and banner towing activities, by developing special procedures that will accommodate these activities through local agreements between ATC facilities and the affected organizations. FAA has utilized such arrangements extensively in implementing the ARSA's that have been established to date.

Further, because the FAA expects that any delay problems that may initially develop following implementation of an ARSA will be transitory, and because the airports that will be affected by the ARSA program represent only a small proportion of all the public use airports in operation within the United States, small entities of any type that use aircraft in the course of their business will not be adversely impacted.

For these reasons, the FAA certifies that the proposed regulation, if adopted, will not result in a significant economic impact on a substantial number of small entities, and a regulatory flexibility

analysis is not required under the terms of the RFA.

Aviation safety, Airport radar service areas.

The Proposed Amendment

Accordingly, pursuant to the authority delegated to me, the Federal Aviation Administration proposes to amend Part 71 of the Federal Aviation Regulations (14 CFR Part 71) as follows:

PART 71—DESIGNATION OF FEDERAL AIRWAYS, AREA LOW ROUTES, CONTROLLED AIRSPACE AND REPORTING POINTS

1. The authority citation for Part 71 continues to read as follows:

Authority: 49 U.S.C. 1348(a), 1354(a), 1510; E.O. 10854; 49 U.S.C. 106(g) (Revised Pub. L. 97-449, January 12, 1983); 14 CFR 11.69.

§ 71.501 [Amended]

2. Section 71.501 is amended as follows:

Cedar Rapids Municipal Airport, IA [New]

That airspace within a 5-mile radius of the Cedar Rapids Municipal Airport (lat. 41°53'04" N., long. 91°42'31" W.) extending upward from the surface to and including 4,900 feet MSL; and that airspace within a 10-mile radius of the airport extending upward from 2,100 feet MSL to and including 4,900 feet MSL.

Champaign University of Illinois-Willard Airport, IL [New]

That airspace within a 5-mile radius of the University of Illinois-Willard Airport (lat. 40°02'23" N., long. 88°16'40" W.) extending upward from the surface to and including 4,800 feet MSL; and that airspace within a 10-mile radius of the airport extending upward from 2,000 feet MSL to and including 4,800 feet MSL.

Chicago Midway Airport, IL [New]

That airspace within a 5-mile radius of the Midway Airport (lat. 41°47'10" N., long. 87°45'08" W.) extending upward from the surface to 3,000 feet MSL, excluding that airspace from 1,900 feet MSL to 3,000 feet MSL within the 10-mile arc of the O'Hare VOR; and that airspace within a 10-mile radius of the airport beginning at a line 2 miles northeast of and parallel to the Chicago Midway localizer course to Runway 31L clockwise to where the 10-mile arc of the O'Hare VOR intersects the 10-mile radius of the airport, thence via the O'Hare 10-mile arc, extending upward from 1,900 feet MSL to 3,000 feet MSL; excluding all airspace contained within the Chicago, IL, Terminal Control Area.

Columbus AFB, MS [New]

That airspace within a 5-mile radius of Columbus AFB (lat. 33°38'36" N., long. 88°26'36" W.) extending upward from the surface to and including 4,200 feet MSL; and that airspace within a 10-mile radius of Columbus AFB extending upward from 1,500 feet MSL to and including 4,200 feet MSL.

Jackson Allen C. Thompson Field, MS [New]

That airspace within a 5-mile radius of the Allen C. Thompson Field (lat. 32°18'36" N., long. 90°04'28" W.) extending upward from the surface to and including 4,400 feet MSL; and that airspace within a 10-mile radius of the airport extending upward from 1,700 feet MSL to and including 4,400 feet MSL.

Issued in Washington, DC, on October 1, 1987.

28 CFR Part 541

Control, Custody, Care, Treatment, and Instruction of Inmates; Interim Rule

BEST COPY AVAILABLE

VOL 52 ISS 195 OCT 8 1987 UMI

DEPARTMENT OF JUSTICE

Bureau of Prisons

28 CFR Part 541

Control, Custody, Care, Treatment, and Instruction of Inmates

AGENCY: Bureau of Prisons, Justice.

ACTION: Interim rule.

SUMMARY: In this document, the Bureau of Prisons is publishing an interim rule on Procedures for Handling of HIV Positive Inmates Who Pose Danger to Others. This rule establishes the procedures to follow when an inmate who tests HIV positive indicates by his actions or verbally a disposition to engage in conduct which poses a significant threat to transmit the virus to another person. The rule is intended to remove from the general inmate population an inmate whose conduct poses a substantial health risk to others.

DATES: Effective October 9, 1987. Comments on the interim rule must be received on or before January 29, 1988.

ADDRESS: Office of General Counsel, Bureau of Prisons, Room 770, 320 1st Street, NW., Washington, DC 20534. Comments received will be available for examination by interested persons at the above address.

FOR FURTHER INFORMATION CONTACT: Hank Jacob, Office of General Counsel, Bureau of Prisons, phone 202/272–6874.

SUPPLEMENTARY INFORMATION: In this document, the Bureau of Prisons is publishing an interim rule on Procedures for Handling of HIV Positive Inmates Who Pose Danger to Others. The rule authorizes Bureau staff to place an inmate in controlled housing status when there is reliable evidence causing staff to believe that the inmate may engage in conduct posing a health risk to others. This evidence may be the inmate's behavior, or statements of the inmate, or other reliable evidence. The rule establishes procedures for referring an inmate for placement in controlled housing status, requires the inmate be afforded a hearing, and provides for regional review of the Hearing Administrator's recommendation. The rule specifies that the inmate, consistent with available resources and security needs of the institution, is to be considered for activities and privileges afforded the general inmate population. The rule requires the inmate to have his status reviewed regularly, and identifies the factors to be considered in evaluating an inmate's readiness for release from controlled housing status.

The scope of this rule is limited to the inmate who tests HIV positive and for whom there is reliable evidence that the inmate is engaged in, or may engage in, conduct posing a health risk to others (e.g., sexual predators). To prevent the spreading of the virus to others, the Bureau has engaged in an educational program for all its inmates and staff. A person who tests HIV positive is given counseling about the risks of his behavior. When, despite such education and counseling, a person engages or shows a disposition to engage in high-risk behavior, the Bureau believes it is necessary to immediately implement procedures for removing such inmates from the general inmate population. For this reason, the Bureau finds good cause for exempting the provisions of the Administrative Procedure Act (5 U.S.C. 553) requiring notice of proposed rulemaking, the opportunity for advance public comment, and delay in effective date. While the rule will become effective immediately, the Bureau is interested in receiving public comment on this rule and suggestions on how the rule may be further refined/modified. Accordingly, the Bureau has decided to publish its policy as an interim rule with public comment invited. Public comment received on or before January 29, 1988 will be considered before publication of the final rule.

The Bureau of Prisons has determined that this rule is not a major rule for the purpose of EO 12291. The Bureau of Prisons has determined that EO 12291 does not apply to this rule since the rule involves agency management. After review of the law and regulations, the Director, Bureau of Prisons, has certified that this rule, for the purpose of the Regulatory Flexibility Act (Pub. L. 96–354), does not have a significant impact on a substantial number of small entities.

List of Subjects in 28 CFR Part 541

Prisoners.

Conclusion

Accordingly, pursuant to the rulemaking authority vested in the Attorney General in 5 U.S.C. 552(a) and delegated to the Director, Bureau of Prisons in 28 CFR 0.96(q), 28 CFR, Chapter V is amended by adding a new Subpart E to Part 541.

Dated: October 2, 1987.

J. Michael Quinlan,

Director.

SUBCHAPTER C—INSTITUTIONAL MANAGEMENT

PART 541—INMATE DISCIPLINE AND SPECIAL HOUSING UNITS

I. The authority citation for Part 541 is revised to read as follows:

Authority: 5 U.S.C. 301; 18 U.S.C. 4001, 4042, 4081, 4082, 4161–4166, 5006–5024, 5039; 28 U.S.C. 509, 510; 28 CFR 0.95–0.99.

II. Part 541 is amended by adding a new Subpart E to read as follows:

Subpart E—Procedures for Handling of HIV Positive Inmates Who Pose Danger to Others

Sec.

541.60 Purpose and scope.
541.61 Standard for placement in controlled housing status.
541.62 Referral for placement.
541.63 Hearing procedure.
541.64 Decision of the Hearing Administrator.
541.65 Regional Director review and appeal.
541.66 Programs and services.
541.67 Review of controlled housing status.
541.68 Release from controlled housing status.

Subpart E—Procedures for Handling of HIV Positive Inmates Who Pose Danger to Others

§ 541.60 Purpose and scope.

In an effort to maintain a safe and orderly environment within its institutions, the Bureau of Prisons may place in controlled housing status an inmate who tests HIV positive when there is reliable evidence that the inmate may engage in conduct posing a health risk to another person.

§ 541.61 Standard for placement in controlled housing status.

An inmate may be placed in a controlled housing status when there is reliable evidence causing staff to believe that the inmate may engage in conduct posing a health risk to others. This evidence may be the inmate's behavior, or statements of the inmate, or other reliable evidence.

§ 541.62 Referral for placement.

(a) The Warden shall consider an inmate for controlled housing status when the inmate has been confirmed as testing HIV positive and when there is reliable evidence indicating that the inmate may engage in conduct posing a health risk to others. This evidence may come from the statements of the individual, repeated misconduct (including disciplinary actions), or other behavior suggesting that the inmate may engage in predatory or promiscuous sexual behavior, assaultive behavior where body fluids may be transmitted to another, or the sharing of needles.

(b) The Warden shall submit a recommendation for referral of an inmate for placement in a controlled housing status to the Regional Director in the region where the inmate is located.

(c) Based on the perceived health risk to others posed by the inmate's threatened or actual actions, the Warden may, with the telephonic approval of the Regional Director, temporarily (not to exceed 20 work days) place an inmate in a special housing status (e.g., administrative detention, or a secure hospital room), pending the inmate's appearance before the Hearing Administrator. Reasons for this placement, and the approval of the Regional Director, shall be documented in the inmate central file. The inmate should be seen daily by case management and medical staff while in this temporary status, and a psychological or psychiatric assessment report should be prepared during this temporary placement period.

§ 541.63 Hearing procedure.

(a) The Regional Director in the region where the inmate is located shall review the institution's recommendation for referral of an inmate for controlled housing status. If the Regional Director concurs with the recommendation, the Regional Director shall designate a person in the Regional Office or a person at department head level or above in the institution to conduct a hearing on the appropriateness of an inmate's placement in controlled housing status. This Hearing Administrator shall have correctional experience, no former personal involvement in the instant situation, and a knowledge of the type of behavior that poses a health risk to others, and of the options available for dealing with an inmate who poses such a health risk to others.

(b) The Hearing Administrator shall provide a hearing to an inmate recommended for controlled housing status. The hearing ordinarily shall take place at the institution housing the inmate.

(c) The hearing shall proceed as follows:

(1) Staff shall provide an inmate with an advance written notice of the hearing and a copy of this rule at least 24 hours prior to the hearing. The notice will advise the inmate of the specific act(s) or other evidence which forms the basis for a recommendation that the inmate be placed in a controlled housing status, unless such evidence would likely endanger staff or others. If an inmate is illiterate, staff shall explain the notice and this rule to the inmate and document that this explanation has occurred.

(2) The Hearing Administrator shall upon request of the inmate provide an inmate the service of a full-time staff member to represent the inmate. The Hearing Administrator shall document in the record of the hearing an inmate's request for, or refusal of staff representation. The inmate may select a staff representative from the local institution. If the selected staff member declines for good reason or is unavailable, the inmate has the option of selecting another representative or, in the case of an absent staff member, of waiting a reasonable period (determined by the Hearing Administrator) for the staff member's return, or of proceeding without a staff representative. When an inmate is illiterate, the Warden shall provide a staff representative. The staff representative shall be available to assist the inmate and, if the inmate desires, shall contact witnesses and present favorable evidence at the hearing. The Hearing Administrator shall afford the staff representative adequate time to speak with the inmate and to interview available witnesses.

(3) The inmate has the right to be present throughout the hearing, except where institutional security or good order is jeopardized. The Hearing Administrator may conduct a hearing in the absence of the inmate when the inmate refuses to appear. The Hearing Administrator shall document an inmate's refusal to appear, or other reason for non-appearance, in the record of the hearing.

(4) The inmate is entitled to present documentary evidence and to have witnesses appear, provided that calling witnesses would not jeopardize or threaten institutional security or individual safety, and further provided that the witnesses are available at the institution where the hearing is being conducted.

(i) The evidence to be presented must be material and relevant to the issue as to whether the inmate can and would pose a health risk to others, if allowed to remain in general prison population. This evidence may come from the statements of the individual, repeated misconduct (including disciplinary actions), or other behavior suggesting that the inmate may engage in predatory or promiscuous sexual behavior, assaultive behavior where body fluids may be transmitted to others, or the sharing of needles.

(ii) Repetitive witnesses need not be called. Staff who recommend placement in a controlled housing status are not required to appear, provided their recommendation is fully explained in the record.

(iii) When a witness is not available within the institution, or not permitted to appear, the inmate may submit a written statement by that witness. The Hearing Administrator shall, upon the inmate's request, postpone any decision following the hearing for a reasonable time to permit the obtaining and forwarding of written statements.

(iv) The Hearing Administrator shall document in the record of the hearing the reasons for declining to hear a witness or to receive documentary evidence.

§ 541.64 Decision of the Hearing Administrator.

(a) At the conclusion of the hearing and following review of all material related to the recommendation for placement of an inmate in a controlled housing status, the Hearing Administrator shall prepare a written decision as to whether this placement is warranted. The Hearing Administrator shall:

(1) Prepare a summary of the hearing and of all information presented upon which the decision is based; and

(2) Indicate the specific reasons for the decision, to include a description of the act, or series of acts, or other reliable evidence on which the decision is based, along with evidence of the inmate's HIV positive status.

(b) The Hearing Administrator shall advise the inmate in writing of the decision. The inmate shall receive the information described in paragraph (a) of this section unless it is determined that the release of this information could pose a threat to individual safety, or institutional security, in which case that limited information may be withheld. The Hearing Administrator shall advise the inmate that the decision will be submitted for review of the Regional Director in the region where the inmate is located. The Hearing Administrator shall advise the inmate that, if the inmate so desires, the inmate may submit an appeal of the Hearing Administrator's decision to the Regional Director. This appeal, with supporting documentation and reasons, must be filed within five working days of the inmate's receipt of the Hearing Administrator's decision.

(c) The Hearing Administrator may order the continuation of the inmate in special housing pending review by the Regional Director. The Hearing Administrator should state the reasons for this order in the record of the Hearing.

(d) The Hearing Administrator shall send the decision, whether for or against placement in a controlled housing status, and supporting documentation to the Regional Director. Ordinarily, this is done within 20 working days after conclusion of the hearing. Any reason for extension is to be documented.

§ 541.65 Regional Director review and appeal.

(a) The Regional Director shall review the decision and supporting documentation of the Hearing Administrator and, if submitted, the information contained in an inmate's appeal. The Regional Director shall accept or reject the Hearing Administrator's decision within 30 working days of its receipt, unless for good cause there is reason for delay, which shall be documented in the record. The authority of the Regional Director may not be delegated below the level of acting Regional Director.

(b) The Regional Director shall provide a copy of his decision to the Warden at the institution housing the inmate, to the inmate, and to the Hearing Administrator.

(c) An inmate may appeal a decision of the Regional Director, through the Administrative Remedy Procedure, directly to the Office of General Counsel, Bureau of Prisons, within 30 calendar days of the inmate's receipt of the Regional Director's decision.

§ 541.66 Programs and services.

To the extent consistent with available resources and the security needs of the institution, an inmate in controlled housing status is to be considered for activities and privileges afforded to the general population. This includes, but is not limited to, providing an inmate with the opportunity for participation in an education program, library services, counseling, and religious guidance, as well as access to case management, medical and mental health assistance, and legal services, including access to the institution's law libraries. An inmate in controlled housing status should be afforded at least five hours weekly recreation and exercise out of the cell. The recreation shall be by himself or under close supervision. Unless there are compelling reasons to the contrary, institutions shall provide commissary privileges and reasonable amounts of personal property. The Warden may restrict for reasons of security, fire safety, or housekeeping the amount of personal property that an inmate may retain while in controlled housing status. An inmate shall be permitted to have a radio, provided it is equipped with ear plugs. Visits shall be carefully monitored.

§ 541.67 Review of controlled housing status.

(a) Staff designated by the Warden shall evaluate regularly an inmate's adjustment while in controlled housing status. A medical staff member shall see the inmate daily, and regularly record medical and behavorial impressions. Once every 90 days, staff, comprised of a correctional and case management supervisor, and a member of the medical staff, shall meet with the inmate. The inmate is required to attend this meeting in order to be considered for release to the general population. Any refusal by the inmate to attend this meeting will be documented. Staff, at this meeting, shall make an assessment of the inmate's adjustment while in controlled housing and the likely health threat the inmate poses to others by his actions.

(b) The Warden shall serve as the review authority at the institutional level, and shall make a recommendation to the Regional Director when he believes the inmate should be considered for release from controlled housing.

(c) An inmate may appeal a Warden's decision not to recommend release from controlled housing to the Regional Director within five working days of receipt of that decislon.

(d) Upon recommendation of the Warden, or upon appeal from the inmate, the Regional Director may decide whether or not to release the inmate to general population from controlled housing status.

(e) An inmate may appeal a decision of the Regional Director, through the Administrative Remedy Procedure, directly to the Office of General Counsel, Bureau of Prisons within 30 calendar days from the date of the Regional Director's decision.

§ 541.68 Release from controlled housing status.

(a) Only the Regional Director may release an inmate from controlled housing status. The following factors are considered in the evaluation of an inmate's readiness for return to the general population:

(1) Relationships with other inmates and staff members, which demonstrate that the inmate is able to function in a less restrictive environment without posing a health threat to others or to the orderly operation of the institution;

(2) Involvement in work and recreational activities and assignments or other programs; and

(3) Adherence to institution guidelines and Bureau of Prisons rules and policy.

(b) An inmate released from a controlled housing status may be returned to the general population of that institution, or to another federal or non-federal institution.

Part IV

Department of Transportation

Federal Aviation Administration

14 CFR Part 71

Establishment of an Airport Radar Service Area; Final Rule

VOL 52 ISS 195 OCT 8 1987 UMI

DEPARTMENT OF TRANSPORTATION

Federal Aviation Administration

14 CFR Part 71

[Airspace Docket No. 86-AWA-43]

Establishment of an Airport Radar Service Area

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Final rule.

SUMMARY: This action designates an Airport Radar Service Area (ARSA) at San Juan Luis Munoz Marin International Airport, PR. The location designated is a public airport at which a nonregulatory Terminal Radar Service Area (TRSA) is currently in effect Establishment of this ARSA will require that pilots maintain two-way radio communication with air traffic control (ATC) while in the ARSA. Implementation of ARSA procedures at this location will reduce the risk of midair collision in the terminal area and promote the efficient control of air traffic.

EFFECTIVE DATE: 0901 UTC, November 19, 1987.

FOR FURTHER INFORMATION CONTACT: Mr. Joe Gill, Airspace Branch (ATO-240), Airspace—Rules and Aeronautical Information Division, Air Traffic Operations Service, Federal Aviation Administration, 800 Independence Avenue, SW., Washington, DC 20591; telephone: (202) 267-9252.

SUPPLEMENTARY INFORMATION:

History

On April 22, 1982, the National Airspace Review (NAR) plan was published in the **Federal Register** (47 FR 17448). The plan encompassed a review of airspace use and the procedural aspects of the air traffic control (ATC) system. The FAA published NAR Recommendation 1-2.2.1, "Replace Terminal Radar Service Areas (TRSA) with Model B Airspace and Service (Airport Radar Service Areas)," in Notice 83-9 (48 FR 34286, July 28, 1983) proposing the establishment of ARSA's at Columbus, OH, and Austin, TX. Those locations were designated ARSA's by SFAR No. 45 (48 FR 50038, October 28, 1983) in order to provide an operational confirmation of the ARSA concept for potential application on a national basis The original expiration dates for SFAR 45, December 22, 1984, for Austin and January 19, 1985, for Columbus were extended to June 20, 1985 (49 FR 47176, November 30, 1984).

On March 6, 1985, the FAA adopted the NAR recommendation and amended Parts 71, 91, 103 and 105 of the Federal Aviation Regulations (14 CFR Parts 71, 91, 103 and 105) to establish the general definition and operating rules for an ARSA (50 FR 9252), and designated Austin and Columbus airports as ARSA's as well as the Baltimore/Washington International Airport, Baltimore, MD (50 FR 9250). Thus far the FAA has designated 89 ARSA's as published in the **Federal Register** in the implementation of this NAR recommendation.

On May 15, 1987, the FAA proposed to designate an ARSA at San Juan Luis Munoz Marin International Airport, PR (52 FR 18536). This rule designates an ARSA at this airport. Interested parties were invited to participate in this rulemaking proceeding by submitting comments on the proposal to the FAA. There were no adverse comments received. Additionally, the FAA has held an informal airspace meeting for this proposed airport.

Regulatory Evaluation

No comments were received that addressed the information presented in the Regulatory Evaluation of the notice. Therefore, the Regulatory Evaluation of the notice also constitutes the Regulatory Evaluation of the final rule. This document has been placed in the regulatory docket.

Briefly, the FAA finds that a direct comparison of the costs and benefits of this rule is difficult for a number of reasons. Many of the benefits of the rule are nonquantifiable, especially those associated with simplification and standardization of terminal airspace procedures. Further, the benefits of standardization result collectively from the overall ARSA program, and the estimates of potential reductions in absolute accident rates resulting from the ARSA program also cannot realistically be disaggregated below the national level. Therefore, it is difficult to specifically attribute these benefits to individual ARSA sites Finally, until more experience has been gained with ARSA operations, estimates of *both* the efficiency improvements resulting in time savings to aircraft operators, and the potential delays resulting from mandatory participation, will be quite preliminary.

ATC personnel at some facilities anticipate that the process will go very smoothly, that delays will be minimal, and that efficiency gains will be realized from the start Other sites anticipate that delay problems will dominate the initial adjustment period.

FAA believes these adjustment problems will only be temporary, and that once established, the ARSA program will result in an overall improvement in efficiency in terminal area operations at those airports where ARSA's are established. These overall gains which FAA expects for the ARSA site established by this rule typify the benefits which FAA expects to achieve nationally from the ARSA program These benefits are expected to be achieved without any additional controller staffing or radar equipment costs to the FAA.

In addition to these operational efficiency improvements, establishment of these ARSA sites will contribute to a reduction in midair collisions. The quantifiable benefits of this safety improvement could range from less than $100,000, to as much as $300 million, for each accident prevented.

For these reasons. FAA expects that the ARSA site established in this rule will produce long term, ongoing benefits which will exceed its costs, which are essentially transitional in nature.

Regulatory Flexibility Determination

Under the terms of the Regulatory Flexibility Act, the FAA has reviewed this rulemaking action to determine what impact it may have on small entities. FAA's Regulatory Flexibility Determination was published in the NPRM. Some of the small entities which could be potentially affected by implementation of the ARSA program include the fixed-base operators, flight schools, agricultural operations and other small aviation businesses located at satellite airports located within 5 miles of the ARSA center. If the mandatory participation requirement were to extend down to the surface at these airports, where under current regulations participation in the TRSA and radio communication with ATC is voluntary, operations at these airports might be altered, and some business could be lost to airports outside of the ARSA core. Because FAA is excluding some satellite airports located within the 5-mile ring to avoid adversely impacting their operations, and in other cases will achieve the same purposes through Letters of Agreement between ATC and the affected airports establishing special procedures for operating to and from these airports, FAA expects to eliminate virtually any adverse impact on the operations of small satellite airports which potentially could result from the ARSA program. Similarly, FAA expects to eliminate potential adverse impacts on existing flight training practice areas, as well as soaring, ballooning, parachuting, ultralight, and banner towing activities, by developing special procedures which

will accommodate these activities through local agreements between ATC facilities and the affected organizations. For these reasons, the FAA has determined that this rulemaking action is not expected to affect a substantial number of small entities. Therefore, the FAA certifies that this regulatory action will not result in a significant economic impact on a substantial number of small entities.

The Rule

This action designates an Airport Radar Service Area (ARSA) at San Juan Luis Munoz Marin International Airport, PR. The location designated is a public airport at which a nonregulatory Terminal Radar Service Area (TRSA) is currently in effect. Establishment of this ARSA will require that pilots maintain two-way radio communication with air traffic control (ATC) while in the ARSA. Implementation of ARSA procedures at this location will reduce the risk of midair collision in terminal areas and promote the efficient control of air traffic.

For the reasons discussed above, the FAA has determined that this regulation (1) is not a "major rule" under Executive Order 12291; and (2) is not a "significant rule" under DOT Regulatory Policies and Procedures (44 FR 11034; February 26, 1979).

List of Subjects in 14 CFR Part 71

Aviation safety, Airport radar service areas.

Adoption of the Amendment

Accordingly, pursuant to the authority delegated to me, Part 71 of the Federal Aviation Regulations (14 CFR Part 71) is amended, as follows:

PART 71—DESIGNATION OF FEDERAL AIRWAYS, AREA LOW ROUTES, CONTROLLED AIRSPACE, AND REPORTING POINTS

1. The authority citation for Part 71 continues to read as follows:

Authority: 49 U.S.C. 1348(a), 1354(a), 1510; Executive Order 10854; 49 U.S.C. 106(g) (Revised, Pub. L. 97-449, January 12, 1983); 14 CFR 11.69.

§ 71.501 [Amended]

2. Section 71.501 is amended as follows:

San Juan Luis Munoz Marin International Airport, PR [New]

That airspace extending upward from the surface to and including 4,000 feet MSL within a 5-mile radius of the Luis Munoz Marin International Airport (lat. 18°26'29" N., long. 66°00'08" W.); and that airspace extending upward from 2,800 feet MSL to 4,000 feet MSL within a 10-mile radius of the Luis Munoz Marin International Airport from the 129° bearing from the airport clockwise to the 189° bearing from the airport and that airspace extending upward from 1,700 feet MSL to 4,000 feet MSL within a 10-mile radius of the airport from the 189° bearing from the airport clockwise to the 229° bearing from the airport and that airspace extending upward from 1,200 feet MSL to 4,000 feet MSL within a 10-mile radius of the airport from the 229° bearing from the airport clockwise to the 129° bearing from the airport.

Issued in Washington, DC, on October 1, 1987.

Daniel J. Peterson,

Manager, Airspace—Rules and Aeronautical Information Division.

Office of Management and Budget

Budget Recissions and Deferrals

OFFICE OF MANAGEMENT AND BUDGET

Budget Recissions and Deferrals

To The Congress of The United States:

In accordance with the Impoundment Control Act of 1974, I herewith report 13 deferrals of budget authority totaling $1,776,737,627.

The deferrals affect programs in the Funds Appropriated to the President and the Departments of Agriculture, Defense (Military and Civil), Health and Human Services, State, Transportation, and Treasury.

The details of these deferrals are contained in the attached report.

Ronald Reagan

The White House, October 1, 1987.

BILLING CODE 3110-01-M

VOL 52 ISS 195 OC 8 1987 UMI

Appropriation title and symbol: Economic support fund 1/ 117/81037	Total budgetary resources.. 40,000,000
	Amount to be deferred: Part of year..... $ 40,000,000
	Entire year..... _____
OMB identification code: 11-1037-0-1-152	Legal authority (in addition to sec. 1013): [X] Antideficiency Act
Grant program: [X] Yes [ ] No	[ ] Other _____
Type of account or fund: [ ] Annual	Type of budget authority: [X] Appropriation
[X] Multiple-year Sept. 30, 1988 (expiration date)	[ ] Contract authority
[ ] No-Year	[ ] Other _____

Justification: This action defers funds pending approval of specific loans and grants to eligible countries by the Secretary of State after review by the Agency for International Development, and the Treasury. This will ensure that each approved program is consistent with the foreign, national security and financial policies of the United States and will not exceed the limits of available funds. This action is taken pursuant to the Antideficiency Act (31 U.S.C. 1512).

Estimated Program Effect: None

Outlay Effect: None

1/ This account was the subject of a similar deferral in 1987 (D87-1A).

Grant program: [ ] Yes [X] No
Type of account or fund:
[ ] Annual
[ ] Multiple-year _____ (expiration date)
[X] No-Year

New budget authority..... $ 54,438,000
(16 U.S.C. 490)
Other budgetary resources.. 120,425,470
Total budgetary resources.. 174,863,470
Amount to be deferred:
Part of year..... $ _____
Entire year..... 120,425,470
Legal authority (in addition to sec. 1013):
[X] Antideficiency Act
[ ] Other _____
Type of budget authority:
[X] Appropriation
[ ] Contract authority
[ ] Other _____

Justification: Purchasers of National Forest timber are required to deposit the estimated cost to the Forest Service for disposing of brush and other debris resulting from timber cutting operations pursuant to 16 U.S.C. 490. The deposits becoming available in the current year are estimated and the related disposal operations are planned for subsequent years. Many timber contracts cover several years and brush disposal operations do not occur until harvesting is completed. Weather conditions can delay both the harvesting and the brush disposal. It is difficult to predict weather conditions in advance but the work will be performed whenever factors permit. The Forest Service is planning for a stable year-to-year program which will require $54.4 million in 1988. The current fiscal year reserve of $120.4 million is established pursuant to the provisions of the Antideficiency Act (31 U.S.C. 1512) as a reserve for brush disposal operations in future years and contingencies.

Type of account or fund:
[ ] Annual
[ ] Multiple-year _____ (expiration date)
[X] No-Year

New budget authority..... $ 18,635,000
(P.L. 94-588; 16 U.S.C. 472a(h))
Other budgetary resources.. 34,840,766
Total budgetary resources.. 53,475,766

Amount to be deferred:
Part of year..... $ _____
Entire year..... 34,840,766

Legal authority (in addition to sec. 1013):
[X] Antideficiency Act
[ ] Other _____

Type of budget authority:
[X] Appropriation
[ ] Contract authority
[ ] Other _____

Justification: The Timber salvage sales fund was established under the provisions of the National Forest Management Act of 1976 to enable immediate harvesting of dead and dying trees when required by market conditions or natural catastrophes. Purchasers of dead, damaged, insect-infected or downed timber are required to make monetary deposits into this fund to cover future costs associated with this activity. A program level of $19 million for costs of sales operations in 1988 is anticipated based on historical experience. A contingency reserve is established under the provisions of the Antideficiency Act (31 U.S.C. 1512) to fund sales operations in subsequent years.

Deferral No: D88-5

DEFERRAL OF BUDGET AUTHORITY
Report Pursuant to Section 1013 of P.L. 93-344

AGENCY: Department of Agriculture Bureau: Forest Service	New budget authority..... $ 247,893,000 (16 U.S.C. 576b) Other budgetary resources.. 628,024,842 Total budgetary resources.. 875,917,842
Appropriation title and symbol: Cooperative work 1/ 12X8028	Amount to be deferred: Part of year..... $ _____ Entire year..... 628,024,842
OMB identification code: 12-8028-0-7-302	Legal authority (in addition to sec. 1013): [X] Antideficiency Act [ ] Other _____
Grant program: [ ] Yes [X] No	
Type of account or fund: [ ] Annual [ ] Multiple-year _____ (expiration date) [X] No-Year	Type of budget authority: [X] Appropriation [ ] Contract authority [ ] Other _____

Justification: Funds are received from States, counties, timber sale operators, individuals, associations, and others. These funds are expended by the Forest Service as authorized by law and the terms of the applicable trust agreements. The work consists of protection and improvement of the National Forest System and it benefits the national forest users, research investigations, reforestation, and administration of private forest lands. A program level of $248 million is anticipated, primarily in the summer of 1988, based on historical experience. Much of the work for which deposits have been or are expected to be collected cannot be done this year because of the seasonal nature of the work, scheduling delays, and extensive site preparation requirements. Examples include areas where the timber operators have not completed all of the contract obligations during the year funds are deposited. This deferral action is taken under the provisions of the Antideficiency Act (31 U.S.C. 1512).

Wildlife Conservation, Army.....	21X5095	21-5095-0-2-303	$487,971
Wildlife Conservation, Navy.....	17X5095	17-5095-0-2-303	56,000
Wildlife Conservation, Air Force....	57X5095	57-5095-0-2-303	92,461
			636,432

Justification: These are permanent appropriations of receipts generated from hunting and fishing fees in accordance with the purpose of the law -- to carry out a program of natural resource conservation. These funds are being deferred because: (1) the authorizing legislation states that installations may accumulate funds over a period of time to fund a major project, (2) the installation may be designing and obtaining approval for the project, and (3) there is a seasonal relationship between the collection of fees and their subsequent expenditure. Most of the fees are collected during the winter and spring months, while most of the program work is performed during the summer and fall months. Funds collected in a prior year are deferred in order to be available to finance the program during summer and fall months or in subsequent years. Additional amounts will be apportioned when projects are identified.

This deferral is made under the provisions of the Antideficiency Act (31 U.S.C. 1512).

Justification: This account provides funding for construction and renovation of the Social Security Administration's (SSA) headquarters and field office buildings. The only costs in 1988 are for roof repair and replacement and for close-out and claims pending for previously approved construction projects. Some additional obligations will occur in 1989 and subsequent years for roof replacement repair projects. Should new requirements arise, subsequent apportionments will reduce this deferral. This action is taken pursuant to the Antideficiency Act (31 U.S.C. 1512).

Justification: Section 501(a) of the Foreign Relations Authorization Act, 1976 (Public Law 94-141) and Section 414(b)(1) of the Refugee Act of 1980 (Public Law 96-212) amended Section 2(c) of the Migration and Refugee Assistance Act of 1962 (22 U.S.C. 2601) by authorizing a fund not to exceed $50,000,000 to enable the President to provide emergency assistance for unexpected urgent refugee and migration needs.

Executive Order No. 11922 of June 16, 1976, allocated all funds appropriated to the President for the Emergency Fund to the Secretary of State but reserved for the President the determination of assistance to be furnished and the designation of refugees to be assisted by the Fund.

These funds have been deferred pending Presidential decisions required by Executive Order No. 11922 and to achieve the most economical use of appropriations. Funds will be released as the President determines assistance to be furnished and designates refugees to be assisted by the Fund. This deferral action is taken under the provisions of the Antideficiency Act (31 U.S.C. 1512).

Justification: Funds from this account are used to continue to procure specific Congressionally-approved facilities and equipment for the expansion and modernization of the National Airspace System. The projects financed from this account include construction of buildings, the purchase of new equipment for new or improved air traffic control towers, automation of the en route airway control system, and expansion/improvement of navigational and landing aid systems. These activities were justified and provided for in the Department's regular budget submissions and were appropriated by Congress for the year in which requested. Due to the lengthy procurement and construction time for these interrelated facilities and complex equipment systems, it is not possible to obligate all the funds necessary to complete each project in the year funds were appropriated. Therefore, it is necessary to apportion funds so that sufficient resources will be available in future periods to complete these projects. This action is consistent with FAA's full funding approach and Congressional intent to provide multi-year funding for the total costs of projects. This action is taken under the provisions of the Antideficiency Act (31 U.S.C. 1512), which authorizes the establishment of reserves for contingencies.

1/ This account was the subject of a similar deferral in 1987 (D87-16A). None of the deferred funds expire at the end of FY 1988.

VOL 52 ISS 195 OC 8 1987 UMI

Deferral No: D88-13

DEFERRAL OF BUDGET AUTHORITY
Report Pursuant to Section 1013 of P.L. 93-344

AGENCY: Department of the Treasury Bureau: Office of Revenue Sharing	New budget authority..... $_____ (P.L. _____) Other budgetary resources... 2,933,115 Total budgetary resources... 2,933,115
Appropriation title and symbol: Local government fiscal assistance trust fund 1/ 20X8111	Amount to be deferred: Part of year..... $ 2,933,115 Entire year.....
OMB identification code: 20-8111-0-7-851	Legal authority (in addition to sec. 1013): [X] Antideficiency Act [X] Other 31 U.S.C. 6701-6724, particularly 31 U.S.C. 6702(d)
Grant program: [X] Yes [ ] No	
Type of account or fund: [ ] Annual [ ] Multiple-year _____ (expiration date) [X] No-Year	Type of budget authority: [X] Appropriation [ ] Contract authority [ ] Other _____

Justification: Pursuant to 31 U.S.C. 6702(d), the Secretary of the Treasury must hold in reserve an amount sufficient to meet valid remaining claims from local governments for adjustments for any prior entitlement periods. A reserve is established to permit such adjustments without the necessity for recomputation of payments to other recipients.

Estimated Program Effect: None

Outlay Effect: None

Part VI

Department of the Interior

Minerals Management Service

St. George Basin, Outer Continental Shelf Lease Sale 101; Notice

4310-MR

UNITED STATES
DEPARTMENT OF THE INTERIOR
MINERALS MANAGEMENT SERVICE

St. George Basin
Outer Continental Shelf Lease Sale 101
Call for Information and Nominations
and
Notice of Intent to Prepare an Environmental Impact Statement

CALL FOR INFORMATION AND NOMINATIONS

Purpose of Call

The purpose of the Call is to assist the Secretary of the Interior in carrying out his responsibilities under the Outer Continental Shelf Lands Act (OCSLA) (43 U.S.C. 1331-1356 (1982)), as amended by the OCSLA Amendments of 1985 (100 Stat. 147), and the regulations issued thereunder (30 CFR Part 256) with regard to proposed OCS Lease Sale 101 in the St. George Basin Planning Area tentatively scheduled for February 1990.

As a preliminary step to the Call, the Minerals Management Service (MMS) published a Request for Interest in the Federal Register on June 19, 1987, requesting information on oil and gas industry interest in leasing and exploring within the St. George Basin Planning Area. A number of companies provided information. Based on the information provided, it was determined that sufficient interest exists to proceed with the issuance of a Call at this time. This information, along with the information provided in response to this Call, will be used in decisions as to whether to proceed with the lease sale process. This Call does not indicate a preliminary decision to lease in the areas described below.

Information submitted in response to this Call will be used for several purposes. First, responses will be used to identify the areas of potential for oil and gas development. Second, comments on possible adverse effects and use conflicts will be used in the analysis of environmental impacts in and near the Call area. Together, these two considerations will allow a preliminary determination of the potential advantages and disadvantages of oil and gas exploration and development to the region and the Nation. This will make possible key decisions in connection with the next step in the leasing process—Area Identification—to further resolve conflicts by deferring blocks where there is sufficient information to justify that action. However, the Area Identification represents only a preliminary step to select the area to be analyzed in the Environmental Impact Statement (EIS). The Area Identification is scheduled for January 1988.

A third purpose for this Call is to solicit comments as part of the scoping process for the EIS. Also included in the scoping process will be a series of public meetings and an additional formal written comment period. A Notice of Intent to Prepare an EIS and a more detailed description of the scoping process for this proposed sale is included below. As a result of the scoping process, a number of alternatives to the proposed action will be identified and analyzed in the EIS. Fourth, comments may be used in developing lease terms and conditions to assure safe offshore operations. Fifth, comments may be used in understanding and considering ways to avoid or mitigate potential conflicts between offshore oil and gas activities and the Alaska Coastal Management Program.

Areas Deferred or Highlighted in the 5-Year Program Approval Process

During preparation of the 5-Year OCS Oil and Gas Leasing Program for Mid-1987 through Mid-1992, portions of the St. George Basin Planning Area were requested for deferral by the State of Alaska and the signatories to the Institute for Resource Management (IRM) Bering Sea Proposal. A portion of the area requested for deferral has been deferred and is not included in this Call. Deferrals requested by the State and the IRM that were not adopted in the 5-year program have been highlighted for special presale consideration and analysis as potential deferral alternatives in the EIS scoping process. Keeping these areas under consideration for leasing will permit MMS to study them further in the process of analysis and consultation. The acreage finally offered for sale will be that determined, through an extensive consultation and balancing process, to be environmentally sound and which may lead to exploration for and discovery of new oil and gas reserves. This is consistent with the commitment made by the Department of the Interior (DOI) in the 5-Year OCS Oil and Gas Leasing Program.

Previous Sale Related Activities

A Call for Nominations and Comments for oil and gas lease Sale 45 in the St. George Basin of the Bering Sea was issued in December 1974. The DOI selected 299 tracts totaling approximately 1.7 million acres in March 1976 for a tentative sale scheduled for early 1977. However, an EIS was never initiated, and the sale was not held.

The first Federal offshore sale in this area, OCS Oil and Gas Lease Sale 70, was held on April 12, 1983. Ninety-six leases were issued for a primary term of 10 years. Ten wells were drilled on these leases; all have been plugged and abandoned.

On April 29, 1983, the DOI initiated the presale process for Sale 89, St. George Basin, with the publication of the Call for Information in the Federal Register. The presale process continued until the issuance of the proposed Notice of Sale on May 22, 1985, comprising 11,543 blocks (about 65 million acres) and tentative lease terms for the sale scheduled for September 1985. However, on May 2, 1986, the DOI announced the cancellation of Sale 89, citing low industry interest as the basis for the decision.

Description of Area

The general area of this Call lies north of the Aleutian Islands in the Bering Sea between longitudes 174° West and 165° West and between latitudes 54° North and 59° North. A detailed map of the Call for Information and Nominations Area (hereinafter referred to as the Call map) is available free of charge from the Records Manager, Alaska OCS Region, Minerals Management Service, 949 East 36th Avenue, Anchorage, Alaska 99508-4302, telephone (907) 261-4621.

The area available for nominations and comments at this time consists of approximately 7,000 blocks (approximately 39 million acres).

The following list of Official Protraction Diagrams and block numbers identifies the Call area. It also includes those blocks that have been highlighted for special presale consideration. Highlighted blocks included in the listings are indicated in parentheses. This will enable respondents to clearly identify highlighted blocks. The diagrams may be purchased for $2.00 each from the Records Manager, Alaska OCS Region, at the address stated above.

Official Protraction Diagram NN 2-2, Pribilof Canyon (Revised August 22, 1986) All Federal blocks.

(Highlighted blocks included in the above: 1-3, 14-30, 45-51, 67-71, 89-95, 110-115, 133-145, 154-160, 177-204, 221-249, 265-293, 309-338, 353-384, 397-429, 441-474, 485-524, 529-568, 573-612, 617-656, 661-700, 705-744, 749-788, 793-832, 837-876, 881-920, 925-964, 969-1008)

Official Protraction Diagram NN 3-1, Akutan North (Revised May 21, 1985) All Federal blocks.

Blocks: 7-25, 51-69, 95-113, 139-157, 183-201, 227-245, 271-289, 315-333, 359-377, 403-421, 447-465, 491-509, 535-553, 579-597, 623-641, 667-685, 711-729, 755-773, 799-817, 843-861, 887-905, 931-949, 974-993

(All of the above listed blocks are included in the highlighted area.)

Official Protraction Diagram NO 3-7, St. George East (Revised August 22, 1986) All Federal blocks.

Instructions on Call

Respondents are requested to nominate blocks within the Call area that they would like to see included in proposed OCS Lease Sale 101. Although the identities of those submitting nominations become a matter of public record, the individual indications of interest are considered to be proprietary information. Those indicating such interest are required to do so on the Call map by outlining the area(s) of interest along block lines.

A detailed list of whole and partial blocks nominated (by Official Protraction Diagram designations) should be submitted to ensure correct interpretation of nominations. The telephone number and name of a person to contact in the respondent's organization for additional information should be included.

Respondents should rank areas in which they have expressed interest according to priority of their interest (e.g., priority 1 (high), 2 (medium), or 3 (low)). We encourage respondents to be specific in indicating blocks by priority. This information is very helpful in assessing the area to be identified for further study at future sale decision points. Blanket nominations on large areas are not useful in providing information pertinent to analysis of industry interests. Areas where interest has been indicated but on which respondents have not indicated priorities will be considered priority 3. Information concerning both location and priority of interest submitted by individual respondents will be held proprietary. In addition to indications of interest by respondents, further consideration of areas for analysis in the EIS will be based on hydrocarbon potential and environmental, economic, and multiple-use conditions.

To assist in focusing on promising acreage, the Call map outlines the MMS interpretation of the area of hydrocarbon potential. Although primary consideration will be given to those blocks included in the MMS interpretation of the area of hydrocarbon potential, respondents may nominate and are asked to comment on acreage within the entire Call area. The Call map also identifies the highlighted area that will be subject to special consideration.

Commenters who recommend that all or portions of the highlighted areas or other parts of the Call area be deferred from Sale 101 should be as specific as possible in describing why they believe those areas are incompatible with offshore oil and gas drilling and production operations. Such information will be helpful in designing and analyzing deferral alternatives.

As of August 1987, there were 38 active leases in the St. George Basin Planning Area. Respondents are encouraged to include these leased blocks in their review in the event the leases are terminated prior to the issuance of the final Notice of Sale and could, therefore, be considered in proposed OCS Lease Sale 101. In addition to nominations (indications of interest), comments are sought from all interested parties about particular geologic, environmental, biological, archaeological, or socioeconomic conditions, conflicts, or other information that might bear upon potential leasing and development in the Call area. Comments are also sought on potential conflicts that may result from the proposed sale between future OCS oil and gas activities and the Alaska Coastal Management Program (ACMP) and approved local coastal management plans. If possible, these comments should identify specific ACMP policies of concern, the nature of the conflict foreseen, and steps that MMS could take to avoid or mitigate the potential conflict. Comments may either be in terms of broad areas or restricted to particular blocks of concern. Those submitting comments are requested to list block numbers or outline the subject area on the standard Call map.

Nominations and comments must be received no later than 45 days following publication of this document in the Federal Register in envelopes labeled "Nominations for proposed St. George Basin Lease Sale 101" or "Comments on the Call for Information and Nominations for proposed St. George Basin Lease Sale 101" as appropriate. The original Call map with indications of interest and/or comments must be submitted to the Regional Supervisor, Leasing and Environment, Alaska OCS Region, at the address stated above under Description of Area. A copy of the Call map showing indications of interest and a copy of any comments are to be sent to the Chief, Offshore Leasing Management Division, U.S. Department of the Interior, Minerals Management Service, Room 4230, 18th and C Streets, NW., Washington, D.C. 20240.

Tentative Schedule

Final delineation of the area for possible leasing will be made at a later date and in accordance with established departmental procedures and applicable laws, including all requirements of the National Environmental Policy Act of 1969 (42 U.S.C. 4321, et seq.) and the OCSLA, as amended. If a decision to offer blocks is made, a Notice of Availability of the Proposed Notice and a final Notice of Sale will be published in the Federal Register detailing areas to be offered for competitive bidding, stating the terms and conditions for leasing, and announcing the location, date, and time bids will be received and opened.

The following is a list of tentative milestones which will precede this sale, proposed for February 1990.

Milestones	Date
Comments Due on the Call	November 1987
Area Identification	January 1988
Scoping Comments Due	February 1988

Draft EIS Published	February 1989
Public Hearings on Draft EIS	March 1989
Final EIS Published	August 1989
Proposed Notice of Sale Issued	September 1989
Governor's Comments Due on Proposed Notice	November 1989
Final Notice of Sale Published	January 1990
Sale	February 1990

Existing Information

Information already available for the Call area includes the results of studies and EIS analyses conducted in conjunction with previous Sale 70, previously scheduled Sale 89, and the results of past exploration activities in this planning area. Also available is information gathered during the EIS and decision processes for the 1980, 1982, and current 5-Year OCS Oil and Gas Leasing Program. In addition, comments previously received by the DOI from State and local governments, other Federal Agencies, environmental groups, the Institute for Resource Management, and the oil and gas industry concerning past OCS actions will be used.

An extensive environmental studies program has been underway in this area since 1975 (see Environmental Studies Program Information in the St. George Basin below). The following is a list of other information that will be available to the DOI for consideration regarding the proposed OCS Lease Sale 101 in the St. George Basin.

Alaska Indexes and Bering Sea Summary Reports

1. Alaska Index, December 1974 through November 1980, prepared by MMS.
2. Alaska Index, December 1980 through November 1981, prepared by MMS.
3. Alaska Index, December 1981 through April 1983, prepared by MMS.
4. Alaska Index, May 1983 through January 1985, prepared by MMS.
5. Bering Sea Summary Report, September 1983, prepared by MMS.
6. Bering Sea Summary Report, September 1984, prepared by MMS.
7. Alaska Summary Report, June 1984 through December 1985, prepared by MMS.
8. Alaska Summary/Index, January 1986 through December 1986, prepared by MMS.

Summary Reports and Indices are available for review at the MMS, Alaska OCS Region (see address under Description of Area). Also available for review are technical and geological reports. Copies of the Alaska OCS Regional Summary Reports may also be obtained from the OCS Information Program, Office of Offshore Information and Publications, Minerals Management Service, 1951 Kidwell Drive, Suite 601, Vienna, Virginia 22180.

Environmental Studies Program Information in the St. George Basin

The DOI initiated the studies in this area in 1975. The emphasis, including continuing studies, has been on geological mapping, environmental characterization of biologically sensitive habitats, physical oceanography, ocean circulation modeling, and ecological effects of oil and gas activities. These studies will provide useful information for a number of environmental issues, including, but not limited to, endangered whales, marine mammals and seabirds, and socioeconomic effects.

A complete listing of available study reports and information for ordering copies can be obtained from the Records Manager, Alaska OCS Region, at the address stated under Description of Area, or by telephone at (907) 261-4621. The reports may also be ordered, for a fee, directly from the National Technical Information Service by calling (703) 487-4650. The mailing address is U.S. Department of Commerce, National Technical Information Service, 5285 Port Royal Road, Springfield, Virginia 22161.

In addition, a program status report for continuing studies in this area can be obtained from the Chief, Environmental Studies Section, Alaska OCS Region, at the address stated under Description of Area or by telephone at (907) 261-4620.

NOTICE OF INTENT TO PREPARE AN ENVIRONMENTAL IMPACT STATEMENT

Purpose of Notice of Intent

Pursuant to the regulations (40 CFR 1501.7) implementing the procedural provision of the National Environmental Policy Act of 1969 (42 U.S.C 4321, et seq.), as amended, the MMS is announcing its intent to prepare an EIS regarding the oil and gas leasing proposal known as Sale 101 in the St. George Basin of Alaska. The Notice of Intent also serves to announce the scoping process that will be followed for this EIS. Throughout the scoping process, Federal, State, and local governments and other interested parties aid the MMS in determining the significant issues and alternatives to be analyzed in the EIS.

The EIS analysis will focus on the potential environmental effects of leasing, exploration, and development of the blocks included in the area defined in the Area Identification procedure as the proposed area of the Federal action. Alternatives to the proposal which may be considered are to delay the sale, cancel the sale, or modify the sale.

Instructions on Notice of Intent

Federal, State, and local governments and other interested parties are requested to send their written comments on the scope of the EIS, significant issues which should be addressed, and alternatives which should be considered to the Regional Supervisor, Leasing and Environment, Alaska OCS Region, at the address stated

under Description of Area above. Comments should be enclosed in an envelope labeled "Comments on the Notice of Intent to Prepare an EIS on the proposed St. George Basin Lease Sale 101." Comments are due no later than 45 days from publication of this Notice. Also, scoping meetings will be held in appropriate locations for the purpose of obtaining additional comments and information regarding the scope of the EIS. The times and locations of these scoping meetings will be announced at a future date in the Federal Register and by press release.

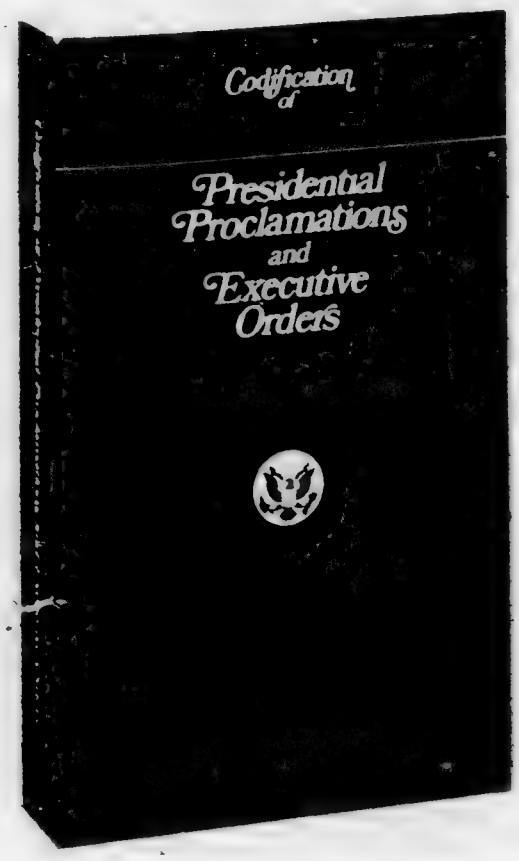
New edition now available....



For those of you who must keep informed about **Presidential Proclamations and Executive Orders,** there is a convenient reference source that will make researching these documents much easier.

Arranged by subject matter, this edition of the *Codification* contains proclamations and Executive orders that were issued or amended during the period January 20, 1961, through January 20,1985, and which have a continuing effect on the public. For those documents that have been affected by other proclamations or Executive orders, the codified text presents the amended version. Therefore, a reader can use the *Codification* to determine the latest text of a document without having to "reconstruct" it through extensive research.

Special features include a comprehensive index and a table listing each proclamation and Executive order issued during the 1961-1985 period—along with any amendments—an indication of its current status, and, where applicable, its location in this volume.

Published by the Office of the Federal Register, National Archives and Records Administration

FEDERAL REGISTER Published daily, Monday through Friday, (not published on Saturdays, Sundays, or on official holidays), by the Office of the Federal Register, National Archives and Records Administration, Washington, DC 20408, under the Federal Register Act (49 Stat. 500, as amended; 44 U.S.C. Ch. 15) and the regulations of the Administrative Committee of the Federal Register (1 CFR Ch. I). Distribution is made only by the Superintendent of Documents, U.S. Government Printing Office, Washington, DC 20402.

The **Federal Register** provides a uniform system for making available to the public regulations and legal notices issued by Federal agencies. These include Presidential proclamations and Executive Orders and Federal agency documents having general applicability and legal effect, documents required to be published by act of Congress and other Federal agency documents of public interest. Documents are on file for public inspection in the Office of the Federal Register the day before they are published, unless earlier filing is requested by the issuing agency.

The **Federal Register** will be furnished by mail to subscribers for $340.00 per year, or $170.00 for 6 months, payable in advance. The charge for individual copies is $1.50 for each issue, or $1.50 for each group of pages as actually bound. Remit check or money order, made payable to the Superintendent of Documents, U.S. Government Printing Office, Washington, DC 20402.

There are no restrictions on the republication of material appearing in the **Federal Register.**

Questions and requests for specific information may be directed to the telephone numbers listed under INFORMATION AND ASSISTANCE in the READER AIDS section of this issue.

How To Cite This Publication: Use the volume number and the page number. Example: 52 FR 12345.

Rules and Regulations

Federal Register
Vol. 52, No. 196
Friday, October 9, 1987

This section of the FEDERAL REGISTER contains regulatory documents having general applicability and legal effect, most of which are keyed to and codified in the Code of Federal Regulations, which is published under 50 titles pursuant to 44 U.S.C. 1510.
The Code of Federal Regulations is sold by the Superintendent of Documents. Prices of new books are listed in the first FEDERAL REGISTER issue of each week.

OFFICE OF PERSONNEL MANAGEMENT

5 CFR Parts 213 and 330

Placement of Military Reserve Technicians Retired for Disability; Technical Amendment

ACTION: Office of Personnel Management.

ACTION: Final rule.

SUMMARY: The Office of Personnel Management (OPM) is updating its regulations covering placement consideration and appointment in the Federal civilian service of military reserve technicians who are eligible for or receiving an annuity based on a disability that disqualifies them from military membership or from holding a military grade required by their technician employment. The revised regulations provide that the military reserve technicians may be receiving such an annuity under either the Civil Service Retirement System (CSRS) or the Federal Employees Retirement System (FERS). The regulations also provide that National Guard technicians may be appointed in the competitive service during the year immediately following their separation from technician employment, and in the excepted service thereafter. These changes are needed to reflect recent legislation.

EFFECTIVE DATE: October 9, 1987.

FOR FURTHER INFORMATION CONTACT: Tracy Spencer, (202) 632–6817.

SUPPLEMENTARY INFORMATION: Section 302(a) of Pub. L. 97–253, the Omnibus Budget Reconciliation Act of 1982, which was codified as 5 U.S.C. 8337(h) provided: (1) That a National Guard Technician who is required as a condition of employment to be a member of the National Guard or to hold a certain military grade may be eligible for disability retirement based on a disability that disqualified the individual from membership in the National Guard or from holding the required military grade; and (2) that any individual applying for or receiving an annuity under this provision "shall, in accordance with regulations prescribed by OPM, be considered by any agency of the Government before any vacant position in the agency is filled if—(A) the position is located within the commuting area of the individual's former position; (B) the individual is qualified to serve in such position as determined by the head of the agency; and (C) the position is at the same grade or equivalent level as the position from which the individual was separated."

OPM issued two regulations specifically to implement this law. Those regulations are still in effect. Subpart H of 5 CFR Part 330 provides for mandatory enrollment of eligible technicians in an OPM priority placement program. Section 213.3102(j) of 5 CFR Part 213 provides authority for the technicians' appointment. Both regulations refer to National Guard Technicians who are applying for or receiving annuities under 5 U.S.C. 8337(h). That reference is now out of date.

Employees appointed since January 1, 1984, are not covered by the Civil Service Retirement System, referenced in 5 U.S.C. 8337(h), but by the Federal Employees Retirement System (FERS). The Federal Employees Retirement Act of 1986, which established FERS, contains comparable provisions, codified in 5 U.S.C. 8457, affording disability retirement benefits and mandating placement assistance for all military reserve technicians who become disabled for their military position or grade.

OPM needs to add a reference to 5 U.S.C. 8457 in both 5 CFR 213.3102(j) and 5 CFR Part 330, Subpart H, and to expand coverage of 5 CFR Part 330, Subpart H, to all military reserve technicians (not only National Guard Technicians) to give practical effect to the legal provisions. (Reference to 5 U.S.C. 8457 is also needed in 5 CFR 330.301, which covers eligibility for the Displaced Employee Program. That change will be included in proposed regulations to be issued soon revising Subpart C of Part 330.) OPM also needs to delete the provisions in 5 CFR 330.804 for notification of the Defense Department concerning eligible National Guard Technicians who were separated between December 31, 1979, and October 1, 1982. Those provisions were needed only during initial implementation of the Reconciliation Act and are now obsolete.

The regulations in 5 CFR Part 330, Subpart H, also need to state that National Guard Technicians may be appointed in the competitive service during the year immediately following their separation from their technician employment. Public Law 99–586, codified in 5 U.S.C. 3304(d), authorizes noncompetitive appointment of technicians who are involuntarily separated (other than for cause) from their technician employment, who qualify for positions in the competitive service, and who are appointed within 1 year after separation. Previously, National Guard Technicians could be appointed only in the excepted service, and OPM's regulations referred to their placement under Schedule A or other appropriate excepted appointing authority. The Schedule A authority remains available for appointment of former technicians who do not meet the 1-year time limit for noncompetitive appointment or who do not meet competitive service qualification requirements. However, the revised regulations also refer to appointment of eligible technicians in the competitive service.

No new regulations are needed to permit appointment of other military reserve technicians covered by 5 U.S.C. 8457 because technicians other than National Guard Technicians are appointed in the competitive service and are eligible for transfer or reinstatement.

Waiver of Notice of Proposed Rulemaking and 30-day Delay of Effective Date

Under 5 U.S.C. 553 (b)(3)(B) and (d)(3), I find that good cause exists for waiving the general notice of proposed rulemaking and for making these amendments effective in less than 30 days. The regulations implement statutory placement provisions that are already in effect.

E.O. 12291, Federal Regulation

I have determined that this is not a major rule as defined under section 1(b) of E.O. 12291, Federal Regulation.

Regulatory Flexibility Act

I certify that these regulations will not have a significant economic impact on a substantial number of small entities (including small businesses, small organizational units, and small governmental jurisdictions) because they apply only to Federal employees.

List of Subjects in 5 CFR Parts 213 and 330

Administrative practice and procedures, Government employees.

U.S. Office of Personnel Management.

James E. Colvard,

Deputy Director.

Accordingly, OPM is amending 5 CFR Parts 213 and 330 as follows:

PART 213—EXCEPTED SERVICE

1. The authority citation for Part 213 is revised to read as follows:

Authority: 5 U.S.C. 3301 and 3302, E.O. 10577, 3 CFR 1954–1958 Comp., p. 218; Section 213.101 also issued under 5 U.S.C. 2103; Section 213.102 also issued under 5 U.S.C. 1104, Pub. L. 95–454, sec. 3(5); Section 213.3102 also issued under 5 U.S.C. 3301, 3302 (E.O. 12364, 47 FR 22931), 3307, 8337(h), and 8457.

§ 213.3102 [Amended]

2. In § 213.3102, paragraph (j) is amended to add "or 5 U.S.C. 8457" after the phrase "under the provisions of 5 U.S.C. 8337(h)."

PART 330—[AMENDED]

3. The authority citation for Part 330 is revised to read as follows, and the authority citations following any subparts or sections are removed:

Authority: 5 U.S.C. 1302, 3301, 3302; E.O. 10577, 3 CFR, 1954–1958 Comp., p. 218; Section 330.102 issued under 5 U.S.C. 3327; Section 330.201 issued under 5 U.S.C. 3315; Section 330.202 issued under 5 U.S.C. 7701, et seq.; Section 330.401 issued under 5 U.S.C. 3310; Subpart H issued under 5 U.S.C. 3301, 3302, 8337(h), and 8457(b).

4. In Part 330, the headnote for Subpart H is changed to substitute the phrase "Military Reserve and National Guard Technicians" for "National Guard Technicians."

5. Section 330.801 is revised to read as follows:

§ 330.801 Coverage.

This subpart applies to current or former Military Reserve and National Guard Technicians who—

(a) Are separated from such positions (or, in the case of National Guard Technicians, were separated from such positions on or after December 31, 1979) because of a medical disability that disqualified them from membership in the Army or Air Force Reserve or the National Guard or from holding the military grade required for such employment;

(b) Have not been found by OPM to be disabled under subchapter III of chapter 83 of title 5, United States Code, section 8337(a), or under subchapter V of chapter 84 of title 5, United States Code, section 8451;

(c) Have applied for or are receiving an annuity under the provisions of subchapter II of chapter 83 of title 5, United States Code, section 8337(h), or under the provisions of subchapter V of chapter 84 of title 5, United States Code, section 8457; and

(d) In the case of National Guard Technicians, are not eligible for assistance under the Displaced Employee Program described in Subpart C of this part.

6. In § 330.803, paragraph (b) is revised to read as follows:

§ 330.803 Priority referral.

* * * * *

(b) When an agency selects an individual under this subpart, it will generally employ him or her in the competitive service if he or she is eligible for reinstatement under § 315.401, for transfer under § 315.501, or for noncompetitive appointment under § 315.610 of this chapter. When the individual selected is not eligible for appointment in the competitive service, the agency may employ him or her under authority of Part 213, Subpart C, § 213.3102(j) of the excepted service or other appropriate excepted service appointing authorities.

§ 330.804 [Amended]

7. In § 330.804, paragraph (b) is removed. Paragraph (c) is redesignated as paragraph (b) and the first sentence is revised to delete the phrase "on or after October 1, 1982." The phrase "Military Reserve or National Guard" is substituted for "National Guard," throughout.

§ 330.805 [Amended]

8. In § 330.805, the phrase "Military Reserve or National Guard" is substituted for "National Guard," throughout. The phrase "or section 8455" is added after "section 8337" in paragraph (a)(3). The phrase "or section 8457" is added after "section 8337(h)(1)" and "section 8337(h)" in paragraphs (a)(4) and (b) respectively.

[FR Doc. 87–23439 Filed 10–8–87; 8:45 am]

BILLING CODE 8325–01–M

DEPARTMENT OF AGRICULTURE

Agricultural Marketing Service

7 CFR Part 913

Grapefruit Grown in the Interior District in Florida

AGENCY: Agricultural Marketing Service, USDA.

ACTION: Termination Order.

SUMMARY: This action terminates the Federal marketing order for Florida grapefruit grown in the Interior District effective October 9, 1987, because the Secretary of Agriculture has determined that the order no longer tends to effectuate the declared policy of the Agricultural Marketing Agreement Act of 1937, as amended. The Interior Grapefruit Marketing Committee met on June 18, 1987, and unanimously supported a request to the Secretary to terminate the marketing order for Florida Interior District grapefruit.

EFFECTIVE DATE: October 9, 1987.

FOR FURTHER INFORMATION CONTACT: Ronald L. Cioffi, Chief, Marketing Order Administration Branch, USDA, AMS, Fruit and Vegetable Division, South Building, P.O. Box 96456, Room 2523, Washington, DC 20090–6456; telephone (202) 447–5697.

SUPPLEMENTARY INFORMATION: This action is governed by the provisions of section 8c(16)(A) of the Agricultural Marketing Agreement Act of 1937, as amended (7 U.S.C. 601–674), hereinafter referred to as the "Act."

Marketing Order No. 913 regulates the handling of grapefruit grown in the Interior District of Florida. The order has been in effect since 1965 and provides for a maximum of 14 weekly volume regulations during a marketing season for fresh domestic shipments of grapefruit. However, no volume regulations have been in effect since the 1975–76 season, and the need for volume regulation is not expected in the foreseeable future. Furthermore, Florida grapefruit crops have been moderate in recent years because of four freezes since 1980.

At its June 18, 1987, meeting, the Interior Grapefruit Marketing Committee (IGMC) unanimously supported a request to the Secretary of Agriculture to terminate Marketing Order No. 913. This action was taken as a result of the termination of the Florida Indian River Grapefruit marketing order (M.O. 912) effective July 31, 1987. Members of the IGMC felt that volume regulation of Interior grapefruit would be ineffective since any restriction on grapefruit

shipments from the Interior area could be offset by unrestricted shipments from the Indian River area. Accordingly, the IGMC requested that the Secretary terminate the order.

Therefore, based on the foregoing considerations, Marketing Order No. 913 (7 CFR Part 913) regulating the handling of grapefruit grown in the Interior District in Florida and all rules and regulations and supplementary orders issued thereunder are hereby terminated, effective October 9, 1987.

The Food Security Act of 1985 requires the Secretary to notify Congress 60 days in advance of the termination of any Federal marketing order. Congress was so notified on July 23, 1987.

Pursuant to section 8c(16)(A) of the Act, it is found that Marketing Order No. 913, regulating the handling of Grapefruit Grown in the Interior District in Florida, issued under the Agricultural Marketing Agreement Act of 1937, as amended (7 U.S.C. 601–674), and all rules and regulations and supplementary orders heretofore issued thereunder and now effective do not tend to effectuate the declared policy of the Act.

As provided in § 913.60 of the order, on and after the effective date hereof, the members of the IGMC shall, for the purpose of liquidating the affairs of the committee, continue as joint trustees of all funds and property then in its possession or under its control, including claims for any funds unpaid or property not delivered at the time of such termination.

List of Subjects in 7 CFR Part 913

Marketing Orders, Interior, Grapefruit,

PART 913—[REMOVED]

For the reasons set forth in the preamble, 7 CFR Part 913 is removed.

Dated: October 5, 1987.

Kenneth A. Gilles,

Assistant Secretary for Marketing and Inspection Services.

[FR Doc. 87–23497 Filed 10–8–87; 8:45 am]

BILLING CODE 3410–02–M

FEDERAL HOME LOAN BANK BOARD

12 CFR Part 522

[No. 87–1037]

Organization and Operation

Date: September 30, 1987.

AGENCY: Federal Home Loan Bank Board.

ACTION: Final rule.

SUMMARY: By these amendments the Federal Home Loan Bank Board ("Board") is making minor modifications to the organizational structure of the Federal Home Loan Bank System's Office of Regulatory Policy, Oversight, and Supervision ("ORPOS"). ORPOS was established pursuant to regulation in July 1986, that became effective in September 1986. The primary purpose of this amendment is to add an Executive Director as the head of ORPOS.

EFFECTIVE DATE: October 9, 1987.

FOR FURTHER INFORMATION CONTACT: Randy W. Thomas, Legal Counsel, (202) 778–2524, ORPOS, Federal Home Loan Bank System, 900 19th Street NW., Washington, DC 20006.

SUPPLEMENTARY INFORMATION: By its Resolution No. 86–755 of July 24, 1986, the Board established ORPOS within the Federal Home Loan Bank System to improve the effectiveness of the examination and supervisory functions, which had been previously delegated to the Principal Supervisory Agents at each Federal Home Loan Bank. *See* 51 FR 27165 (July 30, 1986).

The Board has now determined that a new executive position should be added at the top of the ORPOS organizational structure. Specifically, the Board has created the position of Executive Director for Examinations and Supervision to head ORPOS.

Pursuant to 12 CFR 508.11 and 508.14, the Board finds that, because these amendments related to needed changes in Board organization management, and personnel, notice and public procedure are unnecessary, as is the 30-day delay of effective date.

List of Subjects in 12 CFR Part 522

Conflict of interests, Federal Home Loan Banks.

Accordingly, the Board hereby amends Part 522, of Subchapter B, Chapter V, Title 12, Code of Federal Regulations, as set forth below:

SUBCHAPTER B—FEDERAL HOME LOAN BANK SYSTEM

PART 522—ORGANIZATION OF THE BANKS

1. The authority citation for Part 522 continues to read as follows:

Authority: Sec. 5B, 47 Stat. 727, as added by sec. 4, 80 Stat. 824, as amended (12 U.S.C. 1425b); secs. 6–7, 47 Stat. 727, 730, as amended (12 U.S.C. 1426–1427); sec. 17, 47 Stat. 736, as amended (12 U.S.C. 1437); sec. 5, 48 Stat. 132, as amended (12 U.S.C. 1464); secs. 402–403, 407, 48 Stat. 1256–1257, 1260, as amended (12 U.S.C. 1725–1726, 1730); sec. 207, 62 Stat. 892, as added by sec. 1a, 76 Stat. 1123, as amended (18 U.S.C. 207); sec. 602, 92 Stat. 2115, as amended (42 U.S.C. 8101 *et seq.*); Reorg. Plan No. 3 of 1947, 12 FR 4981, 3 CFR, 1943–48 Comp., p. 1071; Reorg. Plan No. 6 of 1961, *reprinted in* 12 U.S.C.A. 1437 App. (West Supp. 1986).

2. Amend § 522.90 by revising paragraph (a)(2); by revising the second sentence of paragraph (b)(2); and by revising paragraph (c) to read as follows:

§ 522.90 Office of Regulatory Policy, Oversight, and Supervision.

(a) *General.* * * *

(2) ORPOS shall be headed by an Executive Director, who shall have responsibility for the performance of its functions. The Board shall appoint and fix the compensation of the Executive Director, and that person shall fix the compensation of all others. The Executive Director may, with the consent of the Board, select one or more Managing Directors. The Executive Director may select other staff as needed to carry out the functions of the office. As authorized in writing by the Executive Director, subordinate staff may exercise the functions of the Executive Director.

(b) *Functions of the Office of Regulatory Policy, Oversight, and Supervision.*

* * * * *

(2) * * * Such account shall be subject to withdrawal by a check or draft signed by the Executive Director or other persons designated in writing by the Executive Director. * * *

(c) *Budget and expenses.* ORPOS shall annually submit to the Board by December 1 a budget of its proposed expenditures for the following calendar year. After such budget has been approved by the Board, the Executive Director may make disbursements thereunder from the funds provided for in paragraph (b)(2) of this section. Following approval by the Board, the Executive Director shall transmit a copy of the budget to each of the Principal Supervisory Agents. The Executive Director may, without further authority, make a transfer from any excess allotment in the budget to any insufficient allotment. However, transfers to allotments for compensation or rental of office quarters, as well as any proposed changes that would increase the total of the approved budget, shall be submitted for approval in the same manner as the original budget was submitted. In addition, the Executive Director shall, as directed by the Board, make disbursements from the funds provided for in paragraph (b)(2) of this section in payment of such expenses and costs not covered by the

BILLING CODE 6720-01-M

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Food and Drug Administration

21 CFR Part 5

Delegations of Authority and Organization; Center for Drugs and Biologics

AGENCY: Food and Drug Administration.

ACTION: Final rule.

SUMMARY: The Food and Drug Administration (FDA) is amending the regulations for delegations of authority for approval of new drug applications and their supplements. The amendment adds to the delegation a newly established division entitled the Division of Gastrointestinal and Coagulation Drug Products in the Office of Drug Research and Review. In addition, this amendment authorizes supervisory chemists in the drug review divisions of the Center for Drugs and Biologics to approve certain chemistry, manufacturing, and control supplements to new drug applications. Also, a correction is being made in the delegations of authority regulations.

EFFECTIVE DATE: October 9, 1987.

FOR FURTHER INFORMATION CONTACT: Melissa M. Moncavage, Office of Management and Operations (HFA-340), Food and Drug Administration, 5600 Fishers Lane, Rockville, MD 20857, 301-443-4976.

SUPPLEMENTARY INFORMATION: FDA is revising § 5.80 *Approval of new drug applications and their supplements* (21 CFR 5.80) in paragraph (b)(1) to add the Director and Deputy Director, Division of Gastrointestinal and Coagulation Blood Products to the list of officials authorized to perform the functions described in § 5.80(b) for drugs under the jurisdiction of this new division. Also, FDA is correcting the introductory text of paragraph (c) by changing the word "view" to read "lieu." Finally, FDA is adding a new paragraph (d) to authorize supervisory chemists in the Divisions of Neuropharmacological Drug Products, Cardio-Renal Drug Products, Surgical-Dental Drug Products, Oncology and Radiopharmaceutical Drug Products, Gastrointestinal and Coagulation Drug Products, Office of Drug Research and Review, and the Divisions of Anti-Infective Drug Products and Metabolism and Endocrine Drug Products, Office of Biologics Research and Review to perform all the functions of the Commissioner of Food and Drugs with regard to approval of certain supplemental applications to new drug applications.

The supplements covered by § 5.80(d) are the chemistry, manufacturing, and control supplements described at 21 CFR 314.70(b) (1) and (2) (ii) through (x) and (c) (1) and (3). Authority to approve supplements that require in vivo bioavailability information or that require a change in the labeling of the drug, except labeling changes that reflect the use of a different facility or establishment either to manufacture the drug substance or to manufacture, process, or pack the drug product, are not included in this amendment. This redelegation of authority will expedite the handling and approval of supplements to new drug applications.

Further redelegation of the authority delegated is not authorized. Authority delegated to a position by title may be exercised by a person officially designated to serve in such position in an acting capacity or on a temporary basis.

List of Subjects in 21 CFR Part 5

Authority delegations (Government agencies), Organization and functions (Government agencies).

Therefore, under the Federal Food, Drug, and Cosmetic Act and under the authority delegated to the Commissioner of Food and Drugs, Part 5 is amended as follows:

PART 5—DELEGATIONS OF AUTHORITY AND ORGANIZATION

1. The authority citation for 21 CFR Part 5 continues to read as follows:

Authority: 5 U.S.C. 504, 552; 7 U.S.C. 2217; 15 U.S.C. 638, 1451 *et seq.*; 21 U.S.C. 41 *et seq.*, *61-63, 141 et seq.*; 301-392, 467f(b), 679(b), 801 *et seq.*, 823(f), 1031 *et seq.*; 35 U.S.C. 156; 42 U.S.C. 219, 241, 242(a), 242a, 242l, 242o, 243, 262, 263, 263b through 263m, 264, 265, 300u *et seq.*, 1395y and 1395y note, 3246b(b)(3), 4831(a), 10007, and 10008; Federal Caustic Poison Act (44 Stat. 1406); Federal Advisory Committee Act (Pub. L. 92-463); E.O. 11490, 11921.

2. Section 5.80 is amended by revising paragraph (b)(1) and the introductory text of paragraph (c), and by adding new paragraph (d) to read as follows:

§ 5.80 Approval of new drug applications and their supplements.

* * * * *

(b) * * *

(1) The Directors and Deputy Directors of the Divisions of: Neuropharmacological Drug Products, Cardio-Renal Drug Products, Surgical-Dental Drug Products, Oncology and Radiopharmaceutical Drug Products, and Gastrointestinal and Coagulation Drug Products, Office of Drug Research and Review, CDB.

* * * * *

(c) The following officials are authorized to perform all the functions of the Commissioner of Food and Drugs with regard to approval of abbreviated new drug applications and supplements thereto for drugs for human use and new drug applications for drugs with a 5C classification whose clinical safety and efficacy may be supported by appropriate literature citations in lieu of submission of data from original proprietary studies.

* * * * *

(d) The following officials are authorized to perform all functions of the Commissioner of Food and Drugs with respect to approval of supplemental applications to new drug applications for human use that are described by § 314.70(b) (1) and (2) (ii) through (x) and (c) (1) and (3) of this chapter. Authority to approve supplements that require in vivo bioavailability information or that require a change in the labeling of the drug, except changes that reflect only the use of a different facility or establishment, are not included in this paragraph (d). The supplemental applications to which this authorization applies may continue to be acted upon by the officials so authorized in § 5.10(a), the introductory text, and paragraphs (a) and (b) (1) and (2) of this section.

(1) The supervisory chemists of the Divisions of: Neuropharmacological Drug Products, Cardio-Renal Drug Products, Surgical-Dental Drug Products, Oncology and Radiopharmaceutical Drug Products, and Gastrointestinal and Coagulation Drug Products, Office of Drug Research and Review, CDB.

(2) The supervisory chemists of the Divisions of: Anti-Infective Drug Products and Metabolism and Endocrine Drug Products, Office of Biologics Research and Review, CDB.

Dated: October 2, 1987.

John M. Taylor,

Associate Commissioner for Regulatory Affairs.

BILLING CODE 4160-01-M

UNITED STATES INFORMATION AGENCY

22 CFR Part 526

Freedom of Information Reform Act of 1986; Regulations for the National Endowment for Democracy

AGENCY: United States Information Agency.

ACTION: Final rule.

SUMMARY: These final regulations comply with Pub. L. 99–570, entitled the "Freedom of Information Reform Act of 1986," which requires each agency subject to the Freedom of Information Act, as amended [hereinafter "FOIA"], to promulgate regulations, pursuant to notice and receipt of public comment, specifying the schedule of fees applicable to the processing of requests under FOIA and establishing procedures and guidelines for determining when such fees should be waived or reduced. Pursuant to Pub. L. 99–93 of August 16, 1985, amending the National Endowment for Democracy Act, 22 U.S.C. 1441, *et seq.*, the National Endowment for Democracy [hereinafter "NED"] must comply with the FOIA, even though it is a private, not-for-profit corporation, as opposed to a federal government agency.

EFFECTIVE DATE: November 9, 1987.

FOR FURTHER INFORMATION CONTACT: Charles Jones, Jr., Freedom of Information/Privacy Act Coordinator, Office of the General Counsel, Room M–10, United States Information Agency, 301 Fourth Street, SW., Washington, DC 20547, (202) 485–7499.

SUPPLEMENTARY INFORMATION:

A. Background

On June 16, 1987 (52 FR 22791) the United States Information Agency published in the **Federal Register** proposed amendments to 22 CFR 526.5 in order to bring NED in compliance with the Freedom of Information Reform Act of 1986. The agency invited the public to submit comments with respect to the proposed fee schedule and fee waiver regulations. Comments were to be received on or before July 16, 1987.

The agency has received four comments. Three comments came from organizations or individuals representing print and broadcast journalists. One comment came from an organization that monitors FOIA matters in general. All submissions were made part of the public record and duly considered. NED responds here to the major comments.

B. Discussion of Major Comments

1. Fee Schedule

All of the commentators expressed the view that NED should not follow various aspects of the fee schedule guidelines published pursuant to notice and public comment by the Office of Management and Budget. 52 FR 10012 (March 27, 1987). Adherance to the OMB guidelines is specifically mandated by the amended FOIA, which states that an agency's regulations governing the fee schedule shall "conform" to the OMB guidelines. 5 U.S.C. 552(a)(4)(A). Moreover, the amendments to the FOIA sought to establish "a uniform schedule of fees for all agencies." *Id.* In order to follow the plain language of the FOIA amendments and further the goal of uniformity, NED retains the fee schedule as proposed.

2. The Fee Waiver Guidelines

All of the commentators maintained that NED should not follow the factors recommended by the Deprtment of Justice, Office of Legal Policy, in meeting the statute's requirement to promulgate regulations "establishing procedures and guidelines for determining when such fees should be waived or reduced." 5 U.S.C. 552(a)(4)(A)(i). While NED recognizes that nothing in the amendments to the FOIA requires it to follow the recommendations of the Department of Justice, it has adopted many of the recommendations in an effort to clearly set out factors that NED will consider in following the statute's mandate to furnish procedures and regulations regarding reduced or waived fees. Major concerns about specific factors are discussed below.

Some commentators expressed concern over the extent to which NED detailed the factors that it would consider in determining whether to waive or reduce fees. They argued that NED should merely repeat the statutory standard or severely limit the factors it considers. The factors, however, serve the important function of identifying for requesters the information that NED will treat as significant in making its determination. Moreover, instead of expanding NED's discretion to deny fee waivers, as some of the commentators suggested, expressly delineating the factors focuses the relevant considerations to an extent not possible by simply repeating the statute's language.

Several commentators criticized the consideration of whether "the disclosure will contribute to the public at large as opposed to the individual understanding of the requester or a small segment of interested persons." Proposed § 526.5(h)(3)(i), 52 FR 22794 (June 16, 1987). They observed that Congress deleted the former fee waiver standard, which considered whether furnishing the information primarily benefited the "general public", in favor of a new standard, which focuses on a significant contribution to "public understanding." *Compare* former 5 U.S.C. 552(a)(4)(A) with 5 U.S.C. 552(a)(4)(A)(iii), as amended. They pointed to the statement of Rep. Glenn English that the new statutory standard "is intended to emphasize that a request can qualify for a fee waiver even if the issue is not shared with the public-at-large. Public understanding is disclosed to the subset of the public most interested, concerned, or affected by a particular action or matter." 132 Cong. Rec. H9464 (daily ed Oct. 8, 1986).

The language of the statute clearly contemplates something greater than a contribution to a personal interest in the subject matter of a request. As Senator Hatch noted, agencies should interpret the word " 'public'. . . so as to require a breath of benefit beyond any particularly narrow interests that might be presented." 132 Cong. Rec. S16505 (daily ed. Oct. 15, 1986). However, the change in the statutory language from a focus on the "general" public to simply "public understanding" indicates that the new standard lessens the emphasis on the impact on the public at large. In order to reflect the change in statutory language and follow the legislative history as embodied in the statements of Representative English and Senator Hatch, NED has revised the factors set out in Proposed § 526.5(h)(3)(i) and (h)(3)(iii) to reflect this contrast between a public and a primarily personal understanding. In this regard, NED has adopted the suggestion of one of the commentators that a request that serves a "primarily personal" understanding be less likely to receive a fee waiver. In addition, NED has changed rule 526(h)(4)(i) to delete the reference to the "general" public.

Three of the commentators criticized the Proposed Rule's requirement that requesters seeking a fee waiver disclose any and all commercial interests in the information requested. The grounds for this concern varied.

First, they argued that the legislative history does not support placing an obligation on the requester to describe the potential use of the information or the benefit to be derived from its release. This argument flatly contradicts the plain language of the statute, which proscribes fee waivers for requests that are "primarily in the commercial interest of the requester." This is a clear

reference to the use and benefit to be derived by the requester from the information and warrants an inquiry into these matters.

Second, the argument was advanced that the requirement only serves to create cumbersome procedural hurdles and serves no other legitimate rationale However, NED views its requirement as the most effective, open and fair method of meeting the statute's requirement. Indeed, this will obviate NED's need to use other sources to follow the FOIA's plain terms. In addition, the procedural requirements that set time constraints on both NED and the requester to establish what, if any, commercial interest exists merely clarify any procedural uncertainty that would arise if the commercial interest of the requester could not be established initially.

Two commentators suggested that the commercial interest disclosure requirement violated the Paperwork Reduction Act. The Paperwork Reduction Act does not apply to NED as a private, not-for-profit corporation. However, the simple disclosure requirement serves the interest in efficiency that underlies the Paperwork Reduction Act. It allows NED to consider the commercial interest factor with a minimum of additional information requests or outside research.

One commentator expressed concern that the section on assessment of commercial interests in granting fee waivers did not except the commercial interest of representatives of the news media from commercial interests that would prohibit a fee waiver. Given the traditional role of the news media in collecting and disseminating information to the public, NED has rewritten this section to state that the interest served by a request for records supporting the news-dissemination function of the requester will not be considered a request that is for a commercial use for purposes of a waiver.

Freedom of information.

Promulgation

After carefully reviewing the comments submitted regarding the fee schedule and fee waiver regulations, USIA amends 22 CFR Part 526 as follows:

PART 526—[AMENDED]

1. The authority citation for Part 526 is revised to read as follows:

Authority: 22 U.S.C. 4411 *et seq.;* Pub. L. No. 99–570, Secs, 1801–1804, 100 Stat. 3207–48 (1986).

2. Section 526.5 is amended by revising paragraphs (c) and (d) and by adding paragraphs (e), (f), (g) (h) and (i), as follows:

§ 526.5 Availability of NED records.

* * * * *

(c) *Definitions governing schedule of standard fees and fee waivers.* For purposes of these regulations governing fees and fee waivers:

(1) All of the terms defined in FOIA apply;

(2) A "statute specifically providing for setting the level of fees for particular types of records" means any statute that specifically requires the NED to set the level of fees for particular types of records;

(3) The term "direct costs" means those expenditures that NED actually incurs in searching for and duplicating (and in the case of commercial requesters, reviewing) documents, photographs, drawings or any other material to respond to a FOIA request. [Direct costs include the salary of the employee performing the work (the basic rate of pay for the employee plus 16% of that rate to cover benefits) and the cost of operating duplicating machinery. Not included in direct costs are overhead expenses such as costs of space, any heating or lighting, the facility in which the records are stored];

(4) The term "search" includes all time spent looking for material that is responsive to a request, including page by page or line by line identification of material within documents. Searches shall be conducted to ensure that they are undertaken in the most efficient and least expensive manner so as to minimize costs for both NED and the requester. "Search" is distinguished from "review" of material in order to determine whether the material is exempt from disclosure (*see* subparagraph (c)(6) below);

(5) The term "duplication" refers to the process of making a copy of a document, drawing, photograph, or any other material necessary to respond to a FOIA request. The copy provided by NED will be in a form that is reasonably usable by requesters;

(6) The term "review" refers to the process of examining documents that are located in response to a request that is for a commercial use (*see* subparagraph (c)(7) below) to determine whether any portion of any document located is permitted to be withheld. It also includes processing any documents for disclosure, *e.g.,* doing all that is necessary to excise them and otherwise prepare them for release. Review does not include time spent resolving general legal or policy issues regarding the application of exemptions;

(7) The term " 'commercial use' requests" refers to a request from or on behalf of one who seeks information for a use or purpose that furthers the commercial, trade, or profit interests of the requester or the person on whose behalf the request is made. In determining whether a requester properly belongs in this category, NED will determine the use to which a requester will put the documents requested. Where NED has reasonable cause to doubt the use to which a requester will put the records sought, or where that use is not clear from the request itself, NED will seek additional clarification before assigning the request to a specific category;

(8) The term "educational institution" refers to a preschool, a public or private elementary or secondary school, an institution of graduate higher education, an institution of undergraduate higher education, an institution of professional education, and an institution of vocational education, that operates a program or programs of scholarly study and/or research;

(9) The term "non-commercial scientific institution" refers to an institution that is not operated on a "commercial" basis as that term is referenced in paragraph (c)(7) of this section and that is operated solely for the purpose of conducting scientific research, the results of which are not intended to promote any particular product or industry;

(10) The term "representative of the news media" refers to any person actively gathering news for an entity that is organized and operated to publish or broadcast news to the public. The term "news" means information that is about current events or that would be of current interest to the public. Examples of news media entities include television or radio stations that broadcast to the public at large, and publishers of periodicals (but only in those instances when they can qualify as disseminators of "news") who make their products available for purchase or subscription by the general public. These examples are not intended to be all-inclusive. In the case of "free-lance" journalists, such journalists may be regarded as working for a news organization if they can demonstrate a solid basis for expecting publication through that organization even though they are not actually employed by a news organization. A publication contract would be the clearest proof, but

NED will also look to the past publication record of a requester in making this determination.

(d) *Fees to be charged—general.* NED shall charge fees that recoup the full allowable direct costs it incurs. NED shall use the most efficient and least costly methods to comply with requests for documents, drawings, photographs, and any other materials made under the FOIA.

(e) *Specific fees.* The specific fees for which NED shall charge the requester when so required by the FOIA are as follows:

(1) Manual searches for records—$8.00 per hour for clerical personnel; $15.00 per hour for supervisory personnel;

(2) Computer searches for records—In any case where a computer search is possible and the most efficient means by which to conduct a search, NED will charge the cost of operating the central processing unit for that portion of operating time that is directly attributable to searching for records responsive to a FOIA request and the operator-programmer salary apportionable to the search. The charge for the cost of the operator-programmer time shall be based on the salary of the operator-programmer plus 16 percent;

(3) Review of records—Requesters who seek documents for commercial use shall be charged for the time NED spends reviewing records to determine whether such records are exempt from mandatory disclosure. These charges shall be assessed only for the initial review; *i.e.*, the review undertaken the first time NED analyzes the applicability of a specific exemption to a particular record or portion of a record. Neither NED nor the United States Information Agency will charge for review at the administrative appeal level for an exemption already applied. However, NED will charge for review of records or portions of records withheld in full under an exemption that is subsequently determined not to apply. The fee for review as that term is used in these regulations shall be $15.00 per hour;

(4) Duplication of records—(i) making photocopies—15¢ per page; (ii) for copies prepared by computer, such as tapes or printouts, NED shall charge the actual cost, including operator time, of production of the tape or printout; (iii) for other methods of reproduction or duplication, NED shall charge the actual direct costs of producing the document(s);

(5) Other charges—(i) there shall be no fee for a signed statement of non-availability of a record; (ii) NED will not incur expenses arising out of sending records by special methods such as express mail;

(6) Restrictions on assessing fees—With the exception of requesters seeking documents for a commercial use, section (a)(4)(A)(iv) of the Freedom of Information Act, as amended, requires NED to provide the first 100 pages of duplication and the first two hours of search time without charge. NED shall not charge fees to any requester, including commercial use requesters, if the cost of collecting a fee would be equal to or greater than the fee itself. NED will not begin to assess fees until it has first provided the above-referenced free search and reproduction. The elements to be considered in determining the "cost of collecting a fee" are the administrative costs to NED of receiving and recording a requester's remittance and processing the fee for deposit in NED's account. For purposes of these restrictions on assessment of fees, the word "pages" refers to paper copies of a standard size, which will normally be 8½ x 11 or 11 x 14. Thus, for example, requesters shall not be entitled to 100 microfiche or 100 computer disks without charge.

(f) *Fees to be charged—categories of requesters.* There are four categories of FOIA requesters: commercial use requesters; educational and non-commercial scientific institutions; representatives of the news media; and all other requesters. The fees to be charged each of these categories of requesters are as follows:

(1) Commercial use requesters—when NED receives a request for documents for commercial use, it shall assess charges that recover the full direct costs of searching for, reviewing for release, and duplicating the records sought. Commercial use requesters are entitled to neither two hours of free search time nor 100 free pages of reproduction of documents. NED shall recover the cost of searching for and reviewing records even if there is ultimately no disclosure of records. Requesters must reasonably describe the records sought;

(2) Educational and non-commercial scientific institution requesters—NED shall provide documents to educational and non-commercial scientific institution requesters for the cost of reproduction alone, excluding charges for the first 100 pages of duplication. To be eligible for inclusion in this category, requesters must show that the request is being made as authorized by and under the auspices of a qualifying institution and that the records are not sought for a commercial use, but are sought in furtherance of scholarly (if the request is from an educational institution) or scientific (if the request is from a non-commercial scientific institution) research. Requesters must reasonably describe the records sought;

(3) Requesters who are representatives of the news media—NED shall provide documents to requesters who are representatives of the news media for the cost of reproduction alone, excluding charges for the first 100 pages. To be eligible for inclusion in this category, a requester must meet the criteria in subsection (c)(10) above, and the request must not be made for a commercial use. A request for records supporting the news-dissemination function of the requester shall not be considered to be a request that is for a commercial use. Requesters must reasonably describe the records sought;

(4) All other requesters—NED shall charge requesters who do not fit into any of the above categories those fees that recover the full reasonable direct costs of searching for and reproducing records that are responsive to the request, except that the first 100 pages of reproduction and the first two hours of search time shall be furnished without charge. Requesters must reasonably describe the records sought.

(g) *Assessment and collection of fees* (1) NED shall assess interest charges on an unpaid bill starting on the 31st day following the day on which the billing was sent. The fact that the fee has been received by NED, even if not processed, will suffice to stay the accrual of interest. Interest will be at the rate prescribed in section 3717 of Title 31 of the United States Code and will accrue from the date of the billing.

(2) Charges for unsuccessful searches—If NED estimates that search charges are likely to exceed $25.00, it shall notify the requester of the estimated amount of fees unless the requester has indicated in advance a willingness to pay fees as high as those anticipated. Such notice shall offer the requester the opportunity to confer with agency personnel with the object of reformulating the request to meet the requester's needs at a lower cost. Dispatch of such a notice of request shall suspend the running of the period for response by NED until a reply is received from the requester.

(3) Aggregating requests—Except for requests that are for a commercial use, NED shall not charge for the first two hours of search time or for the first 100 pages of reproduction. However, a requester may not file multiple requests at the same time, each seeking portions of a document or documents, solely in order to avoid payment of fees. When NED reasonably believes that a

VOL
52
ISS
196
OC
9
1987
UMI

requester or a group of requesters acting in concert are attempting to divide a request into a series of requests for the purpose of evading the assessment of fees, NED shall aggregate any such requests and charge accordingly. One element to be considered in determining whether a belief would be reasonable is the time period in which the requests have been made. Before aggregating requests from more than one requester, NED must have a concrete basis on which to conclude that the requesters are acting in concert and are acting specifically to avoid payment of fees. In no case shall NED aggregate multiple requests on unrelated subjects from one requester.

(4) Advance payments—NED shall not require payment for fees before work has commenced or continued on a request unless:

(i) NED estimates or determines that allowable charges that a requester may be required to pay are likely to exceed $250.00. In this event, NED shall notify the requester of the likely cost and may require an advance payment of an amount up to the full amount of estimated charges; or

(ii) A requester has previously failed to pay a fee charged within 30 days of the date of billing.

In this event, NED shall require the requester to pay the full amount owed plus any applicable interest as provided above or demonstrate that he or she has, in fact, paid the fee, and to make an advance payment of the full amount of the estimated fee before NED begins to process a new request or a pending request from that requester.

(iii) When NED acts under paragraphs (g)(4) (i) or (ii) above, the administrative time limits prescribed in subsection (a)(6) of the FOIA will begin only after NED has received fee payments described above.

(5) Form of payment—Remittances shall be in the form of a personal check or bank draft drawn on any bank in the United States, a postal money order, or cash. Remittances shall be made payable to the order of: National Endowment for Democracy. NED will assume no responsibility for cash lost in the mail.

(h) *Fee waiver or reduction.* NED shall furnish documents without charge or at a charge reduced below the fees established by these regulations if disclosure of the information is in the public interest because the disclosure of the information is likely to contribute significantly to public understanding of the operations or activities of government and is not primarily in the commercial interest of the requester. In making a determination under this subsection, NED shall consider these factors in the following order:

(1) Whether the subject of the request for documents concerns the operations or activities of the government. For purposes of determining whether this factor is met:

(i) Records generated by a non-government entity are less likely to respond to a request for documents concerning the operations or activities of the government;

(ii) Records that are sought for their intrinsic informational content apart from their informative value with respect to specific activities or operations of government are less likely to meet this factor.

(2) Whether the information requested is likely to contribute to an understanding of government operations or activities. For purposes of determining whether the request meets this factor:

(i) NED will consider the extent to which the information requested already exists in the public domain;

(ii) NED will consider the extent to which the value of the information relates to an understanding of government operations or activities as opposed to the extent to which the information relates to other subjects.

(3) Whether the information requested will contribute to public understanding of government operations or activities. For purposes of determining whether the request meets this factor:

(i) NED will consider whether the disclosure will contribute to a public understanding as opposed to a primarily personal understanding of the requester;

(ii) NED will consider the identity of the requester to determine whether such requester is in a position to contribute to public understanding through disclosure of the information. Requesters shall describe their qualifications to satisfy this consideration;

(iii) NED will consider the expertise of the requester and the extent to which the expertise will enable the requester to extract, synthesize and convey the information to the public. Requesters shall describe their qualifications to satisfy this consideration;

(4) Whether the contribution to public understanding will be significant. In determining whether this factor has been met:

(i) NED will consider whether the public's understanding of the subject matter in question is likely to be enhanced by the disclosure of information by a significant extent;

(ii) NED will compare the likely level of public understanding of the subject matter of the request before and after disclosure.

(5) After NED is satisfied that factors (h) (1) through (4) have been met, it will consider whether the requested disclosure is primarily in the commercial interest of the requester.

(i) For purposes of this subsection, "commercial interest" is one that furthers a commercial, trade, or profit interest as those terms are commonly understood. Under this subsection, a "commercial interest" shall not be an interest served by a request for records supporting the news dissemination function of the requester. All requesters who seek a fee waiver under section (h) of these regulations must disclose any and all commercial interests that would be furthered by the requested disclosure. NED shall use this information, information in its possession, reasonable inferences drawn from the requester's identity, and the circumstances surrounding the request to determine whether the requester has any commercial interest that would be furthered by the disclosure. If information that NED obtains from a source other than the requester or reasonable inferences or other circumstances are used in making a determination under this paragraph (h)(5), NED shall inform the requester of the information, inferences or circumstances that were used in its initial determination. The requester may, prior to filing an appeal of the initial determination with the President of NED or his designee under paragraph (a)(2) of this section, provide further information to rebut such reasonable inferences, or to clarify the circumstances of the request to the person responsible for the initial determination. Such action by the requester must occur within 20 days of the initial determination by NED. Within 10 days of receipt of such further information, clarification, or rebuttal, NED shall respond to the additional information, reverse or affirm its original position and state the reasons for the reversal or affirmation. Receipt of an affirmation by the requester shall constitute an initial denial of a request for purposes of the appeal process described in paragraphs (a) and (b) of this section.

(ii) NED shall consider the magnitude of the requester's commercial interest. In making a determination under this factor, NED shall consider the role that the disclosed information plays with respect to the requester's commercial interests and the extent to which the disclosed information serves the range of commercial interests of the requester.

(iii) NED shall weigh the magnitude of the identified commercial interest of the

requester against the public interest in disclosure in order to determine whether the disclosure is primarily in the commercial interest of the requester. If the magnitude of the public interest in disclosure is greater than the magnitude of the requester's commercial interest, NED shall grant a full or partial fee waiver.

(6) In determining whether to grant a full or partial fee waiver, NED shall, to the extent possible, identify the portion of the information sought by the requester that satisfies the standard governing fee waivers set forth in FOIA, as amended, 5 U.S.C. 552(a)(4)(A)(iii), and in paragraphs (h) (1) through (6) of this section, and grant a fee waiver with respect to those documents. Fees for reproduction of documents that do not satisfy these standards shall be assessed as provided in paragraphs (c) through (g) of this section.

(i) Except as provided in paragraph (h)(5)(i) of this section, a requester may appeal a determination of the fees to be charged or waived under these regulations as he or she would appeal an initial determination of documents to be disclosed under paragraphs (a) and (b) of this section.

Dated: September 30, 1987.

C. Normand Poirier,

Acting General Counsel.

42 CFR Parts 405, 412, 413, 466

[BERC-400-CN]

Medicare Program; Changes to the Inpatient Hospital Prospective Payment System and Fiscal Year 1988 Rates

AGENCY: Health Care Financing Administration (HCFA), HHS.

ACTION: Final rule.

SUMMARY: In the September 1, 1987 issue of the **Federal Register** (FR Doc. 87-19988), beginning on page 33034, we revised the Medicare inpatient hospital prospective payment system and set forth the prospective payment rates for FY 1988. This notice corrects inadvertent errors we made in that document.

FOR FURTHER INFORMATION CONTACT: Linda Magno, (301) 594-9343.

SUPPLEMENTARY INFORMATION:

We are making the following corrections to the September 1, 1987 document:

1. On page 33135, in the last paragraph of the third column, in the eighth line, "216" should read "238".

2. On page 33136, in the first column, in the twelfth line, "$8 million" should read "$4 million" and, in the thirteenth line, "$33,600" should read "$17,000."

(Catalog of Federal Domestic Assistance Program No. 13.773, Medicare—Hospital Insurance Program)

Dated: October 5, 1987.

Raffie Shahrigian,

Acting Deputy Assistant Secretary for Administrative and Management Services.

BILLING CODE 4120-01-M

DEPARTMENT OF TRANSPORTATION

Maritime Administration

46 CFR New Part 383

Preference Cargoes

AGENCY: Maritime Administration, Department of Transportation.

ACTION: Final rule.

SUMMARY: The Maritime Administration (MARAD) is issuing this final rule to establish new administrative procedures and methodology for determining fair and reasonable rates for the carriage of dry bulk preference cargoes in less than full shiploads on United States-flag commercial liner vessels. These regulations require operators to submit data on the operating and capital costs of their vessels. On the basis of these data, MARAD will calculate fair and reasonable guideline rates according to the method explained in the Supplementary Information Section of these regulations.

DATE: This rule is effective November 9, 1987, for application to fair and reasonable rate determinations for the carriage by liner vessels of dry bulk preference cargoes in less than full shiploads on or after July 1, 1988.

FOR FURTHER INFORMATION CONTACT: Arthur B. Sforza, Director, Office of Ship Operating Assistance, Maritime Administration, Washington, DC 20590, Telephone No. 366-2323.

SUPPLEMENTARY INFORMATION: Section 901(b)(1) of the Merchant Marine Act of 1936, as amended (46 U.S.C. 1241(b)) (Act), requires that at least 50 percent of any equipment, materials or commodities generated by the United States or for the account of any foreign nation without provision for reimbursement, or acquired as the result of funds or credits from the United States, should be transported on privately owned U.S.-flag commercial vessels to the extent that such vessels are available at fair and reasonable rates. In 1985, section 901 was amended to exclude certain programs from the application of cargo preference and to raise the U.S.-flag share for certain other programs to 75 percent, phased in over three years.

Section 901 requires that all affected shipper agencies comply with regulations issued by MARAD (by delegation from the Secretary of Transportation). While a substantial number of Federal agencies generate preference cargoes, the preponderance of shipper tonnage subject to cargo preference is generated by the Department of Defense (DOD), U.S. Department of Agriculture (USDA), Department of State's Agency for International Development (AID), Department of Energy's Strategic Petroleum Reserve, and the Export Import Bank. The principal agencies generating parcel lots of dry bulk preference cargoes are USDA and AID.

In 1981, the U.S. District Court for the District of Columbia (District Court), in response to a claim that the Maritime Subsidy Board (MSB) had no rate setting authority, held that the MSB has broad authority under section 901 of the Act to establish the rate formula and to provide guidance to other departments and agencies. The case was appealed to the U.S. Court of Appeals for the District of Columbia (Court of Appeals). In November 1982, the Court of Appeals upheld the previous ruling that the MSB has authority to set rates but it instructed the District Court to remand that particular case to the MSB for further proceedings on the reasonableness of the rate involved.

For many years, MARAD has determined fair and reasonable rates for the carriage of civilian preference cargoes on bulk cargo vessels and provided guidance to the shipper agencies. However, no formal rate guidance has been provided for the carriage of preference cargoes on liner vessels except for full shiploads. Fair and reasonable rates for the carriage of full shiploads of preference cargoes on liner vessels have been determined in the same manner as bulk vessel rates. The rates charged by liner companies for less than full shiploads have been a function of vessel costs and market forces. Decisions as to the reasonableness of such liner rates have been a function of the individual U.S. government agency controlling the cargo. The lack of fair and reasonable

VOL 52 ISS 196 OCT 9 1987 UMI

rate standards for the carriage of non-competitive preference cargoes on liner vessels has recently been criticized. The President's Private Sector Survey on Cost Control (the Grace Commission) cited the need for regulatory standards to limit the cost of transporting preference cargoes on U.S.-flag liner vessels. Further, a General Accounting Office report entitled "Transportation of Pub. L. 480 Commodities—Efforts Needed to Eliminate Unnecessary Costs", included a recommendation to establish a system of fair and reasonable rates for the carriage of preference cargoes by liner vessels in less than full shiploads. However, this regulation is limited in scope to the carriage of dry bulk parcels for reasons provided later in the discussion of the comments.

In response to these recommendations, MARAD developed a system for determining fair and reasonable rates for the liner vessel carriage of dry bulk preference cargoes in less than full shiploads. On February 10, 1986, MARAD published in the **Federal Register** (51 FR 5012) a notice of proposed rulemaking (NPRM) to issue new regulations in 46 CFR Part 383 which set forth appropriate fair and reasonable rate procedures (Docket R–104). MARAD also published simultaneously proposed amendments to 46 CFR 381 which includes procedures governing the evaluation of preference cargo bids by shipper agencies (Docket R–105). The notices provided a period for public comment with respect to each proposal that was to expire on April 11, 1986, but which was subsequently extended to May 12, 1986 at the request of interested parties.

Comments

MARAD's response to the comments submitted on the dual notices of Docket R–104 and R–105 have been separated by subject matter. Comments addressing the determination of fair and reasonable rates, Docket R–104, were received from USDA, AID, the Council of American-Flag Ship Operators (CASO), Sea-Land Service, Inc., Coordinated Caribbean Transport, OMI Corp., and Waterman Steamship Corporation. The comments concerning Docket R–104 are summarized and evaluated below. Comments relating to Docket R–105 will be addressed in a separate rulemaking procedure.

Rate of Return

CASO and AID raised questions concerning the use of the Fortune 500 rate of return in calculating the return on investment.

CASO believes the Fortune 500 rate is inadequate and too low for the risk involved. The Fortune 500 are seen by CASO as operating in a more stable, low risk environment while shipping is a high risk venture. In shipping, the return generated from voyages in good markets is viewed as necessary to make up for losses on voyages made during bad markets. CASO suggested that the return rate should not be fixed, but should be a floating rate, indexed and tied to the shipping market.

On the other hand, AID believes that the Fortune 500 rate is excessive. It also believes that the rate of return should be indexed and directly related to the shipping market, but wants the rate based on an index for transportation stocks or some other maritime-related index.

After reviewing the comments, MARAD believes that there is merit in the idea of basing the rate of return on a transportation related index. Accordingly, MARAD has modified the regulation to provide for a rate of return based on the most recent rate of return on stockholder'a equity for a representative cross section of transportation industry companies, including maritime carriers. Like the Fortune 500 rate previously proposed by MARAD, such an index would have the advantage of reflecting a wide range of risks, but would be restricted to companies in maritime or transportation-related businesses.

Full Cost Recapture

USDA objected to the proposal for use of full cost recapture and continuous profitability in the calculation of the capital component on the grounds that such an assumption is arbitrary and ignores the fluctuations of the business cycle.

MARAD's purpose for issuing a regulation is to produce a fair and reasonable guideline rate that, as required by law, is fair and reasonable to all parties involved. In essence the operator should receive reasonable compensation including a fair profit. This premise is consistent with the Comptroller General's Opinion B–95832, dated February 17, 1955, defining the term "fair and reasonable." It is affirmed by the findings of the United States Court of Appeals, regarding similar matters, in *Aeron Marine Shipping Co., et al.* v. *United States* (695 F. 2d 567 (D.C. Cir 1982)) and is reaffirmed in the Final Opinion and Order issued by the Maritime Subsidy Board in Docket A–132 served on December 22, 1983. Consequently, full cost recapture with inclusion of a fair profit will be retained.

Operating Costs

In general, the greatest number of comments regarding the fair and reasonable guideline rate were generated by the section on operating costs. Three of the commenters provided numerous comments on this subject. The comments were divided into two main categories, i.e., those related to the use of fleet averaging and those addressing the applicability of the data used to generate the rate.

With regard to the use of averaging, some commenters requested that MARAD clarify what is meant by "fleetwide average" and whether the fleet to be averaged is composed of all of the vessels participating in the preference cargo program or only those which make up an individual operator's fleet.

The methodology set forth in the NPRM would have utilized aggregate fleetwide averages on all vessels in the program for determining daily operating costs, voyage length, and tons carried. After reviewing the comments and after additional study of the matter, MARAD has decided to modify its methodology.

With the exception of fuel, the daily operating costs used in the fair and reasonable rate calculation will be an aggregate average of only those vessel types considered appropriate for carriage of bulk preference cargoes. An average of all breakbulk, partial container and LASH vessel operating costs will be used to determine the operating cost component. Ro/Ro and full container vessels will be excluded from the calculation. Fuel was eliminated from the cost averaging since that cost element has been influenced by dramatic fluctuations in the past, a point raised by two of the commenters. Instead, daily fuel coats will be determined separately from all other operating costs and will be based on the individual vessel's fuel consumption characteristics and current fuel prices.

The daily capital costs will be determined on the basis of each vessel's total capitalized cost and applicable interest rates for indebtedness. The capital component will include depreciation, interest, return on working capital, and return on equity.

To determine the operating, fuel, and capital components as costs per ton, the methodology has been revised to utilize the operator's total number of voyage days and total payable tons per sailing for the vessel type and service for which the fair and reasonable rate is being calculated. The voyage data will be historical data from the previous year as provided in each operator's information

submission. The daily operating and capital expenses will be multiplied by the historical number of voyage days per sailing, and will then be divided by the historical cargo tons per sailing to determine those components as costs per ton. The daily fuel cost at sea and in port, derived from current prices and the vessel's characteristics, will be multiplied by the corresponding days at sea and in port, for the historical voyage as indicated by the operator's submission, and will be divided by the historical cargo tons per sailing.

MARAD's determination of the port and cargo handling component will be based on cargo tender terms, and will include the estimated costs of loading and discharging the preference cargo at the ports of origin and destination. The port and cargo handling costs will be divided by the amount of preference cargo tons to provide the port and cargo handling component as a cost per ton.

The methodology has been further revised to provide for brokers' commissions and an allowance for general and administrative expenses in the fair and reasonable rate. After the operating component, fuel component, capital component, and port and cargo handling component, each expressed as a cost per ton, have been added together, the sum will be increased by four percent to yield the total rate.

Specific comments regarding the adequacy of the averaging concept and MARAD's responses to them follow.

Several commenters observed that fleetwide averaging would not reflect individual vessel operating characteristics due to differences in vessel size, crew size and vessel design. They also suggested that variations in fixed costs are not accounted for in the guideline rate and that such variations should be investigated before the guideline formula is finalized.

The methodology set forth herein will utilize historical voyage data of the operator's vessel type making the preference cargo voyage on a service similar to or the same as the preference cargo voyage. This should alleviate many of the problems created by variations in vessel size, age and design. It is also felt that averaging, over a period of time, would tend to eliminate, rather than emphasize cost differentials based on vessel characteristics.

The comments also claimed that cost averaging provides no variance for weather, time of year, trade fluctuations, and political situation, and that averaging does not account for cost variables due to regional differences and quality of operator service.

In MARAD's view, the change in methodology to emphasize vessel type and service will alleviate many of these variances. Regional and political factors would only affect the loading and discharging of cargo and would be considered when determining the port and cargo handling component.

As noted earlier, comments were received regarding the adequacy of the data gathered. The commenters stated that annual fluctuations in operating costs would make a guideline rate based on prior year averages meaningless. Such data would be stale and would not reflect current costs. Certain commenters suggested that more frequent calculations be used. At the same time, some commenters requested that MARAD clarify how the rate would be implemented for the first year.

With regard to the currency of the data used, MARAD agrees that some method for updating the historical data is required. To satisfy this requirement, the final rule provides that the aggregate cost data will be escalated to the current year. With respect to implementation of the system, MARAD currently envisions that first year implementation will be done on the basis of data already filed with MARAD in the operators' MA–172s. Operators not currently filing MA–172s would be given the opportunity to supply the required data upon entering the program. After the first year, all operators wishing to participate in a given year would be required to make timely data filings.

Finally, one respondent states that cost averaging is discriminatory. If the calculation of the average is derived from components of which half are above and half below the average, the resulting guideline rate will be discriminatory to those operators in the upper half.

Theoretically this is true. However, in reality, the actual skew of the average will be toward whichever end of the scale is most represented. If more high cost operators participate in the parcel carriage of dry bulk preference cargoes, the result will be fair and reasonable rates which are skewed to the high cost end of the rate scale. However, if participants are primarily low cost, efficient operators, rates will be on the low end of the scale. If participants are low cost operators, economy and efficiency should be encouraged since rate determinations would favor lower cost operators. The Comptroller General's Opinion B–95832, of February 17, 1955, stated that "fair and reasonable" may not necessarily be fair and reasonable to all parties, so long as the effect of the application of the fair and reasonable concept to an action results in overall fair and reasonable results.

Free Market

Liner vessel freight rates for parcel lots of bulk cargoes have traditionally been based on market conditions at the time of the voyage. One commenter believes that the guideline rate ignores this free market system, and prevents an operator from recouping in good markets, the losses it may have incurred for voyages made during bad markets. This would be especially true in cases where competitive factors cause the operator to receive less-than guideline rates on a regular basis. Accordingly, the commenter contends the guideline rate may not be fair and reasonable. The commenter further suggests that the guideline rate should be based on a comparison system with foreign carriers to determine if U.S.-flag operators are receiving premium rates for their trade.

As mentioned previously, the purpose of this regulation is to provide a system of rates that is fair to both shippers and carriers and to promote competitive efficiency between the operators. The rate system should provide rates high enough to induce U.S.-flag operators to carry preference cargoes and earn a fair profit consistent with the directions of the United States Court of Appeals for the District of Columbia in its findings on November 23, 1982 related to a claim by Aeron Marine Shipping Company in Docket A–132. While it is true that regulatory setting of guideline rates could interfere with the free market rate system on infrequent occasions, MARAD must insure that rates charged for the carriage of preference cargoes are fair and reasonable as required by law. MARAD believes that the rate methodology being set forth produces a fair and reasonable rate within an environment wherein no direct foreign-flag competition exists for up to 50 percent of the preference cargoes reserved for U.S.-flag vessels.

De facto Amendment of ODSAs

One commenter suggested that the implementation of fair and reasonable rate regulation amounts to a de facto amendment of subsidized operators' Operating Differential Subsidy Agreements (ODSA) without the benefit of due process pursuant to section 606 of the Merchant Marine Act, 1936, as amended.

This argument appears in comments on both Dockets R–104 and R–105. MARAD wishes to stress that in no way is any operator's ODS adjusted, rebated, recaptured or abated as a result of either regulation. Accordingly, no "amendment" of ODSAs will occur upon implementation of these procedures.

VOL
52
ISS
196
OC
9
1987
UMI

One Way Trip

It has been noted that the guideline rate is calculated on the basis of a round voyage, and it has been suggested by a commenter that the calculation be based, instead, on a one-way trip since a liner vessel normally picks up and discharges cargo throughout a voyage.

While a liner vessel does indeed continually pick up and discharge cargo, the overall profitability of the voyage depends upon the degree to which revenues taken in on cargoes carried exceed the cost of the entire voyage. Virtually no cargo makes a complete round voyage on a liner vessel, but the opportunity cost of carrying that cargo is directly related to the total voyage cost. Accordingly, MARAD believes that in order to attain profitability, any rate, including the guideline rate, must be based on fully allocated costs for the entire voyage.

Awareness of Cargo Preference Requirements

Another commenter suggested that ocean carriers and the public that are affected by the cargo preference laws must be made aware of U.S.-flag preference cargo requirements, and restrictions. The commenters stated that violations under the cargo preference laws are frequent and must be reduced. However, general enforcement of the cargo preference laws is beyond the scope of this regulation.

Expansion of Scope

A combined comment covering both Dockets R–104 and R–105 was received from Sea-Land Services, Inc. (Sea-Land). Sea-Land's comment was mainly concerned with the augmentation rule in Docket R–105. However, two comments were made which pertain to the fair and reasonable rate calculation. One concerns the inclusion of packaged cargoes in the fair and reasonable rate regulation, the other concerns the inclusion of military cargoes. USDA also tangentially touches on the subject of scope by mentioning that a rule for non-bulk items should be given priority over a rule for rates on bulk items.

In general, fair and reasonable guideline rates have been calculated by MARAD and advice on the guideline has been provided to government shipper agencies covering full cargoes on the basis of each individual cargo for which a specific vessel offer is being considered. Such a calculation represents the most simple possible formula, usually involving a single homogenous cargo, totally utilizing a specific vessel. The nature of the cargo, either bulk or bagged, makes it comparatively uncomplicated to determine such factors as cost of loading, cost of discharging, standard time allowances for these operations, and port charges.

The application of guideline rates to liner vessel cargoes will create a far more complicated and difficult environment for construction of fair and reasonable rates reflecting liner vessel operating costs. Still, the calculation is simplified to some extent in the system MARAD has developed by the fact that only bulk cargoes on liner vessels are considered. Such individual bulk parcels are usually of substantial volume (upward from several thousand tons), and the receiving, loading and discharging costs for such cargo can be separated more readily from general cargo operations because of the size of the parcels and their bulk nature, utilizing as they do separate handling facilities. The number of such transactions is also quite limited, probably less than 100 per year.

The application of a guideline rate to liner general cargo would expand the impact of such a procedure from a few government agency programs generating very large volumes of bulk cargoes to a wide variety of government impelled cargo covered by Public Law 664. This would encompass shipments of export and import cargo arranged not only by government agencies, but by a broad number of private sector exporters, importers, freight forwarders, and contractors including tiers of subcontractors involved in various transactions. Furthermore, the size of individual shipments would vary widely, from a few tons to thousands of tons. In one program alone, Pub. L. 480, Title II, the number of shipments exceeds 2,500 per year.

The commodities involved in such shipments would constitute an extensive variety, including basic commodities, manufactured products, project equipment, unboxed vehicles, etc., with different handling costs and requirements including space occupied. Individual shipments could consist of a number of differently rated items. Cargo may also be containerized or non-containerized and individual shippers under these programs frequently use a number of different carriers with different cost factors for shipments under a single project or contract.

The expertise required to evaluate the many factors necessary to construct ocean freight rates is not readily or consistently available within the Government. For example, the determination of a freight rate for carriage of a large project including outsized heavy lift pieces is a highly specialized function. To subject private sector shipping to government direction on such rates will only serve to impede the conduct of such business. In addition to the calculation of guideline rates, the policy of enforcing the guideline rate application would be cumbersome and time consuming.

It should also be noted that the Federal Acquisition Regulation (FAR) (Subpart 47.506) provides that rates filed with the Federal Maritime Commission (FMC) may be considered as fair and reasonable rates for purposes of determining the availability of privately-owned U.S.-flag commercial vessels at fair and reasonable rates. Rates for many non-bulk commodities shipped in liner vessels may be covered by conference tariffs, existing service contracts, or similar arrangements. In fact, many liner rates applied to non-bulk preference cargoes are conference rates where U.S.-flag and foreign-flag rates are identical. As such rates would not be considered to be premium rates, they would not be subject to guideline calculations. However, if this regulation were expanded to include non-bulk cargoes, every bill of lading would have to be checked against the tariff to determine whether a conference rate had been applied. This would generate a work load that would be extremely difficult to accommodate.

In addition, under many programs, the private sector shipper or contractor may have contracted with a government agency, basing the contracted price on a carrier's existing tariff rate or freight quotation, without reference to a guideline ceiling. A subsequently imposed rate ceiling may therefore result in a windfall profit to the shipper or contractor.

Essentially, Sea-Land agrees with the foregoing view and points out that the gathering of information is not necessary to determine fair and reasonable rates for packaged cargoes. However, Sea-Land has suggested that this tariff system be formalized as a part of Docket R–104 by adding language which would require, in connection with bids on packaged cargoes, that the U.S.-flag liner operator certify that its bid rate is no more than its comparable commercial rate by attaching the tariff page demonstrating this fact. If the bid rate is higher than the commercial tariff, or no comparable commercial tariff item exists, then the bidder should provide information in a form sufficient to establish that its bid is consistent with its commercial cargo pricing. In addition, the U.S.-flag liner operator should have the opportunity to demonstrate, through tariff pages of its

likely foreign-flag competition, what the foreign-flag competition's rates are on comparable commercial cargo.

As discussed above, MARAD believes that the current system of published tariffs is adequate for insuring the availability of fair and reasonable rates on packaged preference cargoes. The system proposed by Sea-Land would involve a cumbersome administrative process that is not warranted by the circumstances. For the reasons stated, MARAD believes that the inclusion of packaged preference cargoes in this regulation is not appropriate.

In its comments, Sea-Land states that MARAD has authority to determine fair and reasonable rates for military cargoes.

MARAD has crystalized its position with regard to the military cargo issue in connection with a proposed rule published by DOD, Docket No. DAR CASE 86–98. The Cargo Preference Act of 1904, 10 U.S.C. 2631, established the requirement that all U.S. military supplies to be shipped by ocean transport must be shipped on U.S.-flag vessels unless the rate is "excessive or otherwise unreasonable." The Cargo Preference Act of 1954, 46 U.S.C. 1241(b), requires that at least 50 percent of Government-impelled cargo, including military supplies, shipped by ocean vessels must be shipped on privately owned U.S.-flag vessels unless the operators' rates are not "fair and reasonable." This statute did not supplant the 1904 Act, but supplemented it to require the involvement of the private sector. Sinclair Weeks, Secretary of Commerce, in his June 18, 1954 letter to the Chairman of the Committee on Merchant Marine and Fisheries, concerning the 1954 Act, stated that the bill supersedes the Act of 1904 only "insofar as the bill would require transportation of supplies procured by the Army and Navy to be carried in privately owned United States-flag commercial vessels." HR Rep. No. 2329, 83d Cong., 2d Session (1954). See also, testimony of Nicholas Johnson, Maritime Administrator, Hearings on S. 3446 and S. 2600 Before the Subcommittee on Merchant Marine and Fisheries of the Senate Committee on Commerce, 89th Cong., 2d Sess. 141.

With the enactment of the 1954 Act, Congress established the role of MARAD in the implementation of the cargo preference laws. The Secretary of Transportation now has the responsibility for administering section 901(b) of the 1954 Act. That Act was based on the desirability of having an agency with rate expertise providing guidance for proper administration of the provision. H. Rep. No. 80, 84th Cong., 1st Sess. 18 (1955).

MARAD was empowered with the principal authority to determine if the rates of the privately owned U.S.-flag vessel operators were fair and reasonable under the 1954 Act. Due to the impact of the 1954 Act on the Act of 1904, DOT's oversight responsibility and regulations are applicable to DOD's ocean shipping activities in order to ensure that the use of privately owned U.S.-flag commercial vessels is consistent with the 1954 Act. In this connection, DOD cannot avoid the employment of privately owned U.S.-flag commercial vessels when MARAD has determined that the rate is "fair and reasonable" and when DOD has not engaged such privately owned vessels for at least 50 percent of its 100 percent U.S.-flag requirement.

Finally, it has been MARAD's policy and practice since 1955 to provide rate guidance, either in the form of regulations (prior to 1969) or on a case-by-case basis, to agencies and shipping departments as set forth in 46 CFR 381.2(c). MARAD provides this guidance for DOD's programs. MARAD has consistently asserted its primary responsibility for determining fair and reasonable rates as evidenced by the promulgation of this regulation.

Accordingly, MARAD acknowledges that it does have the authority to establish rates for military cargoes to the extent that the 1954 Act is applicable. However, the ocean transportation of military cargoes has been managed by the Military Sealift Command which establishes rates on a route basis every six months by a competitive bidding process. The low responsive bidder is entitled to most of the cargo on a route but a certain percentage, which varies by route, is available to others. This system has encouraged competition among U.S. operators and has kept rates at or below fair and reasonable levels. Therefore, MARAD, at the present time, is not including the transportation of military cargoes within the scope of this rule, but will continue to review this issue and reserves the right to amend these procedures through rulemaking when it is deemed appropriate for application to up to 50 percent of military cargoes transported on U.S.-flag commercial vessels.

Cargo Terms

USDA points out that in § 383.3(d)(2), the proposed fair and reasonable guideline regulation indicated that port and cargo handling costs would be calculated on the basis of full berth terms. USDA believes that the use of full berth terms limits flexibility in setting rates. It does not allow the shipper the advantages to be gained in instances where terms may be based on other than full terms, e.g., a situation where a cargo is booked free in and free out. MARAD concurs with USDA's assessment on the use of full berth terms. However, it must be noted that § 383.3(e)(3) provides relief from this situation by allowing for the calculation of rates on the basis of actual terms upon notification to MARAD that actual cargo terms are other than full berth terms. Accordingly, no change is required in this provision.

Inland Transport

Two comments were received concerning the portion of the regulation that concerns inland transportation.

AID advises that it understands that the rule is limited to ocean transport only and that additional charges beyond that are to be approved by the agency sponsoring the cargo. Further, AID contends it has a right to reject any bid on the basis of the additional charges beyond the ocean transportation, even if the ocean transport portion is within the guideline rate. CCT states that it believes inland transport charges should be included in the fair and reasonable rate since they are costs that affect the operation of ocean carriers.

MARAD agrees with AID's comments and does not propose to set guideline rates for inland transportation. Notwithstanding CCT's comments, MARAD continues to believe that the agency sponsoring the cargo should be responsible for evaluating inland transportation costs. However, in the event that the shipper agency does not approve the charges beyond the ocean transportation, a U.S.-flag vessel must nevertheless be utilized to comply with the cargo preference requirement, if the vessel will accept the ocean transportation at the guideline rate. In such event, the shipper agency would otherwise arrange for any necessary inland transport.

E.O. 12291, Statutory and DOT Requirements

The Maritime Administrator has determined that this regulation is not a major rule as defined in E.O. 12291, but is significant under DOT regulatory policies and procedures (49 FR 11034, February 26, 1979). This regulation is considered to be significant because it has generated considerable interest among ship operators and because there are no information submission procedures presently in place for the purpose of determining fair and

BEST COPY AVAILABLE

VOL 52 ISS 196 OCT 9 1987 UMI

reasonable rates for liner parcels of dry bulk preference cargoes. A regulatory evaluation on this rulemaking has been placed in the public docket. Since this regulation will affect principally ship operators with substantial annual revenues, and Government agencies, MARAD certifies that this rule will not exert a significant economic impact on a substantial number of small entities under Pub. L. 96–354.

This rulemaking contains an information collection requirement in § 383.2 which has been approved by the Office of Management and Budget, control number 2133–0515.

List of Subjects in 46 CFR Part 383

Maritime carriers, Freight, Reporting and recordkeeping requirements.

Accordingly, MARAD is hereby amending 46 CFR Chapter II by adding a new Part 383, to read as follows:

PART 383—DETERMINATION OF FAIR AND REASONABLE RATES FOR THE CARRIAGE OF PARCELS OF DRY BULK PREFERENCE CARGOES ON U.S.-FLAG LINER VESSELS

Sec.
383.1 Scope.
383.2 Data Submission.
383.3 Determination of Fair and Reasonable Rates.

Authority: Secs. 204(b), 901(b), Merchant Marine Act, 1936, as amended (46 App. U.S.C. 1114(b), 1241(b)); 49 CFR 1.66.

§ 383.1 Scope.

Part 383 prescribes regulations applying to the waterborne transportation of dry bulk preference cargoes in less than full shiploads on United States-flag commercial liner vessels. These regulations contain the method that the Maritime Administration (MARAD) shall use in calculating fair and reasonable rates and the type of information that must be submitted by liner operators interested in carrying such preference cargoes.

§ 383.2 Data submission.

(a) *General.* Operators wishing to employ liner vessels in the carriage of liner parcels of dry bulk preference cargoes must submit information as provided in paragraph (b) of this section, as applicable, to the Director, Office of Ship Operating Assistance, Maritime Administration, Washington, DC 20590. The information in paragraph (b)(1) of this section shall be submitted not later than April 30 of each year and updated not less often than once every 12 months. The information in paragraphs (b)(2) and (b)(3) of this section shall be submitted initially and, thereafter, only when changes occur. All submissions shall be certified by the operator and are subject to verification by MARAD.

(b) *Required information.* (1) For each vessel an operator wishes to be considered for the carriage of preference cargoes, operating cost information shall be submitted, by vessel type, in the format stipulated by 46 CFR 232.1, Form MA–172, including cargo carried, operating revenue and expenses (Schedule 301). Such information shall be applicable to the most recently completed calendar year.

(2) Total vessel costs capitalized (list and date capitalized improvements separately) and applicable interest rates for indebtedness shall be submitted for each vessel.

(3) Fuel consumption, by grades of fuel consumed, shall be submitted for each vessel at normal operating speed and while in port, in metric tons per day.

(4) An operator which already submits the information in paragraph (b)(1) of this section to MARAD in conjunction with other MARAD programs need not submit a duplicate of the information.

(c) *Confidentiality.* If the data submitted under this rule contains information that the submitter considers to be commercial or financial information and privileged or confidential, or otherwise exempt from disclosure under the Freedom of Information Act (FOIA) (5 U.S.C. 552), the submitter shall assert a claim of exemption at the time the data is submitted. The claim shall be made in a letter contained in a sealed envelope marked "Confidential Information," addressed to the Secretary, Maritime Administration. The submitter shall stamp or mark "confidential" on the top of each page containing information claimed to be confidential. In claiming an exemption under FOIA, the submitter must state the basis for such action, including supporting information showing: That the information claimed to be confidential is a trade secret or commercial or financial information in accordance with statutory and decisional authority, and that measures have been taken by the submitter of the information to ensure that the information has not been disclosed or otherwise made available to the public, or, if the information has been disclosed or otherwise becomes available to the public, why such disclosure or availability does not compromise the confidential nature of the information. In the event of a subsequent request for any portion of the data under the FOIA, those submissions not so claimed by the submitter will be disclosed, and those so claimed will be subject to the initial determination by the Secretary, Maritime Administration. If the Secretary makes a determination unfavorable to the submitter, the submitter will be advised that MARAD will not honor the request for confidentiality at the time of any request for production of information under the FOIA by third parties.

(Approved by the Office of Management and Budget under control number 2133–0515)

§ 383.3 Determination of fair and reasonable rates.

(a) *Cost components.* MARAD shall calculate a fair and reasonable rate for all liner vessels participating in this program. The fair and reasonable rate shall include an operating cost component, a fuel cost component, a capital cost component, and a component for port and cargo handling expenses.

(b) *Operating cost component—(1) General.* MARAD shall calculate a daily average operating cost based on the aggregate average operating costs of all breakbulk, partial container, and LASH vessels. The daily average shall be based on cost data for the calendar year immediately preceding the current year, submitted in accordance with § 382.2(b)(1). Such data shall be escalated by MARAD to the current year.

(2) *Items included.* The operating cost component shall include all costs relating to vessel operation with the exception of fuel costs, and shall include non-fuel expense categories as defined by 46 CFR 232.1, Form MA–172, Schedule 301, Operating Expenses.

(c) *Fuel component.* Fuel costs shall be determined as a separate component for each vessel based on the vessel's rate of consumption and current fuel prices.

(d) *Capital component—(1) General.* MARAD shall calculate the daily capital component of the fair and reasonable rate for each participating vessel, consisting of vessel depreciation, interest, return on working capital (one-half average voyage expenses), and return on equity.

(2) *Items included.* The capital component shall include:

(i) *Depreciation.* The owner's actual construction cost, reconstruction cost or purchase cost shall be depreciated straight-line, based on a 25 year economic life, unless the owner has purchased or reconstructed the vessel when its age was greater than 15 years

old. When vessels more than 15 years old are purchased, a depreciation period of 10 years shall be used. When vessels more than 15 years old are reconstructed, MARAD will determine the depreciation period. The residual value of the vessel shall be assumed to be 2.5 percent of total capitalized cost.

(ii) *Interest.* The cost of debt shall be determined by applying the vessel owner's actual interest rate to the outstanding vessel indebtedness. It shall be assumed that original vessel indebtedness is 75 percent of the owner's capitalized vessel cost and that principal payments are made in equal installments over a 25-year period. If an actual interest rate is not available, the prevailing rate of interest for Title XI financing at the time of capitalization shall be used.

(iii) *Return on working capital.* Working capital shall equal the dollar amount necessary to cover one-half the operating costs of the vessel for the voyage (as calculated in paragraph (b)(1) of this section). The rate of return shall be based on the most recent return on stockholder's equity for a representative cross section of transportation industry companies, including maritime companies.

(iv) *Return on equity.* The rate of return on equity shall be determined as in paragraph (d)(2)(iii) of this section. For the purpose of determining equity it shall be assumed that the vessel's constructed net book value less constructed principal outstanding is equity. The constructed net book value shall equal the owner's capitalized cost minus accumulated straight-line depreciation.

(e) *Port and cargo handling component—(1) General.* MARAD shall calculate an estimate of port and cargo handling costs consisting of a U.S. port and cargo handling element and a foreign element as applicable. Government shipper agencies have at times required steamship lines to perform services beyond their usual scope of operation on some shipments. Additional services such as bagging at discharge, rail or truck loading, oncarriage to some inland destinations, and other sundry expenses have been included in the ocean freight rate in the past. In order to provide a fair and reasonable rate guideline, charges beyond the seaport terminal at which a vessel discharges should be reviewed and approved by the sponsoring Government shipper agency. In the event such charges are not approved, the cargo preference requirement must be met by utilizing a U.S.-flag vessel for the ocean transportation, if such a vessel will accept the guideline rate for the ocean transportation only.

(2) *Items included.* Port and cargo handling charges shall include the following, assuming full berth term quotations:

(i) *U.S. port and cargo handling charges.* In this category MARAD shall include domestic port and cargo handling charges for commodity, port of lading, and lot size based on the cargo tender, expressed as a cost per ton.

(ii) *Foreign port and cargo handling charges.* To the extent possible MARAD shall include in this category all known foreign port and cargo handling charges that would normally be included. These estimates shall be made for commodity, port of discharge, and lot size based on the cargo tender, expressed as a cost per ton.

(3) *Terms.* If the terms of the rate are other than full berth terms to the vessel owner, adjustment to the guideline rate shall be made on an *ad hoc* basis by request to MARAD. This provision shall be interpreted in accordance with Incoterms, as amended, published by the International Chamber of Commerce, Paris, France.

(f) *Determination of voyage days and cargo carried.* For purposes of determining the vessel operating, fuel, and capital cost components of the fair and reasonable rate, the voyage length and cargo tons shall be based on the number of voyage days and total payable tons per sailing for the vessel type and service for which the fair and reasonable rate is being calculated, as determined from data submitted in accordance with § 383.2(b)(1). The component for port and cargo handling charges shall be based on cargo tender terms.

(g) *Total Rate.* The operating cost component, fuel cost component, capital cost component, and port and cargo handling cost component each expressed as a cost per ton, shall be added together. The sum of the four components, plus an additional four percent to account for brokers' commissions and general and administrative expenses, shall yield the guideline rate.

By order of the Maritime Administrator.

Date: October 6, 1987.

James E. Saari,

Secretary.

BILLING CODE 4910-81-M

FEDERAL COMMUNICATIONS COMMISSION

47 CFR Part 21

[CC Docket 86-128; FCC 87-284]

Common Carrier Services; Licensing, Construction, and Operation of Facilities

AGENCY: Federal Communications Commission (FCC).

ACTION: Final rule.

SUMMARY: This document adopts a number of changes to Part 21 of the Commission's Rules. The new rules generally are designed to update and simplify the procedures and to eliminate those requirements that appear to be no longer necessary to an efficient and orderly Part 21 licensing scheme. The major substantive changes are: (1) The adoption of a one-step licensing scheme, (2) the adoption of a financial certification requirement for new applicants, (3) the adoption of strict requirements for extension of time allowed for construction, (4) the elimination of network classification distinctions from the rules governing the Digital Electronic Message Service (DEMS), (5) the adoption of streamlined procedures for certain minor facilities changes, (6) a change in the extension of initial construction period for the Multipoint Distribution System (MDS) and DEMS systems, and (7) the elimination of certain licensee recordkeeping requirements. These rules were originally proposed in an NPRM, CC Docket 86-128 (released April 11, 1986), published April 18, 1987, 52 FR 13258.

EFFECTIVE DATE: November 9, 1987.

ADDRESSES: Federal Communications Commission, Washington, DC 20554.

FOR FURTHER INFORMATION CONTACT: Theodore Waddell, Common Carrier Bureau, (202) 634-1706; Geraldine Matise, Common Carrier Bureau, (202) 634-1841.

SUPPLEMENTARY INFORMATION: This is a summary of the Commission's Report and Order, Adopted August 27, 1987, and released September 25, 1987.

The full text of this Commission decision is available for inspection and copying during normal business hours in the FCC Dockets Branch (room 230) 1919 M Street NW., Washington, DC 20554. The complete text of this decision can also be purchased from the Commission's copy contractor, International Transcription Service, (202) 857-3800, 2100 M Street NW., Suite 140, Washington, DC 20037.

VOL 52 ISS 196 OC 9 1987 UMI

Summary of Report and Order

1. The Commission has amended Part 21 of the Commission's Rules, which governs the construction, licensing, and operation of common carrier domestic fixed radio facilities. The new rules generally are designed to update and simplify the procedures and to eliminate those requirements that appear to be no longer necessary to an efficient and orderly Part 21 licensing scheme.

2. First, the Commission adopted a one-step licensing scheme of the services regulated under Part 21. Prior to constructing a station, applicants will file a license application. If granted, the license will be conditioned upon (a) the licensee completing construction of the facilities and the station made ready for operation within a specified time period (12 months for stations in the Multipoint Distribution Service; 18 months for stations in the Digital Electronic Message Services and Point-to-Point Microwave Radio Service), and (b) filing a certification of completion of construction with the Commission. If a licensee does not file a certification of construction completion within the prescribed time, the license will expire automatically. Although the rule changes will become effective 30 days after publication in the **Federal Register**, the one-step licensing procedure will not become effective until after OMB review of the new application forms. At that time a public notice will be issued to initiate the new processing procedures.

3. The Commission also modified its Rules regarding the information necessary to establish an applicant's financial ability to construct and operate its proposed facilities. In adopting a financial certification requirement, all applicants will attest that they have or will have sufficient resources to meet the expected costs of constructing the facilities and operating them for one year. Applicants also will have to indicate whether the FAA has been notified of proposed station construction, but a copy of the FAA study on potential hazard to aviation will no longer be required. Applicants will continue to be required to demonstrate that they will be able to use the site chosen for their radio facility prior to grant of a license. In addition, the Commission eliminated the requirement that applicants submit topographic maps in applications.

4. Changes to the frequency coordination procedures contained in § 21.100 were made to clarify the coordinating carrier's responsibilities to other carriers concerning when prior coordination is required, the parties to the coordination process, notification information, time periods, and computations. In addition, carriers will now have to certify to the Commission that for minor technical amendments or modifications, they have notified others with whom prior coordination was completed of those changes to their systems. A similar requirement was adopted for interference analyses by MDS and DEMS applicants and licensees.

5. The Commission also adopted a new procedure whereby an application for certain minor facilities modifications may be granted automatically on the twenty-first day after the application appears on public notice, unless the applicant is otherwise notified by the Commission. Other minor modifications will be permitted without prior authorization; however, notification to the Commission will be required.

6. The Commission also adopted a proposal to strengthen the requirements for obtaining an extension of the construction period. However, it did not adopt a proposal described in the NPRM to put requests for additional time to construct on public notice. The Commission also adopted a proposal that requires a licensee to submit its authorization for cancellation, if the radio facility is not used for twelve months. Under certain circumstances, licensees may obtain additional time to use the facility.

7. In the Digital Electronic Message Service the Commission generally eliminated the limited and extended network distinctions by, among other things, making all applicants eligible for any channel assignment. Other issues also were clarified, including multiple channel assignments, interference analyses, amending applications or modifying licenses for certain operational changes and station site relocations.

8. Finally, the Commission made several miscellaneous rule modifications. It eliminated certain technical and recordkeeping requirements that were thought to be no longer useful, and would reduce the burdens on licensees.

Ordering Clauses

9. Accordingly, it is ordered, that Part 21 of the Commission's Rules and Regulations is amended as specified below, effective November 9, 1987.

10. It is further ordered, that FCC Forms 435 and 436 are superseded by new FCC Forms 494 and 494A as set forth in Appendix B (not included here), subject to review by the Office of Management and Budget.

List of Subjects in 47 CFR Part 21

Communications common carriers, Communications equipment, Radio, Reporting and recordkeeping requirements, Television.

Rule Changes

Part 21 of Title 47 of the Code of Federal Regulations is amended as follows:

PART 21—DOMESTIC PUBLIC FIXED RADIO SERVICES

1. The authority citation for Part 21 is revised to read as follows:

Authority: Secs. 4 and 303, 48 Stat. 1066, 1082, as amended, 47 U.S.C. 154, 303, unless otherwise noted.

§ 21.0 [Removed]

2. Part 21 is amended by removing § 21.0.

3. Section 21.1 is added to read as follows:

§ 21.1 Scope and authority.

(a) The purpose of the rules and regulations in this part is to prescribe the manner in which portions of the radio spectrum may be made available for domestic communication common carrier and multipoint distribution service non-common carrier operations which require transmitting facilities on land or in specified offshore coastal areas within the continental shelf.

(b) The rules in this part are issued pursuant to the authority contained in Titles I through III of the Communications Act of 1934, as amended, which vest authority in the Federal Communications Commission to regulate common carriers of interstate and foreign communications, to regulate radio transmissions and issue licenses for radio stations, and to regulate all interstate and foreign communications by wire and radio necessary to the accomplishment of the purposes of the Act.

(c) Unless otherwise specified, the section numbers referenced in this part are contained in Chapter I, Title 47 of the Code of Federal Regulations.

4. Section 21.2 is amended by removing the definitions of "Auxiliary test station," "Extended network," "Inter-office station," "Limited network," "Mobile microwave auxiliary station," by removing the second "Fixed Station" entry, and by revising the following definitions to read in their proper order:

§ 21.2 Definitions.

As used in this part:

* * * * *

Antenna structures. The antenna, its supporting structure and anything attached to it.

* * * * * *

Authorized power. The maximum power a station is permitted to use. This power is specified by the Commission in the station's authorization.

* * * * * *

Carrier frequency. The output of a transmitter when the modulating wave is made zero.

* * * * * *

Digital electronic message service. A two-way domestic end-to-end fixed radio service utilizing digital termination systems for the exchange of digital information. This service may also make use of point-to-point microwave facilities, satellite facilities or other communications media to interconnect digital termination systems to comprise a network.

* * * * * *

Fixed station. A station at a fixed location.

* * * * * *

Frequency tolerance. The maximum permissible variation of the carrier frequency expressed as a percentage or in Hertz.

* * * * * *

Mobile station. A radio-communication station capable of being moved and which ordinarily does move.

* * * * * *

Necessary bandwidth of emission. For a given class of emission, the width of the frequency band that is just sufficient to ensure the transmission of information at the rate and with the quality required under specified conditions.

* * * * * *

5. Section 21.3 is revised to read in its entirety as follows:

§ 21.3 Station authorization required.

(a) No person shall use or operate apparatus for the transmission of energy or communications or signals by radio except under, and in accordance with, an appropriate authorization granted by the Federal Communications Commission. Except as otherwise provided herein, no construction or modification of a station may be commenced without an authorization from the Commission. Authorizations for domestic public fixed radio services are governed by the provisions of this part.

(b) A separate application form must be filed for each Digital Termination System Nodal Station. No license is required for a Digital Termination User Station. Authority for a Digital Termination Nodal Station licensee to serve a specific number of user stations to be licensed in the name of the carrier shall be requested on FCC Form 494 filed for the Digital Termination Nodal Station.

6. Section 21.5 is amended by revising paragraph (a) to read as follows:

§ 21.5 Formal and informal applications.

(a) Except for an authorization under any of the proviso clauses of section 308(a) of the Communications Act of 1934 (47 U.S.C. 308(a)), the Commission shall grant the following authorizations only upon written application: Station licenses; modifications of station licenses; renewals of station licenses; extensions of time to construct; transfers and assignments of station licenses or of any rights thereunder.

* * * * *

§ 21.6 [Amended]

7. Section 21.6 is amended by removing the term "21.10," in paragraph (a) and by removing the words "for filing" in paragraph (b).

8. Section 21.7 is revised to read as follows:

§ 21.7 Standard application form for domestic public fixed radio service licenses.

FCC Form 494 ("Application for a New and Modified Microwave Radio Station License Under Part 21") shall be submitted and a license granted for each station prior to commencement of any proposed station construction. FCC Form 494 also shall be submitted to amend any license application, to modify any license pursuant to §§ 21.40(a) and 21.41, to notify the Commission of modifications made pursuant to § 21.42, and to delete licensed facilities. FCC Form 494A shall be submitted to certify completion of construction.

9. Section 21.11 is amended by revising paragraphs (a), (b), (d), (e) and (f) to read as follows:

§ 21.11 Miscellaneous forms shared by all domestic public radio services.

(a) *Licensee qualifications.* FCC Form 430 ("Domestic Mobile Service, Domestic Public Fixed Radio Services and Satellite Radio Licensee Qualification Report") shall be filed annually, no later than March 31 for the end of the preceding calendar year, by licensees for each radio service authorized under this part, if service was offered at any time during the preceding year. Each annual filing shall include all changes of information required by FCC Form 430 that occurred during the preceding year. In those cases in which there has been no change in any of the required information, the applicant or licensee, in lieu of submitting a new form, may so notify the Commission by letter. All multichannel Multipoint Distribution Service non-common carrier licensees shall annually file FCC Form 430.

(b) *Additional time to construct*—FCC Form 701 ("Application for Additional Time to Construct Radio Station") shall be filed in duplicate by a licensee prior to the expiration of the time for construction noted in a license if a licensee seeks to modify the license by extending the period of construction.

* * * * *

(d) *Assignment of license.* FCC Form 702 ("Application for Consent to Assignment of Radio Station Construction Permit or License for Stations in Services Other than Broadcasting"), shall be submitted to assign voluntarily (as by, for example, contract or other agreement) or involuntarily (as by, for example, death, bankruptcy, or legal disability) the station authorization. In the case of involuntary assignment (or transfer of control) the application should be filed within 10 days of the event causing the assignment (or transfer of control). FCC Form 702 shall also be used for non-substantial (pro forma) assignments. In addition, FCC Form 430 ("Domestic Mobile Service, Domestic Public Fixed Radio Services, and Satellite Radio Licensee Qualification Report") shall be submitted by the proposed assignee unless such assignee has a current and substantially accurate report on file with the Commission. Whenever a group of station licenses in the same radio services are to be assigned to a single assignee, a single "blanket" application may be filed to cover the entire group, if the application identifies each station by call sign and station location and if two copies are provided for each station affected. The assignment shall be completed within 45 days from the date of authorization. Upon consummation of an approved assignment, the Commission shall be notified by letter of the date of consummation within 10 days of its occurrence.

(e) *Partial assignment of license.* In the microwave services, authorization for assignment from one company to another of only a part or portions of the facilities (transmitters) authorized under an existing license (as distinguished from an assignment of the facilities in their entirety) may be granted upon application:

(1) By the assignee on FCC Form 494 and

(2) By the assignor on FCC Form 494 for deletion of the assigned facilities.

VOL 52 ISS 196 OCT 9 1987 UMI

indicating concurrence in the assignee's request.

The assignment shall be consummated within 45 days from the date of authorization. In the event that consummation does not occur, FCC Form 494 shall be submitted to return the assignor's license to its original condition.

(f) *Transfer of control of corporation holding a permit or license.* FCC Form 704 ("Application for Consent to Transfer of Control") shall be submitted in order to voluntarily or involuntarily transfer control (*de jure* or *de facto*) of a corporation holding any licenses. FCC Form 704 shall also be used for non-substantial (pro forma) transfers of control. In addition, FCC Form 430 ("Domestic Mobile Service, Domestic Public Radio Services, and Satellite Radio Licensee Qualification Report") shall be submitted by the proposed transferee unless said transferee has a current and substantially accurate report on file with the Commission. The transfer shall be completed within 45 days from the date of authorization. Upon consummation of an approved transfer, the Commission shall be notified by letter of the date of consummation within 10 days of its occurrence.

10. Section 21.13 is amended by removing the term "21.103," in paragraph (a)(6); by removing paragraph (f)(2) and the designation (1) in (f)(1), and by revising the introductory text of paragraph (a), and by revising paragraph (g) to read as follows:

§ 21.13 General application requirements.

(a) Each application for a license or for consent to assignment or transfer of control shall:

* * * * *

(g) Whenever an individual applicant, or a partner (in the case of a partnership) or a full time manager (in the case of a corporation) will not actively participate in the day-to-day management and operation of proposed facilities, the applicant or licensee will submit a statement containing the reasons therefor and disclosing the details of the proposed operation, including a demonstration of how control over the radio facilities will be retained by the applicant. If the operation of a radio station is to be accomplished by contractual arrangement with an entity unrelated to an applicant or licensee, the applicant or licensee shall file a copy of the agreement or contract which shall demonstrate that:

(1) The operation is accomplished according to general instructions provided for by the applicant;

(2) The applicant retains effective control over the radio facilities and their operations; and

(3) The applicant assumes full responsibility for both the quality of service and for contractor compliance with the Commission's Rules.

11. Section 21.15 is amended by removing paragraphs (f), (h), and (i); by redesignating paragraph (g) as paragraph (f); by removing paragraphs (e)(1), (e)(3) and (e)(5) and by redesignating (e)(2) and (e)(4) as (e)(1) and (e)(2); by removing the word "carrier" in new paragraph (e)(1) and replacing it with the word "licensee"; and by adding new paragraph (g) and by revising the introductory paragraph and paragraphs (a), (c) and (d) to read as follows:

§ 21.15 Technical content of applications.

Applications shall contain all technical information required by the application form and any additional information necessary to fully describe the proposed facilities and to demonstrate compliance with all technical requirements of the rules governing the radio service involved (see Subparts C, F, G, I, J and K as appropriate). The following paragraphs describe a number of technical requirements.

(a) Applicants proposing a new station location (including receive-only stations and passive repeaters) shall indicate whether the station site is owned. If it is not owned, its availability for the proposed radio station site shall be demonstrated. Under ordinary circumstances this requirement will be considered satisfied if the site is under lease or under written option to buy or lease. Where any lease or agreement to use land limits or conditions in any way the applicant's access or use of the site to provide public service, a copy of the lease or agreement (which clearly indicates the limitations or conditions) shall be filed with the application.

* * * * *

(c) Each application involving a new or modified antenna supporting structure or passive facility, the addition or removal of an antenna, or the repositioning of an authorized antenna for a station or receive-only facility (except receive-only facilities in the Multipoint Distribution Service and the Digital Electronic Message Service) must be accompanied by a vertical profile sketch of the total structure depicting its structural nature and clearly indicating the ground elevation (above sea level) at the structure site, the overall height of the structure above ground (including obstruction lights when required, lightning rods, etc.) and, if mounted on a building, its overall height above the building. The proposed antenna on the structure must be clearly identified and its height above-ground (measured to the center of radiation) clearly indicated.

(d) Each application proposing a new or modified antenna structure for a station (including a receive-only or passive repeater) so as to change its overall height shall indicate whether any necessary notification of the FAA has been made. Complete information as to rules concerning the construction, marking and lighting of antenna structures is contained in Part 17 of this chapter. See also § 21.111 if the structure is used by more than one station.

* * * * *

(g) Each application in the Point-to-Point Radio, Local Television Transmission, Multipoint Distribution Service and Digital Electronic Message Service (excluding user stations) proposing a new or replacement antenna (excluding omni-directional antennas) shall include an antenna radiation pattern showing the antenna power gain distribution in the horizontal plane expressed in decibels, unless such pattern is known to be on file with the Commission in which case the applicant may reference in its application the FCC–ID number that indicates that the pattern is on file with the Commission.

12. Section 21.17 is revised to read as follows:

§ 21.17 Certification of financial qualifications.

Each application for a new license and each application for a major modification of an existing station shall contain a certification that the applicant has or will have the financial ability to meet the expected costs of constructing the facilities within the time allowed and the estimated operating expenses for a period of twelve months.

13. A new § 21.19 is added to read as follows:

§ 21.19 Waiver of rules.

Waivers of these rules may be granted upon application or on the Commission's own motion. A request for waiver shall contain a statement of reasons sufficient to justify a waiver. A waiver will not be granted except upon an affirmative showing that:

(a) The underlying purpose of the rule will not be served, or would be frustrated, by its application in the

particular case, and that grant of the waiver is otherwise in the public interest; or

(b) The unique facts and circumstances of a particular case render application of the rule inequitable, unduly burdensome or otherwise contrary to the public interest. Applicants must also show the lack of a reasonable alternative.

14. In § 21.20 paragraph (b) is revised to read as follows:

§ 21.20 Defective applications.

* * * * *

(b) By way of illustration only, and not in any way limiting the scope of paragraph (a), the following are examples of common deficiencies which result in defective applications under paragraph (a):

(1) The application is not properly executed;

(2) The submitted filing fee (if a filing fee is required) is insufficient;

(3) The application does not demonstrate how the proposed radio facilities will serve the public interest, convenience or necessity;

(4) The application does not demonstrate compliance with the special requirements applicable to the radio service involved;

(5) The application does not demonstrate the availability of the proposed site of a new facility;

(6) The application does not include the environmental assessment required for any significant environmental impact under the Commission's environmental rules (Part 1, Subpart I);

(7) The application does not specify the polarization and, where applicable, the antenna orientation azimuth and distance;

(8) The application does not include all necessary exhibits;

(9) The application is filed after the cutoff date prescribed in § 21.31 of this part; or

(10) The application proposes the use of a frequency not allocated to such use.

* * * * *

§§ 21.21 and 21.22 [Amended]

15. Sections 21.21 and 21.22 are amended by removing the word "his" and inserting in its place the words "the applicant's" throughout those sections.

16. Section 21.23 is amended by revising paragraph (e) as follows:

§ 21.23 Amendment of applications.

* * * * *

(e) The applicant must serve copies of any amendments or other written communications upon the following parties:

(1) Any applicant whose application appears on its face to be mutually exclusive with the application being amended, including those applicants originally served under §§ 21.504 and 21.902;

(2) Any applicant whose application has been found by the Commission, as published in a public notice, to be mutually exclusive with the application being amended; and

(3) Any party who has filed a petition to deny the application or other formal objection, when that petition or formal objection has not been resolved by the Commission.

* * * * *

§ 21.25 [Amended]

17. Section 21.25 is amended by removing the last sentence from paragraph (a) and by removing the term "§ 21.27(b)" from paragraph (b) and inserting in its place the term "§ 21.27(c)".

18. Section 21.26 is revised to read as follows:

§ 21.26 Receipt of applications.

Applications received by the Commission are given a file number for administrative convenience, which does not indicate the acceptance of the application for filing and processing. After preliminary review those applications covered by § 21.27(a) that appear complete will be put on public notice as accepted for filing. Neither the assignment of a file number nor the listing of the application on public notice as accepted for filing indicates that the application has been found acceptable for filing or precludes the subsequent return or dismissal of the application if it is found to be defective or not in substantial compliance with the Commission's rules.

19. Section 21.27 is revised to read in its entirety as follows:

§ 21.27 Public notice period.

(a) At regular intervals, the Commission will issue a public notice listing:

(1) The acceptance for filing of applications and major amendments thereto;

(2) Significant Commission actions concerning applications;

(3) The filing of certifications of completion of construction;

(4) The receipt of applications for minor modifications made pursuant to § 21.41;

(5) Information which the Commission in its discretion believes of public significance; and

(6) Special environmental considerations as required by Part 1 of this chapter.

(b) A public notice will not normally be issued for any of the following applications:

(1) For authorization of a minor technical change in the facilities of a proposed or authorized station where such a change would not be classified as a major amendment to a pending application, as defined by § 21.23, or as a minor modification to a license pursuant to § 21.41;

(2) For temporary authorization pursuant to § 21.25;

(3) For an authorization under any of the proviso clauses of section 308(a) of the Communications Act of 1934 (47 U.S.C. 308(a));

(4) For consent to an involuntary assignment or transfer of control of a radio authorization; or

(5) For consent to a voluntary assignment or transfer of control of a radio authorization, where the assignment or transfer does not involve a substantial change in ownership or control.

(c) Except as otherwise provided in this Part (e.g., § 21.41), no application that has appeared on public notice will be granted until the expiration of a period of thirty days following the issuance of the public notice listing the application, or any major amendment thereto, or until the expiration of a period of thirty days following the issuance of a public notice identifying the tentative selectee of a random selection process, whichever is later.

20. Section 21.30 is amended by removing the words "21.33 and 1.821," in paragraph (a)(2) and inserting, in lieu thereof, the words "1.821–1.825"; by removing the term "§ 21.27(b)" in paragraph (b)(2) and inserting, in lieu thereof, the term "§ 21.27(c)"; and by revising paragraph (b)(3) to read as follows:

§ 21.30 Opposition to applications.

* * * * *

(b) * * *

(3) Any comments on, or objections to, the grant of an application when the comments or objections do not conform to either paragraph (a) of this section or other Commission rules and requirements.

* * * * *

21. Section 21.31 is amended by revising paragraph (e)(2) to read as follows:

§ 21.31 Mutually exclusive applications.

* * * * *

(e) * * *

(2) The amendment resolves frequency conflicts with authorized stations or other pending applications which would otherwise require resolution by hearing, by comparative evaluation pursuant to § 21.35, or by random selection pursuant to § 21.33 provided that the amendment does not create new or additional frequency conflicts;

* * * * *

22. Section 21.33 is revised to read as follows:

§ 21.33 Grants by random selection.

(a) If an application for a license in the Multichannel Multipoint Distribution Service (MMDS) or in the Digital Electronic Message Service (DEMS) is mutually exclusive with another such application and satisfies the requirements of § 21.31(b), the applicants may be included in the random selection process set forth in Part 1, §§ 1.821 through 1.825. Renewal applications shall not be included in a random selection process.

(b) If, after filing individual MMDS applications, mutually exclusive applicants enter into settlements that result in the formulation of a joint venture, such applicants will receive the cumulative number of lottery changes that the individual applicants would have had if no settlement had been reached.

§ 21.35 [Amended]

23. Section 21.35 is amended by replacing the word "his" with the words "the applicant's" in paragraph (b)(1)(i), by replacing the words "his attorney is so" with the words "the principal's attorney if" in paragraph (b)(1)(iii); and by replacing the term "his" with the term "that applicant's" in paragraph (b)(2)

24. A new heading "LICENSE TRANSFERS, MODIFICATIONS, CONDITIONS AND FORFEITURES" is added immediately after § 21.37 and a new § 21.38 is added as follows:

§ 21.38 Assignment or transfer of station authorization.

(a) No station license, or any rights thereunder, shall be transferred, assigned, or disposed of in any manner, voluntarily or involuntarily, directly or indirectly, or by transfer of control of any corporation or any other entity holding any such license, to any person except upon application to the Commission and upon finding by the Commission that the public interest, convenience and necessity will be served thereby.

(b) For purposes of this section, transfers of control requiring Commission approval shall include any and all transactions that:

(1) Change the party controlling the affairs of the licensee, or

(2) Affect any change in a controlling interest in the ownership of the licensee, including changes in legal or equitable ownership, or

(3) Transfer any vested or contingent interest in such part of the licensee which, if directly transferred, would be an immediate controlling interest in the licensee including but not limited to such interests as liens, mortgages, options, and powers of attorney.

(c) Requests for transfer of control or assignment authority shall be submitted on the application form prescribed by § 21.11 of this chapter, and shall be accompanied by the applicable showings required by §§ 21.13, 21.15, 21.17 and 21.39 of this chapter.

(d) The Commission shall be promptly notified in writing when a licensee is voluntarily or involuntarily placed in bankruptcy or receivership and when an individual licensee, a member of a partnership which is a licensee, or a person directly or indirectly in control of a corporation which is a licensee, dies or becomes legally disabled. Within thirty days after the occurrence of such bankruptcy, receivership, death or legal disability, an application of involuntary assignment of such license, or involuntary transfer of control of such corporation, shall be filed with the Commission, requesting assignment or transfer to a successor legally qualified under the laws of the place having jurisdiction over the assets involved.

(e) The assignor of a station licensed under this part may retain no right of reversion or reassignment of the license and may not reserve the right to use the facilities of the station for any period whatsoever. No assignment of license will be granted or authorized if there is a contract or understanding, express or implied, pursuant to which a right of reversion or reassignment of the license or right to use the facilities are retained as partial or full consideration for the assignment or transfer.

(f) No special temporary authority, or any rights thereunder, shall be assigned or otherwise disposed of, directly or indirectly, voluntarily or involuntarily, without prior Commission approval.

§ 21.39 [Removed]

§ 21.40 [Redesignated as § 21.39 and amended]

25. Section 21.39 is removed and § 21.40 is redesignated as § 21.39. New § 21.39 is amended by removing from paragraph (a) the words "or construction permits", "construction permit or", "permittee or", "or permittee", and "permit or"; by removing from paragraph (c)(1) the words "construction permit," and inserting in their place "license," and by removing from paragraph (c)(2) the words "construction permit or" and "permittee or".

26. Sections 21.40, 21.41, and 21.42 are added as follows:

§ 21.40 Modification of station license.

(a) Except as provided in §§ 21.41 and 21.42, no modification of a license issued pursuant to this part (or the facilities described thereunder) shall be made except upon application to the Commission and upon finding by the Commission that:

(1) Such modification will promote the public interest, convenience and necessity, or

(2) That the provisions of the Communications Act of 1934 or of any treaty ratified by the United States will be more fully complied with if such application is granted.

(b) No application for modification to extend a license construction period will be granted for delays caused by lack of financing or for lack of site availability. Applications for time extensions for other reasons must include a verified statement from the application showing that the licensee has made diligent efforts to construct the facilities and:

(1) That additional time is required due to circumstances beyond the applicant's control, in which case the applicant must describe such circumstances and must set forth with specificity and justify the precise extension period requested; or

(2) That there are unique and overriding public interest concerns that justify such an extension, in which case the applicant must identify such interests and must set forth and justify a precise extension period.

(c) Notwithstanding the provisions of paragraph (b), when a station license has been assigned or transferred pursuant to § 21.38, any extension of time will be limited so that the time left to construct after Commission grant of the transfer or assignment will be no more than the time remaining for construction at the date of the filing of the application for transfer or assignment.

§ 21.41 Special processing of applications for minor facility modifications.

(a) Unless an applicant is notified to the contrary by the Commission, as of the twenty-first day following the date of public notice, any application that meets the requirements of paragraph (b)

of this section and proposes only the change specified in paragraph (c) of this section shall be deemed to have been authorized by the Commission.

(b) An application may be considered under the procedures of this section only if:

(1) It is in the Point-to-Point Microwave Radio, Local Television Transmission, Digital Electronic Message or Multipoint Distribution Services;

(2) The cumulative effect of all such applications made within any 60 days period does not exceed the appropriate values prescribed by paragraph (c) of this section;

(3) The facilities to be modified are not located within thirty-five miles of the Canadian or Mexican border;

(4) It is acceptable for filing, is consistent with all of the Commission's rules, and does not involve a waiver request;

(5) It specifically requests consideration pursuant to this section; and

(6) Frequency coordination procedures, as necessary, are complied with in accordance with § 21.100(d) or, in the Multipoint Distribution and Digital Electronic Message Services, a copy of the application has been served on those who also were served under §§ 21.902 and 21.504.

(c) The modifications that may be authorized under the procedures of this section are:

(1) Changes in a transmitter and existing transmitter operating characteristics, or protective configuration of transmitter, provided that:

(i) In all radio services other than Multipoint Distribution Service and Digital Electronic Message Service, any increase in transmitter output power is less than three dB over the previously authorized output power; and in the Multipoint Distribution Service and Digital Electronic Message Service, any increase in transmitter output power is one and one-half dB or less over the previously authorized output power;

(ii) The necessary bandwidth is not increased by more than 10% of the previously authorized necessary bandwidth;

(2) Changes in the height of an antenna, provided that:

(i) In all radio services except Multipoint Distribution Service and Digital Electronic Service, any increase in antenna height is less than twenty feet above the previously authorized height;

(ii) In Multipoint Distribution Service and Digital Electronic Message Service, any increase in antenna height is less than ten feet above the previously authorized height; and

(iii) The overall height of the antenna structure is not increased as a result of the antenna extending above the height of the previously authorized structure, except when the new height of the antenna structure is twenty feet or less (above ground or man-made structure, as appropriate) after the change is made.

(3) Change in the geographical coordinates of a transmit station, receive station or passive facility by ten seconds or less of latitude, longitude or both, provided that when notice to the FAA of proposed construction is required by Part 17 of the rules for antenna structure at the previously authorized coordinates (or will be required at the new location) the applicant must comply with the provisions of § 21.15(d).

(4) An increase in the number of Digital Termination user stations.

(d) Upon grant of an application under the procedure of this section and at such time that construction begins, the applicant must keep a complete copy of the application (including the filing date) with the station license if construction is commenced prior to the receipt of the authorization.

§ 21.42 Certain modifications not requiring prior authorization.

(a) Equipment in an authorized radio station may be replaced without prior authorization or notification if the replacement equipment is identical (i.e., same manufacturer and model number) with the replaced equipment.

(b) Licensees of fixed stations in the Point-to-Point Microwave Radio, Local Television Transmission, Digital Electronic Message, or Multipoint Distribution Services may make the facility changes listed in paragraph (c) of this section without obtaining prior Commission authorization, if:

(1) Frequency coordination procedures, as necessary, are complied with in accordance with § 21.100(d) or, in the Multipoint Distribution and Digital Electronic Message Services, a copy of the notification described in (b)(3) is served on those who were served under §§ 21.902 and 21.504, and

(2) The cumulative effect of all facility changes made within any 60 day period does not exceed the appropriate values prescribed by paragraph (c) of this section, and

(3) The Commission is notified of changes made to facilities by the submission of a completed FCC Form 494 within thirty days after the changes are made.

(c) Modifications that may be made without prior authorization under paragraph (b) of this section are:

(1) Change or modification of a transmitter, when:

(i) The replacement or modified transmitter is type-accepted (or type-notified) for use under this Part and is installed without modification from the type-accepted (or type notified) configuration;

(ii) The type of modulation is not changed;

(iii) The frequency stability is equal to or better than the previously authorized frequency stability; and

(iv) The necessary bandwidth and the output power do not exceed the previously authorized values.

(2) Addition or deletion of a transmitter for protection without changing the authorized power output (e.g. hot standby transmitters);

(3) Change to an antenna (other than any change involving a periscope antenna system), when:

(i) For the Point-to-Point Microwave Radio and Local Television Transmission Services, the new antenna conforms to the requirements of § 21.108 and has essentially the same or better radiation characteristics than the previously authorized antenna;

(ii) For the Multipoint Distribution Service and Digital Electronic Message Service, the new antenna conforms with § 21.906 and the gain of the new antenna does not exceed that of the previously authorized antenna by more than one dB in any direction.

(4) Any technical changes that would decrease the effective radiated power.

(5) Change to the height of an antenna, when:

(i) The new height (measured at the center-of-radiation) is within ± five feet of the previously authorized height; and

(ii) The overall height of the antenna structure is not increased as a result of the antenna extending above the height of the previously authorized structure, except when the new height of the antenna structure is twenty feet or less (above ground or man-made structure, as appropriate) after the change is made.

(6) Decreases in the overall height of an antenna structure, provided that, when notice to the FAA of proposed construction was required by Part 17 of the Rules for the antenna structure at the previously authorized height, the applicant must comply with the provisions of § 21.15(d).

(7) Changes in the azimuth of the center of the main lobe of radiation of a point-to-point station's antenna by a maximum of one degree.

VOL
52
ISS
196
OC
9
1987
UMI

(8) Changes to the transmission line and other devices between the transmitter and the antenna when the effective radiated power of the station is not increased by more than one dB.

(d) Licensees may correct erroneous information on a license which does not involve a major change (i.e., a change that would be classified as a major amendment as defined by § 21.23) without obtaining prior Commission approval by filing a completed FCC Form 494.

27. Sections 21.43 and 21.44 are revised to read as follows:

§ 21.43 Period of construction; certification of completion of construction.

(a) Each license for a radio station for the services included in this Part shall specify as a condition therein the period during which construction of facilities will be completed and the station made ready for operation. Construction may not commence until the grant of a license, and must be completed by the date specified in the license as the termination date of the construction period. Except as may be limited by § 21.45(b) or otherwise determined by the Commission for any particular application, the following shall be the maximum construction periods for each service:

(1) For stations in the Point-to-Point Microwave Radio and Digital Electronic Message Service, a maximum of 18 months from the date of the license grant;

(2) For all other stations licensed under this Part, a maximum of 12 months from the date of the license grant.

(b) Each license for a radio station for the services included in this part shall also specify as a condition therein that upon the completion of construction, each licensee must file with the Commission a certification of completion of construction using FCC Form 494A, certifying that the facilities as authorized have been completed and that the station is now operational and ready to provide service to the public, and will remain operational during the license period, unless the license is submitted for cancellation.

§ 21.44 Forfeiture and termination of station authorization.

(a) A license shall be automatically forfeited in whole or in part without further notice to the licensee upon:

(1) The expiration of the construction period specified therein, or after such additional time as may be authorized by the Commission, unless within 5 days after that date certification of completion of construction has been filed with the Commission pursuant to § 21.43;

(2) The expiration of the license period specified therein, unless prior thereto an application for renewal of such license has been filed with the Commission; or

(3) The voluntary removal or alteration of the facilities, so as to render the station not operational for a period of 30 days or more.

(b) A license forfeited in whole or in part under the provisions of paragraph (a)(1) or (a)(2) may be reinstated if the Commission, in its discretion, determines that reinstatement would best serve the public interest, convenience and necessity. Petitions for reinstatement filed pursuant to this subsection will be considered only if:

(1) The petition is filed within 30 days of the expiration date set forth in paragraph (a)(1) or (a)(2) of this section, whichever is applicable;

(2) The petition explains the failure to timely file such notification or application as would have prevented automatic forfeiture; and

(3) The petition sets forth with specificity the procedures which have been established to insure timely filings in the future.

(c) A special temporary authorization shall automatically terminate upon the expiration date specified therein, or upon failure to comply with any special terms or conditions set forth therein. Operation may be extended beyond such termination date only after application and upon specific authorization by the Commission.

28. Section 21.100(d) is amended by removing current paragraphs (7) and (8); by redesignating paragraphs (1), (2), (3), (4), (5), (6), (9), (10) and (11) as (2)(i), (2)(ii), (2)(iii), (2)(iv), (2)(v), (2)(vi), (2)(viii), (2)(ix) and (2)(x); by adding new paragraphs (d)(1), (d)(2) introductory text and (2)(vii); by revising the introductory text of paragraph (d), and by revising paragraphs (2)(ii), (2)(viii) and (2)(x) to read as follows:

§ 21.100 Frequencies.

* * * * *

(d) *Frequency coordination.* When required by the rules governing a service, the following frequency usage coordination procedures shall apply.

(1) *General requirements.* Proposed frequency usage shall be prior coordinated with existing users in the area and other applicants with previously filed applications, whose facilities could affect or be affected by the new proposal in terms of frequency interference or restricted ultimate system capacity. Coordination shall be completed prior to filing an application for regular authorization or an amendment to a pending application or a modification to a license when the proposed change is defined as "major" by the rules governing the service or is one reasonably expected to cause interference in excess of permissible levels for the service(s) involved. In coordinating frequency usage with stations in the fixed satellite service, applicants shall also comply with the requirements of § 21.706(c) and (d). In engineering a system or modification thereto, the applicant shall by appropriate studies and analyses select sites, transmitters, antennas and frequencies that will avoid interference in excess of permissible levels to other users. All applicants and licensees shall cooperate fully and make reasonable efforts to resolve technical problems and conflicts that may inhibit the most effective and efficient use of the radio spectrum; however, the party being coordinated with is not obligated to suggest changes or re-engineer a proposal in cases involving conflicts. Applicants should make every reasonable effort to avoid blocking the growth of systems that are likely to need additional capacity in the foreseeable future. The applicant shall identify in the application all entities with which the technical proposal was coordinated. In the event that technical problems are not resolved or if the existing licensee, or applicant does not repond to coordination efforts within 30 days after notification, an explanation shall be submitted with the application. Where technical problems are resolved by an agreement or operating arrangement between the parties that would require special procedures be taken to reduce the likelihood of interference in excess of permissible levels (such as the use of artificial site shielding) or would result in a reduction of quality or capacity of either system, the details thereof shall be contained in the application.

(2) *Coordination procedure guidelines.* The following guidelines are applicable to the coordination process.

* * * * *

(ii) Notification must include relevant technical details of the proposal. At minimum, this should include, as applicable, the following:

Applicant's name.
Transmitting station name.
Transmitting station coordinates.
Frequencies and polarizations to be added or changed.
Transmitting equipment type, its stability, actual output power, emission designator, and type of modulation (loading).

Transmitting antenna type of model and, if required, a typical pattern and maximum gain.
Transmitting antenna height above ground level and ground elevation above mean sea level.
Receiving station name.
Receiving station coordinates.
Receiving antenna type and model and, if required, a typical pattern and maximum gain.
Receiving antenna height above ground level and ground elevation above mean sea level.
Path azimuth and distance.

(vii) Where a number of technical changes become necessary for a system during the course of coordination, an attempt should be made to minimize the number of separate notifications for these changes. Where the changes are incorporated into a completely revised notice, the items that were changed from the previous notice should be identified. When changes are not numerous or complex, the carrier receiving the changed notification should make an effort to respond in less than 30 days. When the notifying carrier believes a shorter response time is reasonable and appropriate, it may be helpful for that carrier to so indicate in the notice and perhaps suggest a response date.

(viii) If, after coordination is successfully completed, it is determined that a subsequent change could have no impact on some carriers receiving the original notification, it is not necessary to coodinate the change with such carriers. However, these carriers shall be notified of the change and the opinion that coordination is not required for such change.

* * * * *

(x) Carriers should keep other carriers with whom they are coordinating advised of changes in plans for facilities previously coordinated. If applications have not been filed 6 months after coordination was initiated, carriers may assume that such frequency use is no longer desired unless a second notification has been received within 10 days of the end of the 6 month period. Renewal notifications are to be sent to all originally notified parties, even if coordination has not been successfully completed with those parties.

* * * *

§§ 21.102 through 21.104 [Removed and reserved]

29. Sections 21.102, 21.103, and 21.104 are removed and reserved.

30. Section 21.107 is amended by revising the table and notes in paragraph (b) and revising paragraph (c) to read as follows:

§ 21.107 Transmitter power.

* * * * *

(b) * * *

Frequency band (MHz)	Maximum allowable transmitter power		Maximum allowable EIRP	
	Fixed (W)	[illegible] (W)	Fixed (dBW)	[illegible] (dBW)
2,110 to 2,130	20.0			
2,150 to 2,160	[1]20.0		+45	
2,160 to 2,180	[1]20.0			
2,500 to 2,686	[1]10.0			
2,686 to 2,690	0.25			
3,700 to 4,200	20.0			
5,925 to 6,425	20.0		+55	
6,425 to 6,525		20.0		+35
10,550 to 10,565	10.0			
10,615 to 10,630	10.0		[2]	
10,700 to 11,200	10.0			
12,200 to 13,250	10.0	10.0		
17,700 to 18,600	10.0		+55	
18,600 to 18,800	[3]10.0		+35	
18,800 to 19,700	10.0		+55	
21,200 to 23,600	10.0		+50	
27,500 to 29,500	10.0		55	
31,000 to 31,300	0.05	0.05		
38,600 to 40,000	10.0	1.5	50	

[1] In the bands 2,150–2,162 MHz and 2,500–2,690 MHz, when used for the Multipoint Distribution Service, up to 100 watts may be authorized pursuant to Section 21.904.
[2] The EIRP of stations in the 10,600–10,680 MHz band must not exceed +40 dBW.
[3] The power delivered to the antenna is limited to −3 dBW.

(c) The power of each transmitter shall be maintained as near as practicable to the power input or output specified in the instrument of station authorization.

§ 21.108 [Amended]

31. Section 21.108 is amended by removing the words "§ 21.109(c)" in paragraph (c) and inserting in their place the words "§ 21.109(b)".

§ 21.109 [Amended]

32. Section 21.109 is amended by removing paragraphs (b) and (d), and by redesignating paragraph (c) as (b).

33. Section 21.110 is revised to read as follows:

§ 21.110 Antenna polarization.

Stations operating in the radio services included in this part are not limited as to the type of polarization of the radiated signal, provided, however, that in the event interference in excess of permissible levels is caused to the operation of other stations the Commission may, after notice and opportunity for hearing, order the licensee to change the polarization of the radiated signal. No change in polarization shall be made without prior authorization from the Commission.

34. Section 21.111 is amended by removing the terms "permittee," and "and § 21.109(b)" and by revising the title to read as follows:

§ 21.111 Simultaneous use of common antenna structures.

* * * * *

35. Section 21.113 is amended by revising the table in paragraph (b) to read as follows:

§ 21.113 Quiet zones.

* * * * *

(b) * * *

Frequency range	[illegible] strength (mV/m) [illegible] author-[illegible] band-width of [illegible]	Power flux density [1] (dbW/m2) [illegible] authorized [illegible] of service
Below 540 kHz	10	−65.8
540 to 1600 kHz	20	−59.8
1.6 to 470 MHz	10	[2] −65.8
470 to 890 MHz	[illegible]	[2] −54.2
Above 890 MHz	1	[2] −85.8

[1] Equivalent values of power flux density are calculated assuming free space characteristic impedance of 376.7=120π ohms.
[2] Space stations shall conform to the power flux density limits at the earth's surface specified in appropriate parts of the FCC rules, but in no case should exceed the above levels in any 4 kHz band for all angles of arrival.

* * * * *

§ 21.116 [Amended]

36. Section 21.116 is amended by removing the phrase "the preparation of the profile graphs described in § 21.115, and in" from the first sentence, and by removing the sentence "Ordinarily, the Commission will not require the submission of topographical maps for areas beyond 15 miles from the antenna site, but the maps must include the principal community to be served."

§ 21.118 [Amended]

37. Section 21.118 is amended by removing the last sentence in paragraph (a); by removing the words "(See also §§ 21.508(e) and 21.605(d).)" from paragraph (b), by removing the words ", other than a hand-carried or pack-carried transmitter," from paragraph (c); and by removing the words "*Provided, however,* That the provisions of this paragraph shall not apply to hand-carried or pack-carried transmitters." from paragraph (e)(1).

§ 21.121 [Removed and reserved]

38. Section 21.121 is removed and reserved.

§ 21.200 [Amended]

39. Section 21.200 is amended by removing the words "and station records".

VOL 52 ISS 196 OC 9 1987 UMI

40. Section 21.201 is revised to read as follows:

§ 21.201 Posting of station authorization information.

Each licensee shall post at the station the name, address and telephone number of the custodian of the station license or other authorization if such license or authorization is not maintained at the station.

§§ 21.204 through 21.208 [Removed and reserved]

41. Sections 21.204, 21.206, 21.207 and 21.208 are removed and reserved.

§ 21.210 [Amended]

42. Section 21.210 is amended by removing the words "and to the Engineer in Charge of the radio district in which the station is located," and by removing the words "and the Engineer in Charge".

§§ 21.212 and 21.213 [Removed and reserved]

43. Sections 21.212 and 21.213 are removed and reserved.

§ 21.214 [Amended]

44. Section 21.214 is amended by removing the term "21.611" in the last sentence.

§ 21.300 [Removed and reserved]

45. Section 21.300 is removed and reserved.

46. Section 21.303 is amended by removing the words ", and the Commission's Engineer in Charge of the radio district in which the station is located" from paragraph (a), by removing the second sentence from paragraph (b), by removing the second sentence from paragraph (c), and by adding a new paragraph (d) to read as follows:

§ 21.303 Discontinuance, reduction or impairment of service.

* * * * *

(d) If any radio frequency should not be used to render any service as authorized during a consecutive period of twelve months at any time after construction is completed and a certification of completion of construction has been filed, under circumstances that do not fall within the provisions of paragraph (a), (b) or (c) of this section, or, if removal of equipment or facilities has rendered the station not operational, the licensee shall, within thirty days of the end of such period of nonuse:

(1) Submit for cancellation the station license (or licenses) to the Commission at Washington, DC 20554;

(2) File an application for modification of the license (or licenses) to delete the unused frequency (or frequencies); or

(3) Request waiver of this rule and demonstrate either that the frequency will be used (as evidenced by appropriate requests for service, etc.) within six months of the end of the initial period of nonuse, or that the frequency will be converted to allow rendition of other authorized public services within one year of the end of the initial period of nonuse by the filing of appropriate applications within six months of the end of the period of nonuse.

If any frequency authorization is cancelled under this paragraph, the Commission will declare by public notice the frequency (or frequencies) vacated.

47. Section 21.304 is revised to read as follows:

§ 21.304 Tariffs, reports, and other material required to be submitted to the Commission.

Sections 1.771 through 1.815 of this chapter contain summaries of certain materials and reports, including schedule of charges and accounting and financial reports, which, when applicable, must be filed with the Commission.

§ 21.306 [Amended]

48. Section 21.306 is amended by removing the words "permittees and" from the title and from the first sentence.

49. Section 21.401 is amended by removing from paragraph (a) the words "construction permits" and inserting, in lieu thereof, the word "licenses"; and by revising paragraph (b) to read as follows:

§ 21.401 Scope of service.

* * * * *

(b) The testing of existing or authorized antennas, wave guides, or transmission paths.

§ 21.402 [Amended]

50. Section 21.402 is amended by removing the term "construction permit or" from the section.

§ 21.403 [Amended]

51. Section 21.403(b) is amended by removing the words "construction permits for".

52. Section 21.405 is amended by revising paragraph (a) to read as follows:

§ 21.405 Supplementary showing required.

(a) Authorizations for development of a proposed radio service in the services included in this part will be issued only upon a showing that the applicant has a definite program of research and development, the details of which shall be set forth, which has reasonable promise of substantial contribution to these services within the term of such authorization. A specific showing should be made as to the factors which qualify the applicant technically to conduct the research and development program, including a description of the nature and extent of engineering facilities that the applicant has available for such purposes.

* * * * *

53. Section 21.500 is revised to read as follows:

§ 21.500 Eligibility.

Authorization for Digital Termination Systems may be granted to existing and proposed communications common carriers. Applications will be granted only in cases in which the applicant establishes it is legally, technically, financially and otherwise qualified to render the services proposed and that the public interest, convenience and necessity would be served by such a grant. Each application will identify the Standard Metropolitan Statistical Area (SMSA) within which boundaries the DTS nodal station will be constructed and which the facility will serve.

§ 21.501 [Amended]

54. Section 21.501 is amended by removing the term "§ 21.7(c)" and inserting in its place "§ 21.7."

55. Section 21.502 is amended by removing current paragraphs (e)(2) and (f); by removing from paragraph (b) the words "Extended network assignments" in the first sentence and inserting in their place "Assignments"; by removing from paragraph (c) the words "Limited network assignments" in the first sentence and inserting in their place "Assignments" and by removing the words "Limited network" in the second sentence; by redesignating paragraphs (b), (c), (d), (e), (g) and (h) as (d), (e), (f), (g), (h), and (i); and by revising paragraph (a) and new paragraph (g) and adding new paragraphs (b) and (c) to read as follows:

§ 21.502 Frequencies.

(a) Frequencies in the bands 10,550–10,680 MHz and 17,700–19,700 MHz are available for assignment for all DEMS applicants. Assignments will consist of a pair of channels as set out in paragraphs (b), (c), (d) and (g) of this section plus internodal channels as set out in paragraphs (f) and (i) of this section

Note: New applications for the assignment of channel nos. 4, 7, 9 and 19/20 in the 10,500–10,680 MHz band that have been reallocated for private DTS stations will not be accepted after September 9, 1983. Existing licensees and pending applicants are permitted to submit applications for renewal and for additional nodal and associated user stations within the SMSA for which they have applied or have been authorized for use. Applications for the assignment of frequencies in the 17,700–19,700 MHz band as indicated in paragraph (h) will be accepted only for channels 6–A, 6–B, 7–A, 7–B, 8–A, 8–B, 9–A, 9–B, 10–A, and 10–B. Channel Nos. 1–A through 5–A and 1–B through 5–B are available for assignment to private DTS stations under Part 94 rules.

(b) Applicants and licensees in the 10 GHz band may apply for an additional channel pair in that band provided the proposed channel assignments, when aggregated with any previously proposed or granted channel assignment in the 10 GHz band, would not result in the applicant or licensee being granted more than 5 MHz of bandwidth in the 10 GHz band in the SMSA, excluding internodal channels.

(c) Except as provided in (b), licensees may apply for an additional channel pair in an SMSA only when it is operating its previously authorized DTS at or near the expected capacity and the service to be provided will fully utilize all spectrum requested.

* * * * *

(g) The bands 10,585–10,600 MHz and 10,650–10,665 MHz will be available for applicants when all the available channels have been assigned or when applications have been accepted for all available channels. Assignments in these bands will be according to the following plan:

CHANNEL GROUP A

Channel No.	Frequency band limits MHz
19–A	10 585.0–10 587.5
20–A	10 587.5–10 590.0
21–A	10 590.0–10 592.5
22–A	10 592.5–10 595.0
23–A	10 595.0–10 597.5
24–A	10 597.5–10 600.0

CHANNEL GROUP B

Channel No.	Frequency band limits MHz
19–B	10 650.0–10 652.5
20–B	10 652.5–10 655.0
21–B	10 655.0–10 657.5
22–B	10 657.5–10 660.0
23–B	10 660.0–10 662.5
24–B	10 662.5–10 665.0

Licensees will be assigned one pair of channels from Group A and the corresponding pair of channels from Group B. These channels may be adjacent, if available as such. The channel from Group A will be used for the Digital Termination Nodal Station transmitter and the channel from Group B will be used for Digital Termination User Station transmitter. Each pair of channels if adjacent may be used as a single channel if licensees comply with technical standards for use of a single 5 MHz channel. Assignments will start with channels 19 and 20 and proceed upward.

* * * * *

§ 21.504 [Amended]

56. Section 21.504 is amended by removing from paragraph (a) the words "Licensees, permittees" and by inserting in their place "Licensees".

§ 21.512 [Removed and reserved]

57. Section 21.512 is removed and reserved.

58. Section 21.700 is revised to read as follows:

§ 21.700 Eligibility.

(a) Authorizations for stations in this service will be issued to existing and proposed common carriers. Applications will be granted only in cases in which it is shown that:

(1) The applicant is legally, technically, financially and otherwise qualified to render the proposed service;

(2) There are frequencies available to enable the applicant to render a satisfactory service; and

(3) The public interest, convenience, and necessity would be served by a grant thereof.

(b) If the content is originated, selected, controlled, or otherwise substantively influenced by the applicant, licensee, or a closely affiliated entity, no station or radio frequency in this service will be authorized, or may be utilized, to transmit any closed circuit television signals or television signals other than broadcast television signals, unless:

(1) Such service is otherwise permitted for a specific length of time by grant of an acceptable petition for waiver of this rule; or

(2) Such service is otherwise permitted by a condition in the applicable instrument of authorization; or

(3) Such service is provided pursuant to applicable FCC tariff and is temporary and occasional intra-company television communication for management, network supervision, or other internal carrier functions.

For purposes of this paragraph, an entity will be considered to be "closely affiliated" with an applicant if it is in a parent-subsidiary relationship, or both are commonly controlled, or they have any common officers or management employees.

(c) Applications for stations or frequencies that will be used primarily to relay broadcast television signals must include a demonstration (including appropriate system diagrams and tables) that at least fifty percent of the customers (or points of service) on the microwave system involved, including those served through an interconnecting carrier(s), receiving applicant's service, will not be related or affiliated in any degree with the applicant, and that the proposed usage by such customers, in terms of hours of use and channels delivered, shall constitute at least fifty percent of the usage of the applicant's microwave service. Applications that do not contain these demonstrations will be returned as unacceptable for filing.

59. Section 21.704 is revised to read as follows:

§ 21.704 Modulation requirements.

When amplitude modulation is used, the modulation percentage shall be sufficient to provide efficient communication, and shall normally be maintained above 70 percent on peaks but shall not exceed 100 percent on negative peaks.

60. Section 21.706 is amended by redesignating current paragraphs (c) and (d) as (d) and (e), and by adding new paragraph (c) to read as follows:

§ 21.706 Supplementary showing required with applications.

* * * * *

(c) All applicants for regular authorization under this subpart shall, before filing an application, amendments to a pending application or modifications to a license, prior coordinate the proposed frequency usage with existing users in the area and other applicants with previously filed applications in accordance with the procedures in § 21.100(d) except that stations authorized under § 21.707 may complete the prior coordination process orally and the period allowed for response to a coordination notification may be less than 30 days if the parties agree.

* * * * *

§ 21.707 [Amended]

61. Section 21.707 is amended by removing the words "applications (FCC Forms 401 and 403)" in paragraph (a)(2) and inserting in lieu thereof the words "an application (FCC Form 494)" and by removing the words "FCC Form 401, and may be accompanied by completed FCC

Form 403 for a simultaneous consideration provided the equipment to be used is of 'packaged' design" in paragraph (b) and inserting in lieu thereof "FCC Form 494."

62. Section 21.708 is amended by removing the words ", and its Engineer in Charge of the radio district wherein operation is to be conducted," from paragraph (a), by removing the words "and its Engineer in Charge" from paragraph (a)(6), and revising paragraph (a)(7) and paragraph (c) to read as follows:

§ 21.708 Notification of station operation at temporary fixed locations.

(a) * * *

(7) A notification shall include compliance with the provisions of § 21.706 (c) when operations are to be conducted in the area of other terrestrial microwave stations and with the provisions of § 21.706(c) and (d) when operations are to be conducted within the coordination distance contours of a fixed earth station.

* * * * *

(c) A copy of the notification shall be kept with the station license.

63. Section 21.709 is amended by removing paragraphs (b) and (d), by redesignating paragraph (c) as new paragraph (b), and by revising paragraph (a) to read as follows:

§ 21.709 Renewal of station licenses.

(a) An application for renewal of a station license in the Point-to-Point Microwave Radio Service primarily used to relay television signals shall contain:

(1) A statement that such use complies with § 21.700(b); and

(2) The demonstration required by § 21.700(c). Applications that do not contain these items as appropriate will be returned as unacceptable for filing.

§ 21.711 [Amended]

64. Section 21.711 is amended by removing paragraphs (b) and (c), paragraphs (d), (e) and (f) are redesignated paragraphs (b), (c) and (d), new paragraph (b) is amended by removing the words "and a copy of the notification provided to the Engineer in charge"; and new paragraph (c) is amended by removing the words "and the Engineer in Charge".

§ 21.713 [Removed and reserved]

65. Section 21.713 is removed and reserved.

66. Section 21.806 is amended by revising paragraph (a) to read as follows:

§ 21.806 Remote control operation of mobile telephone pickup stations.

(a) Mobile television pickup stations (including nonbroadcast) may be operated by remote control from the fixed locations for periods not to exceed 6 months.

* * * * *

67. Section 21.807 is amended by removing the words "applications (FCC Forms 401 and 403)" in paragraph (a)(2) and inserting in their place "application FCC Form 494" and by revising paragraph (b) to read as follows:

§ 21.807 Stations at temporary fixed locations.

* * * * *

(b) Applications for authorizations to operate stations at temporary locations under the provisions of this section may be made upon FCC Form 494. Blanket applications may be submitted for the required number of transmitters.

* * * * *

68. Section 21.808 is amended by removing the words "and its Engineer in Charge" from paragraph (a)(6), by revising the introductory text of paragraph (a)(8) as follows:

§ 21.808 Notification of station operation at temporary locations.

(a) The licensee of stations authorized pursuant to § 21.807 shall notify the Commission prior to each period of operation. This notification may be oral or written and shall include:

* * * * *

(8) A notification shall include compliance with the provisions of § 21.807(c).

(b) A copy of the notification shall be kept with the station license.

§ 21.809 [Amended]

69. Section 21.809 is amended by removing the designations "(c) and (d)" and inserting in lieu thereof the term "(d) and (e)".

70. Section 21.906 is amended by removing from paragraph (a) the term "directive" and inserting, in lieu thereof, the term "directional"; and by adding a new last sentence at the end of paragraph (a), as follows:

§ 21.906 Antennas.

(a) * * * When an applicant proposes to employ a directional antenna, the applicant shall provide the Commission with information regarding the orientation of the directional antenna, expressed in degree of azimuth, with respect to true north.

* * * * *

§ 21.909 [Amended]

71. Section 21.909 is amended by removing paragraphs (b)(2), (b)(3) and (b)(4) and by redesignating paragraph (b)(5) as (b)(2).

Federal Communications Commission.

William J. Tricarico,

Secretary.

[FR Doc. 87-23513 Filed 10-8-87; 8:45 am]

BILLING CODE 6712-01-M

---

47 CFR Part 73

[MM Docket No. 86-144; FCC 87-296]

Broadcast Services; Review of Technical Parameters for FM Broadcast Stations

AGENCY: Federal Communications Commission.

ACTION: Final rule.

SUMMARY: The method that the FCC uses to classify FM broadcast stations on the basis of effective antenna height and transmitting power is codified. The required procedures for predicting FM broadcast station coverage and calculating the distance between two points are modified for increased accuracy. Permissible modifications for certain grandfathered short-spaced FM broadcast stations are limited to those which do not increase the risk of interference. These actions are necessary to address certain technical discrepancies resulting from an earlier action that increased the number of FM broadcast station classes, and to update and modernize required procedures.

EFFECTIVE DATE: November 9, 1987.

ADDRESS: Federal Communications Commission, Washington, DC 20554.

FOR FURTHER INFORMATION CONTACT: B.C. "Jay" Jackson, Jr., Mass Media Bureau, (202) 632-9660.

SUPPLEMENTARY INFORMATION: This is a summary of Commission's *Second Report and Order*, MM Docket 86-144, adopted September 10, 1987 and released September 25, 1987. The full text of this Commission decision is available for inspection and copying during normal business hours in the FCC Dockets Branch (Room 230), 1919 M Street Northwest, Washington, DC. The complete text of this decision may also be purchased from the Commission's copy contractors, International Transcription Services, (202) 857-3800, 2100 M Street NW., Suite 140, Washington, DC 20037.

Final Regulatory Flexibility Analysis

Pursuant to the Regulatory Act of 1980, 5 U.S.C. 604, a final regulatory

flexibility analysis has been prepared. It is available for public viewing as a part of the full text of this decision, which may be obtained from the Commission or its copy contractor.

Summary of the Second Report and Order

1. The Commission initiated this proceeding in April 1986 by adopting a *Notice of Proposed Rule Making (Notice)* proposing to amend rules that were affected by BC Docket No. 80–90, but were not given detailed consideration in that proceeding. The Commission also proposed a new method for classifying stations that would allow a continuous range of permissible FM facilitics. More than 400 parties filed comments or reply comments in response to the *Notice*. Earlier this year the Commission adopted a *First Report and Order* resolving two of the matters proposed in the *Notice*.

2. The *Notice* illustrated how some reasonable combinations of antenna height above average terrain (HAAT) and effective radiated power (ERP) do not conform to the maximum and minimum requirements of the Commission's rules for any of the six classes of FM broadcast stations. To rectify this problem, a new "index" method for classifying FM broadcast stations was proposed. The index method would also replace the "equivalence method" currently mandated for overheight power reduction and serve as an alternative to the minimum power requirements for each class.

3. In order to license FM stations efficiently, the Commission must be able to classify them rapidly and accurately. The principal goal of the index method proposal was to provide a clear-cut means of classifying FM stations according to their antenna HAAT and ERP. However, it was determined that the power reduction formulas derived from the proposed method do not track the propagation curves in the rules with sufficient accuracy. Furthermore, it now appears that the index method could easily be misunderstood or incorrectly applied.

4. Therefore, the Commission is not adopting the index method. Instead, the Commission is amending its rules to provide a detailed explanation of the method used to classify FM broadcast stations since the effective date of Docket 80–90. This method first looks to the maximum and minimum ERP and HAAT limits in the rules, and then, for only those stations that fall outside of those limits, uses the distance to the 1 mV/m field strength contour, rounded to the nearest kilometer (the "reference distance") to determine the station class. Exceptions to the minimum power requirements are provided for stations with large effective antenna heights and stations whose reference distance exceeds the class contour distance for the next lower class.

5. To bring its rules up-to-date with changing technology and current engineering practices, the Commission is amending the rules to require that prediction of coverage be determined using the maximum ERP of the main radiated lobe of the FM station's antenna, regardless of the orientation of that lobe. This will result in an improvement in accuracy and will allow the effects of beam-tilt antennas to be reflected in coverage predictions.

6. The Commission's rules specify, by station class, the minimum distance that each FM station must be separated from other FM stations that operate on frequencies separated by 10.6 or 10.8 MHz in order to reduce the probability of intermodulation interference in FM receivers. In Docket 80–90, the Commission applied the existing IF separation distances for the large Class B and C stations to the new intermediate size classes B1, C2, and C1. Consequently, stations in these new classes must meet the same separations as the largest stations, limiting their flexibility in choice of antenna sites. Thus, in the *Notice*, the Commission proposed reductions in the required spacing for the new classes.

7. Based on the record before it, the Commission finds that adoption now of the reduced separation distances proposed for the new classes would be premature. Although not changing the IF separations for the new classes at this time, the Commission continues to believe that reduction of these separations is appropriate. Accordingly, after reviewing and analyzing the IF interference susceptibility test data obtained in its laboratory, the Commission plans to issue a Further Notice of Proposed Rule Making in this proceeding looking toward such a relaxation.

8. The Commission's rules provide a table of routinely permissible modifications that apply only to FM stations authorized prior to November 16, 1964 at locations that did not then and still do not meet the minimum separation distances. Some of these grandfathered short-spaced stations were reclassified to Class C1, C2 or B1, as a result of Docket 80–90. However, the table does not contain provisions for the new classes. In the *Notice*, it was proposed to replace the table and the current rule text with a single paragraph that would permit grandfathered short-spaced stations to be modified or relocated, provided that the 1 mV/m field strength contours are not extended toward the 1 mV/m contours of any short-spaced station.

9. Grandfathered short-spaced stations have had 22 years to take advantage of § 73.213 of the rules to optimize their facilities. The Commission believes that continuing to allow these stations to routinely modify their facilities in ways that increase the risk of interference is not in the public interest. Therefore, the Commission is adopting its proposal. The Commission will continue, however, to consider mutual agreements between these grandfathered short-spaced stations for facilities increases when it is shown that the public interest would be served.

10. The Notice proposed to revise coefficients in the distance calculation equations in § 73.208 of the rules. Some precision in these coefficients was inadvertantly lost when the equations were converted to metric and truncated. The Commission is adopting the more precise coefficients for distance calculation.

11. Finally, the Commission is adopting editorial amendments that (1) specify more clearly the area constituting a quiet zone in Boulder County, Colorado as a box bounded by particular latitude and longitude lines, rather than as the "vicinity" of a specified point; and (2) amend the rule permitting replacement of the transmitting antenna of an FM (or TV) broadcast station without prior Commission authorization in order to clarify that it is intended only for those situations in which there is no change in the coverage characteristics.

12. Applications received prior to the effective date of these rules will be processed in accordance with the rules most advantageous to the applicant.

13. Authority for the action taken herein is contained in section 303 of the Communications Act of 1934 as amended.

14. Accordingly, *it is ordered* That Part 73 of the Commission's Rules and Regulations *are amended*, as set forth below.

15. *It is further ordered* That those Class C stations that, as of March 2, 1987, were operating with an ERP less than 100 kW, HAAT greater than 300 meters, and distance to the 1 mV/m field strength contour exceeding 72 km, and consequently were not reclassified pending action in this proceeding, *are designated* Class C.

16. *It is further ordered* That the Petition for Partial Reconsideration filed

by Hudson Group Limited Partnership of Pennsylvania is *dismissed.*

List of Subjects in 47 CFR Part 73

Radio broadcasting.

William J. Tricarico,

Secretary.

47 CFR Part 73 is amended as follows:

PART 73—[AMENDED]

1. The authority citation for Part 73 continues to read as follows:

Authority: 47 U.S.C. 154 and 303.

2. 47 CFR 73.208 is amended by revising paragraph (c) to read as follows:

§ 73.208 Reference points and distance computation.

* * * * *

(c) The method given in this paragraph shall be used to compute the distance between two reference points, except that, for computation of distance involving stations in Canada and Mexico, the method for distance computation specified in the applicable international agreement shall be used instead. The method set forth in this paragraph is valid only for distances not exceeding 475 km (295 miles).

(1) Convert the latitude and longitude of each reference point from degree-minute-second format to degree-decimal format by:

(i) Dividing minutes by 60 and seconds by 3600 then adding the results to degrees; or,

(ii) Using Table 1 of § 73.698.

(2) Calculate the middle latitude between the two reference points by averaging the two latitudes as follows:

$$ML=(LAT1_{dd}+LAT2_{dd})/^{2}$$

(3) Calculate the number of kilometers per degree latitude difference for the middle latitude calculated in paragraph (c)(2) as follows:

$$KPD_{lat}=111.13209-0.56605\cos(2ML)+0.00120\cos(4ML)$$

(4) Calculate the number of kilometers per degree longitude difference for the middle latitude calculated in paragraph (c)(2) as follows:

$$KPD_{lon}=111.41513\cos(ML)-0.09455\cos(3ML)+0.00012\cos(5ML)$$

(5) Calculate the North-South distance in kilometers as follows:

$$NS=KPD_{lat}(LAT1_{dd}-LAT2_{dd})$$

(6) Calculate the East-West distance in kilometers as follows:

$$EW=KPD_{lon}(LON1_{dd}-LON2_{dd})$$

(7) Calculate the distance between the two reference points by taking the square root of the sum of the squares of the East-West and North-South distances as follows:

$$DIST=(NS^{2*}EW^{2})^{0.5}$$

(8) Round the distance to the nearest kilometer.

(9) Terms used in this section are defined as follows:

(i) $LAT1_{dd}$ and $LON1_{dd}$ = the coordinates of the first reference point in degree-decimal format.

(ii) $LAT2_{dd}$ and $LON2_{dd}$ = the coordinates of the second reference point in degree-decimal format.

(iii) ML = the middle latitude in degree-decimal format.

(iv) KPD_{lat} = the number of kilometers per degree of latitude at a given middle latitude.

(v) KPD_{lon} = the number of kilometers per degree of longitude at a given middle latitude.

(vi) NS = the North-South distance in kilometers.

(vii) EW = the East-West distance in kilometers.

(viii) DIST = the distance between the two reference points, in kilometers.

3. A new section 47 CFR 73.210, *Station classes,* is added:

§ 73.210 Station classes.

(a) The rules applicable to a particular station, including minimum and maximum facilities requirements, are determined by its class. Possible class designations depend upon the zone in which the station's transmitter is located, or proposed to be located. The zones are defined in § 73.205. Allotted station classes are indicated in the Table of Allotments, § 73.202. Class A, B1 and B stations may be authorized in Zones I and I–A. Class A, C2, C1, and C stations may be authorized in Zone II.

(b) The power and antenna height requirements for each class are set forth in § 73.211. If a station has an ERP and an antenna HAAT such that it cannot be classified using the maximum limits and minimum requirements in § 73.211, its class shall be determined using the following procedure:

(1) Determine the reference distance of the station using the procedure in paragraph (b)(1)(i) of § 73.211. If this distance is less than or equal to 24 km, the station is Class A; otherwise,

(2) For a station in Zone I or Zone I–A:

(i) If this distance is greater than 24 km and less than or equal to 39 km, the station is Class B1.

(ii) If this distance is greater than 39 km and less than or equal to 52 km, the station is Class B.

(3) For a station in Zone II:

(i) If this distance is greater than 24 km and less than or equal to 52 km, the station is Class C2.

(ii) If this distance is greater than 52 km and less than or equal to 72 km, the station is Class C1.

(iii) If this distance is greater than 72 km and less than or equal to 92 km, the station is Class C.

3. 47 CFR 73.211, *Power and antenna height requirements,* is amended by revising the text of paragraph (a) and paragraphs (b)(1) and (b)(2), and by removing paragraphs (d) and (e).

§ 73.211 Power and antenna height requirements.

(a) *Minimum requirements.* (1) Except as provided in paragraphs (a)(3) and (b)(2) of this section, the minimum effective radiated power (ERP) for:

Class A stations must equal 0.1 kW (10.0 dBk);

Class B1 stations must exceed 3 kW (4.8 dBk);

Class B stations must exceed 25 kW (14.0 dBk);

Class C2 stations must exceed 3 kW (4.8 dBk);

Class C1 stations must exceed 50 kW (17.0 dBk);

Class C stations must equal 100 kW (20.0 dBk).

(2) Class C stations must have an antenna height above average terrain (HAAT) of at least 300 meters (984 feet). No minimum HAAT is specified for Classes A, B1, B, C2, or C1 stations.

(3) Stations of any class except Class A may have an ERP less than that specified in paragraph (a)(1) of this section, provided that the reference distance, determined in accordance with paragraph (b)(1)(i) of this section, exceeds the distance to the class contour for the next lower class.

(b) *Maximum limits.* (1) The maximum ERP in any direction, reference HAAT, and distance to the class contour for the various classes of stations are listed below:

Station class	Maximum ERP	Reference HAAT in meters (ft)	Class contour distance in kilometers
A	3kW (4.8 dBk)	100 (328)	24
B1	25kW (14.0 dBk)	100 (328)	39
B	50kW (17.0 dBk)	150 (492)	52
C2	50kW (17.0 dBk)	150 (492)	52
C1	100kW (20.0 dBk)	299 (981)	72
C	100kW (20.0 dBk)	600 (1968)	92

(i) The reference distance of a station is obtained by finding the distance to the 1 mV/m contour using Figure 1 of § 73.333 and then rounding to the nearest kilometer. Antenna HAAT is determined using the procedure in § 73.313. If the HAAT so determined is less than 30 meters (100 feet), a HAAT of 30 meters must be used when finding the distance to the 1 mV/m contour.

(ii) If a station's ERP is equal to the maximum for its class, its antenna HAAT must not exceed the reference HAAT, regardless of the reference distance. For example, a Class A station operating with 3 kW ERP may have an antenna HAAT of 100 meters, but not 101 meters, even though the reference distance is 24 km in both cases.

(iii) No station will be authorized in Zone I or I-A with an ERP equal to 50 kW and a HAAT exceeding 150 meters No station will be authorized in Zone II with an ERP equal to 100 kW and a HAAT exceeding 600 meters.

(2) If a station has an antenna HAAT greater than the reference HAAT for its class, its ERP must be lower than the class maximum such that the reference distance does not exceed the class contour distance. If the antenna HAAT is so great that the station's ERP must be lower than the minimum ERP for its class (specified in paragraphs (a)(1) and (a)(3) of this section), that lower ERP will become the minimum for that station.

* * * * *

4. 47 CFR 73.213 is revised in its entirety to read as follows:

§ 73.213 Grandfathered short-spaced stations.

Stations at locations authorized prior to November 16, 1964 that did not meet the separation distances required by § 73.207 and have remained short-spaced since that time may be modified or relocated provided that the predicted distance to the 1 mV/m field strength contour is not extended toward the 1 mV/m field strength contour of any short-spaced station. Mutual increase in the facilities of such stations up to the limits set forth in § 73.211 may be permitted pursuant to an agreement between the affected stations and a showing of public interest. *See* § 73.4235.

5. 47 CFR 73.313 is amended by revising paragraph (c)(2) to read as follows:

§ 73.313 Prediction of coverage.

* * * * *

(c) * * *

(2) To use the chart for other ERP values, convert the ordinate scale by the appropriate adjustment in dB. For example, the ordinate scale for an ERP of 50 kW (17 dBk) should be adjusted by 17 dB and, therefore, a field strength of 40 dBu would be converted to 57 dBu. When predicting the distance to field strength contours, use the maximum ERP of the main radiated lobe in the pertinent azimuthal direction. When predicting field strengths over areas not in the plane of the maximum main lobe, use the ERP in the direction of such areas, determined by considering the appropriate vertical radiation pattern.

* * * * *

§ 73.1030 [Amended]

6. 47 CFR 73.1030 is amended by revising the parenthetical phrase "(in the vicinity of coordinates 40°07'50" N Latitude, 105°14'40" W Longitude)" of paragraph (b) introductory text to read "(within the area bounded by 40°09'10" N Latitude on the north, 105°13'31" W Longitude on the east, 40°07'05" N Latitude on the south, and 105°15'13" W Longitude on the west)".

7. 47 CFR 73.1690 is amended by revising paragraph (c)(1) to read as follows:

§ 73.1690 Modification of transmission systems.

* * * * *

(c) * * *

(1) Replacement of a non-directional antenna with one of the same or different type or number of bays, provided that the height above ground of the center of radiation is within 2 meters of that specified in the station authorization, the parameters are within that permitted by its class designation, and there is no change in the maximum effective radiated power.

[FR Doc. 87-22758 Filed 10-8-87; 8:45 am]
BILLING CODE 8712-01-M

DEPARTMENT OF THE INTERIOR

Fish and Wildlife Service

50 CFR Part 32

Refuge-Specific Hunting Regulations

AGENCY: Fish and Wildlife Service, Interior.

ACTION: Final rule.

SUMMARY: The Fish and Wildlife Service (Service) is amending certain regulations in 50 CFR Part 32 that pertain to migratory game bird, upland game, and big game hunting on individual national wildlife refuges (NWR). Refuge hunting programs are reviewed annually to determine whether the regulations governing individual refuge hunts should be modified, added to or deleted. Changing environmental conditions, State and Federal regulations, and other factors affecting wildlife populations and habitats may warrant modifications to ensure the continued compatibility of hunting with the purposes for which the individual refuges involved were established and, to the extent practical, make refuge hunting programs consistent with State regulations.

EFFECTIVE DATE: October 9, 1987.

FOR FURTHER INFORMATION CONTACT: Nancy A. Marx, Division of Refuges, U.S. Fish and Wildlife Service, 18th and C Streets, NW., Room 2343, Washington, DC 20240; Telephone (202) 343-3922.

SUPPLEMENTARY INFORMATION: 50 CFR Part 32 contains provisions governing hunting on national wildlife refuges. Hunting is regulated on refuges to: (1) Ensure compatibility with refuge purposes, (2) properly manage the wildlife resource, (3) protect other refuge values, and (4) ensure refuge user safety. On many refuges, the Service policy of adopting State hunting regulations is adequate in meeting these objectives. On other refuges, it is necessary to supplement State regulations with more restrictive Federal regulations to ensure that the Service meets its management responsibilities, as outlined under the section entitled "Conformance with Statutory and Regulatory Authorities." Refuge-specific hunting regulations may be issued only after a wildlife refuge is opened to migratory game bird, upland game, or big game hunting through publication in the **Federal Register**. These regulations may list the wildlife species that may be hunted, seasons, bag limits, methods of hunting, descriptions of open areas, and other provisions. Previously issued refuge-specific regulations for migratory game bird, upland game, and big game hunting are contained in 50 CFR 32.12, 32.22, and 32.32 respectively. Many of the proposed amendments to these sections are being promulgated to standardize and clarify the existing language of these regulations. Again this year, regulations for nontoxic shot are required on more refuges. Consequently, new regulations are being added.

The policy of the Department of the Interior is, whenever practicable, to afford the public an opportunity to participate in the rulemaking process. Accordingly, written comments received during the 30-day comment period for the proposed rule (52 FR 27828) are addressed in the following section.

Responses to Comments Received

Written comments were received from one private organization and several Service Regional offices in response to the proposed rulemaking. Technical corrections have been made, coyote and groundhog have been removed as a proposed huntable species on Wheeler NWR because of an administrative oversight on their addition and several regulations concerning the use of hunter

orange material while hunting have been added for hunter safety. Many substantive issues raised by the one organization were the same as those raised on the 1986 proposed rule opening 17 refuges to hunting and/or fishing. In the interest of reducing the paperwork burden of the government, it is suggested that 51 FR 30655 (final rule opening 17 refuges to hunting and/or fishing) be referenced for Service responses to those issues. Several new issues were presented on this proposed rule on refuge-specific regulations and are addressed below:

Issue: Lack of data supporting the addition of sambar deer to the huntable species at St. Vincent NWR.

Response: The appropriate documentation (i.e., hunt plan, EA, Section 7 evaluation and compatibility statement) has been completed and approved and it was found that the hunting of sambar deer would be compatible with refuge purposes.

Issue: Lack of data supporting the assertion that the proposed regulations are exempt from the requirements of the National Environmental Policy Act.

Response: See statements under "Environmental Considerations" in the preamble of this final rulemaking.

Issue: No evidence is presented that the necessary determinations have been made to ensure that endangered and threatened species will not be adversely affected by these proposed regulations.

Response: The majority of these regulations make technical corrections standardizing language and definitions from Region to Region, parallel the Migratory Bird Management Office's nontoxic shot regulations (for greater protection of the resource including endangered and threatened species) and provide for the public's safety by requiring the wearing of hunter orange material. The Service has concluded that these regulations will not affect any endangered or threatened species.

Conformance With Statutory and Regulatory Authorities

The National Wildlife Refuge System Administration Act (NWRSAA) of 1966, as amended (16 U.S.C. 668dd), and the Refuge Recreation Act of 1962 (16 U.S.C. 460k) govern the administration and public use of national wildlife refuges. Specifically, section 4(d)(1)(A) of the NWRSAA authorizes the Secretary of the Interior to permit the use of any area within the Refuge System for any purpose, including but not limited to, hunting, fishing and public recreation, accommodations and access, when he determines that such uses are compatible with the major purpose(s) for which the area was established.

The Refuge Recreation Act authorizes the Secretary to adminster areas within the Refuge System for public recreation as an appropriate incidential or secondary use only to the extent that it is practicable and not inconsistent with the primary purpose(s) for which the areas were established. The Refuge Recreation Act also authorizes the Secretary to issue regulations to carry out the purposes of the Act. Hunting plans are developed for each refuge prior to opening it to hunting. In many cases, refuge-specific hunting regulations are included in the hunting plan to ensure the compatibility of the hunting programs with the purposes for which the refuge was established. Initial compliance with the NWRSAA and Refuge Recreation Act is ensured when hunting plans are developed, and the determinations required by these acts are made prior to the addition of refuges to the lists of areas open to hunting in 50 CFR. Continued compliance is ensured by annual review of hunting programs and regulations.

Considering the rapidly approaching hunting seasons and the ones presently taking place, there is an immediate need to place these regulations into effect. The absence of refuge-specific hunting regulations for these hunting seasons woud be contrary to the public interest (confusion on hours, bag limits, or firearm restrictions), hunter safety (added requirements for the use of the hunter orange clothing) and wildlife conservation (nontoxic shot requirements). Thus, the Department concludes that good cause exists within the meaning of 5 U.S.C. 553(d)(3) to make these regulations effective upon publication in the **Federal Register**.

Economic Effect

Executive Order 12291 requires the preparation of regulatory impact analyses for major rules. A major rule is one likely to result in an annual effect on the economy of $100 million or more; or a major increase in costs or prices for consumers, individual industries, government agencies or geographic regions. The Regulatory Flexibility Act of 1980 (5 U.S.C. 601 *et seq.*) further requires the preparation of flexibility analyses for rules that will have a significant effect on a substantial number of small entities, which include small businesses, organizations or governmental jurisdictions.

The amendments to the codified refuge-specific hunting regulations, included in this final rule will make relatively minor adjustments to existing hunting programs. These regulations are not expected to have any gross economic effect and will not cause an increase in costs or prices for consumers, individual industries, Federal, State, or local governments, agencies, or geographic regions. The benefits accruing to the public are expected to exceed by a large margin the cost of administering this rule. Accordingly, the Department of the Interior has determined that this proposed rule is not a "major rule" within the meaning of E.O. 12291 and will not have a significant economic effect on a substantial number of small entities within the meaning of the Regulatory Flexiblity Act.

Paperwork Reduction Act

The Service has received approval from the Office of Management and Budget (OMB) for the information collection requirements of these regulations pursuant to the Paperwork Reduction Act (44 U.S.C. 3501 *et seq.*). These requirements are presently approved by OMB under #1018–0014 Economic and Public Use Permits. These regulations impose no new reporting or recordkeeping requirements that must be cleared by OMB.

Environmental Considerations

Compliance with the National Environmental Policy Act of 1969 (NEPA) (42 U.S.C. 4332(C)) and the Endangered Species Act of 1973 (16 U.S.C. 1531–1543) is ensured when hunting plans are developed, and the determinations required by these acts are made prior to the addition of refuges to the lists of areas open to hunting in 50 CFR. Refuge-specific hunting regulations are subject to a categorical exclusion from the NEPA process if they do not significantly alter the existing use of a particular national wildlife refuge, do not cause substantial environmental impacts, maintain the permitted level of use or are implemented for public safety purposes. The changes made by this rulemaking (most of which are technical in nature) will not substantially alter the existing uses of the refuges involved and will actually enhance existing uses through more efficient managment regulations. These regulations will also reduce environmental impacts substantially by implementing nontoxic shot regulations that will reduce the impacts of lead shot on waterfowl and other impacted species. And for public safety purposes the requirement for hunter orange is being included.

Information regarding hunting permits and the conditions that apply to individual refuge hunts and maps of the hunt areas are available at refuge headquarters or can be obtained from the Regional offices of the U.S. Fish and

Wildlife Service at the addresses listed below:

Region 1—California, Hawaii, Idaho, Nevada, Oregon and Washington.
Assistant Regional Director—Refuges and Wildlife, U.S. Fish and Wildlife Service, Lloyd 500 Building, Suite 1692, 500 NE Multnomah Street, Portland, Oregon 97232; Telephone (503) 231–6214.

Region 2—Arizona, New Mexico, Oklahoma and Texas.
Assistant Regional Director—Refuges and Wildlife, U.S. Fish and Wildlife Service, Box 1306, Albuquerque, New Mexico 87103; Telephone (505) 766–1829.

Region 3—Illinois, Indiana, Iowa, Michigan, Minnesota, Missouri, Ohio and Wisconsin.
Assistant Regional Director—Refuges and Wildlife, U.S. Fish and Wildlife Service, Federal Building, Fort Snelling, Twin Cities, Minnesota 55111; Telephone (612) 725–3507.

Region 4—Alabama, Arkansas, Florida, Georgia, Kentucky, Louisiana, Mississippi, North Carolina, Tennessee, South Carolina and Puerto Rico.
Assistant Regional Director—Refuges and Wildlife, U.S. Fish and Wildlife Service, Richard B. Russell Federal Building, 75 Spring Street, SW, Atlanta, Georgia 30303; Telephone (404) 221–3538.

Region 5—Connecticut, Delaware, District of Columbia, Maine, Maryland, Massachusetts, New Hampshire, New Jersey, New York, Pennsylvania, Rhode Island, Vermont, Virginia and West Virginia.
Assistant Regional Director—Refuges and Wildlife, U.S. Fish and Wildlife Service, One Gateway Center, Suite 700, Newton Corner, Massachusetts 02158; Telephone (617) 965–9222.

Region 6—Colorado, Kansas, Montana, Nebraska, North Dakota, South Dakota, Utah and Wyoming.
Assistant Regional Director—Refuges and Wildlife, U.S. Fish and Wildlife Service, Box 25486, Denver Federal Center, Denver, Colorado 80225; Telephone (303) 236–8145.

Region 7—Alaska, (Hunting on Alaska refuges is in accordance with State regulations. There are no refuge-specific hunting regulations for these refuges.).
Assistant Regional Director—Refuges and Wildlife, U.S. Fish and Wildlife Service, 1011 E. Tudor Rd., Anchorage, Alaska 99503; Telephone (907) 786–3538.

Nancy A. Marx, Division of Refuges, U.S. Fish and Wildlife Service, Washington, DC 20240, is the primary author of this final rulemaking document.

List of Subjects in 50 CFR Part 32

Hunting, National Wildlife Refuge System, Wildlife, Wildlife refuges.

Accordingly, Part 32 of Chapter I of Title 50 of the Code of Federal Regulations is amended as set forth below:

1. The authority citation for Part 32 continues to read as follows:

Authority: 5 U.S.C. 301, 16 U.S.C. 460k, 664, 668dd, and 715i.

2. Section 32.12 is amended by adding (b)(8); revising (d)(1) introductory text; redesignating (d)(1)(vi) as (d)(1)(vii), and adding (d)(1)(vi); adding (e)(1)(ix) and (3)(ix); revising (f)(1) introductory text and (f)(1)(ii); revising (f)(2), (3), (4) introductory text and (5) introductory text, (f)(5)(iii) and (iv), (f)(6) introductory text, (f)(6)(ii), (iii) and (vi), and (f)(7) introductory text; adding (f)(7)(v); revising (f)(8) introductory text, (f)(8)(iv), (f)(9) introductory text, (f)(9)(v) and (f)(10) introductory text; adding (f)(10)(iii) and (iv); removing (f)(11)(iii) and redesignating(f)(11)(iv), (v) and (vi) as (f)(11)(iii), (iv) and (v); revising (f)(12) introductory text and (f)(12)(iv); redesignating (f)(12)(ii) and (iii) as (f)(12)(iii) and (ii) respectively; revising newly redesignated (f)(12)(iii); revising (f)(13)(ii); adding (f)(13)(v); revising (f)(14) and (f)(15) introductory text, (f)(15)(ii), (iv) and (vii), (g)(1) and (3), (h)(1)(viii) and (2)(vii), and (i)(1)(ii); adding (i)(1)(v) and (vi); removing (i)(2)(iv); redesignating(i)(2)(v) through (vii) as (i)(2)(iv) through (vi); revising newly redesignated (i)(2)(vi); revising (i)(3)(iv), (4)(ii) and (iii), (j)(3) and (k)(2); removing (k)(3)(iii); and redesignating (k)(3)(iv) and (v) as (k)(3)(iii) and (iv); revising new (k)(3)(iv); adding (l)(1)(iv); revising (l)(2)(i), (ii) and (iii), (m)(1)(ii) and (iii) and (o)(2); redesignating (q)(1) through (7) as (q)(2) through (8); adding (q)(1), (2)(v) and (3)(iv) and (v); removing (q)(4)(ii); redesignating (q)(4)(iii) through (v) as (q)(4)(ii) through (iv); adding (q)(4)(v); revising (q)(5)(v), (6)(iv), (7)(i), (ii) and (iii) and (8)(ii); adding (q)(8)(iv), (v) and (vi); revising (s)(1) and (2)(ii); adding (s)(2)(v); revising (t)(1) (t)(2)(ii) and (u)(1)(iii), (u)(2) introductory text, and (u)(2)(iv); adding (u)(2)(v); reviing (u)(3) introductory text and (u)(3)(iii); adding (v)(1)(iv); revising (v)(5)(iii), (w)(1)(ii) and (2)(ii), (z)(1) introductory text and (z)(2), (aa) introductory text and (aa)(1); adding (aa)(7); revising (bb)(1) introductory text, (bb)(1)(i), (2)(iii) and (3)(ii); adding (bb)(3)(ii), (iv) and (v); revising (bb)(4)(ii), (cc)(1)(iv), (cc)(2)(iii) and (dd)(i); revising (dd)(2)(i), (3)(v) and (5)(i) and (ee); revising (ff) introductory text, (ff)(2), (gg)(2), (hh)(1)(iv), (3)(iii); removing (hh)(5)(i), redesignating (hh)(5)(ii) and (iii) as (hh)(5)(i) and (ii); revising newly redesignated (hh)(5)(i); revising (hh)(8)(i) and (13)(iv) and (ii)(2); adding (ii)(1)(iv); revising(11)(2)(iv), (3)(iv) and (4)(ii), (mm)(2)(i), (3)(i), (5)(iv), (6)(iii) and (7)(iii), (nn)(1)(ii), (nn)(2) and (3), (oo)(7), (qq)(5)(iii), (qq)(6), (rr)(1)(iii), (2)(ii) and (3)(ii), and (ss).

§ 32.12 Refuge-specific regulations: migratory game birds.

* * * * *

(b) *Alabama and Georgia—Eufaula National Wildlife Refuge.* * * *

(8) Hunter may not possess or use more than 25 shells per day when waterfowl hunting.

* * * * *

(d) *Arizona and California—(1) Cibola National Wildlife Refuge.* Hunting of geese, ducks, coots, moorhens and mourning and white-winged doves is permitted on designated areas of the refuge subject to the following conditions:

* * * * *

(vi) Waterfowl hunting will cease at 3:00 p.m. each day.

* * * * *

(e) *Arkansas—(1) Felsenthal National Wildlife Refuge.* * * *

(ix) Waterfowl and coot hunters shall possess and use, while in the field, only nontoxic shot.

* * * * *

(3) *Overflow National Wildlife Refuge.* * * *

(ix) Waterfowl and coot hunters shall posses and use, while in the field, only nontoxic shot.

* * * * *

(f) *California—(1) Clear Lake National Wildlife Refuge.* Hunting of geese, ducks, coots, moorhens, and snipe is permitted on designated areas of the refuge subject to the following conditions:

* * * * *

(ii) Waterfowl, coot and moorhen hunters shall possess and use, while in the field, only nontoxic shot.

(2) *Colusa National Wildlife Refuge.* Hunting of geese, ducks, coots, moorhens and snipe is permitted on designated areas of the refuge subject to the following condition: Waterfowl, coot and moorhen hunters shall possess and use, while in the field, only nontoxic shot.

(3) *Delevan National Wildlife Refuge.* Hunting of geese, ducks, coots, moorhens and snipe is permitted on designated areas of the refuge subject to the following condition: Waterfowl, coot

VOL 52 ISS 196 OCT 9 1987 UMI

and moorhen hunters shall possess and use, while in the field, only nontoxic shot.

(4) *Kern National Wildlife Refuge.* Hunting of geese, ducks, coots and moorhens is permitted on designated areas of the refuge subject to the following conditions:

* * * * *

(5) *Kesterson National Wildlife Refuge.* Hunting of geese, ducks, coots, moorhens and snipe is permitted on designated areas of the refuge subject to the following conditions:

* * * * *

(iii) Waterfowl, coot and moorhen hunters shall possess and use, while in the field, only nontoxic shot.

(iv) Hunters may not possess more than 25 shells while in the field.

(6) *Lower Klamath National Wildlife Refuge.* Hunting of geese, ducks, coots, moorhens and snipe is permitted on designated areas of the refuge subject to the following conditions:

* * * * *

(ii) Shooting hours end at 1:00 p.m. daily on all California portions of the refuge.

(iii) Only unloaded firearms may be taken through posted retrieving zones when traveling to and from the hunting areas.

* * * * *

(vi) Waterfowl, coot and moorhen hunters shall possess and use, while in the field, only nontoxic shot.

(7) *Merced National Wildlife Refuge.* Hunting of geese, ducks, coots and moorhens is permitted on designated areas of the refuge subject to the following conditions:

* * * * *

(v) Waterfowl, coot and moorhen hunters shall possess and use, while in the field, only nontoxic shot.

(8) *Modoc National Wildlife Refuge.* Hunting of geese, ducks, coots, moorhens and snipe is permitted on designated areas of the refuge subject to the following conditions:

* * * * *

(iv) Waterfowl, coot and moorhen hunters shall possess and use, while in the field, only nontoxic shot.

(9) *Sacramento National Wildlife Refuge.* Hunting of geese, ducks, coots, moorhens and snipe is permitted on designated areas of the refuge subject to the following conditions:

* * * * *

(v) Waterfowl, coot and moorhen hunters shall possess and use, while in the field, only nontoxic shot.

(10) *Salton Sea National Wildlife Refuge.* Hunting of geese, ducks, coots, and moorhens is permitted on designated areas of the refuge subject to the following conditions:

* * * * *

(iii) Waterfowl, coot and moorhen hunters shall possess and use, while in the field, only nontoxic shot.

(iv) Hunters may not possess more than 25 shells while in the field.

* * * * *

(12) *San Luis National Wildlife Refuge.* Hunting of geese, ducks, coots, moorhens and snipe is permitted on designated areas of the refuge subject to the following conditions:

* * * * *

(iii) Waterfowl, coot and moorhen hunters shall possess and use, while in the field, only nontoxic shot.

(iv) Hunters may not possess more than 25 shells while in the field.

(13) *San Pablo Bay National Wildlife Refuge.* * * *

(ii) Hunters may use only portable blinds and temporary or floating blinds constructed of biodegradable materials.

* * * * *

(v) Waterfowl, and coot hunters shall possess and use, while in the field, only nontoxic shot.

(14) *Sutter National Wildlife Refuge.* Hunting of geese, ducks, coots, moorhens and snipe is permitted on designated areas of the refuge subject to the following condition: Waterfowl, coot and moorhen hunters shall possess and use, while in the field, only nontoxic shot.

(15) *Tule Lake National Wildlife Refuge.* Hunting of geese, ducks, coots, moorhens and snipe is permitted on designated areas of the refuge subject to the following conditions:

* * * * *

(ii) Hunting is permitted until 1:00 p.m. each day.

* * * * *

(iv) Only unloaded firearms may be taken through posted retrieving zones when traveling to and from the hunting areas.

* * * * *

(vii) Waterfowl, coot and moorhen hunters shall possess and use, while in the field, only nontoxic shot.

(g) *Colorado*—(1) *Alamosa National Wildlife Refuge.* Hunting of geese, ducks, coots, snipe and mourning doves is permitted on designated areas of the refuge subject to the following condition: Snipe and dove hunting are permitted only during the waterfowl hunting season.

* * * * *

(3) *Monte Vista National Wildlife Refuge.* Hunting of geese, ducks, coots, snipe and mourning doves is permitted on designated areas of the refuge subject to the following condition: Snipe and dove hunting are permitted only during the waterfowl hunting season.

(h) *Delaware—(1) Bombay Hook National Wildlife Refuge.* * * *

(vii) Waterfowl, and coot hunters shall possess and use, while in the field, only nontoxic shot.

* * * * *

(2) *Prime Hook National Wildlife Refuge.* * * *

(vii) Waterfowl, and coot hunters shall possess and use, while in the field, only nontoxic shot.

* * * * *

(i) *Florida—(1) Chassahowitzka National Wildlife Refuge.* * * *

(ii) Hunters shall possess and use, while in the field, only nontoxic shot.

* * * * *

(v) Hunting is permitted only on Wednesdays, Saturdays and Sundays.

(vi) Chassahowitzka Wildlife Management Area regulations apply to the Hernando County portion of the refuge.

(2) *Lower Suwannee National Wildlife Refuge.* * * *

(vi) Hunters shall possess and use, while in the field, only nontoxic shot.

(3) *Loxahatchee National Wildlife Refuge.* * * *

(iv) Hunters shall possess and use, while in the field, only nontoxic shot.

* * * * *

(4) *Merritt Island National Wildlife Refuge.* * * *

(ii) Hunting is permitted only on Wednesdays, Thursdays, Fridays and Saturdays from one-half hour before sunrise until 1:00 p.m. and on Sundays from one-half hour before sunrise until sunset.

(iii) Hunters shall possess and use, while in the field, only nontoxic shot.

* * * * *

(j) *Georgia and South Carolina—Savannah National Wildlife Refuge.* * * *

(3) Hunters shall possess and use, while in the field, only nontoxic shot.

* * * * *

(k) *Idaho*— * * *

(2) *Camas National Wildlife Refuge.* Hunting of geese, ducks, coots, and snipe is permitted on designated areas of the refuge subject to the following condition: Waterfowl and coot hunters shall possess and use, while in the field, only nontoxic shot.

(3) *Deer Flat National Wildlife Refuge.* * * *

(iv) Nonmotorized boats and boats with electric motors are restricted to the area bounded by the water's edge and extending to a point 200 yards lakeward

in hunting area 1 on the Lake Lowell sector.

* * * * *

(l) *Illinois—(1) Chautauqua National Wildlife Refuge.* * * *

(iv) Waterfowl and coot hunters shall possess and use, while in the field, only nontoxic shot.

(2) *Crab Orchard National Wildlife Refuge.* * * *

(i) Waterfowl hunting is permitted on the controlled areas of Grassy Point, Carterville and Greenbriar land areas, plus Orchard, Turkey, Sawmill and Grassy Islands, from sunrise to 12:00 noon each day during the goose season. Goose hunting on these areas, including lake shorelines, is permitted only from existing refuge blinds. Only selected hunters are allowed on these islands or are allowed to occupy any existing refuge blinds during the goose season. The controlled blind hunters may use or possess only 15 shells per hunter.

(ii) No more than three people may occupy a blind during the goose hunting season.

(iii) Waterfowl and coot hunters shall possess and use, while in the field, only nontoxic shot.

* * * * *

(m) *Iowa—(1) DeSoto National Wildlife Refuge.* * * *

(ii) Hunting is permitted until noon each day from November 1 through the end of the second weekend in December, or until the end of the State waterfowl season, whichever comes first.

(iii) Hunters shall possess and use, while in the field, only nontoxic shot.

* * * * *

(o) *Iowa, Illinois, Minnesota and Wisconsin—Upper Mississippi River Wild Life and Fish Refuge.* * * *

(2) Waterfowl and coot hunters shall possess and use, while in the field, only nontoxic shot.

* * * * *

(q) *Louisiana—(1) Atchafalaya National Wildlife Refuge.* Hunting of geese, ducks, coots, snipe and woodcock is permitted on designated areas of the refuge subject to the following condition: Hunting shall be in accordance with Sherburne Wildlife Management Area regulations.

(2) *Bogue Chitto National Wildlife Refuge.* * * *

(v) Waterfowl and coot hunters shall possess and use, while in the field, only nontoxic shot.

(3) *D'Arbonne National Wildlife Refuge.* * * *

(iv) Waterfowl and coot hunters shall possess and use, while in the field, only nontoxic shot.

(v) Firearms must be unloaded while being transported in a vehicle or boat.

(4) *Delta National Wildlife Refuge.* * * *

* * * * *

(vii) A special feral hog hunt is permitted on October 9, 10 and 11. Permits are required and there is no hog limit. Firearms must be unloaded and cased while being transported in a boat on the refuge. Hunting hours are from one-half hour before sunrise to one-half hour after sunset. Camping is not permitted. Hunters may enter the refuge one and one-half hour before sunrise and leave the refuge by one and one-half hours after sunset.

* * * * *

(j) *Georgia and South Carolina—Savannah National Wildlife Refuge.* * * *

(4) Hunters must wear a minimum of 500 square inches of hunter orange material above the waistline.

(5) Two deer (either sex) may be taken.

* * * * *

(n) *Illinois, Iowa and Missouri—Mark Twain National Wildlife Refuge.* * * *

(1) Permits are required.

(2) Firearms hunting is permitted on the Bear Creek Unit of the Gardner Division. Firearms hunting is permitted on the remainder of the Gardner Division only during part of the November firearms season, from one-half hour before sunrise to 3:00 p.m.

(3) Archery hunting is permitted on the Bear Creek Unit of the Gardner Division. Archery hunting is permitted on the remainder of the Gardner Division during part of the Illinois archery season.

(o) *Indiana—Muscatatuck National Wildlife Refuge.* * * *

(4) No discharge of firearms is permitted within 100 yards of an occupied dwelling.

* * * * *

(q) *Kansas—(1) Flint Hills National Wildlife Refuge.* Hunting of big game is permitted on designated areas of the refuge subject to the following condition: Only shotguns are permitted.

* * * * *

(r) *Louisiana—(1) Atchafalaya National Wildlife Refuge.* Hunting of deer and turkey is permitted on designated areas of the refuge subject to the following condition: Hunting shall be in accordance with Sherburne Wildlife Management Area regulations.

* * * * *

(3) *Catahoula National Wildlife Refuge.* * * *

(vii) Archery hunting is permitted during the State archery season.

(4) *D'Arbonne National Wildlife Refuge.* * * *

(ii) Either sex deer hunting is permitted the first Friday and Saturday following Thanksgiving.

(iii) Feral hogs may be taken during any refuge hunt.

(iv) Firearms must be unloaded while transported in a vehicle or boat.

* * * * *

(7) *Tensas River National Wildlife Refuge.* * * *

(i) Permits are required for the gun deer hunts.

* * * * *

(iii) One deer (either sex) may be taken per day for all gun hunts.

(iv) Hunters under 16 years old must possess proof, while hunting on the refuge, of completing a State approved hunter safety course.

* * * * *

(vi) All vehicles are restricted to graveled roads and all ATV trails are closed during the turkey season.

(vii) Only still or stalk hunting are permitted.

(8) Upper Ouachita National Wildlife Refuge. * * *

(iii) Feral hogs may be taken during any refuge hunt.

(iv) Firearms must be unloaded while being transported in a vehicle or boat.

* * * * *

(t) *Maine—(1) Moosehorn National Wildlife Refuge.* Hunting of deer is permitted on designated areas of the refuge subject to the following conditions:

(i) Permits are required.

(ii) Hunters must wear in a conspicuous manner on head, chest and back a minimum of 400 square inches of solid-colored hunter orange clothing or material.

(2) *Rachel Carson National Wildlife Refuge.* * * *

(iii) Hunters, during the State shotgun deer season, must wear in a conspicuous manner on head, chest and back a minimum of 400 square inches of solid-colored hunter orange clothing or material.

(u) *Maryland—(1) Blackwater National Wildlife Refuge.* * * *

(iv) Hunters must wear in a conspicuous manner on head, chest and back a minimum of 400 square inches of solid-colored hunter orange clothing or material.

(2) *Eastern Neck National Wildlife Refuge.* * * *

(v) Hunters must wear in a conspicuous manner on head, chest and back a minimum of 400 square inches of solid-colored hunter orange clothing or material.

(v) *Massachusetts—Parker River National Wildlife Refuge.* Hunting of deer is permitted on designated areas of the refuge subject to the following conditions:

(1) A refuge permit is required.

(2) Hunting is permitted from one-half hour before sunrise until 12 noon.

(3) Only shotguns, 20 gauge or larger, loaded with slugs are permitted.

(4) Attendance at a refuge orientation is mandatory.

(5) Hunting is permitted Monday, Tuesday, Friday and Saturday of the State shotgun deer season.

(6) All deer harvested must be brought to the refuge check station whole (undressed).

(7) Use or possession of alcoholic beverages while hunting is prohibited.

* * * * *

(z) *Missouri—(1) Mingo National Wildlife Refuge.* * * *

(i) Only archery and historic weapon hunting are permitted.

* * * * *

(2) *Squaw Creek National Wildlife Refuge.* Hunting of deer is permitted on designated areas of the refuge subject to the following conditions:

(i) Permits are required.

(ii) Only historic weapon hunting is permitted.

(iii) Hunters are required to check in and out of the refuge.

(iv) Stands must be removed from the refuge each day.

(v) Hunting is permitted only during the special hunt season established by the State for the refuge.

(3) *Swan Lake National Wildlife Refuge.* * * *

(ii) Only historic weapon hunting is permitted.

* * * * *

(bb) *Nebraska—** * *

(2) *DeSoto National Wildlife Refuge.* * * *

(ii) Only archery hunting is permitted on the area west of the Missouri River.

* * * * *

(dd) *New Jersey—Great Swamp National Wildlife Refuge.* * * *

(3) Hunters must wear in a conspicuous manner on head, chest and back a minimum of 400 square inches of solid-colored hunter orange clothing or material.

(4) Use or possession of alcoholic beverages while hunting is prohibited.

* * * * *

(ff) *New York—(1) Iroquois National Wildlife Refuge.* Hunting of deer is permitted on designated areas of the refuge subject to the following condition:

(i) Hunters, during the State shotgun deer season, must wear in a conspicuous manner on head, chest and back a minimum of 400 square inches of solid-colored hunter orange clothing or material.

* * * * *

(gg) *North Carolina—(1) Alligator River National Wildlife Refuge.* Hunting of deer is permitted on designated areas of the refuge subject to the following conditions:

(i) The use of hunting dogs is permitted only on designated areas of the refuge.

(ii) Firearms must be unloaded while being transported in a vehicle or boat.

(iii) Only portable stands are permitted and must be removed from the refuge after each day's hunt.

(2) *Great Dismal Swamp National Wildlife Refuge.* * * *

(iv) Hunters must wear in a conspicuous manner on head, chest and back a minimum of 400 square inches of solid-colored hunter orange clothing or material.

* * * * *

(4) *Pee Dee National Wildlife Refuge.* * * *

(iii) One deer (either sex) may be taken during each gun hunt.

* * * * *

(ii) *Oklahoma—(1) Optima National Wildlife Refuge.* Hunting of mule and white-tailed deer and turkey is permitted on designated areas of the refuge subject to the following conditions:

(i) Permits are required.

(ii) Only fall turkey hunting is permitted.

* * * * *

(kk) *Pennsylvania—Erie National Wildlife Refuge.* * * *

(3) Hunters, during the State firearm deer season, must wear in a conspicuous manner on head, chest and back a minimum of 400 square inches of solid-colored hunter orange clothing or material.

(ll) *South Carolina—* * *

(2) *Carolina Sandhills National Wildlife Refuge.* * * *

(vii) Hunters must wear a visible outer garment made of hunter orange material above the waistline.

(viii) Firearms must be unloaded while being transported in a vehicle.

(ix) Hunting from a road right-of-way is prohibited.

(3) *Pinckney Island National Wildlife Refuge.* * * *

(iv) Two deer (either sex) may be taken.

* * * * *

(vi) Hunters are required to remain on their stands from one-half hour before sunrise until 9:00 a.m. and from two hours before sunset until sunset.

(vii) Hunters must wear a minimum of 500 square inches of hunter orange material above the waistline.

(4) *Santee National Wildlife Refuge.* * * *

(vi) Hunters must wear a visible outergarment made of hunter orange material during the gun hunts.

* * * * *

(oo) *Texas—(1) Aransas National Wildlife Refuge.* * * *

(v) The firearms hunt bag limit is two deer per hunter.

(vi) Hunters must wear hunter orange caps and vests.

* * * * *

(3) *Laguna Atascosa National Wildlife Refuge.* * * *

(iv) The firearms hunt bag limit is two deer per hunter.

(v) Hunters must wear hunter orange caps and vests.

* * * * *

(qq) *Vermont—Missisquoi National Wildlife Refuge.* Hunting of deer is permitted on designated areas of the refuge subject to the following conditions:

(1) Only shotguns may be used on that part of the refuge east of the Missisquoi River during the State regular season.

(2) Hunters, during the State firearm deer season, must wear in a conspicuous manner on head, chest and back a minimum of 400 square inches of solid-colored hunter orange clothing or material.

(rr) *Virginia—(1) Back Bay National Wildlife Refuge.* * * *

(v) Hunters must wear in a conspicuous manner on head, chest and back a minimum of 400 square inches of solid-colored hunter orange clothing or material.

(2) *Chincoteague National Wildlife Refuge.* * * *

(iv) Hunters must wear in a conspicuous manner on head, chest and back a minimum of 400 square inches of solid-colored hunter orange clothing or material.

(3) *Great Dismal Swamp National Wildlife Refuge.* * * *

(v) Hunters must wear in a conspicuous manner on head, chest and back a minimum of 400 square inches of solid-colored hunter orange clothing or material.

(4) *Presquile National Wildlife Refuge.* * * *

(vii) Hunters must wear in a conspicuous manner on head, chest and back a minimum of 400 square inches of solid-colored hunter orange clothing or material.

Dated: September 22, 1987.

Susan Recce,

Acting Assistant Secretary for Fish and Wildlife and Parks.

[Docket No. 50828-7106]

Reef Fish Fishery of the Gulf of Mexico; Corrections

AGENCY: National Marine Fisheries Service (NFMS), NOAA, Commerce.

ACTION: Final rule; corrections.

SUMMARY: This document makes corrections in the regulatory text of the final rule to implement mandatory reporting requirements prescribed in the Fishery Management Plan for the Reef Fish Fishery of the Gulf of Mexico published September 23, 1987 (52 FR 35717). Two of the corrections are for clarification of definitions and one corrects an incorrect reference to a paragraph.

EFFECTIVE DATE: October 23, 1987.

FOR FURTHER INFORMATION CONTACT: William R. Turner, 813-893-3722.

In rule document 87-21745 beginning on page 35717 in the issues of September 23, 1987, make the following corrections:

§ 641.2 [Corrected]

In § 641.2, under the definitions for "Charter vessel" and "Headboat" column 3, in line 3 of each definition, the phrase "that fishes" is corrected to read "who fish".

§ 641.5 [Corrected]

In § 641.5, paragraph (h), on page 35720, column 1, the reference to paragraph "(e)" is corrected to read "(c)", and the words "or quarterly" are added after the word "monthly".

(16 U.S.C. 1801 *et seq.*)

Dated: October 6, 1987.

Bill Powell,

Executive Director, National Marine Fisheries Service.

VOL 52 ISS 196 OCT 9 1987 UMI

Proposed Rules

Federal Register
Vol. 52, No. 196
Friday, October 9, 1987

This section of the FEDERAL REGISTER contains notices to the public of the proposed issuance of rules and regulations. The purpose of these notices is to give interested persons an opportunity to participate in the rule making prior to the adoption of the final rules.

DEPARTMENT OF AGRICULTURE

Agricultural Marketing Service

7 CFR Part 1137

Milk in the Eastern Colorado Marketing Area; Proposed Suspension of Certain Provisions of the Order

AGENCY: Agricultural Marketing Service, USDA.

ACTION: Proposed suspension of rule.

SUMMARY: This notice invites written comments on a proposal to continue through February 1988 a suspension of portions of the Eastern Colorado Federal milk order. Provisions proposed to be suspended relate to the amount of milk not needed for fluid (bottling) use that may be moved directly from farms to nonpool manufacturing plants and still be priced under the order. Also proposed to be suspended for the same period is the "touch-base" requirement that each producer's milk be received at least three times each month at a pool distributing plant. Continuation of the suspension of the provisions was requested by a cooperative association representing producers supplying the market in order to prevent uneconomic movements of milk.

DATE: Comments are due on or before October 19, 1987.

ADDRESS: Comments (two copies) should be filed with the USDA/AMS/Dairy Division, Order Formulation Branch, Room 2968, South Building, P.O. Box 96456, Washington, DC 20090–6456.

FOR FURTHER INFORMATION CONTACT: Constance M. Brenner, Marketing Specialist, USDA/AMS/Dairy Division, Order Formulation Branch, Room 2968, South Building, P.O. Box 96456, Washington, DC 20090–6456, (202) 447–7183.

SUPPLEMENTARY INFORMATION: The Regulatory Flexibility Act (5 U.S.C. 601 through 612) requires the Agency to examine the impact of a proposed rule on small entities. Pursuant to 5 U.S.C. 605(b), the Administrator of the Agricultural Marketing Service has certified that this proposed action would not have a significant economic impact on a substantial number of small entities. Such action would lessen the regulatory impact of the order on certain milk handlers and would tend to ensure that dairy farmers would continue to have their milk priced under the order and thereby receive the benefits that accrue from such pricing.

This proposed rule has been reviewed under Executive Order 12291 and Department Regulation 1512–1 and has been determined to be a "non-major" rule under the criteria contained therein.

Notice is hereby given that, pursuant to the provisions of the Agricultural Marketing Agreement Act of 1937, as amended (7 U.S.C. 601 through 674) the suspension of the following provisions of the order regulating the handling of milk in the Eastern Colorado marketing area is being considered for the months of October 1987 through February 1988:

1. In the first sentence of § 1137.12(a)(1), the words "from whom at least three deliveries of milk are received during the month at a distributing pool plant".

2. In the second sentence of § 1137.12(a)(1), the words "30 percent in the months of March, April, May, June, July, and December and 20 percent in other months of" and "distributing".

All persons who want to send written data, views or arguments about the proposed suspensions should send two copies of them to the USDA/AMS/Dairy Division, Order Formulation Branch, Room 2968, South Building, P.O. Box 96456, Washington, DC 20090–6456, by the 7th day after publication of this notice in the **Federal Register.** The period for filing comments is limited to 7 days because a longer period would not provide the time needed to complete the required procedures and include October 1987 in the suspension period.

The comments that are sent will be made available for public inspection in the Dairy Division office during normal business hours (7 CFR 1.27(b)).

Statement of Consideration

Mid-America Dairymen, Inc. (Mid-Am), an association of producers that supplies some of the market's fluid milk needs and handles some of the market's reserve milk supplies, requested the suspension. The suspension would continue to relax for the months of October 1987 through February 1988 the limit on the amount of producer milk that a cooperative association may divert from pool plants to nonpool plants, and remove the requirement that three deliveries of each producer's milk be received at a pool distributing plant each month. The suspension currently in effect applies to milk deliveries through September 1987. The provisions proposed to be suspended have been suspended since September 1985.

The order provides that a cooperative may divert a quantity of milk not in excess of 30 percent of the cooperative association's member milk received at pool distributing plants during the months of March, April, May, June, July and December, and up to 20 percent in other months. Suspension of the requested language would allow up to 50 percent of a cooperative's member milk supply to be diverted to nonpool plants and remain eligible to share in the marketwide pool.

Mid-Am states that the volume of producer milk pooled on the Eastern Colorado order began to increase following the conclusion of the Milk Diversion Program in 1985, and continued to increase during 1986. According to the cooperative, Eastern Colorado producer milk increased 12.7 percent over the previous year during 1985, and 5.8 percent from 1985 to 1986. Producer milk used in Class I increased only 1.8 percent from 1984 to 1985, and did not change from 1985 levels in 1986.

Although Eastern Colorado milk production decreased slightly during the first six months of 1987 due to the Dairy Termination Program, the cooperative states that producer milk used in Class I is 2.0 percent below the same period in 1986. As a result, according to Mid-Am, there are ample supplies of locally produced milk to meet the fluid requirements of Eastern Colorado distributing plants.

Mid-Am states that member producer milk produced in Kansas and Nebraska would have to be shipped to Eastern Colorado pool distributing plants each month in order to qualify Mid-Am producers for continued pool status. The cooperative states that these shipments would displace Denver-area milk, which would have to be moved to surplus handling plants. Both movements, according to Mid-Am, would represent uneconon.ic movements of milk. Without the requested continued

suspension, the cooperative expects to incur substantial unnecessary costs for the movement of its milk solely for the purpose of pooling the milk of its members currently associated with the Eastern Colorado market.

BILLING CODE 3410–02–M

DEPARTMENT OF ENERGY

Federal Energy Regulatory Commission

18 CFR Parts 161 and 250

[Docket No. RM87–5–000]

Inquiry Into Alleged Anticompetitive Practices Related to Marketing Affiliates of Interstate Pipelines; Opportunity for Oral Presentation

October 5, 1987.

AGENCY: Federal Energy Regulatory Commission, DOE.

ACTION: Notice of opportunity for oral presentation.

SUMMARY: On June 2, 1987, the Federal Energy Regulatory Commission issued a notice of proposed rulemaking to state by rule what are prohibited practices by interstate pipelines and marketing affiliates under the Natural Gas Act and Natural Gas Policy Act and to set out reporting requirements to reveal unduly discriminatory or otherwise unlawful practices. Over 80 comments were filed in the comment period which ended July 23, 1987. Three commenters requested the opportunity for an oral presentation. This notice informs interested persons of the time, place, and format of this opportunity for oral presentation.

DATE: The opportunity for oral presentation of views will be held on October 20, 1987, and will convene at 9:00 a.m.

ADDRESSES: The opportunity for oral presentation of views will be held at: Hearing Room A, Federal Energy Regulatory Commission, 825 North Capitol Street NE., Washington, DC 20426.

Changes in room number, if any, will be posted each day. Requests to participate including, if possible, a list of specific questions, should be directed, in writing, by Wednesday, October 14, 1987, to: Office of the Secretary, Federal Energy Regulatory Commission, 825 North Capitol Street NE., Washington, DC 20426.

FOR FURTHER INFORMATION CONTACT: Lynn S. Lichtenstein, Federal Energy Regulatory Commission, Office of the General Counsel, 825 North Capitol Street NE., Washington, DC 20426, 202/357–8530.

SUPPLEMENTARY INFORMATION: On November 4, 1986, the Commission issued a Notice of Inquiry (NOI) into "Alleged Anticompetitive Practices Related to Marketing Affiliates of Interstate Pipelines," Docket No. RM87–5–000, 51 FR 41982, November 20, 1986, FERC Stats. and Regs. ¶ 35,520. The NOI was issued in response to several petitions for rulemaking and several specific cases which had raised the issue of potential abuse of the pipeline-marketing affiliate relationship. The NOI solicited comments on the Commission's legal authority to regulate pipeline marketing affiliate activity, the relevance of antitrust, law, examples of existing abuses, and possible remedies.

After evaluating the one hundred and seven comments received in response to the NOI, the Commission concluded that no industry-wide standards are being observed and that anticompetitive activities could be occurring. On June 2, 1987, the Commission issued a notice of proposed rulemaking (NOPR) to state by rule what are prohibited practices by interstate pipelines and marketing affiliates under the Natural Gas Act and the Natural Gas Policy Act.[1] The Commission also proposed reporting requirements, in computer-accessible form, to provide data that would reveal where unduly discriminatory or otherwise unlawful practices were occurring. The Commission also proposed remedies that would be utilized if either the substantive standards or reporting requirements proposed in the rule were violated.

The Commission received 82 comments in response to the NOPR. Three commenters [2] requested an opportunity to make an oral presentation in connection with their comments on the NOPR. In addition, many commenters expressed their willingness or desire to participate in an oral presentation should one be held. Accordingly, the Commission will provide an opportunity for the oral presentation of views on October 20, 1987, with regard to the issues in the NOPR as provided for in section 502(a) of the Natural Gas Policy Act of 1978, 15 U.S.C. 3412(a).

The opportunity for oral presentation of views will not be of a judicial or evidentiary nature. Persons requesting to speak will be divided into participant panels and will be permitted time to present prepared remarks. There will be no cross examination of persons presenting statements. However, the presiding officer and a staff panel may question these persons. In accordance with the provisions of § 3.8(h) of the Commission's regulations,[3] the opinions and comments expressed by staff are not binding on the Commission in the preparation of the final rule or in any other action taken in this docket.

In addition, anyone may submit to the presiding officer questions to be asked of persons on the participant panels. The presiding officer will determine whether the question is relevant and whether the time limitations permit it to be presented. Any further procedural rules will be announced by the presiding officer at the hearing. Transcripts of the hearing will be available in the public file of this proceeding, Docket No. RM87–5–000, in the Commission's Office of Public Information, and may be ordered from that office.

Requests to participate in the opportunity for oral presentation should be submitted on or before October 14, 1987 to the Office of the Secretary, and should state the amount of time requested for the oral presentation. Persons participating at the hearing should, if possible, bring 50 copies of their statement to the presentation. A list of the participants in the presentation will be available in the Commission's Office of Public Information and at the hearing room on the morning the presentation is commenced.

Kenneth F. Plumb,

Secretary.

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Food and Drug Administration

21 CFR Part 310

[Docket No. 86N-0336]

Prescription Estrogen Drug Products; Patient Package Insert Requirement

AGENCY: Food and Drug Administration.

ACTION: Proposed rule.

SUMMARY: The Food and Drug Administration (FDA) is proposing to revise the requirements for patient package inserts for estrogen drug products. The revisions would permit the distribution of patient package inserts that better reflect the current information about the benefits and risks of estrogen drug use.

DATE: Comments by January 7, 1988.

ADDRESS: Written comments to the Dockets Management Branch (HFA-305), Food and Drug Administration, Rm. 4-62, 5600 Fishers Lane, Rockville, MD 20857.

FOR FURTHER INFORMATION CONTACT: Steven H. Unger, Center for Drugs and Biologics (HFN-362), Food and Drug Administration, 5600 Fishers Lane, Rockville, MD 20857, 301-295-8049.

SUPPLEMENTARY INFORMATION: In the **Federal Register** of July 22, 1977 (42 FR 37636), FDA first required manufacturers and dispensers of prescription estrogen drug products to make available to patients information about the use of these products. The agency required that dispensers give users of estrogen drug products a brief informational leaflet—now called a patient package insert—about the benefits and risks of estrogen drug use. The patient package insert alerted potential users of estrogen drug products to the scientific findings linking postmenopausal estrogen use to endometrial cancer, the reports of an association between intrauterine exposure to estrogens and congenital anomalies in exposed offspring, and the findings of an increased risk of vaginal cancer in adolescent daughters exposed in utero to diethylstilbestrol. The patient package insert contained other information about side effects associated with estrogen use and emphasized the importance of patients discussing use of these drugs with their physicians. In addition, the patient package insert regulation contained detailed requirements on the content of the patient package insert and on the ways patient package inserts were to be prepared and distributed. To assist manufacturers in developing patient package inserts, the agency also published a guideline patient package insert text reflecting the informational requirements outlined in the regulation. Manufacturers could adopt the guideline text to comply with the regulatory requirements.

FDA is now proposing to revise the patient package insert regulation (1) to update the technical information in the patient package insert of the benefits and risks of estrogen drug use, and (2) to simplify the content and format of the patient package insert to make the document more readable and understandable.

The current regulation (21 CFR 310.515) describes the specific information to be included in the estrogen patient package insert regarding the uses of estrogen, the dangers of the drug, and the contraindications to use. The detail in which those requirements are described in the patient package insert regulation means that any signficant change in information about the drug's benefits and risks can only be reflected in the patient package insert guideline if the rule is revised, i.e., on completion of notice and comment rulemaking. This procedural obligation may delay communication of important new information about estrogen drug products to the drug products' users. To reduce the possibility of delay, FDA proposes to transform the estrogen patient package insert regulation from a listing of specific items to be included in the patient package insert to an enumeration of general categories of information to be included. The change should make it easier for manufacturers to update patient package inserts to reflect new information about the benefits and risks of estrogen drug use.

The agency proposes several other changes to simplify the patient package insert and to allow manufacturers and other labelers greater flexibility in developing and distributing patient package inserts. In particular, to enhance manufacturers' flexibility in preparing patient package inserts, the proposed rule would eliminate current requirements with respect to printing specifications for the patient package insert. Except in the regulations imposing patient package inserts for specific drug products, FDA has not in the past established printing specifications for drug labeling. The agency has found that its routine review of final printed labeling for drugs subject to premarketing clearance and its other compliance activities have been adequate to ensure that drug labeling can be read by its intended audiences. The agency now believes that this kind of monitoring of labeling practices obviates the need to mandate printing specifications for patient labeling.

FDA also proposes to establish more flexible distribution requirements for estrogen drug products. The current regulation requires that patient package inserts physically accompany the drug product from the manufacturer or labeler through the wholesaler to the dispenser of the product. The proposal would permit distributors of estrogens to adopt whatever distribution method they choose, provided every person in the distribution chain receives an adequate number of patient package inserts to meet his or her obligations.

Elsewhere in this issue of the **Federal Register**, FDA has published a notice announcing the availability of a revised patient package insert guideline for prescription estrogen drug products. The revised guideline reflects new information on the benefits and risks of estrogen drug product use. Manufacturers of such products may rely on the guidelines to meet the requirements of the regulation.

The agency has determined under 21 CFR 25.24(a)(11) that this action is of a type that does not individually or cumulatively have a significant effect on the human environment. Therefore, neither an environmental assessment nor an environmental impact statement is required.

FDA has carefully analyzed the regulatory impact of the proposed rule in accordance with Executive Order 12291 and the Regulatory Flexibility Act (Pub. L. 96-354). The proposed rule would make minor modifications to the regulations governing the patient labeling requirements for estrogen drug products. Therefore, the agency concludes that the proposed rule is not a major rule as defined in Executive Order 12291. Further, FDA certifies that the proposed rule, if adopted, will not have a significant impact on a substantial number of small entities, as defined by the Regulatory Flexibility Act.

Interested persons may, on or before January 7, 1988, submit to the Dockets Management Branch (address above) written comments regarding this proposal. Two copies of any comments are to be submitted, except that individuals may submit one copy. Comments are to be identified with the docket number found in brackets in the heading of this document. Received comments may be seen in the office above between 9 a.m. and 4 p.m., Monday through Friday.

List of Subjects in 21 CFR Part 310

Administrative practice and procedure, Drugs, Reporting and recordkeeping requirements.

Therefore, under the Federal Food, Drug, and Cosmetic Act, it is proposed that Part 310 be amended as follows:

PART 310—NEW DRUGS

1. The authority citation for 21 CFR Part 310 continues to read as follows:

Authority: Secs. 502, 503, 505, 701, 52 Stat. 1051, 1052, 1053, 1055 as amended (21 U.S.C. 352, 353, 355, 371); 5 U.S.C. 553; 21 CFR 5.10 and 5.11.

2. By revising § 310.515 to read as follows:

§ 310.515 Patient package inserts for estrogens.

(a) *Requirement for a patient package insert.* FDA concludes that the safe and effective use of drug products containing estrogens requires that patients be fully informed of the benefits and risks involved in the use of these drugs. Accordingly, except as provided in paragraph (f) of this section, each estrogen drug product restricted to prescription distribution, including products containing estrogens in fixed combinations with other drugs, shall be dispensed to patients with a patient package insert containing information concerning the drug's benefits and risks. An estrogen drug product that does not comply with the requirements of this section is misbranded under section 502(a) of the Federal Food, Drug, and Cosmetic Act.

(b) *Distribution requirements.* (1) Each manufacturer and distributor of estrogen drug products shall provide sufficient numbers of patient package inserts to each person to whom it ships the product to permit the dispenser to give one insert to each patient receiving the drug.

(2) Each dispenser of an estrogen drug product shall provide a patient package insert to each patient to whom the product is dispensed, except that the dispenser may provide the insert to the parent or the legal guardian of a legally incompetent patient or to the agent of either. The patient package insert is required to be placed in or accompanying each package dispensed to the patient.

(3) Patient package inserts for estrogen drug products dispensed in acute care hospitals or long-term care facilities will be considered to have been provided in accordance with this section if provided to the patient prior to administration of the first dose of estrogen and again every 30 days thereafter, as long as the therapy continues.

(c) *Patient package insert contents.* A patient package insert for an estrogen drug product is required to contain the following information:

(1) The name of the drug.

(2) The name and place of business of the manufacturer, packer, or distributor.

(3) A statement regarding the proper use of estrogens.

(4) A statement regarding when estrogens should not be used, including the contraindications to use.

(5) A description of the most serious risks associated with use of estrogens.

(6) A brief summary of other side effects of estrogens.

(7) Instructions on how a patient may reduce the risks of estrogen use.

(8) The date, identified as such, of the most recent revision of the patient package insert.

(d) *Gudeline language.* The Food and Drug Administration has available a guideline patient package insert for estrogen drug products that includes information responsive to all items specified in paragraph (c) of the section. Any person may rely on the latest version of this guideline to comply with paragraph (c) of this section.

(e) *Exemptions.* This section does not apply to estrogen-progestogen oral contraceptives. Labeling requirements for these products are set forth in § 310.501.

(f) *Requirement to supplement new drug application.* Holders of approved drug applications for estrogen drug products that are subject to the requirements of this section must submit supplements under § 314.70(c) of this chapter to provide for the labeling required by paragraph (a) of this section.

Dated: September 8, 1987.

Frank E. Young,

Commissioner for Food and Drugs.

[FR Doc. 87–23453 Filed 10–8–87; 8:45 am]

BILLING CODE 4160–01–M

FEDERAL EMERGENCY MANAGEMENT AGENCY

44 CFR Part 205

Individual and Family Grant Program

AGENCY: Federal Emergency Management Agency.

ACTION: Proposed rule.

SUMMARY: FEMA is proposing to change two provisions of the Individual and Family Grant (IFG) program regulations (42 U.S.C. 5178; section 408 of the Disaster Relief Act of 1974, Pub. L. 93–288). The first concerns disaster applicants who received IFG assistance under previous regulations which required them to obtain and maintain flood insurance for various lengths of time. We would consider these recipients to have met their requirement if they keep the policy for 3 years, just as recipients under the current regulations must. The change is being made for the sake of equity.

The second change would clarify the provisions for late filing of IFG applications by strengthening the time limitation language. This change would eliminate reported confusion.

DATE: Public comments are welcome and will be considered if received by December 8, 1987.

ADDRESS: Comments should be sent to: The Rules Docket Clerk, Office of General Counsel, Federal Emergency Management Agency, 500 C Street, SW., Washington, DC 20472.

FOR FURTHER INFORMATION CONTACT: Agnes C. Mravcak, Office of Disaster Assistance Programs, Federal Emergency Management Agency, 500 C Street, SW., Washington, DC 20472, Phone: (202) 646–3660.

SUPPLEMENTARY INFORMATION: The changes are described below.

Flood Insurance Requirement

Current FEMA regulations on the IFG program (51 FR 32643, September 15, 1986) state that recipients of IFG assistance must maintain a required flood insurance policy for 3 years. It was implied, though not stated, that any IFG applicant who received a grant in prior years, under a different maintenance requirement, and who did not keep the insurance for the then-required period, would be ineligible for a new grant. The proposed rule addresses this inequity. FEMA proposes that any prior IFG recipient who, as a condition of receiving previous grant assistance, was required to maintain insurance longer than 3 years, but has kept it for at least 3 years, is considered to have met the intent of the regulation.

If all other criteria are met, he/she would now be eligible for future IFG assistance. If the State determines, through checking with the National Flood Insurance Program, that a prior IFG recipient canceled a required policy before 3 years from the date of the grant, then he/she would now be ineligible for subsequent grant assistance for insurable items. This provision will make conditions for prior IFG recipients equal to current recipients.

Late Applications/Time Limitations

Current regulations state that applicants may file an IFG application within 60 days from the date of declaration of a major disaster, and within at least 30 days in the case of defined extenuating circumstances. There is also a requirement that, in the case of housing, personal property, and transportation expenses, families first apply for and either be declined for or receive an insufficient disaster loan from the Small Business Administration (SBA) before being determined eligible for assistance. The SBA also accepts late applications beyond the ordinary 60 days. Beyond that, processing times at the SBA may extend for 45 days or more after the filing deadline. Therefore, the IFG program finds that some persons who apply in time, and most who apply late, to the SBA and have their applications accepted are actually too late to officially be processed by the IFG program.

To correct this unintended inequity for SBA clients, FEMA proposes the following. First, if a person files timely to the SBA, but the SBA completes processing after the IFG deadline, that person's case shall be referred to the State and shall be considered timely filed.

Second, if in following its established procedures, SBA accepts a late application for "substantial causes beyond the control of the applicant," and then refers to the State cases turned down for lack of repayment ability or cases where an insufficient loan was made for the same reason, those cases will be considered timely filed. The referral will include the reason the late application was accepted. The State automatically has an extension of time to complete processing of such cases. But in no case may this rule relaxation prevent the State from completing all administrative activity within the 270-day period prescribed in these regulations.

The situation described above is the only one where applicants who failed to apply within the 90-day extended IFG filing period may have their cases considered. If an applicant registers with FEMA beyond the 90-day period, FEMA may forward the case to the SBA so it may follow its established procedures.

Content of the Rule

This rule implements Section 408 of the Disaster Relief Act of 1974, 42 U.S.C. 5178. It provides FEMA policy and clarifies the national eligibility criteria for use by States in implementing the IFG program.

Impacts

FEMA has determined, based upon an Environmental Assessment, that this proposed rule would not have significant impact upon the quality of the human environment. The environmental assessment and a finding of no significant impact are included in the formal docket file and are available for public inspection and copying at the Office of the Rules Docket Clerk, Office of General Counsel, Federal Emergency Management Agency, 500 C Street SW., Washington, DC 20472.

The regulations likely to result from this proposed rulemaking would not have a significant economic impact on a substantial number of small entities, and, hence, no regulatory flexibility analysis has been prepared.

The rule likely to result from this proposed rulemaking would not be a "major rule" as defined in Executive Order 12291, dated February 17, 1981, and, hence, no regulatory analysis has been prepared.

FEMA has determined that the rule likely to result from this proposed rulemaking would not contain a collection of information requirement as defined in Section 3502 of the Paperwork Reduction Act.

List of Subjects in 44 CFR Part 205

Community facilities, Disaster assistance, Grant programs, Housing and community development.

PART 205—FEDERAL DISASTER ASSISTANCE (PUBLIC LAW 93-288)

1. The authority citation for Part 205 continues to read as follows:

Authority: 42 U.S.C. 5001; Reorg. Plan No. 3 of 1978; E.O. 12148.

2. Section 205.54 is amended by revising paragraph (d)(1)(iii)(C)(*1*) as follows:

§ 205.54 Individual and Family Grant Programs.

(d) * * *
(1) * * *
(iii) * * *
(C)(*1*) The State may not make a grant for acquisition or construction purposes in a designated flood hazard area in which the sale of flood insurance is available under the NFIP unless the individual or family agrees to purchase adequate flood insurance and to maintain such insurance for 3 years, or as long as they live in the residence to which the grant assistance relates, whichever is less. Any previous grant recipient who may have been required to maintain a policy for a longer period of time (under previous regulations) but who kept it for at least 3 years, is deemed to have satisfied this requirement. Adequate flood insurance, for IFG purposes, means a policy which covers $5,000 building and $2,000 contents (homeowners) or $5,000 contents (renters). If the grant recipient fails to obtain the required flood insurance, he/she must return to the State the amount of the grant received for acquisition and construction of insurable real and personal property, and the flood insurance premium. If a grant recipient cancels a required policy within the 3-year period, he/she is ineligible for subsequent IFG assistance for insurable real and personal property for the remainder of the 3-year period, up to the amount which should have been covered by flood insurance. The cost of the first year's policy is a necessary expense for those required under this section to buy flood insurance.

§ 205.54 [Amended]

3. Section 205.54 is amended by revising paragraph (j)(1)(ii) as follows:

* * * * *

(j)(1) * * *

(ii) Applications shall be accepted from individuals or families for a period of 60 days following the declaration, and for no longer than 30 days thereafter when the State determines that extenuating circumstances beyond the applicants' control (such as, but not limited to, hospitalization, illness, or inaccessibility to application centers) prevented them from applying in a timely way. *Exception:* If applicants exercising their responsibility to first apply to the Small Business Administration do so after SBA's deadline, and SBA accepts their case for processing because of "substantial causes essentially beyond the control of the applicant," and provides a formal decline or insufficient loan based on lack of repayment ability, unsatisfactory credit, or unsatisfactory experience with prior loans, then such an application referred to the State by the SBA is considered as meeting the IFG filing deadline. The State automatically has an extension of time to complete the processing and disbursement functions. However, the State still must complete all administrative activity within the 270-day period described in this section.

Dated: October 2, 1987.

Dave McLouglin,

Deputy Associate Director, State and Local Programs and Support.

BILLING CODE 6718-01-M

FEDERAL COMMUNICATIONS COMMISSION

47 CFR Part 73

[MM Docket No. 87-392, RM-5890]

Radio Broadcasting Services; Fort Myers, FL

AGENCY: Federal Communications Commission.

ACTION: Proposed rule.

SUMMARY: This document requests comments on a petition for rule making filed by Riverside Baptist Church of Fort Myers, Inc., which seeks to substitute Channel 237C1 for Channel 237A at Fort Myers, Florida, and to modify its Class A license for Station WSOR(FM) to specify the Class C1 channel. A site restriction 29.4 kilometers (18.3 miles) west must be imposed on Channel 237C1.

DATES: Comments must be filed on or before November 27, 1987, and reply comments on or before December 14, 1987.

ADDRESS: Federal Communications Commission, Washington, DC 20554. In addition to filing comments with the FCC, interested parties should serve the petitioner, or its counsel or consultant, as follows: James R. Bayes, Wiley, Rein and Fielding, 1776 K Street NW., Washington, DC 20006.

FOR FURTHER INFORMATION CONTACT: Montrose H. Tyree, Mass Media Bureau, (202) 634–6530.

SUPPLEMENTARY INFORMATION: This is a summary of the Commission's Notice of Proposed Rule Making, MM Docket No. 87–392, adopted September 4, 1987, and released October 5, 1987. The full text of this Commission decision is available for inspection and copying during normal business hours in the FCC Dockets Branch (Room 230), 1919 M Street NW., Washington, DC. The complete text of this decision may also be purchased from the Commission's copy contractors, Internationa1 Transcription Service, (202) 857–3800, 2100 M Street NW., Suite 140, Washington, DC 20037.

Provisions of the Regulatory Flexibility Act of 1980 do not apply to this proceeding.

Members of the public should note that from the time a Notice of Proposed Rule Making is issued until the matter is no longer subject to Commission consideration or court review, all *ex parte* contacts are prohibited in Commission proceedings, such as this one, which involve channel allotments. See 47 CFR 1.1231 for rules governing permissible *ex parte* contact.

For information regarding proper filing procedures for comments, See 47 CFR 1.415 and 1.420.

47 CFR Part 73

[MM Docket No. 87–394, RM–5963]

Radio Broadcasting Services; Lancaster, NH

AGENCY: Federal Communications Commission.

ACTION: Proposed rule.

SUMMARY: This document requests comments on a petition by Maurice B. Polayes seeking the allocation of Channel 272A to Lancaster, New Hampshire, as the community's first local FM service. Channel 272A can be allocated to Lancaster in compliance with the Commission's minimum distance separation requirements with a site restriction of 3.3 kilometers (2.1 miles) northeast to avoid a short-spacing to Station WCVR, Randolph, Vermont. Canadian concurrence in the allotment is required since the community is located within 320 kilometers of the U.S.-Canadian border.

DATES: Comments must be filed on or before November 27, 1987, and reply comments on or before December 14, 1987.

ADDRESSES: Federal Communications Commission, Washington, DC 20554. In addition to filing comments with the FCC, interested parties should serve the petitioner, or its counsel or consultant, as follows: Richard R. Zaragoza, Esq., Fisher, Wayland, Cooper and Leader, 1255 23rd Street NW., Suite 800, Washington, DC 20037 (Counsel to petitioner).

FOR FURTHER INFORMATION CONTACT: Leslie K. Shapiro, Mass Media Bureau, (202) 634–6530.

SUPPLEMENTARY INFORMATION: This is a summary of the Commission's Notice of Proposed Rule Making, MM Docket No. 87–394, adopted September 4, 1987, and released October 5, 1987. The full text of this Commission decision is available for inspection and copying during normal business hours in the FCC Dockets Branch (Room 230), 1919 M Street NW., Washington, DC. ADMINISTRATIVE CONFERENCE OF THE UNITED STATES

Committee on Governmental Processes and Committee on Adjudication; Public Meetings

Committee on Governmental Processes

Dates: Monday, October 19; Monday, November 9; and Monday, November 30. 1987.

Time: 9:30 a.m.

Location: Covington and Burling, 1201 Pennsylvania Avenue NW., 11th floor, Washington, DC.

Agenda: The committee will meet to consider the following two draft reports and possible recommendations: (i) The Discretionary Function Exception to the Federal Tort Claims Act, by Professor Ronald A. Cass; and (ii) Contractual Indemnification of Government Contractors, by Professor Frank P. Grad. The committee may also discuss a new study by Professor Henry H. Perritt Jr., of federal agency use of computer systems for submission and handling of regulatory documents.

Contact: David M. Pritzker, 202–254–7065.

Committee on Adjudication

Date: Tuesday, October 20, 1987.

Time: 1:00 p.m.

Location: Administrative Conference of the United States Library, 2120 L Street, NW., Suite 500, Washington, DC.

Agenda: The committee will meet to discuss reports by Professors Allen E. Shoenberger, Charles H. Koch, Jr. and David A. Koplow. The reports concern Social Security disability determinations at the State and Federal levels.

Contact: Deborah Ross, 202–254–7020.

Public Participation

Attendance at the committee meetings is open to the public, but limited to the space available. Persons wishing to attend should notify the contact person at least two days in advance of the meeting. The committee chairmen may permit members of the public to present oral statements at meetings. Any member of the public may file a written statement with a committee before, during, or after a meeting. Minutes of the meetings will be available on request to the contact persons. The contact persons' mailing address is: Administrative Conference of the United States, 2120 L Street NW., Suite 500, Washington, DC 20037. These meetings are subject to the Federal Advisory Committee Act (Pub. L. 92–463).

Jeffrey S. Lubbers,
Research Director.

BILLING CODE 6110–01–M

DEPARTMENT OF AGRICULTURE

Forest Service

Intent To Prepare an Environmental Impact Statement for Gravina and Big Islands Management Area Analysis; Chugach National Forest, Alaska

AGENCY: Forest Service, USDA.

ACTION: Notice of Intent to Prepare an Environmental Impact Statement.

SUMMARY: The Department of Agriculture, Forest Service will prepare an environmental impact statement for proposed activities to occur under Management Area Analysis for the Gravina and Big Islands Management Areas on the Chugach National Forest, Alaska.

DATE: Comments concerning the scope of the analysis should be received by November 9, 1987.

ADDRESSES: Written comments and suggestions concerning the scope of the analysis must be sent to Dave Rittenhouse, Acting Forest Supervisor,. Chugach National Forest, 201 E. Ninth Avenue, Anchorage, AK 99501.

FOR FURTHER INFORMATION CONTACT: Questions about the proposed action and environmental impact statement should be directed to Bob Wilhelm, Planning Team Leader, Chugach National Forest, 201 E. Ninth Avenue, Anchorage, Alaska 99501, phone 907–271–2558.

SUPPLEMENTARY INFORMATION: The Chugach National Forest Land and Resource Management Plan was completed in July 1984. A Settlement Agreement to the appeal of the Forest Plan was signed November 26, 1985. That Settlement Agreement requires completion of Management Area Analysis for each of the nine management areas in the Forest Plan. The Settlement Agreement called for Management Area Analysis to be tiered to the Forest Plan EIS, be consistent with the terms of the Agreement, and may result in an amendment or revision of the Forest Plan pursuant to 36 CFR 219.10 (e), (f) or (g) (1986).

Management Area Analysis will further specify if, how, when and where management activities specified by area in the Forest Plan are to be implemented for the life of the current Plan. Resource information needed to manage these Forest lands will be evaluated and updated where possible and appropriate so that cumulative effects of proposed management activities can be estimated.

Specific topics to be addressed in the Management Area Analysis include: minerals area management, recreation, timber, subsistence requirements set forth in section 810 of ANILCA, transportation planning, effects of land selections on the Management Areas, additional standards and guidelines and environmental impacts of proposed activities.

A range of alternatives for the Management Area will be considered. One of them will be no further development in the area. Five significant management activities were proposed by the Forest Plan as amended by the Settlement Agreement for the Gravina and Big Islands Management Areas. These activities would occur during the period of time before than is revised:

1. Develop marine-oriented recreation opportunities which will tie in with an over-all system for Prince William Sound.

2. As part of this system, construct and maintain cabins and marine recreation facilities to include 4 anchor buoys and/or tent platforms in the Gravina Management Area and 3 anchor buoys and/or tent platforms and 2 cabins in the Big Islands Management Area.

3. Improve habitat for fish species through construction of a combination of 7 fishpass, or spawning or rearing structures in the Gravina Management Area and 13 in the Big Islands Management Area.

4. Offer for sale approximately 20 million board feet of timber in the St. Matthews Bay/Olsen Bay area (Gravina Management Area) and approximately 36 million board feet on Montague Island in the Big Islands Management Area.

5. Coordinate management of the National Forest with adjacent landowners and other resource managers in the area.

Dalton DuLac, Forest Supervisor, Chugach National Forest, is the responsible official.

Public participation will be especially important at several points during the analysis. The first point is during the scoping process (40 CFR 1501.7). The Forest Service will be seeking information, comments, and assistance from Federal, State, and local agencies and other individuals or organizations who may be interested in or affected by the proposed action. This input will be used in preparation of the draft environmental impact statement (DEIS). The scoping process will include:

1. Identifying potential issues.
2. Identifying issues to be analyzed in depth.
3. Eliminating insignificant issues or those which have been covered by a relevant previous environmental analysis.
4. Exploring additional alternatives.
5. Identifying potential environmental effects of the proposed action and alternatives (i.e. direct, indirect, and cumulative effects and connected actions).
6. Determining potential cooperating agencies and task assignments.

The draft environmental impact statement (DEIS) is expected to be filed with the Environmental Protection Agency (EPA) and to be available for public review by June 1988. At that time EPA will publish a notice of availability of the DEIS in the **Federal Register**.

The comment period on the draft environmental impact statement (DEIS) will be 45 days from the date the Environmental Protection Agency's notice of availability appears in the **Federal Register**. It is very important that reviewers participate at that time. To be most helpful, comments on the DEIS should be as specific as possible and may address the adequacy of the statement or the merits of the alternatives discussed (see the Council on Environmental Quality (CEQ) Regulations for implementing the procedural provisions of the National Environmental Policy Act at 40 CFR 1503.3). In addition Federal Court decisions have established that reviewers of DEIS's must structure their participation in the environmental review of the proposal so that it is meaningful and alerts an agency to the reviewers' position and contentions. *Vermont Yankee Nuclear Power Corp.* v. *NRDC*, 435 U.S. 519, 553 (1978). NEPA case law supports the proposition that environmental objections that could have been raised at the draft stage may be waived if not raised until after completion of the final environmental impact statement (FEIS). *Wisconsin Heritages, Inc.* v. *Harris*, 490 F. Supp. 1334, 1338 (E.D. Wis. 1980). The reason for this is to ensure that substantive comments and objections are made available to the Forest Service at a time when it can meaningfully consider them and respond to them in the FEIS.

After the comment period ends, the comments will be analyzed and considered by the Forest Service in preparing the final environmental impact statement (FEIS). The FEIS is scheduled to be completed by November 1988. The Forest Service is required to respond in the FEIS to the comments received (40 CFR 1503.4). The responsible official will consider the comments, responses, disclosure of environmental consequences, and applicable laws, regulations, and policies in making a decision regarding this proposal. The responsible official will document the decision and rationale in the Record of Decision. That decision will be subject to appeal under 36 CFR 211.18.

Date: September 21, 1987.

Dave Rittenhouse,

Acting Forest Supervisor.

BILLING CODE 3410-11-M

DEPARTMENT OF COMMERCE

Agency Form Under Review by the Office of Management and Budget (OMB)

DOC has submitted to OMB for clearance the following proposal for collection of information under the provisions of the Paperwork Reduction Act (44 U.S.C. Chapter 35).

AGENCY: International Trade Administration.

Title: Petition by a Firm for Certification of Eligibility to Apply for Trade Adjustment Assistance.

Form Number: Agency—ITA-840P; OMB—0625-0103

Type of Request: Extension of the expiration date of a currently approved collection.

Burden: 600 respondents; 4,800 reporting hours.

Needs and Uses: The Trade Act of 1974 authorizes the International Trade Administration to provide adjustment assistance to firms meeting certain criteria. The information provided is used to determine whether or not a trade-impacted producing firm qualifies for certification of eligibility to apply for technical assistance.

Affected Public: Farms; businesses or other for-profit institutions; small businesses or organizations.

Frequency: On occasion.

Respondent's Obligation: Required to obtain or retain a benefit.

OMB Desk Officer: John Griffen, 395-7340.

Copies of the above information collection proposal can be obtained by calling or writing DOC Clearance Officer, Edward Michals, (202) 377-3271, Department of Commerce, Room 6622, 14th and Constitution Avenue NW., Washington, DC 20230.

Written comments and recommendations for the proposed information collection should be sent to John Griffen, OMB Desk Officer, Room 3228, New Executive Office Building, Washington, DC 20503.

Dated: October 5, 1987.

Edward Michals,

Departmental Clearance Officer, Office of Management and Organization.

BILLING CODE 3510-CW-M

Foreign-Trade Zones Board

[Docket No. 18-87]

Foreign-Trade Zone 100, Dayton, OH; Application for Subzone Chrysler Auto Components Plant, Dayton

An application has been submitted to the Foreign-Trade Zones Board (the Board) by the Greater Dayton Foreign-Trade Zone, Inc., grantee of FTZ 100, requesting special-purpose subzone status for the auto components plant of the Chrysler Corporation in Dayton, Ohio. The application was submitted pursuant to the provisions of the Foreign-Trade Zones Act, as amended (19 USC 81a-81u), and the regulations of the Board (15 CFR Part 400). It was formally filed on September 28, 1987.

The 60-acre facility, which employs 2000 persons, is located at 1600 Webster Street in Dayton. It is used to produce radiators, air conditioners, heaters and electric fuel pumps. Some 2.3 percent of the components are sourced abroad, including blower motors, fuel pump motors, and materials for radiators.

Zone procedures would exempt Chrysler from Customs duties on the foreign components that are reexported either as auto parts or in assembled autos. On products shipped to U.S. auto assembly plants with subzone status, the company would be able to take advantage of the same duty rate available to importers of complete automobiles. The duty rates on components used at the five plants range from 3.2 to 5.0 percent, whereas the rate on autos is 2.5 percent. The savings will help improve the company's international competitiveness.

In accordance with the Board's regulations, an examiners committee has been appointed to investigate the application and report to the Board. The committee consists of: Dennis Puccinelli (Chairman), Foreign-Trade Zones Staff, U.S. Department of Commerce, Washington, DC 20230; John Nelson, District Director, U.S. Customs Service, North Central Region, 6th floor, Plaza Nine Bldg., 55 Erieview Plaza, Cleveland, OH 44114; and, Colonel Robert L. Oliver, District Engineer, U.S. Army Engineer District Louisville, P.O. Box 59, Louisville, KY 40201.

Comments concerning the proposed subzone are invited in writing from interested parties. They shall be addressed to the Board's Executive Secretary at the address below and postmarked on or before November 16, 1987.

A copy of the application is available for public inspection at each of the following locations:

Port Directors Office, U.S. Customs Service, Dayton Int'l Airport, Vandalia, OH 45377

Office of the Executive Secretary, Foreign-Trade Zones Board, U.S. Department of Commerce, Room 1529, Washington, DC 20230.

Dated: October 2, 1987.

John J. Da Ponte, Jr.,

Executive Secretary.

BILLING CODE 3510-DS-M

International Trade Administration

[A-401-603]

Final Determination of Sales at Less Than Fair Value; Stainless Steel Hollow Products From Sweden

AGENCY: Import Administration, International Trade Administration, Department of Commerce.

ACTION: Notice.

SUMMARY: We have determined that stainless steel hollow products (SSNP) from Sweden are being, or are likely to be, sold in the United States at less than fair value. The U.S. International Trade Commission (ITC) will determine, within 45 days of publication of this notice, whether these imports are materially injuring, or are threatening material injury to, a United States industry.

EFFECTIVE DATE: October 9, 1987.

FOR FURTHER INFORMATION CONTACT: Gregory G. Borden (202/377-3003) or Mary S. Clapp (202/377-1769), Office of Investigations, Department of Commerce, 14th Street and Constitution Avenue, NW., Washington, DC 20230.

SUPPLEMENTARY INFORMATION:

Final Determination

We have determined that stainless steel hollow products from Sweden are being, or are likely to be, sold in the United States at less than fair value, as provided in section 735(a) of the Tariff Act of 1930, as amended (the Act) (19 U.S.C. 1673d(a)). The margins found for the companies investigated are listed in the "Suspension of Liquidation" section of this notice.

Case History

On May 15, 1987, we made an affirmative preliminary determination (52 FR 19369, May 22, 1987).

On May 21, 1987, we received a cost of production (COP) questionnaire response from Sandvik AB (SAB, or Sandvik) concerning sales of seamless redraw hollow to the Federal Republic of Germany (FRG).

On May 27, 1987, we received a request from SAB, a respondent in this case, to postpone the final determination to no later than the 135th day after publication of our "Preliminary Determination" notice in the **Federal Register**. We granted this request and postponed the final determination until no later than October 5, 1987 (52 FR 22367, June 11, 1987).

Supplemental computer tape responses from the respondents were received on June 30, 1987. A supplemental COP response from SAB was received on July 14, 1987.

We verified the exporter's sales price responses for both respondents in the United States from July 13 to July 16, and from July 20 to July 22, 1987. We verified the purchase price, home market and third country responses of the respondents in Sweden and the FRG from August 17, 1987 to August 28, 1987.

On September 14, 1987, the Department held a public hearing. Interested parties submitted comments for the record in their pre-hearing briefs of September 10, 1987, and in their post-hearing briefs of September 18, 1987.

Scope of Investigation

The United States has developed a system of tariff classification based on the international harmonized system of Customs nomenclature. Congress is considering legislation to convert the United States to this Harmonized System ("HS") by January 1, 1988. In view of this, we will be providing both the appropriate *Tariff Schedule of the United States Annotated* ("TSUSA") item numbers and the appropriate HS item numbers with the product descriptions on a test basis, pending Congressional approval. As with the TSUSA, the HS item numbers are provided for convenience and Customs purposes. The written description remains dispositive.

We are requesting petitioners to include the appropriate HS item number(s) as well as the TSUSA item number(s) in all new petitions filed with the Department. A reference copy of the proposed Harmonized System schedule is available for consultation at the Central Records Unit, Room B-099, U.S. Department of Commerce, 14th Street and Constitution Avenue, NW., Washington, DC 20230. Additionally, all Customs offices have reference copies, and petitioners may contact the Import Specialist at their local Customs office to consult the schedule.

The products covered by this investigation are certain stainless steel hollow products including pipes, tubes, hollow bars and blanks therefor, of circular cross-section, containing over 11.5 percent chromium by weight, as provided for under TSUSA item numbers 610.3701, 610.3727, 610.3741, 610.3742, 610.5130, 610.5202, 610.5229, 610.5230, and 610.5231, and currently classifiable under HS item numbers 7304.41.00, 7304.49.00, 7306.40.10, and 7306.40.50

Fair Value Comparisons

To determine whether sales of SSHP in the United States were made at less than fair value, we compared the United States price to the foreign market value as specified below.

We made comparisons on virtually all of the sales of the products during the period of investigation, May 1, 1986 through October 31, 1986.

United States Price

For SAB and Avesta Sandvik Tube AB (AST, or Avesta), we based United States price on exporter's sales price (ESP) when those sales were made after importation, in accordance with section 772(c) of the Act. For those sales by SAB and AST to the United States which were made prior to importation, we

determined that the merchandise had been purchased through related parties directly from the manufacturer or producer and, therefore, based the United States price on purchase price in accordance with section 772(b) of the Act for the following reasons:

1. The merchandise in question was shipped directly from the manufacturer to the unrelated buyer, without being introduced into the inventory of the related selling agent;

2. This was the customary commercial channel for sales of this merchandise between the parties involved; and

3. The related selling agent located in the United States acted only as a processor of sales-related documentation and a communication link with the unrelated U.S. buyer.

Where all the above elements are met, we regard the routine selling functions of the exporter as having been merely relocated geographically from the country of exportation to the United States, where the sales agent performs them. Whether these functions are done in the United States or abroad does not change the substance of the transactions or the functions themselves.

In instances where merchandise is ordinarily diverted into the related U.S. selling agent's inventory, we regard this factor as an important distinction because it is associated with a materially different type of selling activity than the mere facilitation of a transaction such as occurs on a direct shipment to an unrelated U.S. purchaser. In situations where the related party places the merchandise into inventory, that party commonly incurs substantial storage and financial carrying costs and has added flexibility in his marketing. We also use the inventory test because it can be readily understood and applied by respondents who must respond to Department questionnaires in a short period of time. It is objective in nature, as the final destination of the goods can be established from normal commercial documents associated with the sale and verified with certainty.

We calculated purchase price and ESP based on the packed, f.o.b. or c.i.f., duty paid or delivered prices to unrelated purchasers in the United States. We made deductions for foreign inland freight, ocean freight, marine insurance, U.S. duty, and U.S. inland freight, as appropriate. For ESP sales, we also deducted credit costs and other expenses normally incurred in selling the merchandise in the United States.

For the exporter's sales price sales involving further manufacturing, we deducted all value added in the United States. This value consisted of all costs associated with the manufacture and sale of the finished pipe or tube, and a proportional amount of the profit or loss related to these costs. Profit or loss was calculated by deducting from the sales price of the finished pipe or tube all costs incurred in Sweden and the U.S. by the company for the production and sale of the product. The profit or loss was then apportioned between the costs of the redraw hollows and additional costs incurred in the U.S. based on the ratio of these costs to total costs.

For the costs of the SSHP sold in the United States, the Department relied primarily on the cost data provided by the respondent In those instances when it appeared all costs were not included or appropriately quantified or valued, certain adjustments were made. For Sandvik AB, interest expenses, classified by the company as factory overhead, were reclassified as a general expense. Freight expense, which was included in general expenses, was deducted from the general expenses, since it concerned an expense incurred after shipment. A proportional amount of general, administrative, and interest expenses were added to these manufacturing costs in determining the total costs incurred in Sweden. For the costs incurred in the United States, packing labor costs were reclassified from direct labor to packing expense.

Foreign Market Value

SAB

In accordance with section 773(a) of the Act, we found sufficient sales of hollow bar in the home market to form the basis of comparison We based our calculations on delivered home market prices We made deductions for inland freight. We deducted home market packing costs and added U.S. packing costs. For comparison to ESP sales, we deducted selling expenses incurred on home market sales up to the amount of the indirect selling expenses incurred for sales to the U.S. market, as an offset in accordance with § 353.15(c) of our regulations. For purchase price comparisons, we made an adjustment for differences in credit based on arm's-length borrowing rates in Sweden and for ESP comparisons deducted home market credit costs, in accordance with § 353.15 (b) and (c) of our regulations.

In accordance with section 773(a)(1)(B) of the Act, we determined that there were insufficient home market sales of seamless redraw hollows and finished pipes and tubes to be used as a basis for determining foreign market value. The third country market with the largest volume of sales of the most similar merchandise is the Federal Republic of Germany (FRG). On April 17, 1987, petitioners alleged that third country prices of seamless redraw hollows were below the cost of production. We did not have sufficient time to develop data for purposes of the preliminary determination. Since then, we have received and analyzed the relevant data for purposes of this determination.

For the cost of production of redraw hollows sold in the FRG, the Department relied generally on the cost data provided by SAB. Interest expense, which was classified by the company as part of the factory overhead, was reclassified as a general expense. This interest was then adjusted to reflect a proportional amount of interest expense of Sandvik AB, deducting an apportioned amount for the credit expense, which was included as a selling expense.

The freight expense, which was an ex-factory expense, was excluded from general and administrative expenses. Verified selling expenses were used.

Since we found that virtually all sales were at prices above the cost of production, we based our comparisons for redraw hollows on all sales of that product in the FRG.

We made deductions from delivered prices for discounts and for foreign inland freight between Sweden and the FRG. We deducted third country packing costs and added U.S. packing costs. For comparisons to purchase price, we made a circumstance of sale adjustment for differences in credit expenses. For comparison to ESP, we deducted credit cost incurred in the FRG and offset indirect selling expenses on the U.S. sales, in accordance with § 353.15 (b) and (c) of the Commerce regulations. Where we compared similar products, we made adjustments for differences in physical characteristics based on differences in direct manufacturing costs in accordance with § 353.16 of our regulations.

AST

We found sufficient sales in the home market to form the basis of comparison and, therefore, used delivered home market prices. We made deductions for foreign inland freight and discounts. We deducted home market packing costs and added U.S. packing costs. For comparison to ESP sales, we offset the selling expenses incurred in the U.S. with home market selling expenses, in accordance with § 353.15(c) of our regulations. We made an adjustment for difference in credit terms in accordance with § 353.15(b) of our regulations. Where we compared similar products, we made adjustments for differences in

physical characteristics based on differences in direct manufacturing costs in accordance with § 353.16 of our regulations.

Such or Similar Merchandise

Petitioners advocate product comparisons for nonidentical products based on grade, finish (hot or cold), outside diameter and wall thickness. However, where significant differences in physical dimensions would result when using within-grade matches of some merchandise, petitioners state that the Department should use comparisons between regular and low-carbon versions of equivalent grades. In cases where factors being compared vary by more than 20 percent, petitioners urge the use of constructed value instead of the matches proposed by Sandvik.

Petitioners allege that many of Sandvik's proposed matches are defective, comparing products with wide differences in production cost, or overlooking closer matches available. Petitioners also object to Avesta's proposed matches, claiming that Avesta has overlooked identical product matches and chosen others that are not the closest possible comparisons. As with Sandvik, petitioners propose that where matching factors differ by more than 20 percent, the Department should use constructed value.

Sandvik states that when there is no home market or third country merchandise that is identical to that being sold in the U.S., the product matches contained in its concordance computer tape should be used.

Avesta claims an adjustment for differences in physical characteristics between welded pipes and tubes sold in Sweden and those sold for export to the U.S. Avesta bases its claim on its assertion that there were virtually no "identical" product matches between U.S. and Swedish sales and that the "similar" products compared differed in size standards, chemistries and wall thickness, with corresponding differences in cost of production.

Where we found sales of identical merchandise in the relevant foreign market, we made comparisons to sales of the identical products. Where we based our comparisons on sales of similar merchandise, we selected sales of the most similar product sold in the relevant market for our comparisons. In determining the degree of similarity, we used the following criteria which all parties agreed were appropriate:

For seamless pipe and tube:
1. Steel grade,
2. Type of finish (hot or cold),
3. Outside diameter, and
4. Wall thickness; and

For welded pipe and tube:
1. Steel grade,
2. Outside diameter, and
3. Wall thickness.

The use of these criteria resulted in some changes from the comparison groupings proposed by respondents.

Currency Conversion

For ESP comparisons, we used the official exchange rate for the date of sale since the use of that exchange rate is consistent with section 615 of the Trade and Tariff Act of 1984 (1984 Act). We followed section 615 of the 1984 Act rather than § 353.56(a)(2) of our regulations because the later law supersedes that section of the regulations.

For purchase price comparisons, we used the exchange rate described in § 353.56(a)(1) of our regulations. All currency conversions were made at the rates certified by the Federal Reserve Bank.

Verification

As provided in section 776(a) of the Act, we verified all information relied upon in making this final determination. We used standard verification procedures, including examination of all relevant accounting records and original source documents provided by the respondents on sales and production costs.

Interested Party Comments

Comment 1: Sandvik argues that seamless and welded SSHP constitute two different classes or kinds of merchandise. Sandvik bases it contention on the different physical characteristics of seamless and welded SSHP, their different ultimate uses and different channels of trade used to market the products. Furthermore, Sandvik points to ITC determinations recognizing that seamless and welded SSHP are separate "like" products produced by two separate industries.

DOC Response: We disagree. We consider seamless and welded SSHP as a single "class or kind" of merchandise for reasons outlined in the *Final Affirmative Countervailing Duty Determination: Stainless Steel Hollow Products from Sweden* (52 FR 5794 at 5805, February 26, 1987). The ITC's "like" product determination is irrelevant to the Department's "class or kind" determination since it is conducted for a different purpose.

Comment 2: Sandvik contends that petitioners lack standing to represent the industry producing seamless SSHP and, therefore, the investigation should be terminated Sandvik argues that seamless SSHP is a separate class or kind of merchandise, therefore, petitioners must represent the affected industry. Only one of the original petitioners manufactures seamless SSHP and other members of the industry have indicated to Sandvik's counsel their opposition to the petition. The addition of the United Steel Workers Union as a co-petitioner does not satisfy the standing requirement as they entered the proceedings more then twenty days after the filing of the petition.

DOC Response: We disagree. We consider all products covered by this investigation to constitute a single class or kind of merchandise as stated in our response to Comment 1. Neither the Act nor the Commerce Regulations requires a petitioner to establish affirmatively that it has the support of a majority of a particular industry. The Department relies on petitioners representation that it has, in fact, filed on behalf of the domestic industry until it is affirmatively shown that this is not the case. Where domestic industry members opposing an investigation provide a clear indication that there are grounds to doubt a petitioner's standing, the Department will review whether the opposing parties do, in fact, represent a major proportion of the domestic industry. In this case, we have not received any opposition from the domestic industry. See *Certain Stainless Steel Hollow Products from Sweden* (52 FR 5794 at 5795, February 26, 1987), *Certain Fresh Atlantic Groundfish from Canada*, (51 FR 10041, March 24, 1986), *Frozen Concentrated Orange Juice from Brazil* (52 FR 8324, March 17, 1987). Based on the foregoing, we have determined that there is no reason to conclude petitioners lack standing in this investigation.

Comment 3: Petitioners have alleged that Sandvik's sales of redraw hollows in the FRG were made at less than the cost of production based on a comparison of Sandvik's prices to the estimated production costs utilizing petitioners experience. Specifically, they contend Sandvik has understated its cost of production in that transfer prices from the Semi-Finished to the Tubular Products Divisions were not used, and these transfer prices are higher than the cost of production. Petitioners further allege that Sandvik's claimed SG&A expenses do not include the SG&A costs incurred by the Tubular Products division, or by Sandvik GmbH.

Sandvik argues that petitioners claim of sales below cost of production is groundless and that the Department's verification established that virtually all of Sandvik's redraw hollow sales made in the FRG during the period of

investigation were above the cost of production.

DOC Response: The Department followed its usual methodology of using the actual costs incurred in production. We determined that the use of the costs incurred by the Tubular Products division and the Semi-Finished Products division of Sandvik were appropriate since they are divisions of Sandvik, not separate companies. After calculating the cost of manufacture based on actual costs, we added SG&A expenses of the corporate entities involved in the production and sale of the products sold in the FRG. We did not find sales at prices below the cost of production in substantial quantities.

Comment 4: Petitioners state that the Department should not deduct inventory carrying costs and credit expenses for the FRG and home market sales claimed by Sandvik where they were incurred prior to shipment. Sandvik defends its claims as proper and verified by the Department.

DOC Response: The inventory carrying costs are warehousing expenses which have been treated as indirect selling expenses in accordance with established practice and, as such, have only been deducted as part of the offset for indirect selling expenses incurred in the United States relative to ESP comparisons.

Comment 5: Petitioners contend that the Department should disallow Sandvik's claimed rebate allowance to one West German customer as Sandvik has not demonstrated that the rebate plan was part of its normal business practice.

Sandvik asserts that the rebate in question has been given to a longstanding customer over the last several years when the customer purchased a certain level of merchandise in a given year and that this rebate program was verified by the Department.

DOC Response: We agree with the respondent. Sandvik demonstrated that the rebates in question were a normal practice and that they reflected past experience of the company

Comment 6: Sandvik claims a cash discount adjustment for certain FRG sales based on information provided to the Department and verified in the FRG.

Petitioners argue that the Department should allow for Sandvik's cash discounts only on those individual sales where they were actually given, rather than averaging them on a per-kilogram basis over Sandvik's total sales.

DOC Response: We agree with the petitioners that the most accurate reporting of these discounts would be on the basis of individual sales However, lacking the specific data required, we have determined that the averaging of these discounts approximates their effect on Sandvik's sales prices.

Comment 7: Petitioners contend that the Department failed to back out completely the value added on Sandvik's ESP sales in the preliminary determination by not deducting an allowance for profit, related home market general operating expenses, and actual direct labor costs incurred in connection with U.S. processing operations. These three items represent significant value added that should be incorporated in the final determination calculations.

With respect to profit, petitioners further argue that the Department identify total profit and allocate it reasonably between the Swedish parent companies and the U.S. subsidiary. They claim that such an allocation is necessary to prevent circumvention of the antidumping law whereby a foreign producer could assign all its profit to the foreign parent and accordingly reduce the downward adjustment to exporter sales price.

Sandvik challenges petitioners' methodology as contrary to law and Department practice. Sandvik states petitioners are attempting to have profit considered as "increased value", in accordance with 19 U.S.C. 1677a(e)(3), which Sandvik contends is counter to the statute and regulations. Moreover, Sandvik contends that petitioners claim no similar allowance for foreign market sales, thus precluding a fair comparison of prices.

DOC Response: The Department considered general and administrative expenses incurred in Sweden to be part of the cost of the redraw hollow entering into the U.S. We considered direct labor costs in calculating value added in the U.S.; these costs had been included as factory overhead in the respondent's submission. We calculated the profit/loss of the SSHP finished and sold by Sandvik Steel Company in the U.S. and allocated this profit/loss, based on the cost of production, to the redraw hollow entering the U.S. and the additional costs incurred in the U.S. To consider profit/loss to be outside the definition of "value added" would be contrary to agency policy (See *Erasable Programmable Read Only Memories* (EPROMs) from Japan (51 FR 39680, Oct. 30, 1986). While it is not the Department's practice to deduct an element for profit attributable to the related reseller in circumstances where ESP sales do not involve additional manufacturing in the U.S., the statute does not preclude us from considering profit to be part of value added when additional manufacturing or assembly is performed.

Comment 8: Sandvik argues that the Department should not consider sales made by SAB to an unrelated distributor in a third country and resold in the United States as sales to the United States. Other than the provision that the distributor must resell the merchandise in the U.S., Sandvik has no other control over this merchandise, including the setting of terms of sale to the U.S. purchaser. Therefore, these transactions do not properly constitute the basis for U.S. purchase price and the sales should not be included in arriving at the final determination.

Petitioners argue for the inclusion of these sales based on Department practice to base United States price on the price charged by the foreign producer to unrelated middlemen or resellers outside the United States where, as here, the foreign producer knew the merchandise was destined for the U.S.

DOC Response: We normally treat sales by a respondent to an unrelated purchaser as sales to the United States where the seller knows that the merchandise is being sold for export to the United States. This is true of sales to trading companies in the country of origin or those in third country locations. *Urea from the USSR* (52 FR 19560, May 26, 1987), *Fuel Ethanol from Brazil* (51 FR 5573, February 14, 1986). Therefore, since Sandvik knew that the merchandise was being sold to the U.S., we included these sales in our analysis.

Comment 9: Sandvik argues that the Department should not consider certain sales of resold merchandise originally imported into the U.S. during 1979 for purposes of the final determination. These SSHP were sold during the period of investigation; however, these sales can no longer be considered "foreign merchandise" as defined under 19 U.S.C 1673(1) and 19 U.S.C., 1677b(a)(1) because of their various resales within the United States between 1979 and 1985. In addition, the merchandise in question was no longer suited for the purpose for which it was originally manufactured due to prolonged outdoor storage; further, the SSHP sales reported were sold as redraw hollows of unusual dimensions at distressed prices during the POI to allow for additional processing required by the purchaser.

Petitioners contend that these sales should be inc1uded in the investigation as they constitute proper sales of foreign merchandise under investigation to an unrelated purchaser during the period of investigation They further argue that

BEST COPY AVAILABLE

Sandvik provided no evidence that the merchandise was distressed.

DOC Response: Dumping is defined in part as the sale of foreign merchandise in the United States at less than its fair value. See 19 U.S.C. 1673(1). Fair value is an estimate of foreign market value (19 CFR 353.1), and the foreign market value of imported merchandise is the price of that merchandise at the time it is first sold in the United States (19 U.S.C. S 1677b(a)(1)).

We agree with petitioners that the resold products constitute SSHP from Sweden, Sandvik, however, first sold the products at issue in 1979 to an unrelated customer in the United States. The 1979 transaction then is the only sale that may be reviewed to determine whether dumping has taken place with respect to the resold products. This transaction is outside the scope of the investigation; therefore, the 1986 sale of this merchandise was excluded from the data base.

Comment 10: Sandvik claims that the Department must adjust for differences in quantity between United States and foreign market sales. While Sandvik does not employ a price list for sales to customers, Sandvik contends their sales force does utilize an internal price list from which discounts quoted are directly related to the quantity of seamless SSHP ordered.

Avesta claims that its home market sales of less than 500 kilograms, which constitute the majority of home market sales, should not be used for fair value comparisons as there were no similar sized quantities sold in the U.S. market. If these sales are included for home market price comparisons, an adjustment for different quantities sold should be made Furthermore, as nearly half of U.S. sales were in quantities of over 5,000 kilograms, compared to only a few in the home market of such size, the Department must also make a quantity adjustment for these sales. As further justification for its quantity discount claims, Avesta maintains that its sales force utilizes an internal price list from which discounted prices are quoted to customers and that quantity ordered is directly related to the price quoted.

Petitioners contend that Sandvik and Avesta have not provided evidence that they have a quantity discount policy or that discounts were granted in the ordinary course of trade in 20 percent or more of home market sales, Avesta's comparison of average prices based on quantities sold does not take into account product specifications and differences in product mix that could account for most, if not all of the price differences. Furthermore, petitioners contend that respondents have not demonstrated any cost justification for claimed adjustments.

DOC Response: We have reviewed the respondents pricing practices and determined that no clear correlation between prices and quantities has been demonstrated. While internal price lists (which include quantity related prices) are used in setting prices, it is impossible to measure their final impact on the negotiated prices. Furthermore, no cost justification has been provided. Therefore, the claim has been denied.

Comment 11: Avesta claims that its home market prices to two Swedish distributors should be adjusted for after-sale rebates and loyalty discounts.

Petitioners contend that Avesta has not met the Department's requirements for establishing entitlement to a rebate adjustment. Petitioners also challenge Avesta's claims for loyalty discounts, claiming that these adjustments have not been supported by any evidence that they were granted to any specific transactions during the POI. Instead, petitioners argue that this alleged discount should be treated as "goodwill" and not as a discount adjustment on certain home market sales.

Petitioners argue that should the Department decide to grant these adjustments, it should ensure that none of these adjustments were instituted after the investigation began. Petitioners contend that, particularly with respect to the loyalty discount claim, some or all of these after-sale payments were made after the investigation began.

DOC Response: We verified that the discounts and rebates were granted in accordance with established company policy. However, since the respondent could not tie them to specific sales, they were allocated over all home market sales.

Comment 12: Sandvik claims the Department must make an adjustment for differences in circumstances of sale in the FRG SG&A expenses, direct selling expenses and indirect selling expenses in comparing finished pipes and tubes.

DOC Response: We have adjusted for differences in credit costs in all comparisons. Indirect selling expenses have been offset against those incurred in the United States in comparisons involving ESP. General and administrative expenses were not included in the offset, since they do not constitute selling expenses.

Comment 13: Sandvik claims that in arriving at the preliminary determination, the Department erroneously deducted certain brokerage, handling, duty, and freight and packing costs from its prices in calculating ESP for goods which were processed in the United States Sandvik claims that such deductions resulted in erroneous double- and triple-counting.

DOC Response: At verification, we confirmed that Sandvik reported these expenses in multiple categories of expenses We have adjusted these categories to ensure that the expenses are treated properly.

Comment 14: Avesta contends that the Department should utilize the currency exchange rate in effect 90 days prior to the date of purchase due to significant fluctuations in the relevant exchange rates during the period of investigation in accordance with § 353.56(b) of our regulations.

Petitioners counter that the evidence shows the overall sustained trend in the exchange rate has been a continued decline in the U.S. dollar against the Swedish krona.

DOC Response: We have determined that the changes in exchange rates have been sustained. As Avesta has not demonstrated that it revised its U.S. prices to account for the sustained changes, we have used the certified exchange rates on the date of the U.S. sales, in accordance with § 353.56(a).

Continuation of Suspension of Liquidation

We are directing the U.S. Customs Service to continue to suspend liquidation of all entries of stainless steel hollow products from Sweden that are entered, or withdrawn from warehouse, for consumption on or after the date of publication of this notice in the **Federal Register**. The U.S. Customs Service shall continue to require a cash deposit or the posting of a bond on all entries equal to the estimated average amount by which the foreign market value of the merchandise subject to this investigation exceeds the United States price as shown in the table below The suspension of liquidation will remain in effect until further notice. The margins are as follows:

Manufacturer/producer/exporter	Average margin percentage
Sandvik AB	26.46
Avesta Sandvik Tube AB	34.50
All Others	28.60

ITC Notification

In accordance with section 735(d) of the Act, we have notified the ITC of our determination. If the ITC determines that material injury, or threat of material injury, does not exist, this proceeding

will be terminated and all securities posted as a result of the suspension of liquidation will be refunded or cancelled. However, if the ITC determines that such injury does exist, we will issue an antidumping duty order directing Customs officers to assess an antidumping duty on stainless steel hollow products from Sweden entered, or withdrawn from warehouse, for consumption after the suspension of liquidation, equal to the amount by which the foreign market value exceeds the U.S. price

This determination is published pursuant to section 735(d) of the Act (19 U.S.C. 1673d(d)).

Gilbert B. Kaplan,

Acting Assistant Secretary for Import Administration.

October 5, 1987.

BILLING CODE 3510-DS-M

[A-588-702]

Postponement of Final Antidumping Duty Determination; Certain Stainless Steel Butt-Weld Pipe and Tube Fittings from Japan

AGENCY: International Trade Administration, Import Administration, Commerce.

ACTION: Notice.

SUMMARY: This notice informs the public that we have received a request from Nippon Benkan Kogyo, K.K. (Benkan), in this investigation to postpone the final determination, as permitted in section 735(a)(2)(A) of the Tariff Act of 1930, as amended (the Act), (19 U.S.C. 1673d(a)(2)(A).

Based on this request, we are postponing our final determination as to whether sales of certain stainless steel butt-weld pipe and tube fittings from Japan have occurred at less than fair value until not later than January 29, 1988. We are also postponing our public hearing from October 23, 1987, until December 11, 1987.

EFFECTIVE DATE: October 9, 1987.

FOR FURTHER INFORMATION CONTACT: Judith L. Nehring (202-377-0160) or Mary S. Clapp (202-377-1769), Office of Investigations, Import Administration, International Trade Administration, U.S. Department of Commerce, 14th Street and Constitution Avenue, NW., Washington, DC 20230.

SUPPLEMENTARY INFORMATION: On September 16, 1987, we published a preliminary determination of sales at less than fair value with respect to this merchandise (52 FR 34973). This notice stated that if the investigation proceeded normally, we would make our final determination by November 24, 1987.

On September 17, 1987, Benkan requested a postponement of the final determination until not later than the 135th day after publication of our preliminary determination, pursuant to section 735(a)(2)(A) of the Act. Respondent accounts for a significant proportion of exports of the merchandise to the United States. If exporters who account for a significant proportion of exports of the merchandise under investigation request an extension after an affirmative preliminary determination, we are required, absent compelling reasons to the contrary, to grant the request. Accordingly, we are postponing the date of the final determination until not later than January 29, 1988.

Public Comment

In accordance with § 353.47 of our regulations (19 CFR 353.47), if requested, we will hold a public hearing to afford interested parties an opportunity to comment on this preliminary determination at 2:00 p.m. on December 11, 1987, at the U.S. Department of Commerce, Room 3708, 14th Street and Constitution Avenue, NW., Washington, DC 20230. Individuals who wish to participate in the hearing must submit a request to the Deputy Assistant Secretary, Import Administration, Room B-099, at the above address within 10 days of publication of this notice. Requests should contain: (1) The party's name, address, and telephone number; (2) the number of participants; (3) the reason for attending; and (4) a list of the issues to be discussed. In addition, prehearing briefs in at least 10 copies must be submitted to the Deputy Assistant Secretary by December 4, 1987. Oral presentations will be limited to issues raised in the briefs. All written views should be filed in accordance with 19 CFR 353.46, not less than 30 days before the final determination or, if a hearing is held, within 7 days after the hearing transcript is available, at the above address in at least 10 copies.

The U.S International Trade Commission is being advised of this postponement, in accordance with section 735(d) of the Act. This notice is published pursuant to section 735(d) of the Act.

Gilbert B. Kaplan,

Deputy Assistant Secretary for Import Administration.

October 5, 1987.

[C-274-002]

Carbon Steel Wire Rod From Trinidad and Tobago; Intention to Review and Preliminary Results of Changed Circumstances Administrative Review and Tentative Determination to Revoke Countervailing Duty Order

AGENCY: International Trade Administration, Import Administration, Commerce.

ACTION: Notice of intention to review and preliminary results of changed circumstances administrative review and tentative determination to revoke countervailing duty order.

SUMMARY: The Department of Commerce has received information which shows changed circumstances sufficient to warrant an administrative review of the countervailing duty order on carbon steel wire rod from Trinidad and Tobago, under section 751(b)(1) of the Tariff Act. The review covers the period from October 1, 1984. The petitioners have notified the Department that they are no longer interested in the countervailing duty order. We invite interested parties to comment on these preliminary results and tentative determination to revoke.

EFFECTIVE DATE: October 1, 1984.

FOR FURTHER INFORMATION CONTACT: Al Jemmott or Bernard Carreau, Office of Compliance, International Trade Administration, U.S. Department of Commerce, Washington, DC 20230; telephone: (202) 377-2786.

SUPPLEMENTARY INFORMATION:

Background

On January 4, 1984, the Department of Commerce ("the Department") published in the **Federal Register** (49 FR 480) a countervailing duty order on carbon steel wire rod from Trinidad and Tobago. Atlantic Steel Company, Georgetown Steel Corporation, North Star Steel Texas, Inc. (formerly Georgetown Texas Steel Corporation), and Raritan River Steel Company, the petitioners, and an importer, Davis Walker Corporation, informed the Department that they are no longer interested in the order and stated their support for revocation of the order. Continental Steel Corporation, the remaining petitioner, is no longer in business. Under section 751 of the Tariff Act of 1930 ("the Tariff Act"), the Department may revoke a countervailing duty order that is no longer of interest to domestic interested parties.

On May 9, 1985, the Department published in the **Federal Register** (50 FR

VOL 52 ISS 196 OCT 9 1987 UMI

19561) a tentative determination to revoke this countervailing duty order due to other changed circumstances. Now that the domestic parties have declared no further interest in the order, the issues in the 1985 tentative determination to revoke have become moot.

Scope of Review

The United States has developed a system of tariff classification based on the international harmonized system of Customs nomenclature. Congress is considering legislation to convert the United States to this Harmonized System ("HS") by January 1988. In view of this, we will be providing both the appropriate *Tariff Schedules of the United States Annotated* ("TSUSA") item numbers and the appropriate HS item numbers with our product descriptions on a test basis, pending Congressional approval. As with the TSUSA, the HS item numbers are provided for convenience and Customs purposes. The written description remains dispositive.

We are requesting petitioners to include the appropriate HS item number(s) as well as the TSUSA item number(s) in all new petitions filed with the Department. A reference copy of the proposed Harmonized System schedule is available for consultation at the Central Records Unit, Room B–099, U.S. Department of Commerce, 14th Street and Constitution Avenue, NW., Washington, DC 20230. Additionally, all Customs offices have reference copies, and petitioners may contact the Import Specialist at their local Customs office to consult the schedule.

Imports covered by the review are shipments of carbon steel wire rod, currently classifiable under item 607.1700 of the TSUSA. These imports are currently classifiable under HS item numbers 7213.3900, 7213.4900, and 7213.5000.

We invite comments from all interested parties on these HS classifications. The review covers the period from October 1, 1984.

Preliminary Results of Review and Tentative Determination

As a result of our review, we preliminarily determine that the domestic parties' statements of no interest in continuation of the countervailing duty order on carbon steel wire rod from Trinidad and Tobago provide a reasonable basis for revocation of the order.

Therefore, we tentatively determine to revoke the order on carbon steel wire rod from Trinidad and Tobago effective October 1, 1984. We intend to instruct the Customs Service to proceed with liquidation of all unliquidated entries of this merchandise entered, or withdrawn from warehouse, for consumption on or after October 1, 1984 without regard to countervailing duties and to refund any estimated countervailing duties collected with respect to those entries. The current requirement for a cash deposit of estimated countervailing duties will continue until publication of the final results of this review.

Interested parties may submit written comments on these preliminary results within 30 days of the date of publication of this notice and may request disclosure and/or a hearing within five days of the date of publication. Any hearing, if requested, will be held 30 days after the date of publication or the first workday thereafter. Any request for an administrative protective order must be made no later than five days after the date of publication. The Department will publish the final results of the review and its decision on revocation, including its analysis of issues raised in any such written comments or at a hearing.

This intention to review, administrative review, tentative determination to revoke, and notice are in accordance with sections 751 (b) and (c) of the Tariff Act (19 U.S.C. 1675 (b) and (c)) and §§ 355.41 and 355.42 of the Commerce Regulations (19 CFR 355.41, 355.42).

Date: October 6, 1987.

Gilbert B. Kaplan,

Acting Assistant Secretary for Import Administration.

Export Trade Certificate of Review

AGENCY: Department of Commerce, International Trade Administration.

ACTION: Notice of issuance of an Export Trade Certificate of Review.

SUMMARY: The Department of Commerce has issued an export trade certificate of review to the North Dakota Export Trading Company (NDETC). This notice summarizes the conduct for which certification has been granted.

FOR FURTHER INFORMATION CONTACT: George Muller, Acting Director, Office of Export Trading Company Affairs, International Trade Administration, 202–377–5131. This is not a toll-free number.

SUPPLEMENTARY INFORMATION: Title III of the Export Trading Company Act of 1982 ("the Act") (Pub. L. 97–290) authorizes the Secretary of Commerce to issue export trade certificates of review. The regulations implementing Title III are found at 15 CFR Part 325 (50 FR 1804, January 11, 1985).

The Office of Export Trading Company Affairs is issuing this notice pursuant to 15 CFR 325.6(b), which requires the Department of Commerce to publish a summary of a certificate in the **Federal Register**. Under section 305(a) of the Act and 15 CFR 325.11(a), any person aggrieved by the Secretary's determination may, within 30 days of the date of this notice, bring an action in any appropriate district court of the United States to set aside the determination on the ground that the determination is erroneous.

Description of Certified Conduct

Export Trade

Products

Agricultural products, including edible beans, seed potatoes, wheat, corn, soybeans, durum, sunflower seeds, and livestock.

Export Trade Facilitation Services (As They Relate To The Export of Products)

NDETC and its Members intend to provide or arrange for the provision of shipping (including overseas freight transportation; inland freight transportation to U.S. export terminals, ports or gateways; packing and crating; warehousing; freight forwarding, including consolidation of shipments; and other services directly related to the movement of goods being exported or in the course of being exported), credit, financing, marketing services, and taking title to goods.

Export Markets

All parts of the world except the United States (the fifty states of the United States, the District of Columbia, the Commonwealth of Puerto Rico, the Virgin Islands, American Samoa, Guam, the Commonwealth of the Northern Mariana Islands, and the Trust Territory of the Pacific Islands).

Members (in Addition to Applicant)

The North Dakota Mill and Elevator Association, Grand Forks, North Dakota; and The Bank of North Dakota, Bismarck, North Dakota.

Export Trade Activities and Methods of Operation

NDETC and its Members may:

1. Enter into joint discussions and negotiations with foreign buyers concerning:

(a) Standardized production specifications, quantities, timing, shipping, packing, credit, and banking terms necessary to meet the needs of the foreign buyer, NDETC and its Suppliers;

(b) Standardized commodity quality standards that meet foreign buyer specifications; and

(c) Standardized bidding procedures acceptable to foreign buyers.

2. Act jointly to negotiate charges and other terms and to negotiate contracts with providers of transportation services, including advantageous freight contracts with individual carriers and carrier conferences, chartering of vessels for NDETC and any or all Suppliers, and inland transportation for Products in the course of being exported.

3. Enter into agreements with individual Suppliers on the terms of Supplier participation in the negotiation and fulfillment of transportation contracts, including participation in inland transportation negotiations for Products in the course of being exported.

4. Refuse to deal with an individual or company with respect to the export of any Product to a foreign buyer.

5. Refuse to deal with any Supplier, with respect to the export of any Product to a foreign buyer, which supplier does not comply with the standards or other terms of export trade set by NDETC and its Members.

6. Exchange information concerning the extent of Supplier participation in specific export transactions, and exchange information with individual Suppliers regarding specific export transactions in which NDETC and the individual Supplier participate. The information to be exchanged includes:

(a) Information that is already available to the trade or to the general public;

(b) Information (such as selling strategies, prices, projected demand, customary terms of sale) solely about the Export Markets;

(c) Information on costs specific to the Export Markets (such as ocean freight, inland freight to the terminal or port, terminal or port storage, wharfage and handling charges, insurance, agents, commissions, export sales documentation and service, and export sales financing);

(d) Information about U.S. and foreign legislation and regulation affecting sales to Export Markets;

(e) Information about the price, quality, quantity, source, and delivery dates of Products available from Suppliers for export; and

(f) Information about terms and conditions of contracts for sales in the Export Markets to be considered and/or bid on by NDETC and its Suppliers.

7. Enter into exclusive or nonexclusive agreements with Export Intermediaries to appoint an Export Intermediary to act for NDETC and its Suppliers, whereby each Export Intermediary agrees not to represent NDETC's competitors in the sale of Products to any Export Market and not to buy any Products from any of NDETC's competitors for resale in any Export Market.

8. Enter into exclusive or nonexclusive agreements with foreign customers, whereby each customer agrees not to purchase Products from NDETC's competitors.

9. Act as an Export Intermediary for individual Suppliers and enter into exclusive or nonexclusive agreements with Export Intermediaries for the provision of Export Trade Facilitation Services.

10. Limit membership in NDETC to businesses operating in North Dakota and to North Dakota residents.

11. Enter into joint ventures with and to purchase Products from individual Suppliers that meet quality, quantity, and price specifications for transactions. When taking title to Products, NDETC will engage in price, quantity, quality, and other negotiations directly with the foreign buyer.

A copy of each certificate will be kept in the International Trade Administration's Freedom of Information Records Inspection Facility, Room 4102, U.S. Department of Commerce, 14th Street and Constitution Avenue, NW., Washington, DC 20230.

Date: October 6, 1987.

John E. Stiner

Acting Director, Office of Export Trading Company Affairs.

BILLING CODE 3510-DR-M

Princeton University; Decision on Application for Duty-Free Entry of Scientific Instrument

This decision is made pursuant to section 6(c) of the Educational, Scientific, and Cultural Materials Importation Act of 1966 (Pub. L. 89-651, 80 Stat. 897; 15 CFR Part 301). Related records can be viewed between 8:30 AM and 5:00 PM in Room 1523, U.S. Department of Commerce, 14th and Constitution Avenue NW., Washington, DC.

Docket Number: 83-242. Applicant: Princeton University, Princeton, NJ 08544. Instrument: Pulsed Motor Generator. Manufacturer: Canadian General Electric Company, Ltd., Canada. Intended Use: See notice at 48 FR 33508, July 22, 1983.

Comments: None received.

Decision: Approved. No instrument of equivalent scientific value to the foreign instrument, for such purposes as it is intended to be used, is being manufactured in the United States.

Reasons: The foreign article is a replacement for one of two identical Pulsed Motor Generators (PMG) providing the pulsed energy needed to create and contain star-hot plasma. The PMG's were originally manufactured by the General Electric Company, Schenectady, NY. One of the PMG's was dropped and severely damaged during site installation. In the interim General Electric moved its large motor manufacturing facility to Canada.

The capability of the foreign article is pertinent to the applicant's intended purpose and we know of no domestically manufactured apparatus of equivalent scientific value to the foreign article for the applicant's intended use.

Frank W. Creel,

Director, Statutory Import Programs Staff.

National Technical Information Service

Intent To Grant Exclusive Patent License to Pharmedic Corp.

National Technical Information Service (NTIS), U.S. Department of Commerce, intends to grant to Pharmedic Corporation of Deerfield Beach, FL, an exclusive right in the United States to practice the Enkephalins-Endorphins inventions embodied in U.S. Patents 4,127,535, "Dipeptides," 4,127,534, "Tripeptides," 4,127,531, "Hexapeptides," 4,127,532, "Heptapeptides," 4,127,533, "Octapeptides," 4,139,504, "Nonapeptides" and 4,127,541, "Decapeptides" and U.S. Patent Applications S.N. 5-807,209, "Tetrapeptides" and S.N. 5-807,129, "Beta-endorphin." The patent rights in these inventions have been assigned to the United States of America, as represented by the Secretary of Commerce.

The intended exclusive license will be royalty-bearing and will comply with the terms and conditions of 35 U.S.C 209 and 37 CFR 404.7. The intended license may be granted unless, within sixty days from the date of this published Notice, NTIS receives written evidence and argument which establishes that the grant of the intended license would not serve the public interest.

Inquiries, comments and other materials relating to the intended

license must be submitted to Papan Devnani, Office of Federl Patent Licensing, NTIS, Box 1423, Springfield, VA 22151.

Douglas J. Campion,

Associate Director Office of Federal Patent Licensing, National Technical Information Service, U.S. Department of Commerce.

BILLING CODE 3510-04-M

COMMISSION ON MERCHANT MARINE AND DEFENSE

Meeting

SUMMARY: The Commission on Merchant Marine and Defense was established by Pub. L. 98-525 (as amended), and the Commission was constituted in December 1986. The Commission's mandate is to study and report on problems relating to transportation of cargo and personnel for national defense purposes in time of war or national emergency, the capability of the Merchant Marine to meet the need for such transportation, and the adequacy of the shipbuilding mobilization base to support naval and merchant ship construction. In accordance with the Federal Advisory Committee Act, Pub. L. 92-463, as amended, the Commission announces the following meeting:

Dates and Times: Monday, October 19, 1987, Beginning 9:00 a.m.; Tuesday, October 20, 1987, Beginning 9:00 a.m.

Place: Suite 520, 4401 Ford Avenue, Alexandria, Virginia, 22302-0268;

Type of Meeting: Closed.

Contact Person: Allan W. Cameron, Executive Director, Commission on Merchant Marine and Defense, Suite 520, 4401 Ford Avenue, Alexandria, Virginia 22302-0268, Telephone (202) 756-0411.

Purpose of Meeting: To receive additional information pertaining to the needs of the national defense for the Merchant Marine and the shipbuilding industry, and to discuss and to deliberate facts and opinions obtained from briefings and public hearings.

SUPPLEMENTARY INFORMATION: The executive meetings of the Commission will be closed to the public pursuant to 5 U.S.C. 552b(c)(1) and 552b(c)(4) in the interests of national security and to protect proprietary information provided to the Commission in confidence.

Allan W. Cameron,

Executive Director, Commission on Merchant Marine and Defense.

COMMITTEE FOR PURCHASE FROM THE BLIND AND OTHER SEVERELY HANDICAPPED

Procurement List 1987; Additions and Deletion

AGENCY: Committee for Purchase from the Blind and Other Severely Handicapped.

ACTION: Additions to and deletion from procurement list.

SUMMARY: This action adds to and deletes from Procurement List 1987 commodities produced by and services provided by workshops for the blind or other severely handicapped.

EFFECTIVE DATE: November 9, 1987.

ADDRESS: Committee for Purchase from the Blind and Other Severely Handicapped, Crystal Square 5, Suite 1107, 1755 Jefferson Davis Highway, Arlington, Virginia 22202-3509.

FOR FURTHER INFORMATION CONTACT: C.W. Fletcher, (703) 557-1145.

SUPPLEMENTARY INFORMATION: On July 10, July 31, and August 10, 1987 the Committee for Purchase for the Blind and Other Severely Handicapped published notices (52 FR 26064, 28592 and 29564) of proposed additions to and deletion from Procurement List 1987, November 3, 1986 (51 FR 39945).

Additions

After consideration of the relevant matter presented, the Committee has determined that the commodities and services listed below are suitable for procurement by the Federal Government under 41 U.S.C. 46 through 48c, 85 Stat. 77 and 41 CFR 51-2.6.

I certify that the following action will not have a significant impact on a substantial number of small entities. The major factors considered were:

(a) The action will not result in any additional reporting, recordkeeping or other compliance requirements.

(b) The action will not have a serious economic impact on any contractors for the commodities and services listed

(c) The action will result in authorizing small entities to produce the commodities and provide the services procured by the Government.

Accordingly, the following commodities and services are hereby added to Procurement List 1987:

Commodities

Cabinet, Storage

7125-00-378-4261

(50% of the Government's requirements)

Towel, Paper

7920–00–823–9772
(Requirements for New Cumberland, Pennsylvania Army Depot)

Services

Food Service Attendant

914th Tactical Airlift Group, Niagara Falls International Airport, Niagara Falls, New York

Janitorial/Custodial

Marine Corps Development and Education Command, MCCDPA, Building 3041A, SABRS Annex, Quantico, Virginia.

Deletion

After consideration of the relevant matter presented, the Committee has determined that the service listed below is no longer suitable for procurement by the Federal Government under 41 U.S.C. 46 through 48c, 85 Stat. 77 and 41 CFR 51–2.6.

Accordingly, the following service is hereby deleted from the Procurement List 1987:

Grounds Maintenance, U.S. Customs House, 6 World Trade Center, New York, New York

E.R. Alley,
Acting Executive Director.

[FR Doc. 87–23442 Filed 10–8–87; 8:45 am]
BILLING CODE 6820–33–M

Procurement List 1987; Proposed Additions

AGENCY: Committee for Purchase from the Blind and Other Severely Handicapped.

ACTION: Proposed additions to procurement list.

SUMMARY: The Committee has received proposals to add to Procurement List 1987 services to be provided by workshops for the blind or other severely handicapped.

COMMENTS MUST BE RECEIVED ON OR BEFORE: November 9, 1987.

ADDRESS: Committee for Purchase from the Blind and Other Severely Handicapped, Crystal Square 5, Suite 1107, 1755 Jefferson Davis Highway, Arlington, Virginia 22202–3509.

FOR FURTHER INFORMATION CONTACT: C. W. Fletcher, (703) 557–1145.

SUPPLEMENTARY INFORMATION: This notice is published pursuant to 41 U.S.C. 47(a)(2), 85 Stat. 77 and 41 CFR 51–2.6. Its purpose is to provide interested persons an opportunity to submit comments on the possible impact of the proposed action.

If the Committee approves the proposed additions, all entities of the Federal Government will be required to procure the services listed below from workshops for the blind or other severely handicapped.

It is proposed to add the following services to Procurement List 1987, November 3, 1986 (51 FR 39945).

Commissary Warehouse Service, Altus Air Force Base, Oklahoma

Grounds Maintenance, Veterans Administration Medical Center, Palo Alto, California

Janitorial Service, Building 2700, Naval Air Station, Whidbey Island, Washington

Laundry Service, Acoma/Canoncito/Laguna PHS Indian Hospital, Acomita, New Mexico

Laundry Service, Zuni PHS Indian Hospital, Zuni, New Mexico

Multilation of Condemned Assets, Hill Air Force Base, Utah

E.R. Alley,
Acting Executive Director.

DEPARTMENT OF EDUCATION

Notice of Proposed Information Collection Requests

AGENCY: Department of Education.

ACTION: Notice of Proposed Information Collection Requests.

SUMMARY: The Director, Information Technology Services, invites comments on the proposed information collection requests as required by the Paperwork Reduction Act of 1980.

DATE: Interested persons are invited to submit comments on or before November 9, 1987.

ADDRESSES: Written comments should be addressed to the Office of Information and Regulatory Affairs, Attention: Desk Officer, Department of Education, Office of Management and Budget, 726 Jackson Place, NW., Room 3208, New Executive Office Building, Washington, D.C. 20503. Requests for copies of the proposed information collection requests should be addressed to Margaret B. Webster, Department of Education, 400 Maryland Avenue, SW., Room 5624, Regional Office Building 3, Washington, D.C. 20202.

FOR FURTHER INFORMATION CONTACT: Margaret B. Webster (202) 732–3915.

SUPPLEMENTARY INFORMATION: Section 3517 of the Paperwork Reduction Act of 1980 (44 U.S.C. Chapter 35) requires that the Office of Management and Budget (OMB) provide interested Federal agencies and the public an early opportunity to comment on information collection requests. OMB may amend or waive the requirement for public consultation to the extent that public participation in the approval process would defeat the purpose of the information collection, violate State or Federal law, or substantially interfere with any agency's ability to perform its statutory obligations

The Director, Information Technology Services, publishes this notice containing proposed information collection requests prior to submission of these requests to OMB. Each proposed information collection, grouped by office, contains the following: (1) Type of review requested, e.g., new, revision, extension, existing or reinstatement; (2) Title; (3) Agency form number (if any); (4) Frequency of collection; (5) The affected public; (6) Reporting burden; and/or (7) Recordkeeping burden; and (8) Abstract. OMB invites public comment at the address specified above. Copies of the requests are available from Margaret Webster at the address specified above.

Dated: October 5, 1987.

Carlos U. Rice,
Director for Information Technology Services.

Office of Elementary and Secondary Education

Type of Review: NEW
Title: Christa McAullife Fellowship Program
Agency Form Number: A10–13P
Frequency: Annually
Affected Public: Individual or households; State or local governments
Reporting Burden:
Responses: 288
Burden Hours: 456
Recordkeeping:
Recordkeepers: 0
Burden Hours: 0
Abstract: These recommendations forms will be used by statewide fellowship selection panels in order to participate in the Christa McAullife Fellowship Program. The Department will use the information collected on these forms to make fellowship awards.

Office of Postsecondary Education

Type of Review: REVISION
Title: Student Aid Report
Agency Form Number: ED 255–1
Frequency: Annually
Affected Public: Individuals or households; businesses or other for profit; non-profit institutions
Reporting Burden:
Responses: 11,045,332

Burden Hours: 1,465,332
Recordkeeping Burden:
Recordkeepers: 6000
Burden Hours: 386,991
Abstract: The Student Aid Report (SAR) is used to notify applicants of their eligibility to receive Federal financial aid. The form is submitted by eligible applicants to the participating institution of their choice. The institution submits Part 3 of the SAR to the Department to receive funds for the applicant.

Office of Educational Research and Improvement

Type of Review: NEW
Title: Early Estimates of Enrollment, Teachers, Graduates and Current Expenditures
Agency Form Number: G50–40P
Frequency: Annually
Affected Public: State or local governments
Reporting Burden:
Responses: 51
Burden Hours: 26
Recordkeeping Burden:
Recordkeepers: 0
Burden Hours: 0
Abstract: This survey is designed to collect key statistics from State educational agencies on early estimates for school year 1987–88. The key statistics are numbers of teachers, students and high school graduates, and current expenditures for education by State. The Department will use this information to report education statistics by the end of the current school year and to provide policymakers with adequate data for planning.

Office of Educational Research and Improvement

Type of Review: NEW
Title: 1987 National Postsecondary Student Aid Study—Guaranteed Student Loan Component
Agency Form Number: G50–39P
Frequency: Triennial
Affected Public: Individuals or households
Reporting Burden:
Responses: 14,000
Burden Hours: 9380
Recordkeeping Burden:
Recordkeepers: 0
Burden Hours: 0
Abstract: This study will collect data from a sample of recipients of Guaranteed Student Loans (GSL) who left or completed their postsecondary education between 1976–1985. The Department will use this information to assess the distribution and use of GSL's and to establish a student based postsecondary financial aid data system that will assist policy makers in assessing Federal student aid programs.

BILLING CODE 4000–01–M

DEPARTMENT OF ENERGY

Federal Energy Regulatory Commission

[Project Nos. 10418–000, et al.]

Hydroelectric Applications (City of Harrisburg, Pa. et al.); Applications Filed With the Commission

Take notice that the following hydroelectric applications have been filed with the Federal Energy Regulatory Commission and are available for public inspection:

a. Type Filing: Petition Alleging Commitment of Substantial Monetary Resources.

b. Project No.: 10418–000.

c. Date Filed: August 6, 1987.

d. Applicant: City of Harrisburg, Pennsylvania.

e. Name of Project: Dock Street Project.

f. Location: Susquehanna River at Harrisburg, in Cumberland, Dauphin, and Perry Counties, Pennsylvania.

g. Filed Pursuant to: Electric Consumers Protection Act, Pub. L. 99–945, Section 8(b) (1986).

h. Contact Person: Mr. Daniel R. Lispi, Project Manager, Department of Public Works, Vance McCormick Building, 10 North Second Street, Harrisburg, PA 17101, (717) 255–6455.

i. Comment Date: November 19, 1987.

j. FERC Contact: Dean Wight, (202) 376–9820.

k. Description of Project: The applicant has filed a Petition Alleging Commitment of Substantial Monetary Resources (Petition) for the Dock Street Project, which would consist of a new 17-foot-high dam and a powerhouse with a total capacity of 34.4 MW.

l. Description of Petition: On October 16, 1987, Congress enacted ECPA, amending section 210 of PURPA by imposing three environmental conditions that license applicants for hydroelectric projects located at new dams or diversions must meet in order to qualify for PURPA benefits. These conditions are contained in § 292.203(c)(1)(ii) through (iv) of the Commission's Regulations which implement section 8(a) of ECPA. A new dam is a qualifying facility if:

(ii) The Commission finds that the project will not have substantial adverse effects on the environment, including recreation and water quality, when it issues the license for the project;

(iii) The Commission finds when it accepts the aplication for license for the project for filing under § 4.32(e) of this chapter, that the project is not located on any segment of a natural watercourse that:

(A) Is included in (or designated for potential inclusion in) a State or National Wild and Scenic River System, or

(B) The State has determined, in accordance with applicable State law, to possess unique natural, recreational, cultural, or scenic attributes which would be adversely affected by hydroelectric development; and

(iv) The project meets the terms and conditions set by the appropriate fish and wildlife agencies under the same procedures as provided for under section 30(c) of the Federal Power Act.

Section 292.208(c) of the Commission's Regulations provides for exception of a licensed project from the fish and wildlife agency conditions requirement of § 292.203(c)(1)(iv) and also from the payment of fees to reimburse fish and wildlife agencies for setting those conditions, upon the Commission's granting of a Petition Alleging Substantial Commitment of Monetary Resources. The petition must demonstrate that the Applicant expended, or committed to spend, at least 50% of the cost of preparing the license application before October 16, 1986.

Section 8(b)(4)(B) of ECPA established a rebuttable presumption that the applicant has made the required showing of monetary commitment if it held a preliminary permit for the project and had completed all of the environmental consultations required by the Commission's regulations before October 16, 1986. The Applicant held a permit for Project No. 7553, issued on May 25, 1984. Staff has not yet concluded whether applicant has completed consultations in accordance with § 4.38.

In section 8(e) of ECPA, implemented by § 292.203(c)(2) of the Commission's Regulations, Congress imposed a mortorium on the availability of PURPA benefits to hydroelectric projects located at new dams or diversions. In accordance with § 292.208(d), any project excepted from one or more of the three new environmental requirements is also excepted from the mortorium imposed by section 8(e) of ECPA.

The Applicant states that it has made a substantial commitment of monetary resources before October 16, 1986, as shown below:

Total Cost for License Application
$2,574,065
Cost Committed before 10/16/86
$2.430,010

The license application has not been accepted for filing. All additional costs incurred or committed up to the acceptance date of the application will be included in the total cost of preparing the license application and will be used in evaluating the petition. No finding on this petition will be made prior to acceptance of the application.

If this petition is granted, the Applicant would be eligible to petition the Commission to make an intitial finding on whether Project No. 10418 would have substantial adverse effects on the environment pursuant to § 292.203(c)(ii) of the Commission's regulations above.

The petition will be available for inspection and copying during regular business hours in the public reference room maintained by the division of Public Information, 825 North Capitol Street, NE., Washington, DC.

m. This notice also consists of the following standard paragraphs: B, C.

2 a. Type of Application: Preliminary Permit.

b. Project No.: 10459–000.

c. Date Filed: August 25, 1987.

d. applicant: Town of Jonesboro, Louisiana.

e. Name of Project: Red River Lock and Dam No. 5.

f. Location: On the Red River in Bossier and Caddo Parishes, Louisana.

g. Filed Pursuant to: Federal Power Act 16 U.S.C. 791(a) through 825(r).

h. Applicant Contract: Ralph L. Laukhuff, Jr., Forte and Tablada, Inc., P.O. Box 64844, Baton Rouge, Louisiana 70896, (504) 927–9321.

i. FERC Contract: Nanzo T. Coley (202) 376–9416.

j. Comment Date: December 7, 1987.

k. Description of Project: The applicant proposes to utilize a proposed U.S. Army Corps of Engineers' dam. The proposed project would consist of: (1) a proposed inlet channel; (2) a proposed powerhouse containing generating units with a total rated capacity of 22,000–kW; (3) a proposed outlet channel; (4) a proposed 138–kV transmission line, and (5) appurtenant facilities. The estimated average annual energy output is 111,800,000 kWh. applicant estimates that the cost of the work to be performed under the preliminary permit would be $25,000.

l. Purpose of Project: Energy produced at the project would be sold to the local utility company or the local municipalities.

m. This notice also consists of the following standard paragraphs: A5, A7, A9, A10, B, C, & D2.

a. Type of Application: Transfer of License.

b. Project No.: 4784–016.

c. Date Filed: September 23, 1987.

d. Applicant: Topsham Hydro Partners Limited Partnership, Chrysler Capital Corporation, and Utilco Group, Inc.

e. Name of Project: Pejepscot.

f. Location: On the Androscoggin River in Sagadahoc, Cumberland, and Androscoggin Counties, Maine.

g. Filed Pursuant to: Federal Power Act, 16 U.S.C. 791(a) through 825(r).

h. Applicant Contract: Mr. David B. Ward, Flood & Ward, 1000 Potomac Street NW., Suite 402, Washington, DC 20007, (202) 298–6910.

i. FERC Contact: Steven H. Rossi, (202) 376–9819.

j. Comment Date: October 30, 1987.

k. Description of Transfer: On September 23, 1987, Topsham Hydro Partners Limited Partnership (Topsham/licensee) and Topsham, Chrysler Capital Corporation, and Utilco Group, Inc. (transferee), filed a joint application for transfer of a major license for the Pejepscot Project No. 4784.

The purpose of the proposed transfer of the license is to facilitate the financing of the licensed project. The proposed transfer would not result in any changes in the propose development. Because Topsham is a licensee for the project, all engineering, design and feasibility studies performed would be retained by Topsham. The transferee states that it would comply with all the terms and the conditions of the license.

l. This notice also consists of the following standard paragraphs: B and C.

Standard Paragraphs

A5. Preliminary Permit

Anyone desiring to file a competing application for preliminary permit for a proposed project must submit the competing application itself, or a notice of intent to file such an application, to the Commission on or before the specified comment date for the particular application (see 18 CFR 4.36 (1985)). Submission of a timely notice of intent allows an interested person to file the competing preliminary permit application no later than 30 days after the specified comment date for the particular application.

A competing preliminary permit application must conform with 18 CFR 4.30(b)(1) and (9) and 4.36.

A7. Preliminary Permit

Any qualified development applicant desiring to file a competing development application must submit to the Commission, on or before the specified comment date for the particular application, either a competing development application or a notice of intent to file such an application. Submission of a timely notice of intent to file a development application allows an interested person to file the competing application no later than 120 days after the specified comment date for the particular application.

A competing license application must conform with 18 CFR 4.30(b)(1) and (9) and 4.36.

A9. Notice of Intent

A notice of intent must specify the exact name, business address, and telephone number of the prospective applicant, include an unequivocal statement of intent to submit, if such an application may be filed, either (1) a preliminary permit application or (2) a development application (specify which type of application), and be served on the applicant(s) named in this public notice.

A10. Proposed Scope of Studies Under Permit

A preliminary permit, if issued, does not authorize construction. The term of the proposed preliminary permit would be 36 months. The work proposed under the preliminary permit would include economic analysis, preparation of preliminary engineering plans, and a study of environmental impacts. Based on the results of these studies the Applicant would decide whether to proceed with the preparation of a development application to construct and operate the project.

B. Comments, Protests, or Motions to Intervene

Anyone may submit comments, a protest, or a motion to intervene in accordance with the requirements of the Rules of Practice and Procedure, 18 C.F.R. §§ 385.210, .211, .214. In determining the appropriate action to take, the Commission will consider all protests or other comments filed, but only those who file a motion to intervene in accordance with the Commission's Rules may become a party to the proceeding. Any comments, protests, or motions to intervene must be received on or before the specific comment date for the particular application.

C. Filing and Service of Responsive Documents

Any filings must bear in all capital letters the title "COMMENTS", "NOTICE OF INTENT TO FILE COMPETING APPLICATION", "COMPETING APPLICATION", "PROTEST" or "MOTION TO INTERVENE", as applicable, and the Project Number of the particular application to which the filing is in response. Any of the above named documents must be filed by providing the original and the number of copies required by the Commission's regulations to: Kenneth F. Plumb Secretary, Federal Energy Regulatory Commission, 825 North Capitol Street NE., Washington, DC 20426. An additional copy must be sent to: Mr. William C. Wakefield II, Acting Director, Division of Project Management, Federal Energy Regulatory Commission, Room 203–RB, at the above address. A copy of any notice of intent, competing application or motion to intervene must also be served upon each representative of the Applicant specified in the particular application.

D2. Agency Comments

Federal, State, and local agencies are invited to file comments on the described application. (A copy of the application may be obtained by agencies directly from the Applicant.) If an agency does not file comments within the time specified for filing comments, it will be presumed to have no comments. One copy of an agency's comments must also be sent to the Applicant's representatives.

Dated: October 6, 1987.

Kenneth F. Plumb,

Secretary.

[FR Doc. 87–23415 Filed 10–8–87; 8:45 am]

BILLING CODE 6717–01–M

[Docket No. CI87–934–000, et al.]

Tenneco Oil Co., et al. Applications for Certificates, Abandonments of Service and Petitions to Amend Certificates; [1] Natural Gas Company

October 6, 1987.

Take notice that each of the Applicants listed herein has filed an application or petition pursuant to section 7 of the Natural Gas Act for authorization to sell natural gas in interstate commerce or to abandon service as described herein, all as more fully described in the respective applications and amendments whch are on file with the Commission and open to public inspection.

Any person desiring to be heard or to make any protest with reference to said applications should on or before October 21, 1987, file with the Federal Energy Regulatory Commission, Washington, DC 20426, a petition to intervene or a protest in accordance with the requirements of the Commission's Rules of Practice and Procedure (18 CFR 385.211, 385.214). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceeding. Any person wishing to become a party in any proceeding herein must file a petition to intervene in accordance with the Commission's rules.

Under the procedure herein provided for, unless otherwise advised, it will be unnecessary for Applicants to appear or to be represented at the hearing.

Kenneth F. Plumb,

Secretary.

[1] Gas dedicated under contract dated 12-15-80 has been depleted.
[2] Assigned partial acreage to Taylor Energy by Assignment dated 10-17-86
[3] Assigned interest to Taylor Energy by Assignment dated 11-11-86.
[4] Assigned certain acreage to Tenneco Oil Company by Assignment dated 11-10-86.
[5] Assigned certain acreage to Brooklyn Union by Assignment dated 3-26-87.
[6] By Assignment of Oil and Gas Lease, effective 6-1-87, Cities Service assigned all its operating rights to Koch Exploration Company.
[7] By Assignment dated 6-1-87, effective 6-1-87, Conoco, Inc., Atlantic Richfield Company, Texaco Producing Inc. and Cities Service Oil and Gas Corporation conveyed unto Koch Exploration Company certain acreage.
[8] Applicant is filing to revise the point of delivery.
[9] By Assignment of Operating rights executed 10-23-84, effective 10-1-84, Conoco Inc. conveyed unto Samedan Oil Corporation certain acreage.
[10] The last lease subject to Rate Schedule No. 187 has been assigned to D.B. McGuffin.
[11] With compression to remove water, gas production declined to 5 Mcf per day at a price of 30 cents/Mcf. The net loss for the last 9 months of operation average about $1,400/month. No other economically productive zones were present in the well bore. Last gas production from this well was in December, 1985.

[12] By Partial Assignment dated 1-20-87, Mesa Operating Limited Partnership assigned certain acreage to Crouch Petroleum Company, but effective 1-11-86.
[13] Applicant is experiencing reduced sales and desires to sell the gas on the open market.
[14] By Assignment dated 2-13-87 and effective 1-1-87, Exxon acquired certain acreage in the Hardesty Field, Texas County, Oklahoma from ARCO Oil and Gas Company, Division of Atlantic Richfield Company.
[15] Southern Natural Gas Company terminated the contract effective 7-1-84 and does not desire to continue purchasers pursuant to the certificate.
[16] Uneconomical.
[17] Applicant is filing for an additional delivery point.
[18] Depleted.
[19] Union Pacific Resources Company has assigned a portion of its rights, title and interest in the dedicated acreage.
[20] The producer has terminated percentage-of-proceeds type contracts at the El Dorado Gas Plant from which residue gas is dedicated to Northern Natural Gas Company, Division of Enron Corp., under ARCO's certificate and Rate Schedule No. 376.
[21] Applicant desires to sell the gas to Consolidated Gas Transmission Corporation. Currently there are two other wells on the lease where the gas is being sold to Consolidated Gas Transmission Corp.
[22] Applicant has discovered a hole in the well casing. In order to bring the well back on production, they would have to repair the casing. Applicant has determined that this is costly and uneconomical and the well does not justify any further expenditures.
Filing Code: A—Initial Service; B—Abandonment; C—Amendment to add acreage; D—Amendment to delete acreage; E—Total Succession; F—Partial succession.

[Docket No. QF87-662-000]

City of Newport News, VA; Application for Commission Certification of Qualifying Status of a Small Power Production Facility

October 2, 1987.

On September 17, 1987, the City of Newport News, Virginia (Applicant), c/o Edgar Maroney, City Manager, 2400 Washington Avenue, Newport News, Virginia 23607 submitted for filing an application for certification of a facility as a qualifying small power production facility pursuant to § 292.207 of the Commission's regulations. No determination has been made that the submittal constitutes a complete filing.

The small power production facility will be located in the City of Newport News, Virginia. The facility will consist of two waterwall steam generators, and a steam turbine generator. The primary energy source will be biomass in the form of municipal solid waste. The maximum electric power production capacity will be 18 MW.

Any person desiring to be heard or objecting to the granting of qualifying status should file a petition to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, DC 20426, in accordance with rules 211 and 214 of the Commission's Rules of Practice and Procedure. All such petitions or protests must be filed within 30 days after the date of publication of this notice and must be served on the applicant. Protests will be considered by the Commission in determining the appropriate action to be taken but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a petition to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

Kenneth F. Plumb,
Secretary.

[Docket No. ER87-680-000]

Central Illinois Light Co.; Filing

October 6, 1987.

Take notice that on September 30, 1987, Central Illinois Light Company (CILCO) tendered for filing a revised Wholesale Rate MW-4 applicable to the Village of Riverton, Illinois. CILCO, in voluntary compliance with the Federal Energy Regulatory Commission (FERC) Order No. 475, is adjusting the Wholesale Rate MW-4 to reflect changes in CILCO's taxes due to the Tax Reform Act of 1986. CILCO, with the support of Riverton, under the abbreviated filing requirements of the Commission, requests an effective date of July 1, 1987.

Any person desiring to be heard or to protest said filing should file a motion to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, DC 20426, in accordance with Rules 211 and 214 of the Commission's Rules of Practice and Procedure (18 CFR 385.211, 385.214). All such motions or protests should be filed on or before October 20, 1987. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceedings. Any person wishing to become a party must file a motion to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

[Docket No. ER87-678-000]

Central Illinois Public Service Co.; Filing

October 6, 1987.

Take notice that on September 30, 1987, Central Illinois Public Service Company (CIPS) tendered for filing pursuant to the provisions of the Federal Power Act and Part 35 of the Regulations of the Federal Energy Regulatory Commission (Commission) notice of cancellation of three of its filed rate schedules, Rate Schedule W-1, Rate Schedule W-2 and Rate Schedule W-3. Pursuant to § 35.15 of the Commission's regulations, 18 CFR 35.15, these rate schedules shall be cancelled effective December 1, 1987.

Any person desiring to be heard or to protest said filing should file a motion to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington DC 20426, in accordance with Rules 211 and 214 of the Commission's Rules of Practice and Procedure (18 CFR 385.211, 385.214). All such motions or protests should be filed on or before October 20, 1987. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceedings. Any person wishing to become a party must file a motion to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

BILLING CODE 6717-01-M

[Docket No. ER87-682-000]

Central Vermont Public Service Corp.; Filing

October 6, 1987.

Take notice that on September 30, 1987, Central Vermont Public Service Corporation (Company) tendered for filing a proposed tariff change in the Company's FPC Electric Tariff, First Revised Volume No. 1, in voluntary compliance with the Commission's formula filing for lower electric rates to reflect the Federal income tax rate of 34% resulting from the Tax Reform Act of 1986. The Company proposes to make tariff change effective July 1, 1987 which will reduce revenues from affected customers by $40,368 or 1.8% based on 12 months ending June 30, 1987. The Company's other wholesale rate schedules specify rate methodologies which automatically reflect the Federal income tax rate in effect in each test year.

Central Vermont states that this filing has been posted as required by the Commission's regulations and that it has served copies of this filing upon the customers, the New Hampshire Public Utilities Commission, and the Vermont Public Service Board.

Any person desiring to be heard or to protest said filing should file a motion to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, DC 20426, in accordance with Rules 211 and 214 of the Commission's Rules of Practice and Procedure (18 CFR 385.211, 385.214). All such motions or protests should be filed on or before October 20, 1987. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceedings. Any person wishing to become a party must file a motion to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

BILLING CODE 6717-01-M

[Docket No. FA 87-70-000]

Central Vermont Public Service Corp.; Filing

October 6, 1987.

Take notice that on September 30, 1987, Central Vermont Public Service Corporation (Company) tendered for filing an offer of settlement directed to the four conditions specified in *Iowa-Illinois Gas and Electric Company*, Docket No. FA 84-46-001, Order issued April 24, 1987, for retention of amounts collected through the fuel adjustment clause for retention of amounts collected through the fuel adjustment clause for Spent Nuclear Fuel Disposal Costs (SNFDC). The Company's offer of settlement shows (1) that it concedes the impropriety of the collection of those amounts through the fuel clause without prior authorization by the Commission; (2) that there has been no "double recovery" of SNFDC, (3) that all amounts refunded to the Company for SNFDC related to fuel burned before April 7, 1983 have been flowed through to the customers and (4) that the Company "held" no funds and therefore no deduction from rate base was required.

Central Vermont states that this filing has been posted as required by the Commission's regulations and that it has served copies of this filing upon the affected wholesale customers, the New Hampshire Public Utilities Commission, and the Vermont Public Service Board.

Any person desiring to be heard or to protest said filing should file a motion to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, DC 20426, in accordance with Rules 211 and 214 of the Commission's Rules of Practice and Procedure (18 CFR 385.211, 385.214). All such motions or protests should be filed on or before October 20, 1987. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceedings. Any person wishing to become a party must file a motion to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

BILLING CODE 6717-01-M

[Docket No. ER87-679-000]

Columbus Southern Power Co.; Filing

October 6, 1987.

Take notice that on September 30, 1987, Columbus Southern Power Company (CSPCo) tendered for filing proposed changes in its electric resale rate schedules applicable to the City of Jackson, City of Westerville and the Village of Glouster, Ohio, to reflect the decrease in the Federal corporate income tax rate pursuant to the Tax Reform Act of 1986. The proposed change in resale rates will decrease annual revenues from Jackson and Glouster by $64,210 based on the twelve-month period ending June 30, 1987. The proposed changes involve decreased demand charges. This rate decrease filing is being made pursuant to the abbreviated filing requirements set forth in § 35.27 of the Commission's Rules and Regulations.

CSPCo requests that this rate change be made effective as of July 1, 1987.

Copies of the filing were served upon the Cities of Jackson and Westerville, the Village of Glouster and the Public Utilities Commission of Ohio.

Any person desiring to be heard or to protest said filing should file a motion to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, DC 20426, in accordance with Rules 211 and 214 of the Commission's Rules of Practice and Procedure (18 CFR 385.211, 385.214). All such motions or protests should be filed on or before October 20, 1987. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceedings. Any person wishing to become a party must file a motion to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

BILLING CODE 6717-01-M

[Docket No. ER87-681-000]

Consumers Power Co.; Filing

October 6, 1987.

Take notice that on September 30, 1987, Consumers Power Company (Consumers) tendered for filing a rate schedule change to its Wholesale for Resale Electric Service Contract Rate "WR" (Rate "WR") which is part of Consumers Power's FERC Electric Service Tariff First Revised Volume. The rate schedule change consists of a $.42 per kW decrease to the on-peak billing demand charge from $10.16 to $9.74 per kW of on-peak billing demand. The rate schedule change is to be effective July 1, 1987.

The rate schedule change is occasioned by the Commission's Order No. 475 of June 26, 1987 in Docket No. RM87-4-000.

Consumers states that copies of the filing were served on its 14 Rate WR customers.

Any person desiring to be heard or to protest said filing should file a motion to

intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, DC 20426, in accordance with Rules 211 and 214 of the Commission's Rules of Practice and Procedure (18 CFR 385.211, 385.214). All such motions or protests should be filed on or before October 20, 1987. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceedings. Any person wishing to become a party must file a motion to intervene. Copies of this filing are on file with the Commission and are avaialble for public inspection.

BILLING CODE 6717-01-M

[Docket No. ER87-683-000]

Dayton Power and Light Co.; Filing

October 6, 1987.

Take notice that on September 30, 1987, Dayton Power and Light Company (DP&L) tendered for filing an executed rate reduction filing to reflect the reduction in the Corporate Federal Income Tax Rate.

The Federal Energy Regulatory Commission has extablished a simplified filing procedure to allow Public Utilities to voluntarily reduce their rates. DP&L has utilized the simplified filing procedure in determining the reduction in rates. DP&L requests the Commission permit the proposed filing to become effective retroactive to July 1, 1987.

Copies of this filing will be served upon DP&L's customers who are affected by the rate change and the Public Utilities Commission of Ohio.

Any person desiring to be heard or to protest said filing should file a motion to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, DC 20426, in accordance with Rules 211 and 214 of the Commission's Rules of Practice and Procedure (18 CFR 385.211, 385.214). All such motions or protests should be filed on or before October 20, 1987. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceedings. Any person wishing to become a party must file a motion to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

BILLING CODE 6717-01-M

Mississippi River Transmission Corp.; Proposed Changes in F.E.R.C. Gas Tariff

[Docket No. RP87-151-000]

Take notice that on September 29, 1987, Mississippi River Transmission Corporation ("MRT") tendered for filing the following tariff sheets to be part of its FERC Gas Tariff, Second Revised Volume No. 1 and Original Volume No. 2.

Tariff Sheet	Proposed effective date
First Revised Sheet No. 4C	Aug. 1, 1987.
Substitute Original Sheet No. 4D	Oct. 1, 1987.
Original Volume No. 2	
Rate Schedule X-25	
Original Sheet Nos. 263 through 277	August 1, 1987.

MRT states that the above referenced tariff sheets were submitted to provide for the addition of a new rate schedule (Rate Schedule X-25) to MRT's FERC Gas Tariff reflecting the transportation of natural gas currently being performed pursuant to FERC Order No. 451 for Laclede Gas Company (Laclede), an existing firm sales customer of MRT.

MRT states that the transportation service being provided to Laclede is firm service within Laclede's existing level of contract demand. MRT proposes to charge Laclede 5.25¢ per Mcf per one-hundred miles which represents the commodity component of MRT's one-hundred mile haul rate of 8.11¢ per Mcf applicable to transportation service on MRT's Main Line system.

MRT states that copies of its filing have been served on all jurisdictional customers and interested state commissions.

Any person desiring to be heard or protest said filing should file a motion to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, N.E., Washington, DC 20426, in accordance with §§ 385.211 and 385.214 of the Commission's Rules of Practice and Procedure (18 CFR 385.211, 385.214). All such motions or protests should be filed on or before October 13, 1987. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a motion to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

BILLING CODE 6717-01-7

[Docket No. ER87-566-000]

New York State Electric & Gas Corp.; Filing

October 6, 1987.

Take notice that on September 30, 1987, New York State Electric & Gas Corporation (NYSEG) tendered for filing an amendment to Supplement No. 3 to its Agreement with Consolidated Edison Company of New York, Inc. (Con Edison), designated Rate Schedule FERC No. 87. The proposed changes would decrease revenues by $432 based on the twelve month period ending March 31, 1988.

This amendment to rate filing, Supplement No. 3, is made pursuant to sections 1 (e) and (f) and 2 (e), (f) and (g) of Article III of the August 23, 1983 Facilities Agreement—Rate Schedule FERC No. 87. The annual charges for routine operation and maintenance and general expenses, as well as revenue and property taxes are revised based on data taken from NYSEG's Annual Report to the Federal Energy Regulatory Commission (FERC Form 1) for the twelve months ended December 31, 1986. In addition, Con Edison's pro rata share of the total annual carrying charges associated with the firm supply system is calculated based on the rate of Con Edison's one hour demand at Mohansic plus estimated NYSEG and Con Edison one hour peak input at Wood Street. The levelized annual carrying charges included in the calculation continue to reflect a 15.50 percent return on equity which was approved by the New York State Public Service Commission's Opinion 85-8 in Case 28824, effective April 15, 1985.

NYSEG wishes to renew the request for an effective date of April 1, 1987, and therefore requests waiver of the Commission's notice requirements.

Copies of the filing were served upon Consolidated Edison Company of New York and on the Public Service Commission of the State of New York.

Any person desiring to be heard or to protest said filing should file a motion to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street NE., Washington, DC 20426, in accordance with Rules 211 and 214 of the Commission's Rules of

Practice and Procedure (18 CFR 385.211, 385.214). All such motions or protests should be filed on or before October 20, 1987. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceedings. Any person wishing to become a party must file a motion to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

Secretary.

[FR Doc. 87-23464 Filed 10-8-87; 8:45 am]

BILLING CODE 6717-01-M

[Docket No. ER87-677-000]

Niagara Mohawk Power Corp.; Filing

October 6, 1987.

Take notice that on September 30, 1987, Niagara Mohawk Power Corporation (Niagara Mohawk) tendered for filing an agreement between Niagara Mohawk and Long Island Lighting Company (LILCO) dated July 1, 1987, providing for certain transmission services to LILCO. This agreement, Rate Schedule No. 142, supersedes Niagara Mohawk FERC Rate Schedule No. 91.

The July 1, 1987 agreement, provides for the addition of the new service of the transmission and delivery to LILCO of energy generated at the Nine Mile Point Unit #2 plant (Nine Mile #2) and from the Authority's Blenheim-Gilboa Project and for a change in the rate charged LILCO for the transmission and delivery to LILCO of certain power and energy generated at the Nine Mile #2 plant and at the Authority's FitzPatrick Nuclear Plant and from NYPA's Blenheim-Gilboa Project. LILCO has consented to these changes.

The proposed changes would increase revenues from jurisdictional services by $1,937,216 based on the twelve months ending August 31, 1988. Effective dates of July 1, 1987 (for the commencement of transmission and delivery of Nine Mile #2 energy) and September 1, 1987 (for the change in rates) are proposed. Niagara Mohawk states that waiver of the notice requirements of 18 CFR § 35.3 is warranted because LILCO, the only customer under Rate Schedule No. 142, has requested the additional service, has consented to the effective dates, and the practice of LILCO and Niagara Mohawk has been to make rate changes under Rate Schedule 91 effective September 1.

Copies of this filing were served upon LILCO and the New York State Public Service Commission.

Any person desiring to be heard or to protest said filing should file a motion to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street NE., Washington, DC 20426, in accordance with Rules 211 and 214 of the Commission's Rules of Practice and Procedure (18 CFR 385.211, 385.214). All such motions or protests should be filed on or before October 20, 1987. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceedings. Any person wishing to become a party must file a motion to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

Kenneth F. Plumb,

Secretary.

[FR Doc. 87-23465 Filed 10-8-87; 8:45 am]

BILLING CODE 6717-01-M

[Docket No. TA87-3-28-001, TA88-1-28-000]

Panhandle Eastern Pipe Line Co; Change in Tariff

October 5, 1987.

Take notice that on September 30, 1987 Panhandle Eastern Pipe Line Company (Panhandle) tendered for filing the following revised tariff sheets to its FERC Gas Tariff, Original Volume No. 1:

Description	Proposed effective date
First Substitute Fifty-Ninth Revised Sheet No. 3-A	Sept. 1, 1987
First Substitute Thirty-Sixth Revised Sheet No 3-B	Do
First Substitute Sixtieth Revised Sheet No. 3-A.	Oct. 1, 1987
First Substitute Thirty-Seventh Revised Sheet No 3-B	Do

Panhandle states that these revised tariff sheets reflect a commodity rate decrease of (0.06¢) per Dt. Panhandle states that this filing reflects reduced purchased gas costs from Panhandle's pipeline supplier, Trunkline Gas Company (Trunkline). Trunkline is filing concurrently herewith a (4.57¢) per Dt reduction to its commodity rates to be effective September 1, 1987.

Copies of the filing were served on the Company's jurisdictional customers and applicable state regulatory agencies.

Any person desiring to be heard or to protest said filing should file a motion to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, DC 20426, in accordance with Rules 211 and 214 of the Commission's Rules of Practice and Procedure (18 CFR 385.211 and 385.214). All such motions or protests should be filed on or before October 13, 1987. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a motion to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

Kenneth F. Plumb,

Secretary.

BILLING CODE 6717-01-M

[Docket Nos. CI87-872-000 and CI87-912-000]

Pennzoil Company, Proven Properties, Inc., and Pennzoil Gas Marketing Co.; Applications for Permanent Abandonment and Permanent Blanket Certificates With Pregranted Abandonment

October 6, 1987.

Take notice that on September 1, 1987, as supplemented on September 23, 1987, Pennzoil Company, Proven Properties Inc. and Pennzoil Gas Marketing Company, P.O. Box 2967, Houston, Texas 77252-2967, filed pursuant to section 7 of the Natural Gas Act, and the Commission's Regulations thereunder, 18 CFR Parts 154 and 157; §§ 2.76, 2.77(a), 2.77(b) [1], 375.307 and 270.202, applications of Pennzoil Company and Proven Properties Inc. for permanent abandonment of sales to Sea Robin Pipeline Company (Sea Robin) and Pennzoil Company, Proven Properties Inc. and Pennzoil Gas Marketing Company for a permanent blanket certificate of public convenience and necessity with pregranted abandonment, all as more fully set forth in the applications on file with the Commission and open to public inspection.

Approval would authorize Pennzoil Company, Proven Properties Inc. and Pennzoil Gas Marketing Company to make sales of natural gas released from contract by Sea Robin. Pennzoil Gas Marketing Company states it is a reseller of natural gas governed by 18

[1] The United States Court of Appeals for the District of Columbia vacated the Commission's Order No. 436 on June 23, 1987. In vacating Order No. 436, the Court rejected challenges to the Commission's statement of policy in § 2.77 of its Regulations. Section 2.77 states that the Commission will consider on an expedited basis applications for certificate and abandment authority where the producers assert they are subject to substantially reduced takes without payment or have entered into a take-or-pay buyout.

CFR 270.202. All released gas will be subject to the provisions of the Natural Gas Act and will qualify under the maximum lawful wellhead pricing provisions of the Natural Gas Policy Act.

Pennzoil Company and Proven Properties Inc. assert that they and Sea Robin executed a settlement agreement on June 30, 1987. Under the settlement agreement, Pennzoil Company and Proven Properties Inc. agreed to waive all take-or-pay claims against Sea Robin. Pennzoil Company and Proven Properties Inc. further assert that they and Sea Robin also agreed that, if certain conditions are fulfilled, all existing gas sales contracts executed between them will terminate, so Sea Robin will incur no take-or-pay obligations whatsoever in the future under any of those contracts. As to these contracts, Pennzoil Company and Proven Properties Inc. likewise agreed to waive all monthly minimum-take claims against Sea Robin. Pennzoil Company and Proven Properties Inc. assert they have the legal right under their monthly minimum-take contractual clauses to secure mandatory injunctive relief from courts of competent jurisdiction requiring Sea Robin not only to pay Pennzoil Company and Proven Properties Inc. for contractually specified volumes of natural gas, but also to take actual deliveries of the natural gas. The settlement agreement thus will release Sea Robin from substantial take-or-pay exposure and the threat of monthly minimum-take injunctions.

The settlement agreement is, however, contingent upon the granting of the applications noticed herein expeditiously. By the express terms of the settlement agreement, the take-or-pay and minimum-take buyout will be of no force or effect if the applications are not granted by February 29, 1988. All contracts would remain in effect, and Pennzoil Company and Proven Properties Inc. then would be free to pursue their take-or-pay claims for 1985, 1986 and subsequent years and monthly minimum-take claims against Sea Robin as if no settlement had ever been executed.

Applicants state that the Commission's Order No. 436 provides for expiditious consideration in cases where the producer and pipeline have engaged in a take-or-pay "buyout" as contemplated by § 2.76 of the Commission's Regulations. Applicants state that the precise situation is presented by the instant applications. Applicants state that Pennzoil Company and Proven Properties Inc. have engaged in a take-or-pay buyout as contemplated by § 2.76 of the Commission's Regulations, and the applications should therefore be granted expeditiously.

Applicants state that by the time the June 30, 1987, settlement agreement was executed, Sea Robin was taking only 27,796 Mcf/d of natural gas from Pennzoil Company and Proven Properties Inc., while the total deliverability capacity is 49,892 Mcf/d. Applicants state that the following is a breakdown of the deliverability:

NGPA category	Delivery Capacity—MMcf/day	
	Working interest (including royalty)	New interest (excluding royalty)
102(d)	10	9
104 Flowing Gas	7	6
104 Post 1974	18	15
104 Optional Pricing	14	11
104 1973–1974 Biennium	1	1
Total	50	42

Applicants also state that the following is a breakdown of Pennzoil Company's best estimate of the total net reserves remaining:

NGPA category	MMcf
Total Net Reserves—Pennzoil Company	
104	81,802
102	15,936
Subtotal	97,738
Total Net Reserves—Proven Properties Inc	
Subtotal	2,579
Total	100,317

Applicants also request that the Commission approve the collection of any rate that Pennzoil Company and Proven Properties Inc. have established their right to collect pursuant to Parts 273, 274, or 275 of the Commission's Regulations and that the Commission approve automatic collection of the appropriate monthly adjustments from the date the Commission issues its order granting the applications. Applicants also request the Commission to waive the requirement of filing a blanket affidavit to cover such sales in accordance with § 154.94(h) of the Commission's Regulations, and, to the extent that qualification exists for collection of any applicable allowance under section 110 of the NGPA, to waive the requirements of § 154.94(k) and Part 271 of the Commission's Regulations. Applicants further state that they will file any rate schedules with the Commission that may be required by the order granting the applications, but request the Commission to waive the requirement of establishment and maintenance of rate schedules under Part 154 of the Commission's Regulations.

Since Applicants state that they have entered into a take-or-pay buyout and have requested that their applications be considered on an expedited basis, all as more fully described in the applications which are on file with the Commission and open to public inspection, any person desiring to be heard or to make any protest with reference to said applications should, on or before 15 days after the date of publication of this notice in the Federal Register, file with the Federal Energy Regulatory Commission, Washington, DC 20426, a petition to intervene or a protest in accordance with the requirements of the Commission's Rules of Practice and Procedure (18 CFR 385.211, 385.214). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceeding. Any person wishing to become a party to a proceeding must file a petition to intervene in accordance with the Commission's rules.

Under the procedure herein provided for, unless otherwise advised, it will be unnecessary for Applicants to appear or to be represented at the hearing.

Kenneth F. Plumb,

Secretary.

BILLING CODE 6717-01-M

[Docket Nos. CI87-877-000 and CI87-890-000]

Pennzoil Co. and Pennzoil Gas Marketing Co.; Applications for Permanent Abandonment and Permanent Blanket Certificate of Public Convenience and Necessity With Pregranted Abandonment

October 6, 1987.

Take notice that on September 2, 1987, as supplemented on September 23 and 25, 1987, Pennzoil Company (Pennzoil) and Pennzoil Gas Marketing Company (PGMC), Post Office Box 2967, Houston, Texas 77252-2967, filed applications pursuant to section 7 of the Natural Gas Act and Part 157 and §§ 2.76, 2.77(a)(2) and 2.77(b)[1] for authorization to

[1] The United States Court of Appeals for the District of Columbia vacated the Commission's Order No. 436 on June 23, 1987. In vacating Order No. 436, the Court rejected challenges to the Commission's statement of policy in § 2.77 of its Regulations. Section 2.77 states that the Commission will consider on an expedited basis applications for

Continued

permanently abandon sales of gas under certain certificates of public convenience and necessity issued to Pennzoil heretofore authorizing sales of natural gas to Southern Natural Gas Company (Southern) under various contracts covering gas sales subject to the Commission's Natural Gas Act jurisdiction, and for a permanent blanket certificate of public convenience and necessity with pregranted abandonment, all as more fully set forth in the applications on file with the Commission and open to public inspection.

Pennzoil states that this authorization is necessary to enable it to implement a settlement between Pennzoil and Southern to settle and release certain claims arising from various contractual relationships including the settlement of take-or-pay disputes and the agreement to terminate the contracts covering sales for which abandonment authorization is requested. Estimated deliverability is approximately 4.1 MMcf/day. The estimated reserves to be abandoned are 25,797 MMcf. Pennzoil states that the circumstances presented in the applications meet the criteria for consideration on an expedited basis, pursuant to § 2.77 of the Commission's Regulations as promulgated by Order Nos. 436 and 436–A, issued October 9 and December 21, 1985, respectively, in Docket No. RM85–1–000.

Approval would also authorize Pennzoil and PGMC to make sales of natural gas in interstate commerce for resale. PGMC is a reseller of natural gas governed by 18 CFR 270.202.

Pennzoil states that the abandonment requested is limited to sales by Pennzoil to Southern under contracts that provide for the delivery of natural gas to another pipeline for redelivery to Southern. Pennzoil and Southern shall continue their contractual relationship for all sales by Pennzoil to Southern under contracts that provide for the delivery of natural gas directly to Southern. Pennzoil states that the contracts subject to this application shall be referred to as 'Released Contracts.'

Pennzoil states that its applications are submitted to implement a settlement agreement excuted between Pennzoil and Southern on April 1, 1987. Under the agreement, Southern and Pennzoil mutually terminated their contractual relationship under all Released Contracts. These contracts are of no further force or effect. Southern will incur no take-or-pay obligations in the future under any of the Released Contracts, and, once the applications are granted, Pennzoil and PGMC will be free to market the released natural gas at competitive prices. As consideration for the take-or-pay buyout, Pennzoil states it waived approximately $7,100,000 in take-or-pay obligations incurred not only under the Released Contracts, but also under the other natural gas sales contracts between Southern and Pennzoil that are not subject to the applications. In exchange, Pennzoil states Southern released the contracts that are subject to the applications and provided certain other consideration.

Applicants state that the Commission's Order No. 436 provides for expeditious consideration in cases where the producer and pipeline have engaged in a take-or-pay 'buyout' as contemplated by § 2.76 of the Commission's Regulations. Applicants state that the precise situation is presented by the instant applications. Applicants state that Pennzoil and Southern have engaged in a take-or-pay buyout as contemplated by § 2.76 of the Commission's Regulations, and the applications should therefore be granted expeditiously.

Applicants state that the following is a breakdown of the deliverability:

NGPA category	Delivery capacity—MMcf/day	
	Working interest (including royalty)	Net interest (excluding royalty
102(d)	1.6	1.3
104 Post 1974	2.5	2.1
Total	4.1	3.4

Note.—Released Contracts cover an additional 5.7 MMcf/day W.I. or 4.8 MMcf/day N.I. NGPA Section 102(c) gas that does not require abandonment approval

Pennzoil states that the following is a breakdown of Pennzoil's best estimate of the total net reserves remaining:

NGPA category	Total MMcf
102	14,935
104	10,862
	25,797

Pennzoil and PGMC request that the Commission approve the collection of any rate that Pennzoil has established its right to collect pursuant to Parts 273, 274, or 275 of the Commission's Regulations and that the Commission approve automatic collection of the appropriate monthly adjustments from the date the Commission issues its order granting the applications. Pennzoil and PGMC also request the Commission to waive the requirement of filing a blanket affidavit to cover such sales in accordance with § 154.94(h) of the Commission's Regulations, and, to the extent that qualification exists for collection of any applicable allowance under section 110 of the NGPA, Pennzoil and PGMC request the Commission to waive the requirements of § 154.94(k) and Part 271 of the Commission's Regulations. Pennzoil and PGMC further state that they will file any rate schedules with the Commission that may be required by the order granting the applications, but request the Commission to waive the requirement of establishment and maintenance of rate schedules under Part 154 of the Commission's Regulations.

Since Applicants state that they have entered into a take-or-pay buyout and have requested that their applications be considered on an expedited basis, all as more fully described in the applications which are on file with the Commission and open to public inspection, any person desiring to be heard or to make any protest with reference to said applications should, on or before 15 days after the date of publication on this notice in the Federal Register, file with the Federal Energy Regulatory Commission, Washington, DC 20426, a petition to intervene or a protest in accordance with the requirements of the Commission's Rules of Practice and Procedure (18 CFR 385.211, 385.214). All protests filed with Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceeding. Any person wishing to become a party to a proceeding must file a petition to intervene in accordance with the Commission's rules.

Under the procedure herein provided for, unless otherwise advised, it will be unnecessary for Applicants to appear or to be represented at the hearing.

Kenneth F. Plumb,

Secretary.

certificate and abandonement authority where the producers assert they are subject to substantially reduced takes without payment or have entered into a take-or-pay buyout.

[Docket Nos. G–3488–000, Jet al.]

Phillips 66 Natural Gas Co.; Application

October 6, 1987.

Take notice that on September 28, 1987, Phillips 66 Natural Gas Company (Phillips 66), of 990–G Plaza Office Building, Bartlesville, Oklahoma 74004, filed an application pursuant to section 7 of the Natural Gas Act, and §§ 157.23(b) and 157.24 of the

Commission's Regulations for a Certificate of Public Convenience and Necessity to render service previously authorized by the Commission to Phillips Petroleum Company. Phillips 66 also requests redesignation of the Rate Schedules of Phillips Petroleum Company as those of Phillips 66 Natural Gas Company, all as fully shown on the attached Exhibit A. This application is on file with the Commission and open to public inspection.

Under a Contribution Agreement dated January 1, 1986, Phillips 66 was assigned and succeeded to the former Gas and Gas Liquids business of Phillips Petroleum Company. Phillips 66 Natural Gas Company filed with the Commission on March 3, 1986, as successor-in-interest to Phillips Petroleum Company, applications to amend certificates and redesignate Rate Schedules. The Commssion's Order authorizing this request was issued on September 4, 1986. Those docket numbers shown on the attached Exhibit A were inadvertently omitted from the list of certificates which were made part of Applicant's March 3, 1986, successor-in-interest filing.

Any person desiring to be heard or to make any protest with reference to said application should on or before October 21, 1987, file with the Federal Energy Regulatory Commission, Washington, DC 20426, a petition to intervene or a protest in accordance with the requirements of the Commission's Rules of Practice and Procedure (18 CFR 385.211, 385.214). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceeding herein must file a petition to intervene in accordance with the Commission's rules.

Under the procedure herein provided for, unless otherwise advised, it will be unnecessary for Applicant to appear or to be represented at the hearing.

Kenneth F. Plumb,

Secretary.

System Energy Resources, Inc.; Filing

October 6, 1987.

Take notice that on September 30, 1987, System Energy Resources, Inc. (SERI) tendered for filing pursuant to Commission Letter dated September 15, 1987, a compliance report concerning the settlement agreement among SERI, MSU System Services, Inc. (SSI) individually and as agent for Arkansas Power & Light Company, Mississippi Power & Light Company, Louisiana Power & Light Company and New Orleans Public Service, Inc. (the Operating Companies); the Public Service Commissions of Arkansas, Louisiana and Mississippi; the City Council of New Orleans, Louisiana; the Attorneys General of Arkansas and Mississippi; Jefferson Parish, Louisiana Energy Users Group; Conway Corporation; the City of Osceola, Arkansas; and West Memphis Utilities Commission.

SERI states that all amounts collected in excess of the revised rates accepted for filing by the Commission have been refunded together with interest thereon computed under § 35.19a of the Commission's Regulations.

Any person desiring to be heard or to protest said filing should file a motion to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street NE., Washington, DC 20426, in accordance with Rules 211 and 214 of the Commission's Rules of Practice and Procedure (18 CFR 385.211, 385.214). All such motions or protests should be filed on or before October 20, 1987. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceedings.

Any person wishing to become a party must file a motion to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

Kenneth F. Plumb,

Secretary.

BILLING CODE 6717-01-M

[Docket No. EC87-26-000]

Wisconsin Electric Power Co. and Upper Peninsula Generating Co.; Filing

October 6, 1987.

Take notice that on September 30 1987, Wisconsin Electric Power Company (Wisconsin Electric) and Upper Peninsula Generating Company (Generating Company) tendered for filing an application for an order of the Federal Energy Regulatory Commission pursuant to section 203 of the Federal Power Act authorizing Wisconsin Electric to purchase from Generating Company all of its transmission facilities. These facilities are used primarily for the purpose of transmitting power and energy from Generating Company's Presque Isle Power Plant. The facilities will be purchased at their net book value which is estimated to be approximately $15.8 million as of December 31, 1987. Generating Company is owned by Cliffs Electric Service Company (Service Co.) and Upper Peninsula Power Company. As part of the transaction Wisconsin Electric will also acquire the Presque Isle Power Plant and will assume obligations under certain power sale contracts including Service Co.'s contracts with the City of Marquette and Wisconsin Public Power Inc.

Any person desiring to be heard or to protest said filing should file a motion to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, DC 20426, in accordance with Rules 211 and 214 of the Commission's Rules of Practice and Procedure (18 CFR 384.211, 385.214). All such motions or protests should be filed on or before October 30, 1987. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceedings. Any person wishing to become a party must file a motion to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

BILLING CODE 6717-01-M

ENVIRONMENTAL PROTECTION AGENCY

[FRL-3275-1]

Pennsylvania, West Virginia, and Ohio; Initiation of SO_2 Study

AGENCY: U.S. Environmental Protection Agency (USEPA).

ACTION: Notice requesting comment on USEPA's Tri-State Study.

SUMMARY: The purpose of this notice is to announce that USEPA Regions III and V, with the assistance of the States of Pennsylvania, West Virginia, and Ohio, are initiating a study of ambient sulfur dioxide SO_2 concentrations in the Pennsylvania—West Virginia—Ohio (PAWVOH) tri-state area. The study will consist primarily of an areawide scale analysis concerned with multi-source, interstate impacts. The main focus of the study will be Brooke and Hancock Counties in the Northern Panhandle of West Virginia and the adjoining areas in eastern Ohio and western Pennsylvania.

Today, notice provides a brief summary of the PAWVOH study and solicits interest in participation in the study. Affected industries are especially encouraged to participate.

DATE: Comments on this study are requested by December 8, 1987.

ADDRESSES: Copies of the project outline study plan are available at the following addresses for review or, alternatively, copies will be mailed upon request (either write or call):

Mark Garrison, U.S. Environmental Protection Agency, Region III (3AM 12), 841 Chestnut, Philadelphia, Pennsylvania 19107, (215) 597–4553

Michael Koerber, U.S. Environmental Protection Agency, Region V, Air and Radiation Branch (5AR–26), 230 South Dearborn Street, Chicago, Illinois 60604, (312) 886–6061.

Comments on the proposed study should be addressed to: Denis Zielinski, U.S. Environmental Protection Agency, Region III, (3AM 12), 841 Chestnut Street, Philadelphia, Pennsylvania 19107.

FOR FURTHER INFORMATION CONTACT: Michael Koerber, at (312) 886–6061 Mark Garrison, at (215) 597–4553.

SUPPLEMENTARY INFORMATION: The purpose of the study is to first evaluate the nature and extent of any current SO_2 nonattainment problem due to areawide scale impacts and then provide a basis for establishing revised SO_2 emission limits, if necessary. The study area covers Brooke and Hancock Counties in the Northern Panhandle of West Virginia, and the adjoining areas in eastern Ohio and western Pennsylvania. As noted above, USEPA will focus on the areawide scale impacts within the study area. Areawide scale imports are defined as multi-source, interstate impacts. Single source dominated impacts will not be considered directly by USEPA as part of the study because of resource limitations (i.e., the limited amount of Federal funding available does not permit the type of analysis outlined below around each individual source). Furthermore, single source dominated impacts have already been considered in the development of the existing State Implementation Plans for sources in this area. (Note, any single source dominated problems uncovered by the areawide scale analysis should be dealt with by the appropriate State.)

The PAWVOH Study will involve:

1. Problem Definition—Establish study area boundaries, identify candidate models, specify regional scale analysis.

2. Preliminary Analysis—Perform preliminary modeling using current actual/allowable emission inventory and review existing studies and information to identify monitor locations. USEPA wishes to make clear that any modeled violations uncovered by this preliminary analysis are *not* a basis for taking regulatory action or enforcement action against any source, but will be the subject of further investigation.

3. Protocal Development—Establish a protocol for the collection of emissions, meteorological, and ambient SO_2 data and the tests to be performed using these data to evaluate the candidate models.

4. Monitoring Program—Collect emissions, meteorological, and ambient SO_2 data over at least one year. (Note, the purpose of the ambient monitoring is to collect data to evaluate models on an areawide scale. The monitors are not necessarily accurate indicators of the attainment/nonattainment status of the area. Thus, USEPA intends to proceed to the next step of the study even if no violations of the SO_2 ambient standards are measured at the special study monitors.)

5. Model Evaluation/Selection—Carry out tests specified in the protocol to select the applicable model(s). These tests will include some minimum absolute criteria that must be met. Failure of these criteria by all the candidate model and the lack of any monitored violations may be cause for ending the study. (Note, application of the selected model is constrained to the source-receptor relationships considered in the evaluation process. This model will not be used to assess the impact of other source-receptor relationships unless the model is first demonstrated to be appropriate for these other situations.)

6. Control Strategy Evaluation/Development—Run applicable model(s) to evaluate current control strategies and develop revised control strategies, if necessary.

7. SIP Revision (if necessary)—Require revisions to State Implementation Plans to reflect new control strategy.

USEPA invites general comments on the planned study. It should be understood that USEPA is taking the lead in the study because of its multi-source, interstate nature. As such, USEPA will provide the primary financial support for the study. Notwithstanding USEPA's lead role, USEPA has formally requested and received a commitment for assistance from Pennsylvania, West Virginia, and Ohio.

Participation of affected parties (especially industry) in the study is invited.

Please provide comments (or acknowledge interest) to the contacts listed in this notice. Future meetings with interested parties are anticipated.

Under 5 U.S.C. section 605(b), this notice will not have a significant economic impact on a substantial number of small entities.

Today's action is not subject to the requirements of section 3 of the Executive Order 12291.

Authority: 42. U.S.C. 7401–7642.

Dated: September 24, 1987.

Frank M. Covington,

Acting Regional Administrator, Region.

James M. Seif,

Regional Administrator, Region III.

BILLING CODE 6560–50–M

[ER–FRL–3274–9]

Environmental Impact Statements and Regulations; Availability of EPA Comments

This notice announces the Availability of EPA comments prepared September 21, 1987 through September 25, 1987 pursuant to the Environmental Review Process (ERP), under section 309 of the Clean Air Act (CAA) and section 102(2)(c) of the National Environmental Policy Act (NEPA) as amended. Requests for copies of EPA comments can be directed to the Office of Federal Activities at (202) 382–5076/73. An explanation of the ratings assigned to draft environmental impact statements (EISs) was published in the **Federal**

VOL 52 ISS 196 OCT 9 1987 UMI

Register dated April 24, 1987 (52 FR 13749).

Draft EISs

ERP No. D–USN–C85041–NJ, Rating EC2, Naval Weapons Station Earle, Family Housing Development, Construction, NJ. **SUMMARY:** EPA has environmental concerns about the project's impacts on wetlands and water quality. Accordingly, EPA requests additional information regarding these issues to be presented in the final EIS.

Final EISs

ERP No. F–AFS–K65074–AZ, Coconino Nat'l Forest, Land and Resource Mgmt. Plan, AZ. **SUMMARY:** The final EIS adequately addressed the concerns EPA had raised on the draft EIS.

ERP No. F–AFS–K65077–AZ, Prescott Nat'l Forest, Land and Resource Mgmt. Plan, AZ. **SUMMARY:** The final EIS adequately addressed the concerns EPA had raised on the draft EIS.

ERP No. F–BLM–K61062–AZ, Upper Sonoran Wilderness Study Area's, Wilderness Designation/Non-Designation, Recommendations, Lower Gila North and Hualapai—Aquarius Planning Units, Lower Gila and Kingman Resource Areas, AZ. **SUMMARY:** EPA supports the BLM's wilderness recommendations for Upper Sonoran. EPA suggested that BLM's future decision document should state that air and water quality will be best protected under the wilderness designation.

ERP No. F1–BLM–K65089–NV, Lahontan Resource Area Wilderness Study Area's (WSA), Wilderness Designation or Non-Designation, Recommendations, Clan Alpine and Desatoya Mtns., Stillwater Range and Job Peak WSA, NV. **SUMMARY:** EPA supports the BLM's Lahontan wilderness recommendations. EPA suggested that BLM's future decision document should state that air and water quality will be best protected under the wilderness designation.

ERP No. F–BLM–L70006–ID, Cascade Resource Area, Resource Mgmt. Plan, Wilderness Recommendations, ID. **SUMMARY:** EPA is concerned about the potential adverse impacts to water quality and beneficial uses associated with Alternative E, the preferred alternative. EPA continues to favor Alternative C which would provide greater water quality protection, through more stringent environmental protection standards, and results in lower erosion rates.

Dated: October 6, 1987.

Richard E. Sanderson,

Director, Office of Federal Activities.

EIS No. 870347, DSuppl, USA, PAC, Johnston Atoll Chemical Agent Disposal System (JACADS) of Generated Liquid and Solid Waste, Additional Information, Due: December 7, 1987, Contact: James Maragos, (808) 438–2263.

EIS No. 870348, Final, BLM, CA, Arcata Resource Area, Wilderness Recommendations, Eden Valley and Thatcher Ridge Wilderness Study Areas, Designation, Mendocino County, Due: November 9, 1987, Contact: Earl Curran, (707) 462–3873.

EIS No. 870349, Draft, FHW, KY, OH, US 27/Central Bridge Replacement, Newport, Campbell County, KY to Cincinnati, Hamilton County, OH, Due: November 23, 1987, Contact: Robert Johnson, (502) 227–7321.

EIS No. 870350, Final, UMT, MO, IL, St. Louis Light Rail Transit Project, St. Louis Central/Airport Corridor Alternatives Analysis, Improvements, Major Transit Capital Investments, Due: November 9, 1987, Contact: Charles Donald, (816) 926–5053.

Amended Notice

EIS No. 870290, Draft, AFS, CA, OR, Siskiyou National Forest, Land and Resource Management Plan, Due: December 24, 1987, Published FR 8–28–87—Review period extended.

Richard E. Sanderson,

Dated: October 6, 1987.

Director, Office of Federal Activities.

[FR Doc. 87–23508 Filed 10–8–87; 8:45 am]

BILLING CODE 6560–50–M

[OPTS–59834; FRL–3273–8]

Certain Chemical Premanufacture Notice; Poly-Branched-Alpha-Olefin

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice.

SUMMARY: Section 5(a)(1) of the Toxic Substances Control Act (TSCA) requires any person who intends to manufacture or import a new chemical substance to submit a premanufacture notice (PMN) to EPA at least 90 days before manufacture or import commences. Statutory requirements for section 5(a)(1) premanufacture notices are discussed in EPA statements of the final rule published in the **Federal Register** of May 13, 1983 (48 FR 21722). In the **Federal Register** of November 11, 1984 (49 FR 46066) (40 CFR 723.250), EPA published a rule which granted a limited exemption from certain PMN requirements for certain types of polymers. Notices for such polymers are reviewed by EPA within 21 days of receipt. This notice announces receipt of one such PMN and provide the summary of each.

DATES: Close of Review Period: Y 87–262—October 12, 1987.

FOR FURTHER INFORMATION CONTACT: Stephanie Roan, Premanufacture Notice Management Branch, Chemical Control Division (TS–794), Office of Toxic Substances, Environmental Protection Agency, Rm. E–611, 401 M Street SW., Washington, DC 20460, (202) 382–3725

SUPPLEMENTARY INFORMATION: The following notice contains information extracted from the non-confidential version of the submission by the manufacturer on the exemptions received by EPA. The complete non-confidential document is available in the Public Reading Room NE–G004 at the above address between 8:00 a.m. and 4:00 p.m., Monday through Friday, excluding legal holidays.

Y 87–262

Importer. Confidential.

Chemical. (G) Poly-branched-alpha-olefin.

Use/Import. (G) Modified for polymer properties. Import range: Confidential.

Toxicity Data. Acute oral (Male and Female): >5,000 mg/kg; Irritation: Skin—Non-irritant, Eye—Non-irritant; Ames test: Non-mutagenic.

Date: September 28, 1987

Denise Devoe,

Acting Director, Information Management Division, Office of Toxic Substances.

P 87–1874

Manufacturer. Monsanto Company.

Chemical. (G) Bismaleimide.

Use/Production. (G) Industrial laminating resin. Prod. range: Confidential.

Toxicity Data. Acute oral: >5,000 mg/kg; Acute dermal: >5,000 mg/kg; Irritation: Skin–Non-irritant, Eye–Slight.

P 87–1875

Manufacturer. Confidential.

Chemical. (G) Tetrasubstituted cyclic siloxane.

Use/Production. (G) Destructive use. Prod. range: Confidential.

P 87–1876

Manufacturer. Confidential.

Chemical. (G) Polyamide acrylic copolymer.

Use/Production. (G) Industrial printing ink resin. Prod. range: Confidential.

P 87–1877

Importer. Adjinomoto U.S.A., Incorporated.

Chemical. (S) 1,3-Imidazolidinediplopanoic acid, 4-(1-methylethyl)-2,5-dioxo, dihydrazide.

Use/Production. (S) Industrial and commercial curing agent for epoxy resin. Prod. range: 1,200 to 6,000 kg/yr.

Toxicity Data. Acute oral: >20 g/kg; Irritation: Skin—Non-irritant; Ames test: Non-mutagenic; Skin sensitization: Non-sensitizer.

P 87–1878

Importer. Ajinomoto U.S.A., Incorporated.

Chemical. (S) Eicosanedioci acid, dihydrazide.

Use/Import. (S) Industrial and commercial curing agent for epoxy resin. Import range: 5,000 to 10,000 kg/yr.

P 87–1879

Manufacturer. Confidential.

Chemical. (G) Alkoxylated alkylated aromatic diamine.

Use/Production. (G) Industrial polyurethane cross-linking agent. Prod. range: Confidential.

Toxicity Data. Acute oral: 1.0 g/kg; Acute dermal: 1.0 g/kg; Irritation: Skin—Non-irritant; Ames test: Non-mutagenic.

P 87–1880

Manufacturer. Confidential.

Chemical. (G) Alkoxylated alkylated aromatic diamine.

Use/Production. (G) Industrial polyurethane cross-linking agent. Prod. range: Confidential.

Toxicity Data. Acute oral: 1.0 g/kg; Acute dermal: 1.0 g/kg; Irritation: Non-irritant; Ames test: Non-mutagenic.

P 87–1881

Manufacturer. E.I. du Pont de Nemours and Company, Inc.

Chemical. (S) Cis-1,4-diaminocyclohexane.

Use/Production. (S) Industrial and commercial cross-linking agent for epoxy type coatings; polyurethanes for isocyanates and extenders; polyamide resins for plastics, films and adhesives; and corrosion inhibitors. Prod. range: Confidential.

Toxicity Data. Acute oral: 1,300 mg/kg; Irritation: Skin—Irritant, Eye—Severe; Inhalation: 1.9 mg/l; Ames test: Non-mutagenic; Skin sensitization: Non-sensitizier.

P 87–1882

Manufacturer. E.I. du Pont de Nemours and Company, Inc.

Chemical. (S) Trans-1,4-diaminocyclohexane.

Use/Production. (S) Industrial and commercial cross-linking agent for epoxy type coatings; polyurehtanes for isocyanates and extenders; polyamide resins for plastics, films and adhesives; and corrosion inhibitors. Prod. range: Confidential.

Toxicity Data. Acute oral: 1,300 mg/kg; Irritation: Skin—Irritant; Eye—Severe; Inhalation: 1.9 mg/l; Ames test: Non/Mutagenic; Skin sensitization: Non-sensitizer.

P 87–1883

Manufacturer. Confidential.

Chemical. (G) Modified acrylic copolymer.

Use/Production. (G) Open, non-dispersive use. Prod. range: Confidential.

P 87–1884

Manufacturer. Confidential.

Chemical. (G) Octadecanoic acid reaction with an alkylamine, quarternized.

Use/Production. (G) Open, non-dispersive use. Prod. range: 3,000 to 30,000 kg/yr.

P 87–1885

Manufacturer. Confidential.

Chemical. (G) Modified acrylic copolymer.

Use/Production. (G) Open, non-dispersive use. Prod. range: Confidential.

P 87–1886

Manufacturer. Confidential.

Chemical. (G) Modified acrylic polymer.

Use/Production. (G) Open, non-dispersive use. Prod. range: Confidential.

P 87–1887

Manufacturer. Confidential.

Chemical. (G) Modified acrylic polymer.

Use/Production. (G) Open, non-dispersive use. Prod. range: Confidential.

P 87–1888

Manufacturer. Confidential.

Chemical. (G) Substituted polyolefin.

Use/Production. (G) Destructive use. Prod. range: Confidential.

P 87–1889

Manufacturer. Confidential.

Chemical. (G) Substituted polyolefin.

Use/Production. (G) Destructive use. Prod. range: Confidential.

P 87–1890

Manufacturer. Confidential.

Chemical. (G) Substituted sulfonic acid, zinc salt.

Use/Production. (G) Highly dispersive use. Prod. range: Confidential.

P 87–1891

Manufacturer. Confidential.

Chemical. (G) Alkylpolyamine.

Use/Production. (S) Asphalt emulsifier for highway maintenance. Prod. range: Confidential.

P 87–1892

Importer. T.G. Tomasi Consultants, Ltd.

Chemical. (G) Cuprate (4-), [5-(acetylamino)-4-hydroxy-3[[5-hydroxy-6-[[2-hydroxy-5-[[2-(sulfooxy)ethyl]sulfonyl]phenyl]azo]-7-sulfo-2-naphthalenyl]azo]2,7-naphthalene disulfonate (6-)]-tetra sodium salt.

Use/Import. (S) Reactive dye for textiles. Import range: 10,000 to 30,000 kg/yr.

P 87–1893

Importer. T.G. Tomasi Consultants, Ltd.

Chemical. (G) 1-Amino 8-hydroxy 2[4-[sulfonic acid]phenylazo]7-[[2-[sulfonic acid]5-[3-chloro 5-[4-[ethylsulfonyl]sulfuric acid ester]phenylamino]S-triazinylamino]phenylazo]naphthalene 3,6-disulfonic acid - penta sodium salt.

Use/Import. (S) Reactive dye for textiles. Import range: 10,000 to 30,000 kg/yr.

P 87–1894

Importer. T.G. Tomasi Consultants, Ltd.

Chemical. (G) 4-[1-Amino 8-hydroxy 2-[4[[2-[sulfooxy]ethyl]sulfonyl]phenylazo] 3,6 disulfo naphthyl-7-azo] 4'-[4-hydroxy phenylaso] stilbene 2,2'-disulfonic acid-penta potassium salt.

Use/Import. (G) Reactive dye for textiles. Import range: 10,000 to 30,000 kg/yr.

P 87–1895

Importer. T.G. Tomasi Consultants, Ltd.

Chemical. (G) 1-Naphthol-2-[3-sulfo 4-methoxy phenylazo] 6-[3-chloro 5-[2-methoxy 5-[[2-[sulfooxy]ethyl]sulfonyl]phenylamino] S-triazinyl amino] 3-sulfonic acid trisodium salt.

Use/Import. (G) Reactive dye for textiles. Import range: 10,000 to 30,000 kg/yr.

P 87–1896

Importer. Shin-Etsu Silicones of America, Incorporated.

Chemical. (G) Organopolysiloxane containing hydrogen trifluoroalkyl and methyl groups.

Use/Import. (S) Industrial curing agent of liquid fluorosilicone rubber. Import range: 50 to 500 kg/hr.

P 87–1897

Importer. Shin-Etsu Silicones of America, Incorporated.

Chemical. (G) Reaction products of silane coupling groups.

Use/Import. (S) Component or its ingredients for two or three component low temperature vulcanized silicone rubber compound; and industrial ingredient for primer. Import range: 80 to 800 kg/yr.

P 87–1898

Importer. Hoechst Celanese Corporation.

Chemical. (G) Modified trioxane polymer.

Use/Import. (S) Industrial injection, extrusion, compression and flow molding. Import range: 16,000 to 23,000 kg/yr.

P 87–1899

Manufacturer. Milliken and Company.

Chemical. (G) Polyoxyethylene-polyoxypropylene-, substituted dianiline.

Use/Production. (G) Colorant. Prod range: Confidential.

P 87–1900

Manufacturer. Confidential.

Chemical. (G) Polyacrylate urethane.

Use/Production. (G) Industrial coating with a dispersive use. Prod. range: 100,000 to 123,000 kg/yr.

P 87–1901

Manufacturer. Dow Corning Corporation.

Chemical. (G) Methoxy-methacrylate siloxane.

Use/Production. (G) Coating. Prod. range: Confidential.

Toxicity Data. Acute oral: 6.0 g/kg; Irritation: Skin—Non-irritant, Eye—Slight; Inhalation: 200 parts per million (ppm).

P 87–1902

Manufacturer. Dow Corning Corporation.

Chemical. (G) Organofunctional polysiloxane.

Use/Production. (G) Coating. Prod. range: Confidential.

Toxicity Data. Acute oral: 5,000 mg/kg; Acute dermal: 2,000 mg/kg; Irritation Skin—Non-irritant, Eye—Slight; Ames test: Non-mutagenic.

P 87–1903

Manufacturer. Dow Corning Corporation.

Chemical. (G) Polydimethylsiloxane.

Use/Production. (S) Intermediate. Prod. range: Confidential.

Toxicity Data. Acute oral: 5,000 mg/kg; Acute dermal: 2,000 mg/kg; Irritation: Skin—Non-irritant, Eye—Slight; Ames test: Non-mutagenic.

P 87–1904

Importer. Fritzsche, Dodge and Olcott.

Chemical. (S) Bicyclo [3.1.1.] heptane-3-carboxaldehyde 2,6,6-trimethyl.

Use/Import. (S) Chemical intermediate or as an aroma chemical. Import range: 100 to 5,000 kg/yr.

Toxicity Data. Acute oral: 2,000 mg/kg; Irritation: Skin—Primary irritant, Eye—Non-irritant.

P 88–1

Manufacturer. Confidential.

Chemical. (G) Chloride of ethoxylated alcohol.

Use/Production. (G) Isolated intermediate. Prod. range: Confidential.

P 87-1815

Importer. Hoechst Celanese Corporation.

Chemical. (G) Fiber reactive monoazo dyestuff.

Use/Import. (S) Industrial fiber reactive dyestuff. Import range: 10,000 to 50,000 kg/yr.

Toxicity Data. Acute oral: >5,000 mg/kg; Acute dermal: >2,000 mg/kg; Irritation: Skin—Non-irritant, Eye—Non-irritant; Ames test: Non-mutagenic, EC_{50} 72 hr (Scenedesmus subspicatus): 36.1 mg/l.

P 87-1816

Manufacturer. The Dow Chemical Company.

Chemical. (G) Modified polyethylene.

Use/Production. (G) Site-limited film. Prod. range: Confidential.

P 87-1817

Manufacturer. American Cyanamid Company.

Chemical. (G) Aromatic anhydride.

Use/Production. (G) Open, non-dispersive use for resins. Prod. range: Confidential.

Toxicity Data. Acute oral: >5,000 mg/kg; Acute dermal: >2,000 mg/kg; Irritation: Minimal, Eye—Mild; Ames test: Non-mutagenic.

P 87-1818

Manufacturer. Confidential.

Chemical. (G) Polyoxyalkylate of trimethylolpropane.

Use/Production. (G) Industrial emulsifier. Prod. range: Confidential.

Toxicity Data. Acute oral: >5 g/kg; Acute dermal: >5.0 g/kg; Irritation: Skin—Slight, Eye—Non-irritant.

P 87-1819

Manufacturer. Confidential.

Chemical. (G) Polyoxyalkylate of trimethylolpropane.

Use/Production. (G) Industrial emulsifier, thickener. Prod. range: Confidential.

Toxicity Data. Acute oral: >5 g/kg; Acute dermal: >5.0 g/kg; Irritation: Skin—Slight, Eye—Non-irritant.

P 87-1820

Manufacturer. Confidential.

Chemical. (G) Polyoxylkylate of trimethylolpropane.

Use/Production. (G) Industrial, commercial and consumer thickener. Prod. range: Confidential.

Toxicity Data. Acute oral: >5 g/kg; Acute dermal: >5.0 g/kg; Irritation: Skin—Slight, Eye—Non-irritant.

P 87-1821

Manufacturer. Confidential.

Chemical. (G) Polyoxyalkylate of trimethylolpropane.

Work Group Meeting

AGENCY: U.S. Environmental Protection Agency.

ACTION: Work group meeting.

SUMMARY: Pursuant to section 518 of the Water Quality Act, EPA is authorized to treat Indian Tribes as states for various purposes specified in the Clean Water Act. In order to implement these provisions, EPA will hold a work group meeting to discuss how to provide planning/program grants to Indian Tribes.

DATE: November 4, 1987 1–4 p.m. and November 5, 1987 8:30–4:00 p.m.

ADDRESS: Environmental Protection Agency, 401 M Street SW., Washington, DC 20460.

FOR FURTHER INFORMATION CONTACT: Patti Morris, Analysis and Evaluation Division, Office of Water Regulations and Standards, Office of Water, Room 747 East Tower, U.S. Environmental Protection Agency, 401 M Street SW., Washington DC 20460. Or call, 202–475–8637 or FTS 8–475–8637.

F. Scott Bush,

Director, Analysis and Evaluation Division.

BILLING CODE 6560–50–M

[FRL–3274–1]

Florida Marine Sanitation Device Standard; Receipt of Petition

Notice is hereby given that a petition has been received from the State of Florida requesting determinations by the Regional Administrator, Environmental Protection agency, pursuant to section 312(f)(3) of Pub. L. 92–500, as amended by Pub. L. 95–217, that adequate facilities for the safe and sanitary removal and treatment of sewage from all vessels are reasonably available for the waters of Destin Harbor (aka Old Pass Lagoon), County of Okaloosa, within the State of Florida. Destin Harbor, in the City of Destin, is located in Northwest Florida and is connected to the inlet form the Gulf of Mexico into Choctawhatchee Bay.

The State of Florida has certified that there are five pumpout facilities available to service vessels in Destin Harbor. Pumpout facility No. 1 is located on the dock of the East Pass Towers Yacht Club and will accommodate vessels with a draft of eight feet. This facility is open from 8:00 a.m. to 4:00 p.m., seven days a week and has a $2.00 fee per pumpout. Pumpout facility No. 2 is on the dock at the Waterview Towers and will accommodate vessels with a draft of eight feet. This facility is open from 8:00 a.m. to 4:00 p.m. each day except Sunday and has a $2.00 fee per pumpout. Pumpout facility No. 3 is on the dock at the Destin Harbor Resort and accommodates vessels with 10 feet drafts. The facility is open from 8:00 a.m. to 4:00 p.m. each day except Sunday. There is no charge per pumpout at this facility. Pumpout facility No. 4 is on the dock at the Sandestin Yacht Club and accommodates vessels wth 15 feet drafts. The facility is open from 6:30 a.m. to 6:00 p.m. sevens days a week. There is no charge per pumpout at this facility. Pumpout facility No. 5 is on the dock at the Dolphin Point Condominium and accommodates vessels with a draft of six feet. The facility is open from 8:00 a.m. to 4:00 p.m. each day except Sunday. The pumpout service at this facility is free. All five pumpout facilities discharge into the city sewage system.

Vessel usage of Destin Harbor includes 125 charter fishing vessels, 21 commercial fishing vessels and 190 recreational boats for a total of 336 vessels. The channel depth into Destin Harbor is currently twelve (12) feet; therefore, the City is certifying that all vessels can be accommodated by the five pumpout facilities.

Comments and views regarding this request for action may be filed on or before November 23, 1987. Such communications, or request for information or a copy of the applicant's petition, should be addressed to Sally S. Turner, Chief, Marine Protection Section, 345 Courtland Street, Atlanta, Georgia, 30365. Telephone 404/347–2126.

Dated: September 24, 1987.

Lee A. DeHihns III,

Acting Regional Administration.

BILLING CODE 6560–50–M

FEDERAL COMMUNICATIONS COMMISSION

Agreement Policy for Short-Spaced FM Broadcast Stations Expanded

September 25, 1987.

The Commission will now consider mutual agreements between grandfathered short-spaced stations for facilities increases on the same channel, and/or the first, second or third adjacent channels.

By its *Public Notice*, No. 75–1347, released December 15, 1975, 57 FCC 2d 1263 (1975), the Commission reaffirmed the policy of considering agreements between grandfathered short-spaced stations (FM broadcast stations at locations authorized prior to November 16, 1964 which did not meet the minimum spacing requirements of § 73.207 of the rules and have remained short-spaced since that time) to increase their facilities beyond those routinely permitted for such stations in § 73.213 of the rules. That *Public Notice* set forth

VOL 52 ISS 196 OCT 9 1987 UMI

the criteria to be used in evaluating whether such an agreement is in the public interest.

This policy, however, has applied only to grandfathered short-spaced stations that were short-spaced on the same channel and/or the first adjacent channels. In order to maintain consistency with § 73.213, as amended in MM Docket 86-144, the agreement policy will now apply also to grandfathered short-spaced stations that are short-spaced on the second and third adjacent channels.

Federal Communications Commission.

William J. Tricarico,

Secretary.

[FR Doc. 87-23473 Filed 10-8-87; 8:45 am]

BILLING CODE 6712-01-M

[MM Docket No. 87424; File Nos. BPH-850710MI]

Applications For Consolidated Hearing; Michael J. Benns, et al.

1. The Commission has before it the following mutually exclusive applications for a new FM station:

Applicant	City/State	File No.	MM Docket No.
A. Michael J. Benns	Aspen, CO	BPH-850710MI	87-424
B. Harold S. Schwartz	Aspen, CO	BPH-850711NG	
C. Aspen Broadcasting Network, Inc.	Aspen, CO	BPH-850711NI	
D. Louis Richard Keilin d/b/a Pro/Video	Aspen, CO	BPH-850712PD	
E. Aspen FM, Inc.	Aspen, CO	BPH-850712PH	
F. Aspen Skywave, Inc.	Aspen, CO	BPH-850712PI	
G. Ajax Mountain Broadcasting Corp.	Aspen, CO	BPH-850712PR	
H. Aspen Communications, A Limited Partnership	Aspen, CO	BPH-850712PS	
I. Trans-California Broadcasting, Co.	Aspen, CO	BPH-850712PT	
J. Marcus Broadcasting, Inc.	Aspen, CO	BPH-850712PV	
K. HVS Partners	Aspen, CO	BPH-850712PW	
L. Aspen Airwaves, Inc.	Aspen, CO	BPH-850712PY	
M. Aspen Broadcasting	Aspen, CO	BPH-850712PZ	
N. Ute City Broadcasting, Inc.	Aspen, CO	BPH-850712QE	
O. PN Radio Co.	Aspen, CO	BPH-850711NE (*Dismissed*)	
P. Echonet Corp.	Aspen, CO	BPH-850712PU (*Dismissed*)	
Q. Penny Drucker	Aspen, CO	BPH-850712PX (*Dismissed*)	
R. Aspen Radio Partners, A Limited Partnership	Aspen, CO	BPH-850712QA (*Dismissed*)	
S. Theodor R. Jacobsen	Aspen, CO	BPH-850712QF (*Dismissed*)	

2. Pursuant to section 309(e) of the Communications Act of 1934, as amended, the above applications have been designated for hearing in a consolidated proceeding upon the issues whose headings are set forth below. The text of each of these issues has been standardized and is set forth in its entirety under the corresponding headings at 51 FR 19347, May 29, 1986. The letter shown before each applicant's name, above, is used below to signify whether the issue in question applies to that particular applicant.

Issue heading	Applicants
1. Environmental	I, K.
2. Air Hazard	A, K.
3. Comparative	All applicants.
4. Ultimate	All applicants.

3. If there is any non-standardized issue(s) in this proceeding, the full text of the issue and the applicant(s) to which it applies are set forth in an appendix to this Notice. A copy of the complete HDO in this proceeding is available for inspection and copying during normal business hours in the FCC Dockets Branch (Room 230), 1919 M Street NW., Washington DC. The complete text may also be purchased from the Commission's duplicating contractor, International Transcription Services, Inc., 2100 M Street, NW., Washington, DC 20037. (Telephone (202) 857-3800).

W. Jan Gay,

Assistant Chief, Audio Services Division, Mass Media Bureau.

BILLING CODE 6720–01–M

FEDERAL MARITIME COMMISSION

Agreement(s) Filed

The Federal Maritime Commission hereby gives notice of the filing of the following agreement(s) pursuant to section 5 of the Shipping Act of 1984.

Interested parties may inspect and obtain a copy of each agreement at the Washington, DC Office of the Federal Maritime Commission, 1100 L Street, NW., Room 10325. Interested parties may submit comments on each agreement to the Secretary, Federal Maritime Commission, Washington, DC 20573, within 10 days after the date of the **Federal Register** in which this notice appears. The requirements for comments are found in § 572.603 of Title 46 of the Code of Federal Regulations. Interested persons should consult this section before communicating with the Commission regarding a pending agreement.

Agreement Nos.:

(1) 212–009847–018

(2) 212–009848–020

Title:

(1) U.S. Atlantic Coast/Brazil Agreement

(2) U.S. Gulf Ports/Brazil Agreement

Parties:

(1) Companhia de Navegacao Lloyd Brasileiro
Companhia de Navegacao Maritima Netumar
American Transport Lines, Inc.

(2) Companhia de Navegacao Lloyd Brasileiro
Companhia Maritima Nacional
American Transport Lines, Inc.

Synopsis: The proposed amendments would establish a new pool period commencing October 1, 1987 and ending December 31, 1988, for each agreement. They would also establish minimum sailings and port call requirements for the parties for this period and would extend to December 31, 1988, provisions governing the accounting for cargoes under alternate coast service.

Agreement No.: 202–010268–008.

Title: Australia/Eastern U.S.A. Shipping Conference

Parties:

Columbus Line
Pacific America Container Express

Synopsis: The proposed amendment would authorize the parties to agree upon and adopt rules with regard to the movement of cargo at their own expense between discharge ports. The parties have requested a shortened review period.

By Order of the Federal Maritime Commission.

Joseph C. Polking,

Secretary.

Dated: October 6, 1987.

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Office of the Secretary

Agency Forms Submitted to the Office of Management and Budget for Clearance

Each Friday the Department of Health and Human Services (HHS) publishes a list of information collection packages it has submitted to the Office of Management and Budget (OMB) for clearance in compliance with the Paperwork Reduction Act (44 U.S.C. Chapter 35). The following are those packages submitted to OMB since the last list was published on October 9, 1987.

Social Security Administration

(Call Reports Clearance Officer on 301–594–5706 for copies of package)

1. Statement of Marital Relationship (By One of the Parties)—0960–0038—This form is used to collect information which is needed by the Social Security Administration to prove or disprove an alleged common-law marriage to someone entitled to social security benefits. This form is completed by an individual who alleges such a marriage. Respondents: Individuals or households. Number of Respondents: 30,000; Frequency of Response: Occasionally; Estimated Annual Burden: 15,000 hours.

Desk Officer: Elana Norden

Office of the Secretary

(Call Reports Clearance Officer on 202–245–6511 for copies of package)

1. HHS Acquisition Regulations—HHSAR Part 315—Contracting by Negotiations—0990–0139—HHSAR Subpart 315.4 prescribes policies for the preparation of business proposals (for all solicitations except those listed in FAR 15.401 and research and development). HHSAR 352.215–71 establishes the requirements for an offeror to report its "Employer's Identification Number." This information is used by the Department for recordkeeping purposes. This information is used by the Department to evaluate proposal. Respondents: State or local governments, Businesses or other for-profit, Non-profit institutions, Small businesses or organizations. Number of Respondents: 38,311; Frequency of Responses: Occasionally; Estimated Annual Burden: 27,965 hours.

OMB Desk Officer: Shannan Koss-McCallum

Public Health Service

(Call Reports Clearance Officer on 202–245–2100 for copies of package)

National Institutes of Health

1. Qualifications Evaluation Inquiry—0925–0036—The referenced form is a systematic method for collecting information from supervisors, co-workers and others having knowledge of applicant's work performance, particularly as it relates to applicant's potential for health science administration. The information will be used by OPM examining staff, and rating and potential selecting officials. Respondents: Individuals or households. Number of Respondents: 3,900; Frequency of Response: Occasionally; Estimated Annual Burden: 1,300 hours.

Centers for Disease Control

1. Regulation—Mine Safety and Health Administration 30 CFR Part 11—Respiratory Protective Devices—0920–0109—Part 11 prescribes requirements and procedures which must be met in filing applications for joint approval by MSHA and NIOSH of respirators and modifications of respirators. Application contents, qualify control plans and quality control records are required (30 CFR 11.11, 11.35, 11.41 and 11.43). Respondents: Businesses or other for-profit. Number of Respondents: 39; Frequency of Response: Occasionally; Estimated Annual Burden: 32,175 hours.

2. HIV Seroprevalence Monitoring—NEW—A survey of State and local health Departments, universities, and hospitals will be conducted to gather

UMI

existing seropevalence and incidence data on HIV infection in the U.S. Key information from published and unpublished and surveys/studies will be summarized. Respondents: State or local governments, Nonprofit institutions. Number of Respondents: 125; Frequency of Response: One-time; Estimated Annual Burden: 313 hours.

3. Epidemiologic Study of Male Radiofrequency Heater Operators—NEW—The information collected in this study is needed by NIOSH to investigate the relationship between occupational exposure to radiofrequency radiation and the male reproductive profile. The study will examine this relationship by collecting and analyzing data from approximately 190 volunteer male RF heater sealer operators. Respondents: Individuals or households, Businesses or other for-profit. Number of Respondents: 255; Frequency of Response: 1; Estimated Annual Burden: 140 hours.

OMB Desk Officer: Shanna Koss-McCallum

As mentioned above, copies of the information collection clearance packages can be obtained by calling the Reports Clearance Officer, on one of the following numbers:

PHS: 202–245–2100
SSA: 301–594–5706
OS: 202–245–6511

Written comments and recommendations for the proposed information collections should be sent directly to the appropriate OMB Desk Office designated above at the following address: OMB Reports Management Branch, New Executive Office Building, Room 3208, Washington, DC 20503.

ATTN: (name of OMB Desk Officer).

Date: October 5, 1987.

Raffie Shahrigian,

Acting Deputy Assistant Secretary, Administrative and Management Services.

BILLING CODE 4150–01–M

Food and Drug Administration

[Docket No. 86D–0334]

Guideline Labeling for Estrogen Drug Products

AGENCY: Food and Drug Administration.

ACTION: Notice.

SUMMARY: The Food and Drug Administration (FDA) is announcing the availability of revised guideline texts for professional and patient labeling for prescription estrogen drug products. The revisions reflect important new information about estrogen drug products. Any person may rely upon the revised texts to meet labeling requirements for these drug products.

EFFECTIVE DATES: *Professional Labeling:* Effective October 9, 1987, a person may adopt the revised labeling guideline for estrogen drug products and rely on it to meet FDA's professional labeling requirements for prescription drugs. *Patient Package Insert:* Effective October 9, 1987, a person may rely on the revised guideline to meet the patient package insert requirements for estrogen drug products set forth in § 310.515 (21 CFR 310.515). However, pending finalization of the proposed revision to § 310.515 (published elsewhere in this issue of the **Federal Register**), a person may continue to rely on the previously issued guideline text, which was published in full in the **Federal Register** of July 22, 1977 (42 FR 37645).

ADDRESSES: Written comments to the Dockets Management Branch (HFA–305), Food and Drug Administration, Rm. 4–62, 5600 Fishers Lane, Rockville, MD 20857. Requests for a copy of either guideline to the Consumer and Professional Affairs Branch (HFN–364), Center for Drugs and Biologics, Food and Drug Administration, 5600 Fishers Lane, Rockville, MD 20857, 301–295–8012.

FOR FURTHER INFORMATION CONTACT: Philip Corfman, Center for Drugs and Biologics (HFN–810), Food and Drug Administration, 5600 Fishers Lane, Rockville, MD 20857, 301–443–3510.

SUPPLEMENTARY INFORMATION: FDA is charged with assuring that drugs are safe and effective for their intended uses and that their labeling provides adequate information for such uses and is not false or misleading. The full disclosure of information to physicians and, where appropriate, to patients concerning warnings and contraindications is an important element in the discharge of that responsibility. The statutory scheme anticipates that new information concerning the safety and effectiveness of marketed drugs may require, for example, that FDA prescribe changes in product labeling to reveal limitations on use or warn of previously unanticipated hazards.

Guideline texts for professional labeling and patient package inserts for estrogen drug products were previously published in notices in the **Federal Register** of September 29, 1976 (41 FR 43117), October 29, 1976 (41 FR 47573), and July 22, 1977 (42 FR 37645).

FDA is revising the guideline texts for estrogen drug products to reflect new information about the benefits and risks of estrogen drug use. This information includes information on the use of estrogens to treat postmenopausal osteoporosis as well as findings regarding the use of progestogens with estrogens.

In addition, the guideline patient insert is being revised to make the technical information about the drug's benefits and risks easier to understand and more readable.

The revisions are the product of the combined efforts of FDA scientists in the Center for Drugs and Biologics and the members of FDA's Advisory Committee on Fertility and Maternal Health Drugs. In developing the guideline texts, FDA also considered comments submitted by interested members of the public, including representatives of the health professions, consumer organizations, and the drug industry.

This notice announces the availability of these revised guidelines.

The revised guideline texts are issued under § 10.90(b) (21 CFR 10.90(b)), which provides for the use of guidelines to establish procedures or standards of general applicability that are not legal requirements but are acceptable to the agency. A person who follows the guideline is assured that his or her conduct is acceptable to the agency. FDA advises that compliance with the professional labeling guideline for estrogen drug products satisfies the requirements set forth in the prescription drug labeling regulations in Part 201 of the agency's regulations (21 CFR Part 201); similarly, compliance with the patient package insert guideline satisfies the requirements of § 310.515 (21 CFR 310.515). The guidelines can be relied upon by any person to meet these specific regulatory requirements. Under the provisions of § 314.70 (21 CFR 314.70), a holder of an approved application for a new drug is required to submit a supplemental application to obtain approval for a change in the text of professional labeling or patient package insert. However, under § 314.70(c) (21 CFR 314.70(c)), these guideline labeling texts may be used before approval of supplements covering the revisions provided a supplement for the change is submitted at the time the change is made. An applicant may choose to use a labeling text not covered in one of the guidelines. If an applicant chooses to depart from a guideline, the applicant should discuss the matter further with the agency to prevent expenditures of money and effort for labeling that the agency may later determine to be unacceptable.

Effective October 9, 1987, a person may adopt the guidelines for estrogen drug products that are the subject of this notice.

Interested persons may submit written comments on these guidelines to the Dockets Management Branch (HFA–305) (address above). Comments will be considered in determining whether future changes to the guidelines are necessary. Two copies should be submitted, except that individuals may submit one copy. Comments should be identified with the docket number found in brackets in the heading of this document. The guidelines and comments received may be seen in the office above between 9 a.m. and 4 p.m., Monday through Friday.

Dated: September 8, 1987.

Frank E. Young,

Commissioner of Food and Drugs.

BILLING CODE 4160–01–M

DEPARTMENT OF HOUSING AND URBAN DEVELOPMENT

[Docket No. N–87–1744]

Submission of Proposed Information Collections to OMB

AGENCY: Office of Administration, HUD.

ACTION: Notice.

SUMMARY: The proposed information collection requirements described below have been submitted to the Office of Management and Budget (OMB) for review, as required by the Paperwork Reduction Act. The Department is soliciting public comments on the subject proposals.

ADDRESS: Interested persons are invited to submit comments regarding these proposals. Comments should refer to the proposal by name and should be sent to: John Allison, OMB Desk Officer, Office of Management and Budget, New Executive Office Building, Washington, DC 20503.

FOR FURTHER INFORMATION CONTACT: David S. Cristy, Reports Management Officer, Department of Housing and Urban Development, 451 7th Street SW., Washington, DC 20410, telephone (202) 755–6050. This is not a toll-free number.

SUPPLEMENTARY INFORMATION: The Department has submitted the proposals described below for the collection of information to OMB for review, as required by the Paperwork Reduction Act (44 U.S.C. Chapter 35).

The Notice lists the following information: (1) The title of the information collection proposal; (2) the office of the agency to collect the information; (3) the description of the need for the information and its proposed use; (4) the agency form number, if applicable; (5) what members of the public will be affected by the proposal; (6) how frequently information submissions will be required; (7) an estimate of the total number of hours needed to prepare the information submission; (8) whether the proposal is new, an extension, reinstatement, or revision of an information collection requirement; and (9) the names and telephone numbers of an agency official familiar with the proposal and of the OMB Desk Officer for the Department.

Copies of the proposed forms and other available documents submitted to OMB may be obtained from David S. Cristy, Reports Management Officer for the Department. His address and telephone number are listed above. Comments regarding the proposal should be sent to the OMB Desk Officer at the address listed above.

The proposed information collection requirements are described as follows:

Notice of Submission of Proposed Information Collection to OMB

Proposal: Fiscal Data in Support of Claim for Insurance Benefits (Multifamily Mortgage)
Office: Administration
Description of the need for the information and its proposed use: This form is one of the basic claim documents used by the mortgagee to make a claim for insurance benefits. The data compiled on this form are also used by the General Accounting Office in the audit of HUD records and by the Justice Department in the pursuit and defense of claims by the United States.
Form number: HUD–2742
Respondents: State or Local Governments and Businesses or Other For-Profit
Frequency of respondents: On Occasion
Estimated burden hours: 150
Status: Extension
Contact: Terry L. Bowie, HUD, (202) 755–6448, John Allison, OMB (202) 395–6880

Authority: Sec. 3507 of the Paperwork Reduction Act, 44 U.S.C. 3507; Sec. 7(d) of the Department of Housing and Urban Development Act 42 U.S.C. 3535(d).

Dated: September 30, 1987

Notice of Submission of Proposed Information Collection to OMB

Proposal: Section 8 Moderate Rehabilitation—Single Room Occupancy Program
Office: Housing
Description of the need for the information and its proposed use: The information will be used to assist the Department in selecting applicants which meet program requirements and demonstrate the greatest need for the Moderate Rehabilitation Single-Room Occupancy (SRO) Program funds. The purpose of this program is to provide rental assistance for homeless individuals in rehabilitated SRO housing. The assistance will be in the form of rental assistance under the Section 8 Housing Assistance Payments Program.
Form number: None
Respondents: State or Local Governments and Non-Profit Institutions
Frequency of response: On Occasion
Estimated burden hours: 2,500
Status: New
Contact: Lawrence Goldberger, HUD, (202) 755–5720, John Allison, OMB, (202) 395–6880

Authority: Sec. 3507 of the Paperwork Reduction Act, 44 U.S.C. 3507; Sec. 7(d) of the Department of Housing and Urban Development Act 42 U.S.C. 3535(d).

Dated: October 2, 1987.

DEPARTMENT OF THE INTERIOR

Bureau of Land Management

[CA–930–07–4332–13; FES 87–45]

Availability of Final Environmental Impact Statement; Arcata Resource Area Wilderness, Ukiah District, CA

AGENCY: Bureau of Land Management, Interior.

ACTION: Notice of availability of final Environmental Impact Statement (EIS) for the Eden Valley and Thatcher Ridge Wilderness Proposals.

SUMMARY: This EIS assesses the environmental consequences of managing two Wilderness Study Areas (WSAs) as wilderness or non-wilderness. The alternatives assessed in this EIS include: (1) A "no wilderness/no action" alternative for each WSA and (2) an " all wilderness" alternative for each WSA.

The names of the two WSAs analyzed in the EIS, their total acreage, and the proposed actions for each are as follows:

Eden Valley—6,674 acres; 6,674 acres nonsuitable.
Thatcher Ridge–17,187 acres; 17,187 acres nonsuitable.

The Bureau of Land Management wilderness proposals will ultimately be forwarded by the Secretary of the Interior to the President and from the President to Congress. The final decision on wilderness designation rests with Congress.

In any case, no final decision on these proposals can be made by the Secretary during the 30 days following the filing of this EIS. This complies with the Council on Environmental Quality Regulations, 40 CFR 1506.10b(2).

SUPPLEMENTARY INFORMATION: A limited number of individual copies of the EIS may be obtained from the Area Manager, Arcata Resources Area, 1125 16th Street, P.O. Box 1112, Arcata, California 95521. Copies are also available for inspection at the following locations:

Department of the Interior, Bureau of Land Management, 18th and C Streets NW., Washington, DC 20240

or

Bureau of Land Management, California State Office, 2800 Cottage Way, Room E–2841, Sacramento, CA 95825

or

Bureau of Land Management, Ukiah District Office, 555 Leslie Street, Ukiah, CA 95482–5599.

FOR FURTHER INFORMATION CONTACT: Earle G. Curran, Outdoor Recreation Planner, Ukiah District Office, 555 Leslie Street, Ukiah, CA 95482–5599.

Dated: September 30, 1987.

Availability of Draft Environmental Impact Statement; Arizona Mohave Wilderness Study Area

AGENCY: Bureau of Land Management (BLM), Interior.

ACTION: Notice of Availability of Arizona Mohave Draft Wilderness Environmental Impact Statement.

SUMMARY: The draft Arizona Mohave Wilderness Environmental Impact Statement asseses the environmental consequences of managing 15 wilderness study areas as wilderness or non-wilderness. The alternatives assessed include: (1) An "All Wilderness Alternative" for each wilderness study area; (2) a "No Wilderness Alternative" for each wilderness study area; (3) "Partial Wilderness Alternative" for five wilderness study areas; and (4) "Enhanced Wilderness Alternative" for two wilderness study areas.

The names of the wilderness study areas, their total acreages, and the proposed actions for each are as follows:

WSA	Total acres	Acres recommended	
		Suitable	Nonsuitable
Van Deeman	1,510	0	1,510
Mockingbird	5,815	[redacted]	5,815
Black Mountains North	19,900	18,400	1,500
Burns Spring	30,600	23,000	7,600
Mount Tipton	34,060	28,170	5,890
Grapevine Wash	2,200	[redacted]	2,200
Grand Wash Cliffs	12,176	0	12,176
Mount Davis	2,560	0	2,560
Mount Nutt	29,190	27,210	1,980
Warm Springs	114,800	90,600	24,200
South Bradshaws East	640	0	640
Sierra Estrella	14,830	14,830	[redacted]
Ragged Top	4,460	0	4,460
Apache Box	932	0	932
Hoverrocker	2,791	0	2,791
Total	276,464	202,210	74,254

Public Participation

Copies of the draft Arizona Mohave Wilderness Environmental Impact Statement will be sent to all individuals, government agencies, and groups who have expressed interest in the Arizona Mohave Wilderness Study Areas. In addition, a limited number of copies are available upon request from the Phoenix District Office, 2015 West Deer Valley Road, Phoenix, Arizona 85027; Safford District Office, 424 East 4th Street, Safford, Arizona 85546; and Kingman Resource Area Office, 2475 Beverly Avenue, Kingman, Arizona 86401.

Public reading copies may be reviewed at the following locations:

Bureau of Land Management, Office of Public Affairs, Interior Building, 18th and C Streets NW., Washington, DC 20240.

Bureau of Land Management, Arizona State Office, 3707 North 7th Avenue, Phoenix, Arizona 85014.

Phoenix District Office, Safford District Office, and Kingman Resource Area Office (addresses above).

The draft EIS will be available for review through January 8, 1988. Written comments should be sent by this date to EIS Team Leader, Bureau of Land Management, Phoenix District Office, 2015 West Deer Valley Road, Phoenix, Arizona 85027.

Oral or written comments will also be received at the formal public hearings to be held as follows:

7:00 P.M., Tuesday, November 17, 1987—Conference Room Courthouse Annex, 5th and Leonard, Clifton, Arizona
7:00 P.M., Wednesday, November 18, Meeting Room, Red Barn Steakhouse, 708 Silver Heights Boulevard, Silver City, New Mexico
7:00 P.M., Tuesday, December 1, 1987—Kingman Resource Area Office, 2475 Beverly Avenue, Kingman, Arizona
7:00 P.M., Wednesday, December 2, 1987—Maricopa Board of Supervisors Auditorium, 205 West Jefferson, Phoenix, Arizona

All comments received during the review period relating to the adequacy of the draft EIS (whether written or oral) will be considered in preparing the final EIS.

For further information contact: Bill Carter, EIS Team Leader, Bureau of Land Management, Phoenix, District Office, Phoenix, Arizona 85027; Telephone (602) 863–4464.

Availability of Final Environmental Impact Statement; Wilderness Proposals; Three Study Areas in Boise and Shoshone District, ID

AGENCY: Bureau of Land Management, Department of the Interior.

ACTION: Notice of availability of a final Environmental Impact Statement (EIS) for the wilderness proposals on three Wilderness Study Areas (WSAs) in the Boise and Shoshone District of Idaho.

SUMMARY: The Jarbidge Wilderness EIS assesses the environmental consequences of managing three WSAs as wilderness, non-wilderness, or partial wilderness, and of managing parts of two of those WSAs under wild river designation. The alternatives assessed in the Jarbidge Wilderness EIS include: (1) A "no wilderness" alternative for each WSA; (2) an "all wilderness" alternative for each WSA; (3) a "partial wilderness" alternative for the Bruneau River-Sheep Creek WSA, the King Hill Creek WSA, and two "partial wilderness" alternatives for the Jarbidge River WSA; and (4) a "wild river" alternative for the Bruneau River/Sheep Creek and Jarbidge River WSAs. The names of the three WSAs considered in the Jarbidge Wilderness EIS, their total acreage, and the proposed action for each are as follows:

Bruneau River/Sheep Creek

104,406 acres; the canyons, comprising 20,800 acres, are recommended as suitable for wilderness designation.

Jarbidge River

75,118 cres; the canyons, comprising 16,740 acres, are recommended as suitable for wilderness designation.

King Hill Creek

29,309 acres; all non-suitable for wilderness designation.

Bureau of Land Management wilderness proposals will ultimately be forwarded by the Secretary of Interior and President to Congress. The final decision on wilderness designation rests with Congress.

In any case, no final decision on these proposals can be made during the 30 days following the publication in the Federal Register of the Environmental Protection Agency's notice of the filing of this EIS. This complies with the Council on Environmental Quality Regulations 40 CFR 1506.10b(2).

SUPPLEMENTARY INFORMATION: A limited number of individual copies of this EIS may be obtained from the District Manager, Boise District Office, 3948 Development Avenue, Boise, Idaho 83705. Copies are available for inspection at the following locations:

Department of the Interior, Bureau of Land Management, 18th & "C" Streets NW., Washington, DC 20240

BILLING CODE 4310–HC–M

[Alaska AA–48225–L]

Proposed Reinstatement of a Terminated Oil and Gas Lease; Alaska

In accordance with Title IV of the Federal Oil and Gas Royalty Management Act (Pub. L. 97–451), a petition for reinstatement of oil and gas lease AA–48225–L has been received covering the following lands:

Copper River Meridian, Alaska

T. 9 N., R. 7 W.,
Sec. 9, SE¼NE¼.
(40 acres)

The proposed reinstatement of the lease would be under the same terms and conditions of the original lease, except the rental will be increased to $5 per acre per year, and royalty increased to 16⅔ percent. The $500 administrative fee and the cost of publishing this Notice have been paid. The required rentals and royalties accruing from February 1, 1985, the date of termination, have been paid.

Having met all the requirements for reinstatement of lease AA–48225–L as set out in section 31 (d) and (e) of the Mineral Leasing Act of 1920 (30 U.S.C. 188), the Bureau of Land Managment is proposing to reinstate the lease, effective February 1, 1985, subject to the terms and conditions cited above.

Dated: September, 1987.

Kay F. Kletka,

Chief, Branch of Mineral Adjudication.

Colorado; Filing of Plats of Survey

September 28, 1987.

The plats of survey of the following described land, will be officially filed in the Colorado State Office, Bureau of Land Management, Lakewood, Colorado, effective 10:00 a.m., November 23, 1987.

The plat representing the dependent resurvey of a portion of the east boundary and the survey of islands designated as Tracts 37, 38, and 39, T. 6 S., R. 95 W., Sixth Principal Meridian, Colorado, Group No. 719, was accepted September 21, 1987.

The plat representing the dependent resurvey of a portion of the east, west, and north boundaries and the subdivisional lines, and the survey of the subdivision of certain sections and of an island designated as Tract 37, T. 7 S., R. 95 W., Sixth Principal Meridian, Colorado, Group No. 719, was accepted September 21, 1987.

The plat representing the dependent resurvey of the Twelfth Guide Meridian West (west boundary) and the subdivisional lines and the survey of islands designated as Tracts 37, 38, 39, 40, and 41, T. 8 S., R. 96 W., Sixth Principal Meridian, Colorado, Group No. 719, was accepted September 21, 1987.

These surveys were executed to meet certain administrative needs of this Bureau.

All inquiries about this land should be sent to the Colorado State Office, Bureau of Land Management, 2805 Youngfield Street, Lakewood, Colorado 80215.

Jack A. Eaves,

Chief, Cadastral Surveyor for Colorado.

BILLING CODE 4310–JB–M

Bureau of Reclamation

Garrison Diversion Unit, Pick-Sloan Missouri Basin Program, North Dakota

AGENCY: Bureau of Reclamation, Department of the Interior.

ACTION: Notice of delay in completion of a final supplemental environmental statement.

SUMMARY: On August 12, 1986, the Bureau of Reclamation, Department of the Interior, published a Notice of Intent (51 FR 28891), to prepare a Supplement to the Draft Supplemental Environmental Statement (DES 86–9) for the Garrison Diversion Unit in North Dakota in compliance with the National Environmental Policy Act (NEPA).

The Draft Supplement to the Draft Supplemental Environmental Statement (DES 68–51) was filed with the Environmental Protection Agency on December 30, 1986, and the Notice of Availability was published on January 2, 1987 (52 FR 178). The draft supplement amended the previous Draft Supplemental Environmental Statement (DES 86–9) to address changes in some of the features due to the Garrison Diversion Unit Reformulation Act of 1986.

The draft supplement (DES 86–51) included the following: description of changes in the plan, additional studies required, and items deferred until a comprehensive report on the James River is completed and submitted to the Congress.

The original plan was to prepare one final supplemental environmental statement to respond to comments received on both DES 86–51 and DES 86–9 which would be filed as the Final Supplemental Environmental Statement for the Garrison Diversion Unit.

The Bureau of Reclamation is now providing notice of a delay in the preparation of that Final Supplemental Environmental Statement. In the interim, further analysis will be conducted on several issues to be included in the James River Comprehensive Report including the location of Sykeston Canal and meeting water quality standards. The comments received on DES 86–9 and DES 86–51 will be considered in the analysis. Upon completion of the analysis, the appropraite NEPA document will be prepared and public involvement processes continued. A summary of all comments received to date will be sent to all entities/individuals on the Garrison Divesion Unit mailing list within the next 45 days.

FOR FURTHER INFORMATION CONTACT: Timothy J. Keller, Chief, Technical Support Division, Missouri-Souris Projects Office, Bureau of Reclamation, P.O. Box 1017, Bismarck, ND 58502, (701) 255–4011, extension 541, or Robert L. Schroeder, Regional Environmental Affairs Officer, Missouri Basin Region, Bureau of Reclamation, P.O. Box 36900, Billings, MT 59107–6900, (406) 657–6558.

Date: October 5, 1987.

C. Dale Duvall,

Commissioner.

[FR Doc. 87–23422 Filed 10–8–87; 8:45 am]

BILLING CODE 4310–09–M

National Park Service

Intention to Negotiate Concession Permit; Robert Shular

Pursuant to the provisions of section 5 of the Act of October 9, 1965 (79 Stat. 969; 16 U.S.C. 20), public notice is hereby given that sixty (60) days after the date of publication of this notice, the Department of the Interior, through the Director of the National Park Service, proposes to negotiate a concession permit with Robert Shular authorizing him to continue to provide wood, ice and soft drink sales for the public within Great Smoky Mountains National Park for a period of four (4) years from January 1, 1988, through December 31, 1991.

This permit renewal has been determined to be categorically excluded from the procedural provisions of the National Environmental Policy Act and no environmental document will be prepared.

The foregoing concessioner has performed its obligations to the satisfaction of the Secretary under an existing permit which expires by limitation of time on December 31, 1987, and therefore, pursuant to the Act of October 9, 1965, as cited above, is entitled to be given preference in the renewal of the permit and in the negotiation of a new permit as defined in 36 CFR 51.5.

The Secretary will consider and evaluate all proposals received as a result of this notice. Any proposal, including that of the existing concessioner, must be postmarked or hand delivered on or before the sixtieth (60th) day following publication of this notice to be considered and evaluated. Interested parties should contact the Regional Director, Southeast Region, 75 Spring Street, SW., Atlanta, Georgia 30303, for information as to the requirements of the proposed permit.

C.W. Ogle,

Acting Regional Director, Southeast Region.

INTERSTATE COMMERCE COMMISSION

Motor Carriers; Intent To Engage in Compensated Intercorporate Hauling Operations

October 6, 1987.

This is to provide notice as required by 49 U.S.C. 10524(b)(1) that the named corporations intend to provide or use compensated intercorporate hauling operations as authorized in 49 U.S.C. 10524(b).

A. 1. Parent corporation and address of principal office: Avery Coal Co., Inc., P.O. Box 251, Philipsburg, PA 16866, a Pennsylvania Corporation.

2. Wholly-owned subsidiary which will participate in the operations, and State of incorporation: Wallaceton Coal Trucking, Inc., P.O. Box 251, Philipsburg, PA 16866, a Pennsylvania Corporation.

B. 1. Parent corporation and address of principal office: Hexcel Corporation, 11555 Dublin Blvd., P.O. Box 2312, Dublin, CA 94568-0705.

2. Wholly-owned subsidiaries which will participate in the operations, and State(s) of incorporation:

(i) Hexcel/Hi-Tech, Nevada
(ii) Knytex, Minnesota

Noreta R. McGee,

Secretary.

BILLING CODE 7035-01-M

[Finance Docket No. 31115]

Boston and Maine Corp. and Delaware and Hudson Railway Co.; Lease and Trackage Rights Exemption; Exemption

Boston and Maine Corporation (B&M), Delaware and Hudson Railway Company (D&H), and Springfield Terminal Railway Company (ST) filed a notice of exemption for B&M to lease to ST B&M's Connecticut River Maine Line between: (a) Milepost S-3589, at Greenfield, MA, and milepost S-49.67, at East Northfield, MA, a distance of approximately 13.8 miles; and (b) milepost S-60.32, at Brattleboro, VT, and milepost S-109.11, at Windsor, VT, a distance of approximately 48.8 miles.

In addition, B&M will grant ST the right to use the trackage rights of B&M over the following lines of the Central Vermont Railway, Inc. (CV): (a) Between B&M milepost S-109.11/CV milepost 0.70 at Windsor, VT, and B&M milepost S-123.19/CV milepost 14.80, at White River Junction, VT, a distance of approximately 14.1 miles; and (b) between CV milepost 110.60, at East Northfield, MA, and CV milepost 120.70, at Brattleboro, VT, a distance of approximately 10.1 miles.

In order to facilitate the operations of ST, B&M and D&H are granting ST the right to operate over the lines of B&M and D&H between North Pownal, VT, and Crescent, NY.

B&M, D&H, and ST are wholly-owned subsidiaries of Guilford Transportation Industries, Inc. (GTI), which also owns the Maine Central Railroad Company (MEC). As a result of the proposed transaction, it is intended that ST will provide service as good as, or better than, service now provided.

Since B&M, D&H, and ST are members of the same corporate family, the lease falls within the class of transactions that are exempt from the prior review requirements of 49 U.S.C. 11343. *See* 49 CFR 1180.2(d)(3). The carriers anticipate that the transaction will not result in adverse changes in service levels, significant operational changes, or a change in competitive balance with carriers operating outside the corporate family.

Any employee affected by the lease transaction would normally be protected by the labor conditions set forth in *Mendocino Coast Ry., Inc.—Lease and Operate*, 354 I.C.C. 732 (1978), and 360 I.C.C. 653 (1980) (*Mendocino*). Any employees affected by the trackage rights transactions would normally be protected by the labor conditions set forth in *Norfolk and Western Ry. Co.—Trackage Rights—BN*, 354 I.C.C. 605 (1978) (*Norfolk and Western*), as modified in *Mendocino, supra*, 360 I.C.C. 653 (1980). These conditions satisfy the statutory requirements of 49 U.S.C. 10505(g)(2) for the respective transactions. However, in a decision in Finance Docket No. 30965, *Delaware and Hudson Railway Company—Lease and Trackage Rights Exemption—Springfield Terminal Railway Company* (not printed), served May 18, 1987, the Commission set for modified procedure a series of notices filed by the GTI carriers because labor interests raised issues related to the level of employee protection for the transactions. The Commission asked the parties to that proceeding to address several issues and present additional evidence, including similar existing and future notices and transactions, such as this one, involving the GTI carriers.

Since the May 18, 1987 decision, the Commission has published in the **Federal Register** several related notices of exemption (Finance Docket Nos. 31015, 31023, 31086, and 31103) by various GTI carriers and indicated that the underlying transactions will be considered in the Finance Docket No. 30965 proceeding. The Commission will issue a separate decision determining whether this notice will be considered in that proceeding.

If, prior to the Commission's determination of the appropriate level of labor protection for these GTI transactions, B&M and D&H consummate this transaction and provide employees with *Mendocino* protection, they do so at their own risk. Should the Commission subsequently

VOL
52
ISS
196
OC
9
1987
UMI

determine that a higher level of protection is required, B&M and D&H will be required to provide employees with that greater protection.

Petitions to revoke the exemption under 49 U.S.C. 10505(d) may be filed at any time. The filing of petitions to revoke will not stay the transaction.

Decided: October 5, 1987.

By the Commission, Jane F. Mackall, Director, Office of Proceedings.

Noreta R. McGee,

Secretary.

BILLING CODE 7035-01-M

DEPARTMENT OF JUSTICE

Antitrust Division

[Civil No. C 80-1893]

Proposed Modification of Final Judgment; First National Supermarkets, Inc., et al.

Notice is hereby given that Fisher Foods, Inc. ("Fisher") has filed with the United States District Court for the Northern District of Ohio a motion to modify the final judgment ("judgment") in *United States v. First National Supermarkets, Inc. et al.*, Civil No. C 80-1893; and the Department of Justice ("Department"), in a stipulation also filed with the court, has consented to modification of the judgment, but has reserved the right to withdraw its consent pending receipt of public comments. The complaint in this case (filed on October 10, 1980) alleged that Fisher, along with two other firms, conspired to fix prices of grocery products and meat in Cuyahoga County, Ohio. The judgment (entered on November 23, 1985) enjoins Fisher, among other things, from continuing to carry out any of the agreements which constituted the alleged conspiracy. The judgment also prohibits Fisher from being a member of the Association of Stop-N-Shop Super Markets.

The Department has filed with the court a memorandum setting forth the reasons why the Department believes that modification of the judgment to permit Fisher to be a member of Stop-N-Shop would serve the public interest. Copies of the complaint and judgment, Fisher's motion papers, the stipulation containing the Government's consent, the Department's memorandum and all further papers filed with the court in connection with this motion will be available for inspection at Room 3233, Antitrust Division, Department of Justice, 10th Street and Pennsylvania Avenue NW., Washington, DC 20530 (telephone 202-633-2481), and at the Office of the Clerk of the United States District Court for the Northern District of Ohio, Eastern Division, 201 Superior Avenue, Cleveland, Ohio 44114. Copies of any of these materials may be obtained from the Antitrust Division upon request and payment of the copying fee set by Department of Justice regulations.

Interested persons may submit comments regarding the proposed modification of the judgment to the Department. Such comments must be received within the sixty day period established by court order, and will be filed with the court. Comments should be addressed to John A. Weedon, Chief, Cleveland Field Office, Antitrust Division, United States Department of Justice, 995 Celebrezze Federal Building, Cleveland, Ohio 44199 (telephone 216-522-4070).

Joseph H. Widmar,

Director of Operations, Antitrust Division.

BILLING CODE 4410-01-M

National Cooperative Research Act of 1984; Semiconductor Research Corp.

Notice is given that, pursuant to section 6(a) of the National Cooperative Research Act of 1984, Pub. L. 98–462 ("Act"), the Semiconductor Research Corporation ("SRC") has filed a written notification simultaneously with the Attorney General and the Federal Trade Commission disclosing certain changes in the membership of SRC. The changes consist of the addition of the following companies to the Semiconductor Equipment and Materials Institute, Inc. ("SEMI") Chapter of the SRC:

AG Associates
Coors Ceramics
SILVACO Data Systems
Technology Modeling Associates, Inc.

Furthermore, Monolithic Memories, Incorporated has merged into Advanced Micro Devices, Incorporated, and Machine Intelligence Corp. and Micronix Corporation have ceased doing business.

The SRC filed its notification of these membership changes for the purpose of extending the Act's provisions limiting the recovery of antitrust plantiffs to actual damages under specified circumstances. Pursuant to section 6(b) of the Act, the identities of the parties to SRC and SRC's general areas of planned activity are given below.

SRC is a joint venture which, with the deletion and addition of the previously identified companies to the SRC and the SEMI Chapter, is comprised of the following members:

Advanced Micro Devices, Incorporated
Applied Materials, Inc.
AT&T Technologies, Incorporated
Control Data Corporation
Digital Equipment Corporation
E.I. du Pont de Nemours & Company
Eastman Kodak Company
Eaton Corporation
E-Systems Inc.
GCA Corporation
General Electric Company
General Motors Corporation
Goodyear Aerospace Corporation
GTE Laboratories, Incorporated
Harris Corporation
Hewlett-Packard Company
Honeywell, Incorporated
IBM Corporation
Intel Corporation
LSI Logic Corporation
Monsanto Company
Motorola, Incorporated
National Semiconductor Corporation
Perkin-Elmer Company
RCA Corporation
Rockwell International Corp.

SEMI Chapter, the members of which are the following:

AG Associates
ASYST Technologies, Inc.
Coors Ceramics
Dynapert/Amedyne
Eagle-Picher Ind. Inc.
Emergent Technologies Corporation
FEP Analytic (division of Verity Instruments, Inc.)
FSI Corporation
Genus, Inc.
Gryphon Products
Hercules Specialty Chemicals Company
Ion Beam Technologies, Inc.
Ion Implant Services
Lehighton Electronics, Inc.
Logical Solutions Technologies, Inc.
MacDermid, Inc.
Machine Technology, Inc.,
MG Industries/Scientific Gases
Micrion Corporation
Micromanipulator Company, Inc.
Oneac Corporation
Optical Specialties, Inc.
Pacific Western Systems, Inc.
Peak Systems, Inc.
PT Analytic, Incorporated
Sage Enterprises, Inc.
The SEMI Group, Inc.
Silsco, Inc.
SILVACO Data Systems
Solid State Equipment Corp.
Technology Modeling Associates, Inc.
Thermco Systems, Inc.
UTI Instruments Company
VLSI Standards, Inc.
XMR, Inc.
Silicon Systems, Incorporated
Texas Instruments, Incorporated
Union Carbide Corporation
Varian Associates, Incorporated
Westinghouse Electric Corporation
Xerox Corporation

SRC's purpose is to plan, promote, coordinate, sponsor, and conduct research supportive of the semiconductor industry and directed toward:

1. Increasing knowledge of semiconductor materials and phenomena, and of related scientific and engineering subjects that are required for the useful application of semiconductors;

2. Developing new and more efficient designs and manufacturing technologies for semiconductor devices;

3. Identifying directions, limits, opportunities, and problems in generic semiconductor technologies;

4. Increasing the number of scientists and engineers proficient in research, development, and manufacture of semiconductor devices;

5. Increasing industry-university ties, establishing university semiconductor research centers with major long-term research thrusts, and developing university semiconductor research activities with more precisely defined, short-term, objectives;

6. Developing more relevant graduate school education and a larger supply of graduate students in areas related to semiconductor technology;

7. Increasing the ability of universities to attract and retain competent faculty in the semiconductor field;

8. Decreasing fragmentation and redundancy in United States semiconductor research;

9. Establishing advanced research efforts for critical semiconductor technology areas that are beyond the individual resources of many SRC members;

10. Promoting efficient communication of research results to SRC members and to the United States semiconductor community as a whole.

Joseph H. Widmar,
Director of Operations, Antitrust Division.

BILLING CODE 4410–01–M

Drug Enforcement Administration

Manufacturer of Controlled Substances; Registration

By Notice dated July 22, 1987, and published in the **Federal Register** on July 28, 1987; (52 FR 28202), Eli Lilly and Company, 1249 South White River Parkway East Drive, Building 80, Indianapolis, Indiana 46285, made application to the Drug Enforcement

Administration to be registered as a bulk manufacturer of Nabilone (7379), a basic class of controlled substance listed in Schedule II.

No comments or objections have been received. Therefore, pursuant to section 303 of the Comprehensive Drug Abuse Prevention and Control Act of 1970 and Title 21, Code of Federal Regulations, section 1301.54(e), the Deputy Assistant Administrator hereby orders that the application submitted by the above firm for registration as a bulk manufacturer of the basic class of controlled substance listed above is granted.

Gene R. Haislip,

Deputy Assistant Administrator, Office of Diversion Control, Drug Enforcement Administration.

Dated: September 22, 1987.

DEPARTMENT OF LABOR

Office of the Secretary

Agency Recordkeeping/Reporting Requirements Under Review by the Office of Management and Budget (OMB)

Background

The Department of Labor, in carrying out its responsibililties under the Paperwork Reduction Act (44 U.S.C. Chapter 35), considers comments on the reporting and recordkeeping requirements that will affect the public.

List of Recordkeeping/Reporting Requirements Under Review

As necessary, the Department of Labor will publish a list of the Agency recordkeeping/reporting requirements under review by the Office of Management and Budget (OMB) since the last list was published. The list will have all entries grouped into new collections, revisions, extensions, or reinstatements. The Departmental Clearance Officer will, upon request, be able to advise members of the public of the nature of the particular submission they are interested in. Each entry may contain the following information:

The Agency of the Department issuing this recordkeeping/reporting requirement.

The title of the recordkeeping/reporting requirement.

The OMB and Agency identification numbers, if applicable.

How often the recordkeeping/reporting requirement is needed.

Who will be required to or asked to report or keep records.

Whether small businesses or organizations are affected.

An estimate of the total number of hours needed to comply with the recordkeeping/reporting requirements.

The number of forms in the request for approval, if applicable.

An abstract describing the need for and uses of the information collection.

Comments and Questions

Copies of the recordkeeping/reporting requirements may be obtained by calling the Departmental Clearance Officer, Paul E. Larson, telephone (202) 523-6331. Comments and questions about the items on this list should be directed to Mr. Larson, Office of Information Management, U.S. Department of Labor, 200 Constitution Avenue, NW., Room N-1301, Washington, DC 20210. Comments should also be sent to the Office of Information and Regulatory Affairs, Attn: OMB Desk Officer for (BLS/DM/ESA/ETA/OLMS/MSHA/OSHA/PWBA/VETS), Office of Management and Budget, Room 3208, Washington, DC 20503 (Telephone (202) 395-6880).

Any member of the public who wants to comment on a recordkeeping/reporting requirement which has been submitted to OMB should advise Mr. Larson of this intent at the earliest possible date.

Revision

Employment and Training Administration

BILLING CODE 4510–30–M

Employment Standards Administration, Wage and Hour Division

Minimum Wages for Federal and Federally Assisted Construction; General Wage Determination; Decisions

General wage determination decisions of the Secretary of Labor are issued in accordance with applicable law and are based on the information obtained by the Department of Labor from its study of local wage conditions and data made available from other sources. They specify the basic hourly wage rates and fringe benefits which are determined to be prevailing for the described classes of laborers and mechanics employed on construction projects of a similar character and in the localities specified therein.

The determinations in these decisions of prevailing rates and fringe benefits have been made in accordance with 29 CFR Part 1, by authority of the Secretary of Labor pursuant to the provisions of the Davis-Bacon Act of March 3, 1931, as amended (46 Stat. 1494, as amended, 40 U.S.C. 276a) and of other Federal statutes referred to in 29 CFR Part 1, Appendix, as well as such additional statutes as may from time to time be enacted containing provisions for the payment of wages determined to be prevailing by the Secretary of Labor in accordance with the Davis-Bacon Act. The prevailing rates and fringe benefits determined in these decisions shall, in accordance with the provisions of the foregoing statutes, constitute the minimum wages payable on Federal and federally assisted construction projects to laborers and mechanics of the specified classes engaged on contract work of the character and in the localities described therein.

Good cause is hereby found for not utilizing notice and public comment procedure thereon prior to the issuance of these determinations as prescribed in 5 U.S.C. 553 and not providing for delay in the effective date as prescribed in that section, because the necessity to issue current construction industry wage determinations frequently and in large volume causes procedures to be impractical and contrary to the public interest.

General wage determination decisions, and modifications and supersedes decisions thereto, contain no expiration dates and are effective from their date of notice in the **Federal Register**, or on the date written notice is received by the agency, whichever is earlier. These decisions are to be used in accordance with the provisions of 29 CFR Parts 1 and 5. Accordingly, the applicable decision, together with any modifications issued, must be made a part of every contract for performace of the described work within the geographic area indicated as required by an applicable Federal prevailing wage law and 29 CFR Part 5. The wage rates an fringe benefits, notice of which is published herein, and which are contained in the Government Printing Office (GPO) document entitled "General Wage Determinations Issued Under The Davis-Bacon and Related Acts," shall be the minimum paid by contractors and subcontractors to laborers and mechanics.

Any person, organization, or governmental agency having an interest in the rates determined as prevailing is encouraged to submit wage rate and fringe benefit information for consideration by the Department. Further information and self-explanatory forms for the purpose of submitting this data may be obtained by writing to the U.S. Department of Labor, Employment Standards Administration, Wage and Hour Division, Division of Wage Determinations, 200 Constitution Avenue, NW, Room S–3504, Washington, DC 20210.

New General Wage Determination Decisions

The numbers of the decisions being added to the Government Printing Office document entitled "General Wage Determinations Issued Under the Davis-Bacon and Related Acts" are listed by Volume, State, and page number(s).

General Wage Determination Publication

General wage determinations issued under the Davis-Bacon and related Acts, including those noted above, may be found in the Government Printing Office (GPO) document entitled "General Wage Determinations Issued Under the Davis-Bacon and Related Acts". This publication is available at each of the 50 Regional Government Depository Libraries and many of the 1,400 Government Depository Libraries across the country. Subscriptions may be purchased from: Superintendent of Documents, U.S. Government Printing Office, Washington, DC 20402, (202) 783–3238.

When ordering subscription(s), be sure to specify the State(s) of interest, since subscriptions may be ordered for any or all of the three separate volumes, arranged by State. Subscriptions include an annual edition (issued on or before Janaury 1) which includes all current general wage determinations for the States covered by each volume. Throughout the remainder of the year, regular weekly updates will be distributed to subscribers.

Signed at Washington, DC, this 2nd day of October, 1987.

Alan L. Moss,

Director, Division of Wage Determinations.

BILLING CODE 4510–27–M

Mine Safety and Health Administration

[Docket No. M–87–191–C]

BethEnergy Mines Inc.; Petition for Modification of Application of Mandatory Safety Standard

BethEnergy Mines Inc., P.O. Box 232, Jenkins, Kentucky 41537 has filed a petition to modify the application of 30 CFR 75.326 (aircourses and belt haulage entries) to its Mine No. 26–L (I.D. No. 15–11726) located in Pike County, Kentucky. The petition is filed under section 101(c) of the Federal Mine Safety and Health Act of 1977.

A summary of the petitioner's statements follows:

1. The petition concerns the requirement that entries used as intake and return aircourses by separated from belt haulage entries, and that belt haulage entries not be used to ventilate active working places.

2. Petitioner states that application of the standard would result in a diminution of safety to the miners affected because the air used to ventilate bleeder entries and gob areas would be directed over the headgate operators of the longwall section; it would eliminate one of the two escapeways from the headgate area of the longwall section; and the concentration of respirable dust in the mine atmosphere at the headgate area of the longwall section would exceed the levels that are required to be maintained.

3. As an alternate method, petitioner proposes to use belt air to ventilate active working places and that—

(a) Air used to ventilate the bleeder entries and gob areas will be ventilated away from the headgate of the longwall to the return;

(b) Two separate and distinct travelable passageways maintained to insure passage at all times of any person, including disabled persons, and which are to be designated as escapeways, which are ventilated with intake air, will be provided; and

(c) The concentration of respirable dust to which the headgate operators will be exposed will be reduced.

4. Petitioner states that the proposed alternate method will provide the same degree of safety for the miners affected as that afforded by the standard.

Request for Comments

Persons interested in this petition may furnish written comments. These comments must be filed with the Office of Standards, Regulations and Variances, Mine Safety and Health Administration, Room 627, 4015 Wilson Boulevard, Arlington, Virginia 22203. All comments must be postmarked or received in that office on or before November 9, 1987. Copies of the petition are available for inspection at that address.

Patricia W. Silvey,

Acting Associate Assistant Secretary for Mine Safety and Health.

Date: September 30, 1987

BILLING CODE 4510–43–M

[Docket No. M–87–204–C]

J.J.G. Coal Co.; Petition for Modification of Application of Mandatory Safety Standard

J.J.G. Coal Company, 523 E. Market Street, Williamstown, Pennsylvania 17098 has filed a petition to modify the application of 30 CFR 75.1400 (hoisting equipment; general) to its Whites Vein Slope (I.D. No. 36–06815) located in Schuylkill County, Pennsylvania. The petition is filed under section 101(c) of the Federal Mine Safety and Health Act of 1977.

A summary of the petitioner's statements follows:

1. The petition concerns the requirement that cages, platforms or other devices which are used to transport persons in shafts and slopes be equipped with safety catches or other approved devices that act quickly and effectively in an emergency.

2. Petitioner states that no such safety catch or device is available for the steeply pitching and undulating slopes with numerous curves and knuckles present in the main haulage slopes of this anthracite mine.

3. Petitioner further believes that if "makeshift" safety devices were installed they would be activated on knuckles and curves when no emergency existed and cause a tumbling effect on the conveyance.

4. As an alternate method, petitioner proposes to operate the man cage or steel gunboat with secondary safety connections securely fastened around the gunboat and to the hoisting ropes above the main connnecting device. The hoisting ropes would have a factor of safety in excess of the design factor as determined by the formula specified in the American National Standard for Wire Rope for Mines.

5. Petitioner states that the proposed alternate method will provide the same degree of safety for the miners affected as that afforded by the standard.

Request for Comments

Persons interested in this petition may furnish written comments. These comments must be filed with the Office of Standards, Regulations and Variances, Mine Safety and Health Administration, Room 627, 4015 Wilson Boulevard, Arlington, Virginia 22203. All comments must be postmarked or received in that office on or before November 9, 1987. Copies of the petition are available for inspection at that address.

BILLING CODE 4510-43-M

[Docket No. M-87-199-C]

Laurel Ridge Coal Co.; Petition for Modification of Application of Mandatory Safety Standard

Laurel Ridge Coal Company, 109 Broad Bottom Road, Pikeville, Kentucky 41501 has filed a petition to modify the application of 30 CFR 75.503 (permissible electric face equipment; maintenance) to its No. 22 Mine (I.D. No. 15-16119) located in Pike County, Kentucky. The petition is filed under section 101(c) of the Federal Mine Safety and Health Act of 1977.

A summary of the petitioner's statements follows:

1. The petition concerns the use of a locked padlock to secure battery plugs to machine-mounted battery receptacles on permissible, mobile battery-powered machines.

2. As an alternate method, petitioner proposes to use metal locking devices, each consisting of a fabricated metal bracket and a metal locking screw in lieu of padlocks. These locking devices will be designed, installed and used to prevent the threaded rings that secure the battery plugs to the battery receptacles from unintentionally loosening and will be attached to prevent accidental loss. In addition, the locking screws will be securely attached to the brackets to prevent accidental loss of the screws.

3. Petitioner states that the spring-loaded metal locking devices will be easier to maintain than padlocks because there are no keys to be lost and dirt cannot get into the workings as with a padlock.

4. Operators of permissible, mobile, battery-powered machine affected by this modification will be trained in the proper use of the locking device, the hazards of breaking battery-plug connections under load, and the hazards of breaking battery-plug connections in areas of the mine where electric equipment is required to be permissible.

5. For these reasons, petitioner requests a modification of the standard.

Request for Comments

Persons interested in this petition may furnish written comments. These comments must be filed with the Office of Standards, Regulations and Variances, Mine Safety and Health Administration, Room 627, 4015 Wilson Boulevard, Arlington, Virginia 22203. [Docket No. M-87-205-C]

Raven Coal Co.; Petition for Modification of Application of Mandatory Safety Standard

Raven Coal Company, R.D. 2, Box 406, Shamokin, Pennsylvania 17872 has filed a petition to modify the application of 30 CFR 75.1400 (hoisting equipment; general) to its No. 1 Slope (I.D. No. 36-07112) located in Northumberland County, Pennsylvania. The petition is filed under section 101(c) of the Federal Mine Safety and Health Act of 1977.

A summary of the petitioner's statement follows:

1. The petition concerns the requirement that cages, platforms or other devices which are used to transport persons in shafts and slopes be equipped with safety catches or other approved devices that act quickly and effectively in an emergency.

2. Petitioner states that no such safety catch or device is available for the steeply pitching and undulating slopes with numerous curves and knuckles present in the main haulage slopes of this anthracite mine.

3. Petitioner further believes that if "makeshift" safety devices were installed they would be activated on knuckles and curves when no emergency existed and cause a tumbling effect on the conveyance.

4. As an alternate method, petitioner proposes to operate the man cage or steel gunboat with secondary safety connections securely fastened around the gunboat and to the hoisting rope, above the main connecting device. The hoisting ropes would have a factor of safety in excess of the design factor as determined by the formula specified in the American National Standard for Wire Rope for Mines.

5. Petitioner states that the proposed alternate method will provide the same degree of safety for the miners affected as that afforded by the standard.

NATIONAL SCIENCE FOUNDATION

Advisory Committee for Physics; Meeting

In accordance with the Federal Advisory Committee Act, as amended, Pub. L. 92-463, the National Science Foundation announces the following meeting:

Name: Advisory Committee for Physics.

Date and Time: October 26, 1987; 9:00 a.m. to 6:00 p.m.; October 27, 1987; 9:00 a.m. to 5:00 p.m.

Place: Room 540, National Science Foundation, 1800 G Street, NW., Washington, DC 20550.

Type of Meeting: Open.

Contact Person: Dr. Gerard M. Crawley, Director, Division of Physics, Room 341, National Science Foundation, Washington, DC 20050, (202) 357-7985.

Summary of Minutes: May be obtained from Ms. Denise S. Henry, Division of Physics, National Science Foundation, Washington, DC 20550.

Purpose of Committee: To provide advice and recommendations concerning support for research in physics.

Agenda:

October 26, 1987, 9:00 a.m.-6:00 p.m.—Discussion of funding issues, Cross Directorate Programs, and Science and Technology Centers.

BEST COPY AVAILABLE

VOL 52 ISS 196 OCT 9 1987 UMI

October 27, 1987, 9:00 a.m.–5:00 p.m.— Discussions on handling oversight reviews of Programs and Long Range Plans.

M. Rebecca Winkler,

Committee Management Officer.

BILLING CODE 7555–01–M

Advisory Panel for the Biophysics Program; Meeting

The National Science Foundation announces the following meeting:

Name: Advisory Panel for the Biophysics Program.

Date and Time: October 29, and 30, 1987, from 8:00 a.m. to 6:00 p.m. each day.

Place: National Science Foundation, 1800 G Street NW., Room 1242, Washington, DC 20550.

Type of Meeting: Closed.

Contact Person: Dr. Arthur Kowalsky, Program Director, Biophysics Program, Room 325 Phone: (202) 357–7777.

Summary Minutes: May be obtained from the Contact Person at the above address.

Purpose of Meeting: To provide advice and recommendations concerning support for research.

Agenda: To review and evaluate research proposals as part of the selection process for awards.

Reason for Closing: The proposals being reviewed include information of a proprietary for confidential nature, including technical information; financial data, such as salaries and personal information concerning individuals associated with the proposals These matters are within exemptions (4) and (6) of 5 U.S.C. 552 b (c), Government in the Sunshine Act.

BILLING CODE 7555–01–M

NUCLEAR REGULATORY COMMISSION

[Docket No. 50–331]

Iowa Electric Light and Power Co., Central Iowa Power Cooperative, and Corn Belt Power Cooperative; Environmental Assessment and Finding of No Significant Impact

The U.S. Nuclear Regulatory Commission (the Commission) is considering issuance of exemptions from certain requirements of section III.G of Appendix R to 10 CFR Part 50 to Iowa Electric Light and Power Company (IELP/the licensee) for the Duane Arnold Energy Center located at the licensee's site in Linn County, Iowa.

Environmental Assessment

Identification of Proposed Action

The proposed action would grant exemptions from certain requirements of section III.G of Appendix R to 10 CFR Part 50 which relate to fire protection features for ensuring that systems and associated circuits used to achieve and maintain safe shutdown are free of fire damage. The exemptions are technical since the licensee must demonstrate that fire protection configurations meet the specific requirements of section III.G or that alternate fire protection configurations can be justified by an acceptable fire hazard analysis.

The Need for the Proposed Action

The proposed exemptions are needed because the features described in the licensee's request regarding the existing and proposed fire protection at the plant for these items are the most practical method for meeting the intent of Appendix R, and literal compliance would not enhance significantly the fire protection capability at Duane Arnold.

Environmental Impacts of the Proposed Action

The proposed exemptions will provide a degree of fire protection such that there is no increase in the risk of fires at Duane Arnold. Consequently, the probability of fires has not been increased and the post-fire radiological releases will not be greater than previously determined nor do the proposed exemptions otherwise affect plant radiological effluents. With regard to potential nonradiological impacts, the proposed exemptions involve features located entirely within the restricted areas as defined in 10 CFR Part 20. They do not affect plant nonradiological effluents and have no other environmental impact. Therefore, the Commission concludes that there are no measurable radiological or nonradiological environmental impacts associated with the proposed exemptions.

Alternatives to the Proposed Action

Since the Commission has concluded there is no measurable environmental impact associated with the proposed exemptions, any alternatives with equal or greater environmental impact need not be evaluated. The principal alternative to the exemptions would be to not grant the exemptions requested by the licensee from the requirements of Appendix R. Such action would not enhance the protection of the environment.

Alternative Use of Resources

This action does not involve the use of resources not considered previously in the Final Environmental Statement for the Duane Arnold Energy Center.

Agencies and Persons Consulted

The Commission's staff reviewed the licensee's request and did not consult other agencies or persons.

Finding of No Significant Impact

The Commission has determined not to prepare an environmental impact statement for the proposed exemptions. Based upon the foregoing environmental assessment, the Commission's staff concluded that the proposed action will not have a significant effect on the quality of the human environment.

For further details with respect to this proposed action, see the licensee's letters dated September 28, 1984, October 31, 1984, and October 21, 1986. These letters are available for public inspection at the Commission's Public Document Room, 1717 H Street, NW., Washington, DC and at the Cedar Rapids Public Library, 500 First Street, SE., Cedar Rapids, Iowa 52401.

Dated at Bethesda, Maryland this 2nd day of October 1987.

For the Nuclear Regulatory Commission.

Martin J. Virgilio,

Director, Project Directorate III–1, Division of Reactor Projects-III, IV, V & Special Projects.

[FR Doc. 87–23488 Filed 10–8–87; 8:45 am]

BILLING CODE 7590–01–M

[Docket No. 40–3453, ASLBP No. 87–557–05–SP, Source Material License No. SUA–917]

Atlas Minerals Division of Atlas Corp.; Hearing

On September 25, 1987, the Commission issued an Order in this proceeding granting the request of Atlas Minerals Division of Atlas Corporation (Atlas) for a hearing on the NRC Staff's denial of its application for renewal of its source materials license SUA–917. In granting Atlas' request, the Commission provided that Staff and Atlas were to be parties to an informal adjudicatory proceeding to be conducted pursuant to the Commission's proposed rule, "Informal Hearing Procedures for Materials Licensing Adjudications," 52 FR 20089 (May 29, 1987).

Section 2.1205(i) of that proposed rule provides that: "If a request for a hearing is granted and no notice of opportunity for a hearing previously has been published in the **Federal Register**, a notice of hearing must be published in the **Federal Register** * * *". No notice of opportunity for hearing previously has been published in this proceeding. Consequently, pursuant to proposed § 2.1205(i), this notice is issued stating:

1. The time, place, and nature of the hearing will be announced in a subsequent notice following submission of the Hearing File by Staff pursuant to § 2.1231 of the proposed rule, any petitions to intervene filed in response to this notice, and the parties' views on the content of the hearing file and the need for an oral hearing;

2. This hearing is held under the authority of sections 63 and 189 of the Atomic Energy Act of 1954, as amended;

3. Pursuant to the Commission's Order, the issue to be considered in the hearing is whether Atlas' proposed surety arrangements for decommissioning and reclamation of the site of its uranium milling facilities at Moab, Utah, are in compliance with the Commission's requirements, or, if not in compliance, whether an exception or waiver, if permissible, should be granted; and

4. Any person whose interest may be affected by this proceeding may seek leave to intervene by filing a petition setting forth:

a. The interest of the petitioner in the proceeding;

b. How that interest may be affected by the results of the proceeding including the nature of the petitioner's right under the Atomic Energy Act to be made a party to the proceeding, the nature and extent of the petitioner's property, financial, or other interest in the proceeding, and the possible effect that any order entered in the proceeding may have on that interest; and

c. The specific aspect or aspects of the subject matter of the proceeding about which the petitioner wishes to be heard. Any petitions must be filed and served on the Presiding Officer and his Special Assistant, the NRC Staff, the Commission, and Atlas by personal delivery or by first class mail, postage prepaid, no later than November 9, 1987.

The addresses for service are given below:

Administrative Judge John H. Frye III, Presiding Officer, Atomic Safety and Licensing Board Panel, U.S. Nuclear Regulatory Commission, Washington, DC 20555

Administrative Judge James H. Carpenter, Special Assistant to the Presiding Officer, Atomic Safety and Licensing Board Panel, U.S. Nuclear Regulatory Commission, Washington, DC 20555

Edwin J. Reis, Esq., Gregory Alan Berry, Esq., Counsel for NRC Staff, Office of the General Counsel, U.S. Nuclear Regulatory Commission, Washington, DC 20555

Office of the Secretary, Docketing and Services Branch, U.S. Nuclear Regulatory Commission, Washington, DC 20555

Ramsay D. Potts, Esq., Robert E. Zahler, Esq., Shaw, Pittman, Potts, & Trowbridge, 2300 N Street NW., Washington, DC 20037

Mr. Richard R. Weaver, President and Chief Executive Officer, Atlas Corporation, 353 Nassau Street, Princeton, NJ 08542

Mr. Richard E. Blubaugh, Regulatory Affairs Manager, Atlas Minerals Division of Atlas Corporation, 743 Horizon Court, Suite 202, Grand Junction, CO 81506

Following receipt of the Hearing File, and any petitions to intervene and responses thereto filed pursuant to the proposed rules, a date will be set for the parties to comment on the contents of the hearing file and the need for an oral hearing.

It is so ordered.

John H. Frye III,

Administrative Judge.

October 5, 1987.

[FR Doc. 87-23490 Filed 10-8-87; 8:45 am]

BILLING CODE 7590-01-M

[Docket No. 50-213]

Connecticut Yankee Atomic Power Co. (Haddam Neck Plant); Exemption

I.

The Connecticut Yankee Atomic Power Company (CYAPCO or the licensee) the holder of Operating License No. DPR-61 which authorizes operation of the Haddam Neck Plant (the facility) at steady state reactor core power levels not in excess of 1825 megawatts thermal. The license provides, among other things, that the facility is subject to all rules, regulations, and Orders of the Nuclear Regulatory Commission (the Commission) now or hereafter in effect.

The plant is a single-unit pressurized water reactor located at the licensee's site in Middlesex County, Connecticut.

II.

One of the conditions of all operating licenses for water-cooled power reactors, as specified in 10 CFR 50.54(o), is the primary reactor containments shall meet the containment leakage test requirements set forth in 10 CFR Part 50, Appendix J. By letter dated July 31, 1985, the staff concluded that it was acceptable to defer implementation of specific Appendix J modifications until an integrated assessment, i.e., Integrated Safety Assessment Program (ISAP), could be performed.

In a July 31, 1985 letter, the NRC staff formally established the scope of the Haddam Neck Plant ISAP and designated the Appendix J issues as ISAP Topic 1.03, "Containment Penetration Evaluations." In that letter, the staff recognized that some issues would require exemptions to defer action until such time as the Haddam Neck Plant ISAP could be completed.

Accordingly, by letters dated March 12, and July 15, 1986, the licensee requested exemptions from section II.H, III.A and III.C of Appendix J.

III.

By letters dated March 12 and July 15, 1986, the licensee requested three permanent exemptions from requirements of 10 CFR Part 50, Appendix J. These included a request to perform integrated containment leak rate testing at values less than ½Pa. By letter dated June 10, 1987, the licensee withdrew the test exemption request and committed to perform a full pressure test for the 1987 outage. The staff has described the acceptability of each of the remaining two permanent exemption requests below. In the March 12 and July 15, 1986 letters, the licensee also submitted a large number of exemption requests for temporary relief from additional Appendix J requirements. The staff resolution of these requests has been described collectively; however, each request for temporary relief has been evaluated individually in the Safety Evaluation dated September 29, 1987.

A. Permanent Exemptions

1. Type C Testing for Steam Generator Blowdown and Auxiliary Feedwater Penetrations

By letter dated March 12, 1986, CYAPCO requested a permanent exemption for section II.H.4 of Appendix J for Type C testing the containment isolation valves in the steam generator blowdown (P-15, 16, 17 and 18) and the auxiliary feedwater (P-81) penetrations.

Historically, the implementation of section II.H.4 of Appendix J does not require that the main steam and feedwater systems in PWRs be Type C tested, by virtue of the definition of containment isolation valves in that section for which Type C testing is required. Similar to the steam and feedwater systems, the steam generator blowdown (P-15, 16, 17 and 18) and auxiliary feedwater (P-81) penetrations are not connected to the reactor coolant system and are not relied upon to prevent the escape of containment air following a postulated LOCA.

By letter dated May 7, 1982, the NRC concluded that Appendix J, section II.H, does not require these valves in systems identified above to be leak-tested and, therefore, no exemption is necessary. The staff's original conclusion was based on the fact that this is a seismically-designed closed system, such that these penetrations would not be potential containment leakage paths. Additionally, CYAPCO has agreed to procedurally maintain steam generator water above the tube bundle and pressurize the secondary side above Pa

as soon as possible following the onset of a postulated LOCA.

Inasmuch as the basis for the original conclusion is unchanged, the NRC concludes that the requests for exemption for penetrations P–15, 16, 17, 18 and 81 are unnecessary and Type C testing of the isolation valves in these lines is not required.

2. Reverse Direction Type C Testing With Water of Auxiliary Containment Spray Penetration (P–80)

The auxiliary containment spray penetration (P–80) is isolated by motor-operated valve RH–MOV–31, which is currently Type C tested in the reverse direction with water. During the ILRT, the system outside containment is pressurized by the fire water system at a minimum of 80 psig assuring that there will be no leakage out of containment through this penetration. The licensee has argued that since the fire water system is maintained at least of 80 psig by an electric driven pump with a diesel driven backup, their current testing meets the underlying purpose of the rule. The NRC staff concluded that the above leak testing for this penetration would be in compliance with Appendix J if CYAPCO could demonstrate a effective 30 day water seal at a pressure at least 1.1 Pa, in accordance with sections III.C.2(b) and III.C.3(b) of Appendix J. This would require that the fire system satisfy the requirements for a safety grade system (i.e., a code class system, seismically qualified, with emergency power and capable of functioning with a limiting active single failure). However, this system does not meet several of these requirements; therefore, an exemption is required.

During normal operation, the water pressure outside the containment is maintained at 80 psig. Any significant leakage through this valve into containment would be detected as it would lead to the spray down of containment. In a sense, this valve is under continuous test (maintenance of the fire water system pressure boundary). The staff has concluded that this system configuration with the reverse direction Type C test with water provides adequate assurance that this valve is leak tight. Additionally, the licensee has proposed to flange the fire water system outside of containment to allow venting of this line during the ILRT. This will provide further assurance that this valve is leak tight. While the ILRT is not an individual test, it assures that the total leakage through containment is below 0.75 La. Therefore, the ILRT does provide reasonable assurance that the leakage through any one penetration is limited to at most 0.75 La. Therefore, the staff concludes that a permanent exemption for penetration P–80 to perform reverse direction testing with water satisfies the underlying purpose of the rule as the proposed testing and the system configuration provides adequate assurance that this penetration is leak tight. The staff concludes that the permanent exemption should be granted.

B. Exemptions for Temporary Relief

By letters dated March 12, and July 15, 1986, CYAPCO requested exemptions from 10 CFR Part 50, Appendix J, for 29 separate penetrations. The 29 requests can be categorized into four groups as described below. These categories include valves that require (1) Type C testing, (2) Type C testing in the reverse direction, (3) Type C testing with water, and (4) Type C testing at pressures greater than Pa.

1. Exemption for Modifications of Valves Requiring Type C Testing

By letters dated March 12, and July 15, 1986, CYAPCO identified three containment penetrations for which exemptions for temporary relief from the Type C testing requirements, of section III.C of Appendix J were requested. These penetrations include the reactor coolant charging system penetration (P–8), the containment sump to RHR suction line penetration (P–73) and the cavity fill line penetration from the high pressure safety injection system (P–3). Upon review of the CYAPCO request, the staff determined that a 30 days water seal would exist in the containment sump and, therefore, a Type C water test of P–73 is not required. A discussion of penetrations P–8 and P–3 follows.

Penetration P–8. CYAPCO had previously requested an exemption from the Type C testing requirements for the reactor coolant charging (P–8) penetration. This previous request was based on the seismic design of system piping inside containment and the proposed seismic qualification (upgrading) of system piping from the isolation valves of penetration P–8 to its water source. Subsequent evaluations by the licensee determined such qualifications to be a more lengthy and costly effort than is justified for this circumstance alone. Consequently, the licensee requested an exemption for temporary relief so that alternative corrective actions could be evaluated in relation to other issues concering the charging system.

As stated earlier, the staff has concluded that the ILRT (Type A test) provides reasonable assurance that leakage through any penetration is limited. Additionally, the operation and physical configuration of the charging system provides a natural deterrent to containment leakage through this system. Based on the foregoing discussion, the NRC concludes that an exemption is technically justified for the period of two refueling outages given the compensatory measures provided by the ILRT and system configuration. This time period would provide a reasonable time to implement necessary modifications to this system to achieve compliance with Appendix J.

Penetration P–3. The high pressure safety injection (HPSI) system is a seismic, Class 1, safety grade system. The cavity fill line branch is the only branch line of the HPSI system for which the isolation valve is not Type C tested. This system is a closed system outside of containment and water filled to the pumps. The licensee requested an exemption so that alternative modifications could be evaluated in relation to other issues concerning the HPSI system.

As stated earlier, the staff has concluded that the ILRT provides reasonable assurance that leakage through any penetration is limited. Additionally, the operation and physical configuration of the HPSI system provides a natural deterrent to containment leakage past this isolation valve. Based on the foregoing discussion, the NRC concludes that an exemption granting temporary relief for the period of two refueling outages is justified given the compensatory measures provided by the ILRT and system configuration. This time period would provide a reasonable time to implement necessary modifications to this system to achieve compliance with Appendix J.

2. Exemption to Continue Reverse Direction Type C Testing

By letters dated March 12, and July 15, 1986, CYAPCO requested exemptions from section III.C.1 of 10 CFR Part 50, Appendix J, to continue reverse direction testing of the refueling cavity purification system (P–33), pressurizer relief tank drain (P–78) penetrations, and the reactor coolant pump (RCP) seal water return line (P–7).

The refueling cavity purification penetration (P–33) is isolated by two containment isolation valves; valve PU–V–242A is Type C tested in the direction of accident pressure and valve PU–V–242 is tested in the reverse direction. The pressurizer relief tank drain penetration (P–78) is isolated by valves DT–TV–1844 and DH–TV–554; valve DT–TV–1844 is tested in the direction of

accident pressure and valve DH–TV–554 is tested in the reverse direction. In both of the foregoing cases, testing is accomplished by pressurizing between the isolation valves.

The RCP seal water return lines form a common header inside the containment and discharge through penetration P–7, which is isolated by valve CH–RV–332 outside containment. CH–RV–332 is Type C tested in the reverse direction.

As a general guideline, the staff considers reverse testing conservative if the seating force is ten times the calculated peak pressure force. While this ensures that the leak geometry is dominated by the seating force instead of the test direction, there is no rigorous calculation for determining what other seating force may be acceptable. The licensee's reverse direction testing is currently performed with a seating force less than four times the calculated containment peak pressure and therefore do not satisfy the established criteria for approval of reverse direction testing of valves. However, in the interim, the staff believes that with the current seating forces, the current leak rate tests will provide some indication of the leak tightness of the subject valves. In addition, these valves are exposed to containment atmosphere in the accident direction during the ILRT. As stated earlier, although the ILRT is not performed as frequently as Type C leak-rate tests, the ILRT does provide reasonable assurance that leakage through any penetration is limited. Based on the results of the current reverse direction test in conjunction with the ILRT, the NRC concludes that an exemption is technically justified for the period of two refueling outages. This time period would permit a reasonable time to implement necessary modifications to these valves to achieve compliance with Appendix J.

3. Exemption to Permit Type C Testing Using Water Instead of Air or Nitrogen

By letter dated March 12, 1986, CYAPCO requested exemptions for 20 penetrations from the air/nitrogen testing requirements of section III.C.2 of 10 CFR Part 50, Appendix J. The systems affected include the high pressure safety injection system, reactor coolant system, component cooling water system, and the reactor coolant pump seal water system. A complete listing of the affected penetrations is given in Table 1. All of the penetrations identified on Table 1 are currently tested with water during the required Type C tests.

The licensee currently applies a conversion factor to the water leakage rate to obtain an equivalent air leakage rate. The results are then added to the other Type C test results and compared to the acceptance criterion in section III.C.3. While several empirical and theoretical relationships have been proposed by the industry for converting water leakage rates to equivalent air leakage rates, the NRC has not found such a relationship sufficiently rigorous or conservative to generically justify a revision to Appendix J.

The licensee has proposed to evaluate the water inventories for these penetrations and potential system modifications that would permit testing with air, in order to determine the most effective means to resolve this issue.

In the interim, the staff concludes that the Type C test with water and the use of the CYAPCO water to air conversion will provide reasonable assurance of the leakage integrity of these valves. Additionally, the operation and physical configuration of these systems provides a natural deterrent to containment leakage past the isolation valves following an accident. Based on the above, the NRC concludes that the exemptions granting temporary relief from Appendix J to permit Type C testing with water for these valves is technically justified for the period of two refueling outages. This time will provide adequate opportunity to modify the penetrations as necessary to achieve compliance with Appendix J.

4. Exemption to Permit Type C Testing With a Test Pressure Greater Than Pa.

By letter dated March 12, 1986, CYAPCO requested exemptions from section III.C.2 of 10 CFR Part 50, Appendix J to permit Type C testing of 3 penetrations at pressures greater than Pa. These penetrations include the reactor coolant sampling system penetrations (P–11), the neutron shield fill line penetration (P–63) and the loop fill line penetration (P–69).

Currently, P–11 and P–69 are tested at normal system pressure, roughly 2000 psig. P–11 is the RCS sampling line and the design of this valve is such that the test pressure of 2000 psig tends to unseat the valve and increase leakage.

The design of the isolation valves in penetration P–63 is such that the test pressure of 70 psig tends to unseat the valve and increase leakage.

Penetration P–69 is a Class 1, seismic line inside of containment and normally isolated from the RCS. The isolation valve in penetration P–69 is a check valve that tends to seat tighter at the test pressure of 2000 psig; however, this line is vented during the ILRT. Penetrations P–63 and P–69 are also addressed in the preceding evaluation for Type C testing with water.

The licensee has requested exemptions from the test pressure requirements of Appendix J for these isolation valves in order to evaluate alternative corrective actions that would either permit testing at Pa or demonstrate conclusively that an exemption is warranted.

Although the current testing is performed at high pressures, the tests provide reasonable assurance of the leakage integrity of the isolation valves. The ILRT confirms these results at lower pressures because the reactor coolant system is vented for those tests. Additionally, the operation of plant systems and the physical configuration of the affected lines are a natural deterrent to the containment leakage. Based on the above, the staff has concluded that exemptions granting temporary relief from the test pressure requirements is technically justified for a period of two refueling outages. This time period will provide adequate time to modify the penetrations as necessary to achieve compliance with Appendix J.

C. 10 CFR 50.12 Determinations for Special Circumstances

1. Permanent Exemption

By letter dated March 12, 1986, CYAPCO requested a permanent exemption from 10 CFR Part 50, Appendix J, to permit reverse direction testing of the auxiliary containment spray penetration (P–80). Pursuant to 10 CFR 50.12(a)(2), the Commission will not consider granting an exemption unless special circumstances are present. Item (ii) of the subject regulation includes special circumstances where application of the subject regulation is not necessary to achieve the underlying purpose of the rule.

As discussed previously, the NRC has concluded that given the system configuration, any significant leakage through this valve into containment would be detected because it would lead to a spray down of containment. In a sense this valve is under continuous test (maintenance of the fire water system pressure boundary). The staff has concluded that this system configuration with the reverse direction Type C test with water provides adequate assurance that this value is leak tight. Additionally, the licensee has proposed to flange the fire water system outside of containment to allow venting of this line during the ILRT. This will provide further assurance that this valve is leak tight. While the ILRT is not an individual test, it does assure that the total leakage through containment is below 0.75 La. Therefore, the ILRT does

provide reasonable assurance that the leakage through any one penetration is limited to no greater than 0.75 La. Therefore, the staff concludes that a permanent exemption for penetration P–80 to perform reverse direction testing with water satisfies the underlying purpose of the rule as the proposed testing and the system configuration provides adequate assurance that this penetration is leak tight.

2. Exemptions Granting Temporary Relief

In an April 5, 1984 letter, the NRC staff noted that not all containment penetrations are tested in accordance with Appendix J. The Staff concluded that it was acceptable to defer implementation of specific Appendix J and Appendix A modifications until an integrated assessment, i.e., ISAP, could be performed. The basis for the staff's conclusion was that, although the integrated containment (Type A) leak test is not performed as frequently as local leak rate tests would be, the integrated leak rate test does provide an indication of overall containment leak-tightness, including penetrations.

In a July 31, 1985 letter, the NRC staff formally established the scope of the Haddam Neck Plant ISAP and designed Appendix J issues as ISAP Topic 1.03, "Containment Penetration Evaluations." In this letter, the staff notified CYAPCO that some issues would require exemptions to defer action until such time as the necessary modifications could be completed.

By letters dated March 12, and July 15, 1986, CYAPCO requested 29 exemptions from the requirements of various sections of 10 CFR Part 50, Appendix J. In most all cases, CYAPCO has described plant modifications required to bring the subject penetrations into compliance with the requirements of 10 CFR Part 50, Appendix J. The licensee has requested exemptions for the 29 penetrations until these modifications can be evaluated and ranked using an integrated safety assessment. As part of this effort, CYAPCO will schedule plant modifications based on the safety significance of each item and then incorproate the planned modification schedule into an integrated implementation schedule having defined completion dates. The staff has concluded that the necessary modifications to assure compliance with Appendix J can be completed during the next two refueling outages using the methodology described above.

In an effort to bring the Haddam Neck Plant compliance with 10 CFR Part 50, Appendix J, CYAPCO has previously made modifications to the Haddam Neck Plant. In the 1983 outage, two penetrations were modified to permit testing as required by Appendix J. During the 1984 outage, penetration 62 was modified to meet Appendix J requirements, and a filtration system was added to the component cooling water (CCW) system in an effort to resolve substantial penetration leakage rates in this system. During the 1986 refueling outage, the capacity of the filtration system was increased. During an unplanned outage in July 1986, CYAPCO performed local leak rate tests on nine penetrations and all penetrations were found to be acceptable.

During the current 1987 outage modifications are being made to penetrations P–7, P–10, P–30, P–38, and P–60, P–23, P–31, P–35, P–36, P–37, P–59 and P–72B. CYAPCO will also install a flushing tee to the crosstie line between the component cooling water system and the service water system to help in removal of any silt that might affect the performance of the CCW valves. The 1987 outage modifications are projected to cost approximately 3.7 million dollars. CYAPCO also has ongoing engineering and procurement activities for future outages in an effort to bring the Haddam Neck Plant into compliance with 10 CFR Part 50, Appendix J.

The staff concludes that with the installed and planned modifications, CYAPCO has taken prudent steps in improving the Haddam Neck Plant containment integrity from both a risk and operating experience perspective. The modifications made during the previous outages demonstrate CYAPCO's good faith efforts in seeking ultimate resolution of Appendix J issues.

Pursuant to 10 CFR 50.12(a)(2)(v), the Commission will not consider granting an exemption unless the licensee has made good faith efforts to comply with the regulation. The NRC concludes that special circumstances, as described in 10 CFR 50.12(a)(2)(v), exist and the exemptions for temporary relief from 10 CFR Part 50, Appendix J, should be granted.

IV.

Accordingly, the Commission has determined pursuant to 10 CFR 50.12(a), that (1) these exemptions as described in section III are authorized by law, will not present an undue risk to the public health and safety, and are consistent with the common defense and security. Special circumstances are present for the reverse direction testing of penetration P–80 in that application of the regulation in this particular circumstances is not necessary to achieve the underlying purposes of Appendix J to 10 CFR Part 50. Further, special circumstances, as given in section III.C, are present for exemptions granting temporary relief as described in section III.B above. In summary CYAPCO has demonstrated a good faith effort to comply with the regulations by modifying existing penetrations over the last four outages in an effort to reduce containment leakage problems and assure compliance with Appendix J. Therefore, the Commission hereby grants the exemption requests identified in section III above.

Further, the Commission grants the exemptions from the requirements of 10 CFR Part 50, Appendix J, for all penetrations identified in Table 2 of this exemption package for a period of two refueling outages following the 1987 outage. Within three months after startup from the 1987 outage, CYAPCO will provide a final description of all Appendix J modifications performed during the 1987 outage and a schedule for resolution of all outstanding Appendix J issues.

Pursuant to 10 CFR 51.32, the Commission has determined that the issuance of this exemption will have no significant impact on the environment (51 FR 18521, May 20, 1986 and 51 FR 29527, August 18, 1986).

A copy of the Commission's concurrent Safety Evaluation related to this action is available for public inspection at the Commission's Public Document Room, 1717 H Street, NW., Washington, DC and at the local public document room located as the Russell Library, 123 Broad Street, Middletown, Connecticut 06457.

These Exemptions are effective upon issuance.

For the Nuclear Regulatory Commission.

Dennis M. Crutchfield,

Director, Division of Reactor Projects—III, IV, V and Special Projects, Office of Nuclear Reactor Regulation.

Dated at Bethesda, Maryland, this 29 day of September, 1987.

BILLING CODE 7590-01-M

Advisory Committee on Reactor Safeguards, Subcommittee on Waste Management; Meeting

The ACRS Subcommittee on Waste Management will hold a meeting on October 15 and 16, 1987, Room 1046, 1717 H Street, NW., Washington, DC.

The entire meeting will be open to public attendance.

The agenda for the subject meeting shall be as follows:

Thursday, October 15, 1987—8:30 A.M. until the conclusion of business

Friday, October 16, 1987—8:30 A.M. until the conclusion of business

On Thursday, October 15, the Subcommittee will review and discuss the following Low-Level Waste (LLW) topics: (1) NRC's Low-Level Waste Form Program, (2) EPA's LLW standards, including the "below regulatory concern" and groundwater standards, and (3) Logical framework for the Protection of the public from radiation.

On Friday, October 16, the Subcommittee will review and discuss the following High-Level Waste topics: (1) Definition of HLW, (2) "Q-List" Generic Technical Position and Readiness Reviews, (3) NNWSI Project Seismic/Tectonic Site Characterization Plan Strategies, and (4) NRC's Quality Assurance (QA) Program for computer codes and models.

Oral statements may be presented by members of the public with the concurrence of the Subcommittee Chairman; written statements will be accepted and made available to the Committee. Recordings will be permitted only during those portions of the meeting when a transcript is being kept, and questions may be asked only by members of the Subcommittee, its consultants, and Staff. Persons desiring to make oral statements should notify the ACRS staff member named below as far in advance as is practicable so that appropriate arrangements can be made.

During the initial portion of the meeting, the Subcommittee may exchange preliminary views regarding matters be be considered during the balance of the meeting. The Subcommittee will then hear presentations by and hold discussions with representatives of the NRC Staff and other interested persons regarding this review.

Further information regarding topics to be discussed, whether the meeting has been cancelled or rescheduled, the Chairman's ruling on requests for the opportunity to present oral statements and the time allotted therefor can be obtained by a prepaid telephone call to the cognizant ACRS staff member, Mr. Owen S. Merrill (telephone 202/634-1413) between 8:15 A.M. and 5:00 P.M. Persons planning to attend this meeting are urged to contact the above named individual one or two days before the scheduled meeting to be advised of any changes in schedule, etc., which may have occurred.

Date: October 6, 1987.

Morton W. Libarkin,

Assistant Executive Director for Project Review.

[FR Doc. 87-23489 Filed 10-8-87; 8:45 am]

BILLING CODE 7590-01-M

PENSION BENEFIT GUARANTY CORPORATION

Request for OMB Review of Public Information Collection; PBGC Form 1, Annual Premium Payment To PBGC

AGENCY: Pension Benefit Guaranty Corporation.

ACTION: Notice of information request

submitted for OMB review and extension of approval.

SUMMARY: The Pension Benefit Guaranty Corporation (PBGC) has requested review and approval by the Office of Management and Budget (OMB) of revisions to PBGC Form 1, which form is used by pension plan administrators to make premium payments pursuant to the PBGC's regulation on Payment of Premiums, 29 CFR Part 2610. PBGC Form 1 is currently approved, under OMB control number 1212–0009, for use through August 31, 1989. Revisions in PBGC Form 1 are needed to clarify the rules relating to the filing and premium requirements for plans involved in merger and spinoff transactions and to provide for reporting such transactions on the form. Other revisions to Form 1 will facilitate the entry of information currently required to be reported. The effect of this notice is to advise the public that the PBGC has requested OMB approval of revisions to PBGC Form 1 and an extension of the current expiration date.

ADDRESSES: All written comments (at least three copies) should be addressed to the Office of Information and Regulatory Affairs of OMB, Attention: Desk Officer for the Pension Benefit Guaranty Corporation, 3208 New Executive Office Building, Washington, DC 20503, with a copy to the Pension Benefit Guaranty Corporation, Corporate Policy and Regulations Department, Regulations Division (Code 35400) 2020 K Street NW., Washington, DC 20006. The information request will be available for public inspection at the PBGC Communications and Public Affairs Department, Suite 7100, 2020 K Street NW., Washington, DC 20006, between the hours of 9:00 a.m. and 4:00 p.m.

FOR FURTHER INFORMATION CONTACT: Renae R. Hubbard, Special Counsel, Corporate Policy and Regulations Department (Code 35100), 2020 K Street NW., Washington, DC 20006; telephone 202–778–8851 (202–778–8859 for TTY and TDD). These are not toll-free numbers.

SUPPLEMENTARY INFORMATION: The Paperwork Reduction Act (44 U.S.C. Chapter 35) establishes policies and procedures for controlling the paperwork burdens imposed by Federal agencies on the public. Under the provisions of the Act and its implementing regulations, agencies are required to submit information collection requests to the Office of Management and Budget for review and approval, and to publish a notice in the **Federal Register** notifying the public of the submission.

OMB has previously approved the collection of information by the Pension Benefit Guaranty Corporation from plan administrators making premium payments to the PBGC. The information collection requirement is contained in the PBGC's regulation on Payment of Premiums, 29 CFR Part 2610; and the use of PBGC Form 1 for the filing of information and payment of premiums was most recently approved by OMB for use through August 31, 1989 (OMB No. 1212–0009). The PBGC now is seeking approval by OMB of certain revisions to PBGC Form 1 and is requesting OMB approval of an extension of the expiration date for the use of PBGC Form 1 for a three-year period.

The proposed revisions to PBGC Form 1 and its instructions will clarify the rules relating to the filing and premium payment requirements for plans involved in merger and spinoff transactions, and will provide for the inclusion of this information on the form. Additional revisions to the form will facilitate the reporting of information currently required, such as variances between Form 1 and the Annual Report (Form 5500 Series) filed by a plan and the filing status of a terminated plan. The requested information is needed so the PBGC can track premium payers and collect the appropriate premiums.

PBGC Form 1 is filed annually by the plan administrators of plans covered by the PBGC termination insurance program. The form is used to determine the amount owed and to report and pay premiums to the PBGC. The payment of premiums is required under 29 U.S.C. 1307 and the PBGC's Payment of Premiums regulation, 29 CFR Part 2610. The PBGC estimates that the aggregate annual burden imposed on plan administrators in filing the PBGC Form 1 is 39,336 hours, based on an estimated 118,125 annual filings (112,500 original filings and 5625 reconciliation filings). The newly required information will not result in a measurable increase in burden hours because, of the universe of covered plans (112,500), only an estimated ⅛ of 1% will be affected by the reporting requirement and the information requested is uniquely within the knowledge of the plan administrator filing the PBGC Form 1.

Issued at Washington, DC, this 5th day of October, 1987.

Kathleen P. Utgoff,

Executive Director, Pension Benefit Guaranty Corporation.

[FR Doc. 87–23440 Filed 10–8–87; 8:45 am]

BILLING CODE 7708–01–M

SECURITIES AND EXCHANGE COMMISSION

[Release No. 34–24996; File No. SR–CBOE–87–23]

Self-Regulatory Organizations; Chicago Board Options Exchange, Inc.; Order Approving Proposed Rule Change

Pursuant to section 19(b)(1) of the Securities Exchange Act of 1934 ("Act") [1] and Rule 19b–4 thereunder,[2] the Chicago Board Options Exchange, Inc. ("CBOE" or "Exchange"), on June 1, 1987, submitted to the Securities and Exchange Commission ("Commission" or "SEC") a proposal to amend certain of the CBOE's membership rules. The proposed rule change was published for comment in Securities Exchange Act Release No. 24735 (July 27, 1987), 52 FR 28769. No comments were received.

The proposed rule change would update the Exchange's membership rules. This would include replacing outdated references to the "Office of the Secretary" with "Membership Department." The proposal also would eliminate certain repetitive language from the Exchange's rules. In addition, the CBOE's proposal would incorporate existing Exchange policies into the rules. Rule 1.1(jj) would define the term "good standing," Rule 3.3 would specify that only a nominee who has his employer's permission and who is registered as a broker-dealer can trade for his own account, Rule 3.8 would specify that membership application fees are not refundable, and Rule 3.24 would describe the member death benefit.

The proposal also includes four material rule changes relating to memberships. First, Rule 3.2 would provide explicitly that an individual could own more than one membership. Second, Rule 3.4 would clarify the bases upon which the CBOE can deny or condition membership by stating that the Exchange could deny or condition membership (1) for the same reasons that the Commission can deny or revoke a broker-dealer registration or a membership under the Act; (2) if the applicant has failed the required membership test; (3) if the applicant has a negative net worth or has financial difficulties involving an amount greater than five percent of its net worth or has a pattern of failure to pay the debts; (4) if the applicant cannot demonstrate a capacity to adhere to all applicable CBOE, SEC, Option Clearing Corporation ("OCC") and Federal

[1] 15 U.S.C. 78s(b)(1) (1982).

[2] 17 CFR 240.19–4 (1987).

VOL 52 ISS 196 OC 9 1987 UMI

Reserve Board policies, rules and regulations; (5) if the applicant would bring the Exchange into disrepute; or (6) for "such other cause as the Membership Committee reasonably may decide." Where an applicant for membership is the subject of a pending investigation by a self-regulatory organization ("SRO") or government agency, Rule 3.4(d) would allow the Membership Committee to delay action on the application until the matter is resolved. Third, Rule 3.4(e) would stipulate that the CBOE Business Conduct Committee can take action against a member when any reason for denying or conditioning membership arises after a membership has been approved and/or has become effective. Finally, the CBOE filing contains a proposal to amend CBOE Rule 3.7 to require parents of CBOE member organizations to provide the Exchange with any information requested by the Exchange which is reasonably related to the parent organization's securities business.

The Commission has determined to approve the CBOE rule amendments described above. The Commission agrees that the proposed amendments will enable the CBOE to reflect more accurately current Exchange policies and procedures. In addition, the Exchange will be able to eliminate from its rules repetitious and outdated language.

The Exchange also will be able to implement important new guidelines relating to memberships, without infringing on the rights of members and those who apply for membership. Specifically, Rule 3.2, by allowing individuals to own more than one membership, should contribute to the size and functioning of the market for memberships.

Many of the new provisions described above relating to denial of membership simply are reformulations of criteria currently found in CBOE Rule 3.4. These include denials based on a statutory disqualification under the Act, failure to pass the required membership test, a negative net worth, significant financial difficulties, failure to pay just debts, and failure to demonstrate a capacity to adhere to applicable CBOE, SEC, OCC and Federal Reserve Board policies, rules and regulations. These provisions have functioned well in the past and should allow the CBOE to continue to deny membership to those individuals and organizations that have not demonstrated the ability to take on the significant economic and regulatory responsibilities attendant to Exchange membership.

In addition, the new provisions allowing denial of membership if the applicant would bring the Exchange into disrepute or for "such other cause as the Membership Committee reasonably may decide" are designed to cover important legal and ethical reasons for denial not covered by the other provisions in Rule 3.4, but which should be available to the Exchange in its attempts to limit membership to individuals and firms of integrity and trustworthiness. The CBOE, in a letter to the Commission explaining the rationale for allowing denial for "such other cause as the Membership Committee reasonably may decide," asserted that section 6(c) of the Act, while lengthy, currently would not allow the Exchange to deny membership to one who, for example, has committed murder or assault and battery or who is mentally unstable or who has dealt in controlled substances.[3] Indeed, the Act does not cover certain types of criminal or other conduct that the CBOE desires to base denials of membership on, such as murder or drug dealing. At the same time, because the CBOE cannot possibly specify all of the individual reasons for denying membership, it is reasonable to adopt a general "saving clause." The CBOE noted in its letter that the proposed clause is limited by the word "reasonably" and that the Exchange's appeal procedures will be available to those wishing to challenge the denial or conditioning of a membership.

The provision in new Rule 3.4 that will allow a delay in action on a membership pending the outcome of an investigation by an SRO or government agency is reasonable in light of the fact that membership could be denied based on the result of such an investigation. The provision that will permit the Business Conduct Committee to take action against a member if a reason for denying or conditioning membership arises after a membership is approved and/or effective will enable the CBOE to maintain the membership standards described above.

Finally, the amendment to Rule 3.7 to require parents of CBOE membership organizations to provide the Exchange with information requested by the Exchange which is reasonably related to the parent organization's securities business will allow the CBOE to require parents of member organizations to furnish the kind of information concerning securities activities that the CBOE can require its members to provide. The CBOE also should be able to continue to collect certain information, such as that concerning parents' officers, directors, shareholders, types of business, and financial condition, while Rule 3.7 previously required parent organizations to provide.

For the reasons discussed above, the Commission finds that the proposed rule change is consistent with the requiements of the Act and the rules and regulations thereunder applicable to a national securities exchange, and, in particular, the requirements of section 6 [4] and the rules and regulations thereunder.

It is therefore ordered, pursuant to section 19(b)(2) of the Act,[5] that the proposed rule change is approved.

For the Commission, by the Division of Market Regulation pursuant to delegated authority.

Jonathan G. Katz,

Secretary.

Date: October 5, 1987.

[Release No. 34-24993; File No. SR-NYSE-87-28]

Self-Regulatory Organizations; Proposed Rule Change by New York Stock Exchange, Inc.

Pursuant to section 19(b)(1) of the Securities Exchange Act of 1934 ("Act"), 15 U.S.C. 78s(b)(1), notice is hereby given that on August 28, 1987, the New York Stock Exchange, Inc. ("NYSE" or "Exchange") filed with the Securities and Exchange Commission the proposed rule change as described in Items I, II, and III below, which items have been prepared by the self-regulatory organization. The Commission is publishing this notice to solicit comments on the proposed rule change from interested parties.

I. Self-Regulatory Organization's Statement of the Terms of Substance of the Proposed Rule Change

The proposed rule change consists of increasing the size of order eligibility for the Opening Automated Reports Service (OARS) [1] from 5,099 shares to 30,099 shares.

[1] OARS is the opening system for the Exchange's "Super Dot" electronic order routing system through which member firms are able to transmit market and limit orders in NYSE listed securities directly to specialist posts on the Exchange floor. OARS accepts member firms' pre-opening market orders up to the current limit of 5099 shares for rapid,

Continued

II. Self-regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

In its filing with the Commission, the self-regulatory organization included statements concerning the purpose of and basis for the proposed rule change and discussed any comments it received on the proposed rule change. The text of these statements may be examined at the places specified in Item IV below and is set forth in section (A), (B), and (C) below.

(A) Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

(1) Purpose

Experience with OARS clearly shows that it greatly facilitates the handling of what is often the most difficult part of the trading day. It has been estimated that of all the orders executed on the Exchange on any given day, some twenty percent are executed at the opening. If it was not for OARS, specialists would have to receive many pieces of paper representing many orders in each stock before the opening. These orders would have to be sorted into the buy side and the sell side, tabulated as to the amount to buy and sell, the imbalance determined, and then interfaced with any other orders represented by brokers in the trading "crowd". OARS eliminates most of the paper order handling and tabulating procedures at the opening, and in addition, sends execution reports to member firm system subscribers within seconds after the opening price has been determined and the System activated. It also facilitates trade comparison, since both "OARS" and "OPN"[2] are omnibus accounts and "lock-in" orders that have been entered into the System.

The Exchange proposes that the size of orders eligible for OARS be increased from the present 5,099 shares to 30,099 shares. If approved, the size of orders will be increased in steps until the 30,099 share limit has been reached.[3] This proposed amendment will accommodate the needs of member firm subscribers to obtain efficient executions of large size orders in a timely and reliable fashion. Typically, larger market orders are given to the specialist at the opening. Allowing these orders to be entered into OARS will ensure more timely execution reports. It should be noted that the order size eligibility for OARS was increased to 30,099 shares for a limited period of time for AT&T and the divestiture issues in 1983, and more recently for the Triple Expiration Friday, June 19, 1987.[4]

Experience with these two events proved the effectiveness of OARS in facilitating the opening trade in equity securities. Finally, increasing the order eligibility size to 30,099 shares will enhance the comparison and settlement process by "locking-in" more orders participating in opening transactions through the omnibus accounts.

(2) Statutory Basis for the Proposed Rule Change

The statutory basis for the proposed rule change is Section 6(b)(5) of the Securities Exchange Act of 1934 in that it will ". . . foster cooperation and coordination with persons engaged in regulating, clearing, settling, processing informaiton with respect to, and facilitating transactions in securities, . . ." and Section 17A(a)(1) of the Act in that it will enhance "The prompt and accurate clearance and settlement of securities transactions, . . ."

(B) Self-Regulatory Organization's Statement on Burden on Competition

The Exchange does not believe that the proposed rule change will impose any burden on competition.

(C) Self-Regulatory Organization's Statement on Comments on the Proposed Rule Change Received from Members, Participants or Others

The Exchange has not solicited comments on the Proposed Rule Change and no unsolicited comments have been received.

III. Date of Effectiveness of the Proposed Rule Change and Timing for Commission Action

Within 35 days of the date of publication of this notice in the Federal Register or within such longer period (i) as the Commission may designate up to 90 days of such date if it finds such longer period to be appropriate and publishes its reasons for so finding or (ii) as to which the self-regulatory organization consents, the Commission will:

(A) By order approve such proposed rule change or

(B) Institute proceedings to determine whether the proposed rule change should be disapproved.

IV. Solicitation of Comments

Interested persons are invited to submit data, views and arguments concerning the foregoing. Persons making written submissions should file six copies thereof with the Secretary, Securities and Exchange Commission, 450 Fifth Street NW., Washington, DC 20549.

Copies of the submission, all subsequent amendments, all written statements with respect to the proposed rule change that are filed with the Commission, and all written communications relating to the proposed rule change between the Commission and any person, other than those that may be withheld from the public in accordance with the provisions of 5 U.S.C. 522, will be available for inspection and copying in the Commission's Public Reference Section. 450 Fifth Street, NW., Washington, DC. Copies of such filing will also be available for inspection and copying at the NYSE. All submissions should refer to File No. SR-NYSE-87-28 and should be submitted by October 30, 1987.

For the Commission, by the Division of Market Regulation, pursuant to delegated authority.

Dated: October 5, 1987.

Jonathan G. Katz,

Secretary.

[FR Doc. 87-23493 Filed 10-8-87; 8:45 am]

BILLING CODE 8010-01-M

---

systemitic execution and immediate reporting. OARS automatically and continuously pairs buy and sell orders and presents the imbalance to each specialist up to the opening of a stock, thereby assisting the specialist in determining the opening price.

[2] Orders electronically executed at opening through the OARS system will receive the designation "OPN" which stands for opening for clearing purposes.

[3] The NYSE has indicated that, if approved, it would increase the OARS size list by 10,000 shares immediately and thereafter increase the size limit in 10,000 share increments at three month intervals depending on the Exchange's evaluation of the impact of the increased order size limits on specialists ability to facilitate the opening and on member reaction.

[4] *See* Securities Exchange Act Release No. 24596, June 16, 1987 52 FR 23618. The Commission has also approved a one day increase in the order size eligibility for OARS (from 5,099 shares to 30,099 shares) as part of the auxiliary opening procedures for the Triple Expiration Friday, September, 18, 1987. *See* Securities Exchange Act Release No. 24917, September 11, 1987, 52 FR 35176.

[Release No. 34-24994; SR-Phlx-86-4]

Self-Regulatory Organizations; Philadelphia Stock Exchange, Inc.; Order Approving Proposed Rule Change

The Philadelphia Stock Exchange, Inc. ("Phlx") submitted on February 20, 1986, copies of a proposed rule change pursuant to section 19(b) of the

Securities Exchange Act of 1934 ("Act") [1] and Rule 19b–4 [2] thereunder to clarify that under Phlx rules telephone access, including dedicated lines, to the Phlx Foreign Currency Options Room by a non-holder of a Phlx foreign currency options participation is permitted.[3]

The proposed rule change, together with its terms of substance, was noticed by the issuance of a Commission release (Securities Exchange Act Release No. 23191, May 1, 1986) and by publication in the **Federal Register** (51 FR 17122, May 8, 1986). No comments were received regarding the proposed rule change.

According to the Phlx, this proposal is a response to requests by foreign currency options participation holders who requested that Phlx establish a policy concerning access to the foreign currency options market which would be consistent with the policy of the Philadelphia Board of Trade and other commodity exchanges which permit the installation of dedicated lines connecting non-members to their marketplace.

The proposed rule initially was approved by the Phlx's Options Committee. under Phlx Rules 631 and 1000, all applications for dedicated or direct line access to the options floor must be approved by the Options Committee.[4] Approval would be based on compliance with the rules and policies of the Exchange and the Act.[5] The Phlx Board of Governors has affirmed the determination of the Options Committee. Phlx asserts that the proposed rule change will facilitate transactions in foreign currency options.[6]

In its filing, the Phlx stated that this filing relates only to its policy regarding members' access to non-members from the trading floor with respect to foreign currency options, and does not reach other Phlx products. Regardless of the limited scope of the Phlx clarification, this approval order should not be interpreted to indicate approval of, or acquiescence to, any unwritten or unpublished policy that would permit the Phlx to deny members on the floor access to communicate with non-members off the floor for any Phlx product. We note that the Commission recently issued an Order setting aside actions by the New York Stock Exchange, Inc. ("NYSE") that denied requests for two members to install telephone connections that would permit them to communicate from the floor to non-member customers located off the floor.[7] In a recent letter, we requested the Phlx to review its rules and policies to assure that they conform with the Commission's opinion in that case.[8] Accordingly, the Commission's action in approving the Phlx's proposed rule change is limited to codifying and clarifying that, under Phlx rules, foreign currency options participants can have dedicated and direct lines access to non-member participants located off the floor.[9]

Based on the above, the Commission finds that the proposed rule change is consistent with the requirements of the Act and the rules and regulations thereunder applicable to a national securities exchange and, in particular, the requirements of section 6 and the rules and regulations thereunder.

It is therefore ordered, pursuant to section 19(b)(2) of the Act, that the proposed rule change be, and hereby is, approved.

For the Commission, by the Division of Market Regulation, pursuant to delegated authority.

Dated: October 5, 1987.

Jonathan G. Katz,

Secretary.

[FR Doc. 87–23494 Filed 10–8–87; 8:45 am]

BILLING CODE 8010–01–M

---

[1] 15 U.S.C. 78s(b)(1) (1982).).

[2] 17 CFR 240.19b–4 (1986).

[3] Although the propsoal originally was submitted for immediate effectiveness pursuant to section 19(b) (3)(A) of the Act the Exchange modified its submission to request Commission considertion under section 19(b)(2). *See* letter from Barbara M. Rothenberg, Senior Vice President and General Counsel, to Robert Sevigny, Attorney, Division of Market Regulation, dated May 30, 1986.

[4] Phlx Rule 631 provides that no member or member organization shall establish or maintain any private wire connection, private radio, television or wireless system between the Exchange floor and a non-member without application to and approval by the Committee on Member Firms. Phlx Rule 1000 applies Rule 631 to options trading. *See* note 7, *infra*.

[5] *See* SR–Phlx–80–29, the proposed rule change at p. 2.

[6] As noted above, the propsoed rule change seeks to codify current Exchange policy regarding the installation by foreign currency options participation holders of telephones utilizing either dedicated or unrestricted telephone lines to enable them to communicate from the options floor to non-members located elsewhere. The Commission understands that no Phlx member has objected to previous decisions by the Phlx's Options Committee regarding the installation of dedicated or direct line access to the Foreign Currency Options Room, and no person commented on the instant proposed rule change to codify that policy. Moreover, the Phlx represents that such access is substantially similar to that provided by those boards of trade which trade futures on foreign currencies.

[7] *See In re William J. Higgins and Michael D. Robbins*, Securities Exchange Act Release No. 24429, May 6, 1987, 38 SEC Doc. 432 ("Higgins Order").

The Commission notes that its approval of this Phlx rule change does not address whether an interpretation by the Phlx of rule 631 that would establish a blanket prohibition against members on the Exchange floor communicating with non-members off-floor would be consistent with the terms of the existing rule or would require a separate proposed rule change under section 19(b) of the Act. Moreover, any such proposed interpretation or rule would raise questions, under section 6(b)(8) of the Act, regarding whether such a prohibition would impose a burden on competition not necessary or appropriate under the Act. *See* Commission's order instituting proceedings *In re Applications of William J. Higgins and Michael D. Robbins*, Securities Exchange Act Release No. 22877, February 7, 1986, 35 SEC Doc. 12.

In this regard, the Commission notes that the NYSE currently has pending before the Commission a proposed rule change (SR–NYSE–87–18) that would permit members to install telephone lines to enable them to communicate from their booths on the trading floor with non-members located off-floor. The proposed NYSE rule would, however, prohibit members from using portable telephones on the floor. The Commission notes that the concerns expressed by the NYSE to justify the rule, such as enhanced time and place advantages for institutional customers and increased manipulative opportunities, would not appear relevant to a derivative foreign currency options market. *See* Securities Exchange Act Release No. 24624, June 22, 1987, 52 FR 24576.

[8] *See* letter from Howard Kramer, Assistant Director, Division of Market Regulation, SEC, to Richard T. Chase, Executive Vice President, Phlx, dated July 14, 1987. Similar letters were sent to the American, Boston, Cincinnati, Midwest, and Pacific Stock Exchanges.

[9] The Commission also notes that it previously has approved a proposed rule that granted limited access by non-members to an exchange floor. In Securities Exchange Act Release No. 21145, July 13, 1984, 49 FR 29501, the Commission approved a proposed rule from the American Stock Exchange ("Amex") permitting traders from the Chicago Board of Trade ("CBT") direct telephone acces to the floor of the Amex for certain index options. The NYSE's brief in the Higgins proceeding argued that the Commission's approval of that rule change demonstrated that the Commission had implicitly ratified an Amex policy denying members telephone access to non-members. In its Opimion in Higgins the Commission rejected this argument, stating that it was essential from a negotiation perspective that the Amex and CBT codify this access in rule filings with their respective regulators. Further, the Commission stated that the rule change did not discuss non-member telephone access generally, and that its approval order only determined that, under the terms of the proposed rule, the Amex would permit CBT traders access to the Amex floor. *See* Higgins Order, note 7, *supra*, 38 SEC Doc. at 463.

Self-Regulatory Organizations; Applications for Unlisted Trading Privileges and of Opportunity for Hearing; Midwest Stock Exchange, Inc.

October 5, 1987.

The above named national securities exchange has filed applications with the Securities and Exchange Commission pursuant to section 12(f)(1)(B) of the Securities Exchange Act of 1934 and Rule 12f–1 thereunder, for unlisted trading privileges in the following securities:

Arco Chemical Co.
Common Stock, $1.00 Par Value (File No. 7–0510)
Carriage Industries, Inc.

Common Stock, $.02 Par Value (File No. 7–051)
Tubos De Acero De Mexico SA
Common Stock, No Par Value (File No. 7–051)

These securities are listed and registered on one or more other national securities exchange and are reported in the consolidated transaction reporting system.

Interested persons are invited to submit on or before October 27, 1987 written data, views and arguments concerning the above-referenced applications. Persons desiring to make written comments should file three copies thereof with the Secretary of the Securities and Exchange Commission, Washington, DC 20549. Following this opportunity for hearing, the Commission will approve the applications if it finds, based upon all the information available to it, that the extensions of unlisted trading privileges pursuant to such applications are consistent with the maintenance of fair and orderly markets and the protection of investors.

For the Commission, by the Division of Market Regulation, pursuant to delegated authority.

Jonathan G. Katz,

Secretary.

BILLING CODE 8010–01–M

[File No. 22–17418]

Application and Opportunity for Hearing; Citicorp

October 5, 1987.

Notice is hereby given that Citicorp (the "Applicant") has filed an application under clause (ii) of section 310(b)(1) of the Trust Indenture Act of 1939 (the "Act") for a finding that the trusteeship of United States Trust Company of New York (the "Trust Company") under four existing indentures, and two pooling and servicing agreements, each dated July 1, 1987, under which certificates evidencing interests in a pool of mortgage loans have been issued, is not so likely to involve a material conflict of interest as to make it necessary in the public interest or for the protection of investors to disqualify the Trust Company from acting as trustee under any of such indentures or agreements. Section 310(b) of the Act provides in part that if a trustee under an indenture qualified under the Act has or shall acquire any conflicting interest, it shall within ninety days after ascertaining that it has such a conflicting interest, either eliminate the conflicting interest or resign as trustee. Subsection (1) of section 310(b) provides, with certain exceptions, that a trustee under a qualified indenture shall be deemed to have a conflicting interest if such trustee is trustee under another indenture under which any other securities of the same obligor upon the indenture securities are outstanding.

The Applicant alleges that:

(1) The Trust Company currently is acting as Trustee under four indentures under which the Applicant is the obligor. The indenture dated February 15, 1972 involved the issuance of floating rate notes due 1989; the indenture dated March 15, 1977 involved the issuance of various series of unsecured and unsubordinated notes; the indenture dated August 25, 1977 involved the issuance of rising-rate notes, Series A; and the indenture dated April 21, 1980 involved the issuance of various series of unsecured and unsubordinated notes. Said indentures were filed as respectively, Exhibits 4(a), 2(b), 2(b) and 2(a) to Applicant's respective Registration Statements Nos. 2–42915, 2–58355, 2–59396 and 2–64862 filed under the Securities Act of 1933, and have been qualified under the Act. The four indentures are hereinafter called the "Indentures" and the securities issued pursuant to the Indentures are hereinafter called the "Notes."

(2) The Applicant is not in default in any respect under the Indentures or under any other existing indenture.

(3) On July 14, 1987, the Trust Company entered into a pooling and servicing agreement dated July 1, 1987 (the "1987–10 Agreement") with Citicorp Mortgage Securities, Inc. ("CSMI"), packager and servicer, under which there were issued on July 14, 1987 mortgage pass-through certificates, Series 1987–10 10.00%. Pass-Through Rate (the "Series 1987–10 Certificates"), which evidence fractional undivided interests in a pool of conventional one-to-four-family mortgage loans (the "1987–10 Mortgage Pool") originated by Citibank, N.A. and having adjusted principal balances aggregating $75,089,503.14 at the close of business on July 1, 1987, which mortgage loans were assigned to the Trust Company as Trustee simultaneously with the issuance of the Series 1987–10 Certificates. On July 14, 1987, Applicant, the parent of CMSI, entered into a guaranty of even date (the "1987–10 Guaranty") pursuant to which Applicant agreed, for the benefit of the holders of the Series 1987–10 Certificates, to be liable for 7.0% of the initial aggregate principal balance of the 1987–10 Mortgage Pool and for lesser amounts in later years pursuant to the provisions of the 1987–10 Guaranty. The 1987–10 Guaranty states that Applicant's obligations thereunder rank *pari passu* with all unsecured and unsubordinated indebtedness of Applicant, and accordingly, if enforced against Applicant, the 1987–10 Guaranty would rank on a parity with the obligations evidenced by the Notes. The Series 1987–10 Certificates were registered under the Securities Act of 1933 (Registration Statement on Forms S–11 and S–3, File No. 33–12788) as part of a delayed or continuous offering of $2,000,000,000 aggregate amount of

mortgage pass-through certificates pursuant to Rule 415 under the 1933 Act. The Series 1987–10 Certificates were offered by a prospectus supplement dated July 1, 1987, supplemental to a prospectus dated June 10, 1987. The 1987–10 Agreement has not been qualified under the Act.

(4) On July 20, 1987, the Trust Company entered into a pooling and servicing agreement dated July 1, 1987 (the "1987–11 Agreement") with CMSI, packager and servicer, under which there were issued on July 20, 1987 mortgage pass-through certificates, Series 1987–11 9.50% Pass-Through Rate (the "Series 1987–11 Certificates"), which evidence fractional undivided interests in a pool of conventional one-to-four-family mortgage loans (the "1987–11 Mortgage Pool") originated by Citibank, N.A. and having adjusted principal balances aggregating $59,519,816.19 at the close of business on July 1, 1987, which mortgage loans were assigned to the Trust Company as Trustee simultaneously with the issuance of the Series 1987–11 Certificates. On July 20, 1987, Applicant entered into a guaranty of even date (the "1987–11 Guaranty") pursuant to which Applicant agreed, for the benefit of the holders of the Series 1987–11 Certificates, to be liable for 7.0% of the initial aggregate principal balance of the 1987–11 Mortgage Pool and for lesser amounts in later years pursuant to the provisions of the 1987–11 Guaranty. The 1987–11 Guaranty states that Applicant's obligations thereunder rank *pari passu* with all unsecured and unsubordinated indebtedness of Applicant, and accordingly, if enforced against Applicant, the 1987–11 Guaranty would rank on a parity with the obligations evidenced by the Notes.

The Series 1987–11 Certificates were registered under the Securities Act of 1933 (Registration Statement on Forms S–11 and S–3, File No. 33–12788 as part of a delayed or continuous offering of $2,000,000,000 aggregate amount of mortgage pass-through certificates pursuant to Rule 415 under the 1933 Act. The Series 1987–11 Certificates were offered by a prospectus supplement dated July 1, 1987 supplemental to a prospectus dated June 10, 1987. The 1987–11 Agreement has not been qualified under the Act.

The 1987–10 and 1987–11 Agreements are hereinafter called the 1987 Agreements and the 1987–10 and 1987–11 Guarantees are hereinafter called the 1987 Guarantees.

(5) The obligations of Applicant under the Indentures and the 1987 Guarantees are wholly unsecured, are unsubordinated and rank *pari passu*. Any differences that exist between the provisions of the Indentures and the 1987 Guarantees are unlikely to cause any conflict of interest in the trusteeship of the Trust Company under the Indentures and 1987 Agreements.

(6) The Applicant has waived notice of hearing, hearing and any and all rights to specify procedures under Rule 8(b) of the Commission's Rules of Practice in connection with this matter.

For a more detailed statement of the matters of fact and law asserted, all persons are referred to said application, File No. 22–17418, which is a public document on file in the office of Commission's Public Reference Section, 450 Fifth Street, NW., Washington, DC. Notice is further given that any interested person may, not later than October 29, 1987 request in writing that a hearing be held on such matter, stating the nature of his interest, the reasons for such request, and the issues of law or fact raised by said application that he desires to controvert, or he may request that he be notified if the Commission should order a hearing thereon.

Any such request should be addressed: Secretary, Securities and Exchange Commission, Washington, DC 20549.

At any time after said date, the Commission may issue an order granting the application upon such terms and conditions as the Commission may deem necessary or appropriate in the public interest and for the protection of investors, unless a hearing is ordered by the Commission.

For the Commission, by the Division of Corporation Finance, pursuant to delegated authority.

Jonathan G. Katz,

Secretary.

BILLING CODE 8010–01–M

SMALL BUSINESS ADMINISTRATION

[Application No. 03/03–0182]

Jiffy Lube Capital Corp.; Application for a Small Business Investment Company License

An application for a license to operate a small business investment company under the provisions of the Small Business Investment Act of 1958, as amended (15 U.S.C. 661, *et seq.*) has been filed by Jiffy Lube Capital Corporation, 7008 Security Boulevard, Baltimore, Maryland 21207 (Applicant), with the Small Business Administration (SBA) pursuant to 13 CFR 107.102 (1987).

The officers, directors and sole shareholder of the Applicant are as follows:

Eleanor C. Hardin, President, Treasurer, 324 Presway Road, Timonium, Maryland 21093

Wood C. McCutchen, Vice President, 7102 Quarry Court, Capitol Heights, Maryland 20743

Arnold Janofsky, Secretary, 3404 Avis Court, Westminster, Maryland 21157

John F. Ripley, Comptroller, 9084 Lambski Lane, Columbia, Maryland 21228

Williard J. Chesser, Jr., Assistant Treasurer, 11778 Lone Tree Court, Columbia, Maryland 21044

Neal D. Borden, Director, 5508 Roland Avenue, Baltimore, Maryland 21210

William H. Rianhard, Director, 508 Woodlawn Road, Baltimore, Maryland 21210

Edward F. Kelley III, Director, 10125 Glasshouse Court, Ellicott City, Maryland 21043

Jiffy Lube International, Inc. Sole Shareholder (100), 7008 Security Boulevard, Baltimore, Maryland 21207

Mr. W.J. Hindman, 4507 Robosson Road, Randallstown, Maryland 21133 is the only person owning 10 or more percent of the corporate stock of Jiffy Lube International, Inc.

The Applicant, a Delaware Corporation, will begin operations with $1,000,000 paid in capital and paid in surplus. The Applicant will conduct its activities from the State of Maryland but intends to invest in other areas of the United States.

Matters involved in SBA's consideration of the application include the general business reputation and character of the proposed owner and management, and the probability of successful operation of the company under their management, including adequate profitability and financial soundness, in accordance with the Small Business Investment Act of 1958, as amended, and the SBA Rules and Regulations.

Notice is further given that any person may, not later than 30 days from the date of publication of this Notice, submit written comments on the proposed Applicant. Any such communication should be addressed to the Deputy Associate Administrator for Investment, Small Business Administration, 1441 "L" Street NW., Washington, DC 20416.

A copy of this notice shall be published in a newspaper of general circulation in Baltimore, Maryland.

(Catalog of Federal Domestic Assistance Program No. 59.011, Small Business Investment Companies)

Dated: October 2, 1987.

Robert G. Lineberry

Deputy Associate Administrator for Investment.

DEPARTMENT OF STATE

Office of the Secretary

[Public Notice No. 1031]

Brownsville, TX; Application for Bridge Permit

Notice is hereby given that the Department of State has received an application for a permit authorizing construction of a bridge across the Rio Grande River from the Port of Brownsville Texas to H. Matamoros, Tamaulipas, Mexico. The application has been filed by the Brownsville Navigation District, Cameron County, Texas.

The Department's jurisdiction with respect to this application is based upon Executive Order 11423, dated August 16, 1968, and the International Bridge Act of 1972 (Pub. L. 92-434, 86 Stat. 731, 33 U.S.C. 535 approved September 26, 1972).

As required by E.O. 11423, the Department of State is circulating this application to concerned agencies for comment.

Interested persons may submit their views regarding this application in writing by November 9, 1987, to Mr. Jose E. Alvarez, Office of the Legal Adviser, Economic, Business and Communications Affairs, Room 6420, U.S. Department of State, 2201 C Street, NW., Washington, DC 20520.

The application and related documents made part of the record to be considered by the Department of State in connection with this application are available for inspection and copying in the Office of the Assistant Legal Adviser for Economic, Business and Communications Affairs during normal business hours.

Any questions relating to this notice may be addressed to Mr. Alvarez at the above address (202) (647-7770).

Dated: September 8, 1987.

Gerald A. Rosen,

Acting Assistant Legal Adviser, Economic, Business and Communications Affairs.

[Public Notice 1030]

Determination Under the Foreign Missions Act Concerning Acquisition of Real Estate Properties Suitable to Serve as Office and Residences for the Consulate General, People's Republic of China in Los Angeles, CA

I. Authorities

Pursuant to the Foreign Missions Act of 1982, as amended [22 U.S.C. 4301 et seq.] ("the Act"), the Secretary of State, or his delegate, is authorized to require a foreign mission: (A) To obtain benefits from or through the Director of the Office of Foreign Missions on such terms and conditions as the Secretary may approve; or (B) to forego the acceptance, use or relation of any benefit or to comply with such terms and conditions as the Secretary may determine as condition to the execution or performance in the United States of any contract or other agreement, the acquisition, retention or use of real property, or application for or acceptance of any benefit (including any benefit from or authorized by any Federal, State or municipal governmental authority, or any entity providing public services). 22 U.S.C. 4304(b). Among the terms and conditions that the Secretary may impose are the requirement to pay the Director of the Office of Foreign Missions a surcharge or fee. 22 U.S.C. 4304(C).

Department of State Delegation of Authority No. 147, dated September 13, 1982, delegates to the Under Secretary of State for Management certain authorities under the Act, including authority to make the above-described determinations and designations of benefits.

Delegation of Authority No. 147, by express terms, authorized the successive redelegation of the authorities contained therein to other officers of the Department of State. Redelegation of authority to the Director of the Office of Foreign Missions was accomplished by Foreign Affairs Manual Circular No. 82-27, dated October 15, 1982, subsequently codified in Volume 1 FAM (Foreign Affairs Manual) 157.1, which specifically provides that the "Director of the Office of Foreign Missions exercises authority for the Under Secretary for Management to perform functions vested in the Secretary of State by . . . the Foreign Missions Act."

The Act makes it unlawful for any person to make available any benefits to a foreign mission contrary to the provisions of the Act. 22 U.S.C. 4311(a). Foreign mission includes the personnel of such mission. 22 U.S.C. 4302(a)(4).

Pursuant to the above authorities, I hereby make the following determination applicable to the Consulate General of the People's Republic of China in Los Angeles, California and to the personnel assigned to the Consulate General of the People's Republic of China in Los Angeles, California. For purpose of this Determination, personnel assigned to the Consulate General of the People's Republic of China in Los Angeles, California, includes members of the Consulate General and members of the family forming part of the household of such individuals.

II. Determination

I hereby determine it to be reasonably necessary to accomplish the purposes set forth in section 4304(b) of the Act to require the Government of the People's Republic of China and its official representatives in the United States to acquire all real propety intended to serve as office space for the Consulate General of the People's Republic of China in Los Angeles, California or as residential properties for personnel assigned to the Consulate General of the People's Republic of China in Los Angeles, California, from or through the Office of Foreign Missions under such terms and conditions as may be established by the Director of the Office of Foreign Missions.

III. Administrative Provisions

A. It is unlawful for any person subject to the jurisdiction of the United States to provide, or contract to provide, real estate brokerage services to the aforementioned foreign mission, or any member thereof, other than in accordance with section 4311(a) of the Act, this Determination and any determination issued hereunder.

B. Date of Effect: A determination issued by the Director of the Office of Foreign Missions shall be effective at such time as the Director may prescribe.

C. Persons wishing clarification as to the applicability of this Determination or information on subsequent Determinations may contact the Office of Foreign Missions, U.S. Department of State, 3005 Massachusetts Avenue, NW., Washington, DC 20008; or by telephone (202) 673-6258.

Dated: October 1, 1987.

James E. Nolan, Jr.,

Director, Office of Foreign Missions.

VETERANS ADMINISTRATION

Advisory Committee on Native American Veterans; Meeting

The Veterans Administration gives notice under Pub. L. 92–463 that the fourth meeting of the Advisory Committee on Native American Veterans will be held in Washington, DC, on November 2 through 4, 1987. On November 2, the meeting will convene in the Omar Bradley Conference Room, Room 1010, at the Veterans Administration Central Office, 810 Vermont Avenue, NW., Washington, DC, 20420. The meetings on November 3 and 4 will convene in the Executive Room at the Omni Shoreham Hotel, 2500 Calvert Street NW., Washington, DC, 20008.

The purpose of the meeting is to address issues and recommendations developed at the third meeting of the Committee on August 4 through 6, 1987 in preparation for the final report of the Committee due February 1, 1988. All meetings will begin at 8:30 a.m. and continue until 4:30 p.m. with the exception of the meeting on November 4 which will adjourn at noon. All sessions will be open to the public up to the seating capacity of the room. To assure adequate accommodations, those who plan to attend should contact Mr. John R. Fulton, MSW, Committee Manager, Advisory Committee on Native American Veterans, at (202) 233–2614.

Dated: October 1, 1987.

By direction of the Administrator.

Rosa Maria Fontanez,

Committee Management Officer.

[FR Doc. 87–23388 Filed 10–8–87; 8:45 am]

BILLING CODE 8320–01–M

Advisory Committee on Cemeteries and Memorials; Meeting

The Veterans Administration gives notice that a meeting of the Administrator of Veterans Affairs' Advisory Committee on Cemeteries and Memorials, authorized by 38 U.S.C. 1001, will be held at the Central Office of the Veterans Administration, 810 Vermont Avenue NW., Washington, DC 20420, on November 3–4, 1987. The meeting will be held in Room 1015.

The session will begin at 9:00 a.m. to conduct routine business. The meeting will be open to the public up to the seating capacity which is about twenty persons. Those wishing to attend should contact Mrs. Ann Stone, Staff Assistant to the Deputy Chief Memorial Affairs Director (phone 202–233–2396) not later than 12 noon, EST October 23, 1987.

Any interested person may attend, appear before, or file a statement with the Committee. Individuals wishing to appear before the Committee should indicate this in a letter to the Chief Memorial Affairs Director (40) at 810 Vermont Avenue, NW., Washington, DC 20420. In any such letters, the writers must fully indentify themselves and state the organization or association or person they represent. Also, to the extent practicable, letters should indicate the subject matter they want to discuss. Oral presentations should be limited to 10 minutes in duration. Those wishing to file written statements to be submitted to the Committee must also mail, or otherwise deliver, them to the Chief Memorial Affairs Director.

Letters and written statements as discussed above must be mailed or delivered in time to reach the Chief Memorial Affairs Director by 12 noon EST October 23, 1987. Oral statements will be heard only between 9 and 10 a.m. on November 4, 1987.

Dated: October 1, 1987.

By direction of the Administrator.

Rosa Maria Fontanez

Committee Management Officer.

[FR Doc. 87–23448 Filed 10–8–87; 8:45 am]

BILLING CODE 8320–01–M

Privacy Act of 1974; System of Records

The Privacy Act of 1974 (5 U.S.C. 552a(e)(4)) requires that all agencies publish in the **Federal Register** a notice of the existence and character of their system of records. Accordingly, the Veterans, Administration published a notice of its inventory of personal records on September 27, 1977 (42 FR 49726).

Notice is hereby given that the Veterans, Administration is adding a new system of records entitled "Ionizing Radiation Registry—VA" (69VA114). The Veterans' Benefits Improvement and Health-Care Authorization Act of 1986, Pub. L. 99–576, requires that the VA establish and maintain a registry of veterans who may have been exposed to ionizing radiation while on active military duty.

Information will be included in the Registry concerning veterans who may have been exposed to ionizing radiation while on active military duty, either at the testing of a nuclear device between 1945 and 1962, or during the American occupation of Hiroshima or Nagasaki, Japan, between September 11, 1945 and July 1, 1946. Veterans included in the Registry are those who (1) apply for VA hospital or nursing home care, (2) file a claim for compensation on the basis of a disability which may be associated with the exposure to ionizing radiation, or (3) die and are survived by a spouse, child, or parent who file a claim for dependency and indemnity compensation on the basis of the exposure of the veteran to ionizing radiation. To the extent available, the Registry will include medical data relating to the veteran's medical history, health status, physical examination and health findings; data concerning birth defects, if any, in the natural children of the veteran; information on claims for VA compensation, including decisions and determinations related to the claims; and, an estimate of the dose of radiation to which the veteran was exposed.

If a veteran receives medical care or an ionizing radiation examination at a VA health care facility, information related to the examination or treatment is filed in the patient medical record (consolidated health record) at the facility. Information included in the Registry will be compiled from information that is contained in VA patient medical records, the Patient Treatment File (data file of inpatient episodes of medical care), the outpatient visit file (data file relating to outpatient visits), and information compiled from records that are maintained by the Department of Veterans' Benefits, the Department of Defense and the Defense Nuclear Agency of DoD, and the military departments.

A "Report of New System" and an advance copy of the new system notice were sent on October 2, 1987 to the Speaker of the House, the President of the Senate, and the Office of Management and Budget (OMB), as required by U.S.C. 552a(o) (Privacy Act) and guidelines issued by the Office of Management and Budget (50 FR 52730), December 24, 1985.

The OMB requires that a new system report be distributed no later than 60 days prior to the implementation of a new system. The Office of Management and Budget has been requested to waive this requirement.

Interested persons are invited to submit written comments, suggestions, or objections regarding the proposed system of records to the Administrator of Veterans' Affairs (271A), Veterans' Administration, 810 Vermont Avenue, NW., Washington, DC 20420. All relevant material received before November 8, 1987 will be considered. All written comments received will be available for public inspection at the above address only between the hours of 8 a.m. and 4:30 p.m. Monday through Friday (except holidays) until November 20, 1987. Any person visiting Central Office for the purpose of inspecting any such comments will be received by the Central Office Veterans' Services Unit in room 132. Visitors to any VA field station will be informed that the records are available only in Central Office and furnished the above address and room number.

If no public comment is received during the 30-day review period allowed for public comment or unless otherwise published in the **Federal Register** by the Veterans' Administration, the routine use statements included herein are effective November 20, 1987.

Approved: October 1, 1987.

Thomas K. Turnage,

Administrator.

Notice of System of Records

69VA114

SYSTEM NAME:

Ionizing Radiation Registry–VA

SYSTEM LOCATION:

Records are maintained at the VA Data Processing Center, Austin, Texas 78772 and VA Central Office, Washington, D.C. 20402.
